Chairman's Letter to Shareholders

Dear Shareholders,

Investors have many reasons to remain cautious. The challenges in the Euro area are casting a shadow over global economies and financial markets. The political support for addressing fiscal issues is eroding as the economic and social impacts become more visible. At the same time, member nations appear unwilling to provide adequate financial support or to surrender sufficient sovereignty to strengthen the banks or unify the Euro area financial system. The gains made in reducing deficits, and the hard-won progress on winning popular acceptance of the need for economic austerity, are at risk. To their credit, European political leaders press on to find compromise solutions, but there is increasing concern that time will begin to run out.

In the U.S., strong corporate earnings have enabled the equity markets to withstand much of the downward pressures coming from weakening job creation, slower economic growth and political uncertainty. The Fed remains committed to low interest rates and announced on September 13, 2012 (after the close of this reporting period) another program of quantitative easing (QE3) to continue until mid-2015. Pre-election maneuvering has added to the already highly partisan atmosphere in Congress. The end of the Bush-era tax cuts and implementation of the spending restrictions of the Budget Control Act of 2011, both scheduled to take place at year-end, loom closer.

During the last year, U.S. based investors have experienced a sharp decline and a strong recovery in the equity markets. The experienced investment teams at Nuveen keep their eye on a longer time horizon and use their practiced investment disciplines to negotiate through market peaks and valleys to achieve long-term goals for investors. Experienced professionals pursue investments that will weather short-term volatility and at the same time, seek opportunities that are created by markets that overreact to negative developments. Monitoring this process is an important consideration for the Fund Board as it oversees your Nuveen Fund on your behalf.

As always, I encourage you to contact your financial consultant if you have any questions about your investment in a Nuveen Fund. On behalf of the other members of your Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

Robert P. Bremner Chairman of the Board September 21, 2012

Portfolio Managers' Comments

Certain statements in this report are forward-looking statements. Discussions of specific investments are for illustration only and are not intended as recommendations of individual investments. The forward-looking statements and other views expressed herein are those of the portfolio managers as of the date of this report. Actual future results or occurrences may differ significantly from those anticipated in any forward-looking statements and the views expressed herein are subject to change at any time, due to numerous market and other factors. The Funds disclaim any obligation to update publicly or revise any forward-looking statements or views expressed herein.

Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's Group, Moody's Investors Service, Inc. or Fitch, Inc. Credit ratings are subject to change. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC, CC, C and D are below investment grade ratings. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by a national rating agency.

Nuveen Senior Income Fund (NSL) Nuveen Floating Rate Income Fund (JFR) Nuveen Floating Rate Income Opportunity Fund (JRO) Nuveen Short Duration Credit Opportunities Fund (JSD)

The Funds' investment portfolios are managed by Gunther Stein of Symphony Asset Management, LLC (Symphony), an affiliate of Nuveen Investments. Gunther, who is Symphony's chief investment officer, has more than 20 years of investment management experience, much of it in evaluating and purchasing senior corporate loans and other high-yield debt. During March 2012, Scott Caraher was added as a co-portfolio manager for NSL, JFR and JRO.

JSD, which commenced operations on May 25, 2011, is also managed by Scott Caraher and Jenny Rhee. Scott and Jenny each have more than ten years of investment experience.

Here the team talks about the U.S. economic and equity market conditions and their management strategies, and the performance of the Funds for the twelve-month period ended July 31, 2012.

What factors affected the U.S. economic and equity market conditions during the twelve-month reporting period ending July 31, 2012?

During the reporting period, the U.S. economy's progress toward recovery from recession remained sluggish. The Federal Reserve (Fed) maintained its efforts to improve the overall economic environment by continuing to hold the benchmark Fed Funds rate at the record low level of zero to 0.25% that it had established in December 2008. At its September 2012 meeting, the central bank affirmed its opinion that economic conditions would likely warrant keeping the rate at "exceptionally low levels" through mid-2015. The Fed also announced that it would extend its so-called Operation Twist program, whereby it is lengthening the average maturity of its holdings of U.S. Treasury securities, through the end of December 2012. The goals of this program are to lower longer-term interest rates, make broader financial conditions more accommodating, support a stronger economic recovery and help ensure that inflation remains at levels consistent with the Fed's mandates of maximum employment and price stability.

In the second quarter of 2012, the U.S. economy slowed to an annualized growth rate of 1.5%, according to initial estimates for U.S. gross domestic product (GDP). While this marked the twelfth consecutive quarter of positive growth, it was also a significant slowdown from the previous few quarters. The Consumer Price Index (CPI) rose 1.4% year-over-year as of July 2012, lower than the June figure of 1.7%, which was the

lowest twelve-month rate of change since November 2010. Core CPI (which excludes food and energy) increased 2.1% during the period, remaining above the Fed's unofficial objective of 2.0% or lower for this inflation measure. However, the number was slightly below the 2.2% figure reported in June. Labor market conditions continued to be slow to improve, with the national unemployment rate registering 8.3% in July 2012. While this figure was down from 9.1% one year ago, the rate was still a slight uptick from June 2012. The housing market remained the major weak spot in the economy, beleaguered by a high level of distressed properties and difficult credit conditions. For the twelve months ended June 2012 (the most recent data available at the time this report was prepared), the average home price in the Standard & Poor's (S&P)/ Case-Shiller Index of 20 major metropolitan areas rose 0.5%, marking the second consecutive month prices rose. In addition, the U.S. economic picture continued to be clouded by concerns about the European debt crisis and global financial markets in general and efforts to reduce the U.S. federal deficit.

Throughout the fiscal year period, fixed-income markets were buffeted by concerns about the tepid U.S. economic recovery combined with the ballooning U.S. federal deficit, the seemingly unending European debt crisis and a broader slowdown in global growth, especially emerging markets. These macro events caused the financial markets to fluctuate between embracing risk and shunning risk several times during the period. In late summer of 2011, the markets experienced a massive flight to quality, leading U.S. Treasuries to outperform all risk assets, particularly equities, high yield and investment-grade corporate bonds. However, late fall brought about a renewed appetite for risk as the European crisis appeared to be on the mend and U.S. economic indicators strengthened. Risk premiums on non-government bonds contracted and asset classes such as high-yield corporates, emerging market debt and commercial mortgage-backed securities substantially outperformed Treasuries. In the final months of the reporting period, however, the situation reversed once again as a broad slowdown in global growth together with renewed political discord and sovereign funding pressures in Europe cast a malaise over the markets. Not surprisingly, risk premiums on non-government bonds, including high yield bonds, widened once again as U.S. Treasuries renewed their perceived safe haven status, outperforming other riskier asset classes.

During the reporting period, the senior loan and high yield asset classes saw positive returns as both fundamentals and the technical environment remained favorable. Mutual funds and similar vehicles had steady inflows. The one exception during the reporting period was in mid-May when general market volatility related to problems in the Eurozone and the U.S. fiscal crisis led to higher risk premiums on non-government bonds. This negatively impacted high yield corporate bonds. However, overall flows into senior loan and high yield mutual funds continued to be strong.

What key strategies were used to manage the Funds during the twelve-month period ended July 31, 2012?

NSL, JFR and JRO have similar investment objectives and strategies. Each Fund is designed to seek a high level of current income by investing primarily in a portfolio of adjustable rate, senior secured corporate loans. The Funds also may invest in unsecured

senior loans, other debt securities, and equity securities and warrants acquired in connection with an investment in senior loans. A significant portion of each Fund's assets may be invested in instruments that, at the time of investment, are rated below investment grade or are unrated but judged by Symphony to be of comparable quality.

JSD seeks to provide current income and the potential for capital appreciation. In seeking to achieve this, the Fund invests primarily in a blended portfolio of below investment grade adjustable rate corporate debt instruments, including senior secured loans, second lien loans and other adjustable rate corporate debt instruments. The Fund may also make limited tactical investments in other types of debt instruments and may enter into tactical short positions consisting primarily of high yield debt. Through these investments, the Fund seeks to capitalize on the credit spread opportunity (as measured by the difference in yield between below investment grade instruments and high grade benchmarks) that often prevails through all phases of the interest rate cycle, and to offer the opportunity for additional income if interest rates are rising.

In many cases, we felt that weakness in May 2012 created opportunity within the loan market. Companies continued to be in overall good health with default rates for loans below 2%. Weakness was seen in very specific areas, such as markets related to natural gas or in businesses with company specific issues. While many issuers in the senior loan market are rated below investment grade, senior loans are senior in the capital structure of the issuer and are secured by a lien on assets. In many cases, these are tangible assets. During the period, the Funds' capital was deployed into assets which offer high current income and yield, while also offering the potential for upside appreciation as many of these assets trade at a discount to par value. Fundamentally, we continued to feel that many of these companies have stable businesses, good asset coverage for senior debt holders and can perform well in a stable to slow-growth environment.

How did the Funds perform over this twelve-month period?

The performance of the Funds, as well as the performance of comparative market indexes, is presented in the accompanying table.

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares.

For additional information, see the individual Performance Overview for your Fund in this report.

Index**	7.20%	6.88%	5.63%	7.56%
CSFB Leveraged Loan				
Index**	4.16%	4.43%	5.36%	3.44%

For the twelve-month period ending July 31, 2012, NSL, JRO and JSD outperformed the CSFB Leveraged Loan Index and the Barclays U.S. Aggregate Bond Index. JFR underperformed the Barclays U.S. Aggregate Bond Index, but outperformed the CSFB Leveraged Loan Index.

For NSL, JFR and JRO, our position in Univision Communications, Inc., Extended First-Lien Term Loan performed well during the reporting period. The market was generally positive for large liquid names such as Univision. In addition, Univision recently announced a senior secured bond deal to repay the loan. Performing well for all four funds were the First Data Corporation, Non-Extended B-1 and B-2 Term Loans, which also recently announced a pay down of its loans that will be financed with a senior secured bond

deal. First Data also announced earnings during the period, which were viewed favorably versus consensus expectations.

The Funds were hurt by positions in Frac Tech International's Term Loan. The company services the natural gas exploration and production business. Frac Tech has been hurt by pricing pressure within the natural gas and exploration sector. This is compounded by the effects the pricing pressure has had on the company's clients. Also detracting from performance was exposure to Travelport. The company was put on negative watch by Moody's during the period as economic challenges have put pricing pressure on global travel.

In addition to the holdings mentioned previously, JSD benefited from short exposure to issuers such as Best Buy Co., Inc. and J.C. Penney Company, Inc. Both companies have had fundamental issues, which have caused the bonds to sell-off. JSD benefited from the sell-off.

JSD also continued to invest in credit default swaps, which were used to provide a benefit if particular bonds' credit quality worsened. The Fund does not hold other securities issued by the issuers referenced under these credit default swap contracts. These contracts had a mildly positive effect on performance during the period as credit strengthened.

Fund Leverage and Other Information

IMPACT OF THE FUNDS' LEVERAGE STRATEGY ON PERFORMANCE

One important factor impacting the return of the Funds relative to their benchmarks was the Funds' use of leverage through the use of bank borrowings. The Funds use leverage because their managers believe that, over time, leveraging provides opportunities for additional income and total return for common shareholders. However, use of leverage also can expose common shareholders to additional volatility. For example, as the prices of securities held by a Fund decline, the negative impact of these valuation changes on common share net asset value (NAV) and common shareholder total return is magnified by the use of leverage. Conversely, leverage may enhance common share returns during periods when the prices of securities held by a Fund generally are rising. Leverage had a positive impact on the performance of the Funds over this reporting period. During the period, the Funds continued to invest in interest rate swap contracts to partially fix the interest cost of their leverage. This had a mildly negative effect on performance during the period as the interest rate swaps had negative cash flow accruals for the period and unrealized losses from a decline in interest rates.

RISK CONSIDERATIONS

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation. Shares of closed-end funds are subject to investment risks, including the possible loss of principal invested. Past performance is no guarantee of future results.

Investment and Market Risk. An investment in common shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in common shares represents an indirect investment in the corporate securities owned by the Funds, which generally trade in the over-the-counter markets. Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Price Risk. Shares of closed-end investment companies like the Funds frequently trade at a discount to their NAV. Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Leverage Risk. The Funds' use of leverage creates the possibility of higher volatility for the Funds' per share NAV, market price, and distributions. Leverage risk can be introduced through regulatory leverage (issuing preferred shares or debt borrowings at the Fund level) or through certain derivative investments held in a Fund's portfolio. Leverage typically magnifies the total return of a Fund's portfolio, whether that return is positive or

negative. The use of leverage creates an opportunity for increased common share net income, but there is no assurance that a Fund's leveraging strategy will be successful.

Tax Risk. The tax treatment of Fund distributions may be affected by new IRS interpretations of the Internal Revenue Code and future changes in tax laws and regulations.

Issuer Credit Risk. This is the risk that a security in a Fund's portfolio will fail to make dividend or interest payments when due.

Illiquid Securities Risk. This is the risk that a Fund may not be able to sell securities in its portfolio at the time or price desired by the Fund.

Non-Investment Grade or Below-Investment Grade Risk. Investments in securities below investment grade quality are predominantly speculative and subject to greater volatility and risk of default.

Unrated Investment Risk. In determining whether an unrated security is an appropriate investment for a Fund, the manager will consider information from industry sources, as well as its own quantitative and qualitative analysis, in making such a determination. However, such a determination by the manager is not the equivalent of a rating by a rating agency.

Senior Loan Risk. Senior loans, both secured and unsecured, may not be rated by a national rating agency at the time of investment, generally will not be registered with the Securities and Exchange Commission (SEC) and generally will not be listed on a securities exchange. In addition, the amount of public information available with respect to senior loans generally is less extensive than that available for more widely rated, registered and exchange-listed securities.

Risks from Unsecured Adjustable Rate Loans or Insufficient Collateral Securing Adjustable Rate Loans. Some of the adjustable rate loans in which a Fund may invest will be unsecured, thereby increasing the risk of loss to the Fund in the event of Issuer default. Other adjustable rate loans may be secured by specific collateral, but there can be no assurance that liquidating this collateral would satisfy a borrower's obligation to the Fund in the event of borrower default, or that such collateral could be readily liquidated under such circumstances.

Derivatives Strategy Risk. Derivative securities, such as calls, puts, warrants, swaps and forwards, carry risks different from, and possibly greater than, the risks associated with the underlying investments.

Interest Rate Risk. Fixed-income securities such as bonds, preferred, convertible and other debt securities will decline in value if market interest rates rise.

Reinvestment Risk. If market interest rates decline, income earned from a Fund's portfolio may be reinvested at rates below that of the original bond that generated the income.

Common Share Distribution and Price Information

Distribution Information

The following information regarding the Funds' distributions is current as of July 31, 2012, and will likely vary over time based on each Fund's investment activity and portfolio investment value changes.

During the twelve-month reporting period, NSL and JSD had two monthly distribution increases, while JFR and JRO received three monthly dividend increases.

The Funds employ leverage through the use of bank borrowings. Financial leverage provides the potential for higher earnings (net investment income), total returns and distributions over time, but as noted earlier also increases the variability of common shareholders' net asset value (NAV) per share in response to changing market conditions.

During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of July 31, 2012, all four Funds had positive UNII balances for both tax and financial reporting purposes.

Common Share Repurchases

As of July 31, 2012, and since the inception of the Funds' repurchase programs, JFR and JRO have cumulatively repurchased and retired their common shares as shown in the accompanying table. Since the inception of the Funds' repurchase programs, NSL and JSD have not repurchased any of their outstanding common shares.

Fund	Common Shares Repurchased and Retired	% of Outstanding Common Shares
JFR	147,593	0.3%
JRO	19,400	0.1%

During the current reporting period, JFR and JRO did not repurchase any of their outstanding common shares.

Common Share Shelf Equity Programs

NSL, JFR and JRO have filed registration statements with the SEC authorizing the Funds to issue 2.9 million, 4.7 million and 2.8 million common shares, respectively, through a shelf offering. Under these equity shelf programs, the Funds, subject to

market conditions, may raise additional capital from time to time in varying amounts and offering methods at a net price at or above each Fund's NAV per common share.

As of July 31, 2012, NSL, JFR and JRO had cumulatively sold 2.9 million, 851,441 and 2.8 million common shares, respectively, through their shelf equity programs.

During the twelve-month reporting period, NSL, JFR and JRO sold common shares through their shelf equity programs at a weighted average premium to NAV per common share as shown in the accompanying table.

Fund	Common Shares Sold through Shelf Offering	Weighted Average Premium to NAV Per Common Share Sold
NSL	759,751	1.69%
JFR	54,809	1.14%
JRO	731,647	1.53%

On August 17, 2012 (subsequent to the close of this reporting period), NSL and JRO filed registration statements with the SEC authorizing the Funds to issue an additional 3.2 million and 3.1 million shares, respectively, through their shelf offerings.

Common Share Price Information

As of July 31, 2012, and during the twelve-month reporting period, the Funds were trading at (+) premiums/(-) discounts to their common share NAVs as shown in the accompanying table.

	7/31/12	Twelve-Month Average
Fund	(+) Premium/(-) Discount	(-) Discount
NSL	(+)3.11%	(-)0.53%
JFR	(-)0.76%	(-)3.50%

Report of INDEPENDENT REGISTERED

PUBLIC ACCOUNTING FIRM

The Board of Trustees and Shareholders Nuveen Senior Income Fund Nuveen Floating Rate Income Fund Nuveen Floating Rate Income Opportunity Fund Nuveen Short Duration Credit Opportunities Fund

We have audited the accompanying statements of assets and liabilities, including the portfolios of investments, of Nuveen Senior Income Fund, Nuveen Floating Rate Income Fund, Nuveen Floating Rate Income Opportunity Fund, and Nuveen Short Duration Credit Opportunities Fund (the "Funds") as of July 31, 2012, and the related statements of operations and cash flows for the year then ended, and the statements of changes in net assets and the financial highlights for each of the periods indicated therein. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Funds' internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of July 31, 2012, by correspondence with the custodian, agent banks, and brokers or by other appropriate auditing procedures where replies from agent banks or brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial positions of Nuveen Senior Income Fund, Nuveen Floating Rate Income Fund, Nuveen Floating Rate Income Opportunity Fund, and Nuveen Short Duration Credit Opportunities Fund at July 31, 2012, and the results of their operations and their cash flows for the year then ended, and the changes in their net assets, and the financial highlights for each of the periods indicated therein in conformity with U.S. generally accepted accounting principles.

* Annualized.

For Fund portfolio compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

(1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.

(2) Senior Loans generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a borrower to prepay, prepayments of Senior Loans may occur. As a result, the actual remaining maturity of Senior Loans held may be substantially less than the stated maturities shown.

(3) Ratings (not covered by the report of independent registered public accounting firm): Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

(4) Senior Loans generally pay interest at rates which are periodically adjusted by reference to a base short-term, floating lending rate plus an assigned fixed rate. These floating lending rates are generally (i) the lending rate referenced by the London Inter-Bank Offered Rate ("LIBOR"), or (ii) the prime rate offered by one or more major United States banks.

Senior Loans may be considered restricted in that the Fund ordinarily is contractually obligated to receive approval from the Agent Bank and/or Borrower prior to the disposition of a Senior Loan.

(5) Investment, or portion of investment, represents an unfunded Senior Loan commitment outstanding at July 31, 2012.

(6) At or subsequent to the end of the reporting period, this security is non-income producing. Non-income producing security, in the case of a bond, generally denotes that the issuer has (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal Bankruptcy Court or (3) the Fund's Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has directed the Fund's custodian to cease accruing additional income on the Fund's records.

(7) Non-income producing; issuer has not declared a dividend within the past twelve months.

(8) Borrowings as a percentage of total investments is 29.7%.

(9) The Fund segregates 100% of its eligible investments in the Portfolio of Investments as collateral for Borrowings.

(10) Other Assets Less Liabilities includes the net Unrealized Appreciation (Depreciation) of derivative instruments as noted within Investments in Derivatives at July 31, 2012.

(11) For fair value measurement disclosure purposes, Common Stock categorized as Level 2. See Notes to Financial Statements, Footnote 1 General Information and Significant Accounting Policies, Investment Valuation for more information.

N/R Not rated.

DD1 Portion of investment purchased on a delayed delivery basis.

WI/DD Purchased on a when-issued or delayed delivery basis.

144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.

TBD Senior Loan purchased on a when-issued or delayed-delivery basis. Certain details associated with this purchase are not known prior to the settlement date of the transaction. In addition, Senior Loans typically trade without accrued interest and therefore a weighted average coupon rate is not available prior to settlement. At settlement, if still unknown, the borrower or counterparty will provide the Fund with the final weighted average coupon rate and maturity date.

USD-LIBOR United States Dollar London Inter-Bank Offered Rate

See accompanying notes to financial statements.

					-	\$ (4,100,038)

* Annualized.

For Fund portfolio compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

(1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.

(2) Senior Loans generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a borrower to prepay, prepayments of Senior Loans may occur. As a result, the actual remaining maturity of Senior Loans held may be substantially less than the stated maturities shown.

(3) Ratings (not covered by the report of independent registered public accounting firm): Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

(4) Senior Loans generally pay interest at rates which are periodically adjusted by reference to a base short-term, floating lending rate plus an assigned fixed rate. These floating lending rates are generally (i) the lending rate referenced by the London Inter-Bank Offered Rate ("LIBOR"), or (ii) the prime rate offered by one or more major United States banks.

Senior Loans may be considered restricted in that the Fund ordinarily is contractually obligated to receive approval from the Agent Bank and/or Borrower prior to the disposition of a Senior Loan.

(5) Investment, or portion of investment, represents an unfunded Senior Loan commitment outstanding at July 31, 2012.

(6) At or subsequent to the end of the reporting period, this security is non-income producing. Non-income producing security, in the case of a bond, generally denotes that the issuer has (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal Bankruptcy Court or (3) the Fund's Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has directed the Fund's custodian to cease accruing additional income on the Fund's records.

(7) Non-income producing; issuer has not declared a dividend within the past twelve months.

(8) Investment, or portion of investment, has been pledged as collateral for investments in derivatives.

(9) Borrowings as a percentage of total investments is 30.2%.

(10) The Fund segregates 100% of its eligible investments in the Portfolio of Investments as collateral for Borrowings.

(11) Other Assets Less Liabilities includes the net Unrealized Appreciation (Depreciation) of derivative instruments as noted within Investments in Derivatives at July 31, 2012.

(12) For fair value measurement disclosure purposes, Common Stock categorized as Level 2. See Notes to Financial Statements, Footnote 1 General Information and Significant Accounting Policies, Investment Valuation for more information.

N/R Not rated.

N/A Not applicable.

DD1 Portion of investment purchased on a delayed delivery basis.

WI/DD Purchased on a when-issued or delayed delivery basis.

144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.

TBD Senior Loan purchased on a when-issued or delayed-delivery basis. Certain details associated with this purchase are not known prior to the settlement date of the transaction. In addition, Senior Loans typically trade without accrued interest and therefore a weighted average coupon rate is not available prior to settlement. At settlement, if still unknown, the borrower or counterparty will provide the Fund with the final weighted average coupon rate and maturity date.

USD-LIBOR United States Dollar London Inter-Bank Offered Rate

See accompanying notes to financial statements.

* Annualized.

For Fund portfolio compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

(1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.

(2) Senior Loans generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a borrower to prepay, prepayments of Senior Loans may occur. As a result, the actual remaining maturity of Senior Loans held may be substantially less than the stated maturities shown.

(3) Ratings (not covered by the report of independent registered public accounting firm): Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

(4) Senior Loans generally pay interest at rates which are periodically adjusted by reference to a base short-term, floating lending rate plus an assigned fixed rate. These floating lending rates are generally (i) the lending rate referenced by the London Inter-Bank Offered Rate ("LIBOR"), or (ii) the prime rate offered by one or more major United States banks.

Senior Loans may be considered restricted in that the Fund ordinarily is contractually obligated to receive approval from the Agent Bank and/or Borrower prior to the disposition of a Senior Loan.

(5) Investment, or portion of investment, represents an unfunded Senior Loan commitment outstanding at July 31, 2012.

(6) At or subsequent to the end of the reporting period, this security is non-income producing. Non-income producing security, in the case of a bond, generally denotes that the issuer has (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal Bankruptcy Court or (3) the Fund's Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has directed the Fund's custodian to cease accruing additional income on the Fund's records.

(7) Non-income producing; issuer has not declared a dividend within the past twelve months.

(8) Investment, or portion of investment, has been pledged as collateral for investments in derivatives.

(9) Borrowings as a percentage of total investments is 29.8%.

(10) The Fund segregates 100% of its eligible investments in the Portfolio of Investments as collateral for Borrowings.

(11) Other Assets Less Liabilities includes the net Unrealized Appreciation (Depreciation) of derivative instruments as noted within Investments in Derivatives at July 31, 2012.

(12) For fair value measurement disclosure purposes, Common Stock categorized as Level 2. See Notes to Financial Statements, Footnote 1 General Information and Significant Accounting Policies, Investment Valuation for more information.

N/R Not rated.

N/A Not applicable.

DD1 Portion of investment purchased on a delayed delivery basis.

WI/DD Purchased on a when-issued or delayed delivery basis.

144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.

TBD Senior Loan purchased on a when-issued or delayed-delivery basis. Certain details associated with this purchase are not known prior to the settlement date of the transaction. In addition, Senior Loans typically trade without accrued interest and therefore a weighted average coupon rate is not available prior to settlement. At settlement, if still unknown, the borrower or counterparty will provide the Fund with the final weighted average coupon rate and maturity date.

USD-LIBOR United States Dollar London Inter-Bank Offered Rate

For Fund portfolio compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

(1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.

(2) Senior Loans generally are subject to mandatory and/or optional prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a borrower to prepay, prepayments of Senior Loans may occur. As a result, the actual remaining maturity of Senior Loans held may be substantially less than the stated maturities shown.

(3) Ratings (not covered by the report of independent registered public accounting firm): Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.

(4) Senior Loans generally pay interest at rates which are periodically adjusted by reference to a base short-term, floating lending rate plus an assigned fixed rate. These floating lending rates are generally (i) the lending rate referenced by the London Inter-Bank Offered Rate ("LIBOR"), or (ii) the prime rate offered by one or more major United States banks.

Senior Loans may be considered restricted in that the Fund ordinarily is contractually obligated to receive approval from the Agent Bank and/or Borrower prior to the disposition of a Senior Loan.

(5) Borrowings as a percentage of total investments is 30.2%.

(6) The Fund segregates 100% of its eligible investments in the Portfolio of Investments as collateral for Borrowings.

(7) Other Assets Less Liabilities includes the net Unrealized Appreciation (Depreciation) of derivative instruments as noted within Investments in Derivatives at July 31, 2012.

(8) The credit spread generally serves as an indication of the current status of the payment/performance risk and therefore the likelihood of default of the credit derivative. The credit spread also reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into a credit

default swap contract. Higher credit spreads are indicative of a higher likelihood of performance by the seller of protection.

(9) The Fund entered into the credit default swap to gain investment exposure to the referenced entity. Selling protection has a similar credit risk position to owning that referenced entity. Buying protection has a similar credit risk position to selling the referenced entity short.

N/R Not rated.

N/A Not applicable.

DD1 Portion of investment purchased on a delayed delivery basis.

WI/DD Purchased on a when-issued or delayed delivery basis.

144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.

TBD Senior Loan purchased on a when-issued or delayed-delivery basis. Certain details associated with this purchase are not known prior to the settlement date of the transaction. In addition, Senior Loans typically trade without accrued interest and therefore a weighted average coupon rate is not available prior to settlement. At settlement, if still unknown, the borrower or counterparty will provide the Fund with the final weighted average coupon rate and maturity date.

USD-LIBOR United States Dollar London Inter-Bank Offered Rate

(a) Per share Net Investment Income (Loss) is calculated using the average daily shares method.

(b) The amounts shown are based on Common share equivalents.

(c) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

(d) • Ratios do not reflect the effect of dividend payments to Preferred shareholders, where applicable.

• Net Investment Income (Loss) ratios reflect income earned and expenses incurred on assets attributable to Preferred shares and/or borrowings, where applicable.

• Ratios do not reflect the effect of custodian fee credits earned on the Fund's net cash on deposit with the custodian bank, where applicable.

• Each ratio includes the effect of all interest expense and other costs related to borrowings, where applicable, as follows:

Ratios of Borrowings Interest E Average Net Assets Applicable Shares	•	Average Net Assets	igs Interest Expense to s Applicable to Common chares

(a) Per sh	are Net Inve	estment In	come (Los	s) is calcula	ited us	ing the	averade da	ilv share	es meth	bo		

(a) Per share Net Investment Income (Loss) is calculated using the average daily shares method.

(b) The amounts shown are based on Common share equivalents.

(c) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains distributions at

net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.

(d) • Ratios do not reflect the effect of dividend payments to Preferred shareholders, where applicable.

• Net Investment Income (Loss) ratios reflect income earned and expenses incurred on assets attributable to Preferred shares and/or borrowings, where applicable.

• Ratios do not reflect the effect of custodian fee credits earned on the Fund's net cash on deposit with the custodian bank, where applicable.

• Each ratio includes the effect of all interest expense and other costs related to borrowings, where applicable, as follows:

FINANCIAL STATEMENTS

1. General Information and Significant Accounting Policies

General Information

The funds covered in this report and their corresponding Common share New York Stock Exchange ("NYSE") symbols are Nuveen Senior Income Fund (NSL), Nuveen Floating Rate Income Fund (JFR), Nuveen Floating Rate Income Opportunity Fund (JRO) and Nuveen Short Duration Credit Opportunities Fund (JSD) (each a "Fund" and collectively, the "Funds"). The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Prior to commencement of operations, Short Duration Credit Opportunities (JSD) had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 to the Fund by Nuveen Fund Advisors, Inc. (the "Adviser"), a wholly-owned subsidiary of Nuveen Investments, Inc. ("Nuveen"), and the recording of the Fund's organizational expenses (\$11,000) and its reimbursement by the Adviser.

Senior Income's (NSL) investment objective is to achieve a high level of current income, consistent with capital preservation. The Fund invests 80% of its total assets in adjustable rate senior secured loans. The Fund may invest up to 20% of its total assets in U.S. dollar-denominated senior loans of non-U.S. borrowers, senior loans that are not secured, other debt securities, and equity securities and warrants acquired in connection with the Fund's investment in senior loans.

Floating Rate Income's (JFR) investment objective is to achieve a high level of current income. The Fund invests at least 65% of its managed assets (as defined in Footnote 7 Management Fees and Other Transactions with Affiliates) in adjustable rate senior loans that are secured by specific collateral. The Fund may invest a substantial portion of its managed assets in senior loans and other debt instruments that are, at the time of investment, rated below investment grade or are unrated but judged to be of comparable quality by the Fund's sub-adviser Symphony Asset Management, LLC ("Symphony"), an affiliate of Nuveen.

Floating Rate Income Opportunity's (JRO) investment objective is to achieve a high level of current income. The Fund invests at least 80% of its managed assets in adjustable rate loans, primarily secured senior loans. As part of the 80% requirement, the Fund also may invest in unsecured senior loans and secured and unsecured subordinated loans. The Fund invests at least 65% of its managed assets in adjustable rate senior loans that are secured by specific collateral.

Short Duration Credit Opportunities' (JSD) investment objective is to provide current income and the potential for capital appreciation. The Fund seeks to achieve its objective by primarily investing in a blended portfolio of below investment grade adjustable rate corporate debt instruments, including senior secured loans, second lien loans and other adjustable rate corporate debt instruments. Under normal market circumstances the Fund will invest at least 70% of its managed assets in adjustable rate senior loans and second lien loans. The Fund may make limited tactical investments in high yield debt and other debt instruments of up to 30% of its managed assets. No more than 20% of the Fund's managed assets may be invested in debt instruments that are, at the time of investment, rated CCC+ or Caa or below by any Nationally Recognized Statistical Rating Organization or that are unrated but judged by the Fund's

sub-adviser, Symphony, to be of comparable quality. The Fund may enter into tactical short positions consisting primarily of high yield debt, either directly or through the use of derivatives, including credit default swaps, creating investment exposure or hedging existing long (positive) investment exposure in a notional amount up to 20% of its managed assets. Initially, these short positions will not increase the Fund's leverage ratio or overall investment exposure because the Fund will not use any proceeds or cash from short sales to invest in additional securities. The Fund may invest up to 20% of its managed assets in debt instruments of non-U.S. issuers that are U.S. dollar or non-U.S. dollar denominated. The Fund's investments in debt instruments of non-U.S. issuers may include debt instruments of issuers located, or conducting their business, in emerging markets countries.

Significant Accounting Policies

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles ("U.S. GAAP").

Investment Valuation

Common stocks and other equity-type securities are valued at the last sales price on the securities exchange on which such securities are primarily traded and are generally classified as Level 1 for fair value measurement purposes. Securities primarily traded on the NASDAQ National Market ("NASDAQ") are valued, except as indicated below, at the NASDAQ Official Closing Price and are generally classified as Level 1. However, securities traded on a securities exchange or NASDAQ for which there were no transactions on a given day or securities not listed on a securities exchange or NASDAQ are valued at the quoted bid price and are generally classified as Level 2.

Investments in investment companies are valued at their respective net asset values on the valuation date. These investment vehicles are generally classified as Level 1.

Prices of fixed-income securities, senior loans and swap contracts are provided by a pricing service approved by the Funds' Board of Trustees. These securities are generally classified as Level 2. The pricing service establishes a security's fair value using methods that may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. In pricing certain securities, particularly less liquid and lower quality securities, the pricing service may consider information about a security, its issuer, or market activity provided by the Adviser. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs.

Like most fixed-income instruments, the senior and subordinated loans in which the Funds invest are not listed on an organized exchange. The secondary market of such investments may be less liquid relative to markets for other fixed-income securities. Consequently, the value of senior and subordinated loans, determined as described above, may differ significantly from the value that would have been determined had there been an active market for that senior loan. These securities are generally classified as Level 2.

Repurchase agreements are valued at contract amount plus accrued interest, which approximates market value. These securities are generally classified as Level 2.

Certain securities may not be able to be priced by the pre-established pricing methods as described above. Such securities may be valued by the Funds' Board of Trustees or its designee at fair value. These securities generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; debt securities that have gone into default and for which there is no current market quotation; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of a Fund's net asset value (as may be the case in non-U.S. markets on which the security is primarily traded) or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, is not deemed to reflect the security's fair value. As a general principle, the

fair value of a security would appear to be the amount that the owner might reasonably expect to receive for it in a current sale. A variety of factors may be considered in determining the fair value of such securities, which may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs. Regardless of the method employed to value a particular security, all valuations are subject to review by the Funds' Board of Trustees or its designee.

Refer to Footnote 2 Fair Value Measurements for further details on the leveling of securities held by the Funds as of the end of the reporting period.

Investment Transactions

Investment transactions are recorded on a trade date basis. Trade date for senior and subordinated loans purchased in the "primary market" is considered the date on which the loan allocations are determined. Trade date for senior and subordinated loans purchased in the "secondary market" is the date on which the transaction is entered into. Realized gains and losses from investment transactions are determined on the specific identification method, which is the same basis used for federal income tax purposes. Investments purchased on a when-issued/delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to earmark securities in the Funds' portfolios with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. At July 31, 2012, Senior Income (NSL), Floating Rate Income (JFR), Floating Rate Income Opportunity (JRO) and Short Duration Credit Opportunities (JSD) had

outstanding when-issued/delayed delivery purchase commitments of \$6,452,188, \$6,951,844, \$10,075,594 and \$6,391,773, respectively.

Investment Income

Dividend income is recorded on the ex-dividend date. Interest income, which reflects the amortization of premiums and includes accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Interest income also reflects paydown gains and losses and fee income, if any. Fee income consists primarily of amendment fees. Amendment fees are earned as compensation for evaluating and accepting changes to an original senior loan agreement and are recognized when received.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all of its net investment income and net capital gains to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies ("RICs"). Therefore, no federal income tax provision is required.

For all open tax years and all major taxing jurisdictions, management of the Funds has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Open tax years are those that are open for examination by taxing authorities (i.e., generally the last four tax year ends and the interim tax period since then). Furthermore, management of the Funds is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

Dividends and Distributions to Common Shareholders

Dividends to Common shareholders are declared monthly. Net realized capital gains from investment transactions, if any, are declared and distributed to shareholders at least annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal corporate income tax regulations, which may differ from U.S. GAAP.

Preferred Shares

The Funds are authorized to issue Preferred shares. As of July 31, 2010, Senior Income (NSL), Floating Rate Income (JFR) and Floating Rate Income Opportunity (JRO) redeemed all of their outstanding Preferred shares, at liquidation values of \$46,000,000, \$400,000,000 and \$240,000,000, respectively. Short Duration Credit Opportunities (JSD) has not issued Preferred shares since its commencement of operations on May 25, 2011.

Matured Senior Loans

Each Fund may hold senior loans which have matured prior to the end of the current fiscal period. The net realizable value for matured senior loans is recognized on the Statement of Assets and Liabilities as a component of "Receivable for matured senior loans." The net increase or decrease in the net realizable value of the receivable for matured senior loans during the current fiscal period is recognized on the

Statement of Operations as a component of "Other income" or "Other expenses," respectively, when applicable.

Swap Contracts

Each Fund is authorized to enter into swap contracts consistent with their investment objectives and policies to reduce, increase or otherwise alter its risk profile or to alter its portfolio characteristics (i.e. duration, yield curve positioning and credit quality).

Interest Rate Swap Contracts

Each Fund is subject to interest rate risk in the normal course of pursuing its investment objectives and policies in an attempt to obtain a desired return at a lower cost than if the Fund had invested directly in the asset that yielded the desired return. In connection with these contracts, securities in the Funds' portfolios of investments may be identified as collateral in accordance with the terms of the respective swap contract. Interest rate swap contracts involve the exchange by a Fund with another party of their

respective commitments to pay or receive interest (i.e., an exchange of floating rate payments for fixed rate payments with respect to a specified notional amount of principal). Interest rate swap contracts are valued daily. The Funds accrue daily the periodic payments expected to be paid and received on each interest rate swap contract and recognize the daily change in the market value of the Funds' contractual rights and obligations under the contracts. The net amount recorded on these transactions for each counterparty is recognized on the Statement of Assets and Liabilities as a component of "Unrealized appreciation or depreciation on interest rate swaps (, net)" with the change during the fiscal period recognized on the Statement of Operations as a component of "Change in net unrealized appreciation (depreciation) of swaps". Income received or paid by the Funds is recognized as a component of "Net realized gain (loss) from swaps" on the Statement of Operations, in addition to the net realized gains or losses recognized upon the termination of an interest rate swap contract and are equal to the difference between the Funds' basis in the interest rate swap and the proceeds from (or cost of) the closing transaction. The amount of the payment obligation is based on the notional amount of the interest rate swap contract. Payments received or made at the beginning of the measurement period are recognized as a component of "Interest rate swap premiums paid and/or received" on the Statement of Assets and Liabilities, when applicable. For tax purposes, periodic payments are treated as ordinary income or expense.

During the fiscal year ended July 31, 2012, Senior Income (NSL), Floating Rate Income (JFR), Floating Rate Income Opportunities (JRO) and Short Duration Credit Opportunities (JSD) were invested in interest rate swap contracts to partially fix the interest cost of leverage, which each Fund uses through the use of bank borrowings.

	Senior Income (NSL)	Floating Rate Income (JFR)	Floating Rate Income Opportunity (JRO)	Short Duration Credit Opportunities (JSD)
Average notional amount of interest rate swap contracts outstanding*	\$ 48,067,500	\$ 128,531,000	\$ 76,225,500	\$ 42,000,000

The average notional amount of interest rate swap contracts outstanding during the fiscal year ended July 31, 2012, was as follows:

* The average notional amount is calculated based on the outstanding notional amount at the beginning of the fiscal year and at the end of each fiscal quarter within the current fiscal year.

Credit Default Swaps

Each Fund is subject to credit risk in the normal course of pursuing its investment objectives. A Fund may enter into a credit default swap contract to seek to maintain a total return on a particular investment or portion of its portfolio, or to take an active long or short position with respect to the likelihood of a particular issuer's default. Credit default swap contracts involve one party making a stream of payments to another party in exchange for the right to receive a specified return if/when there is a credit event by a third party. Generally, a credit event means bankruptcy, failure to pay, or restructuring. The specific credit events applicable for each credit default swap are stated in the terms of the particular swap agreement. As a purchaser of a credit default swap contract, the Fund pays to the counterparty a periodic interest fee based

on the notional amount of the credit default swap. This interest fee is accrued daily and recognized with the daily change in the market value of the contract as a component of "Unrealized appreciation or depreciation on credit default swaps (, net)" on the Statement of Assets and Liabilities and is recorded as a realized loss upon payment. Upon occurrence of a specific credit event with respect to the underlying referenced entity, the Fund is obligated to deliver that security, or an equivalent amount of cash, to the counterparty in exchange for receipt of the notional amount from the counterparty. The difference between the value of the security delivered and the notional amount received is recorded as a realized gain or loss. Payments received or made at the beginning of the measurement period are recognized as a component of "Credit default swap premiums paid and/or received" on the Statement of Assets and Liabilities, when applicable. As a seller of a credit default swap contract, the Fund generally receives from the counterparty a periodic interest fee based on the notional amount of the credit default swap. This interest fee is accrued daily as a component of unrealized appreciation or depreciation and is recorded as a realized gain or loss upon payment. Upon occurrence of a specific credit event with respect to the underlying referenced entity, the Fund will either receive that security, or an equivalent amount of cash, from the counterparty in exchange for payment of the notional amount to the counterparty, or pay a net settlement amount of the credit default swap contract less the recovery value of the referenced obligation or underlying securities comprising the referenced index. The difference between the value of the security received and the notional amount paid is recorded as a realized loss. Changes in the value of a credit default swap during the fiscal period are recognized as a component of "Change in net unrealized appreciation (depreciation) of swaps," and realized gains and losses are recognized as a component of "Net realized gain (loss) from swaps" on the Statement of Operations. The maximum potential amount of future payments the Fund could incur as a seller of protection in a credit default swap contract is limited to the notional amount of the contract. The maximum potential amount would be offset by the recovery value, if any, of the respective referenced entity.

During the fiscal year ended July 31, 2012, Short Duration Credit Opportunities (JSD) continued to invest in credit default swap contracts to provide a benefit if particular bonds' credit quality worsened. The Fund does not hold other securities issued by the issuers referenced under these credit default swap contracts.

The average notional amount of credit default swap contracts outstanding during the fiscal year ended July 31, 2012, was as follows:

	Short Duration Credit Opportunites (JSD)
Average notional amount of credit default swap	
contracts outstanding*	\$ 7,850,000

* The average notional amount is calculated based on the outstanding notional at the beginning of the fiscal year and at the end of each fiscal quarter within the current fiscal year.

Refer to Footnote 3 Derivative Instruments and Hedging Activities for further details on swap contract activity.

Market and Counterparty Credit Risk

In the normal course of business each Fund may invest in financial instruments and enter into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the other party to the transaction to perform (counterparty credit risk). The potential loss could exceed the value of the financial assets recorded on the financial statements. Financial assets, which potentially expose each Fund to counterparty credit risk, consist principally of cash due from counterparties on forward, option and swap transactions, when applicable. The extent of each Fund's exposure to counterparty credit risk in respect to these financial assets approximates their carrying value as recorded on the Statement of Assets and Liabilities. Futures contracts, when applicable, expose a Fund to minimal counterparty credit risk as they are exchange traded and the exchange's clearinghouse, which is counterparty to all exchange traded futures, guarantees the futures contracts against default.

Each Fund helps manage counterparty credit risk by entering into agreements only with counterparties the Adviser believes have the financial resources to honor their obligations and by having the Adviser monitor the financial stability of the counterparties. Additionally, counterparties may be required to pledge collateral daily (based on the daily valuation of the financial asset) on behalf of each Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold. Reciprocally, when each Fund has an unrealized loss, the Funds have instructed the custodian to pledge assets of the Funds as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the valuations fluctuate, either up or down, by at least the pre-determined threshold amount.

Common Shares Shelf Offering and Shelf Offering Costs

Senior Income (NSL), Floating Rate Income (JFR) and Floating Rate Income Opportunity (JRO) have filed registration statements with the Securities and Exchange Commission ("SEC") through their ongoing shelf offerings, which became effective with the SEC during the fiscal year ended July 31, 2011, authorizing the Funds to issue an additional Common shares through an equity shelf offering. Under these equity shelf programs, the Funds, subject to market conditions, may raise additional equity capital from time to time in varying amounts and offering methods at a net price at or above each Fund's net asset value (NAV) per

Common share.

	come (NSL)	Floating Rate	Income (JFR)	•	ate Income nity (JRO)
Year Ended 7/31/12	Year Ended 7/31/11	Year Ended 7/31/12	Year Ended 7/31/11	Year Ended 7/31/12	Year Ended 7/31/11
Authorized shares 2,900,000	2,900,000	4,700,000	4,700,000	2,800,000	2,800,000
Common shares issued 759.751	2,140,249	54,809	796,632	731,647	2,068,353
Offering proceeds, net of offering costs \$ 5,291,150	\$ 15,529,453	\$ 648.718	\$ 9,821,151	\$ 8,615,279	\$ 25,205,303
00010 \$ 0,201,100	φ 10,020,100	Nuveen Inves 64	, , ,	φ 0,010,270	¥ 20,200,000

Costs incurred by the Funds in connection with their initial shelf offerings are recorded as a deferred charge which are amortized over the period such additional Common shares are sold not to exceed the one-year life of the shelf offering period. Shelf offering costs, and any additional costs the Funds may incur in connection with these shelf offerings, are expensed as incurred.

Repurchase Agreements

In connection with transactions in repurchase agreements, it is each Fund's policy that its custodian take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction, including accrued interest, at all times. If the counterparty defaults, and the fair value of the collateral declines, realization of the collateral may be delayed or limited.

Zero Coupon Securities

Each Fund is authorized to invest in zero coupon securities. A zero coupon security does not pay a regular interest coupon to its holders during the life of the security. Income to the holder of the security comes from accretion of the difference between the original purchase price of the security at issuance and the par value of the security at maturity and is effectively paid at maturity. The market prices of zero coupon securities generally are more volatile than the market prices of securities that pay interest periodically.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by net credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments. Credits for cash balances may be offset by charges for any days on which a Fund overdraws its account at the custodian bank.

Indemnifications

Under the Funds' organizational documents, their officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

2. Fair Value Measurements

Fair value is defined as the price that the Funds would receive upon selling an investment or transferring a liability in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment. A three-tier hierarchy is used to maximize the use of observable market data and minimize

the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs reflect the reporting entity. Unobservable inputs are based on the reporting entity. Unobservable inputs are based on the baset or liability. Unobservable inputs are based on the best information available in the circumstances. The following is a summary of the three-tiered hierarchy of valuation input levels.

Level 1 Inputs are unadjusted and prices are determined using quoted prices in active markets for identical securities.

Level 2 Prices are determined using other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 Prices are determined using significant unobservable inputs (including management's assumptions in determining the fair value of investments).

The inputs or methodologies used for valuing securities are not an indication of the risks associated with investing in those securities. The following is a summary of each Fund's fair value measurements as of the end of the reporting period:

Senior Income (NSL)	Level 1	Level 2	Level 3	Total

The Nuveen funds' Board of Directors/Trustees is responsible for the valuation process and has delegated the oversight of the daily valuation process to the Adviser's Valuation Committee. The Valuation Committee, pursuant to the valuation policies and procedures adopted by the Board of Directors/Trustees, is responsible for making fair value determinations, evaluating the effectiveness of the funds' pricing policies, and reporting to the Board of Directors/Trustees. The Valuation Committee is aided in its efforts by the Adviser's dedicated Securities Valuation Team, which is responsible for administering the daily valuation process and applying fair value methodologies as approved by the Valuation Committee. When determining the reliability of independent pricing services for investments owned by the funds, the Valuation Committee, among other things, conducts due diligence reviews of the pricing services and monitors the quality of security prices received through various testing reports conducted by the Securities Valuation Team.

The Valuation Committee will consider pricing methodologies it deems relevant and appropriate when making fair value determinations. Examples of possible methodologies include, but are not limited to, multiple of earnings; discount from market of a similar freely traded security; discounted cash-flow analysis; book value or a multiple thereof; risk premium/yield analysis; yield to maturity; and/or fundamental investment analysis. The Valuation Committee will also consider factors it deems relevant and appropriate in light of the facts and circumstances. Examples of possible factors include, but are not limited to, the type of security; the issuer's financial statements; the purchase price of the security; the discount from market value of unrestricted securities of the same class at the time of purchase; analysts' research and observations from financial institutions; information regarding any transactions or offers with respect to the security; the existence of merger proposals or tender offers affecting the security; the price and extent of public trading in similar securities of the issuer or comparable companies; and the existence of a shelf registration for restricted securities.

For each portfolio security that has been fair valued pursuant to the policies adopted by the Board of Directors/Trustees, the fair value price is compared against the last available and next available market quotations. The Valuation Committee reviews the results of such testing and fair valuation occurrences are reported to the Board of Directors/Trustees.

3. Derivative Instruments and Hedging Activities

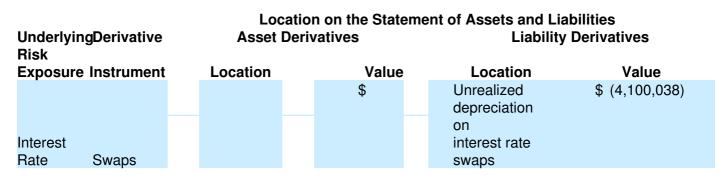

The Funds record derivative instruments at fair value, with changes in fair value recognized on the Statement of Operations, when applicable. Even though the Funds' investments in derivatives may represent economic hedges, they are not considered to be hedge transactions for financial reporting purposes. For additional information on the derivative instruments in which the Funds were invested during and at the end of the reporting period, refer to the Portfolios of Investments, Financial Statements and Footnote 1 General Information and Significant Accounting Policies.

The following tables present the fair value of all derivative instruments held by the Funds as of July 31, 2012, the location of these instruments on the Statement of Assets and Liabilities, and the primary underlying risk exposure.

Senior Income (NSL)

4. Fund Shares

Common Shares

During the fiscal year ended July 31, 2012, Short Duration Credit Opportunities' (JSD) Board of Trustees approved the Fund's participation in a share repurchase program, under which the Fund may repurchase up to 10% of its outstanding common shares.

Transactions in Common shares were as follows:

Senior Inc	come (NSL)		ng Rate le (JFR)		ng Rate ortunity (JRO)		Duration Cr tunities (JS For the p 5/25/1

N/A Short Duration Credit Opportunities (JSD) was not authorized to repurchase its outstanding common shares during the period May 25, 2011 (commencement of operations) through July 31, 2011.

5. Investment Transactions

Purchases and sales (including maturities but excluding short-term investments and derivative transactions) during the fiscal year ended July 31, 2012, were as follows:

	Senior Income (NSL)	Floating Rate Income (JFR)	Floating Rate Income Opportunity (JRO)	Short Duration Credit Opportunities (JSD)
Purchases	\$ 220,804,418	\$ 470,180,374	\$ 438,407,764	\$ 219,724,560
Sales and maturities	181,697,601	421,998,639	388,887,590	142,201,400

6. Income Tax Information

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to the treatment of paydown gains and losses, timing differences in recognizing certain gains and losses on investment transactions and, for Floating Rate Income (JFR), Floating Rate Income Opportunity (JRO) and Short Duration Credit Opportunities (JSD), recognition of premium amortization. To the extent that differences arise that are permanent in nature, such amounts are reclassified within the capital accounts as detailed below. Temporary differences do not require reclassification. Temporary and permanent differences do not impact the net asset values of the Funds.

At July 31, 2012, the cost and unrealized appreciation (depreciation) of investments (excluding investments in derivatives), as determined on a federal income tax basis, were as follows:

	Senior Income (NSL)	Floating Rate Income (JFR)	Floating Rate Income Opportunity (JRO)	Short Duration Credit Opportunities (JSD)
Cost of				
investments	\$ 346,684,129	\$840,183,554	\$ 543,809,659	\$ 276,692,807
Gross unrealized:				
Appreciation	\$ 8,037,998	\$ 19,405,488	\$ 13,919,180	\$ 7,365,922
Depreciation	(17,628,927)	(34,441,329)	(21,750,920)	(2,706,401)
Net unrealized appreciation (depreciation) of investments	\$ (9,590,929)	\$ (15,035,841)	\$ (7,831,740)	\$ 4,659,521
Investments	φ (3,330,323)	φ (15,055,041)	φ (7,031,740)	φ 4,009,021

Permanent differences, primarily due to federal taxes paid, paydowns, bond premium adjustments and treatment of notional principal contracts, resulted in reclassifications among the Funds' components of Common share net assets at July 31, 2012, the Funds' tax year end, as follows:

	Senior Income (NSL)	Floating Rate Income (JFR)	Floating Rate Income Opportunity (JRO)	Short Duration Credit Opportunities (JSD)
Paid-in-surplus	\$ (9,026)	\$ (33,571)	\$ (24,634)	\$
Undistributed (Over-distribution of) net investment				
income	(1,106,923)	(5,573,406)	(4,824,086)	(605,747)
Accumulated net realized gain (loss)	1,115,949	5,606,977	4,848,720	605,747

The tax components of undistributed net ordinary income and net long-term capital gains at July 31, 2012, the Funds' tax year end, were as follows:

Senior Income (NSL)	Floating Rate Income (JFR)	Floating Rate Income Opportunity (JRO)	Short Duration Credit Opportunities (JSD)
\$ 2,063,354	\$ 7,250,492	\$ 5,279,429	\$ 1,689,034
	Income	Senior Rate Income Income (NSL) (JFR)	Floating Rate Senior Rate Income Income Income Opportunity (NSL) (JFR) (JRO)

Undistributed net long-term capital gains

* Net ordinary income consists of net taxable income derived from dividends, interest, and net short-term capital gains, if any. Undistributed net ordinary income (on a tax basis) has not been reduced for the dividend declared on July 1, 2012, paid on August 1, 2012.

The tax character of distributions paid during the Funds' tax years ended July 31, 2012 and July 31, 2011, was designated for purposes of the dividends paid deduction as follows:

2012	Senior Income (NSL)	Floating Rate Income (JFR)	Floating Rate Income Opportunity (JRO)	Short Duration Credit Opportunities (JSD)
Distributions from net ordinary income				
* Distributions from net long-term capital gains	\$ 17,152,683	\$ 45,574,781	\$ 30,481,222	\$ 13,918,877
gano		Nuveen Investments 70		

2011	Senior Income (NSL)	Floating Rate Income (JFR)	Floating Rate Income Opportunity (JRO)	Short Duration Credit Opportunities (JSD)**
Distributions from net ordinary income *	\$ 15,063,956	\$ 32,126,213	\$ 22,894,559	\$
Distributions from net long-term capital gains				

* Net ordinary income consists of net taxable income derived from dividends, interest, and net short-term capital gains, if any.

** For the period May 25, 2011 (commencement of operations) through July 31, 2011.

At July 31, 2012, the Funds' tax year end, the following Funds had unused capital loss carryforwards available for federal income tax purposes to be applied against future capital gains, if any. If not applied, the carryforwards will expire as follows:

	Senior Income (NSL)	Floating Rate Income (JFR)	Floating Rate Income Opportunity (JRO)
Expiration:			
July 31, 2015	\$ 215,819	\$ 2,471,002	\$
July 31, 2016		183,234	
July 31, 2017	8,900,332	21,620,554	11,204,604
July 31, 2018	29,264,459	67,020,214	46,332,843
Total	\$ 38,380,610	\$ 91,295,004	\$ 57,537,447

During the tax year ended July 31, 2012, the Funds utilized capital loss carryforwards as follows:

	Senior Income (NSL)	Floating Rate Income (JFR)	Floating Rate Income Opportunity (JRO)
Utilized capital loss			
carryforwards	\$ 786,251	\$ 2,592,900	\$ 1,664,573

On December 22, 2010, the Regulated Investment Company Modernization Act of 2010 (the "Act") was enacted, which changed various technical rules governing the tax treatment of RICs. The changes are generally effective for taxable years beginning after the date of enactment. One of the more prominent changes addresses capital loss carryforwards. Under the Act, each Fund will be permitted to carry forward capital losses incurred in taxable years beginning after the date of enactment for an unlimited period. However, any losses incurred during those future taxable years will be required to be utilized prior to the

losses incurred in pre-enactment taxable years, which carry an expiration date. As a result of this ordering rule, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital loss carryforwards will retain their character as either short-term or long-term capital losses rather than being considered all short-term as permitted under previous regulation.

The Act also contains several provisions aimed at preserving the character of distributions made by a fiscal year RIC during the portion of its taxable year ending after October 31 or December 31, reducing the circumstances under which a RIC might be required to file amended Forms 1099 to restate previously reported distributions.

During the Funds' tax year ended July 31, 2012, there were no post-enactment capital losses generated by any of the Funds.

The Funds have elected to defer losses incurred from November 1, 2011 through July 31, 2012, the Funds' tax year end, in accordance with federal income tax rules. These losses are treated as having arisen on the first day of the following fiscal year. The following Fund has elected to defer losses as follows:

	Short Duration Credit Opportunities (JSD)
Post-October capital losses	\$ 133,681

Late-year ordinary losses

7. Management Fees and Other Transactions with Affiliates

Each Fund's management fee consists of two components a fund level fee, based only on the amount of assets within the Fund, and a complex-level fee, based on the aggregate amount of all eligible fund assets managed by the Adviser. This pricing structure enables Fund shareholders to benefit from growth in the assets within their respective Fund as well as from growth in the amount of complex-wide assets managed by the Adviser.

The annual fund-level fee for each Fund, payable monthly, is calculated according to the following schedule:

Average Daily Managed Assets*	Senior Income (NSL) Fund-Level Fee Rate
For the first \$1 billion	.6500%
For the next \$1 billion	.6375
For the next \$3 billion	.6250
For the next \$5 billion	.6000
For Managed Assets over \$10 billion	.5750

Average Daily Managed Assets*	Floating Rate Income (JFR) Floating Rate Income Opportunity (JRO) Fund-Level Fee Rate	Short Duration Credit Opportunities (JSD) Fund-Level Fee Rate
For the first \$500		
million	.6500%	.6500%
For the next \$500		
million	.6250	.6375
For the next \$500		
million	.6000	.6250
For the next \$500		
million	.5750	.6125
For Managed Assets over \$2		
billion	.5500	.6000

The annual complex-level fee for each Fund, payable monthly, is calculated according to the following schedule:

Complex-Level Managed Asset Breakpoint Level*	Effective Rate at Breakpoint Level
\$55 billion	.2000%
\$56 billion	.1996
\$57 billion	.1989
\$60 billion	.1961
\$63 billion	.1931
\$66 billion	.1900
\$71 billion	.1851
\$76 billion	.1806
\$80 billion	.1773
\$91 billion	.1691
\$125 billion	.1599
\$200 billion	.1505
\$250 billion	.1469
\$300 billion	.1445

* For the fund-level and complex-level fees, managed assets include closed-end fund assets managed by the Adviser that are attributable to financial leverage. For these purposes, financial leverage includes the funds' use of preferred stock and borrowings and certain investments in the residual interest certificates (also called inverse floating rate securities) in tender option bond (TOB) trusts, including the portion of assets held by a TOB trust that has been effectively financed by the trust's issuance of floating rate securities, subject to an agreement by the Adviser as to certain funds to limit the amount of such assets for determining managed assets in certain circumstances. The complex-level fee is calculated based upon the aggregate daily managed assets of all Nuveen Funds that constitute "eligible assets." Eligible assets do not include assets attributable to investments in other Nuveen Funds and assets in excess of \$2 billion added to the Nuveen Fund complex in connection with the Adviser's assumption of the management of the former First American Funds effective January 1, 2011. As of July 31, 2012, the complex-level fee rate for these Funds was .1709%.

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Adviser is responsible for each Fund's overall investment strategy and asset allocation decisions. The Adviser has entered into sub-advisory agreements with Symphony under which Symphony manages the investment portfolios of the Funds. The Adviser is responsible for overseeing the Funds' investments in interest rate and credit default swap contracts. Symphony is compensated for its services to the Funds from the management fees paid to the Adviser.

The Funds pay no compensation directly to those of its trustees who are affiliated with the Adviser or to its officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Trustees has adopted a deferred compensation plan for independent trustees that enables trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen-advised funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen-advised funds.

For the first eight years of Floating Rate Income's (JFR) operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily managed assets, for fees and expenses in the amounts and for the time periods set forth below:

Year Ending March 31,		Year Eı March	•
2004*	.32%	2009	.32%
2005	.32	2010	.24
2006	.32	2011	.16
2007	.32	2012	.08
2008	.32		

* From the commencement of operations.

The Adviser has not agreed to reimburse Floating Rate Income (JFR) for any portion of its fees and expenses beyond March 31, 2012.

For the first eight years of Floating Rate Income Opportunity's (JRO) operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily managed assets, for fees and expenses in the amounts and for the time periods set forth below:

Year Ending July 31,		Year Eı July	•
2004*	.30%	2009	.30%
2005	.30	2010	.22
2006	.30	2011	.14
2007	.30	2012	.07
2008	.30		

* From the commencement of operations.

The Adviser has not agreed to reimburse Floating Rate Income Opportunity (JRO) for any portion of its fees and expenses beyond July 31, 2012.

During the fiscal year ended July 31, 2012, Nuveen Securities, LLC, the Funds' distributor and a wholly-owned subsidiary of Nuveen, received commissions of \$10,690, 1,311 and \$17,405, related to the sale of Common shares from the shelf offerings of Senior Income (NSL), Floating Rate Income (JFR) and Floating Rate Income Opportunity (JRO), respectively.

8. Senior Loan Commitments

Unfunded Commitments

Pursuant to the terms of certain of the variable rate senior loan agreements, the Funds may have unfunded senior loan commitments. Each Fund will maintain with the custodian, cash, liquid securities and/or liquid senior loans having an aggregate value at least equal to the amount of unfunded senior loan commitments. At July 31, 2012, Senior Income (NSL), Floating Rate Income (JFR) and Floating Rate Income Opportunity (JRO) had unfunded senior loan commitments of \$2,075,000, \$3,400,000 and \$1,825,000, respectively. Short Duration Credit Opportunities (JSD) had no unfunded senior loan commitments as of July 31, 2012.

Participation Commitments

With respect to the senior loans held in each Fund's portfolio, the Funds may: 1) invest in assignments; 2) act as a participant in primary lending syndicates; or 3) invest in participations. If a Fund purchases a participation of a senior loan interest, the Fund would typically enter into a contractual agreement with the lender or other third party selling the participation, rather than directly with the borrower. As such, the Fund not only assumes the credit risk of the borrower, but also that of the selling participant or other persons interpositioned between the Fund and the borrower. At July 31, 2012, there were no such outstanding participation commitments in any of the Funds.

9. Borrowing Arrangements

The following Funds have entered into a credit agreement ("Borrowings") with an affiliate of Citibank N.A. as a means of financial leverage. Each Fund's maximum commitment amount under its Borrowings is as follows:

	Senior Income (NSL)	Floating Rate Income (JFR)	Floating Rate Income Opportunity (JRO)
Maximum commitment amount	\$ 109,000,000	\$ 270,000,000	\$ 173,000,000

As of July 31, 2012, each Fund's outstanding balance on its Borrowings was as follows:

	Senior Income (NSL)	Floating Rate Income (JFR)	Floating Rate Income Opportunity (JRO)	
Outstanding balance on Borrowings	\$ 100,000,000	\$ 249,200,000	\$ 159,900,000	

On May 8, 2012, each Fund amended its Borrowings with Citibank N.A. For the period August 1, 2011 through May 7, 2012, each Fund's maximum commitment amount was as follows:

	Senior Income (NSL)	Floating Rate Income (JFR)	Floating Rate Income Opportunity (JRO)
Maximum			
commitment amount	\$ 75,500,000	\$ 209,500,000	\$ 120,000,000

During the fiscal year ended July 31, 2012, the average daily balance outstanding and average annual interest rate on each Fund's Borrowings were as follows:

	Senior Income (NSL)	Floating Rate Income (JFR)	Floating Rate Income Opportunity (JRO)
Average daily			
balance outstanding	\$ 80,869,672	\$ 215,257,760	\$ 128,720,164
-	1.16%	1.17%	1.16%

Average annual interest rate

During the period August 1, 2011 through May 7, 2012, interest incurred on these Borrowings was based on a commercial paper rate on the amount borrowed. In addition to the interest expense, each Fund paid a .60% per annum program fee, based on the average daily outstanding balance and a .25% per annum liquidity fee, based on the maximum commitment amount of the Borrowings through the renewal date.

Effective May 8, 2012, interest charged on these Borrowings is based on a .75% per annum drawn fee on the amount borrowed and .15% per annum on the undrawn balance of the maximum commitment amount. Each Fund also incurred a one-time .15% amendment fee on the increase to its maximum commitment amount, which will be fully expensed during the fiscal year ended July 31, 2013.

On August 12, 2011, Short Duration Credit Opportunities (JSD) entered into a credit agreement ("Borrowings") with Bank of America, N.A. ("Bank of America") as a means of financial leverage. The Fund's maximum commitment amount under its Borrowings is as follows:

	Short		
	Duration		
	Credit		
	Opportunities		
	(JSD)		
Maximum commitment amount	\$ 85,000,000		

As of July 31, 2012, the Fund's outstanding balance on its Borrowings was as follows:

	Short Duration	
	Credit	
	Opportunities (JSD)	
Outstanding balance on Borrowings	\$ 85,000,000	

On August 17, 2011, the Fund amended its Borrowings with Bank of America. For the period August 1, 2011 through August 16, 2011, the Fund's maximum commitment amount was as follows:

	Short		
	Duration		
	Credit		
	Opportunities		
	(JSD)		
Maximum commitment amount	\$ 75,000,000		

During the fiscal year ended July 31, 2012, the average daily balance outstanding and average annual interest rate on the Fund's Borrowings were as follows:

	Short Duration Credit Opportunities (JSD)		
Average daily balance outstanding	\$	69,781,421	
Average annual interest rate
