**Main Street Announces Tax Treatment of 2015 Dividends**

**Announces Preliminary Estimate of Fourth Quarter 2015 Results**

**Announces Fourth Quarter and Full Year 2015 Earnings Release and Conference Call Schedule**

**HOUSTON - January 26, 2016** - Main Street Capital Corporation (NYSE: MAIN) ( Main Street ) today announced the tax treatment of its 2015 dividends, preliminary operating results for the fourth quarter of 2015 and its fourth quarter and full year 2015 earnings release and conference call schedule.

**Tax Treatment of 2015 Dividends**

Main Street has posted information regarding the U.S. federal income tax characteristics of its dividends that are attributable to 2015 (the 2015 Dividend Summary ) on its website ([http://ir.mainstcapital.com/dividend\\_reinvestment.cfm](http://ir.mainstcapital.com/dividend_reinvestment.cfm)). Main Street paid dividends totaling \$2.66 per share that are attributable to 2015, with approximately 8.7% of such dividends taxed as long-term capital gains, approximately 3.9% taxed as qualified dividends and approximately 87.4% taxed as ordinary income. Long-term capital gains and qualified dividends qualify for favorable tax treatment under the Internal Revenue Code ( IRC ) and, for 2015, will generally be subject to a maximum 20% U.S. federal income tax rate (plus a 3.8% Medicare surtax, if applicable).

**Tax Treatment of 2015 Dividends Non-U.S. Resident Shareholders**

Non-U.S. resident shareholders in a Regulated Investment Company ( RIC ) such as Main Street are exempt from U.S. withholding tax on both interest-related dividends and short-term capital

gains in accordance with the IRC sections 871(k) and 881(e). The recently enacted omnibus spending bill (which also increased the SBIC family of funds leverage limit to \$350 million) made this provision permanent as it had previously been subject to periodic legislative extension since 2005. The following percentages approximate the portion of Main Street's 2015 dividends that constitute interest-related dividends and short-term capital gains dividends for U.S. federal tax purposes. These percentages should be combined with the percentage of each dividend that is related to long-term capital gains to derive the total percentage of each dividend that is exempt from U.S. federal withholding taxes. See the 2015 Dividend Summary posted on Main Street's website for more details ([http://ir.mainstcapital.com/dividend\\_reinvestment.cfm](http://ir.mainstcapital.com/dividend_reinvestment.cfm)).

Dividend Payment Dates	% of Total Dividends Representing Interest-Related Dividends and Short-Term Capital Gain Dividends
From 2/13/2015 To 5/15/2015	69.3%
6/15/2015	71.5%
From 6/25/2015 To 1/15/2016	75.6%

To the extent non-U.S. resident shareholder taxes were withheld on dividends distributed, this information may be considered in connection with any claims for refund of taxes with the U.S. Internal Revenue Service. Non-U.S. resident shareholders should contact their tax advisor with any questions regarding this information.

#### **Preliminary Estimates of Fourth Quarter 2015 Results**

Main Street's preliminary estimate of fourth quarter 2015 distributable net investment income ( DNII ), which is net investment income before non-cash, share-based compensation expense, is \$0.59 to \$0.60 per share. (1) Main Street's preliminary estimate of net investment income is \$0.56 to \$0.57 per share. The preliminary estimate of DNII significantly exceeds the previously declared regular monthly dividends per share for the fourth quarter of 2015 of \$0.54 per share and is within the previously provided DNII guidance range for the fourth quarter of 2015 of between \$0.58 and \$0.61 per share.

Main Street's preliminary estimate of net asset value ( NAV ) per share as of December 31, 2015 is \$21.19 to \$21.29. After adjustment for the semi-annual supplemental dividend paid in December 2015 of \$0.275 per share, this represents a decrease of approximately \$0.23 to \$0.33 per share, or 1.1% to 1.5%, from the reported NAV per share of \$21.79 as of September 30,

2015. Main Street estimates that the decrease is primarily due to unrealized depreciation relating to its middle market debt investments during the fourth quarter of 2015 in large part due to the volatility the leveraged loan market experienced during the quarter. This unrealized depreciation is estimated to be partially offset by unrealized appreciation primarily relating to the lower middle market portfolio equity investments during the fourth quarter of 2015.

**Fourth Quarter and Full Year 2015 Earnings Release and Conference Call Scheduled**

Main Street's fourth quarter and full year 2015 results will be released on Thursday, February 25, 2016, after the market closes. In conjunction with the release, Main Street has scheduled a conference call, which will be broadcast live via phone and over the Internet, on Friday, February 26, 2016, at 10:00 a.m. Eastern time. (1) Distributable net investment income is net investment income as determined in accordance with U.S. Generally Accepted Accounting Principles, or U.S. GAAP, excluding the impact of share-based compensation expense which is non-cash in nature. Main Street believes presenting distributable net investment income and the related per share amount is useful and appropriate supplemental disclosure for analyzing its financial performance since share-based compensation does not require settlement in cash. However, distributable net investment income is a non-U.S. GAAP measure and should not be considered as a replacement for net investment income and other earnings measures presented in accordance with U.S. GAAP. Instead, distributable net investment income should be reviewed only in connection with such U.S. GAAP measures in analyzing Main Street's financial performance. In order to reconcile estimated distributable net investment income per share to estimated net investment income share in accordance with U.S. GAAP, \$0.03 to \$0.04 per share of estimated share-based compensation expense is added back to net investment income per share to calculate estimated distributable net investment income per share.
