INFORMATION TO BE INCLUDED IN REPORT

Item 2.02. Results of Operations and Financial Condition

On October 21, 2007, registrant issued a press release entitled “Halliburton Announces Third Quarter Earnings of \$0.79 Per Diluted Share.”

The text of the Press Release is as follows:

**HALLIBURTON ANNOUNCES THIRD QUARTER EARNINGS
OF \$0.79 PER DILUTED SHARE**

HOUSTON, Texas– Halliburton (NYSE:HAL) announced today that net income for the third quarter of 2007 was \$727 million, or \$0.79 per diluted share. This compares to net income of \$611 million, or \$0.58 per diluted share, in the third quarter of 2006. Included in third quarter 2007 results are a \$133 million, or \$0.15 per diluted share, favorable income tax impact from the ability to recognize United States foreign tax credits that were previously assumed would not be fully utilizable and \$21 million, or \$0.02 per diluted share, in after-tax charges for additional reserves related to environmental matters. Income from continuing operations in the third quarter of 2007 was \$726 million, or \$0.79 per diluted share, compared to \$603 million, or \$0.57 per diluted share in the third quarter of 2006.

Halliburton’s consolidated revenue in the third quarter of 2007 was \$3.9 billion, up 16% from the third quarter of 2006. This increase was attributable to increased worldwide activity, particularly in the Eastern Hemisphere.

Consolidated operating income was \$910 million in the third quarter of 2007 compared to \$870 million in the third quarter of 2006. The increase in operating income was generated primarily by increased customer activity and new international contracts. Third quarter of 2007 operating income included \$32 million in charges for additional reserves primarily related to Dresser legacy environmental matters.

“I am pleased with the continuing very strong performance of our Eastern Hemisphere operations this quarter,” said Dave Lesar, chairman, president, and chief executive officer. “Our deployment of capital into these international markets has resulted in Eastern Hemisphere revenue growth of 29% and operating income growth of 40% as compared to the third quarter of 2006. Our sequential Eastern Hemisphere results were also strong with revenue increasing 5% and operating income increasing 16%. Our Eastern Hemisphere operating margins improved to 24%. North America posted record third quarter 2007 quarterly revenue, and we are experiencing strong demand for our services in the United States land market. Our North America revenue grew 6% sequentially despite the loss of two weeks of work in the Gulf of Mexico due to storms and pricing declines for some services in the United States land market.”

Halliburton/Page 2

As a result of Halliburton's organizational restructuring during the third quarter of 2007, the company is now reporting two operating segments: the Completion and Production (C&P) segment and the Drilling and Evaluation (D&E) segment. The Completion and Production segment is comprised of completion tools, production enhancement, and cementing. The Drilling and Evaluation segment is comprised of Sperry Drilling Services, wireline and perforating services, Security DBS Drill Bits, Baroid Fluid Services, Landmark, and project management. Additionally, certain amounts were reclassified between the segments/regions and Corporate and Other. All prior periods have been reclassified to conform to the new segment presentation.

2007 Third Quarter Results

Completion and Production operating income in the third quarter of 2007 was \$596 million, an increase of \$32 million or 6% from the third quarter of 2006. Europe/Africa/CIS C&P operating income increased 39% from completion tools deliveries to large offshore projects in West Africa. Cementing results were also favorable, particularly in the North Sea, as a result of better pricing, increased activity, and a more profitable product mix. Production enhancement results improved throughout the region, with increased profitability in offshore activity. Middle East/Asia C&P operating income increased 66% with higher completion tools sales in Asia and increased activity and more favorable job mix for production enhancement. North America C&P operating income decreased 6% due to reduced activity in Canada.

Drilling and Evaluation operating income in the third quarter of 2007 was \$372 million, essentially flat over the prior year third quarter due primarily to \$24 million for environmental charges and decreased activity in Canada and the Gulf of Mexico, partially offset by improved activity and increased horizontal drilling in the United States land market. Europe/Africa/CIS D&E operating income increased 60%, benefiting from increased deepwater application of Sperry Drilling Services Pilot® fleet of tools in the North Sea and expansion of directional drilling in Russia. Also benefiting Europe/Africa/CIS D&E was increased Baroid Fluid Services sales in the North Sea and the introduction of the Security DBS Drill Bits XR™ Reamer hole enlargement tool. Middle East/Asia D&E operating income increased 11% with improved wireline and perforating services and increased demand for Sperry Drilling Services in Asia. Latin America D&E operating income increased 7% on improved activity for wireline and perforating services.

During the third quarter of 2007, under the company's share repurchase program, Halliburton purchased approximately 11 million shares at an average price of \$33.71 for a total cost of approximately \$374 million. Since the inception of the program, Halliburton has purchased 77 million shares for a total cost of approximately \$2.6 billion. There is approximately \$2.4 billion remaining under the program.

Halliburton/Page 3

Technology and Significant Achievements

Halliburton made a number of advances in technology and growth.

- Halliburton closed the previously announced acquisition of the entire share capital of PSL Energy Services Limited (PSLES). PSLES is a leading Eastern Hemisphere provider of process, pipeline, and well intervention services, including flange management and bolting, leak testing, pre-commissioning services, hydrotesting, hydraulic workover, coiled tubing, slickline and wireline, and pumping services. PSLES has operational bases in the United Kingdom, Norway, Middle East, Azerbaijan, Algeria, and Asia Pacific.
- Halliburton's Completion and Production segment has been awarded a four-year contract valued at more than \$270 million by Petrobras. Halliburton will be working jointly with Expro to provide exploration and development testing services in high pressure/high temperature deepwater environments.
- Halliburton announced the delivery of three new screen solutions for sand control. These innovative solutions are: the EquiFlow™ Oil Selector™ valve, which is capable of significantly reducing unwanted water or gas production without wellbore intervention; EquiFlow™ inflow control devices, which delay early water or gas coning, thereby increasing recoverable reserves; and PetroGuard™ Advanced Mesh screen, which provides reliable sand control in heavy oil and poorly sorted sand environments.
- Landmark has acquired the intellectual property and substantially all of the assets and existing business of GeoSmith Consulting Group, LLC of Minnetonka, Minnesota. GeoSmith is widely regarded as one of the E&P industry's most innovative developers of software components for 3-D interpretation and geometric modeling applications, including robust topology engines capable of representing subsurface geology.

Halliburton/Page 4

Founded in 1919, Halliburton is one of the world's largest providers of products and services to the energy industry.

With nearly 50,000 employees in approximately 70 countries, the company serves the upstream oil and gas industry throughout the lifecycle of the reservoir – from locating hydrocarbons and managing geological data, to drilling and formation evaluation, well construction and completion, and optimizing production through the life of the field. Visit the company's World Wide Web site at www.halliburton.com.

NOTE: The statements in this press release that are not historical statements, including statements regarding future financial performance, are forward-looking statements within the meaning of the federal securities laws. These statements are subject to numerous risks and uncertainties, many of which are beyond the company's control, which could cause actual results to differ materially from the results expressed or implied by the statements. These risks and uncertainties include, but are not limited to: consequences of audits and investigations by domestic and foreign government agencies and legislative bodies and related publicity; potential adverse proceedings by such agencies; protection of intellectual property rights; compliance with environmental laws; changes in government regulations and regulatory requirements, particularly those related to radioactive sources, explosives, and chemicals; compliance with laws related to income taxes and assumptions regarding the generation of future taxable income; unsettled political conditions, war, and the effects of terrorism, foreign operations, and foreign exchange rates and controls; weather-related issues including the effects of hurricanes and tropical storms; changes in capital spending by customers; changes in the demand for or price of oil and/or natural gas; impairment of oil and gas properties; structural changes in the oil and natural gas industry; increased competition for employees; availability of raw materials; and integration of acquired businesses and operations of joint ventures. Halliburton's Form 10-K for the year ended December 31, 2006, Form 10-Q for the period ended June 30, 2007, recent Current Reports on Form 8-K, and other Securities and Exchange Commission filings discuss some of the important risk factors identified that may affect the business, results of operations, and financial condition. Halliburton undertakes no obligation to revise or update publicly any forward-looking statements for any reason.
