**Morgan Stanley Emerging Markets Domestic Debt Fund, Inc.**

Overview (unaudited)

**Letter to Stockholders**

**Performance**

For the six months ended April 30, 2008, the Morgan Stanley Emerging Markets Domestic Debt Fund, Inc. (the Fund ) had total returns, based on net asset value and market value per share (including reinvestment of distributions), of -4.98%, net of fees, and 0.96%, respectively, compared to its benchmark, the JPMorgan Government Bond Index - Emerging Markets Global Diversified Index (the Index ) which returned 2.53%. On April 30, 2008, the closing price of the Fund 's shares on the New York Stock Exchange was \$17.57, representing a 1.8% discount to the Fund 's net asset value per share. Past performance is no guarantee of future results.

**Factors Affecting Performance**

- Factors external to the emerging markets continued to drive much of the turbulence in the global financial markets during the reporting period. The more notable victims of the so-called crisis have been CDOs (collateralized debt obligations), SIVs (structured investment vehicles), most mortgage-related securities, and other such structured products.
- However, the volatility in these and other credit markets did not trigger a panic or sell-off in the emerging markets domestic debt market. Emerging markets remained liquid and trading volumes were robust. Most emerging market countries are highly liquid and do not need access to the international capital markets. Foreign exchange (FX) reserves far exceeded short-term debt and, as such, there was no internally driven liquidity crisis in the emerging markets. Moreover, the massive accumulation of FX reserves in conjunction with the lower debt levels now commonplace across the emerging world provided comfort to investors fearing liquidity-induced corrections in other markets. In light of these and other positive developments, many emerging market countries (such as Peru and Brazil) were upgraded by rating agencies during the reporting period.
- The Federal Open Market Committee continued easing monetary policy and used unorthodox policy tools to inject liquidity into the U.S. financial system. In this environment, emerging markets domestic debt markets were firmly positive during the reporting period.

**Management Strategies**

## Edgar Filing: Morgan Stanley Emerging Markets Domestic Debt Fund, Inc. - Form N-CSRS

- Positive contributors to relative performance versus the Index included an overweight in Colombia, where the currency in particular benefited from strong foreign direct investment flows, a prudent fiscal policy framework, and investor attraction towards double-digit interest rates. The Colombian Peso gained more than 11% versus the U.S. dollar.
- Exposure to Egypt was also beneficial as rising prices increased expectations for a stronger currency during the reporting period. This is because, absent a monetary transmission mechanism for interest rates, currency strength is the only way the authorities can temper inflation pressures.
- The Fund's yield-curve positioning in South Africa was also beneficial. The country's structural energy shortages became more apparent and surging oil prices stoked inflation expectations. As a result, the yield curve steepened during the reporting period; the portfolio's positioning in the very short-end of the yield curve aided relative returns.
- Detractors from relative gains included an overweight in Argentina. Argentina's inflation-linked bonds declined during the period, reflecting investors' doubts about the legitimacy of reported inflation or prospects for structural reform under the new administration.
- The Fund's general underexposure to the European currency bloc (which includes emerging Europe currencies such as the Hungarian forint, Czech koruna, Slovak koruna and Polish zloty) further detracted from returns. Specifically, underweights in the Czech Republic and Poland hampered relative performance. During the period, both countries' currencies rallied versus the Euro, which in turn had gained significantly relative to the U.S. dollar. However, the portfolio retained a currency hedge which partially offset the underperformance in this region.
- In our view, emerging market countries could be a source of stability for the global economy as they represent an increasing share of global growth. However, today's less hospitable global environment, the short-term fears of a sharp slowdown in the U.S. and Europe, and the deleveraging process underway in other credit markets are likely to keep risk premia high.

Sincerely,

Ronald E. Robison

President and Principal Executive Officer

May 2008

(1) Total investment return based on net asset value per share on the last business day of the period reflects the effects of changes in net asset value on the performance of the Fund during the period, and assumes dividends and distributions, if any, were reinvested. This percentage is not an indication of the performance of a stockholder's investment in the Fund based on market value due to differences between the market price of the stock and the net asset value of the Fund.

Per share amount is based on average shares outstanding.

<sup>^</sup> Commencement of Operations

\* Annualized

\*\* Not Annualized

Reflects the rebate of certain Fund expenses in connection with the investments in Morgan Stanley Institutional Liquidity Money Market Portfolio Institutional Class during the period. As a result of such rebate, the expenses as a percentage of its net assets were effected by approximately 0.01%.

The accompanying notes are an integral part of the financial statements.

11

**Morgan Stanley Emerging Markets Domestic Debt Fund, Inc.**

April 30, 2008 (unaudited)

**Notes to Financial Statements**

The Morgan Stanley Emerging Markets Domestic Debt Fund, Inc. (the Fund) was incorporated in Maryland on January 25, 2007 and is registered as a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the 1940 Act). The Fund's primary investment objective is to seek a high level of current income, with a secondary investment objective of longterm capital appreciation. The Fund seeks to achieve its investment objectives by investing, under normal circumstances, at least 80% of its managed assets in emerging markets domestic debt.

The Fund is authorized to issue 100,000,000 shares of \$0.01 par value common stock and 50,000,000 shares of \$0.01 par value preferred stock. The Fund had no operations until April 24, 2007, other than matters relating to its organization and registration and sale and issuance to Morgan Stanley Investment Management Inc. (the Adviser or MS Investment Management) of 5,236 shares of common stock at an aggregate purchase price of \$100,000. The Adviser, on behalf of the Fund, will incur all of the Fund's organizational costs, estimated at \$10,000. The Adviser also has agreed to pay the amount by which the offering costs of the Fund (other than the sales load) exceed \$0.04 per share of the Fund's common shares. The aggregate offering expenses (other than the sales load) currently are estimated to be \$600,000 (including amounts to be paid by the Adviser). On April 24, 2007, the Fund sold 63,750,000 common shares in an initial public offering. Proceeds to the Fund were \$1,217,025,000 after deducting underwriting commissions and \$600,000 of offering expenses. On May 7, 15 and 29, 2007 the Fund sold 6,000,000, 2,000,000 and 1,562,500 common shares, respectively, pursuant to an over allotment agreement with the underwriters for net proceeds of \$182,643,750 after deducting underwriting commissions.

**A. Accounting Policies:** The following significant accounting policies are in conformity with U.S. generally accepted accounting principles. Such policies are consistently followed by the Fund in the preparation of its financial statements. U.S. generally accepted accounting principles may require management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results may differ from those estimates.

**1. Security Valuation:** Bonds and other fixed income securities may be valued according to the broadest and most representative market. In addition, bonds and other fixed income securities may be valued on the basis of prices provided by a pricing service. The prices provided by a pricing service take into account broker dealer market price quotations for institutional size trading in similar groups of securities, security quality, maturity, coupon and other security characteristics as well as any developments related to the specific securities. Securities listed on a foreign exchange are valued at their closing price. Unlisted securities and listed securities not traded on the valuation date for which market quotations are readily available are valued at the mean between the current bid and ask prices obtained from reputable brokers. Equity securities listed on a U.S. exchange are valued at the latest quoted sales price on the valuation date. Equity securities listed or traded on NASDAQ, for which market quotations are available, are valued at the NASDAQ Official Closing Price. Debt securities purchased with remaining maturities of 60 days or less are valued at amortized cost, if it approximates market value.

## Edgar Filing: Morgan Stanley Emerging Markets Domestic Debt Fund, Inc. - Form N-CSRS

All other securities and investments for which market values are not readily available, including restricted securities, and those securities for which it is inappropriate to determine prices in accordance with the aforementioned procedures, are valued at fair value as determined in good faith under procedures adopted by the Board of Directors (the Director ), although the actual calculations may be done by others. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, or the appropriate stock exchange (for exchange-traded securities), analysis of the issuer's financial statements or other available documents and, if necessary, available information concerning other securities in similar circumstances.

Most foreign markets close before the New York Stock Exchange (NYSE). Occasionally, developments that could affect the closing prices of securities and other assets may occur between the times at which valuations of such securities are determined (that is, close of the foreign market on which the securities trade) and the close of business on the NYSE. If these developments are expected to materially affect the value of the securities, the valuations may be adjusted to reflect the estimated fair value as of the close of the NYSE, as determined in good faith under procedures established by the Directors.

**2. Reverse Repurchase Agreements:** The Fund may enter into reverse repurchase agreements with institutions that the Fund's investment adviser has determined are creditworthy. Under a reverse repurchase agreement, the

**Morgan Stanley Emerging Markets Domestic Debt Fund, Inc.**

April 30, 2008 (unaudited)

**Notes to Financial Statements (cont d)**

Fund sells securities and agrees to repurchase them at a mutually agreed upon date and price. Reverse repurchase agreements involve the risk that the market value of the securities purchased with the proceeds from the sale of securities received by the Fund may decline below the price of the securities the Fund is obligated to repurchase. Reverse repurchase agreements also involve credit risk with the counterparty to the extent that the value of securities subject to repurchase exceed the Fund's liability under the reverse repurchase agreement. Securities subject to repurchase under reverse repurchase agreements, if any, are designated as such in the Portfolio of Investments.

At April 30, 2008, the Fund had reverse repurchase agreements outstanding with Lehman Brothers as follows:

		<b>Maturity in less than 366 Days</b>
<b>Lehman Brothers Agreement</b>		
Value of Securities Subject to Repurchase (000)	\$	161,410
Liability Under Reverse Repurchase Agreement (000)	\$	149,234
Weighted Average Days to Maturity		12.74

The weighted average weekly balance of reverse repurchase agreements outstanding during the six months ended April 30, 2008 was approximately \$187,785,000 at a weighted average weekly interest rate of 4.01%.

**3. Foreign Currency Translation:** The books and records of the Fund are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars at the mean of the bid and asked prices of such currencies against U.S. dollars last quoted by a major bank as follows:

- investments, other assets and liabilities at the prevailing rates of exchange on the valuation date;
- investment transactions and investment income at the prevailing rates of exchange on the dates of such transactions.

Although the net assets of the Fund are presented at the foreign exchange rates and market values at the close of the period, the Fund does not isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of the securities held at period end. Similarly, the Fund does not isolate the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of securities sold during the period. Accordingly, realized and unrealized foreign currency gains (losses) due to securities transactions are included in the reported net realized and unrealized gains (losses) on investment

transactions and balances.

Net realized gains (losses) on foreign currency transactions represent net foreign exchange gains (losses) from sales and maturities of foreign currency exchange contracts, disposition of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amount of investment income and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains (losses) from valuing foreign currency denominated assets and liabilities at period end exchange rates are reflected as a component of unrealized appreciation (depreciation) on investments and foreign currency translations in the Statement of Assets and Liabilities. The change in net unrealized currency gains (losses) on foreign currency translations for the period is reflected in the Statement of Operations.

A significant portion of the Fund's managed assets consist of securities of issuers located in emerging markets or which are denominated in foreign currencies. Such investments may be concentrated in a limited number of countries and regions and may vary throughout the year. Changes in currency exchange rates will affect the value of and investment income from foreign currency denominated securities. Emerging market securities are often subject to greater price volatility, limited capitalization and liquidity, and higher rates of inflation than U.S. securities. In addition, emerging market securities may be subject to substantial governmental involvement in the economy and greater social, economic and political uncertainty.

**4. Derivatives:** The Fund may use derivatives to achieve its investment objectives. The Fund may engage in transactions in futures contracts on foreign currencies, stock indices, as well as in options, swaps and structured notes. Consistent with the Fund's investment objectives and policies, the Fund may use derivatives for non-hedging as well as hedging purposes.

Following is a description of derivative instruments that the Fund has utilized and their associated risks:

**Morgan Stanley Emerging Markets Domestic Debt Fund, Inc.**

April 30, 2008 (unaudited)

**Notes to Financial Statements (cont d)**

**Foreign Currency Exchange Contracts:** The Fund may enter into foreign currency exchange contracts to attempt to protect securities and related receivables and payables against changes in future foreign exchange rates and, in certain situations, to gain exposure to a foreign currency. A foreign currency exchange contract is an agreement between two parties to buy or sell currency at a set price on a future date. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is marked-to-market daily and the change in market value is recorded by the Fund as unrealized gain or loss. The Fund records realized gains or losses when the contract is closed equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. Risk may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and is generally limited to the amount of unrealized gain on the contracts, if any, at the date of default. Risks may also arise from unanticipated movements in the value of a foreign currency relative to the U.S. dollar.

**Purchased & Written Options:** The Fund may write covered call and put options on portfolio securities and other financial instruments. Premiums are received and are recorded as liabilities. The liabilities are subsequently adjusted to reflect the current value of the options written. Premiums received from writing options which expire are treated as realized gains. Premiums received from writing options which are exercised or are closed are added to or offset against the proceeds or amount paid on the transaction to determine the net realized gain or loss. By writing a covered call option, the Fund, in exchange for the premium, foregoes the opportunity for capital appreciation above the exercise price should the market price of the underlying security increase. By writing a put option, the Fund, in exchange for the premium, accepts the risk of having to purchase a security at an exercise price that is above the current market price.

The Fund may purchase call and put options on its securities or other financial instruments. The Fund may purchase call options to protect against an increase in the price of the security or financial instrument it anticipates purchasing. The Fund may purchase put options on securities which it holds or other financial instruments to protect against a decline in the value of the security or financial instrument or to close out covered written put positions. Risks may arise from an imperfect correlation between the change in market value of the securities purchased or sold by the Fund and from the possible lack of a liquid secondary market for an option. The maximum exposure to loss for any purchased option is limited to the premium initially paid for the option.

At April 30, 2008, the Fund did not have any outstanding options written.

**Securities Sold Short:** The Fund may sell securities short. A short sale is a transaction in which the Fund sells securities it may or may not own, but has borrowed, in anticipation of a decline in the market price of the securities. The Fund is obligated to replace the borrowed securities at their market price at the time of replacement. The Fund may have to pay a premium to borrow the securities as well as pay any dividends or interest payable on the securities until they are replaced. The Fund's obligation to replace the securities borrowed in connection with a short sale will generally be secured by collateral deposited with the broker that consists of cash, U.S. government securities or other liquid, high grade debt obligations. In addition, the Fund will either place in a segregated account with its custodian or denote on its custody records an amount of cash, U.S. government securities or other liquid high grade debt obligations equal to the difference, if any, between (1) the market value of the securities sold at the time they were sold short and (2) any cash, U.S. government securities or other liquid high grade debt obligations deposited as collateral with the broker in connection with the short sale (not including the proceeds of the short sale). Short sales by the Fund involve certain risks and special considerations. Possible losses from short sales differ from losses that could be incurred from a purchase of a security because losses from short sales may be unlimited, whereas losses from purchases cannot exceed the total amount invested.

Structured Securities: The Fund may invest in interests in entities organized and operated solely for the purpose of restructuring the investment characteristics of sovereign debt obligations. This type of restructuring involves the deposit with or purchase by an entity of specified instruments and the issuance by that entity of one or more classes of securities ( Structured Securities ) backed by, or representing interests in, the underlying instruments. Structured Securities generally will expose the Fund to

**Morgan Stanley Emerging Markets Domestic Debt Fund, Inc.**

April 30, 2008 (unaudited)

**Notes to Financial Statements (cont d)**

credit risks of the underlying instruments as well as of the issuer of the Structured Security. Structured Securities are typically sold in private placement transactions with no active trading market. Investments in Structured Securities may be more volatile than their underlying instruments, however, any loss is limited to the amount of the original investment.

**Over-the-Counter Trading:** Securities and other derivative instruments that may be purchased or sold by the Fund may consist of instruments not traded on an exchange. The risk of nonperformance by the obligor on such an instrument may be greater, and the ease with which the Fund can dispose of or enter into closing transactions with respect to such an instrument may be less, than in the case of an exchange-traded instrument. In addition, significant spreads may exist between bid and ask prices for derivative instruments that are not traded on an exchange. Derivative instruments not traded on exchanges are also not subject to the same type of government regulation as exchange traded instruments, and many of the protections afforded to participants in a regulated environment may not be available in connection with such transactions.

**Swap Agreements:** The Fund may enter into swap agreements to exchange the interest rate on, or return generated by, one nominal instrument for the return generated by another nominal instrument. Cash collateral for swap agreements, if applicable, is deposited with the broker serving as counterparty to the agreement, and is included in Due from (to) Broker on the Statement of Assets & Liabilities. The following summarizes swaps entered into by the Fund:

**Credit Default Swaps:** Credit default swaps involve commitments to pay a fixed rate in exchange for payment if a credit event affecting a third party (the referenced company) occurs. Credit events may include a failure to pay interest, bankruptcy, or restructuring. The Fund accrues for interim payments on swap contracts on a daily basis, with the net amount recorded within unrealized appreciation (depreciation) of swap contracts on the Statement of Assets and Liabilities. Once interim payments are settled in cash, the net amount is recorded within realized gain (loss) on swaps in the Statement of Operations. Credit default swaps are marked-to-market daily based upon quotations from market makers and the change, if any, is recorded as unrealized appreciation or depreciation in the Statement of Operations.

**Interest Rate Swaps:** Interest rate swaps involve the exchange of commitments to pay and receive interest based on a notional principal amount. The Fund accrues for interim payments on swap contracts on a daily basis, with the net amount recorded within unrealized appreciation (depreciation) of swap contracts on the Statement of Assets and Liabilities. Once interim payments are settled in cash, the net amount is recorded within realized gain (loss) on swaps on the Statement of Operations. In a zero-coupon interest rate swap, payments only occur at maturity, at which time one counterparty pays the total compounded fixed rate over the life of the swap and the other pays the total compounded floating rate that would have been earned had a series of LIBOR investments been rolled over through the life of the swap. The Fund amortizes its interest payment obligation over the life of the swap. The amortized portion of this payment is recorded in the Statement of Operations as an adjustment to interest income. The unamortized portion of this payment is included in Due from (to) Broker on the Statement of Assets and Liabilities. Interest rate swaps are marked-to-market daily based upon quotations from market makers and the change, if any, is

recorded as unrealized appreciation or depreciation in the Statement of Operations.

*Total Return Swaps:* Total return swaps involve commitments to pay interest in exchange for a market-linked return based on a notional amount. To the extent the total return of the security or index underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Fund will receive a payment from or make a payment to the counterparty, respectively. Total return swaps are marked-to-market daily based upon quotations from market makers and the change, if any, is recorded as unrealized appreciation or depreciation in the Statement of Operations. Periodic payments received or made at the end of each measurement period, but prior to termination, are recorded as realized gains or losses in the Statement of Operations.

Realized gains or losses on maturity or termination of swaps are presented in the Statement of Operations. Because there is no organized market for these swap agreements, the unrealized gain/loss reported in the Statement of Assets & Liabilities may differ from that which would be

**Morgan Stanley Emerging Markets Domestic Debt Fund, Inc.**

April 30, 2008 (unaudited)

**Notes to Financial Statements (cont d)**

realized in the event the Fund terminated its position in the agreement. Risks may arise upon entering into these agreements from the potential inability of the counterparties to meet the terms of the agreements and are generally limited to the amount of net interest payments to be received, if any, at the date of default. Risks also arise from potential losses from adverse market movements and such losses could exceed the related amounts shown in the Statement of Assets & Liabilities.

**5. New Accounting Pronouncements:** In September 2006, Statement of Financial Accounting Standards No. 157, Fair Value Measurements ( SFAS 157 ), was issued and is effective for fiscal years beginning after November 15, 2007. SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. As of April 30, 2008, the Adviser does not believe the adoption of SFAS 157 will impact the amounts reported in the financial statements, however, additional disclosures will be required about the inputs used to develop the measurements of fair value and the effect of certain measurements reported in the Statement of Operations for a fiscal period.

On March 19, 2008, Financial Accounting Standards Board released Statement of Financial Accounting Standards No. 161, Disclosures about Derivative Instruments and Hedging Activities ( SFAS 161 ). SFAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The application of SFAS 161 is required for fiscal years beginning after November 15, 2008 and interim periods within those fiscal years. At this time, management is evaluating the implications of SFAS 161 and its impact on the financial statements has not yet been determined.

**6. Other:** Security transactions are accounted for on the date the securities are purchased or sold. Realized gains and losses on the sale of investment securities are determined on the specific identified cost basis. Interest income is recognized on the accrual basis and discounts and premiums on investments purchased are accreted or amortized in accordance with the effective yield method over their respective lives, except where collection is in doubt. Distributions to stockholders are recorded on the ex-dividend date.

**B. Investment Advisory Fees:** The Adviser provides investment advisory services to the Fund under the terms of an Investment Advisory and Management Agreement (the Agreement ). Under the Agreement, the Adviser is paid a fee computed weekly and payable monthly at an annual rate of 1.00% of the Fund's average weekly managed assets.

**C. Administration Fees:** MS Investment Management also serves as Administrator to the Fund pursuant to an Administration Agreement. Under the Administration Agreement, the administration fee is 0.08% of the Fund's average weekly managed assets. Under a sub-administration agreement between the Administrator and JPMorgan

Investor Services Co. ( JPMIS ), a corporate affiliate of JPMorgan Chase Bank, N.A., JPMIS provides certain administrative services to the Fund. For such services, the Administrator pays JPMIS a portion of the fee the Administrator receives from the Fund. Administration costs (including out-of-pocket expenses) incurred in the ordinary course of providing services under the Administration Agreement, except pricing services and extraordinary expenses, are covered under the administration fee.

**D. Custodian Fees:** JPMorgan Chase Bank, N.A., (the Custodian ) and its affiliates serve as Custodian for the Fund. The Custodian holds cash, securities, and other assets of the Fund as required by the 1940 Act. Custody fees are payable monthly based on assets held in custody, investment purchases and sales activity and account maintenance fees, plus reimbursement for certain out-of-pocket expenses.

The Fund has entered into an arrangement with its Custodian whereby credits realized on uninvested cash balances were used to offset a portion of the Fund's expenses. These custodian credits are shown as Expense Offset in the Statement of Operations.

**E. Federal Income Taxes:** It is the Fund's intention to continue to qualify as a regulated investment company and distribute all of its taxable income. Accordingly, no provision for Federal income taxes is required in the financial statements. The Fund files tax returns with the U.S. Internal Revenue Service and various states. Generally, the tax authorities can examine all tax returns filed for the last three years.

The Fund may be subject to taxes imposed by countries in which it invests. Such taxes are generally based on income and/or

**Morgan Stanley Emerging Markets Domestic Debt Fund, Inc.**

April 30, 2008 (unaudited)

**Notes to Financial Statements (cont d)**

capital gains earned or repatriated. Taxes are accrued and applied to net investment income, net realized gains and net unrealized appreciation as such income and/or gains are earned.

The Fund adopted the provisions of the FASB Interpretation number 48 *Accounting for Uncertainty in Income Taxes ( the Interpretation )*, on April 30, 2008. The Interpretation is to be applied to all open tax years as of the date of effectiveness. As of April 30, 2008, this did not result in an impact to the Fund's financial statements.

The tax character of distributions paid may differ from the character of distributions shown on the Statement of Changes in Net Assets due to short-term capital gains being treated as ordinary income for tax purposes. The tax character of distributions paid from net investment income during the fiscal year ended 2007 was approximately \$43,991,000.

The amount and character of income and capital gain distributions to be paid by the Fund are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles. The book/ tax differences are considered either temporary or permanent in nature.

Temporary differences are attributable to differing book and tax treatments for the timing of the recognition of gains and losses on certain investment transactions and the timing of the deductibility of certain expenses.

Permanent differences, primarily due to gains and losses on foreign options, foreign futures and swap transactions, resulted in the following reclassifications among the components of net assets at October 31, 2007:

**Increase (Decrease)**

<b>Accumulated Undistributed (Distributions in Excess of) Net Investment Income (Loss) (000)</b>	<b>Accumulated Net Realized Gain (Loss) (000)</b>	<b>Paid-in Capital (000)</b>
\$ 14,680	\$ (15,098)	\$ 418

## Edgar Filing: Morgan Stanley Emerging Markets Domestic Debt Fund, Inc. - Form N-CSRS

At October 31, 2007, the components of distributable earnings on a tax basis were as follows:

<b>Undistributed Ordinary Income (000)</b>	<b>Undistributed Long-term Capital Gain (000)</b>
\$ 55,734	\$

At April 30, 2008, the U.S. Federal income tax cost basis of investments was approximately \$1,833,780,000 and, accordingly, net unrealized depreciation for U.S. Federal income tax purposes was \$90,814,000 of which \$50,362,000 related to appreciated securities and \$141,176,000 related to depreciated securities.

**F. Contractual Obligations:** The Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

**G. Security Transactions and Transactions with Affiliates:** The Fund invests in the Institutional Class of the Morgan Stanley Institutional Liquidity Money Market Portfolio, an open-end management investment company managed by the Adviser. Investment Advisory fees paid by the Fund are reduced by an amount equal to its pro-rata share of advisory and administration fees paid by the Morgan Stanley Institutional Liquidity Money Market Portfolio. For the six months ended April 30, 2008, advisory fees paid were reduced by approximately \$8,000 relating to the Fund's investment in the Morgan Stanley Institutional Liquidity Money Market Portfolio.

A summary of the Fund's transactions in shares of the affiliated issuer during the six months ended April 30, 2008 is as follows:

<b>Market Value October 31, 2007 (000)</b>	<b>Purchases at Cost (000)</b>	<b>Sales Proceeds (000)</b>	<b>Dividend Income (000)</b>	<b>Market Value April 30, 2008 (000)</b>
\$ 21,731	\$ 492,988	\$ 464,727	\$ 419	\$ 49,992

During the six months ended April 30, 2008, the Fund made purchases and sales totaling approximately \$749,399,000 and \$821,429,000 respectively, of investment securities other than long-term U.S. Government securities and short-term investments. There were no purchases or sales of long-term U.S. Government securities.

During the six months ended April 30, 2008, the Fund incurred no brokerage commissions with Morgan Stanley & Co. Incorporated, an affiliate of the Adviser.

**H. Credit Facility:** The Fund will use the proceeds from the use of leverage to purchase additional securities consistent with the Fund's investment objectives, policies and strategies. The Fund has engaged JPMorgan Securities Inc. to arrange a syndicate of lenders to provide a revolving line of credit facility in the amount of up to \$475,000,000.

Pursuant to the agreement

**Morgan Stanley Emerging Markets Domestic Debt Fund, Inc.**

April 30, 2008 (unaudited)

**Notes to Financial Statements (cont d)**

among the parties, JPMorgan Chase Bank, N.A., as lender (the Lender ) has agreed to commit up to \$75,000,000 of the facility amount. The facility is expected to have the following terms and conditions, among others: The term of the facility is 364 days, which term may be extended under certain conditions. The loans under the facility will bear interest at a rate per annum, at the election of the Fund, equal to (a) the higher of (i) the Conduit Lender's prime rate and (ii) the Federal Funds Effective Rate or (b) the rate of LIBOR for the applicable interest period plus a spread of 0.30%. The loans will be secured by a fully perfected first priority lien on all of the assets of the Fund capable of being pledged. There will be a commitment fee on the unused portion of the facility in the amount of 0.08% of the average daily unused portion of the credit facility. Effective May 1, 2008 the credit facility has been amended. The Fund has engaged JPMorgan Securities Inc. to arrange a syndicate of lenders to provide a revolving line of credit facility in an amount up to \$375,000,000. The loans under the facility will bear interest at a rate per annum, at the election of the Fund, equal to (a) the higher of (i) the Conduit Lender's prime rate and (ii) the Federal Funds Effective Rate or (b) the rate of LIBOR for the applicable interest period plus a spread of 1.00%. The loans will be secured by a fully perfected first priority lien on all of the assets of the Fund capable of being pledged. There will be a commitment fee on the unused portion of the facility in the amount of 0.20% of the average daily unused portion of the credit facility. The average borrowings for the six months ended April 30, 2008 were approximately \$246,839,000 during a period of 182 days. During the same period, the Fund incurred approximately \$5,056,000 in interest expense associated with the outstanding balances.

**I. Other:** On June 20, 2007, the Fund commenced a share repurchase program for purposes of enhancing stockholder value and reducing the discount at which the Fund's shares trade from their net asset value. For the six months ended April 30, 2008, the Fund repurchased 33,000 of its shares at an average discount of 7.42% from the net asset value per share. Since the inception of the program, the Fund has repurchased 33,000 of its shares at an average discount of 7.42% from net asset value per share. The Fund expects to continue to repurchase its outstanding shares at such time and in such amounts as it believes will further the accomplishment of the foregoing objectives, subject to review by the Directors.

On March 24, 2008, the Officers of the Fund, pursuant to authority granted by the Directors, declared a distribution of \$0.50 per share, derived from net investment income, payable on April 15, 2008 to stockholders of record on March 31, 2008.

**For More Information About Portfolio Holdings**

The Fund provides a complete schedule of portfolio holdings in its semi-annual and annual reports within 60 days of the end of the Fund's second and fourth fiscal quarters. The semi-annual reports and the annual reports are filed electronically with the SEC on Form N-CSRS and Form N-CSR, respectively. Morgan Stanley also delivers the semi-annual and annual reports to Fund stockholders and makes these reports available on its public website, [www.morganstanley.com/msim](http://www.morganstanley.com/msim). Each Morgan Stanley fund also files a complete schedule of portfolio holdings with the SEC for the Fund's first and third fiscal quarters on Form N-Q. Morgan Stanley does not deliver the reports for the first and third fiscal quarters to stockholders, nor are the reports posted to the Morgan Stanley public website. You may, however, obtain the Form N-Q filings (as well as the Form N-CSR and N-CSRS filings) by accessing the SEC's website, [www.sec.gov](http://www.sec.gov). You may also review and copy them at the SEC's public reference room in Washington, DC. Information on the operation of the SEC's Public Reference Room may be obtained by calling the SEC at 1(800) SEC-0330. You can also request copies of these materials, upon payment of a duplicating fee, by electronic request at the SEC's e-mail address ([publicinfo@sec.gov](mailto:publicinfo@sec.gov)) or by writing the public reference section of the SEC, Washington, DC 20549- 0102.

In addition to filing a complete schedule of portfolio holdings with the SEC each fiscal quarter, the Fund makes portfolio holdings information available by periodically providing the information on its public website, [www.morganstanley.com/msim](http://www.morganstanley.com/msim).

The Fund provides a complete schedule of portfolio holdings on the public website on a calendar-quarter basis approximately 31 calendar days after the close of the calendar quarter. The Fund also provides Top 10 holdings information on the public website approximately 15 business days following the end of each month. You may obtain copies of the Fund's monthly or calendar-quarter website postings, by calling 1(800) 231-2608.

**Proxy Voting Policy and Procedures and Proxy Voting Record**

A copy of (1) the Fund's policies and procedures with respect to the voting of proxies relating to the Fund's portfolio securities; and (2) how the Fund voted proxies relating to portfolio securities during the most recent twelve-month period ended June 30, is available without charge, upon request, by calling 1 (800) 548-7786 or by visiting our website at [www.morganstanley.com/msim](http://www.morganstanley.com/msim). This information is also available on the SEC's web site at [www.sec.gov](http://www.sec.gov).

April 30, 2008 (unaudited)

Revised Investment Policy

The Board of Directors approved changes/clarifications in the investment policies discussed below:

A portion of the Fund's investments in emerging markets securities may include investments in microfinance loans. Microfinance loans are typically very small loans (microcredit) made for providing the means for people who are not served by traditional banking systems to expand their business or finance their families' basic needs by providing access to affordable credit. Microfinance loans carry many of the same risks associated with investing in emerging markets countries, but because some of the microfinance loans may be used to fund crop growing and livestock, microfinance loans may also be subject to climate and geography risks. In addition, most micro-clients have low income and little or no previous credit history. As a result, there is no assurance that micro-credit clients will be able to repay the microfinance loans.

**Morgan Stanley Emerging Markets Domestic Debt Fund, Inc.**

Dividend Reinvestment Plan

Pursuant to the Dividend Reinvestment Plan (the Plan), each stockholder will be deemed to have elected, unless Computershare Trust Company, N.A. (the Plan Agent) is otherwise instructed by the stockholder in writing, to have all distributions automatically reinvested in Fund shares.

Dividend and capital gain distributions will be reinvested on the reinvestment date in full and fractional shares. If the market price per share equals or exceeds net asset value per share on the reinvestment date, the Fund will issue shares to participants at net asset value or, if net asset value is less than 95% of the market price on the reinvestment date, shares will be issued at 95% of the market price. If net asset value exceeds the market price on the reinvestment date, participants will receive shares valued at market price. The Fund may purchase shares of its Common Stock in the open market in connection with dividend reinvestment requirements at the discretion of the Board of Directors. Should the Fund declare a dividend or capital gain distribution payable only in cash, the Plan Agent will purchase Fund shares for participants in the open market as agent for the participants.

The Plan Agent's fees for the reinvestment of dividends and distributions will be paid by the Fund. However, each participant's account will be charged a pro rata share of brokerage commissions incurred on any open market purchases effected on such participant's behalf. Although stockholders in the Plan may receive no cash distributions, participation in the Plan will not relieve participants of any income tax which may be payable on such dividends or distributions.

In the case of stockholders, such as banks, brokers or nominees, that hold shares for others who are the beneficial owners, the Plan Agent will administer the Plan on the basis of the number of shares certified from time to time by the stockholder as representing the total amount registered in the stockholder's name and held for the account of beneficial owners who are participating in the Plan.

Stockholders who do not wish to have distributions automatically reinvested should notify the Plan Agent in writing. There is no penalty for non-participation or withdrawal from the Plan, and stockholders who have previously withdrawn from the Plan may rejoin at any time. Requests for additional information or any correspondence concerning the Plan should be directed to the Plan Agent at:

**An Important Notice Concerning Our**

**U.S. Privacy Policy (unaudited)**

We are required by federal law to provide you with a copy of our Privacy Policy annually.

The following Policy applies to current and former individual investors in Morgan Stanley Institutional closed end funds. This Policy is not applicable to partnerships, corporations, trusts or other non-individual clients or account holders. Please note that we may amend this Policy at any time, and will inform you of any changes to this Policy as required by law.

**We Respect Your Privacy**

We appreciate that you have provided us with your personal financial information. We strive to maintain the privacy of such information while we help you achieve your financial objectives. This Policy describes what non-public personal information we collect about you, why we collect it, and when we may share it with others. We hope this Policy will help you understand how we collect and share non-public personal information that we gather about you. Throughout this Policy, we refer to the non-public information that personally identifies you or your accounts as personal information.

**1. What Personal Information Do We Collect About You?**

To serve you better and manage our business, it is important that we collect and maintain accurate information about you. We may obtain this information from applications and other forms you submit to us, from your dealings with us, from consumer reporting agencies, from our Web sites and from third parties and other sources.

For example:

- We may collect information such as your name, address, e-mail address, telephone/fax numbers, assets, income and investment objectives through applications and other forms you submit to us.

- We may obtain information about account balances, your use of account(s) and the types of products and services you prefer to receive from us through your dealings and transactions with us and other sources.
- We may obtain information about your creditworthiness and credit history from consumer reporting agencies.
- We may collect background information from and through third-party vendors to verify representations you have made and to comply with various regulatory requirements.
- If you interact with us through our public and private Web sites, we may collect information that you provide directly through online communications (such as an e-mail address). We may also collect information about your Internet service provider, your domain name, your computer's operating system and Web browser, your use of our Web sites and your product and service preferences, through the use of cookies. Cookies recognize your computer each time you return to one of our sites, and help to improve our sites' content and personalize your experience on our sites by, for example, suggesting offerings that may interest you. Please consult the Terms of Use of these sites for more details on our use of cookies.

## **2. When Do We Disclose Personal Information We Collect About You?**

To provide you with the products and services you request, to serve you better and to manage our business, we may disclose personal information we collect about you to our affiliated companies and to non-affiliated third parties as required or permitted by law.

**A. Information We Disclose to Our Affiliated Companies.** We do not disclose personal information that we collect about you to our affiliated companies except to enable them to provide services on our behalf or as otherwise required or permitted by law.

**Morgan Stanley Emerging Markets Domestic Debt Fund, Inc.**

**Morgan Stanley Institutional Closed End Funds**

**An Important Notice Concerning Our**

**U.S. Privacy Policy (cont d)**

**B. Information We Disclose to Third Parties.** We do not disclose personal information that we collect about you to non-affiliated third parties except to enable them to provide services on our behalf, to perform joint marketing agreements with other financial institutions, or as otherwise required or permitted by law. For example, some instances where we may disclose information about you to nonaffiliated third parties include: for servicing and processing transactions, to offer our own products and services, to protect against fraud, for institutional risk control, to respond to judicial process or to perform services on our behalf. When we share personal information with these companies, they are required to limit their use of personal information to the particular purpose for which it was shared and they are not allowed to share personal information with others except to fulfill that limited purpose.

**3. How Do We Protect the Security and Confidentiality of Personal Information We Collect About You?**

We maintain physical, electronic and procedural security measures to help safeguard the personal information we collect about you. We have internal policies governing the proper handling of client information. Third parties that provide support or marketing services on our behalf may also receive personal information, and we require them to adhere to confidentiality standards with respect to such information.
