**Basis of Presentation**

The accompanying consolidated interim financial statements include the accounts of the Company and its subsidiaries. All significant inter-company accounts and transactions have been eliminated in consolidation. In the opinion of management, these consolidated financial statements reflect all adjustments which are of a normal recurring nature and which are necessary to present fairly the Company's consolidated financial position as of March 31, 2014 and September 30, 2013, and its consolidated results of operations for the three and six months ended March 31, 2014 and 2013 and consolidated cash flows for the six months ended March 31, 2014 and 2013.

Certain amounts for prior fiscal periods have been reclassified to conform to the current fiscal period's presentation.

All references in these notes to management are to the management of Sally Beauty.

**2. Significant Accounting Policies**

## Edgar Filing: Sally Beauty Holdings, Inc. - Form 10-Q

The consolidated interim financial statements included herein are unaudited and have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission ( SEC ). Certain information and note disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States ( GAAP ) have been condensed or omitted pursuant to those rules and regulations, although the Company believes that the disclosures made are adequate to make the information not misleading. These consolidated interim financial statements should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2013. The Company adheres to the same accounting policies in the preparation of its interim financial statements. As permitted under GAAP, interim accounting for certain expenses, including income taxes, is based on full year assumptions. Such amounts are expensed in full in the year incurred. For interim financial reporting purposes, income taxes are recorded based upon estimated annual effective income tax rates.

The results of operations for these interim periods are not necessarily indicative of the results that may be expected for any future interim period or the entire fiscal year.

### 3. Recent Accounting Pronouncements and Accounting Changes

The Company made no accounting changes during the six months ended March 31, 2014.

### 4. Fair Value Measurements

The Company's financial instruments consist of cash equivalents, trade and other accounts receivable, accounts payable, foreign currency derivative instruments and debt. The carrying amounts of cash equivalents, trade and other accounts receivable and accounts payable approximate their respective fair values due to the short-term nature of these financial instruments.

The Company measures on a recurring basis and discloses the fair value of its financial instruments under the provisions of ASC Topic 820, *Fair Value Measurement*, as amended ( ASC 820 ). The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability (i.e., the exit price) in an orderly transaction between market participants at the measurement date. ASC 820 establishes a three-level hierarchy for measuring fair value and requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. This valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability on the measurement date. The three levels of that hierarchy are defined as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;

Edgar Filing: Sally Beauty Holdings, Inc. - Form 10-Q

Condensed Notes to Consolidated Financial Statements

(Unaudited)

Level 2 - Unadjusted quoted prices in active markets for similar assets or liabilities; or unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active; or inputs other than quoted prices that are observable for the asset or liability; or inputs that are derived principally from or corroborated by observable market data; and

Level 3 - Unobservable inputs for the asset or liability.

Consistent with this hierarchy, the Company categorized certain of its financial assets and liabilities as follows at March 31, 2014 and September 30, 2013 (in thousands):

	As of March 31, 2014			
	Total	Level 1	Level 2	Level 3

Total liabilities	\$ 1,753,858	\$ 1,671,500	\$ 82,358	

(a) Cash equivalents, at March 31, 2014, consist of highly liquid investments which have no maturity and are valued using unadjusted quoted market prices for such securities. The Company may from time to time invest in securities with maturities of three months or less

## Edgar Filing: Sally Beauty Holdings, Inc. - Form 10-Q

(consisting primarily of investment-grade corporate or government bonds), with the primary investment objective of minimizing the potential risk of loss of principal.

(b) Foreign exchange contracts (including foreign currency forwards and options) are valued for purposes of this disclosure using widely accepted valuation techniques, such as discounted cash flow analyses, and reasonable estimates, such as market foreign currency exchange rates. Please see Note 11 for more information about the Company's foreign exchange contracts.

(c) Long-term debt (including current maturities and borrowings under the ABL facility, if any) is carried in the Company's consolidated financial statements at amortized cost of \$1,813.5 million at March 31, 2014 and \$1,690.7 million at September 30, 2013. The Company's senior notes are valued for purposes of this disclosure using unadjusted quoted market prices for such debt securities. Other long-term debt (consisting primarily of borrowings under the ABL facility, if any, and capital lease obligations), is generally valued for purposes of this disclosure using widely accepted valuation techniques, such as discounted cash flow analyses, and observable inputs such as market interest rates. ### 5. Accumulated Stockholders' Equity (Deficit)

In August 2012, the Company announced that its Board of Directors approved a share repurchase program authorizing the Company to repurchase up to \$300.0 million of its common stock (the 2012 Share Repurchase Program). In addition, in March 2013, the Company announced that its Board of Directors approved a new share repurchase program authorizing the Company to repurchase up to \$700.0 million of its common stock over the eight quarters commencing on such date (the 2013 Share Repurchase Program). #### Condensed Notes to Consolidated Financial Statements

(Unaudited)

During the six months ended March 31, 2014, the Company repurchased and subsequently retired approximately 4.5 million shares of its common stock under the 2013 Share Repurchase Program at an aggregate cost of \$125.6 million and, during the six months ended March 31, 2013, the Company repurchased and subsequently retired approximately 12.0 million shares of its common stock under the 2013 Share Repurchase Program or the 2012 Share Repurchase Program at an aggregate cost of \$313.3 million. The Company reduced common stock and additional paid-in capital, in the aggregate, by these amounts.

At March 31, 2014 and September 30, 2013, accumulated other comprehensive loss consists of cumulative foreign currency translation adjustments of \$10.0 million and \$9.8 million, respectively, and is net of income taxes of \$2.9 million at each date. Comprehensive income reflects changes in accumulated stockholders' equity (deficit) from sources other than transactions with stockholders and, as such, includes net earnings and certain other specified components. Currently, the Company's only component of comprehensive income, other than net earnings, is foreign currency translation adjustments, net of income tax.

## 6. Earnings Per Share

Basic earnings per share, is calculated by dividing net earnings by the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share is calculated similarly but includes the potential dilution from the exercise of all outstanding stock options and stock awards, except when the effect would be anti-dilutive.

The following table sets forth the computations of basic and diluted earnings per share (in thousands, except per share data):

At March 31, 2014 and 2013, options to purchase 1,460,803 shares and 1,577,766 shares, respectively, of the Company's common stock were outstanding but not included in the computation of diluted earnings per share, since these options were anti-dilutive. Anti-dilutive options are: (a) out-of-the-money options (options the exercise price of which is greater than the average price per share of the Company's common stock during the period), and (b) in-the-money options (options the exercise price of which is less than the average price per share of the Company's common stock during the period) for which the sum of assumed proceeds, including any unrecognized compensation expense related to such options, exceeds the average price per share for the period.

### 7. Share-Based Payments

The Company measures the cost of services received from employees, directors and consultants in exchange for an award of equity instruments based on the fair value of the award on the date of grant, and recognizes compensation expense on a straight-line basis over the vesting period or over the period ending on the date a participant becomes eligible for retirement, if earlier.

The Company granted approximately 1.5 million and 1.6 million stock options and approximately 36,000 and 128,000 restricted share awards to its employees and consultants during the six months ended March 31, 2014 and 2013, respectively. Upon issuance of such grants, the Company recognized accelerated share-based compensation expense of \$5.3 million and \$5.9 million in the six months ended March 31, 2014 and 2013, respectively, in connection with certain retirement eligible employees who are eligible to continue vesting awards upon retirement under the provisions of the Sally Beauty Holdings, Inc. 2010 Omnibus Incentive Plan (the 2010 Plan) and certain predecessor share-based compensation plans such as the Sally Beauty Holdings, Inc. 2007 Omnibus Incentive Plan (the 2007 Plan). In addition, the Company granted approximately 27,000 and 34,000 restricted stock units to its non-employee directors during the six months ended March 31, 2014 and 2013, respectively.

**Stock Option Awards**

Each option has an exercise price equal to the closing market price of the Company's common stock on the date of grant and generally has a maximum term of 10 years. Options generally vest ratably over a four year period and are generally subject to forfeiture until the vesting period is complete, subject to certain retirement provisions contained in the 2010 Plan and certain predecessor share-based compensation plans such as the 2007 Plan.

The following table presents a summary of the activity for the Company's stock option awards for the six months ended March 31, 2014:

The Company uses the Black-Scholes option pricing model to value the Company's stock options for each stock option award. Using this option pricing model, the fair value of each stock option award is estimated on the date of grant. The fair value of the Company's stock option awards is expensed on a straight-line basis over the vesting period (generally four years) of the stock options or to the date a participant becomes eligible for retirement, if earlier.

The weighted average assumptions relating to the valuation of the Company's stock options are as follows:

	Six Months Ended March 31,	
	2014	2013
Expected life (in years)	5.0	5.0
Expected volatility for the Company's stock	48.4%	56.3%
Risk-free interest rate	1.3%	0.8%
Dividend yield	0.0%	0.0%

The expected life of options represents the period of time that the options granted are expected to be outstanding and is based on historical experience of employees of the Company who have been granted stock options. The risk-free interest rate is based on the zero-coupon U.S. Treasury notes with a comparable term as of the date of the grant. Since the Company does not currently expect to pay dividends, the dividend yield used is 0%.

The weighted average fair value of the stock options issued by the Company at the date of grant in the six months ended March 31, 2014 and 2013 was \$11.32 and \$11.29 per option, respectively. The total intrinsic value of options exercised during the six months ended March 31, 2014 was \$40.0 million. The cash proceeds from these option exercises were \$21.4 million and the tax benefit realized from these option exercises was \$14.7 million.

At March 31, 2014, approximately \$18.9 million of total unrecognized compensation costs related to unvested stock option awards are expected to be recognized over the weighted average period of 2.5 years.

**Stock Awards**

***Restricted Stock Awards***

The Company from time to time grants restricted stock awards to employees and consultants under the 2010 Plan. A restricted stock award is an award of shares of the Company's common stock (which have full voting and dividend rights but are restricted with regard to sale or transfer) the restrictions over which lapse ratably over a specified period of time (generally five years). Restricted stock awards are independent of stock option grants and are generally subject to forfeiture if employment terminates prior to these restrictions lapsing, subject to certain retirement provisions of the 2010 Plan and certain predecessor share-based compensation plans such as the 2007 Plan.

## Edgar Filing: Sally Beauty Holdings, Inc. - Form 10-Q

The fair value of the Company's restricted stock awards is expensed on a straight-line basis over the period (generally five years) in which the restrictions on these stock awards lapse ( vesting ) or over the period ending on the date a participant becomes eligible for retirement, if earlier. For these purposes, the fair value of the restricted stock award is determined based on the closing market price of the Company's common stock on the date of grant.

The following table presents a summary of the activity for the Company's restricted stock awards for the six months ended March 31, 2014:

<b>Restricted Stock Awards</b>	<b>Number of Shares (in Thousands)</b>	<b>Weighted Average Fair Value Per Share</b>	<b>Weighted Average Remaining Vesting Term (in Years)</b>

Vested	(108)	12.95	
Forfeited	(22)	17.97	
Unvested at March 31, 2014	243	\$ 19.18	3.3

At March 31, 2014, approximately \$2.3 million of total unrecognized compensation costs related to unvested restricted stock awards are expected to be recognized over the weighted average period of 3.3 years.

### *Restricted Stock Units*

The Company currently grants Restricted Stock Unit ( RSU or RSUs ) awards, which generally vest within one year from the date of grant, pursuant to the 2010 Plan. To date, the Company has only granted RSU awards to its non-employee directors. RSUs represent an unsecured promise of the Company to issue shares of common stock of the Company. Unless forfeited prior to the vesting date, RSUs are converted into shares of the Company's common stock generally on the vesting date. An

independent director who receives an RSU award may elect, upon receipt of such award, to defer until a later date delivery of the shares of common stock of the Company that would otherwise be issued to such director on the vesting date. RSUs granted prior to fiscal year 2012, are generally retained by the Company as deferred stock units that are not distributed until six months after the independent director's service as a director terminates. RSUs are independent of stock option grants and are generally subject to forfeiture if service terminates prior to the vesting of the units. Participants have no voting rights with respect to unvested RSUs. Under the 2010 Plan, the Company may settle the vested deferred stock units with shares of the Company's common stock or in cash.

The Company expenses the cost of the RSUs, which is determined to be the fair value of the RSUs at the date of grant, on a straight-line basis over the vesting period (generally one year). For these purposes, the fair value of the RSU is determined based on the closing market price of the Company's common stock on the date of grant.

The following table presents a summary of the activity for the Company's RSUs for the six months ended March 31, 2014:

Restricted Stock Units	Number of Shares (in Thousands)	Weighted Average Fair Value Per Share	Weighted Average Remaining Vesting Term (in Years)

Forfeited			
Unvested at March 31, 2014	27	\$ 26.30	0.5

At March 31, 2014, approximately \$0.4 million of total unrecognized compensation costs related to unvested RSUs are expected to be recognized over the weighted average period of 0.5 years.

As previously disclosed, the Company is currently conducting a comprehensive investigation of the Data Security Incident with the assistance of its advisers. As of April 30, 2014, the scope of the potential liabilities relating to the Data Security Incident, or a range thereof, cannot be reasonably estimated. For the six months ended March 31, 2014, selling, general and administrative expenses reflect a charge of \$1.1 million, consisting primarily of professional advisory and legal costs incurred in connection with our investigation of the Data Security Incident.

outstanding letters of credit. The ABL facility includes a \$25.0 million Canadian sub-facility for our Canadian operations.

On July 26, 2013, the Company, Sally Holdings and other parties to the ABL facility entered into a second amendment to the ABL facility which, among other things, increased the maximum availability under the ABL facility to \$500.0 million (subject to borrowing base limitations), reduced pricing, relaxed the restrictions regarding the making of Restricted Payments, extended the maturity to July 26, 2018 and improved certain other covenant terms. At March 31, 2014, the Company had \$478.1 million available for borrowing under the ABL facility, including the Canadian sub-facility. Borrowings under the ABL facility are secured by the accounts, inventory and credit card receivables of our domestic subsidiaries and Canadian subsidiaries (in the case of borrowings under the Canadian sub-facility), together with general intangibles and certain other personal property of our domestic subsidiaries and Canadian subsidiaries (in the case of borrowings under the Canadian sub-facility) relating to the accounts and inventory, as well as deposit accounts of our domestic subsidiaries and Canadian subsidiaries (in the case of borrowings under the Canadian sub-facility) and, solely with respect to borrowings by SBH Finance B.V., intercompany notes owed to SBH Finance B.V. by our foreign subsidiaries. Such premium is being amortized over the term of the notes using the effective interest method. The net proceeds

from these debt issuances were used to retire outstanding indebtedness in the aggregate principal amount of approximately \$1,391.9 million and for general corporate purposes.

On October 29, 2013, the Issuers issued \$200.0 million aggregate principal amount of their 5.5% Senior Notes due 2023 (the senior notes due 2023). The Company used the net proceeds from this debt issuance, approximately \$196.3 million, to repay borrowings outstanding under the ABL facility of \$88.5 million and intends to use the remaining amount for general corporate purposes.

The senior notes due 2019, the senior notes due 2022 and the senior notes due 2023, which we refer to collectively as the Notes or the senior notes due 2019, 2022 and 2023, are unsecured obligations of the Issuers and are jointly and severally guaranteed by the Company and Sally Investment, and by each material domestic subsidiary of the Company. The ABL facility does not contain any restriction against the incurrence of unsecured indebtedness. However, the ABL facility restricts the incurrence of secured indebtedness if, after giving effect to the incurrence of such secured indebtedness, the Company's Secured Leverage Ratio exceeds 4.0 to 1.0. At March 31, 2014, the Company's Secured Leverage Ratio was less than 0.1 to 1.0. Secured Leverage Ratio is defined as the ratio of (i) Secured Funded Indebtedness (as defined in the ABL facility) to (ii) Consolidated EBITDA, as defined in the ABL facility.

The ABL facility is pre-payable and the commitments thereunder may be terminated, in whole or in part, at any time without penalty or premium.

The indentures governing the senior notes due 2019, 2022 and 2023 contain terms which restrict the ability of Sally Beauty's subsidiaries to incur additional indebtedness. However, in addition to certain other material exceptions, the Company may incur additional indebtedness under the indentures if its Consolidated Coverage Ratio, after giving pro forma effect to the incurrence of such indebtedness, exceeds 2.0 to 1.0 (Incurrence Test). At March 31, 2014, the Company's Consolidated Coverage Ratio was approximately 5.8 to 1.0. Consolidated Coverage Ratio is defined as the ratio of (i) Consolidated EBITDA, as defined in the indentures, for the period containing the most recent four consecutive fiscal quarters, to (ii) Consolidated Interest Expense, as defined in the indentures, for such period.

The indentures governing the senior notes due 2019, 2022 and 2023 restrict Sally Holdings and its subsidiaries from making certain dividends and distributions to equity holders and certain other restricted payments (hereafter, a Restricted Payment or Restricted Payments) to us. However, the indentures permit the making of such Restricted Payments if, at the time of the making of such Restricted Payment, the Company satisfies the Incurrence Test as described above and the cumulative amount of all Restricted Payments made since the issue date of the applicable senior notes does not exceed the sum of: (i) 50% of Sally Holdings and its subsidiaries' cumulative consolidated net earnings since July 1, 2006, plus (ii) the proceeds from the issuance of certain equity securities or conversions of indebtedness to equity, in each case, since the issue date of the applicable senior notes plus (iii) the net reduction in investments in unrestricted subsidiaries since the issue date of the applicable senior notes plus (iv) the return of capital with respect to any sales or dispositions of certain minority investments since the issue date of the applicable senior notes. Further, in addition to certain other baskets, the indentures permit the Company to make additional Restricted Payments in an unlimited amount if, after giving pro forma effect to the incurrence of any indebtedness to make such Restricted Payment, the Company's Consolidated Total Leverage Ratio (as defined in the indentures) is less than 3.25 to 1.00. At March 31, 2014, the Company's Consolidated Total Leverage Ratio was approximately 2.8 to 1.0. Consolidated Total Leverage Ratio is defined as the ratio of (i) Consolidated Total Indebtedness, as defined in the indentures, minus cash and cash equivalents on-hand up to \$100.0 million, in each case, as of the end of the most recently-ended fiscal quarter to (ii) Consolidated EBITDA, as defined in the indentures, for the period containing the most recent four consecutive fiscal quarters.

The ABL facility also restricts the making of Restricted Payments. More specifically, under the ABL facility, Sally Holdings may make Restricted Payments if availability under the ABL facility equals or exceeds certain thresholds, and no default then exists under the facility. For Restricted Payments up to \$30.0 million during each fiscal year, borrowing availability must equal or exceed the lesser of \$75.0 million or 15% of the borrowing base for 45 days prior to such Restricted Payment. For Restricted Payments in excess of that amount, borrowing availability must equal or exceed the lesser of \$100.0 million or 20% of the borrowing base for 45 days prior to such Restricted Payment and the Consolidated Fixed Charge Coverage Ratio (as defined below) must equal or exceed 1.1 to 1.0. Further, if borrowing availability equals or exceeds the lesser of \$150.0 million or 30% of the borrowing base, Restricted Payments are not limited by the Consolidated Fixed Charge

## Edgar Filing: Sally Beauty Holdings, Inc. - Form 10-Q

Coverage Ratio test. The Consolidated Fixed Charge Coverage Ratio is defined as the ratio of (i) Consolidated EBITDA (as defined in the ABL facility) during the trailing twelve-month period preceding such proposed Restricted Payment *minus* certain unfinanced capital expenditures made during such period and income tax payments paid in cash during such period *to* (ii) fixed charges (as defined in the ABL facility). In addition, during any period that borrowing availability under the ABL facility is less than the greater of \$40.0 million or 10% of the borrowing base, the level of the Consolidated Fixed Charge Coverage Ratio that the Company must satisfy is 1.0 *to* 1.0. As of March 31, 2014, the Consolidated Fixed Charge Coverage Ratio was approximately 4.0 *to* 1.0.

When used in this Quarterly Report, the phrase Consolidated EBITDA is intended to have the meaning ascribed to such phrase in the ABL facility or the indentures governing the senior notes due 2019, 2022 and 2023, as appropriate. EBITDA is not a recognized measurement under GAAP and should not be considered a substitute for financial performance and liquidity measures determined in accordance with GAAP, such as net earnings, operating earnings and operating cash flows.

The ABL facility and the indentures governing the senior notes due 2019, 2022 and 2023 contain other covenants regarding restrictions on the disposition of assets, the granting of liens and security interests, the prepayment of certain indebtedness, and other matters and customary events of default, including customary cross-default and/or cross-acceleration provisions. As of March 31, 2014, all the net assets of our consolidated subsidiaries were unrestricted from transfer under our credit arrangements.

**11. Derivative Instruments and Hedging Activities**

**Risk Management Objectives of Using Derivative Instruments**

The Company is exposed to a wide variety of risks, including risks arising from changing economic conditions. The Company manages its exposure to certain economic risks (including liquidity, credit risk, and changes in foreign currency exchange rates and in interest rates) primarily: (a) by closely managing its cash flows from operating and investing activities and the amounts and sources of its debt obligations; (b) by assessing periodically the creditworthiness of its business partners; and (c) through the use of derivative instruments from time to time (including, foreign exchange contracts and interest rate swaps) by Sally Holdings.

The Company from time to time uses foreign exchange contracts (including foreign currency forwards and options), as part of its overall economic risk management strategy, to fix the amount of certain foreign assets and obligations relative to its functional and reporting currency (the U.S. dollar) or relative to the functional currency of certain of its consolidated subsidiaries, or to add stability to cash flows resulting from its net investments (including intercompany notes not permanently invested) and earnings denominated in foreign currencies. The Company's foreign currency exposures at times offset each other, sometimes providing a natural hedge against its foreign currency risk. In connection with the remaining foreign currency risk, the Company uses foreign exchange contracts to effectively fix the foreign currency exchange rate applicable to specific anticipated foreign currency-denominated cash flows, thus limiting the potential fluctuations in such cash flows as a result of foreign currency market movements.

The Company from time to time has used interest rate swaps, as part of its overall economic risk management strategy, to add stability to the interest payments due in connection with its debt obligations. At March 31, 2014, our exposure to interest rate fluctuations relates to interest payments under the ABL facility, if any, and the Company held no derivatives instruments in connection therewith.

As of March 31, 2014, the Company did not purchase or hold any derivative instruments for trading or speculative purposes.

**Designated Cash Flow Hedges**

The Company may use from time to time derivative instruments designated as hedges to manage its exposure to interest rate or foreign currency exchange rate movements, as appropriate. The Company did not purchase or hold any such derivatives at March 31, 2014.

### Non-designated Cash Flow Hedges

The Company may use from time to time derivative instruments (such as foreign exchange contracts and interest rate swaps) not designated as hedges or that do not meet the requirements for hedge accounting to manage its exposure to interest rate or foreign currency exchange rate movements, as appropriate.

The Company uses foreign exchange contracts including, at March 31, 2014, foreign currency options with an aggregate notional amount of \$6.0 million to manage the exposure to the U.S. dollar resulting from certain of our Sinelco Group subsidiaries' purchases of merchandise from third-party suppliers. Sinelco's functional currency is the Euro. These foreign currency options enable Sinelco to buy U.S. dollars at a contractual exchange rate of 1.32, are with a single counterparty and expire ratably through September 15, 2014.

The Company also uses foreign exchange contracts to mitigate its exposure to changes in foreign currency exchange rates in connection with certain intercompany balances not permanently invested. As such, at March 31, 2014, we held: (a) a foreign currency forward which enables us to sell approximately 19.7 million (\$27.1 million, at the March 31, 2014 exchange rate) at the contractual exchange rate of 1.3743, (b) a foreign currency forward which enables us to sell approximately \$3.8 million Canadian dollars (\$3.4 million, at the March 31, 2014 exchange rate) at the contractual exchange rate of 1.1060, (c) a foreign currency forward which enables us to buy approximately \$10.9 million Canadian dollars (\$9.9 million, at the March 31, 2014 exchange rate) at the contractual exchange rate of 1.1053, (d) a foreign currency forward which enables us to sell approximately 20.9 million Mexican pesos (\$1.6 million, at the March 31, 2014 exchange rate) at the contractual exchange rate of 13.0825 and (e) foreign currency forwards which enable us to sell approximately £7.4 million (\$12.4 million, at the March 31, 2014 exchange rate) at the weighted average contractual exchange rate of 1.6484. The foreign currency forwards discussed in this paragraph are with a single counterparty (not the same party as the counterparty on the options discussed in the preceding paragraph). Of the foreign exchange contracts discussed in this paragraph, foreign currency forwards with an aggregate notional amount of £2.0

million (\$3.4 million, at the March 31, 2014 exchange rate) expire ratably through September 10, 2014. The remaining foreign currency forwards discussed in this paragraph expire on or before June 30, 2014.

In addition, the Company uses foreign exchange contracts including, at March 31, 2014, foreign currency forwards with an aggregate notional amount of 1.8 million (\$2.5 million, at the March 31, 2014 exchange rate) to mitigate the exposure to the British pound sterling resulting from the sale of products and services among certain European subsidiaries of the Company. The foreign currency forwards discussed in this paragraph enable the Company to buy British pound sterling in exchange for Euro currency at the weighted average contractual exchange rate of 0.8431, are with a single counterparty (the same counterparty as that on the foreign currency forwards discussed in the immediately preceding paragraph) and expire ratably through September 30, 2014.

The Company's foreign exchange contracts are not designated as hedges and do not currently meet the requirements for hedge accounting. Accordingly, the changes in the fair value (i.e., marked-to-market adjustments) of these derivative instruments, which are adjusted quarterly, are recorded in selling, general and administrative expenses in our consolidated statements of earnings. Selling, general and administrative expenses reflect net losses of \$0.4 million and net gains of \$1.3 million for the three months ended March 31, 2014 and 2013, respectively, and, for the six months ended March 31, 2014 and 2013, net losses of \$1.3 million and net gains of \$0.3 million, respectively, including marked-to-market adjustments, in connection with all of the Company's foreign currency derivatives.

The table below presents the fair value of the Company's derivative financial instruments as well as their classification on the Company's consolidated balance sheet as of March 31, 2014 and September 30, 2013 (in thousands):

### Credit-risk-related Contingent Features

At March 31, 2014, the aggregate fair value of all foreign exchange contracts held which consisted of derivative instruments in a liability position was \$0.2 million. The Company was under no obligation to post and had not posted any collateral related to the agreements in a liability position.

The counterparties to all our derivative instruments are deemed by the Company to be of substantial resources and strong creditworthiness. However, these transactions result in exposure to credit risk in the event of default by a counterparty. The financial crisis that has affected the banking systems and financial markets in recent years resulted in many well-known financial institutions becoming less creditworthy or having diminished liquidity which could expose us to an increased level of counterparty credit risk. In the event that a counterparty defaults in its obligation under our derivative instruments, we could incur substantial financial losses. However, at the present time, no such losses are deemed probable.

### 12. Income Taxes

In January 2012, the IRS concluded the field work associated with their examination of the Company's consolidated federal income tax returns for the fiscal years ended September 30, 2007 and 2008 and issued their examination report. The Company is appealing certain disputed items and it does not anticipate the ultimate resolution of these items to have a material impact on the Company's financial statements.

## Edgar Filing: Sally Beauty Holdings, Inc. - Form 10-Q

The IRS is currently conducting an examination of the Company's consolidated federal income tax returns for the fiscal years ended September 30, 2009, 2010 and 2011. The IRS had previously audited the Company's consolidated federal income tax returns through the tax year ended September 30, 2006, thus our statute remains open from the year ended September 30, 2007 forward. Our foreign subsidiaries are impacted by various statutes of limitations, which are generally open from 2008 forward. Generally, states' statutes in the United States are open for tax reviews from 2007 forward.

The following consolidating financial information presents the condensed consolidating balance sheets as of March 31, 2014 and September 30, 2013, and the related condensed consolidating statements of earnings and condensed consolidating statements of comprehensive income for the three and six months ended March 31, 2014 and 2013, and condensed consolidating statements of cash flows for the six months ended March 31, 2014 and 2013 of: (i) Sally Beauty Holdings, Inc., or the Parent; (ii) Sally Holdings LLC and Sally Capital Inc., or the Issuers; (iii) the guarantor subsidiaries; (iv) the non-guarantor subsidiaries; (v) elimination entries necessary for consolidation purposes; and (vi) Sally Beauty on a consolidated basis.

Investments in subsidiaries are accounted for using the equity method for purposes of the consolidating presentation. The principal elimination entries relate to investments in subsidiaries and intercompany balances and transactions. Separate financial statements and other disclosures with respect to the subsidiary guarantors have not been provided as management believes the following information is sufficient, as guarantor subsidiaries are 100% indirectly owned by the Parent and all guarantees are full and unconditional. Additionally, the accounts, inventory, credit card receivables, deposit accounts, certain intercompany notes and certain other personal property of the guarantor subsidiaries relating to the inventory and accounts are pledged under the ABL facility and consequently may not be available to satisfy the claims of general creditors.
