### INDEPENDENT AUDITOR S REPORT (Free translation)

To the Shareholders of Magyar Telekom Nyrt.

**Report on the financial statements** 

We have audited the accompanying financial statements of Magyar Telekom Nyrt. ( the Company ) which comprise the balance sheet as of 31 December 2010 (in which the balance sheet total is HUF 921.747 million, the profit per balance sheet is HUF 12.812 million), the related profit and loss account for the year then ended, and the notes to the financial statements including a summary of the significant accounting policies and other explanatory information.

Management s Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the provision of the Accounting Act and accounting principles generally accepted in Hungary and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor s Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Hungarian Standards on Auditing and with applicable laws and regulations in force in Hungary. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

During our work we have audited the components and disclosures along with the accounting records and supporting documentation underlying the financial statements of Magyar Telekom Nyrt. in accordance with the Hungarian Standards on Auditing and, on the basis of our audit work, we have gained sufficient and appropriate evidence that the financial statements have been prepared in accordance with the provision of the accounting law and with accounting principles generally accepted in Hungary. In our opinion, the accompanying financial statements give a true and fair view of the financial position Magyar Telekom Nyrt. as of 31 December 2010, and of the results of its operations for the year then ended.

#### Other reporting requirements regarding the business report

We have examined the accompanying business report of Magyar Telekom Nyrt. ( the Company ) for the financial year of 2010.

Management is responsible for the preparation and fair presentation of the business report in accordance with the provision of the Accounting Act and accounting principles generally accepted in Hungary. Our responsibility is to assess whether or not the accounting information disclosed in the business report is consistent with that contained in the financial statements. Our work in respect of the business report was limited to checking it in within the aforementioned scope and did not include a review of any information other than that drawn from the audited accounting records of the Company. In our opinion the 2010 business report is consistent with the disclosures in the financial statements as of 31 December 2010.

#### 1. Background and General Information

Official name of the Company: Magyar Telekom Telecommunications Public Limited Company

Short name of the Company: Magyar Telekom Plc.

Headquarter of the Company: 1013 Budapest, Krisztina krt. 55.

The Company s main activity is telecommunication.

The Hungarian Telecommunications Company, the legal predecessor of Magyar Telekom Telecommunications Public Limited Company (Magyar Telekom Plc. or the Company) was founded by the Ministry of Transport, Communications and Construction on January 1, 1990. The Company was transformed by the Board of directors of State Asset Holding Ltd. into a wholly owned company limited by shares as of December 31, 1991.

The Company was privatized on December 22, 1993, when the MagyarCom consortium acquired a 30.1 per cent stake in the Company. At the second stage of the privatization, which took place in December 1995, MagyarCom became the majority owner.

On November 14, 1997 the Company was the first in the Central-Eastern European region to be listed on both the Budapest and the New York Stock Exchanges.

In June 1999, the State Privatization and Holding Company sold its remaining stake (5.75 per cent) through a secondary offering. After this transaction, the proportion of publicly traded shares increased to 40.47 per cent. Share of MagyarCom Holding GmbH (Friedrich-Ebert-Alle 140, 53113 Bonn, Germany) in the Company decreased to 59.53 per cent.

In 2000, the Company increased its common stock through issuing new shares in the amount of HUF 63 million, which were held mainly within the Magyar Telekom Group. As a result of this transaction, the proportion of publicly traded shares increased to 40.51 per cent and MagyarCom s ownership changed to 59.49 per cent.

In 2002, the Company carried out an additional increase in common stock in the amount of HUF 490 million, which shares were repurchased. As a result of this transaction, the proportion of publicly traded shares changed to 40.32 per cent, the proportion of repurchased treasury stock to 0.47 per cent and MagyarCom s ownership decreased to 59.21 per cent. MagyarCom is 100 per cent owned by Deutsche Telekom A.G.

The Extraordinary General Meeting of the Company held on February 22, 2005 approved the decision of the Board of Directors to change the official name of Magyar Telecommunications Company Ltd. into Magyar Telekom Telecommunications Company Ltd., with short name of Magyar Telekom Rt. The change was registered by the Court of Registry on May 6, 2005.

On February 28, 2006 the name of Magyar Telekom Telecommunications Company Ltd. changed to Magyar Telekom Telecommunications Public Limited Company, with short name of Magyar Telekom Plc. (Magyar Telekom Plc. or the Company). The change was registered by the Court of Registry on February 28, 2006.

#### Magyar Telekom Plc.

Notes to the Financial Statements prepared

in accordance with the Hungarian Act on Accounting

as of December 31, 2010

(All amounts in millions of HUF, unless otherwise indicated)

The Company has started its electricity and natural gas retail activities in 2010. The natural gas services are available for public consumers since June 1, 2010, the electricity services since July 1, 2010. The sale for business counterparties has started on July 1, 2010 after the date on which the commercial licences and business regulations approved by Hungarian Energy Office entered into force.

The purpose of Magyar Telekom Plc. s participation in the energy market is providing a more integrated domestic services in case of public customers and office services in case of business counterparties for its existing customers.

Magyar Telekom Plc. worked out the rules for accounting separation based on the Act LXXXVI of 2007 on electricity and on the Act XL of 2003 on natural gas supply and these rules are recorded in the accounting policies. The Company prepared the balance sheet and income statement related to electricity and natural gas supply which is disclosed in Appendix 1.

#### Investigation into certain consultancy contracts

In the course of conducting their audit of the Company s 2005 financial statements, PricewaterhouseCoopers, the Company s auditors, identified two contracts the nature and business purposes of which were not readily apparent to them. In February 2006, the Company s Audit Committee retained White & Case, as its independent legal counsel, to conduct an internal investigation into whether the Company had made payments under those, or other contracts, potentially prohibited by U.S. laws or regulations, including the U.S. Foreign Corrupt Practices Act (FCPA) or internal Company policy. The Company s Audit Committee also informed the United States Department of Justice (DOJ), the United States Securities and Exchange Commission (SEC) and the Hungarian Financial Supervisory Authority of the internal investigation.

Based on the documentation and other evidence obtained by it, White & Case preliminarily concluded that there was reason to believe that four consulting contracts entered into in 2005 were entered into to serve improper objectives, and further found that during 2006 certain employees had destroyed evidence that was relevant to the investigation. White & Case also identified several contracts at our Macedonian subsidiary that warranted further review. In February 2007, our Board of Directors determined that those contracts should be reviewed and expanded the scope of the internal investigation to cover these additional contracts and any related or similarly questionable contracts or payments.

On December 2, 2009, the Audit Committee provided the Company s Board of Directors with a Report of Investigation to the Audit Committee of Magyar Telekom Plc. dated November 30, 2009 (the Final Report ). The Audit Committee indicated that it considers that, with the delivery of the Final Report based on currently available facts, White & Case has completed its independent internal investigation.

The Final Report includes the following findings and conclusions, based upon the evidence available to the Audit Committee and its counsel:

• The information obtained by the Audit Committee and its counsel in the course of the investigation demonstrates intentional misconduct and a lack of commitment to compliance at the most senior levels of Magyar Telekom, TCG, and Makedonski Telekom during the period under investigation.

• As previously disclosed, with respect to Montenegrin contracts, there is insufficient evidence to establish that the approximately EUR 7 million in expenditures made pursuant to four consultancy contracts ... were made for legitimate business purposes , and there is affirmative evidence that these expenditures served improper purposes. These contracts were not appropriately recorded in the books and records of the Company and its

(All amounts in millions of HUF, unless otherwise indicated)

relevant subsidiaries. As previously disclosed, the Company has already reclassified, in the Company s financial statements, the accounting treatment relating to certain of these contracts to more accurately account for these expenditures.

• As previously disclosed, there is evidence that certain former employees intentionally destroyed documents relating to activities undertaken in Macedonia by the Company and its affiliates.

• Between 2000 and 2006 a small group of former senior executives at the Company and the Company s Macedonian affiliates, authorized the expenditure of approximately EUR 24 million through over twenty suspect consultancy, lobbying, and other contracts (including certain contracts between the Company and its subsidiaries on one hand, and affiliates of a Cyprus-based consulting company on the other hand). The Final Report concludes that the available evidence does not establish that the contracts under which these expenditures were made were legitimate.

• The evidence shows that, contrary to their terms, a number of these contracts were undertaken to obtain specific regulatory and other benefits from the government of Macedonia. The Companies generally received the benefits sought and then made expenditures under one or more of the suspect contracts. There is evidence that the remaining contracts were also illegitimate and created a pool of funds available for purposes other than those stated on the face of the agreements.

• In entering into these contracts and approving expenditures under them, the former senior executives knowingly caused, structured, or approved transactions that shared most or all of the following characteristics:

• intentional circumvention of internal controls;

• false and misleading Company documents and records;

• lack of due diligence concerning, and failure to monitor performance of, contractors and agents in circumstances carrying a high risk of corruption;

• lack of evidence of performance; and

• expenditures that were not for the purposes stated in the contracts under which they were made, but rather were intended to obtain benefits for the Companies that could only be conferred by government action.

The Final Report states that the Investigation did not uncover evidence showing receipt of payments by any Macedonian government officials or political party officials. However, the Audit Committee s counsel did not have access to evidence that would allow it to identify the ultimate beneficiaries of these expenditures.

Nothing in the Final Report implicates any current senior executive or Board member of the Company in connection with any wrongdoing.

As previously disclosed, the Company has taken remedial measures to address issues previously identified by the independent investigation. These measures included steps designed to revise and enhance the Company s internal controls as well as the establishment of the Corporate Compliance Program.

Due to these measures, no modifications to the Corporate Compliance Program were viewed as necessary in response to the Final Report. This conclusion has been discussed with the Audit Committee and the Audit Committee has not made recommendations either relating to the Company s compliance program or internal controls.

The Company is continuing to assess the nature and scope of potential legal remedies available to the Company against individuals or entities that may have caused harm to the Company.

#### Magyar Telekom Plc.

Notes to the Financial Statements prepared

in accordance with the Hungarian Act on Accounting

as of December 31, 2010

(All amounts in millions of HUF, unless otherwise indicated)

As previously announced, the DOJ, the SEC and the Ministry of Interior of the Republic of Macedonia have commenced investigations into certain of the Company s activities that were the subject of the internal investigation. Further, in relation to certain activities that were the subject of the internal investigation, the Hungarian Central Investigating Chief Prosecutor s Office has commenced a criminal investigation into alleged corruption with the intention of violating obligations in international relations and other alleged criminal offenses. Also, as previously announced, the Hungarian National Bureau of Investigation (NBI) has begun a criminal investigation into alleged misappropriation of funds relating to payments made in connection with the Company s ongoing internal investigation and the possible misuse of personal data of employees in the context of the internal investigation. In addition, the Montenegrin Supreme State Prosecutor is also investigating the activities of the Company s Montenegrin subsidiary that were the subject of the internal investigation and has requested information from the Company s Montenegrin subsidiary in relation to the relevant contracts. These governmental investigations are continuing, and the Company continues to cooperate with these investigations.

As prerviously disclosed, the Company, through its external legal counsel, is engaged in discussions with the DOJ and the SEC regarding the possibility of resolving their respective investigations as to the Company through negotiated settlements. The Company has not reached any agreement with either the DOJ or the SEC regarding resolution of their respective investigations, and discussions with both agencies are continuing. We may be unable to reach a negotiated settlement with either agency. Any resolution of the investigations could result in criminal or civil sanctions, including monetary penalties and/or disgorgement, against the Company or its affiliates, which could have a material effect on the Company s financial position, results of operations or cash flows, as well as require additional changes to its business practices and compliance programs. The Company cannot predict or estimate whether or when a resolution of the DOJ or SEC investigations will occur, or the terms, conditions, or other parameters of any such resolution may have on its financial statements or results of operations. Consequently, the Company has not made any provisions in its financial statements as of December 31, 2010 with respect to the investigations.

#### 2. Effect of merger in 2009 on the comparability of figures

T-Kábel Magyarország Kft. and Dél-Vonal Kft. merged into Magyar Telekom Plc. with effect from September 30, 2009. Magyar Telekom Plc. managed the takeover of assets and liabilities (including provisions, accruals and deferred incomes and expenses as well) and the resulting shareholders equity being the difference, with continuous bookkeeping. Due to the merger the Magyar Telekom Plc. s income statement as of 2009 contains the revenues and expenses of the activities taken over for the period started October 1, 2009 ended on December 31, 2009, while its income statement as of 2010 contains these data for the whole financial year.

#### 3. <u>Accounting policies</u>

The accounting policies of Magyar Telekom Plc. include basic accounting principles, measurement methods and procedures as well as methods and tools used for enforcing the provisions of the Hungarian Accounting Regulations.

Magyar Telekom Plc. maintains its records both in accordance with the Hungarian Accounting Regulations (HAR) and International Financial Reporting Standards (IFRS). The differences between the two reports are solely due to differences in the respective accounting principles.

The closing day of the Company s business year is December 31. In 2010 the balance sheet preparation date is the first working day of the following year.

Magyar Telekom Plc. uses version A of the balance sheet and version A of the income statement (total cost method) when preparing its annual report in accordance with the Hungarian Accounting Regulations. Amounts in the annual report are stated in HUF millions. The currency of accounting is the Hungarian Forint (HUF).

The Hungarian Act on Accounting allows for certain captions in the balance sheet to be broken-down or omitted, what is adopted by the Company both in case of the balance sheet and the income statement.

From 2010, Magyar Telekom Plc. s activity expanded with providing electricity and natural gas services based on individual authorization. Connected to this activity the Company performs an accounting separation under which discloses its balance sheet and income statement related to electricity and natural gas services separately as part of the Notes.

Since January 1, 2005 the Company has complied with its obligation to prepare consolidated annual report in such a way that it prepares its consolidated annual report in accordance with the International Financial Reporting Standards.

Deutsche Telekom Group s consolidated annual report prepared by Deutsche Telekom AG (Friedrich-Ebert-Alle 140, 53113 Bonn, Germany) includes Magyar Telekom Plc. as a subsidiary of Deutsche Telekom AG.

#### Definition of the accounting principles, guidelines and methods

#### Classification of accounting matters:

Magyar Telekom Plc. applies the materiality and significance guidelines for limits set forth in the Hungarian Accounting Regulations in preparing its annual report.

#### Material error

An error revealed must be treated as a material error in every case it results in at least 20 per cent change in prior year s shareholder s equity.

#### Magyar Telekom Plc.

Notes to the Financial Statements prepared

in accordance with the Hungarian Act on Accounting

as of December 31, 2010

(All amounts in millions of HUF, unless otherwise indicated)

Significant error

Items must be considered as significant in every case if in the year when discovered by audit, the aggregate amount of all errors (whether negative or positive) for the same year and the aftereffects thereof - increasing or decreasing the equity - exceeds 2 per cent of the balance sheet total of the year audited, or 500 million HUF, if such 2 per cent of the balance sheet total exceeds 500 million HUF.

If the Company reveals a significant error through self-revision, then modifications relating to prior years are presented next to the prior years figures for each balance sheet and income statement item.

The Company has set up regulations for valuation of assets and liabilities, scrapping, cost calculation, stocktaking, cash management, and system of documentation as required by the Hungarian Accounting Regulations.

Until further decision, the Company does not use the allowed alternative treatment in the Hungarian Accounting Regulations for the valuation of fixed assets as market value and valuation of certain financial instruments as fair value.

The Company qualifies every unrealized foreign exchange rate difference resulting from foreign exchange translation as significant, therefore all unrealized foreign exchange gains and losses are recorded in the subledger as well as in the general ledger.

#### Basic principles connected to the accounting separation related to energy supply

The settlement of energy activities (electricity and natural gas services) was recorded on separate general ledger accounts or if there is no a subledger for electricity and natural gas energy separately then the items are divided based on the following principles:

- proportion of revenues from energy and other activities,
- proportion of expenditures from energy and other activities,

- proportion of fixed assets of energy and other activities,
- proportion of headcount of energy and other activities,
- proportion of direct margin on energy and other activities,
- proportion of direct margin on electricity and gas energy.

These separation principles apply uniformly to the general ledger accounts of balance sheet and income statement.

#### Valuation methods used for the preparation of the Balance Sheet

### ASSETS

#### Recognition and measurement of non current assets

Intangible and tangible fixed assets

Magyar Telekom Plc. carries intangible and tangible fixed assets at historical cost less accumulated depreciation. Property, plant and equipment includes the capitalized value of improvements and refurbishment that extend the useful life of the asset, increase its capacity and/or modify its functionality.

Borrowing costs connected directly to loans taken for acquisition or production of the asset are capitalized.

#### Magyar Telekom Plc.

Notes to the Financial Statements prepared

in accordance with the Hungarian Act on Accounting

as of December 31, 2010

(All amounts in millions of HUF, unless otherwise indicated)

Depreciation policy

In case of tangible fixed assets the depreciation is based on the gross value of the asset reduced by its residual value.

The method of depreciation: straight-line based on gross value using rates originated from useful lives.

Depreciation starts on the day when the asset was placed into operation and it is over when the useful life of the asset elapsed or the day the asset cancelled from the books for any reason. The Company recorded the depreciation monthly in proportion to the days of the given month.

The Company determines residual values for those groups of assets where the residual values are considered to be significant. Residual value is considered to be significant if the expected realizable value exceeds the expected scrap value when the asset is taken out of service. The Company determines residual value for buildings and vehicles. Residual value is not considered to be significant for intangible assets and other groups of the tangible fixed assets.

The Company applies residual values only for assets capitalized after January 1, 2001. No residual value is calculated for additional capitalization on assets purchased before January 1, 2001.

Applied residual value:

Buildings: Determined individually based on the location of the building as well as the expected future useful life and usage of the building.

Vehicles: passenger cars for personal use: 25 per cent of the acquisition cost

passenger cars for business use: 30 per cent of the acquisition cost

trucks under 3.5 tons: 30 per cent of the acquisition cost

trucks above 3.5 tons: 20 per cent of the acquisition cost

transport vehicles: 10 per cent of the acquisition cost.

Useful lives are determined based on generally accepted international telecommunication industry practices and development potentials. Magyar Telekom Plc. regularly reviews the useful lives of fixed assets and modifies them if necessary. The Company records the value of all tangible fixed assets below HUF 50,000 immediately as depreciation expense, except for those that are serving the operation of the telecom network directly; are part of the subscriber network; those installed telecom software operating solely on telecom hardware and in addition the categories of assets defined in the asset accounting module of SAP.

The Company records extraordinary depreciation in cases where the value of the assets permanently decreased due to the fact that it is no longer needed, spoiled or destroyed, or if the book value is permanently and significantly in excess of the market value. In the absence of other reliable estimates the market value of the asset is determined using expected discounted cashflow analysis.

In case the market value of the individual asset that has been impaired before significantly exceeds its carrying value, the Company records a reversal of extraordinary depreciation and classifies the related income as other revenue.

Capitalized value of foundation and restructuring

The Company does not capitalize foundation and restructuring costs.

Capitalized value of research and development

The Company does not capitalize research and development costs.

Goodwill

That part of the cost of an acquisition of a subsidiary with qualified majority (at least 75 per cent ownership) which is calculated as the difference between the fair value of the acquired assets less the assumed liabilities

#### Magyar Telekom Plc.

Notes to the Financial Statements prepared

in accordance with the Hungarian Act on Accounting

as of December 31, 2010

(All amounts in millions of HUF, unless otherwise indicated)

(valued according to the Hungarian Act on Accounting) and the acquisition cost is recorded as goodwill if the acquisition cost is higher.

The Company does not record amortization on goodwill recognized after January 1, 2005 unless impairment is required. The Company applies the straight-line amortization method for goodwill recognized earlier.

Intellectual property

Since 2005 only those assets have been recorded as intellectual property which are in the ownership of the Company.

The useful life of intellectual property is generally 5 years.

Those intellectual properties where the Company has only the rights of use are recorded as Rights. Their useful life are those of intellectual property.

Own work capitalized

Direct costs incurred in the construction of property, plant and equipment manufactured by the Company are capitalized. The Company records materials provided to subcontractors at delivery as construction in progress.

Financial investments

Long term investments in subsidiaries are recorded at cost when established or at original purchase price less goodwill when acquired. At the end of the financial year, the Company s investments are impaired if the market value of the equity investment is permanently and significantly

lower than its book value. The impairment review is carried out on an individual basis.

Loans granted include loans to subsidiaries, associated companies and other companies as well as long term loans given to employees for housing purposes.

#### Recognition and measurement of current assets

Inventories

•

Goods are valued at cost using standard price method and raw materials using the weighted average cost formula. Inventories include materials and assets whose future usage can not be determined at the time of purchase (i.e. whether they will be used for an investment project or maintenance). Inventories also include advance payments on inventories and assets held for sale reclassified from tangible fixed assets.

Tangible fixed assets reclassified to inventories are valued on an individual basis. Besides these assets Magyar Telekom Plc. considers its inventories as low value items. Impairments of inventories purchased within a year are determined by a so-called Price Trend Report. If the current average price is higher by 20 per cent than the last month average price invoiced then the article has to be impaired to the average price of the last month.

Inventories purchased over a year ago are impaired in proportion to a percentage of their book value.

Measure of impairment on new materials:

- inventories from 12 to 24 months . inventories from 24 months
- 35 per cent impairment 60 per cent impairment

Measure of impairment on used or repaired materials:

- inventories from 6 to 12 months .
  - inventories from 12 to 24 months
- inventories from 24 months

5 per cent impairment 50 per cent impairment 100 per cent impairment

(All amounts in millions of HUF, unless otherwise indicated)

Trade receivables and other receivables

The balance of trade receivables reflects invoiced amounts accepted by the customers and does not include any unrecoverable and unaccepted receivables.

Impairment of trade receivables is assessed on two levels. Trade receivables that are individually significant and the ones that are not individually significant are separated. Magyar Telekom Plc. decided to consider items above HUF 200 million to be individually significant for the purposes of assessing accounts receivables for impairment.

In case of items that are individually not significant it is also assessed individually whether objective evidence of impairment exists. These items have to be assessed individually and amount of impairment have to be calculated on them.

Magyar Telekom Plc. considers the following items to be included in this category:

- receivables from domestic and international fixed line service providers
- receivables from domestic and international mobile service providers (roaming, interconnect, interworking)
- receivables under liquidation, bankruptcy proceedings
- other (non trade) receivables

Based on the Section 55. (2) of Act C/2000 on accounting the amount of loss in value may also be established as a percentage of the amount of such receivables registered in the books (collective assessment of impairment). Magyar Telekom Plc. evaluates the telecommunications customers - concerning their high volume - with the method of collective assessment (ageing) and the impairment is set out in percentages.

The Company set up the impairment categories according to customer groups with similar credit risk exposure. In case of invoices with instalments the amount of impairment is based on due dates of each instalment.

The Company does not impair receivables from related parties and non current loans granted to related parties except in case an individual item having an objective evidence for impairment.

Accounts receivable and payable related to international telecommunications traffic are stated at gross value, even though the financial settlement of the balance is performed on a net basis.

Magyar Telekom Plc. measures its foreign currency receivables at year-end at the official exchange rate of the Hungarian National Bank (MNB) as of December 31.

Securities

Securities in current assets include the original cost of bonds, shares, other securities held for sale and the repurchase value of treasury stock.

#### LIABILITIES AND SHAREHOLDER S EQUITY

Valuation reserve

Until further decision, Magyar Telekom Plc. does not apply the allowed alternative treatment in the Hungarian Accounting Regulations for the recognition of the valuation reserve.

Restricted reserve

Magyar Telekom Plc. records restricted amounts from capital reserves and retained earnings as restricted reserve. The repurchase value (acquisition cost) of the repurchased treasury stock is recorded in restricted reserve and the amount of development reserves according to the Corporate Tax Act.

#### Magyar Telekom Plc.

Notes to the Financial Statements prepared in accordance with the Hungarian Act on Accounting as of December 31, 2010 (All amounts in millions of HUF, unless otherwise indicated)

Provisions

Main items include:

- early retirement payment liabilities
- severance payment liabilities
- contingent liabilities and commitments
- environmental liabilities
- guarantee liabilities determined by law
- future demolition or recovery liabilities deriving from a contract
- provision related to valuation of derivatives

Valuation of items in foreign currencies

Receivables and liabilities denominated in foreign currencies are valued at the official exchange rate of MNB on December 31.

#### Derivatives

The Company records derivatives (forward F/X deals and swap deals) among off-balance sheet items as commitments or future receivables on transaction price.

The Company calculates the fair value of every derivatives as of the balance sheet date and discloses it in the Notes. In addition the Company creates provision for expected losses related to commitments from derivatives, represented by the negative fair value of the transactions.

#### Measurement principles applied in the preparation of the Income Statement

Based on the Section 74. (2) of Act C/2000 on accounting the exports sales revenue includes the value of sales and services supplied to non-resident customer regardless of the location of the services provided, except the customer is non-residential in the territory of Hungarian Republic and has not officially informed Magyar Telekom Plc. (e.g. non-resident customer - whose registered office, place of abode or permanent residence is situated abroad - buys phone sets in the distribution network).

Revenues and expenses are recognized in line with the accrual concept of accounting. Non-realized exchange rate differences are recognized as follows:

- if the net balance of non-realized foreign exchange gain and loss is a gain, it is recorded as other revenue from financial transactions,
- if the net balance is a loss, it is recorded as other expenses from financial transactions.

The Company recognizes dividends approved by the General Meeting of the subsidiaries and associates in the year following the one they relate to. Interim dividends paid by the subsidiaries and associates are recorded as liability until final approval.

The fees paid by Magyar Telekom Plc. to carrier, mobile and international service providers for call termination are invoiced to the customers by Magyar Telekom Plc. Therefore the payments for calls initiated in Magyar Telekom Plc. s network and terminated by carrier, mobile and international service providers as well as payments for leased lines (both domestic and international) are recorded and disclosed as intermediated services disclosed as costs of services sold.

Extraordinary items are disclosed in the Notes.

Revenues and expenses not directly related to the ordinary operations are disclosed as extraordinary items.

Notes to the Financial Statements prepared in accordance with the Hungarian Act on Accounting as of December 31, 2010 (All amounts in millions of HUF, unless otherwise indicated)

#### OTHER

Magyar Telekom Plc. pays special attention to meeting environmental protection regulations in its activities. The necessary power supply batteries used in switches and power generators and used cell phones are stored and neutralized in accordance with the applicable environmental protection laws.

The Company did not incur penalty expenses due to environmental liabilities.

## 4. <u>Summary of the Company s financial position and liquidity</u>

The Company s financial position and liquidity as of December 31, 2009 and 2010 are represented by the following financial ratios:

|   | 2009 | 2010 |
|---|------|------|
| Liquidity ratio (= current assets / current liabilities) (1)                                  | 0.39 | 0.29 |
| Operating margin (= operating profit / (sales revenues + other revenues))                     | 0.15 | 0.11 |
| Operating return on assets (= operating profit / total assets)                                | 0.08 | 0.06 |
| Leverage ratio (= non current liabilities / (non current liabilities + shareholder s equity)) |      |      |
| (2)   | 0.45 | 0.39 |

(1) The decrease of liquidity ratio is due to the decrease of receivables from other related parties which is disclosed in the Note 13.

(2) The change is mainly due to the decrease in non current liabilities. The change of non current liabilities is disclosed in the Note 19 and 20.

## <u>Rights</u>

The gross value of rights increased by HUF 14,347 million in the current year. Significant part of this increment was caused by capitalizations and additional capitalizations of IT systems software rights of use (HUF 3,769

Notes to the Financial Statements prepared in accordance with the Hungarian Act on Accounting as of December 31, 2010 (All amounts in millions of HUF, unless otherwise indicated)

million), other software rights of use (HUF 1,685 million), general-purpose software rights of use (HUF 1,016 million) and BSS billing system software rights of use (HUF 566 million).

The decrease is mainly due to the scrapping of general-purpose software rights of use (gross value is HUF 664 million, net value is HUF 43 million) and other software rights of use (gross value is HUF 288 million, net value is zero).

Intellectual properties

The increase is mainly due to the capitalization of other own software (HUF 851 million).

In 2010, the Company reviewed the useful lives of rights and intellectual properties similar to previous years and executed the changes in useful lives where the Company deemed it necessary. Due to the changes HUF 14 million less amortization was charged for 2010 on the assets concerned of the two categories.

#### <u>Goodwill</u>

In 2010, the Company purchased 100 per cent of the shares of Modultechnika Kft. In these transactions HUF 1,477 million goodwill were recognized.

Also in 2010, connected to the payment of the second purchase price instalment of KFKI Direkt Kft. and ISH Informatika Kft. further HUF 10 million and HUF 173 million goodwill were recognized, respectively. Goodwill recognized related to KFKI Direkt Kft. is shown on KFKI Zrt. in 2010 as a result of the merger

In 2010, the Company s investment in Orbitel E.A.D. was sold to Spectrum Net A.D. Bulgaria so the related goodwill was also cancelled from the books (the transferred gross value is HUF 933 million, net value is zero).

The goodwill disclosed on the Origo Zrt. line contains the goodwill on the purchases of Iwiw Szolgáltató Kft., M-Factory Kft. and Adnetwork Online Marketing Kft. because these companies merged into Origo Zrt.

During 2010, HUF 10,129 million amortization was charged on goodwill for those items which were recognized before January 1, 2005.

#### 43. Self-revisions

At Magyar Telekom Plc., financial events that are related to prior years are recorded in the current year through self-revision.

According to the Hungarian Accounting Regulations, if the impact of the self-revision exceeds the 2 per cent of the total assets of the current year, or at least HUF 500 million, such items must be disclosed in a separate column in both the balance sheet and the income statement.

Errors related to prior years, that were discovered in 2009 exceeded the HUF 500 million limit (irrespective of their profit increasing or decreasing nature), therefore they are presented next to previous year s figures in the balance sheet and income statement.

The total (profit decreasing) impact of self-revisions is HUF 605 million and is broken down by corresponding years as follows:

| Year | Self-revision |
|------|---------------|
| 1996 | 2             |
| 1997 | 14            |
| 1998 | -1            |
| 1999 | -1            |
