This Report on Form 6-K contains a news release dated 14 November 2018 entitled Vodafone announces results for the six months ended 30 September 2018

Vodafone announces results for the six months ended 30 September 2018

13 November 2018

IFRS 15 was adopted on 1 April 2018 for our statutory reporting, without restating prior year figures. As a result, the discussion of our operating results is primarily on an IAS 18 basis for all periods presented.

Highlights

- Group revenue of 21.8 billion and loss for the financial period of 7.8 billion, primarily due to a loss on the disposal of Vodafone India (following the completion of the merger with Idea Cellular) and impairments
- Organic service revenue (excluding handset financing, IAS 18 basis) up 0.8%** and Q2 up 0.5%** with good commercial and financial performance in most markets offset by increased competition in Italy and Spain
- Growth drivers: good momentum in fixed broadband (384,000 net adds) and convergence (616,000 net adds); Vodafone Business grew 1.0%*, led by strong growth in IoT; Emerging Consumer up 7.4%* driven by data growth
- Organic adjusted EBITDA up 2.9%** (excluding handset financing and settlements, IAS 18 basis), supported by a third consecutive year of net reduction in operating expenses
- Updating full year guidance: underlying organic adjusted EBITDA growth narrowed to c.3% (previously 1-5%); Free cash flow (pre-spectrum) raised to c. 5.4 billion (previously at least 5.2 billion)
- Stable interim dividend per share of 4.84 eurocents; full year dividend per share expected to be in-line with FY18

Nick Read, Group Chief Executive, commented:

Our performance in the majority of our markets has been good during the first half of the year, and we have taken decisive commercial and operational actions to respond to challenging competitive conditions in Italy and Spain. We are on track to reduce net operating expenses for the third year running, and we are confirming the mid-point of our EBITDA guidance range, with an increased outlook for free cash flow generation.

Looking ahead, my new strategic priorities focus on driving greater consistency of commercial execution, accelerating digital transformation, radically simplifying our operating model and generating better returns from our infrastructure assets. Our goal is to deepen customer engagement through a broader offering of products and services and to deliver the best digital customer experience, supported by consistent investment in our leading Gigabit networks. We expect that this will drive revenue growth, reduce churn and lower our European net operating expenses by at least 1.2 billion by FY2021.

As part of our effort to improve returns, we are creating a virtual internal tower company across our European operations, and we are reviewing the best strategic and financial direction for these assets.

Our focus on organic growth along with the strategic and financial benefits of the proposed acquisition of Liberty Global's assets give confidence in the Group's ability to grow free cash flow, which underpins our dividend.

CHIEF EXECUTIVE'S STATEMENT

Financial review of the half year

On 20 March 2017 we announced an agreement to merge Vodafone India with Idea Cellular (Idea) in India, which completed on 31 August 2018. As a result, Vodafone India has been excluded from Group figures for all periods up to 31 August 2018 and the results of Vodafone Idea have been included in all Group figures for all periods thereafter, unless otherwise stated.

Financial results: Statutory performance measures

Following the adoption of IFRS 15 Revenue from Contracts with Customers on 1 April 2018, the Group's statutory results for the six months ended 30 September 2018 are on an IFRS 15 basis, whereas the statutory results for the six months ended 30 September 2017 are, as previously reported, on an IAS 18 basis. Any comparison between the two bases of reporting is not meaningful. As a result, the discussion of our operating results is primarily on an IAS 18 basis for all periods presented. See Alternative performance measures on page 48 for more information and reconciliations to the closest respective equivalent GAAP measures.

Group revenue declined by 5.5% to 21.8 billion, reflecting foreign exchange headwinds, the impact of the adoption of IFRS 15, which nets certain components of dealer commissions from service revenues, and the sale of Qatar. Operating loss was 2.1 billion, down 4.1 billion, largely driven by impairments of 3.5 billion in Spain, Romania and Vodafone Idea.

The loss for the financial period of 7.8 billion reflects these impairments, a loss on disposal of Vodafone India of 3.4 billion recognised following the completion of the merger with Idea Cellular, higher net financing costs (following adverse foreign exchange movements, mark to market losses and higher gross borrowings) and the de-recognition of a deferred tax asset in Spain. Basic loss per share was 29.00 eurocents, compared to earnings per share of 4.03 eurocents for the period ended 30 September 2017.

Financial results: Alternative performance measures

On an IAS 18 basis, Group organic service revenue excluding handset financing grew 0.8%** (Q1: 1.1%**; Q2: 0.5%**). Growth was driven by market share gains in Europe Consumer fixed, strong mobile data demand and customer base growth in our emerging market operations, and continued momentum in Vodafone Business supported by market share gains in fixed and strong IoT sales. These offset increased competitive pressures in Italy and Spain, and the drag from lower wholesale revenue.

Group organic adjusted EBITDA grew 2.9%** excluding handset financing and settlements. This reflected broad based growth across the majority of our markets, with the exception of Italy and Spain, and was supported by operating expense reduction across both Europe and Common functions, which was only partially offset by inflationary pressures in AMAP.

Consequently, the Group's adjusted organic EBITDA margin (excluding handset financing and settlements) increased by 0.3 percentage points to 30.8%***, and we remain on-track for a fourth consecutive year of underlying EBITDA margin expansion. Adjusted EBIT increased 8.6%*** excluding handset financing and settlements, driven by adjusted EBITDA growth and lower depreciation and amortisation expenses.

On a reported basis, adjusted EBITDA and adjusted EBIT declined, reflecting foreign exchange headwinds, a lower benefit from handset financing in the UK and a regulatory settlement in the UK in the prior year.

The Group's adjusted effective tax rate for H1 was 25.9% compared to 22.2% last year. This higher rate is primarily due to a change in the country mix of the Group's profits, partly driven by the financing for the acquisition of Liberty Global's assets in Germany and Central & Eastern Europe, and the impact of non-tax deductible foreign exchange losses. We expect the Group's underlying effective tax rate for the full year to remain within our low to mid-20s range.

Adjusted earnings per share, which exclude impairment losses and the results of Vodafone India (which were included in discontinued operations), were 3.56 eurocents, a decrease of 43.7% year-on-year, as lower adjusted EBIT and higher net financing costs more than offset the decrease in income tax expense.

Liquidity and capital resources

Free cash flow pre-spectrum was 0.9 billion, compared to 1.3 billion in the prior year. The reduction year-on-year was principally driven by lower adjusted EBITDA and higher capital creditor outflows, partly offset by lower capital additions (which decreased to 3.1 billion, representing 13.6% of revenues).

Free cash flow post spectrum was 0.6 billion, compared to 0.4 billion in the prior year. Spectrum payments were 0.2 billion, principally reflecting 3500MHz spectrum acquired in the UK to support the rollout of 5G services. Cash restructuring costs of 0.1 billion were similar to the prior year.

Net debt as at 30 September 2018 was 32.1 billion compared to 29.6 billion as at 31 March 2018. This reflects free cash flow generation in the period of 0.9 billion, proceeds from Verizon loan notes of 2.1 billion, offset by FY18 final dividend payments of 2.7 billion, spectrum purchases of 1.0 billion (including 0.6 billion for the Italian auction, which was ongoing at the period end), and a net cash outflow to India from Vodafone Group of 0.8 billion in connection with the Vodafone Idea transaction.

CHIEF EXECUTIVE'S STATEMENT

Strategic review of the half year

The Group simplified its strategy during the first half of the financial year, identifying five drivers of sustainable revenue and free cash flow growth, which are described below. The foundation of our strategy is our significant investments in leading 4G wireless and next generation fixed networks, which continue to support an excellent customer experience. Based on network net promoter scores, at the end of the period the Group was a leader or co-leader in 18 out of 20 markets for Consumer and Business, with a significant performance gap relative to value-focused competitors.

Europe Consumer: Selling one more product per customer, lowering churn through convergence

In H1, the European Consumer segment accounted for 49.1% of Group service revenues.

We aim to drive growth in the Europe Consumer segment by developing deeper customer relationships, with a strong focus on our existing base. We intend to both cross-sell additional products (e.g., broadband, family SIMs, TV) and up-sell new experiences (including higher speeds with 4G Evo / 5G, low latency mobile gaming services and a wide range of Consumer IoT devices, enabled by our leading V by Vodafone global platform). Our objective is to increase revenue per customer and to significantly reduce churn as an increasing proportion of our customer base becomes converged over time.

We intend to launch 5G services in-line with leading local competitors during calendar 2019 and 2020, with an initial focus on dense urban areas. 5G's improved spectral and energy efficiency supports up to a 10x reduction in the cost per Gigabyte, which will allow the Group to limit the future growth in network operating costs despite strong expected traffic growth.

Overall, Europe Consumer service revenues excluding UK handset financing declined by 0.6%** in H1, with fixed growth of 3.6%** offset by a mobile decline of 2.1%** . Excluding Spain, Italy and the drag from UK handset financing, service revenues grew by 3.0%** , with fixed growth of 6.1%** and mobile growing by 1.8%** . Fixed represented 28.3% of segment revenues in the period.

In Consumer Fixed, we continued to expand our NGN footprint, which is the largest in Europe. On a pro-forma basis for the acquisition of Liberty Global's cable assets (announced in May), we covered 117 million households at the end of the period, with 54 million on-net (including VodafoneZiggo). With the potential to offer superior gigabit-speeds via DOCSIS3.1 on Cable and via FTTH to most of these homes in the next few years, we see significant scope to increase on-net broadband customer penetration, which is currently 28%, at attractive incremental margins.

Including VodafoneZiggo, the Group had 20.4 million broadband customers, 6.2 million converged customers and 13.7 million TV customers at the end of the period. We maintained good commercial momentum in all markets other than Spain, which was impacted by increased competitive intensity and by our decision not to renew unprofitable football rights. During H1 we added 384,000 broadband customers, 744,000 NGN customers and 616,000 converged customers (partially supported by the first-time recognition of prepaid customers in Germany). Our TV customer base declined by 71,000, following football customer losses in

Spain.

In Consumer Mobile, data growth remained strong at 57%, with average smartphone usage increasing to 3.2 GB per month. Our ability to monetise this growth varied by market. In Germany and the UK, underlying Consumer ARPU trends improved on the back of more-for-more offers and RPI-linked price increases, respectively, although on a reported basis this was offset by a mix shift towards SIM-only / family SIMs and convergence discounts. In Italy and Spain, increased competition led to material ARPU declines.

Vodafone Business: A leading international challenger in fixed, industrialising IoT

In H1, Vodafone Business accounted for 29.8% of Group service revenues.

We are in the process of rebranding our former Enterprise division as Vodafone Business, which we believe will help to increase our brand recognition as we broaden our service offering. Our strategy is to drive growth and deepen our existing mobile customer relationships by cross-selling additional services including next generation fixed, IoT and Cloud services. We aim to increase revenue per account and reduce churn, while also improving productivity through our salesforce transformation initiative and the rapid digitalisation of our operations.

We believe our unique global footprint and extensive partner market relationships provide us with a competitive advantage in selling to select multinational customers, which represent c.20% of divisional service revenues and are managed centrally by our Vodafone Global Enterprise team.

We aim to build on our strength in connectivity to become the partner of choice for local corporate / government customers (which represent c.30% of Business revenues) and for multinationals, leveraging our leading global IoT platform. We are investing in IoT solutions for specific industry verticals, expanding from our current focus on automotive to digital buildings, healthcare and logistics. Together with good growth in IoT connections (which rose 28% in Q2 to 77 million), this supported IoT revenue growth of 14.0%* in H1.

We also see significant future opportunities to gain share as the Wide Area Networking (WAN) market transitions to Software Defined Networking (SDN), which offers large enterprise customers both greater flexibility and significant cost savings compared to legacy products.

For SoHo and SME customers, which represent c.50% of divisional service revenues, we aim to cross-sell fixed and unified communications propositions and also to position Vodafone as an integrator of value added digital and IoT services, offsetting the pressure on mobile prices.

CHIEF EXECUTIVE S STATEMENT

Overall, Vodafone Business service revenues grew by 1.0%* in H1 (Q1: 0.9%*, Q2 1.1%*), led by good growth in Vodacom (4.7%*) and with a stable performance in Europe (0.2%*). Within Europe, Germany and the UK improved, while southern Europe slowed. Fixed revenues, which represent 31.0% of Vodafone Business, grew at 3.9%* (Q1: 3.2%*, Q2 4.7%*), supported by ongoing market share gains in fixed, security and cloud services. Mobile declined by 0.3%* (Q1: -0.1%*, Q2 -0.5%*), as customer growth and IoT gains were offset by ARPU pressure.

The Vodafone Business contribution margin expanded by 90 basis points in H1, reflecting our salesforce transformation initiative.

Emerging Consumer: Driving data penetration, growing digital and financial services

In H1, the Emerging Consumer segment accounted for 16.8% of Group service revenues.

We continue to see significant growth potential in our African and Middle Eastern markets. Data growth remained strong at 18% in Q2, however data penetration is currently still low, with only 22% of our mobile customer base using 4G services, and with smartphone penetration at only 43%. As 4G smartphone costs continue to fall, driving ongoing adoption, we aim to grow ARPU. For example, customers in South Africa typically spend 22% more when moving from 3G to 4G services.

We also see significant opportunity to grow in digital and financial services. M-Pesa, our African payments platform, has moved beyond its origins as a money transfer service, and now provides enterprise payments, financial services and merchant payment services for mobile commerce. Over US\$10 billion of payments are processed over the platform every month, across the seven African markets where M-Pesa services are active. We now have 35 million M-Pesa customers, and in H1 M-Pesa grew revenues by 19.4%* to 0.4 billion. M-Pesa represented 12.0% of Emerging Consumer service revenues in H1.

During H1, the Emerging Consumer segment grew at 7.4%*. In euro terms service revenue declined by 9.3%, due to a sharp FX devaluation in Turkey.

Digital Transformation: A new radically simpler, digital first operating model, leveraging Group scale

We see the emergence of new digital technologies, including big data analytics, artificial intelligence agents and robotic process automation (RPA) as a compelling opportunity to transform the Group's operating model and fundamentally reshape our cost base. We are accelerating the implementation of our Digital Vodafone programme, as speed will be a key factor in retaining the benefit of these new technologies.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

During H1, we increased the proportion of mobile customers acquired through online channels to 13%, compared to less than 10% a year ago, helping to reduce commissions paid to third party distributors. In fixed, 30% of customer acquisitions are now online. In customer operations, we have deployed our TOBi chatbots in 5 markets, with a further 5 markets due to launch in H2. This contributed to a 10% year-on-year reduction in the frequency of customer contacts to our call centres in H1 (excluding the impact of our commercial repositioning in Spain). In addition, by deploying RPA bots in our shared service centres, we reduced over 900 FTE roles in H1.

In order to gain the full benefit of this digital first approach, we intend to shift towards a radically simpler and more flexible operating model. Over the coming quarters, we will adopt new simplified pricing models across our markets, and will proactively phase out complex legacy pricing structures. Lower complexity will allow both significant savings in IT costs and greater commercial agility. We are also introducing a number of digital only products, starting with Vodafone Bit in Spain, which will have lower commissions and operating costs.

We also see additional opportunities to leverage Group scale. We already have 20,000 employees in our shared service centres in India, Egypt and Eastern Europe, and have centralised over 80% of procurement. Looking ahead, we see further opportunities from centralising European network design and engineering functions, as well as IT operations.

Together with the benefits of our ongoing Fit for Growth programme and zero based budgeting efforts, we expect that the rapid adoption of digital technologies will enable us to reduce operating expenses in our European operations (including Common functions) by at least 1.2 billion on an absolute organic basis by FY21, compared to FY18 levels. In AMAP, operating expenses are expected to continue to grow below local inflation levels, supporting margins.

In H1, we reduced net operating expenses on an organic basis by 0.2 billion in Europe and Common Functions, and by 0.1 billion for the Group overall. For the full year, we aim to reduce operating expenses on an organic basis by 400 million in Europe and Common Functions. This is the third year in a row in which we have reduced our net operating expenses, supporting organic EBITDA margin expansion.

CHIEF EXECUTIVE'S STATEMENT

Improving asset utilisation: Capturing synergies, strategic partnerships and creating a virtual TowerCo in Europe

We aim to improve the utilisation of all of the Group's assets as part of our focus on improving returns on capital. We have announced a number of in-market consolidation deals, which we expect to unlock significant synergies. We have a strong track record of delivering or exceeding targeted cost and capex synergies on prior deals, including KDG in Germany and ONO in Spain.

In the Netherlands, VodafoneZiggo has already delivered over one-third of targeted cost and capex synergies, and is on track to achieve its goal of 210 million of annual run-rate savings by calendar 2021 (the fifth full year post closing). In India, we are making a fast start on capturing the US\$10 billion NPV of targeted cost and capex savings following the merger of Vodafone India with Idea Cellular. Our announced acquisition of Liberty Global's cable assets in Germany and Central and Eastern Europe (CEE) targets expected cost and capex savings of 535 million by the fifth full year post completion, with an NPV of 6 billion including integration costs. We will remain highly focused on capturing these significant opportunities for value creation.

We also believe that strategic partnerships are another important potential route towards improving industry returns. We have been successful in agreeing capital-smart partnerships in fixed-line, notably in Italy, the UK and Portugal, and we also intend to explore opportunities for partnerships in mobile, providing that these do not compromise our network differentiation.

In this context, we are creating a virtual Tower company to manage the 58,000 towers in our controlled operations across Europe. This internal vertical organisation will have a dedicated management team solely focused on adding new tenancies and reducing operating expenses. We are also conducting due diligence in order to determine the optimal strategic and financial direction for all of our tower assets, including those held in joint ventures.

Notes:

* All amounts in this document marked with an * represent organic growth which presents performance on a comparable basis, both in terms of merger and acquisition activity and movements in foreign exchange rates. Change at constant exchange rates presents performance on a comparable basis in terms of foreign exchange rates only. Organic growth and change at constant exchange rates are alternative performance measures. See Alternative performance measures on page 48 for further details and reconciliations to the respective closest equivalent GAAP measure.

** Organic growth excluding the impact of UK handset financing and settlements (see page 53 for further details).

1. Following the adoption of IFRS 15 Revenue from Contracts with Customers on 1 April 2018, the Group's statutory results for the six months ended 30 September 2018 are on an IFRS 15 basis, whereas the statutory results for the six months ended 30 September 2017 are on an IAS 18 basis as previously reported.

2. Six months ended 30 September 2018 includes 3.5 billion of impairment charges in respect of the Group's investments in Spain, Romania and Vodafone Idea and a 3.4 billion loss on the disposal of Vodafone India. See note 8 Acquisitions and disposals for further details.

3. Alternative performance measures are non-GAAP measures that are presented to provide readers with additional financial information that is regularly reviewed by management and should not be viewed in isolation or as an alternative to the equivalent GAAP measure. Group service revenue, adjusted EBITDA and adjusted EBIT are presented on an IAS 18 basis. See Alternative performance measures on page 48 for reconciliations to the closest respective equivalent GAAP measure and Definition of terms on page 59 for further details.

GUIDANCE

Please see page 48 for Alternative performance measures , page 59 for Definition of terms and page 61 for Forward-looking statements .

2019 financial year guidance

	Adjusted EBITDA bn	Free cash flow (pre-spectrum) bn
Original guidance (excluding Vodafone India)	Organic growth of 1 - 5% excluding settlements and UK handset financing	At least 5.2 billion
Updated guidance	Organic growth of c.3% excluding settlements and UK handset financing	c. 5.4 billion

Consistent with prior guidance, we now expect to grow our adjusted organic EBITDA by around 3% in FY19, excluding the impact of UK handset financing in both years, and the significant benefit in the prior year from regulatory settlements in the UK and a legal settlement in Germany. Based on guidance FX rates, and under IAS 18 accounting standards, this implies an adjusted EBITDA range of 14.3-14.5 billion for the year.

Under IFRS 15, we expect our organic service revenue growth will be slightly higher and our absolute adjusted EBITDA will be slightly lower, primarily due to the elimination of the impact of UK handset financing under IAS 18, with no impact on FCF.

We now target a reduction in operating expenses in Europe and Common functions of at least 1.2 billion by FY21 compared to FY18 on an absolute organic basis, including savings in FY19 of around 400 million.

On an IAS 18 basis, we continue to expect our capital additions expressed as a percentage of our revenues to remain in the mid-teens , excluding capital additions related to the Gigabit Investment Plan in Germany and the announced acquisition of Liberty Global's assets in Germany and CEE.

We now aim to generate FCF pre-spectrum of around 5.4 billion, after all capex, before M&A and restructuring costs, and based on guidance FX rates, reflecting our confidence in achieving the mid-point of our EBITDA guidance range.

Dividend policy

The Board currently intends to propose a total dividend of 15.07 eurocents per share for the current financial year, in-line with the FY18 dividend, with an interim dividend of 4.84 eurocents (also stable YoY). The Board will consider growing the dividend per share over the long-term, once the Group's financial leverage has reduced towards the lower end of the revised target range of 2.5x-3.0x net debt / EBITDA.

Assumptions

We have based guidance for the financial year ending 31 March 2019 on our current assessment of the global macroeconomic outlook and assume foreign exchange rates of 1:£0.87, 1:ZAR 15.1, 1:TRY 5.1 and 1:EGP 22.1. Guidance excludes the impact of licence and spectrum payments, material one-off tax-related payments, restructuring payments, changes in shareholder recharges from India and any fundamental structural change to the Eurozone. It also assumes no material change to the current structure of the Group. Actual foreign exchange rates may vary from the foreign exchange rate assumptions used.

Note:

1. Adjusted EBITDA and free cash flow (pre-spectrum) are alternative performance measures. Alternative performance measures are non-GAAP measures that are presented to provide readers with additional financial information that is regularly reviewed by management and should not be viewed in isolation or as an alternative to the equivalent GAAP measure. The adjusted EBITDA and free cash flow (pre-spectrum) measures are forward-looking alternative performance measures which at this time cannot be quantitatively reconciled to comparative GAAP financial information. See [Alternative performance measures](#) on page 48 for more information.

FINANCIAL RESULTS

On a statutory basis, revenue decreased by 0.7 billion to 16.0 billion, including a 0.6 billion decrease due to the adoption of IFRS 15.

On an IAS 18 basis, revenue decreased 0.5% including a 0.1 percentage point negative impact from foreign exchange movements. On an organic basis, service revenue excluding the drag from UK handset financing decreased 0.7%** (Q1 -0.3%** , Q2 -1.1%**), reflecting competitive pressure in Italy and Spain offset by good growth in Germany, the UK and Other Europe.

Adjusted EBITDA decreased 4.2%, including a 0.1 percentage point negative impact from foreign exchange movements. On an organic basis and excluding UK handset financing impacts and a UK settlement in the prior year, adjusted EBITDA was almost stable (-0.2)%** as service revenue declines were offset by lower operating expenses.

Adjusted EBIT decreased 19.5%*, reflecting lower adjusted EBITDA.

Notes:

* All amounts in this document marked with an * represent organic growth which presents performance on a comparable basis, both in terms of merger and acquisition activity and movements in foreign exchange rates. Change at constant exchange rates presents performance on a comparable basis in terms

of foreign exchange rates only. Organic growth and change at constant exchange rates are alternative performance measures. See [Alternative performance measures](#) on page 48 for further details and reconciliations to the respective closest equivalent GAAP measure.

** Organic growth excluding the impact of UK handset financing and settlements (see page 53 for further details).

1 The Financial Results discussion, including the discussion of service revenue, adjusted EBITDA, adjusted EBIT and adjusted operating profit, is primarily performed on an IAS 18 basis. 2018 information on an IAS 18 basis and percentage movements on an IAS 18 basis are alternative performance measures. See [Alternative performance measures](#) on page 48 for more information and reconciliations to the closest respective equivalent GAAP measure and [Definitions of terms](#) on page 59 for further details.

Germany

Service revenue grew 2.0%* (Q1: 2.4%*, Q2: 1.7%*) driven by strong customer base growth in both mobile and fixed line. The slight slowdown in quarterly trends reflects the lapping of a tough prior year comparator relating to wholesale MVNO revenues.

Mobile service revenue grew 1.3%* (Q1: 1.7%*, Q2: 0.9%*) driven by a higher contract customer base. We added 466,000 contract customers in the first half of the year (H1 2017/18: 301,000) supported by strong sales performances in both branded and indirect channels, and the success of our GigaCube proposition. Contract ARPU declined, however it grew excluding the mix shift towards SIM-only, multi-SIM family contracts and convergence. In Q2, our consumer segment continued to perform well and Business returned to growth, however this was partially offset by a tough prior year comparator relating to wholesale MVNO revenues. We retained our market leading consumer NPS, and our 4G coverage is now 93% with the ability to offer 500Mbps in over 45 cities. Narrow-band IoT, which enables deep indoor coverage at low cost for connected devices, is now available across 90% of our 4G footprint.

Fixed service revenue grew 3.2%* (Q1: 3.4%*, Q2: 3.0%*) driven by customer base growth. We added 115,000 broadband customers in H1, with quarterly trends improving despite an increase in competitor promotions, reflecting the growing demand for higher speed offers. We also maintained good momentum in convergence supported by our GigaKombi proposition, and we added 513,000 consumer converged customers (including prepaid mobile customers with fixed products for the first time), bringing our consumer converged customer base to 1.2 million. Our Gigabit investment plan is well underway. We have successfully completed the analogue switch off for 42% of our TV customers, enabling the efficient roll out of DOCSIS 3.1. We are targeting to cover 8 million households (70%) with this Gigabit capable technology by the end of the year.

FINANCIAL RESULTS

Adjusted EBITDA grew 7.3%* with a 1.5 percentage point improvement in adjusted EBITDA margin to 38.1%. This was driven by service revenue growth, our focus on more profitable direct channels, and a further 1.2%* reduction in operating expenses despite the strong growth in customer numbers.

Italy

Service revenue declined 6.4%* (Q1: -6.5%*, Q2: -6.3%*), primarily reflecting increased competition in mobile due to the arrival of a new entrant.

Mobile service revenue declined 9.5%* (Q1: -9.5%*, Q2: -9.6%*). Promotional activity in the prepaid segment remained high, and in Q2 stepped up further following the launch of the new entrant in late May. As a result, mobile number portability (MNP) volumes were 46% higher year-on year in Q2 and 42% higher compared to Q1. In June, we launched a new secondary brand (Ho.) to specifically address customers in the value segment of the market. Customer take-up to date has been encouraging, mitigating losses on our main brand. Overall our active consumer prepaid customer base declined by 213,000 in H1, and consumer prepaid ARPU fell by 5.4%. During this period we maintained our market leading network position.

In October 2018, we announced that we had acquired 300MHz of spectrum across 700MHz, 3700MHz, and 26GHz bands for 2.4bn, a significantly greater cost than in other European markets due to an artificial auction construct. This spectrum will enable the deployment of 5G, allowing us to maintain our leading network position in Italy and delivering substantial network operating cost efficiencies as demand for data continues to grow.

Fixed service revenue grew 7.9%* (Q1: 7.1%*, Q2: 8.6%*). Our commercial momentum remained strong, as we added 121,000 broadband households in H1. Through our owned NGN footprint and our rapidly expanding strategic partnership with Open Fiber, we now cover 5.8 million households. We also added 91,000 converged customers, taking our total converged customer base to 834,000.

Adjusted EBITDA declined by 9.7%* and the adjusted EBITDA margin was 1.6 percentage points lower at 37.0%. The decline in service revenue was partially offset by a tight control of operating expenses, which declined by 8.1%* year-on-year.

UK

Excluding the drag from handset financing, service revenue grew 0.8%** (Q1: 0.5%***, Q2: 1.1%**), driven by growth in consumer mobile and fixed line, and by a return to growth in Business fixed. This improved performance reflects the substantial operational improvements and commercial actions taken over the past year. On a reported basis service revenue declined 5.0%* (Q1: -4.9%*, Q2: -5.1%*), with the drag on growth from handset financing increasing from 5.4 percentage points in Q1 to 6.2 percentage points in Q2.

Mobile service revenue excluding handset financing declined by 0.8%** (Q1: -0.9%** , Q2: -0.6%**), with growth in consumer being offset by lower Business and MVNO revenue. The growth in consumer was driven by a higher contract customer base and an RPI-linked price increase. Our commercial momentum accelerated through the period; excluding Talkmobile, our low-end mobile brand which is being phased out, we added 181,000 contract customers in the first half of the year (H1 2017/18: 59,000). This was supported by a 2 percentage point year-on-year improvement in consumer branded churn, and our best ever network satisfaction and consumer NPS scores. Our active consumer prepaid base also grew by 100,000 in Q2 supported by VOXI, our targeted youth proposition.

Fixed service revenue grew 6.2%* (Q1: 5.3%*, Q2: 7.0%*) driven by continued strong momentum in consumer broadband and a return to service revenue growth in Business. We added 97,000 consumer broadband net additions in H1, and in total we now serve 479,000 broadband customers. In September, we launched our first fibre-to-the-home offer in Milton Keynes, leveraging our strategic partnership with CityFibre. This offer will be rolled out to a further 9 cities by early 2019.

Adjusted organic EBITDA excluding handset financing and a one-off settlement in the prior year grew 12.1%** , and our adjusted EBITDA margin improved by 2.1%** percentage points. This improvement was driven by service revenue growth, a 5.7%* reduction in operating expenses excluding the one-off settlement, and improved Business fixed profitability; to date, we have closed 15 legacy networks and transitioned these customers to our RedStream next-generation network. On a reported basis adjusted EBITDA decreased by 14.4%* and the reported adjusted EBITDA margin decreased by 2.9 percentage points to 23.6%.

FINANCIAL RESULTS

Spain

Service revenue declined 4.7%* (Q1: -2.2%*, Q2: -7.2%*). The slowdown in quarterly trends reflects the commercial actions we took in May in order to improve the competitiveness of our offers, particularly in the value segment, and the impact of our decision not to renew unprofitable football content rights. Going forward, unless football rights are available on profitable terms, we intend to focus our content strategy on premium movies and TV series.

Competition in the market remained high during the first half of the year, resulting in a 20-25% increase in market portability volumes across both mobile and fixed and a significant increase in our churn rates. Post our commercial repositioning in May, porting trends in June and July improved significantly, supported by improved momentum in our second brand Lowi. However, as a result of our decision not to renew unprofitable rights for the Champions League and the match of the week in La Liga, we lost football customers in August and September. Our performance was further impacted by discounted TV/football promotions launched by the incumbent. However, our porting performance versus other operators remained resilient, and the summer promotions ended at the beginning of October. Overall, in H1 our mobile contract base grew by 35,000, our broadband customer base declined by 118,000, and we lost 98,000 TV customers. We maintained our market leading NPS position in consumer, and further improved our market leading network position with 4G coverage of 96% and an NGN footprint covering 21.5 million households (of which 10.3 million are on-net).

Adjusted EBITDA declined by 27.2%* and the adjusted EBITDA margin was 7.5 percentage points lower at 22.4%. This was principally driven by the reduction in ARPU and fixed customers as well as higher commercial costs following the commercial repositioning of the business. Excluding certain one-time items primarily relating to content costs and intercompany charges, adjusted EBITDA declined by 20.7%*.

Following challenging current trading and economic conditions, management has reassessed the expected future business performance in Spain. Following this reassessment, projected cash flows are lower and this has led to an impairment charge of 2.9 billion with respect to the Group's investment in Spain for the six months ended 30 September 2018.

Other Europe

Other Europe, which represents 12.1% of Group service revenue, grew 2.4%* (Q1: 2.6%*, Q2: 2.3%*) with all major markets growing during the first half of the year. Adjusted EBITDA grew 10.3%* and adjusted EBITDA margin grew 1.6 percentage points to 33.1%* reflecting continued strong cost control, and good customer base growth.

In Ireland, service revenue grew 2.5%* (Q1: 1.7%*, Q2: 3.3%*) driven by mobile base growth and prepaid ARPU increases. Portugal service revenue grew 2.3%* (Q1: 3.6%*, Q2: 1.1%*) supported by strong customer base growth and higher ARPU in fixed line. The slowdown in quarterly trends reflects the impact of an MTR cut in July. In Greece, service revenue grew by 1.6%* (Q1: 2.1%*, Q2: 1.2%*) driven by ARPU growth in consumer mobile and fixed customer base growth. The slowdown quarter-on-quarter reflect the lapping of price rises in the prior year.

VodafoneZiggo Joint Venture

The results of VodafoneZiggo (in which Vodafone owns a 50% stake), are reported here under US GAAP which is broadly consistent with Vodafone's IFRS basis of reporting.

Total revenue declined 1.8% during H1 (Q1: -2.9%, Q2: -0.6%). This reflected continued price competition in mobile, particularly in the B2B segment, partially offset by growth in fixed line. The improvement in quarterly trends principally reflected the lapping of MTR cuts and roaming regulation from the prior year, combined with continued good customer base growth in both mobile and fixed. We reached the milestone of 1 million converged customers, and 30% of broadband customers and 48% of eligible mobile customers are now converged, driving significant NPS and churn benefits.

Adjusted EBITDA was stable in H1, as declining revenues were offset by lower operating and direct costs which were down 2.9% year-on-year. We continued to make good progress on integrating the businesses and have now realised over one third of the targeted cost and capital expenditure synergies.

During H1, Vodafone received 163 million in dividends from the joint venture and 25 million in interest payments on the shareholder loan.

FINANCIAL RESULTS

On a statutory basis, revenue decreased by 0.5 billion to 5.2 billion, including a 0.1 billion decrease due to the adoption of IFRS 15.

Revenue decreased 7.3%, with strong organic growth offset by a 4.8 percentage point impact arising from the disposal of Vodafone Qatar at the end of FY18 and an 11.7 percentage point adverse impact from foreign exchange movements, particularly with regards to the Turkish Lira. On an organic basis service revenue was up 7.4%* driven by continued commercial execution, strong growth in data and the benefit of price increases to adjust for local inflation.

Adjusted EBITDA decreased 6.5%, including a 3.8 percentage point impact from the disposal of Vodafone Qatar and a 9.5 percentage point adverse impact from foreign exchange movements. On an organic basis, adjusted EBITDA grew 6.8%*, driven by underlying revenue growth and ongoing cost management to mitigate inflationary impacts.

Adjusted EBIT increased 6.9%*.

See Alternative performance measures on page 48 for further details and reconciliations to the respective closest equivalent GAAP measure.

1 The Financial Results discussion, including the discussion of service revenue, adjusted EBITDA, adjusted EBIT and adjusted operating profit, is primarily performed on an IAS 18 basis. 2018 information on an IAS 18 basis and percentage movements on an IAS 18 basis are alternative performance measures. See [Alternative performance measures](#) on page 48 for more information and reconciliations to the closest respective equivalent GAAP measure and [Definitions of terms](#) on page 59 for further details.

Vodacom

Vodacom Group service revenue grew 5.7%* (Q1: 5.1%*, Q2: 6.3%*), supported by strong customer additions and data growth in South Africa, as well as growing demand for data and M-Pesa in Vodacom's International operations. The improvement in quarterly trends was driven by a further acceleration in the International operations.

In South Africa, service revenue grew by 4.6%* (Q1: 4.9%*, Q2: 4.3%*). This was supported by continued strong customer base growth in both contract and prepaid and further improvements in Business. Q2 service revenue growth was 2.2%* excluding a one-off benefit relating to a change in revenue deferral policy for our new plus plans. This underlying slowdown reflected customers optimising their bundle spend as a result of macroeconomic pressures. In total we added 2.5 million prepaid customers in the first half of the year, taking our total prepaid customer base to 47.2 million, an increase of 3.4% year-on-year.

Data revenue grew by 7.5% and now represents 43.8% of total service revenue. We continued to drive strong data bundle adoption, which provides customers with a worry-free experience by reducing their exposure to out-of-bundle charges. As a result, we have continued to see strong growth in data bundle sales, which were up 26% year-on-year to 437 million. In total we now have 20.5 million data customers, of which 8.6 million are on 4G, up 42% year-on-year. Through our advanced digital platform we have started to launch new data services such as our video play platform and a range of financial services. Initial take up of these services has been encouraging. We maintained our market leading NPS and network positions, with 4G coverage now reaching 83%.

Vodacom's International operations outside of South Africa, which represent 23.9% of Vodacom Group service revenue, grew by 12.2%* (Q1: 9.4%*, Q2: 15.0%*). This was driven by strong growth in Mozambique and the DRC (with growth in Q2 benefitting from the lapping of the devaluation of the Congolese Franc in the prior year), and sustained momentum in Tanzania and Lesotho.

FINANCIAL RESULTS

Vodacom's adjusted EBITDA grew by 4.8%*, supported by revenue growth. Adjusted EBITDA margins reduced modestly to 37.7%, reflecting increased roaming costs in South Africa following a change in accounting treatment, with these costs now reflected in operating expenses.

In September 2018, Vodacom concluded its second broad-based BEE (black economic empowerment) transaction replacing the existing deal from 2008. This new scheme, valued at 1 billion, is the biggest ever in the telecommunications industry and makes YeboYethu (Vodacom South Africa BEE shareholders) the third largest shareholder. The deal secures Vodacom's Level 3 BEE scorecard credentials, specifically in relation to black ownership, with effective black ownership of c.20%. This is a key input in assessments for spectrum allocation, and Government/corporate business. As a result of this transaction Vodafone Group's shareholding in Vodacom will fall from 64.5% to 60.5%.

Other AMAP

Service revenue grew 9.4%* (Q1: 9.4%*, Q2: 9.4%*), supported by continued strong operational performances and local currency service revenue growth in both Turkey and Egypt. Adjusted EBITDA grew 10.2%* and the adjusted EBITDA margin declined by 0.1 percentage points to 27.1%.

In Turkey, service revenue grew 14.6%* (Q1: 14.0%*, Q2: 15.2%*) supported by strong net adds in consumer contract, increased mobile data revenue, and good fixed line customer base growth. Adjusted EBITDA grew 17.9%*, however the adjusted EBITDA margin declined by 1.4 percentage points to 21.4% reflecting an increase in costs as a result of greater inflationary pressures and a 30% devaluation in the Turkish Lira during H1.

Egypt service revenue grew 16.9%* (Q1: 16.7%*, Q2: 17.0%*) with successful segmented campaigns, rising data penetration and price increases supporting ARPU. Adjusted EBITDA grew 17.3%* and the adjusted EBITDA margin improved by 0.5 percentage points to 45.6% with revenue growth and strong cost discipline more than offsetting inflationary pressures.

Associates and joint ventures

Vodafone Idea

On 31 August 2018, the Group completed the transaction to combine its subsidiary, Vodafone India (excluding its 42% stake in Indus Towers), with Idea Cellular to form Vodafone Idea, with the combined company being jointly controlled by Vodafone and the Aditya Birla Group. See note 5 Discontinued operations and assets and liabilities held for sale for the results of Vodafone India for the five months ended 31 August 2018 and note 8 Acquisition and disposals for details on the formation of Vodafone Idea.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

The Vodafone Idea joint venture's net loss for the month of September 2018 is reported within Share of adjusted results for associates and joint ventures. In accordance with applicable IFRS, the Group also recognised an impairment charge of € 0.3 billion to reduce the Group's carrying value of its investment in Vodafone Idea to fair value at 30 September 2018. See note 3 Impairment review for further details. Note 3 also sets out the primary assumptions underlying the carrying value of Vodafone Idea, the risks that these may not materialise and the consequential potential impact on our investment carrying value.

Vodafone Idea will report its second quarter results on 14 November 2018.

FINANCIAL RESULTS

Group results

Revenue

On a statutory basis, Group revenue decreased 1.3 billion to 21.8 billion, including a 0.7 billion decrease due to the adoption of IFRS 15 as set out on page 26. On an IAS 18 basis, Group revenue decreased by 2.3% reflecting the disposal of Vodafone Qatar in the prior period and adverse foreign exchange movements.

On an IAS 18 basis, Group service revenue decreased by 0.1%* as market share gains in European Consumer fixed, strong mobile data demand and customer base growth in our emerging market operations and continued momentum in Vodafone Business were offset by increased competitive pressures in Italy and Spain, the drag from lower wholesale revenue and the impact of handset financing.

Adjusted EBITDA

On a statutory basis, Group adjusted EBITDA decreased 0.5 billion to 6.9 billion, including a 0.2 billion decrease due to the adoption of IFRS 15 (see page 26), the disposal of Vodafone Qatar in the prior period and adverse foreign exchange movements. On an IAS 18 basis, Group adjusted EBITDA decreased by 0.2%* and the Group's adjusted EBITDA margin decreased 0.5* percentage points driven by a lower benefit from handset financing and settlements in the UK.

Adjusted EBIT

On a statutory basis, adjusted EBIT decreased by 0.4 billion to 2.1 billion, including a 0.2 billion decrease due to the adoption of IFRS 15. On an IAS 18 basis, adjusted EBIT decreased by 6.2% to 2.3 billion driven as a result of lower adjusted EBITDA partially offset by lower depreciation and amortisation expenses.

Operating (loss)/profit

Adjusted EBIT excludes certain income and expenses that we have identified separately to allow their effect on the results of the Group to be assessed. The items that are included in statutory operating (loss)/profit but are excluded from adjusted EBIT are discussed below.

For the six months ended 30 September 2018, the Group recorded impairment charges of 3.5 billion. The impairment charges relate solely to goodwill and are recognised in the consolidated income statement within operating (loss)/profit.

The Group's share of adjusted results in associates and joint ventures was a loss of 0.0 billion, down from a profit of 0.2 billion in the prior year, partly due to the inclusion of the results of Vodafone Idea following the completion of the merger on 31 August 2018.

Restructuring costs and other income and expense increased by 0.3 billion during the period. Amortisation of intangible assets in relation to customer bases and brands, which are recognised on the acquisition of businesses, was 0.3 billion, a decrease of 0.2 billion compared to the prior period.

Including the above items, the Group reported an operating loss of 2.1 billion, a decrease of 4.1 billion on the prior period.

Net (financing costs)/net investment income

	Six months ended 30 September	
	2018	2017
	m	m
Investment income	184	333
Financing costs	(999)	(181)
Net (financing costs)/net investment income	(815)	152
Analysed as:		
Net financing costs before interest on settlement of tax issues	(430)	(312)
Net Interest income/(expense) arising on settlement of outstanding tax issues	15	(33)
	(415)	(345)
Mark to market (losses)/gains	(185)	195
Foreign exchange ¹	(215)	302
	(815)	152

Note:

1. Primarily comprises foreign exchange rate differences reflected in the income statement in relation to sterling and US dollar balances.

Net financing costs decreased by 967 million primarily driven by mark to market losses (including economic hedges of the mandatory convertible bond) and adverse foreign exchange rate movements. Net financing costs before interest on settlement of tax issues includes increased interest costs from the bond issuance as part of the financing for the Liberty Global transaction. Excluding these, underlying financing costs remained stable, reflecting consistent weighted average borrowing costs for both periods.

FINANCIAL RESULTS**Taxation**

	Six months ended 30 September	
	2018	2017
	m	m
Income tax expense:	(1,409)	(579)

Adjusted profit before tax²	1,504	2,373
Share of adjusted results in associates and joint ventures	8	(171)
Adjusted profit before tax for calculating adjusted effective tax rate	1,512	2,202
Adjusted effective tax rate²	25.9%	22.2%

Notes:

1. See Earnings per share on page 17.
2. Adjusted profit before tax and adjusted effective tax are alternative performance measures. Alternative performance measures are non-GAAP measures that are presented to provide readers with additional financial information that is regularly reviewed by management and should not be viewed in isolation or as an alternative to the equivalent GAAP measure. See Alternative performance measures on page 48 for further details.

The Group's adjusted effective tax rate for its controlled businesses for the six months ended 30 September 2018 was 25.9% compared to 22.2% for the same period during the last financial year. The higher rate in the current year is primarily due to a change in the mix of the Group's profit, partly driven by the financing for the Liberty Global transaction and the impact of non-tax deductible foreign exchange losses. We expect the Group's underlying effective tax rate for the full year to remain within our low to mid-20s range.

The Group's adjusted effective tax rate for both years does not include the following items: the derecognition of a deferred tax asset in Spain of 1,048 million (2017: nil); deferred tax on the use of Luxembourg losses of 185 million (2017: 168 million); an increase in the deferred tax asset of 159 million (2017: nil) arising from a revaluation of investments based upon the local GAAP financial statements and tax returns. The last two items change the total losses we have available for future use against our profits in Luxembourg and do not affect the amount of tax we pay in other countries.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

The Group's adjusted effective tax rate for the six months ended 30 September 2017 does not include a recognition of deferred tax asset of 159 million due to higher interest rates and a tax charge in respect of capital gains on the transfer of shares in Vodafone Kenya Limited to the Vodacom Group of 110 million.

FINANCIAL RESULTS**Adjusted earnings per share**

Adjusted earnings per share, which excludes impairment losses and the results of Vodafone India (the latter being included in discontinued operations), were 3.56 eurocents, a decrease of 43.7% year-on-year, as the impact of the adoption of IFRS 15, lower adjusted operating profit and higher net financing costs more than offset the decrease in adjusted income tax expense.

Basic loss per share was 29.00 eurocents, compared to an earnings per share of 4.03 eurocents for the period ended 30 September 2017, with the increase largely due to impairment charges of 3.5 billion, a 3.4 billion loss on the disposal of Vodafone India recognised during the period, higher net financing costs from adverse foreign exchange movements, mark to market losses and higher gross borrowings and the derecognition of a deferred tax asset in Spain, all of which have been excluded from adjusted earnings per share.

Foreign exchange	296		693
Other ³	(773)		149
Net debt increase	(2,479)		(850)
Opening net debt ⁴	(29,631)		(29,338)
Closing net debt⁴	(32,110)		(30,188)

Notes:

- Capital additions include the purchase of property, plant and equipment and intangible assets, other than licence and spectrum, during the period.
- Operating free cash flow, free cash flow (pre-spectrum) and free cash flow are alternative performance measures which are non-GAAP measures that are presented to provide readers with additional financial information that is regularly reviewed by management and should not be viewed in isolation or as an alternative to the equivalent GAAP measure. See [Alternative performance measures](#) on page 48 for more information and reconciliations to the closest respective equivalent GAAP measure and [Definition of terms](#) on page 59 for further details.
- Other for the six months ended 30 September 2018 include 2,135 million (2017: nil) received from the repayment of US\$2.5 billion of loan notes issued by Verizon Communications Inc., a 1,377 million (2017: nil) capital injection into Vodafone India and 808 million of debt in relation to licences and spectrum in Italy and Spain (2017: nil).
- Net debt at 31 March 2018, 30 September 2017 and 31 March 2017 has been revised to exclude 1.8 billion of liabilities for payments due to holders of the equity shares in Kabel Deutschland AG under the

terms of a domination and profit and loss transfer agreement, which are now separately disclosed in the consolidated statement of financial position and are no longer presented within borrowings (see page 23).

Operating free cash flow decreased 0.3 billion mainly due to lower adjusted EBITDA, lower capital additions and higher working capital cash outflows.

Free cash flow (pre-spectrum) was 0.9 billion, a decrease of 0.3 billion, largely driven by the decrease in operating free cash flow.

Licence and spectrum payments include amounts relating to the purchase of spectrum in the UK of 0.2 billion (2017: 0.6 billion in Italy, 0.1 billion in Germany).

Acquisitions and disposals include 0.3 billion received on completion of the merger of Vodafone India with Idea Cellular on 31 August 2018.

A foreign exchange gain of 0.4 billion was recognised on net debt as a result of the translation impact of closing foreign exchange rates, mainly due to movements in the Turkish Lira and South African Rand against the Euro.

Closing net debt at 30 September 2018 was 32.1 billion (31 March 2018: 29.6 billion) and excludes the remaining £1.4 billion mandatory convertible bond issued in February 2016 which will be settled in equity shares, liabilities of 1.8 billion (31 March 2018: 1.8 billion) relating to minority holdings in KDG and 0.9 billion of shareholder loans receivable from VodafoneZiggo.

Closing net debt also continues to include certain bonds which are reported at an amount 1.6 billion (31 March 2018: 1.65 billion) higher than their euro-equivalent cash redemption value as a result of hedge accounting under IFRS. In addition, where bonds are issued in currencies other than euros, the Group has entered into foreign currency swaps to fix the euro cash outflows on redemption. The impact of these swaps are not reflected in gross debt and would decrease the euro equivalent redemption value of the bonds by less than 0.1 billion (31 March 2018: 0.6 billion increase).

LIQUIDITY AND CAPITAL RESOURCES

Analysis of net debt:

	30 September 2018 m	Restated ¹ 31 March 2018 m

Cash collateral liabilities	(1,332)	(1,070)
Other borrowings ³	(1,393)	(373)
Gross borrowings	(48,172)	(41,421)
Derivative financial instruments ⁴	(2,798)	(2,383)
Gross debts	(50,970)	(43,804)
Cash and cash equivalents	6,962	4,674
Other financial instruments:		
Derivative financial instruments ⁵	3,039	2,629
Short term investments ⁶	8,013	6,152
Cash collateral ⁷	846	718
Total cash and cash equivalents and other financial instruments	18,860	14,173
Net debt	(32,110)	(29,631)

Notes:

- Liabilities for payments due to holders of the equity shares in Kabel Deutschland AG under the terms of a domination and profit and loss transfer agreement are now separately disclosed in the consolidated statement of financial position and are no longer presented within borrowings (see page 23); gross borrowings at 31 March 2018 have therefore been revised to exclude 1.8 billion in respect of such liabilities.
- At 30 September 2018, US\$114 million (31 March 2018: US\$570 million) was drawn under the US commercial paper programme and 693 million (31 March 2018: 2,249 million) was drawn under the euro commercial paper programme.
- Amount primarily includes 808 million of debt in relation to licences and spectrum in Italy and Spain (31 March 2018: nil).
- Comprises mark-to-market adjustments on derivative financial instruments which are included as a component of trade and other payables.
- Comprises mark-to-market adjustments on derivative financial instruments which are included as a component of trade and other receivables.
- At 30 September 2018 the amount primarily includes 4,817million (31 March 2018: 3,087 million) in managed investment funds, 2,106 million (31 March 2018: 1,974 million) in government bonds of which UK gilts of 1,086 million (31 March 2018: 1,112 million) are used primarily as collateral in relation to derivative financial instruments, and 993 million (31 March 2018: 976 million) short-term investments in portfolios of supply chain and handset receivables, principally in third party corporate entities.

7. Comprises cash paid under collateral support agreements.

The following table sets out the Group's undrawn committed bank facilities:

	Maturity	30 September 2018 m
US\$4.2 billion committed revolving credit facility ¹	February 2022	3,586
4.0 billion committed revolving credit facility ¹	January 2025	3,920
Other committed credit facilities	Various	145
Undrawn committed facilities		7,651

Note:

1. Both facilities support US and euro commercial paper programmes of up to US\$15 billion and 8 billion respectively.

Post employment benefits

During the six months ended 30 September 2018, the net deficit arising from the Group's obligations in respect of its defined benefit schemes decreased to 0.2 billion compared to 0.4 billion at 31 March 2018 primarily due to a 0.1 billion reduction in the value of plan assets during the period being offset by a 0.3 billion actuarial gain arising from changes in financial assumptions, principally due to an increase in the discount rates in the UK and Eurozone.

Dividends

Dividends will continue to be declared in euros and paid in euros, pounds sterling and US dollars, aligning the Group's shareholder returns with the primary currency in which we generate free cash flow. The foreign exchange rate at which future dividends declared in euros will be converted into pounds sterling and US dollars will be calculated based on the average exchange rate over the five business days during the week prior to the payment of the dividend.

The Board currently intends to propose a total dividend of 15.07 eurocents per share for the current financial year, in-line with the dividend for the year ended 31 March 2018, and have announced an interim dividend of 4.84 eurocents (also stable year-on-year). The ex-dividend date for the interim dividend is 22 November 2018 for ordinary shareholders, the record date is 23 November 2018 and the dividend is payable on 1 February 2019. Dividend payments on ordinary shares will be paid directly into a nominated bank or building society account.

RISK FACTORS

There are a number of key factors and uncertainties that could have a significant effect on the Group's financial performance, including the following:

1. Cyber threat and information security

An external attack, insider threat or supplier breach could cause service interruption or confidential data breaches.

2. Adverse political and regulatory measures

The scale and complexity of political and regulatory risk is increasing especially as digital becomes the backbone of economic growth, potentially resulting in political intervention and competitive disadvantage. 5G spectrum auctions are also underway in many jurisdictions which could lead to unfair spectrum allocation or pricing.

3. Market disruption

New entrants to markets or competitors with lean models could create pricing pressure. As more competitors push unlimited bundles, it might impact profitability in the short to medium term through price erosion.

4. Effective digital and technological transformation

We plan to accelerate the evolution of Vodafone towards a digital future to improve customer experience, increase speed to market and operate in an efficient and agile manner. Failure to do this could lead to missed commercial opportunities, increased cost of working and customer service failures.

5. Disintermediation

We face increased competition from a variety of new technology platforms which could impact our customer relationships and experience. We must be able to keep pace with new technology to compete in changing markets while maintaining high levels of customer service.

6. Global economic disruption/adequate liquidity

As a multinational business, we operate in many countries and currencies, so changes to global economic conditions can impact us. Any major economic disruption could result in reduced spending power for our customers and impact our ability to access capital markets. A relative strengthening or weakening of the major currencies in which we transact could impact our profitability.

7. Technology resilience

A technology site loss could result in a major impact on our customers, revenues and reputation. This could involve all major technology sites including: mobile, fixed, and data centres.

8. Legal and regulatory compliance

Vodafone must comply with a multitude of local and international laws as well as more specific regulations. These include licence requirements, privacy regulation, anti-money laundering, competition law, anti-bribery law, intellectual property rights and economic sanctions.

9. Maintain investment grade credit rating

We may fail to maintain our investment grade credit rating if we do not effectively allocate the Group's capital to maximise returns.

10. Electro-magnetic fields related health risks

Electromagnetic signals emitted by mobile devices and base stations may be found to pose health risks, with potential impacts including: changes to national legislation, a reduction in mobile phone usage or litigation.

There have been two changes to the above risk factors since 31 March:

- The separate risk on privacy and data management has been merged into the legal and regulatory compliance risk (8) due to the GDPR compliance programme moving from the implementation phase into business as usual.

- The wording for risk 9 has been updated to reflect the link between effective allocation of the Group's capital and the impact on our credit rating.

Brexit implications

The Board continues to keep the possible implications of Brexit for Vodafone's operations under review. A cross-functional team has identified ways in which Brexit might affect the Group's operations. There remains insufficient information about the likely terms of the post-Brexit arrangements between the UK and the EU, as well as about any possible transitional arrangements, to draw any conclusions about the probable impact.

Although we are a UK headquartered company and have put in place necessary contingency planning, a very large majority of our customers are in other countries, accounting for most of our revenue and cash flow. Each of our national operating companies is a stand-alone business, incorporated and licensed in the jurisdiction in which it operates, and able to adapt to a wide range of local developments. As such, our ability to provide services to our customers in the countries in which we operate, inside or outside the EU, is unlikely to be affected by Brexit. We are not a major international trading company, and do not use passporting for any of our major services or processes.

RISK FACTORS

Depending on the arrangements agreed between the UK and the EU, there are two primary issues that could directly affect our operations, in both cases potentially causing us to incur additional cost:

- Creation of a data frontier between the UK and the EU: the inability to move data freely between the UK and EU countries might cause us to have to move some technical facilities, and affect future network design; and

- Inability to access the talent we need to run a multinational Group operation from the UK: increased controls over or restrictions to our ability to employ leading talent from non UK markets could cause us to have to adjust our operating model to ensure that we attract and retain the best people for the roles we have.

As far as our UK operations are concerned, we are reviewing the impact of a no deal scenario. One potential impact may be on our processes for the procurement of handsets and technical equipment, which may result in a greater investment in working capital at 31 March 2019 and consequently lower cash flow, although this would be unlikely to have a material impact at a Group level.

A further, indirect, issue that could affect our future performance would be if the Brexit process caused downward revisions to macro-economic performance in our major markets including the UK, impacting the performance of the operating companies in those markets.

Further information in relation to these risk factors and uncertainties can be found on pages 38 to 45 of the Group's annual report for the financial year ended 31 March 2018, which is available at <http://www.vodafone.com/investor>.

RESPONSIBILITY STATEMENT

We confirm that to the best of our knowledge:

- the unaudited condensed consolidated financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting, as issued by the International Accounting Standards Board and as adopted by the European Union; and

- the interim management report includes a fair review of the information required by Disclosure Guidance and Transparency Rules sourcebook 4.2.7 and Disclosure Guidance and Transparency Rules sourcebook 4.2.8.

Neither the Company nor the directors accept any liability to any person in relation to the half-year financial report except to the extent that such liability could arise under English law. Accordingly, any liability to a person who has demonstrated reliance on any untrue or misleading statement or omission shall be determined in accordance with section 90A and schedule 10A of the Financial Services and Markets Act 2000.

The accompanying notes are an integral part of the unaudited condensed consolidated financial statements.

Notes to the unaudited condensed consolidated financial statements

For the six months ended 30 September 2018

1 Basis of preparation

The unaudited condensed consolidated financial statements for the six months ended 30 September 2018:

- were prepared in accordance with International Accounting Standard 34 Interim Financial Reporting (IAS 34) as issued by the International Accounting Standards Board and as adopted by the European Union;
- are presented on a condensed basis as permitted by IAS 34 and therefore do not include all disclosures that would otherwise be required in a full set of financial statements and should be read in conjunction with the Group s annual report for the year ended 31 March 2018;
- apply the same accounting policies, presentation and methods of calculation as those followed in the preparation of the Group s consolidated financial statements for the year ended 31 March 2018, which were prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board and were also prepared in accordance with IFRS adopted by the European Union (EU), the Companies Act 2006 and Article 4 of the EU IAS Regulations, with the exception of the adoption of IFRS 15 Revenue from Contracts with Customers and IFRS 9 Financial Instruments as set out below. Income taxes are accrued using the tax rate that is expected to be applicable for the full financial year, adjusted for certain discrete items which occurred in the interim period in accordance with IAS 34;
- include all adjustments, consisting of normal recurring adjustments, necessary for a fair statement of the results for the periods presented;
- do not constitute statutory accounts within the meaning of section 434(3) of the Companies Act 2006; and
- were approved by the Board of directors on 13 November 2018.

The information relating to the year ended 31 March 2018 is an extract from the Group's published annual report for that year, which has been delivered to the Registrar of Companies, and on which the auditors' report was unqualified and did not contain any emphasis of matter or statements under section 498(2) or 498(3) of the UK Companies Act 2006.

After reviewing the Group's budget for the remainder of the financial year, and longer term plans, the directors are satisfied that, at the time of approving the unaudited condensed consolidated financial statements, it is appropriate to continue to adopt a going concern basis of accounting.

The preparation of the unaudited condensed consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the end of the reporting period, and the reported amounts of revenue and expenses during the reporting period. Actual results could vary from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

New accounting pronouncements adopted

On 1 April 2018 the Group adopted new accounting policies where necessary to comply with amendments to International Financial Reporting Standards; the accounting pronouncements considered by the Group as significant on adoption are IFRS 9 Financial Instruments and IFRS 15 Revenue from Contracts with Customers as set out below.

Other IFRS changes adopted on 1 April 2018, which had also been issued by the IASB and endorsed by the EU, have no material impact on the consolidated results, financial position or cash flows of the Group. Further details are provided on all changes to IFRS impacting the Group in the Group's annual report for the year ended 31 March 2018.

Notes to the unaudited condensed consolidated financial statements

For the six months ended 30 September 2018

IFRS 9 Financial Instruments

IFRS 9 Financial Instruments, was adopted by the Group on 1 April 2018 and impacts the classification and measurement of the Group's financial instruments, revises the requirements for when hedge accounting can be applied and requires certain additional disclosures.

The primary impacts of applying IFRS 9 in the current financial period are disclosed below and on page 31.

Primary impacts of applying the IFRS 9 accounting policy

The cumulative retrospective impact of changes to the classification and measurement of financial instruments under IFRS 9 has been reflected by the Group as an adjustment to equity on the date of adoption. The accounting policies for financial instruments following the adoption of IFRS 9 are consistent with the Group's pre-existing policy under IAS 39 Financial Instruments: Recognition and Measurement, detailed in the Group's consolidated financial statements for the year ended 31 March 2018, except as set out below:

- Certain other cash and cash equivalent and short term investment amounts previously recorded at amortised cost are now classified as fair value through profit and loss. The carrying values of these assets approximated to fair value and therefore there is no material impact from this reclassification.
- The carrying values of trade receivables, contract assets and finance lease receivables are reduced by the lifetime estimated future credit losses at the date of initial recognition where previously credit losses were not recognised on such assets until there was an indicator of impairment, such as a payment default (see below).
- Where the Group sells receivables to a third party from time to time these portfolios, which were previously recorded at amortised cost, are recorded at fair value through other comprehensive income; the impact of this remeasurement is not material.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

Whilst hedge accounting requirements are revised under IFRS 9, there are no material changes to the Group's hedge accounting.

Provisions for receivables, reflecting lifetime expected credit losses from the date of first recognition, have increased. The application of IFRS 9 resulted in additional impairment allowances at 1 April 2018 as follows:

	m
Loss allowance at 31 March 2018 under IAS 39	1,249
Changes to loss allowance recognised at 1 April 2018:	
Release of allowance for trade receivables reclassified to fair value through OCI	(23)
Recognition of additional allowance on trade and other receivables at 31 March 2018	264
Loss allowance on contract assets recognised on adoption of IFRS 15	34
Loss allowance at 1 April 2018 under IFRS 9	1,524

Notes to the unaudited condensed consolidated financial statements

For the six months ended 30 September 2018

IFRS 15 Revenue from Contracts with Customers

IFRS 15 Revenue from Contracts with Customers was adopted by the Group on 1 April 2018 with the cumulative retrospective impact reflected as an adjustment to equity on the date of adoption.

The key differences between the Group's IAS 18 accounting policy (which is disclosed in the Group's Annual Report and Accounts for the year ended 31 March 2018) and the Group's IFRS 15 accounting policy (which is provided below), as well as the primary impacts of applying IFRS 15 in the current financial period are disclosed on pages 31 to 33 and below.

Primary impacts of applying the IFRS 15 accounting policy

The primary impacts of applying the IFRS 15 (current) accounting policy in place of the accounting policy applied in the annual report and accounts for the year ended 31 March 2018 (the previous policy) are:

- Under the previous policy, revenue allocated to obligations was restricted to the amount receivable without the delivery of additional goods or services; this restriction no longer applies under current policy. The primary impact is that revenue allocated to equipment typically increases and revenue subsequently recognised for service delivery during the contract period typically decreases when the Group sells subsidised devices, such as handsets, together with airtime service agreements. The recognition of additional up-front unbilled equipment revenue is the primary driver for the increase in the contract asset value recorded under IFRS 15 (see pages 31 to 33).
- Under current policy, direct and incremental contract acquisition costs, such as commissions, are typically recognised in expenses over the related contract period; this generally leads to the later recognition of charges for such costs compared with the previous policy. Deferred contract acquisition costs recorded under the current policy are disclosed on pages 31 to 33.
- The amounts of contract acquisition costs deducted from revenue as they are considered to relate to the funding of customer discounts are higher under the current policy than under the previous policy.

- Contract fulfilment costs are deferred under current policy when the requirements for the deferral of expense recognition are met (see above); such costs were generally expensed as incurred under previous policy. Deferred contract fulfilment costs recorded under the current policy are disclosed on pages 31 to 33.

IFRS 15 Accounting Policy

When the Group enters into an agreement with a customer, goods and services deliverable under the contract are identified as separate performance obligations (obligations) to the extent that the customer can benefit from the goods or services on their own and that the separate goods and services are considered distinct from other goods and services in the agreement. Where individual goods and services don't meet the criteria to be identified as separate obligations they are aggregated with other goods and/or services in the agreement until a separate obligation is identified. The obligations identified will depend on the nature of individual customer contracts, but might typically be separately identified for mobile handsets, other equipment provided to customers and services provided to customers such as mobile and fixed line communication services.

The Group determines the transaction price to which it expects to be entitled to in return for providing the promised obligations to the customer based on the committed contractual amounts, net of sales taxes and discounts. Where indirect channel dealers, such as retailers, acquire customer contracts on behalf of the Group and receive commission, any commissions that the dealer is compelled to use to fund discounts or other incentives to the customer are treated as payments to the customer when determining the transaction price and consequently are not included in contract acquisition costs.

The transaction price is allocated between the identified obligations according to the relative standalone selling prices of the obligations. The standalone selling price of each obligation deliverable in the contract is determined according to the prices that the Group would achieve by selling the same goods and/or services included in the obligation to a similar customer on a standalone basis; where standalone selling prices are not directly observable, estimation techniques are used maximising the use of external inputs (see further commentary regarding estimations below).

Revenue is recognised when the respective obligations in the contract are delivered to the customer and payment remains probable.

- Revenue for the provision of services, such as mobile airtime and fixed line broadband, is recognised when or as the Group performs the related service during the agreed service period.
- Revenue for device sales to end customers is generally recognised when the device is delivered to the end customer. For device sales made to intermediaries such as indirect channel dealers, revenue is recognised if control of the device has transferred to the intermediary and the intermediary has no right to return the device to receive a refund; otherwise revenue recognition is deferred until sale of the device to an end customer by the intermediary or the expiry of any right of return.

Notes to the unaudited condensed consolidated financial statements

For the six months ended 30 September 2018

When the Group has control of goods or services prior to delivery to a customer, then the Group is the principal in the sale to the customer. As a principal, receipts from, and payments to, suppliers are reported on a gross basis in revenue and operating costs. If another party has control of goods or services prior to transfer to a customer, then the Group is acting as an agent for the other party and revenue in respect of the relevant obligations is recognised net of any related payments to the supplier and recognised revenue represents the margin earned by the Group.

When revenue recognised in respect of a customer contract exceeds amounts received or receivable from a customer a contract asset is recognised; contract assets will typically be recognised for handsets or other equipment provided to customers where payment is recovered by the Group via future service fees. If amounts received or receivable from a customer exceed revenue recognised for a contract, for example if the Group receives an advance payment from a customer, a contract liability is recognised.

When contract assets or liabilities are recognised, a financing component may exist in the contract; this is typically the case when a handset or other equipment is provided to a customer up-front but payment is received over the term of the related service agreement, in which case the customer is deemed to have received financing. If a significant financing component is provided to the customer, the transaction price is reduced and interest revenue is recognised over the customer's payment period using an interest rate reflecting the relevant central bank rates and customer credit risk.

Contract-related costs

When costs directly relating to a specific contract are incurred prior to recognising revenue for a related obligation, and those costs enhance the ability of the Group to deliver an obligation and are expected to be recovered, then those costs are recognised on the statement of financial position as fulfilment costs and are recognised as expenses in line with the recognition of revenue when the related obligation is delivered.

The direct and incremental costs of acquiring a contract including, for example, certain commissions payable to staff or agents for acquiring customers on behalf of the Group, are recognised as contract acquisition cost assets in the statement of financial position when the related payment obligation is recorded. Costs are recognised as an expense in line with the recognition of the related revenue that is expected to be earned by the Group; typically this is over the contract period as new commissions are payable on contract renewal. Certain amounts payable to agents are deducted from revenue recognised (see above).

Critical accounting judgements and key sources of estimation relating to IFRS 15

Revenue recognition under IFRS 15 is significantly more complex than under previous reporting requirements and necessitates the collation and processing of very large amounts of data and the increased use of management judgements and estimates to

produce financial information. The most significant critical accounting judgement and key the source of estimation uncertainty are disclosed below. Other accounting judgements and estimations made by management are not considered to be individually critical or material, but cumulatively have a material impact on reported costs and revenues particularly as the Group offers a large variety of bundled goods and services.

Where the Group doesn't sell equivalent goods or services in similar circumstances on a standalone basis it is necessary to estimate the standalone price. When estimating the standalone price the Group maximises the use of external inputs; methods for estimating standalone prices include determining the standalone price of similar goods and services sold by the Group, observing the standalone prices for similar goods and services when sold by third parties or using a cost-plus reasonable margin approach (which is sometimes the case for handsets and other equipment). Where it is not possible to reliably estimate standalone prices due to lack of observable standalone sales or highly variable pricing, which is sometimes the case for services, the standalone price of an obligation may be determined as the transaction price less the standalone prices of other obligations in the contract. The standalone price determined for obligations materially impacts the allocation of revenue between obligations and impacts the timing of revenue when obligations are provided to customers at different times – for example, the allocation of revenue between handsets, which are usually delivered up-front, and services which are typically delivered over the contract period. However, there is not considered to be a significant risk of material adjustment to the carrying value of contract-related assets or liabilities in the 12 months after the balance sheet date if these estimates were revised.

When the Group has control of goods or services when they are delivered to a customer, then the Group is the principal in the sale to the customer; otherwise the Group is acting as an agent. Whether the Group is considered to be the principal or an agent in the transaction depends on analysis by management of both the legal form and substance of the agreement between the Group and its business partners; such judgements impact the amount of reported revenue and operating expenses (see above) but do not impact reported assets, liabilities or cash flows. Scenarios requiring judgement to determine whether the Group is a principal or an agent include, for example, those where the Group delivers third-party branded services (such as premium music or TV content) to customers.

Notes to the unaudited condensed consolidated financial statements

For the six months ended 30 September 2018

New accounting pronouncements to be adopted on 1 April 2019

IFRS 16 Leases (IFRS 16)

IFRS 16 Leases (IFRS 16) was issued in January 2016 to replace IAS 17 Leases and has been endorsed by the EU. The standard is effective for accounting periods beginning on or after 1 January 2019 and will be adopted by the Group on 1 April 2019.

IFRS 16 will have a material impact on Group s consolidated financial statements. The Group will adopt IFRS 16 with the cumulative retrospective impact reflected as an adjustment to equity on the date of adoption. Descriptions of the primary impacts on the Group s accounting and the Group s adoption approach are disclosed in the Group s annual report and accounts for the year ended 31 March 2018.

The impact of adopting IFRS 16 on the Group s consolidated statement of financial position on 1 April 2019 will depend on the portfolio of leases and macroeconomic factors such as interest and foreign exchange rates at that date. The Group s undiscounted operating lease commitments at 31 March 2018 were 9,694 million. It is expected that had the Group applied IFRS 16 on 1 April 2018 that the incremental lease liabilities recognised by the Group could have been materially higher than the disclosed commitment as revisions to estimated lease terms, which will generally increase, are unlikely to be fully offset by the impact of discounting, however, it is expected that the increase would only have been modest. However, the lease liability to be recognised on 1 April 2019 will not be prepared on the basis of factors that existed on 31 March 2018 and changes to the following items over the current financial year will each impact the amount to be recognised as an incremental lease liability on 1 April 2019:

- The Group s lease portfolio as a result of lease terminations and inceptions;
- Further estimated lease term changes as a result of events arising during the year;
- Interest rates; and
- Foreign exchange rates.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

The Group expensed 3,788 million as operating lease costs under existing reporting requirements for the year to 31 March 2018.

The recognition by the Group of an additional lease liability at 1 April 2019 will have no impact on retained earnings as a right-of-use asset equal to the additional liability will be recognised, subject to adjustments to the right-of-use asset for the derecognition of lease related accruals and prepayments and for onerous lease provisions already held in the balance sheet.

Whilst net cash flow is not impacted by IFRS 16, both net cash inflows from operating activities and payments classified within cash flow from financing activities will increase, as payments made at lease inception or subsequently will be characterised as a repayment of lease liabilities.

Notes to the unaudited condensed consolidated financial statements

For the six months ended 30 September 2018

Impact of the adoption of IFRS 9 and IFRS 15 on the opening balance sheet at 1 April 2018

The impact of the adoption of IFRS 9 and IFRS 15 on the consolidated statement of financial position at 1 April 2018 is set out below:

2 Segmental analysis

The Group has a single group of related services and products being the supply of communications services and products. Revenue is attributed to a country or region based on the location of the Group company reporting the revenue.

Following the adoption of IFRS 15 'Revenue from Contracts with Customers' on 1 April 2018, the Group's statutory results for the six months ended 30 September 2018 are on an IFRS 15 basis, whereas the statutory results for the six months ended 30 September 2017 are on an IAS 18 basis as previously reported, with any comparison between the two bases of reporting not being meaningful.

The segmental analysis set out below is primarily on an IAS 18 basis for all periods presented, as this is the basis on which the chief operating decision maker currently allocates resources and assesses performance, with the expectation that this will transition to an IFRS 15 basis in the financial year ending 31 March 2020. The segmental revenue and profit of Vodafone India were included in discontinued operations for all periods reported. See note 5 'Discontinued operations and assets and liabilities held for sale' for details.

	Segment revenue m	Intra-region revenue m	Regional revenue m	Inter-region revenue m	Group revenue m	Adjusted EBITDA m

Group	23,237	(88)	23,149	(74)	23,075	7,385

The Group's measure of segment profit and adjusted EBITDA, excludes depreciation and amortisation, gains/losses on disposal of fixed assets, impairment losses, restructuring costs arising from discrete restructuring plans, the Group's share of adjusted results in associates and joint ventures and other income and expense. A reconciliation of adjusted EBITDA to operating (loss)/profit is shown below. For a reconciliation of operating (loss)/profit to (loss)/profit for the financial period, see the consolidated income statement on page 22.

	Six months ended 30 September	
	2018 m	2017 m
Adjusted EBITDA	6,873	7,385
Depreciation, amortisation and loss on disposal of fixed assets	(4,773)	(4,928)
Share of adjusted results in equity accounted associates and joint ventures ¹	(8)	171
Adjusted operating profit	2,092	2,628
Impairment loss	(3,495)	
Restructuring costs	(95)	(33)
Amortisation of acquired customer bases and brand intangible assets	(317)	(543)
Other income and expense	(256)	(44)
Operating (loss)/profit	(2,071)	2,008

Note:

1. Share of adjusted results in equity accounted associates and joint ventures excludes amortisation of acquired customer bases and brand intangible assets, restructuring costs and other costs of 0.4 billion

(2017: 0.2 billion) which are included in amortisation of acquired customer base and brand intangible assets, restructuring costs and other income and expense respectively.

Notes to the unaudited condensed consolidated financial statements

For the six months ended 30 September 2018

3 Impairment review

Impairment testing was performed as at 30 September 2018 and 30 September 2017. The methodology adopted for impairment testing for the six months ended 30 September 2018 was consistent with that disclosed on page 108 and pages 117 to 121 of the Group's annual report for the year ended 31 March 2018.

For the six months ended 30 September 2018, the Group recorded impairment charges of 2.9 billion, 0.3 billion and 0.3 billion in respect of the Group's investments in Spain, Romania and Vodafone Idea respectively. The impairment charges with respect to Spain and Romania relate solely to goodwill and the impairment charge with respect to Vodafone Idea relates to the investment's carrying value. All impairment charges are recognised in the consolidated income statement within operating (loss)/profit. The recoverable amounts for Spain and Romania are 7.3 billion and 0.7 billion respectively and are based on value in use calculations. The recoverable amount for the Group's stake in Vodafone Idea is 1.8 billion and is based on its fair value less costs of disposal.

Following challenging current trading and economic conditions, management has reassessed the expected future business performance in Spain. Following this reassessment, projected cash flows are lower and this has led to an impairment charge with respect to the Group's investment in Spain. The impairment charge with respect to the Group's investment in Romania was driven by an increase in the yield on Romanian government bonds which increased the discount rate and our reassessment of the long-term growth rate applied beyond the five-year business plan.

Vodafone Idea Limited

The Group's investment in Vodafone Idea Limited was tested for impairment at 30 September 2018 in accordance with applicable IFRS. Impairment testing was considered appropriate as a result of market conditions and a decline in the quoted share price of the company in the six months ended 30 September 2018.

The market environment in India remains highly challenging with significant pricing pressure, which has led to industry consolidation but a significantly lower level of profitability and greater pressure on financing. Management continues to consider it reasonable to assume an overall market and pricing recovery, however the timing and magnitude remains highly uncertain. Accordingly, there are a wide range of potential outcomes in deriving a current view of future business performance, cash flows and debt financing requirements for value in use purposes.

Management has concluded that the fair value less costs of disposal based on an observable share price is the appropriate basis for valuation as at 30 September 2018.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

The Vodafone Idea share price as at 30 September 2018 of INR 38.55 implies a recoverable amount of INR 152 billion (1.8 billion). As Vodafone Idea's fair value is observable in a quoted market and the unadjusted price per share has been considered, the fair value less costs of disposal quoted above is considered to be a Level 1 valuation under the IFRS 13 fair value hierarchy.

The recoverable amount is lower than the carrying value of the investment and an impairment of 0.3 billion is required as at 30 September 2018. The impairment has been allocated against the joint venture's carrying value recognised in the Group's consolidated statement of financial position.

The carrying value of Vodafone Idea is dependent on a wide range of assumptions, including the level of market pricing and the realisation of anticipated merger-related operating expenses and capital expenditure synergies. Should any of the assumptions not materialise, in whole or in part, these will impact the entity's expected future cash flows and may result in a future impairment. The carrying value is also dependent on the ability of the entity to refinance its liabilities as they fall due. Should this not be achievable, this will impact the liquidity of Vodafone Idea Limited and will result in a future impairment, in whole or in part, of the Group's investment. Based solely on the closing share price of Vodafone Idea Limited on 12 November 2018, the Group's 45.2% interest would be valued at 2.0 billion.

Value in use assumptions

The table below shows key assumptions used in the value in use calculations at 30 September 2018:

	Assumptions used in value in use calculation			
	Germany %	Spain %	Italy %	Romania %
Pre-tax risk adjusted discount rate	8.1	9.5	10.2	10.2
Long-term growth rate	0.5	0.5	1.0	1.0
Projected adjusted EBITDA ¹	3.0	2.6	(2.2)	1.9
Projected capital expenditure ²	16.5-18.8	16.7-19.1	11.9-13.3	12.0-14.6

Notes to the unaudited condensed consolidated financial statements

For the six months ended 30 September 2018

3 Impairment review (continued)Sensitivity analysis

Other than as disclosed below, management believes that no reasonably possible change in any of the above key assumptions would cause the carrying value of any cash-generating unit to materially exceed its recoverable amount.

The estimated recoverable amount of the Group's operations in Germany and Italy exceed their carrying values by 8.7 billion and 2.8 billion respectively. The changes in the following table to assumptions used in the impairment review would, in isolation, lead to an impairment loss being recognised for the six months ended 30 September 2018:

	Change required for carrying value to equal recoverable amount	
	Germany pps	Italy pps
Pre-tax risk adjusted discount rate	2.4	2.6
Long-term growth rate	(2.5)	(2.7)
Projected adjusted EBITDA ¹	(5.8)	(4.7)
Projected capital expenditure ²	19.4	12.2

The changes in the following table to assumptions used in the impairment review would, in isolation, lead to an (increase)/decrease to the aggregate impairment loss recognised in the six months ended 30 September 2018.

	Spain		Romania	
	Increase by 2pps bn	Decrease by 2pps bn	Increase by 2pps bn	Decrease by 2pps bn
Pre-tax risk adjusted discount rate	(1.6)	2.5	(0.2)	0.3
Long-term growth rate	(1.3)	2.0	(0.1)	0.2
Projected adjusted EBITDA ¹	0.9	(0.8)	0.1	(0.1)
Projected capital expenditure ²	(0.4)	0.4	(0.1)	0.1

The carrying values for Vodafone UK, Ireland, Portugal and Czech Republic include goodwill arising from their acquisition by the Group and/or the purchase of operating licences or spectrum rights. While the recoverable amounts for these operating companies are not materially greater than their carrying value, each has a lower risk of giving rise to impairment that would be material to the Group given their relative size or the composition of their carrying value.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

The changes in the following table to assumptions used in the impairment review would have, in isolation, led to an impairment loss being recognised in the six months ended 30 September 2018.

	Change required for carrying value to equal the recoverable amount			
	UK pps	Ireland pps	Portugal pps	Czech Republic pps
Pre-tax risk adjusted discount rate	0.2	0.1	1.5	2.8
Long-term growth rate	(0.2)	(0.1)	(1.5)	(3.4)
Projected adjusted EBITDA1	(0.4)	(0.2)	(3.3)	(5.8)
Projected capital expenditure2	1.0	0.6	9.1	16.2

Notes:

1. Projected adjusted EBITDA is expressed as the compound annual growth rates in the initial five years of the plans used for impairment testing.

2. Projected capital expenditure, which excludes licences and spectrum, is expressed as the range of capital expenditure as a percentage of revenue in the initial five years for all cash generating units of the plans used for impairment testing.

VodafoneZiggo

Following the recent merger, the recoverable amount for VodafoneZiggo is not materially greater than its carrying value. If adverse impacts of economic, competitive, regulatory or other factors were to cause significant deterioration in the operations of VodafoneZiggo and the entity's expected future cash flows, this may lead to an impairment loss being recognised.

Notes to the unaudited condensed consolidated financial statements

For the six months ended 30 September 2018

4 Taxation

	Six months ended 30 September	
	2018 m	2017 m
United Kingdom corporation tax (expense)/income ¹ :		
Current year	1	(71)
Adjustments in respect of prior years	(6)	3
Overseas current tax (expense)/income:		
Current year	(589)	(628)
Adjustments in respect of prior years	19	87
Total current tax expense	(575)	(609)
Deferred tax on origination and reversal of temporary differences:		
United Kingdom deferred tax	39	(86)
Overseas deferred tax	(873)	116
Total deferred tax (expense)/income	(834)	30
Total income tax expense	(1,409)	(579)

Note:

1. UK operating profits are largely offset by statutory allowances for capital investment in the UK network and systems plus ongoing interest costs including those arising from the 10.3 billion of spectrum payments to the UK government in 2000 and 2013.

The six months ended 30 September 2018 include an increase in the deferred tax assets in Luxembourg of 159 million resulting from the tax treatment of the revaluation of investments following completion and approval of the Luxembourg statutory accounts and tax returns. The Group expects to use its losses in Luxembourg over a period of 58 years and the losses in Germany over a period of between 9 and 11 years; the actual use of these losses, and the period over which they may be used, is dependent on many factors which may change. These factors include the level of profitability in both Luxembourg and Germany, changes in tax law and changes to the structure of the Group. Further details about the Group's tax losses can be found in note 6 of the Group's consolidated financial statements for the year ended 31 March 2018.

The Group also derecognised a deferred tax asset of 1,048 million in Spain in the six months ended 30 September 2018 following a reassessment of expected future business performance and consequently lower projected cash flows. Overseas deferred tax expense for the six months ended 30 September 2017 included the recognition of 159 million in relation to losses in Luxembourg expected to be used within 60 years.

Notes to the unaudited condensed consolidated financial statements

For the six months ended 30 September 2018

5 Discontinued operations and assets and liabilities held for sale

On 20 March 2017, Vodafone announced the agreement to combine its subsidiary, Vodafone India (excluding its 42% stake in Indus Towers), with Idea Cellular in India. Consequently, Vodafone India has been accounted for as a discontinued operation for all periods up to 31 August 2018, the date the transaction completed, the results of which are detailed below.

Income statement and segment analysis of discontinued operations

	Five months ended 31 August 2018 m	Six months ended 30 September 2017 m
Revenue	1,561	2,604
Cost of sales	(1,185)	(1,721)

Income tax credit		160
After tax loss on the re-measurement of disposal group		(395)
Loss on sale of disposal group	(3,420)	
Loss for the period from discontinued operations	(3,535)	(345)
Loss per share from discontinued operations		
	eurocents	eurocents
- Basic	(12.87c)	(1.23c)
- Diluted	(12.87c)	(1.23c)
Total comprehensive expense for the period from discontinued operations		
	m	m
Attributable to owners of the parent	(3,535)	(345)

For the five months ended 31 August 2018, the Group recorded a loss on disposal of Vodafone India of 3,420 million as set out in note 8 Acquisitions and disposals. This loss is presented within discontinued operations.

For the six months ended 30 September 2017, the Group recorded a non-cash charge of 555 million (395 million net of tax) to reduce the carrying value of Vodafone India to fair value less costs to sell. Vodafone India's fair value less costs to sell was not observable in a quoted market and accordingly it was determined with reference to the outcomes from the application of a number of potential valuation techniques, which are considered to result in a level 2 valuation as per IFRS 13. As such significant judgement was required and involved the use of estimates. Fair value less costs to sell excluding net debt was assessed to be INR 971 billion at 30 September 2017, equivalent to 12.6 billion at the foreign exchange rate prevailing at that date.

Assets and liabilities held for sale

Assets and liabilities held for sale at 30 September 2018 represent those parts of our joint venture operations expected to be disposed of and include a 12.6% interest in Indus Towers and a 24.95% interest in Vodafone Hutchison Australia. Assets and liabilities held for sale at 31 March 2018 relate to the operations of Vodafone India. The relevant assets and liabilities are detailed in the table below.

	30 September 2018 m	31 March 2018 m
Non-current assets	(242)	10,927
Current assets		2,893
Total assets held for sale	(242)	13,820
Non-current liabilities		(7,398)
Current liabilities		(3,601)
Total liabilities held for sale		(10,999)

8 Acquisitions and disposals**Acquisitions**

The aggregate cash consideration in respect of purchases in subsidiaries, net of cash acquired, is as follows:

	Six months ended 30 September	
	2018	2017
	m	m
Cash consideration paid		
Acquisitions during the year	69	6
Net cash acquired	(7)	
	62	6

During the six month period ended 30 September 2018 the Group completed certain acquisitions for an aggregate net cash consideration of 69 million. The aggregate fair values of goodwill, identifiable assets, and liabilities of the acquired operations were 88 million, 96 million and 131 million respectively. In addition, the Group incurred fees of 16 million.

DisposalsVodafone India

On 31 August 2018, the Group combined its operations in its subsidiary, Vodafone India (excluding its 42% stake in Indus Towers), with Idea Cellular Limited (Idea), to create Vodafone Idea Limited, a company jointly controlled by Vodafone and the Aditya Birla Group (ABG).

As a result, the Group no longer consolidates its previous interest in Vodafone India, which is presented within discontinued operations (see Note 5 Discontinued operations and assets and liabilities held for sale) and now accounts for its 45.2% interest in Vodafone Idea Limited as a joint venture using the equity method.

On disposal, Vodafone India was valued based on the number of shares the Group held in the merged entity post completion and the Idea share price on 31 August 2018 (INR 51.50). The value was also adjusted for the proceeds from the sale of the 4.8% stake in Vodafone Idea from the Vodafone Group to the Aditya Birla Group. As the price per share and proceeds from the sale to the

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

Aditya Birla Group are readily observable and no further adjustments were made, the valuation is considered to be a level 1 valuation as per IFRS 13.

As a result of the transaction, the Group recognised a net loss on the formation of Vodafone Idea Limited of 3,420 million as set out below, including a loss on disposal of 1,276 million and a foreign exchange loss of 2,079 million.

12 Fair value of financial instrumentsThe table below sets out the valuation basis^{1,2} of the financial instruments held at fair value by the Group:

	30 September 2018 m	31 March 2018 m
Financial assets at fair value:		
Money market funds (included within Cash and cash equivalents)	4,243	
Debt and equity securities (included within Other investments) ²	9,411	6,471
Derivative financial instruments (included within Trade and other receivables)	3,039	2,629
Trade receivables at fair value through Other comprehensive income (included within Trade and other receivables)	1,017	
	17,710	9,100
Financial liabilities at fair value:		
Derivative financial instruments (included within Trade and other payables)	2,798	2,383
	2,798	2,383

Notes:

- There were no changes made during the year to valuation methods or the processes to determine classification other than the reclassifications under IFRS 9 and 15, which were effective from 1 April 2018 (see note 1 Basis of preparation), and no transfers were made between the levels in the fair value hierarchy.
- Quoted debt and equity securities of 2,792 million (31 March 2018: 2,520 million) are level 1 classification which comprises items where fair value is determined by unadjusted quoted prices in active markets. All balances other than quoted securities are Level 2 classification which comprises items where fair value is determined from inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly.

The fair value of the Group's financial assets and financial liabilities held at amortised cost approximate to fair value with the exception of long term bonds with a carrying value of 39,677 million (31 March 2018: 30,473 million) and a fair value of 38,539 million (31 March 2018: 29,724 million).

13 Commitments, contingent liabilities and legal proceedings

There have been no material changes to the Group's commitments, contingent liabilities or legal proceedings during the period, except as disclosed below.

Indian tax cases

In August 2007 and September 2007, Vodafone India Limited (VIL) and Vodafone International Holdings BV (VIH BV) respectively received notices from the Indian tax authority alleging potential liability in connection with an alleged failure by VIH BV to deduct withholding tax from consideration paid to the Hutchison Telecommunications International Limited group (HTIL) in respect of HTIL's gain on its disposal to VIH BV of its interests in a wholly-owned Cayman Island incorporated subsidiary that indirectly holds interests in VIL. Following approximately five years of litigation in the Indian courts in which VIH BV sought to set aside the tax demand issued by the Indian tax authority, in January 2012 the Supreme Court of India handed down its judgement, holding that VIH BV's interpretation of the Income Tax Act 1961 was correct, that the HTIL transaction in 2007 was not taxable in India, and that consequently, VIH BV had no obligation to withhold tax from consideration paid to HTIL in respect of the transaction. The Supreme Court of India quashed the relevant notices and demands issued to VIH BV in respect of withholding tax and interest.

On 28 May 2012 the Finance Act 2012 became law. The Finance Act 2012, which amended various provisions of the Income Tax Act 1961 with retrospective effect, contained provisions intended to tax any gain on transfer of shares in a non-Indian company, which derives substantial value from underlying Indian assets, such as VIH BV's transaction with HTIL in 2007. Further, it seeks to subject a purchaser, such as VIH BV, to a retrospective obligation to withhold tax. VIH BV received a letter on 3 January 2013 from the Indian tax authority reminding it of the tax demand raised prior to the Supreme Court of India's judgement and purporting to update the interest element of that demand to a total amount of INR142 billion, which includes principal and interest as calculated by the Indian tax authority but does not include penalties.

On 10 January 2014, VIH BV served an amended trigger notice on the Indian Government under the Netherlands-India Bilateral Investment Treaty (Dutch BIT), supplementing a trigger notice filed on 17 April 2012, immediately prior to the Finance Act 2012 becoming effective, to add claims relating to an attempt by the Indian Government to tax aspects of the transaction with HTIL under transfer pricing rules. A trigger notice announces a party's intention to submit a claim to arbitration and triggers a cooling off period during which both parties may seek to resolve the dispute amicably. Notwithstanding their attempts, the parties were unable to amicably resolve the dispute within the cooling off period stipulated in the Dutch BIT. On 17 April 2014, VIH BV served its notice of arbitration under the Dutch BIT, formally commencing the Dutch BIT arbitration proceedings.

Notes to the unaudited condensed consolidated financial statements

For the six months ended 30 September 2018

13 Commitments, contingent liabilities and legal proceedings (continued)

In June 2016, the tribunal was fully constituted with Sir Franklin Berman KCMG QC appointed as presiding arbitrator. The Indian Government has raised objections to the application of the treaty to VIH BV's claims and to the jurisdiction of the tribunal under the Dutch BIT. On 19 June 2017, the tribunal decided to try both these jurisdictional objections along with the merits of VIH BV's claim in a hearing now scheduled for February 2019. More recent attempts by the Indian Government to have the jurisdiction arguments heard separately have also failed. VIH BV filed its response to India's defence in July 2018 and India will respond in December 2018.

Separately, on 15 June 2015, Vodafone Group Plc and Vodafone Consolidated Holdings Limited served a trigger notice on the Indian Government under the United Kingdom-India Bilateral Investment Treaty (UK BIT) in respect of retrospective tax claims under the Income Tax Act 1961 (as amended by the Finance Act 2012). Although relating to the same underlying facts as the claim under the Dutch BIT, the claim brought by Vodafone Group Plc and Vodafone Consolidated Holdings Limited is a separate and distinct claim under a different treaty. On 24 January 2017, Vodafone Group Plc and Vodafone Consolidated Holdings Limited served a Notice of Arbitration on the Indian Government formally commencing the arbitration.

The Indian Government has indicated that it considers the arbitration under the UK BIT to be an abuse of process but this is strongly denied by Vodafone. On 22 August 2017, the Indian Government obtained an injunction from the Delhi High Court preventing Vodafone from progressing the UK BIT arbitration. Vodafone was not present when India obtained this injunction and applied to dismiss it. On 26 October 2017, the Delhi High Court varied its order to permit Vodafone to participate in the formation of the UK BIT tribunal. It now consists of Marcelo Kohen, an Argentinian national and professor of international law in Geneva (appointed by India), Neil Kaplan, a British national (appointed by Vodafone Group Plc) and Professor Campbell McLachlan QC, a New Zealand national (appointed by the parties as presiding arbitrator). On 7 May 2018, the Delhi High Court dismissed the injunction. The Indian Government appealed the decision and the hearings commenced in September 2018 and are ongoing. In the meantime, Vodafone has undertaken to take no steps advancing the UK BIT pending resolution of the Indian Government's appeal.

On 12 February 2016, VIH BV received a notice dated 4 February 2016 of an outstanding tax demand of INR221 billion (which included interest accruing since the date of the original demand) along with a statement that enforcement action, including against VIH BV's indirectly held assets in India, would be taken if the demand was not satisfied. On 29 September 2017, VIH BV received an electronically generated demand in respect of alleged principal, interest and penalties in the amount of INR190.7 billion. This demand does not appear to have included any element for alleged accrued interest liability.

Separate proceedings in the Bombay High Court taken against VIH BV to seek to treat it as an agent of HTIL in respect of its alleged tax on the same transaction, as well as penalties of up to 100% of the assessed withholding tax for the alleged failure to have withheld such taxes, were listed for hearing at the request of the Indian Government on 21 April 2016 despite the issue having been ruled upon by the Supreme Court of India. The hearing has since been periodically listed and then adjourned or not reached hearing. VIH BV and Vodafone Group Plc will continue to defend vigorously any allegation that VIH BV or VIL is liable to pay tax in connection with the transaction with HTIL and will continue to exercise all rights to seek redress including pursuant to the Dutch BIT and the UK BIT. We have not recorded a provision in respect of the retrospective provisions of the Income Tax Act 1961 (as amended by the Finance Act 2012) and any tax demands based upon such provisions.

Vodafone India

As part of the agreement to combine its subsidiary, Vodafone India, with Idea Cellular Limited (Idea) in India, which completed on 31 August 2018, the parties agreed: (i) Vodafone Group and Vodafone Idea would indemnify each other for certain events including in relation to breach of representations, warranties and covenants relating to Vodafone India and Idea; and (ii) a mechanism for payments between the Vodafone Group and Vodafone Idea pursuant to crystallisation of certain identified contingent liabilities and refunds relating to Vodafone India and Idea.

Other cases in the Group

Patent litigation: Spain

Vodafone Group Plc has been sued in Spain by TOT Power Control (TOT), an affiliate of Top Optimized Technologies. The claim makes a number of allegations including patent infringement, with TOT seeking over 500 million from Vodafone Group Plc as well as an injunction against using the technology in question. Vodafone's initial challenge of the appropriateness of Spain as a venue for this dispute was denied. Vodafone Group Plc appealed the denial and was partially successful. In a decision dated 30 October 2017, the court ruled that while it did have jurisdiction to hear the infringement case relating to the Spanish patent, it was not competent to hear TOT's contractual and competition law claims. This decision is subject to appeal. TOT's application for an injunction was unsuccessful and TOT is appealing. The trial commenced in September 2018.

Notes to the unaudited condensed consolidated financial statements

For the six months ended 30 September 2018

13 Commitments, contingent liabilities and legal proceedings (continued)

Italy: British Telecom (Italy) v Vodafone Italy

The Italian Competition Authority concluded an investigation in 2007 when Vodafone Italy gave certain undertakings in relation to allegations that it had abused its dominant position in the wholesale market for mobile termination. In 2010, British Telecom (Italy) brought a civil damages claim against Vodafone Italy on the basis of the Competition Authority's investigation and Vodafone Italy's undertakings. British Telecom (Italy) sought damages in the amount of 280 million for abuse of dominant position by Vodafone Italy in the wholesale fixed to mobile termination market for the period from 1999 to 2007. A court appointed expert delivered an opinion to the Court that the range of damages in the case should be in the region of 10 million to 25 million which was reduced in a further supplementary report published in September 2014 to a range of 8 million to 11 million. Judgement was handed down by the court in August 2015, awarding 12 million (including interest) to British Telecom (Italy).

British Telecom (Italy) appealed the amount of the damages to the Court of Appeal of Milan. In addition, British Telecom (Italy) has asked again for a reference to the European Court of Justice for an interpretation of the European community law on antitrust damages. Vodafone Italy also filed an appeal which was successful. British Telecom (Italy) were ordered to repay to Vodafone Italy the 12 million with interest and legal costs. BT filed an appeal to the Supreme Court in September 2018.

Italy: Telecom Italia v Vodafone Italy (TeleTu)

Telecom Italia brought civil claims against Vodafone Italy in relation to TeleTu's alleged anti-competitive retention of customers. Telecom Italia seeks damages in the amount of 101 million. The Court decided on 9 June 2015 to appoint an expert to verify whether TeleTu has put in place anticompetitive retention activities. The expert prepared a draft report with a range of damages from nil 9 million. The final hearing is set for June 2019.

Greece: Papistas Holdings SA, Mobile Trade Stores (formerly Papistas SA) and Athanasios and Loukia Papistas v Vodafone Greece, Vodafone Group Plc and certain former Directors and Officers of Vodafone

In December 2013, Mr. and Mrs. Papistas, and companies owned or controlled by them, brought three claims in the Greek court in Athens against Vodafone Greece, Vodafone Group Plc and certain Directors and officers of Vodafone Greece and Vodafone Group Plc for purported damage caused by the alleged abuse of dominance and wrongful termination of a franchise arrangement with a Papistas company. Approximately 1.0 billion of the claim is directed exclusively at two former Directors of Vodafone. The balance of the claim (approximately 285.5 million) is sought from Vodafone Greece and Vodafone Group Plc on a joint and several basis. Both cases were adjourned to a hearing in September 2018, at which the plaintiffs withdrew all of their claims against Vodafone and its Directors. Representatives of Mr and Mrs Papistas and companies owned or controlled by them have indicated an intention to file a new claim based on the same subject matter.

Netherlands: Consumer credit/handset case

In February 2016, the Dutch Supreme Court ruled on the Dutch implementation of the EU Consumer Credit Directive and instalment sales agreements (a Dutch law concept), holding that bundled all-in mobile subscription agreements (i.e. device along with mobile services) are considered consumer credit agreements. As a result, the Group, together with the industry, has been working with the Ministry of Finance and the Competition Authority on compliance requirements going forward for such offers. The ruling also has retrospective effect.

A number of small claims have been submitted by individual customers in the small claims courts. On 15 February 2018, Consumentenbond (a claims agency) initiated collective claim proceedings against VodafoneZiggo, Tele2, T-Mobile and now KPN.

South Africa: GH Investments (GHI) v Vodacom Congo

Vodacom Congo contracted with GHI to install ultra-low cost base stations on a revenue share basis. After rolling out three sites, GHI stopped and sought to renegotiate the terms. Vodacom Congo refused. GHI accused it of bad faith and infringement of intellectual property rights. In April 2015, GHI issued a formal notice for a claim of US\$1.16 billion, although there does not seem to be a proper basis nor any substantiation for the compensation claimed. The dispute was submitted to mediation under the International Chamber of Commerce. A mediator was appointed in September 2015 who convened a first meeting which took place in early November 2015. A follow-up mediation meeting was scheduled for December 2015 but was postponed without a new date having been fixed. In July 2016, Vodacom filed a request for arbitration with the International Chamber of Commerce's International Court of Arbitration. In their response GHI revised their claim down to US\$256 million. Each party has appointed an arbitrator and the arbitrators have appointed a third arbitrator to act as presiding arbitrator of the tribunal. A trial was scheduled for March 2018 but GHI failed to pay its share of the arbitration fees resulting in a decision by the Court in February 2018 that GHI's claims were considered withdrawn. In August 2018, Vodacom obtained a favourable award confirming the withdrawal of GHI's claims and ordering GHI to pay Vodacom's costs.

Notes to the unaudited condensed consolidated financial statements

For the six months ended 30 September 2018

14 Other matters

Vodacom Group

On 11 June 2018, the Group announced that Vodacom intended to support incremental broad-based BEE (black economic empowerment) and ownership in Vodacom. The transaction completed in September 2018 and, as a result, Vodacom's BEE ownership moved from Vodacom South Africa to Vodacom Group and Vodafone Group's shareholding in Vodacom will fall from 64.5% to 60.5%.

Vodafone Greece

On 11 July 2018, Vodafone announced that Vodafone-Panafon Hellenic Telecommunications Company S.A. (Vodafone Greece) had completed the acquisition of CYTA Telecommunications Hellas S.A. (CYTA Hellas), a provider of fixed and mobile telecommunication services in Greece, for a total enterprise value of 118 million.

Vodafone Spain

On 25 July 2018, Vodafone Spain acquired 90 MHz of contiguous spectrum in the 3700 MHz band for mobile data services in the Economic Ministry's auction for a total cost of 198.1 million. The fee will be paid by 20 equal annual instalments at a 2.35% interest rate.

Vodafone Hutchison Australia

On 30 August 2018, Vodafone announced that Vodafone Hutchison Australia Pty Limited (VHA) and TPG Telecom Limited (TPG) had agreed a merger to establish a new fully integrated telecommunications operator in Australia (MergeCo). Vodafone and Hutchison Telecommunications (Australia) Limited (HTAL) will each own an economic interest of 25.05% in MergeCo, with TPG shareholders owning the remaining 49.9%.

In parallel to the merger agreement, TPG and VHA have signed a separate Joint Venture Agreement. The scope of the joint venture is to acquire, hold and licence 3.6 GHz spectrum. It is anticipated that the merger will complete in 2019, subject to approval from TPG shareholders and regulatory authorities.

Vodafone Idea

On 31 August 2018, the Group completed both the agreement to combine Vodafone India with Idea Cellular to form Vodafone Idea and the separate purchase by the Aditya Birla Group of a 4.8% stake in Vodafone Idea from Vodafone Group for a total consideration of INR 26 billion (0.3 billion).

After taking these proceeds into account, there is a net cash outflow to India from Vodafone Group of INR60 billion (0.8 billion). Following completion, Vodafone owns a 45.2% stake in Vodafone Idea and Aditya Birla Group owns a 26.0% stake, both on a fully diluted basis.

Board changes

On 27 July 2018, following the Group's Annual General Meeting, Margherita Della Valle was appointed as Group Chief Financial Officer and Director of the Company, succeeding Nick Read, who at the same time was appointed as Group Chief Executive-Designate. Nick Read succeeded Vittorio Colao as Group Chief Executive Officer on 1 October 2018.

15 Subsequent events

Vodafone Italy

On 2 October 2018, the Group announced that Vodafone Italy had acquired spectrum to enable the deployment of new 5G technology for a total cost of 2.4 billion. The spectrum acquired in the auction hosted by the Ministry of Economic Development comprised:

- 3700 MHz 80 MHz for 1,685 million, available from 1 January 2019 with a licence duration of 19 years.
- 700 MHz 2 x 10 MHz FDD (Frequency Division Duplexing) for 683 million, available from July 2022 with licence duration of 15.5 years (awarded and recognised prior to 30 September 2018).
- 26 GHz 200 MHz for 33 million, available from 1 January 2019 with a licence duration of 19 years.

Bonds

In accordance with the Group's announced intention to issue hybrid bonds as part of its funding of the acquisition of Liberty Global's cable assets in Germany and Central and Eastern Europe, the Group issued bonds amounting to 4.2 billion, euro equivalent with cash received on 3 October 2018.

Board changes

On 9 November 2018, the Group announced the appointment of Sanjiv Ahuja as a Non-Executive Director with immediate effect.

INDEPENDENT REVIEW REPORT TO VODAFONE GROUP PLC

Report on the unaudited condensed consolidated financial statements

Our conclusion

We have reviewed Vodafone Group Plc's unaudited condensed consolidated financial statements (the interim financial statements) in the half-year financial report of Vodafone Group Plc for the 6 month period ended 30 September 2018. Based on our review, nothing has come to our attention that causes us to believe that the interim financial statements are not prepared, in all material respects, in accordance with International Accounting Standard 34, Interim Financial Reporting, as issued by the International Accounting Standards Board and as adopted by the European Union and the Disclosure Guidance and Transparency Rules sourcebook of the United Kingdom's Financial Conduct Authority.

What we have reviewed

The interim financial statements comprise:

- the consolidated statement of financial position as at 30 September 2018;
- the consolidated income statement and consolidated statement of comprehensive income for the period then ended;
- the consolidated statement of cash flows for the period then ended;
- the consolidated statement of changes in equity for the period then ended; and
- the explanatory notes to the interim financial statements.

The interim financial statements included in the half-year financial report have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting, as issued by the International Accounting Standards Board and as adopted by the European Union and the Disclosure Guidance and Transparency Rules sourcebook of the United Kingdom's Financial Conduct Authority.

Edgar Filing: VODAFONE GROUP PUBLIC LTD CO - Form 6-K

As disclosed in note 1 to the interim financial statements, the financial reporting framework that has been applied in the preparation of the full annual financial statements of the Group is applicable law and International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board and as adopted by the European Union.

Responsibilities for the interim financial statements and the review

Our responsibilities and those of the directors

The half-year financial report, including the interim financial statements, is the responsibility of, and has been approved by, the directors. The directors are responsible for preparing the half-year financial report in accordance with the Disclosure Guidance and Transparency Rules sourcebook of the United Kingdom's Financial Conduct Authority.

Our responsibility is to express a conclusion on the interim financial statements in the half-year financial report based on our review. This report, including the conclusion, has been prepared for and only for the company for the purpose of complying with the Disclosure Guidance and Transparency Rules sourcebook of the United Kingdom's Financial Conduct Authority and for no other purpose. We do not, in giving this conclusion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

What a review of interim financial statements involves

We conducted our review in accordance with International Standard on Review Engagements (UK and Ireland) 2410, *Review of Interim Financial Information Performed by the Independent Auditor of the Entity* issued by the Auditing Practices Board for use in the United Kingdom. A review of interim financial information consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures.

A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing (UK) and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

We have read the other information contained in the half-year financial report and considered whether it contains any apparent misstatements or material inconsistencies with the information in the interim financial statements.

PricewaterhouseCoopers LLP

13 November 2018

Notes:

1. The maintenance and integrity of the Vodafone Group Plc website is the responsibility of the directors; the work carried out by the auditors does not involve consideration of these matters and, accordingly, the auditors accept no responsibility for any changes that may have occurred to the interim financial statements since they were initially presented on the website.
2. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

ALTERNATIVE PERFORMANCE MEASURES

In the discussion of the Group's reported operating results, alternative performance measures are presented to provide readers with additional financial information that is regularly reviewed by management. However, this additional information presented is not uniformly defined by all companies including those in the Group's industry. Accordingly, it may not be comparable with similarly titled measures and disclosures by other companies. Additionally, certain information presented is derived from amounts calculated in accordance with IFRS but is not itself an expressly permitted GAAP measure. Such measures should not be viewed in isolation or as an alternative to the equivalent GAAP measure.

Further information on the use of alternative performance measures is outlined on pages 207 to 217 of the Group's annual report for the financial year ended 31 March 2018.

IFRS 15 basis and IAS 18 basis

Following the adoption of IFRS 15 *Revenue from Contracts with Customers* on 1 April 2018, the Group's statutory results for the six months ended 30 September 2018 are on an IFRS 15 basis, whereas the statutory results for the six months ended 30 September 2017 are on an IAS 18 basis as previously reported, with any comparison between the two bases of reporting not being meaningful. As a result, the discussion of our operating results in the Financial Results section is primarily performed on an IAS 18 basis for all periods presented.

We believe that the IAS 18 basis metrics for the six months ended 30 September 2018, which are not intended to be a substitute for, or superior to, our reported metrics on an IFRS 15 basis, provide useful information to allow comparable growth rates to be calculated. The impact of the adoption of IFRS 15 on key financial information for the six months ended 30 September 2018, and a reconciliation of these financial measures as presented on an IAS 18 basis to their closest respective GAAP measures, is set out in note 1 *Basis of Preparation* to the unaudited condensed consolidated financial statements beginning on page 26.

Service revenue

Service revenue comprises all revenue related to the provision of ongoing services including, but not limited to, monthly access charges, airtime usage, roaming, incoming and outgoing network usage by non-Vodafone customers, interconnect charges for incoming calls and, with effect from 1 April 2018, excludes international wholesale voice transit revenues. We believe that it is both useful and necessary to report this measure for the following reasons:

- It is used for internal performance reporting;
- It is used in setting director and management remuneration; and

- It is useful in connection with discussion with the investment analyst community.

A reconciliation of reported service revenue to the respective closest equivalent GAAP measure, revenue, are provided in the section Financial results beginning on page 7.

Adjusted EBITDA

Adjusted EBITDA is operating profit excluding share of results in associates and joint ventures, depreciation and amortisation, gains/losses on the disposal of fixed assets, impairment losses, restructuring costs arising from discrete restructuring plans, other operating income and expense and significant items that are not considered by management to be reflective of the underlying performance of the Group. We use adjusted EBITDA, in conjunction with other GAAP and non-GAAP financial measures such as adjusted EBIT, adjusted operating profit, operating profit and net profit, to assess our operating performance. We believe that adjusted EBITDA is an operating performance measure, not a liquidity measure, as it includes non-cash changes in working capital and is reviewed by the Chief Executive to assess internal performance in conjunction with adjusted EBITDA margin, which is an alternative sales margin figure. We believe it is both useful and necessary to report adjusted EBITDA as a performance measure as it enhances the comparability of profit across segments.

Because adjusted EBITDA does not take into account certain items that affect operations and performance, adjusted EBITDA has inherent limitations as a performance measure. To compensate for these limitations, we analyse adjusted EBITDA in conjunction with other GAAP and non-GAAP operating performance measures. Adjusted EBITDA should not be considered in isolation or as a substitute for a GAAP measure of operating performance.

A reconciliation of adjusted EBITDA to the closest equivalent GAAP measure, operating profit, is provided in the section Financial results beginning on page 7.

ALTERNATIVE PERFORMANCE MEASURES

Group adjusted EBIT, adjusted operating profit and adjusted earnings per share

Group adjusted EBIT and adjusted operating profit exclude impairment losses, restructuring costs arising from discrete restructuring plans, amortisation of customer bases and brand intangible assets, other operating income and expense and other significant one-off items. Adjusted EBIT also excludes the share of results in associates and joint ventures. Adjusted earnings per share also excludes certain foreign exchange rate differences, together with related tax effects.

We believe that it is both useful and necessary to report these measures for the following reasons:

- These measures are used for internal performance reporting;
- These measures are used in setting director and management remuneration; and
- They are useful in connection with discussion with the investment analyst community and debt rating agencies.

Reconciliations of adjusted EBIT, adjusted operating profit and adjusted earnings per share to the respective closest equivalent GAAP measures, operating profit and basic earnings per share, respectively, are provided in the section **Financial results** beginning on page 7.

Cash flow measures and capital additions

In presenting and discussing our reported results, free cash flow (pre-spectrum), free cash flow, capital additions and operating free cash flow are calculated and presented even though these measures are not recognised within IFRS. We believe that it is both useful and necessary to communicate free cash flow to investors and other interested parties, for the following reasons:

- Free cash flow (pre-spectrum) and free cash flow allows us and external parties to evaluate our liquidity and the cash generated by our operations. Free cash flow (pre-spectrum) and capital additions do not include payments for licences and spectrum included within intangible assets, items determined independently of the ongoing business, such as the level of dividends, and items which are deemed discretionary, such as cash flows relating to acquisitions and disposals or financing activities. In addition, it

does not necessarily reflect the amounts which we have an obligation to incur. However, it does reflect the cash available for such discretionary activities, to strengthen the consolidated statement of financial position or to provide returns to shareholders in the form of dividends or share purchases;

- Free cash flow facilitates comparability of results with other companies, although our measure of free cash flow may not be directly comparable to similarly titled measures used by other companies;
- These measures are used by management for planning, reporting and incentive purposes; and
- These measures are useful in connection with discussion with the investment analyst community and debt rating agencies.

A reconciliation of cash generated by operations, the closest equivalent GAAP measure, to operating free cash flow, free cash flow (pre-spectrum) and free cash flow, is provided below.

	Six months ended 30 September	
	2018	2017
	m	m
Net cash flow from operating activities	4,826	5,821

ALTERNATIVE PERFORMANCE MEASURES**Other**

A summary of certain other alternative performance measures included in this results announcement, together with details of where additional information and reconciliation to the nearest equivalent GAAP measure can be found, is shown below.

Alternative performance measure	Closest equivalent GAAP measure	Location in this results announcement of reconciliation and further information
Adjusted profit before tax	Profit before taxation	Taxation on page 16
Adjusted effective tax rate	Income tax expense as a percentage of profit before taxation	Taxation on page 16
Adjusted income tax expense	Income tax expense	Taxation on page 16
Adjusted profit attributable to owners of the parent	Profit attributable to owners of the parent	Earnings per share on page 17

Certain of the statements within the section titled **Chief Executive's Statement** on pages 2 to 5 contain forward-looking alternative performance measures for which at this time there is no comparable GAAP measure and which at this time cannot be quantitatively reconciled to comparable GAAP financial information. Certain of the statements within the section titled **Guidance** on page 6 contain forward-looking alternative performance measures which at this time cannot be quantitatively reconciled to comparable GAAP financial information.

Organic growth and change at constant exchange rates

All amounts in this document marked with an * represent **organic growth**, which presents performance on a comparable basis in terms of merger and acquisition activity and foreign exchange rates. **Change at constant exchange rates** presents performance on a comparable basis in terms of foreign exchange rates only. Whilst neither of these measures are intended to be a substitute for reported growth, nor are they superior to reported growth, we believe that these measures provide useful and necessary information to investors and other interested parties for the following reasons:

- They provide additional information on underlying growth of the business without the effect of certain factors unrelated to its operating performance;
- They are used for internal performance analysis; and
- They facilitate comparability of underlying growth with other companies (although the term **organic** is not a defined term under IFRS and may not, therefore, be comparable with similarly titled measures reported by other companies).

The Group's organic growth rates for all periods exclude the results of Vodafone India (excluding its 42% stake in Indus Towers) which were reported in discontinued operations and the results of Vodafone Qatar following its disposal in the 2018 financial year. In addition, operating segment organic service revenue growth rates for all quarters have been amended to exclude the impact of changes to intercompany interconnect rates and the impact of excluding international wholesale voice transit revenues from service revenue with effect from 1 April 2018.

We have not provided a comparative in respect of organic growth rates as the current rates describe the change between the beginning and end of the current period, with such changes being explained by the commentary in this news release. If comparatives were provided, significant sections of the commentary from the news release for prior periods would also need to be included, reducing the usefulness and transparency of this document.

Reconciliations of organic growth to reported growth are shown where used or in the tables below.
