**TF FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS**

NOTE 1 - PRINCIPLES OF CONSOLIDATION

The consolidated financial statements as of September 30, 2008 (unaudited) and December 31, 2007 and for the three and nine-month periods ended September 30, 2008 and 2007 (unaudited) include the accounts of TF Financial Corporation (the Company) and its wholly owned subsidiaries Third Federal Bank (the Bank), TF Investments Corporation and Penns Trail Development Corporation. The Company's business is conducted principally through the Bank. All intercompany accounts and transactions have been eliminated in consolidation.

NOTE 2 - BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements were prepared in accordance with instructions for Form 10-Q and, therefore, do not include all of the disclosures or footnotes required by accounting principles generally accepted in the United States of America (GAAP). In the opinion of management, all adjustments, consisting of normal recurring accruals, necessary for fair presentation of the consolidated financial statements have been included. The results of operations for the period ended September 30, 2008 are not necessarily indicative of the results which may be expected for the entire fiscal year or any other period. For further information, refer to consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2007.

NOTE 3 - CONTINGENCIES

The Company, from time to time, is a party to routine litigation that arises in the normal course of business. In the opinion of management, the resolution of this litigation, if any, would not have a material adverse effect on the Company's consolidated financial position or results of operations.

NOTE 4 - OTHER COMPREHENSIVE INCOME

The Company follows Statement of Financial Accounting Standard (SFAS) No. 130, Reporting Comprehensive Income. SFAS No. 130 establishes standards to provide prominent disclosure of comprehensive income items. Comprehensive income is the change in equity of a business enterprise during a period from transactions and other events and circumstances from non-owner sources. The components of other comprehensive (loss) income are as follows for the three months ended:

	September 30, 2008

There were 183,918 options to purchase shares of common stock at an average price range of \$28.00 to \$34.14 per share which were outstanding for the three months and nine months ended September 30, 2007 that were not included in the computation of diluted earnings per share because the options' exercise prices were greater than the average market price of the common shares.

NOTE 6 - FAIR VALUE MEASUREMENTS

On January 1, 2008, the Company adopted Financial Accounting Standards Board (FASB) Statement No. 157 (SFAS 157), Fair Value Measurements. SFAS 157 defines fair value, establishes a framework for measuring fair value and expands the related disclosure requirements. SFAS 157 clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. SFAS 157 establishes a fair value measurement hierarchy for inputs in valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements).

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

The fair value hierarchy levels are summarized below:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 inputs are inputs that are observable for the asset or liability, either directly or indirectly.
- Level 3 inputs are unobservable and contain assumptions of the party fair valuing the asset or liability.

Table of Contents

Determination of the appropriate level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement for the instrument or security. Assets and liabilities measured at fair value on a recurring basis segregated by value hierarchy level are summarized below (dollars in thousands):

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of September 30, 2008
Assets				
Investment securities available for sale	\$ 176	\$ 30,152	\$	\$ 30,328
Mortgage-backed securities available for sale		88,067		88,067
Impaired loans			2,076	2,076

Investment securities available for sale and mortgage-backed securities available for sale are valued primarily by a third party pricing agent. Active listed equities are generally classified within Level 1 of the fair value hierarchy. Government-sponsored agency debt securities and corporate bonds are primarily priced through a multi-dimensional relational model, a level 2 hierarchy, which incorporates dealer quotes and other market information including, defined sector breakdown, benchmark yields, base spread, yield to maturity, and corporate actions. Municipal securities are also measured within the level 2 hierarchy using inputs with a series of matrices that reflect benchmark yields, ratings updates, and spread adjustments. Mortgage-backed securities include FNMA and FHLMC certificates and real estate mortgage investment conduits which are valued under a level 2 hierarchy using a matrix correlation to benchmark yields, spread analysis, and prepayment speeds.

Impaired loans are evaluated and valued at the time the loan is identified as impaired, at the lower of the recorded investment in the loan or market value. The loans identified as impaired are real estate secured. Market value is determined by using the value of the collateral securing the loans and is therefore classified as a level 3 hierarchy. The value of the real estate is determined by qualified independent licensed appraisers contracted by the Company to perform the assessment. The appraised value is then discounted based upon management's experience, which includes estimated disposal costs, understanding of the customer and the customer's business as well as economic conditions. Impaired loans are reviewed and evaluated on a quarterly basis for additional impairment and adjusted accordingly, based upon the pertinent conditions.

The Company also measures certain other financial assets at fair value on a non-recurring basis in accordance with GAAP. Adjustments may result from application of lower-of-cost or fair value accounting.

NOTE 7 - STOCK BASED COMPENSATION

The Company has stock benefit plans that allow the Company to grant options and restricted stock to employees and directors. The awards, which have a term of up to 10 years when issued, vest over a three to five year period. The exercise price of each award equals the market price of the Company's stock on the date of the grant. At September 30 2008, there was \$141,000 of total unrecognized compensation cost, net of estimated forfeitures, related to non-vested awards under the Plan. That cost is expected to be recognized over a weighted average period of 6 months.

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

Stock-based compensation expense included in net income related to stock options was \$92,000 and \$98,000 for the quarters ended September 30, 2008 and 2007 respectively, resulting in a tax benefit of \$28,000 and \$30,000, respectively. Stock-based compensation expense included in net income related to stock options was \$278,000 and \$293,000 for the nine months ended September 30, 2008 and 2007 respectively, resulting in a tax benefit of \$86,000 and \$90,000, respectively.

Table of Contents

Option activity under the Company's stock option plan as of September 30, 2008 is as follows:

			2008		
	Number of shares		Weighted average exercise price per share	Weighted average remaining contractual term (in years)	Aggregate intrinsic value (\$ 000)
Outstanding at January 1, 2008	252,576	\$	26.56		
Options granted					
Options exercised	(535)		18.12		
Options forfeited	(6,542)		28.30		
Options expired					
Outstanding at September 30, 2008	245,499	\$	26.54	2.91	\$ 242
Options exercisable at September 30, 2008	185,341	\$	25.84	2.92	\$ 242

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value (the difference between the Company's closing stock price on the last trading day of the third quarter and the exercise price, multiplied by the number of in-the money options).

The aggregate intrinsic value of options exercised during the nine months ended September 30, 2008 and 2007 was \$2,200 and \$1,478,000, respectively. Exercise of stock options during the nine months ended September 30, 2008 and 2007 resulted in cash receipts of \$9,700 and \$1,814,000, respectively.

Stock-based compensation expense included in net income related to restricted stock grants was \$90,000 for each of the quarters ended September 30, 2008 and 2007. Stock-based compensation expense included in net income related to the Company's employee stock ownership plan totaled \$48,000 and \$69,000 for the quarters ended September 30, 2008 and 2007, respectively. Stock-based compensation expense included in net income related to restricted stock grants was \$271,000 for each of the nine month periods ended September 30, 2008 and 2007. Stock-based compensation expense included in net income related to the Company's employee stock ownership plan totaled \$157,000 and \$207,000 for the nine month periods ended September 30, 2008 and 2007, respectively.

NOTE 9 - NEW ACCOUNTING PRONOUNCEMENTS

In May 2008, the Financial Accounting Standards Board (FASB) Issued Statement No. 162 (SFAS 162), *The Hierarchy of Generally Accepted Accounting Principles*. This statement identifies the sources of accounting principles and the framework for selecting the accounting principles to be used in the preparation of financial statements prepared in conformity with generally accepted accounting principles (GAAP) in the United States. The statement is not expected to result in changes to current practices nor have a material effect on the Company.

In February 2008, FASB issued FASB Staff Position (FSP) FAS 140-3, *Accounting for Transfers of Financial Assets and Repurchase Financing Transactions*, which provides guidance on accounting for a transfer of a financial asset and a repurchase financing. The FSP presumes that an initial transfer of a financial asset and a repurchase financing are considered part of the same arrangement under FASB Statement No. 140 *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. However, if certain criteria are met, the initial transfer and repurchase shall not be evaluated as a linked transaction and therefore evaluated separately under FASB 140. The FSP is effective for repurchase financing in which the initial transfer is entered in fiscal years beginning after November 15, 2008. The Company does not anticipate a material impact on its consolidated financial statements as a result of this statement.

In February 2008, FASB issued FASB Staff Position (FSP) FAS 157-2 which provides a one-year deferral of the effective date for SFAS 157 with respect to all nonfinancial assets and liabilities, except those items recognized or disclosed in the financial statements on a recurring basis (that is at least annually). The FSP is effective upon issuance.

In March 2008, FASB Issued Statement No. 161 (SFAS 161), *Disclosures About Derivative Instruments and Hedging Activities* an amendment of FASB Statement 133. The statement requires expanded disclosures about an entity's derivative instruments and hedging activities but does not change SFAS 133's scope or accounting. This statement is effective for fiscal years and interim periods beginning after November 15, 2008 with early adoption permitted. The

Company does not anticipate a material impact as a result of this statement on its consolidated financial statements.

In April 2008, FASB issued Statement FSP 142-3 which amends the list of factors an entity should consider in developing renewal of extension assumptions used in determining the useful life of recognized intangible assets under SFAS 142 Goodwill and Other Intangibles . The new guidance applies to intangible assets that are acquired individually or with a group of other assets and to intangible assets acquired in both business combinations and asset acquisitions. The FSP is effective for financial statements issued for fiscal years beginning after December 15, 2008 and interim periods within those fiscal years. The guidance must be applied prospectively only to intangible assets acquired after the FSP s effective date.

In September 2008 FASB issued FSP FAS 133-1 and FIN 45-4, Disclosures about Credit Derivatives and Certain Guarantees, to improve disclosures about credit-indexed derivative instruments (credit derivatives) and financial guarantees. The FSP requires companies that sell credit derivatives to disclose information that will enable financial statement users to assess the potential effect of the credit derivatives on the seller s financial position, financial performance, and cash flows. FSP FAS 133-1 and FIN 45-4 is effective for interim and annual periods ending after November 15, 2008. The Company does not anticipate a material impact as a result of this statement on its consolidated financial statements.

Table of Contents

In September 2008, the SEC and FASB jointly issued a press release clarifying fair value measurement practices in the current market environment. The key issues discussed in the press release include: the use of internal assumptions to estimate fair value when no relevant market data exists, use of market (broker) quotes to measure fair value, consideration of how transactions from distressed sales or inactive markets impact fair value, and factors to consider in the assessment of other-than-temporary impairment.

TF FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL POSITION AND RESULTS OF OPERATIONS

GENERAL

The Company may from time to time make written or oral forward-looking statements, including statements contained in the Company's filings with the Securities and Exchange Commission (including this Quarterly Report on Form 10-Q and the exhibits thereto), in its reports to stockholders and in other communications by the Company, which are made in good faith by the Company pursuant to the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995.

These forward-looking statements involve risks and uncertainties, such as statements of the Company's plans, objectives, expectations, estimates and intentions that are subject to change based on various important factors (some of which are beyond the Company's control). The following factors, among others, could cause the Company's financial performance to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements: the strength of the United States economy in general and the strength of the local economies in which the Company conducts operations; the effects of, and changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System, inflation, interest rate, market and monetary fluctuations; the timely development of and acceptance of new products and services of the Company and the perceived overall value of these products and services by users, including the features, pricing and quality compared to competitors' products and services; the willingness of users to substitute competitors' products and services for the Company's products and services; the success of the Company in gaining regulatory approval of its products and services, when required; the impact of changes in financial services laws and regulations (including laws concerning taxes, banking, securities and insurance); technological changes, acquisitions; changes in consumer spending and saving habits; and the success of the Company at managing the risks involved in the foregoing.

The Company cautions that the foregoing list of important factors is not exclusive. The Company does not undertake to update any forward-looking statement, whether written or oral, that may be made from time to time by or on behalf of the Company.

Financial Position

The Company's total assets at September 30, 2008 and December 31, 2007 were \$718.1 million and \$701.7 million, respectively, an increase of \$16.4 million, or 2.3% during the nine-month period. Investment securities available for sale decreased \$2.0 million due to maturities of \$4.0 million and a decrease in the fair value of the securities of \$0.9 million offset by purchases of \$2.9 million. Mortgage-backed securities available for sale decreased by \$10.1 million due to principal repayments received of \$16.3 million offset by purchases of \$5.9 million, an increase in the fair value of the securities of \$0.2 million and net discount amortization of \$0.1 million. Mortgage-backed securities held to maturity decreased by \$1.2 million mainly as a result of principal repayments.

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

Loans receivable increased by \$30.2 million during the first nine months of 2008. Consumer and single-family residential mortgage loans of \$58.0 million and commercial loans of \$48.8 were originated during the nine months of 2008. Principal repayments of loans receivable were \$73.8 million. The Company had \$78.1 million of prime-rate based loans at September 30, 2008. Loans originated for sale during the first nine months of 2008 totaled \$12.4 million, and there were \$13.4 million in proceeds from the sale of loans in the secondary market during this period.

Total liabilities increased by \$14.9 million during the first nine months of 2008. Deposit balances grew by \$20.1 million which included an increase of \$29.2 million in retail certificates during this time period. Non-interest checking and money markets accounts increased by \$5.4 million while interest checking and savings accounts decreased by \$14.5 million. At September 30, 2008, the Bank had \$61.5 million of deposits indexed to the yield of the Merrill Lynch Ready Asset Money Market Fund. Advances from the Federal Home Loan Bank decreased by \$4.9 million in the first nine months of 2008, the result of a \$4.6 million decrease in short-term borrowings and scheduled amortization payments of \$19.6 million offset by \$19.3 million in new long term advances.

Total consolidated stockholder's equity of the Company was \$69.4 million or 9.7 % of total assets at September 30, 2008. During the first nine months of 2008, the Company repurchased 40,115 shares of its common stock and issued 535 shares pursuant to the exercise of stock options. At September 30, 2008, there were approximately 124,000 shares available for repurchase under the previously announced share repurchase plan.

During the second quarter of 2008, the Company closed its branch office on Quakerbridge Road in Mercer County, New Jersey, and reassigned approximately \$9 million in deposits to its nearby offices in Ewing and Hamilton, New Jersey.

Asset Quality

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

At the end of the first quarter of 2008, the Company completed foreclosure proceedings on two parcels of commercial real estate with a combined loan balance of \$1.5 million. These loans were non-performing at December 31, 2007. One parcel has been recorded as real estate owned totaling \$306,000 and was included in other assets in the consolidated balance sheet at September 30, 2008. As a result of this specific foreclosure, the Bank recorded a charge off in the amount of \$347,000. During the foreclosure proceedings of the second property, a bid from an unrelated party was made which satisfied the outstanding contractual obligations of the borrower with the Bank. This foreclosure and simultaneous sale resulted in a \$342,000 gain which is included in non-interest income of the Company during 2008. The Bank does not anticipate any further charges against the allowance as a result of the foregoing discussed foreclosures. During the first nine months of 2008 and 2007, the Company's provision for loan losses was \$490,000 and \$0, respectively. With respect to each of the remaining non-performing loans, all of which are real estate secured, the Bank is taking appropriate steps to resolve the individual situations.

The following table sets forth information regarding the Company's asset quality (dollars in thousands):

	September 30, 2008	December 31, 2007	September 30, 2007
Non-performing loans	\$ 2,615	\$ 5,358	\$ 2,780
Ratio of non-performing loans to gross loans	0.47%	1.03%	0.54%
Ratio of non-performing loans to total assets	0.36%	0.76%	0.41%
Ratio of total non-performing assets to total assets	0.41%	0.76%	0.41%
Ratio of allowance for loan losses to total loans	0.54%	0.55%	0.55%
Ratio of allowance for loan losses to non-performing loans	114.6%	53.00%	102.48%

Management maintains an allowance for loan losses at levels that are believed to be adequate; however, there can be no assurances that further additions will not be necessary or that losses inherent in the existing loan portfolio will not exceed the allowance. The following table sets forth the activity in the allowance for loan losses during the periods indicated (in thousands):

RESULTS OF OPERATIONS FOR THE THREE MONTHS ENDED SEPTEMBER 30, 2008 AND 2007

Net Income. The Company recorded net income of \$1,250,000, or \$0.47 per diluted share, for the three months ended September 30, 2008 as compared to net income of \$1,188,000, or \$0.44 per diluted share, for the three months ended September 30, 2007.

Average Balance Sheet

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

The following table sets forth information (dollars in thousands) relating to the Company's average balance sheet and reflects the average yield on assets and average cost of liabilities for the periods indicated. Yield and cost are computed by dividing income or expense by the average daily balance of interest-earning assets or interest-bearing liabilities, respectively, for the three-month periods indicated.

- (1) Nonaccrual loans have been included in the appropriate average loan balance category, but interest on nonaccrual loans has not been included for purposes of determining interest income.
- (2) Tax equivalent adjustments to interest on investment securities were \$106,000 and \$107,000 for the quarter ended September 30, 2008 and 2007, respectively. Tax equivalent interest income is based upon a marginal effective tax rate of 34%.
- (3) Includes interest-bearing deposits in other banks.
- (4) Interest rate spread represents the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities.
- (5) Net yield on interest-earning assets represents net interest income as a percentage of average interest-earning assets.

Table of Contents**Rate/Volume Analysis**

The following table presents, for the periods indicated, the change in interest income and interest expense (in thousands) attributed to (i) changes in volume (changes in the weighted average balance of the total interest earning asset and interest bearing liability portfolios multiplied by the prior year rate), and (ii) changes in rate (changes in rate multiplied by prior year volume). Changes attributable to the combined impact of volume and rate have been allocated proportionately based on the absolute value of changes due to volume and changes due to rate.

- (1) Tax equivalent adjustments to interest on investment securities were \$106,000 and \$107,000 for the quarters ended September 30, 2008 and 2007, respectively. Tax equivalent interest income is based upon a marginal effective tax rate of 34%.

Total Interest Income. Total interest income, on a tax equivalent basis, increased by \$4,000 for the quarter ended September 30, 2008 compared with the third quarter of 2007. The average balance of loans outstanding increased by \$41.3 million between the two periods as a result of loan originations added to the portfolio during the intervening period. However, the average yield on loans decreased 47 basis points primarily as a result of the Bank's reduction of its prime rate four times during 2008 and two times during the last quarter of 2007 by a combined 275 basis points mirroring the action taken by the Federal Open Markets Committee (FOMC) when it acted to reduce the fed funds rate. Interest income from mortgage-backed securities was higher in the third quarter of 2008 in comparison to the same period of 2007 due to purchases of \$25.5 million of securities during the intervening period. Interest income from investment securities decreased slightly as a result of reduced dividends received on FHLB stock despite increased balances of FHLB stock held.

Total Interest Expense. Total interest expense decreased by \$393,000 to \$4.3 million during the quarter ended September 30, 2008 as compared with the third quarter of 2007. Interest rates paid on the Bank's deposits were significantly lower during the third quarter of 2008 in comparison to the same period of 2007, primarily because the average rate on deposits indexed to the Merrill Lynch Ready Asset Money Market Fund decreased by 259 basis points during the intervening period. Although the average balance of deposits reflects a \$6.5 million increase in balances, average deposit balances during the third quarter of 2007 included broker-originated certificates of deposit of \$2.9 million which fully matured during the third quarter of 2007.

Interest expense associated with borrowings from the Federal Home Loan Bank was \$365,000 higher in the third quarter of 2008 compared to the third quarter of 2007. During the intervening period, the Bank increased its borrowings by \$44.8 million from the FHLB to fund loan growth

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

as well as security purchases. Although the average outstanding balances were higher in the third quarter of 2008 compared to the same period in 2007, the rate associated with these new advances were at a rate which was 50 basis points lower than the average rate on outstanding borrowings during the third quarter of 2007.

Non-interest income. Total non-interest income was \$699,000 for the third quarter of 2008 compared with \$708,000 for the same period in 2007. A slowing of loans originated for sale activities during the third quarter of 2008 contributed to the decline in non-interest income.

Table of Contents

Non-interest expense. Total non-interest expense increased by \$157,000 to \$4.2 million for the three months ended September 30, 2008 compared to the same period in 2007. The third quarter of 2007 reflects significant curtailment actions enacted by the Company towards marketing-related expenditures. Offsetting the increase in marketing and advertising expenses between the quarters was a \$28,000 reduction of branch facilities expenses which resulted from the closing of the banking office on Quakerbridge Road in Mercer County, NJ during June 2008.

RESULTS OF OPERATIONS FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2008 AND 2007

Net Income. The Company recorded net income of \$3,715,000 or \$1.39 per diluted share, for the nine months ended September 30, 2008 as compared to net income of \$3,623,000, or \$1.32 per diluted share, for the nine months ended September 30, 2007.

- (2) Tax equivalent adjustments to interest on investment securities were \$320,000 and \$324,000 for the nine months ended September 30, 2008 and 2007, respectively. Tax equivalent interest income is based upon a marginal effective tax rate of 34%.
- (3) Includes interest-bearing deposits in other banks.
- (4) Interest rate spread represents the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities.
- (5) Net yield on interest-earning assets represents net interest income as a percentage of average interest-earning assets.

Table of Contents**Rate/Volume Analysis**

The following table presents, for the periods indicated, the change in interest income and interest expense (in thousands) attributed to (i) changes in volume (changes in the weighted average balance of the total interest earning asset and interest bearing liability portfolios multiplied by the prior year rate), and (ii) changes in rate (changes in rate multiplied by prior year volume). Changes attributable to the combined impact of volume and rate have been allocated proportionately based on the absolute value of changes due to volume and changes due to rate.

Net change in net interest income	\$ 1,500	\$ (979)	\$ 521

- (1) Tax equivalent adjustments to interest on investment securities were \$320,000 and \$324,000 for the nine months ended September 30, 2008 and 2007, respectively. Tax equivalent interest income is based upon a marginal effective tax rate of 34%.

Total Interest Income. Total interest income, on a tax equivalent basis, increased by \$862,000 or 3.0% to \$29.5 million for the nine months ended September 30, 2008 compared with the first nine months of 2007. The average balance of loans outstanding increased as a result of \$43.3 million of loan originations in excess of loan principal payments added to the portfolio during the intervening period. However, the average yield on loans decreased 39 basis points primarily as a result of the Bank's reduction of its prime rate four times during 2008 and two times during the last quarter of 2007 by a combined 275 basis points mirroring the action taken by the FOMC when it acted to reduce the fed funds rate. Interest income from mortgage-backed securities was higher in the first nine months of 2008 in comparison to the same period of 2007 due to purchases of \$25.5 million of securities during the intervening period. Interest income from investment securities decreased as a result of reduced dividends received on FHLB stock despite increased balances of FHLB stock held.

Total Interest Expense. Total interest expense increased by \$341,000 to \$13.8 million during the nine-month period ended September 30, 2008 as compared with the first nine months of 2007. Interest rates paid on the Bank's deposits dropped primarily because the average rate on deposits indexed to the Merrill Lynch Ready Asset Money Market Fund decreased by 199 basis points during the intervening period and therefore significantly reduced interest expense on deposits. Although the average balance of deposits reflects only a \$1.7 million increase in balances, average deposit balances during the first nine months of 2007 included broker-originated certificates of deposit of \$7.2 million which fully matured during the second and third quarters of 2007.

Interest expense associated with borrowings from the Federal Home Loan Bank increased \$1.5 million between the first nine months of 2008 and 2007. During the intervening period, the Bank increased its borrowings by \$52.3 million from the FHLB to fund loan growth as well as

security purchases.

Non-interest income. Total non-interest income was \$2.9 million for the first nine months of 2008 compared with \$3.0 million for the same period in 2007. The first nine months of 2008 included a \$197,000 insurance claim recovery related to a 2007 expense sustained as a result of the bankruptcy of one of the Bank's loan servicing agents. Additionally, other income during the first nine months of 2008 included a \$342,000 gain on the sale of foreclosed real estate and \$87,000 of investment referral commissions. Also, retail deposit account fees increased \$49,000 during 2008. The first nine months of 2007 included \$777,000 of non-recurring income from a fraud-related settlement.

Table of Contents

Non-interest expense. Total non-interest expense decreased by \$107,000 to \$12.8 million for the nine months ended September 30, 2008 compared to the same period in 2007. The first nine months of 2008 reflect an increase in marketing-related expenses of \$107,000 over the same period in 2007 when the Company curtailed its marketing expenditures. During 2008, legal expenses increased \$48,000 largely due to services rendered in conjunction with non-performing assets. Also, loan expenses related to satisfaction fees and appraisals of non performing assets increased \$29,000 during the nine months ended 2008 compared to 2007. Offsetting these increases was a \$64,000 reduction of branch facilities expenses resulting from the closing of the banking office on Quakerbridge Road in Mercer County, NJ during June 2008. The most significant factor contributing to the decrease between the periods was the \$306,000 loss incurred by the Bank in 2007 due to the related bankruptcy of one of the Bank's loan servicing agents.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

The Company's liquidity is a measure of its ability to fund loans, pay withdrawals of deposits, and other cash outflows in an efficient, cost-effective manner. The Company's short-term sources of liquidity include maturity, repayment and sales of assets, excess cash and cash equivalents, new deposits, broker deposits, other borrowings, and new borrowings from the Federal Home Loan Bank. There has been no material adverse change during the nine-month period ended September 30, 2008 in the ability of the Company and its subsidiaries to fund their operations.

At September 30, 2008, the Company had commitments outstanding under letters of credit of \$1.5 million, commitments to originate loans of \$14.2 million, and commitments to fund undisbursed balances of closed loans and unused lines of credit of \$51.0 million. At September 30, 2008, the Bank had \$1.4 million outstanding commitments to sell loans. There has been no material change during the nine months ended September 30, 2008 in any of the Company's other contractual obligations or commitments to make future payments.

Capital Requirements

The Bank was in compliance with all of its capital requirements as of September 30, 2008.

Recent Legislation and Other Regulatory Initiatives

On October 3, 2008, the President of the United States signed the Emergency Economic Stabilization Act of 2008 (EESA) into law. This legislation, among other things, authorized the Secretary of Treasury (Treasury) to establish a Troubled Asset Relief Program (TARP) to purchase up to \$700 billion in troubled assets from qualified financial institutions (QFI). EESA is also being interpreted by the Treasury to allow it to make direct equity investments in QFIs. Subsequent to the enactment of EESA, the Treasury announced the TARP Capital Purchase Program (CPP) under which the Treasury will purchase up to \$250 billion in senior perpetual preferred stock of QFIs that elect to participate in the CPP. The Treasury's investment in an individual QFI may not exceed the lesser of 3% of the QFI's risk-weighted assets or \$25 billion and may not be less than 1% of risk-weighted assets. QFIs have until November 14, 2008, to elect to participate in the CPP. The CPP also requires the issuance of warrants exercisable for a number of shares of common stock with an aggregate value equal to 15% of the amount of the preferred stock investment.

EESA increases the maximum deposit insurance amount up to \$250,000 until December 31, 2009 and removes the statutory limits on the FDIC's ability to borrow from the Treasury during this period. The FDIC may not take the temporary increase in deposit insurance coverage into account when setting assessments. EESA allows financial institutions to treat any loss on the preferred stock of the Federal National Mortgage Association or Federal Home Loan Mortgage Corporation as an ordinary loss for tax purposes.

As a condition to selling troubled assets to the TARP and/or participating in the CPP, the QFI must agree to the Treasury's standards for executive compensation and corporate governance. These standards generally apply to the Chief Executive Officer, Chief Financial Officer, and next three highest compensated officers of the QFI. In general, these standards require the QFI to: (1) ensure that incentive compensation for senior executives does not encourage unnecessary and excessive risk taking; (2) recoup any bonus or incentive compensation paid to a senior executive based on financial statements that later prove to be erroneous; (3) prohibit the QFI from making golden parachute payments in connection with certain terminations of employment; and (4) not deduct, for tax purposes, executive compensation in excess of \$500,000 for each senior executive. Participation in the CPP also results in certain restrictions on the QFI's dividend and stock repurchase activities. These restrictions remain in place until the Treasury no longer holds any equity or debt securities of the QFI.

Concurrent with the announcement of the CPP, the FDIC also established the Temporary Liquidity Guarantee Program. This program contains two elements: (i) a debt guarantee program and (ii) an increase in deposit insurance coverage for certain types of non-interest bearing accounts. Pursuant to the debt guarantee program, newly issued senior unsecured debt of banks, thrifts or their holding companies issued on or before June 30, 2009 would be protected in the events the issuing institution subsequently fails or its holding company files for bankruptcy. Financial institutions opting to participate in this program would be charged an annualized fee equal to 75 basis points multiplied by the amount of debt being guaranteed. The amount of debt that may be guaranteed cannot exceed 125% of the institution's outstanding debt at September 30, 2008 and due to mature before June 30, 2009. The guarantee would expire by June 30, 2012 even if the debt itself has not matured. Pursuant to the temporary unlimited deposit insurance coverage, a qualifying institution may elect to provide unlimited coverage for non-interest bearing transaction deposit accounts in excess of the \$250,000 limit by paying a 10 basis points surcharge on the covered amounts in excess of \$250,000. All institutions will have this coverage without charge for until December 5, 2008. Institutions may choose whether to continue the coverage and be charged the surcharge. To opt out of the program, institutions must notify the FDIC by December 5, 2008. This coverage would expire on December 31, 2009.

The Company is still determining whether to elect to participate in these programs. It is not clear at this time what impact these programs announced by the Treasury and other bank regulatory agencies and any additional programs that may be initiated in the future, will have on the Company or the financial markets as a whole. However, the Company remains well-capitalized with strong liquidity.

CRITICAL ACCOUNTING POLICIES

Certain critical accounting policies of the Company require the use of significant judgment and accounting estimates in the preparation of the consolidated financial statements and related data of the Company. These accounting estimates require management to make assumptions about matters that are highly uncertain at the time the accounting estimate is made. Management believes that the most critical accounting policy requiring the use of accounting estimates and judgment is the determination of the allowance for loan losses. If the financial position of a significant amount of debtors should deteriorate more than the Company has estimated, present reserves for loan losses may be insufficient and additional provisions for loan losses may be required. The allowance for loan losses was \$2,996,000 at September 30, 2008.
