PART I

Item 1. Business.

(a) General Development of Business

CLARCOR Inc. (CLARCOR) was organized in 1904 as an Illinois corporation and in 1969 was reincorporated in the State of Delaware. As used herein, the Company and terms such as we or our refers to CLARCOR and its subsidiaries unless the context otherwise requires.

The Company's fiscal year ends on the Saturday closest to November 30. For fiscal year 2009, the year ended on November 28, 2009 and included 52 weeks. For fiscal year 2008, the year ended on November 29, 2008 and included 52 weeks. For fiscal year 2007, the year ended December 1, 2007 and included 52 weeks. In this 2009 Annual Report on Form 10-K (2009 Form 10-K), all references to fiscal years are shown to begin on December 1 and end on November 30 for clarity of presentation.

Certain Significant Developments

Acquisitions

As reported in our previous SEC filings, the Company completed the following six acquisitions during fiscal year 2009.

On December 29, 2008 (which is part of fiscal year 2009), the Company purchased the Keddeg Company, a manufacturer of aerospace filtration products based in Lenexa, Kansas. The purchase price was approximately \$5,570,000 excluding cash acquired and including acquisition costs. The business is included in the Industrial/Environmental Filtration segment from the date of acquisition.

On January 16, 2009, the Company purchased certain assets of Meggitt (UK) Limited (Meggitt), for approximately \$578,000. The Company expects to make an additional payment in 2010 of approximately \$146,000 to the former owner of the Meggitt assets contingent upon the renewal of a contract with a customer. This business was acquired to expand the Company's product range of aerospace filters sold primarily to European aircraft manufacturers and aerospace parts distributors. The business is included in the Industrial/Environmental Filtration segment from the date of acquisition.

On February 1, 2009, the Company purchased an 85% ownership interest in Pujiang Novaeastern International Mesh Co., Ltd. (Pujiang) and Quzhou Chinagrace Filter Co., Ltd. (Quzhou). Both companies are based in China and were under common ownership. Pujiang and Quzhou are manufacturers of wire mesh filtration products sold primarily to the fibers, resin and aerospace industries. The combined purchase price for the ownership interests in both companies was approximately \$618,000. The Company has the right, but not the obligation, to purchase the remaining 15% ownership interest using a formula based on the combined companies' future operating results. The businesses are included in the Industrial/Environmental Filtration segment from the date of acquisition.

On April 6, 2009, the Company purchased Weifang Yuhua Filters Ltd. (Yuhua), based in Weifang, China for approximately \$643,000. Yuhua manufactures heavy-duty engine filters. The business is included in the Engine/Mobile Filtration segment from the date of acquisition.

On April 20, 2009, the Company purchased the remaining 20% minority interest in its consolidated subsidiary based in Weifang, China for approximately \$4,592,000. This subsidiary is part of the Company's Engine/Mobile Filtration segment and manufactures heavy-duty engine filters, certain lines of environmental filters and filter systems and filters used in off-shore oil drilling.

HVAC Production Restructuring (CLC Air)

In July 2006, the Company announced a major restructuring of its heating, ventilating and air conditioning (HVAC) production at CLARCOR Air Filtration Products, Inc. (CLC Air) within its Industrial/Environmental Filtration segment. This restructuring was substantially completed in fiscal year 2009. This restructuring is anticipated to cost approximately \$26 million in capital investment and expense over four years, (substantially all of which had been incurred by the end of fiscal year 2009) and result in a \$14 million annual increase in operating profits of the Company's Industrial/Environmental Filtration segment by the end of fiscal year 2010. The Company hopes to achieve these profit increases by the end of 2010 by more fully

TABLE OF CONTENTS

automating its HVAC filter production processes and more rationally locating its production facilities throughout the United States. As part of this restructuring, the Company closed one CLC Air plant in North Carolina and one plant in Iowa during fiscal year 2008 and in fiscal year 2009 closed a small plant in Clover, South Carolina and consolidated four Louisville, Kentucky area facilities into one location in Jeffersonville, Indiana. The Company expects continued progress in executing the restructuring program as the CLC Air facilities receive and install new equipment, improve production processes and train their employees.

Residential HVAC

As disclosed in our quarterly report on Form 10-Q filed on September 18, 2009, we ceased supplying residential HVAC filters to 3M Company (3M) during fiscal year 2009 and launched our own retail initiative for residential HVAC filters under our Purolator® brand. In early 2009, a large national retailer agreed to offer our products in approximately 120 of its stores in the Southeastern United States on a trial basis. Although we believe the test went well and that we exceeded all applicable targets for price, delivery and quality, we were ultimately unable to displace the incumbent supplier. Nonetheless, we are continuing to develop our retail HVAC business and are optimistic about our prospects in this area.

(b) Financial Information About Industry Segments

During fiscal year 2009, the Company conducted business in three principal industry segments: (1) Engine/Mobile Filtration, (2) Industrial/Environmental Filtration and (3) Packaging. These segments are discussed in greater detail below. Financial information for each of the Company's business segments for the fiscal years 2007 through 2009 is included in Note P to Notes to Consolidated Financial Statements. See pages F-34 through F-36 in this 2009 Form 10-K.

(c) Narrative Description of the Business

Engine/Mobile Filtration

The Company's Engine/Mobile Filtration segment sells filtration products used on engines and in mobile equipment applications, including trucks, automobiles, buses and locomotives, and marine, construction, industrial, mining and agricultural equipment. The segment's filters are sold throughout the world, primarily in the replacement market. In addition, some first-fit filters are sold to original equipment manufacturers. At one of the Engine/Mobile Filtration segment plants, the Company also manufactures dust collection cartridges, including cartridges incorporating the Company's Protura® nanofiber filtration media. These cartridges are used in environmental filtration applications.

The products in the Engine/Mobile Filtration segment include a full line of oil, air, fuel, coolant, transmission and hydraulic fluid filters which are used in a wide variety of applications and in processes where filter efficiency, reliability and durability are essential. Most of these applications involve a process where impure air or fluid flows through semi-porous paper, corrugated paper, cotton, synthetic, chemical or membrane filter media with varying filtration efficiency characteristics. The impurities contained on the media are disposed of when the filter is changed.

The Company's sale of filtration products for use in automobiles occurs exclusively in the replacement market (i.e., the Company does not sell first-fit automotive filters to automobile manufacturers). The Company does provide filtration products and services directly to automobile manufacturers for use in their manufacturing facilities but not for use in the vehicles that are manufactured in these facilities. A decrease or complete loss of the Company's sales directly to automobile manufacturers for use in their manufacturing facilities would not be expected to have a material effect on

the Company's financial performance.

Industrial/Environmental Filtration

The Company's Industrial/Environmental Filtration segment centers around the manufacturing and marketing of filtration products used in industrial and commercial processes, and in buildings and infrastructures of various types. The segment's products are sold throughout the world, and include liquid process filtration products and air filtration products and systems used to maintain high interior air quality and to control exterior pollution.

2

TABLE OF CONTENTS

The segment's liquid process filtration products include specialty industrial process liquid filters; filters for pharmaceutical processes and beverages; filtration systems, filters and coalescers for the oil and natural gas industry; filtration systems for aircraft refueling, anti-pollution, sewage treatment and water recycling; bilge water separators; sand control filters for oil and gas drilling; and woven wire and metallic products for filtration of plastics and polymer fibers. These filters use a variety of string wound, meltblown, and porous and sintered and non-sintered metal media, woven wire, and absorbent media.

The segment's air filtration products represent a complete line of air filters and cleaners, including antimicrobial treated filters and high efficiency electronic air cleaners. These products are used in commercial buildings, hospitals, factories, residential buildings, paint spray booths, gas turbine systems, medical facilities, motor vehicle cabins, aircraft cabins, clean rooms, compressors and dust collector systems.

Packaging

The Company's consumer and industrial packaging products business is conducted by a wholly-owned subsidiary, J.L. Clark, Inc. (J.L. Clark).

J.L. Clark manufactures a wide variety of different types and sizes of containers and packaging specialties. Metal, plastic and combination metal/plastic containers and closures manufactured by the Company are used in packaging a wide variety of dry and paste form products, such as food specialties (e.g., tea, coffee, spices, cookies, candy, mints and other confections); tobacco products; toiletries; playing cards; cosmetics and pharmaceuticals. Other packaging products include shells for dry batteries, canisters for film and candles, spools for insulated and fine wire, and custom decorated flat metal sheets.

Containers and packaging specialties are manufactured only upon orders received from customers, and individualized containers and packaging specialties are designed and manufactured, usually with distinctive decoration, to meet each customer's marketing and packaging requirements and specifications.

Distribution

Products in both the Engine/Mobile Filtration and Industrial/Environmental Filtration segments are sold primarily through a combination of independent distributors, dealers for original equipment manufacturers, retail stores and directly to end-use customers such as truck and equipment fleet users, manufacturing companies and contractors. In addition, both segments distribute products worldwide through their respective foreign subsidiaries and through export sales from the United States to end-use customers.

In the Packaging segment, J.L. Clark uses an internal sales force and sells its products directly to customers for containers and packaging specialties. Each salesperson is trained in J.L. Clark's manufacturing processes with respect to the products sold and to consult with customers and prospective customers concerning the details of their particular requirements. In addition, salespersons with expertise in specific areas, such as flat-sheet decorating, are focused on specific customers and markets.

Financial information related to the geographic areas in which the Company operates and sells its products is included in Note P to Notes to Consolidated Financial Statements. See pages F-34 through F-36 in this 2009 Form 10-K.

Class of Products

No class of similar products accounted for 10% or more of the total sales of the Company in any of the Company's last three fiscal years.

Raw Materials

The primary raw materials the Company uses to manufacture its products include various types of steel, adhesives, plastic and paper products and filter medias made from materials such as wood pulps, metals, polyester and other synthetic fibers, fiberglass and cotton. All of these are purchased and are available from a variety of sources. The Company experienced price volatility again in fiscal year 2009, although the volatility was not as severe as fiscal year 2008. During the first quarter of fiscal year 2009, many raw material prices were lower than at any time in fiscal year 2008. However, raw material prices increased significantly beginning in the third and fourth quarter of fiscal year 2009. The Company was able to procure adequate supplies of raw materials throughout fiscal year 2009 and does not anticipate procurement problems in 2010.

TABLE OF CONTENTS

Patents, Trademarks and Trade names

Certain features of some of the Company's products are covered by domestic and, in some cases, foreign patents or patent applications. While these patents are valuable and important for certain products, the Company does not believe that its competitive position is dependent upon patent protection, although as discussed under the heading of Risk Factors, the Company believes that patent-related litigation may become more commonplace across all of its business segments, particularly with respect to its engine aftermarket business.

With respect to trademarks and trade names, the Company believes that the trademarks and trade names it uses in connection with certain products (such as Baldwin, Purolator, Peco and Facet) are valuable and significant to its business.

Seasonality

In general, the Company's products and service offerings are not seasonal in nature, although certain of our operating companies in all our segments experience modest seasonal increases and decreases with respect to products and services supplied to particular end-use customers or industries. These shifts are normally not material to the Company on a consolidated basis.

Customers

The largest 10 customers of the Engine/Mobile Filtration segment accounted for 25% of the approximately \$373,295,000 of fiscal year 2009 sales of such segment.

The largest 10 customers of the Industrial/Environmental Filtration segment accounted for 10% of the approximately \$461,000,000 of fiscal year 2009 sales of such segment.

The largest 10 customers of the Packaging segment accounted for 73% of the approximately \$73,453,000 of fiscal year 2009 sales of such segment.

No single customer accounted for 10% or more of the Company's consolidated fiscal year 2009 sales.

Backlog

At November 30, 2009, the Company had a backlog of firm orders for products of approximately \$109,653,000. The backlog figure for November 30, 2008 was approximately \$116,972,000. Substantially all of the orders on hand at November 30, 2009 are expected to be filled during fiscal year 2010. The Company does not view its backlog as being insufficient, excessive or problematic, or a significant indication of fiscal year 2010 sales.

Competition

The Company encounters strong competition in the sale of all of its products. The Company competes in a number of filtration markets against a variety of competitors. The Company is unable to state its relative competitive position in all of these markets due to a lack of reliable industry-wide data. However, in the replacement market for heavy-duty liquid and air filters used in internal combustion engines, the Company believes that it is among the top five

companies worldwide measured by annual sales. In addition, the Company believes that it is a leading manufacturer of liquid and air filters for diesel locomotives. The Company believes that for industrial and environmental filtration products, it is among the top ten companies worldwide measured by annual sales, and is a market leader with respect to filtration products used in the oil and gas industries.

In the Packaging segment, the Company's principal competitors include several manufacturers that often compete on a regional basis only and whose specialty packaging segments are smaller than the Company's. Strong competition is also presented by manufacturers of paper, plastic and glass containers. The Company's competitors generally manufacture and sell a wide variety of products in addition to packaging products of the type produced by the Company and do not publish separate sales figures relative to these competitive products. Consequently, the Company is unable to state its relative competitive position in those markets.

The Company believes that it is able to maintain its competitive position because of the quality and breadth of its products and services and the broad geographic scope of its operations. The Company's products primarily compete on the basis of price, performance, speed of delivery, quality and customer support.

TABLE OF CONTENTS

Product Development

The Company develops products on its own and in consultation or partnership with its customers. In addition to product testing and development that occurs at the Company's various subsidiaries, the Company maintains the CLARCOR Filtration Research Center, a standalone research and development center in Forrest Park, Ohio (CFRC).

The Company's laboratories, including the CFRC, test product components and completed products to insure high-quality manufacturing results, evaluate competitive products, aid suppliers in the development of product components, and conduct controlled tests of newly designed filters, filtration systems and packaging products for particular uses. Product development is concerned with the improvement and creation of new filters and filtration media, filtration systems, containers and packaging products in order to increase their performance characteristics, broaden their respective uses and counteract obsolescence.

In fiscal year 2009, the Company employed approximately 89 professional employees, including 4 at the CFRC, on either a full-time or part-time basis on research activities relating to the development of new products or the improvement or redesign of its existing products. During this period the Company spent approximately \$9,595,000 on such activities as compared with \$9,343,000 for fiscal year 2008 and \$8,996,000 for fiscal year 2007.

Environmental Factors

The Company is not aware of any facts which would cause it to believe that it is in material violation of existing applicable standards with respect to emissions to the atmosphere, discharges to waters, or treatment, storage and disposal of solid or hazardous wastes.

The Company is party to various proceedings relating to environmental issues. The U.S. Environmental Protection Agency and/or other responsible state agencies have designated the Company as a potentially responsible party (PRP), along with other companies, in remedial activities for the cleanup of waste sites under the federal Superfund statute.

Although it is not certain what future environmental claims, if any, may be asserted, the Company currently believes that its potential liability for known environmental matters does not exceed its present accrual of \$50,000. However, environmental and related remediation costs are difficult to quantify for a number of reasons, including the number of parties involved, the difficulty in determining the extent of the contamination, the length of time remediation may require, the complexity of environmental regulation and the continuing advancement of remediation technology. Applicable federal law may impose joint and several liability on each PRP for the cleanup of a contaminated site.

The Company does anticipate, however, that it may be required to install additional pollution control equipment to augment or replace existing equipment in the future in order to meet applicable environmental standards. The Company is presently unable to predict the timing or the cost of any project of this nature and cannot give any assurance that the cost of such projects may not have a material adverse effect on earnings. However, the Company is not aware, at this time, of any other additional significant current or pending requirements to install such equipment at any of its facilities.

Employees

As of November 30, 2009, the Company had approximately 4,958 employees.

(d) Financial Information About Foreign and Domestic Operations and Export Sales

Financial information relating to export sales and the Company's operations in the United States and other countries is included in Note P to Notes to Consolidated Financial Statements. As noted therein, total international sales for the Company in fiscal year 2009 were \$273,691,000. See page F-36 in this 2009 Form 10-K. In addition, see Item 1A Risk Factors below for a discussion of certain risks of foreign operations.

TABLE OF CONTENTS

(e) Available Information

The Company's Internet address is www.clarcor.com. The Company makes available, free of charge, on this website, its annual report on Form 10-K, its quarterly reports on Form 10-Q, its current reports on Form 8-K and amendments to such reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (the Exchange Act), as soon as reasonably practicable after such forms are electronically filed with, or furnished to, the Securities and Exchange Commission (SEC). In addition, the following corporate governance documents can be found on this website: (a) charters for the Audit Committee, the Director Affairs/Corporate Governance Committee and the Compensation Committee of the Board of Directors; (b) Corporate Conduct Guidelines; (c) Code of Ethics for Senior Financial Officers, which includes the Chief Executive Officer; (d) Corporate Governance Guidelines; (e) Disclosure Controls and Procedures; (f) Procedures Regarding Reports of Misconduct or Alleged Misconduct; (g) the Company's By-Laws; (h) Instructions for Communication with Directors, and (i) Insider Trading Policy. Copies of all of these documents can also be obtained, free of charge, upon written request to the Corporate Secretary, CLARCOR Inc., 840 Crescent Centre Drive, Suite 600, Franklin, TN 37067. The information contained on the Company's website is not incorporated herein or otherwise considered to be a part of this 2009 Form 10-K.

The public may read and copy any materials that the Company files with the SEC at the SEC's Public Reference Room at 450 Fifth Street, N.E., Washington D.C. 20549. Information regarding the SEC's Public Reference Room can be obtained by calling the SEC at 1-800-SEC-0330. The SEC also maintains an Internet site that contains reports, proxy, information statements and other information and can be found at www.sec.gov.

TABLE OF CONTENTS

Item 1A.

Risk Factors.

Our business faces a variety of risks. These risks include those described below and may include additional risks and uncertainties not presently known to us or that we currently deem immaterial. If any of the events or circumstances described in the following risk factors occur, our business, financial condition or results of operations may suffer, and the trading price of our common stock could decline. These risk factors should be read in conjunction with the other information in this 2009 Form 10-K.

Our business is affected by the health of the markets we serve.

Our financial performance depends, in large part, on varying conditions in the markets that we serve, particularly the general industrial and trucking markets. Demand in these markets fluctuates in response to overall economic conditions and is particularly sensitive to changes in fuel costs, although the replacement nature of our products helps mitigate the effects of these changes. In addition, a continued general economic downturn may have an adverse effect on sales of more expensive filtration systems and products, such as capital equipment sold by Perry Equipment Corporation (which may be affected by a decrease in the cost of oil and natural gas), United Air Specialists and our Facet companies. A continued economic downturn in the markets we serve may result in reductions in sales and pricing of our products, which could reduce future earnings and cash flow.

Adverse macroeconomic and business conditions may significantly and negatively affect our revenues, profitability and results of operations.

Economic conditions in the United States and in foreign markets in which we operate could substantially affect our sales and profitability. Economic activity in the United States and throughout much of the world remains depressed following the recent housing downturn and subprime lending collapse. Global credit and capital markets have experienced unprecedented volatility and disruption. Business credit and liquidity continues to be tight in much of the world. Some of our suppliers and customers are facing credit issues and could experience cash flow problems and other financial hardships. Consumer confidence and spending are down significantly.

Recent changes in governmental banking, monetary and fiscal policies to restore liquidity and increase credit availability may not be effective. It is difficult to determine the breadth and duration of the economic and financial market problems and the many ways in which such problems may continue to affect our suppliers, customers and our business in general. Nonetheless, continuation or worsening of these difficult financial and macroeconomic conditions could have a significant adverse effect on our sales, profitability and results of operations.

Our access to borrowing capacity could be affected by the uncertainty impacting credit markets generally.

As a result of current economic conditions, credit markets continue to be tight such that the ability to obtain new capital has become more challenging and more expensive in comparison to recent years. In addition, several large financial institutions have either recently failed or been dependent on the assistance of the U.S. federal government to continue to operate as a going concern. Although we believe that the banks under our credit facility have adequate capital and resources, we can provide no assurance that all of these banks will continue to operate as a going concern in the future. If any of the banks in the lending group of our credit facility were to fail, it is possible that the borrowing capacity under our credit facility would be reduced. In the event that the availability under our credit facility were reduced significantly, we could be required to obtain capital from alternate sources in order to finance our capital needs. Our options for addressing such capital constraints would include, but not be limited to (i) obtaining

commitments from the remaining banks in the lending group or from new banks to fund increased amounts under the terms of our credit facility, (ii) accessing the public capital markets, or (iii) delaying certain of our existing development projects. If it became necessary to access additional capital, it is likely that any such alternatives in the current market would be on terms less favorable than under our existing credit facility terms, which could have a material effect on our consolidated financial position, results of operations, or cash flows.

Our manufacturing operations are dependent upon third-party suppliers.

We obtain materials and manufactured components from third-party suppliers. Although the majority of these materials and components can be obtained from multiple sources, and while we historically have not suffered any significant limitations on our ability to procure them, any delay in our suppliers' abilities to provide

TABLE OF CONTENTS

us with necessary materials and components may affect our capabilities at a number of our manufacturing locations.

Delays in obtaining supplies may result from a number of factors affecting our suppliers, including capacity constraints, labor disputes, the impaired financial condition of a particular supplier, suppliers' allocations to other purchasers, weather emergencies or acts of war or terrorism. Any delay in receiving supplies could impair our ability to deliver products to our customers and, accordingly, could have a material adverse effect on our business, results of operations and financial condition.

We could be adversely impacted by environmental laws and regulations.

Our operations are subject to U.S. and non-U.S. environmental laws and regulations governing emissions to air; discharges to water; the generation, handling, storage, transportation, treatment and disposal of waste materials; and the cleanup of contaminated properties. Currently, we believe that environmental costs with respect to our former or existing operations are not material, but there is no assurance that we will not be adversely impacted by such costs, liabilities or claims in the future, either under present laws and regulations or those that may be adopted or imposed in the future.

Our operations outside of the United States are subject to political, investment and local business risks.

Approximately 30% of our sales result from exports to countries outside of the United States and from sales of our foreign business units. As part of our business strategy, we expect to expand our international operations through internal growth and acquisitions. Sales and operations outside of the United States, particularly in emerging markets, are subject to a variety of risks which are different from or additional to the risks the Company faces within the United States. Among others, these risks include:

local political and social conditions, including potential hyperinflationary conditions and political instability in certain countries;

- imposition of limitations on the remittance of dividends and payments by foreign subsidiaries;
- adverse currency exchange rate fluctuations, including significant devaluations of currencies;
- tax-related risks, including the imposition of taxes and the lack of beneficial treaties, that result in a higher effective tax rate for the Company;

- difficulties in enforcing agreements and collecting receivables through certain foreign legal systems;
 - domestic and foreign customs, tariffs and quotas or other trade barriers;
 - increased costs for transportation and shipping;
 - difficulties in protecting intellectual property;

- increased risk of corruption, self-dealing or other unethical practices that may be difficult to detect or remedy;
 - risk of nationalization of private enterprises by foreign governments;
 - managing and obtaining support and distribution channels for overseas operations;
 - hiring and retaining qualified management personnel for our overseas operations;
 - imposition or increase of restrictions on investment; and

required compliance with a variety of local laws and regulations which may be materially different than those to which we are subject in the United States.

The occurrence of one or more of the foregoing factors could have a material adverse effect on our international operations or on our financial condition and results of operations.

We face significant competition in the markets we serve.

The markets in which we operate are highly competitive and highly fragmented. We compete worldwide with a number of other manufacturers and distributors that produce and sell similar products. Our products primarily compete on the basis of price, performance, speed of delivery, quality and customer support. Some of

TABLE OF CONTENTS

our competitors are companies, or divisions or operating units of companies, that have greater financial and other resources than we do. Any failure by us to compete effectively in the markets we serve could have a material adverse effect on our business, results of operations and financial condition.

Increasing costs for manufactured components, raw materials, transportation, health care and energy prices may adversely affect our profitability.

We use a broad range of manufactured components and raw materials in our products, including raw steel, steel-related components, filtration media, resins, plastics, paper and packaging materials. Materials comprise the largest component of our costs, representing over 40% of the costs of our net sales in fiscal year 2009. Increases in the price of these items could further materially increase our operating costs and materially adversely affect our profit margins. Similarly, transportation, energy and health care costs have risen steadily over the past few years and represent an increasingly important burden for the Company. Although we try to contain these costs wherever possible, and although we try to pass along increased costs in the form of price increases to our customers, we may be unsuccessful in doing so for competitive reasons, and even when successful, the timing of such price increases may lag significantly behind our incurrence of higher costs.

We face heightened legal challenges from our competitors with respect to intellectual property, particularly with respect to patents relevant to our Engine/Mobile Filtration segment.

We face increasing exposure to claims by others for infringement of intellectual property rights, particularly with respect to patents that are alleged to apply to our aftermarket products, which claims could result in significant costs or losses. This is especially important with respect to our Engine/Mobile Filtration segment, where many of our competitors are suppliers of first-fit products to original equipment manufacturers (OEMs) and seek to control or at least gain an advantage in the aftermarket through aggressive and comprehensive patent strategies, sometimes in conjunction with the OEMs. These strategies may involve attempting to obtain as many patents as possible, including particularly with respect to the systems for attaching or sealing filters to their respective housings, deliberately delaying the final issuance of patents so as to be able to modify them in response to competitive product designs, and seeking multiple continuations of their patents in an attempt to have their patents more clearly apply to competitive product designs. While we spend (and will continue to spend) significant resources to combat these strategies, including by creating alternative designs that fall outside of our competitors' patents, challenging patents which we believe to be invalid and attempting to build our own patent portfolio, there can be no guaranty that we will be successful. Any such failure could have a material adverse effect on the financial condition or prospects of the Company.

We face heightened legal challenges with respect to protecting our own intellectual property, particularly overseas.

We have developed and actively pursue developing proprietary technology in the industries in which we operate, and rely on intellectual property laws and a number of patents to protect such technology. In doing so, we incur ongoing costs to enforce and defend our intellectual property. Despite our efforts in this regard, we may face situations where our own intellectual property rights are invalidated or circumvented, to our material detriment. This is of particular concern in China, where we anticipate the market for our products to develop substantially, and, with it, the incentive of third parties to infringe or challenge our intellectual property rights.

Increasing costs for manufactured components, raw materials, transportation, health care and energy prices may

Our success depends in part on our development of improved products, and we may fail to meet the needs of customers on a timely or cost-effective basis.

Our continued success depends on our ability to maintain technological capabilities, machinery and knowledge necessary to adapt to changing market demands as well as to develop and commercialize innovative products, such as innovative filtration media and higher efficiency filtration systems. We may not be able to develop new products as successfully as in the past or be able to keep pace with technological developments by our competitors and the industry generally. In addition, we may develop specific technologies and capabilities in anticipation of customers demands for new innovations and technologies. If such demand does not materialize, we may be unable to recover the costs incurred in such programs. If we are unable to recover these costs or if any such programs do not progress as expected, our business, financial condition or results of operations could be materially adversely affected.

TABLE OF CONTENTS

The introduction of new and improved products and services could reduce our future sales.

Substantial changes or technological developments in the industries in which our products are used could reduce sales if these changes negatively impact the need for our products. For example, improvements in engine technology may reduce the need to make periodic filter changes and thus negatively impact our aftermarket filter sales for such engines.

Our ability to operate effectively could be impaired if we fail to attract and retain key personnel.

Our ability to operate our business and implement our strategies depends, in part, on the efforts of our executive officers and other key employees. Our management philosophy of cost-control means that we operate what we consider to be a very lean company with respect to personnel, and our commitment to a less centralized organization (discussed further below) also places greater emphasis on the strength of local management. Our future success will depend on, among other factors, our ability to attract and retain other qualified personnel, particularly management, research and development engineers and technical sales professionals. The loss of the services of any of our key employees or the failure to attract or retain other qualified personnel, domestically or abroad, could have a material adverse effect on our business or business prospects.

Our acquisition strategy may be unsuccessful.

As part of our growth strategy, we plan to pursue the acquisition of other companies, assets and product lines that either complement or expand our existing business. We may be unable to find or consummate future acquisitions at acceptable prices and terms. We continually evaluate potential acquisition opportunities in the ordinary course of business, including those that could be material in size and scope. Acquisitions involve a number of special risks and factors, including:

the focus of management's attention to the assimilation of the acquired companies and their employees and on the management of expanding operations;

the incorporation of acquired products into our product line;

the increasing demands on our operational and information technology systems;

potentially insufficient internal controls over financial activities or financial reporting at an acquired company that could impact us on a consolidated basis;

the failure to realize expected synergies;

the potential loss of customers as a result of changes in control;

the possibility that we have acquired substantial undisclosed liabilities; and

the loss of key employees of the acquired businesses.

Although we conduct what we believe to be a prudent level of investigation regarding the operating and financial condition of the businesses we purchase, an unavoidable level of risk remains regarding the actual operating condition of these businesses. Until we actually assume operating control of these business assets and their operations, we may not be able to ascertain the actual value or understand the potential liabilities of the acquired entities and their operations. This is particularly true with respect to non-U.S. acquisitions.

We compete for potential acquisitions based on a number of factors, including price, terms and conditions, size and ability to offer cash, stock or other forms of consideration. In pursuing acquisitions, we compete against other

strategic and financial buyers, some of which are larger than we are and have greater financial and other resources than we have. Increased competition for acquisition candidates could result in fewer acquisition opportunities for us and higher acquisition prices. In addition, the negotiation of potential acquisitions may require members of management to divert their time and resources away from our operations.

We are a decentralized company, which presents certain risks.

The Company is relatively decentralized in comparison with its peers. While we believe this practice has catalyzed our growth and enabled us to remain responsive to opportunities and to our customers' needs, it necessarily places significant control and decision-making powers in the hands of local management. This

TABLE OF CONTENTS

presents various risks, including the risk that we may be slower or less able to identify or react to problems affecting a key business than we would in a more centralized environment. In addition, it means that company-wide business initiatives, such as the integration of disparate information technology systems, are often more challenging and costly to implement, and their risk of failure higher, than they would be in a more centralized environment. Depending on the nature of the initiative in question, such failure could materially adversely affect our business, financial condition or results of operations.

Item 1B. Unresolved Staff Comments.

The Company has no unresolved SEC comments.

Item 2. Properties.

The various properties owned and leased by the Company and its operating units are considered by it to be in generally good repair and well maintained. Plant asset additions in fiscal year 2010 are estimated at \$40 million for land, buildings, furniture, production equipment and machinery, and computer and communications equipment.

The following is a description of the real property owned or leased by the Company or its affiliated entities, broken down by business segment. All acreage and square foot measurements are approximate.

Corporate Headquarters

The Company's corporate headquarters are located in Franklin, Tennessee, and housed in 23,000 sq ft of office space under lease to the Company. The Company also owns a parcel of undeveloped land in Rockford, Illinois totaling 6 acres. The Company also leases approximately 14,400 square feet of space in Forrest Park, Ohio, which is occupied by the CFRC.

Engine/Mobile Filtration Segment

United States Facilities

<u>Location</u>	<u>Approximate Size</u>	<u>Owned or Leased</u>
Gothenburg, NE	19 acre site with 100,000 sq ft of manufacturing space.	Owned
Kearney, NE	42 acre site with 516,000 sq ft of manufacturing and warehousing space, 25,000 sq ft of research and development space and 40,000 sq ft of office space.	Owned
Lancaster, PA	11.4 acre site with 160,000 sq ft of manufacturing and office space.	Owned
Yankton, SD	20 acre site with 170,000 sq ft of manufacturing space.	Owned

TABLE OF CONTENTS

Item 3.

Legal Proceedings.

From time to time, the Company is subject to lawsuits, investigations and disputes (some of which involve substantial amounts claimed) arising out of the conduct of its business, including matters relating to commercial transactions, product liability, intellectual property, and other matters. The Company recognizes a liability for any contingency that is probable of occurrence and reasonably estimable. The Company continually assesses the likelihood of adverse judgments of outcomes in these matters, as well as potential ranges of possible losses (taking into consideration any insurance recoveries), based on a careful analysis of each matter with the assistance of outside legal counsel and, if applicable, other experts. Included in these other matters are the following:

Anti-Trust. On March 31, 2008, S&E Quick Lube, a filter distributor, filed suit in U.S. District Court for the District of Connecticut alleging that virtually every major North American filter manufacturer, including Baldwin Filters, Inc., engaged in a conspiracy to fix prices, rig bids and allocate U.S. customers for aftermarket filters. This suit seeks various remedies, including injunctive relief and monetary damages of an unspecified amount, and is a purported class action on behalf of direct purchasers of filters from the defendants. Parallel purported class actions, including on behalf of indirect purchasers of filters, have been filed by other plaintiffs in a variety of jurisdictions in the United States and Canada. The U.S. cases have been consolidated into a single multi-district litigation in the Northern District of Illinois. The Company intends to vigorously defend the claims raised in these actions. In this regard, the Company filed a motion to be dismissed from these cases due to the lack of any factual allegations against the Company specifically and the fact that the allegations center predominantly on the automotive filtration market rather than on the heavy duty filtration market. On November 9, 2009, the presiding court denied the Company's motion, a decision that the Company is seeking to overturn. The Antitrust Division of the Department of Justice (DOJ) is also investigating the allegations raised in these suits. Management does not believe that the Company is the subject of the DOJ investigation and the Company has not been contacted by the DOJ in connection with this matter.

Donaldson. On May 15, 2009, Donaldson Company, Inc. (Donaldson) filed a lawsuit in the U.S. Federal District Court for the District of Minnesota alleging that certain ChannelFlow engine/mobile filters manufactured and sold by a subsidiary of the Company infringe one or more patents held by Donaldson. Donaldson served this lawsuit on August 26, 2009, and through the suit seeks various remedies, including injunctive relief and monetary damages of an unspecified amount. Management believes that the products in question do not infringe the asserted patents and that such patents are invalid, and the Company is vigorously defending the action.

3M. On August 14, 2009, 3M filed a lawsuit in the U.S. Federal District Court for the Eastern District of Virginia, alleging that various statements and imagery on the packaging of certain retail residential filters being sold by a subsidiary of the Company are untrue or misleading to consumers, and thus violate various aspects of the Lanham Act and Virginia consumer protection law. 3M is a former customer of the Company, and the products in question compete with those offered by 3M in the retail marketplace. The Company filed counterclaims against 3M in respect of its own packaging. This lawsuit was concluded on November 17, 2009, at which time the Company and 3M entered into a confidential settlement agreement pursuant to which each party dropped all of its claims and counterclaims.

Additionally, the Company is party to various proceedings relating to environmental issues. The U.S. Environmental Protection Agency and/or other responsible state agencies have designated the Company as a potentially responsible party, along with other companies, in remedial activities for the cleanup of waste sites under the federal Superfund statute. The Company is not certain what future environmental claims, if any, may be asserted.

TABLE OF CONTENTS

- Item 4. Submission of Matters to a Vote of Security Holders.
None.

ADDITIONAL ITEM: Executive Officers of the Registrant

The following individuals are the executive officers of the Company as of January 22, 2010:

<u>Name</u>	<u>Age at 11/28/09</u>	<u>Year Elected to Office</u>
Sam Ferrise President, Baldwin Filters, Inc. Mr. Ferrise was appointed President of Baldwin Filters, Inc. in 2000. He became an executive officer of the Company in 2003 while retaining the same title with Baldwin Filters, Inc.	53	2003
Norman E. Johnson Chairman of the Board, President and Chief Executive Officer. Mr. Johnson has been employed by the Company since 1990. He was elected President Baldwin Filters, Inc. in 1990, Vice President CLARCOR in 1992, Group Vice President Filtration Products Group in 1993, President and Chief Operating Officer in 1995 and Chairman, President and Chief Executive Officer in 2000. Mr. Johnson has been a Director of the Company since June 1996.	61	2000
Bruce A. Klein Vice President Finance and Chief Financial Officer. Mr. Klein was employed by the Company and elected Vice President Finance and Chief Financial Officer in 1995. Mr. Klein also assumed the role of the Company's principal accounting officer when the Company's former Controller retired in March of 2006.	62	1995
David J. Lindsay Vice President Administration and Chief Administrative Officer. Mr. Lindsay has been employed by the Company in various administrative positions since 1987. He was elected Vice President Group Services in 1991, Vice President Administration in 1994 and Vice President Administration and Chief Administrative Officer in 1995.	54	1995
Richard M. Wolfson Vice President General Counsel and Secretary. Mr. Wolfson was employed by the Company and elected Vice President, General Counsel and Secretary in 2006. Prior to joining the Company, he was a principal of the InterAmerican Group, an advisory services and private equity firm, from 2001 until 2006.	43	2006

Each executive officer of the Company is elected by the Board of Directors for a term of one year which begins at the Board of Directors Meeting at which he or she is elected, typically held at the time of the Annual Meeting of Shareholders, and ends on the date of the next Annual Meeting of Shareholders or upon their earlier death, resignation or removal in accordance with the Company's By-Laws.

TABLE OF CONTENTS**PART II**

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters, Issuer Purchase of Equity Securities and Five-Year Performance of the Company.

The Company's Common Stock is listed on the New York Stock Exchange; it is traded under the symbol CLC.

The following table sets forth the high and low market prices as quoted during the relevant periods on the New York Stock Exchange and dividends per share paid for each quarter of the last two fiscal years.

Quarter Ended	Market Price		Dividends
	High	Low	
February 28, 2009	\$ 34.64	\$ 25.73	\$ 0.0900
May 30, 2009	33.04	23.05	0.0900
August 29, 2009	34.50	27.47	0.0900
November 28, 2009	33.78	28.77	0.0975
Total Dividends			\$ 0.3675

Quarter Ended	Market Price		Dividends
	High	Low	
March 1, 2008	\$ 40.62	\$ 34.03	\$ 0.0800
May 31, 2008	44.20	33.25	0.0800
August 30, 2008	44.25	32.68	0.0800
November 29, 2008	43.17	25.03	0.0900
Total Dividends			\$ 0.3300

As set forth above, the quarterly dividend rate was increased in fiscal year 2009, and the Company currently expects to continue making dividend payments to shareholders. The Company's right to make dividend payments is subject to restrictions contained in the credit agreement to which the Company is a party. The Company has never been prevented from making dividend payments under its past credit agreements or its current credit agreement and does not anticipate being so restricted in the foreseeable future.

The approximate number of holders of record of the Company's Common Stock at January 15, 2010 was 1,904.

On June 25, 2007, the Company's Board of Directors approved a three-year, \$250 million stock repurchase program.

Pursuant to the authorization, the Company may purchase shares from time to time in the open market or through privately negotiated transactions over the next three years. The Company has no obligation to repurchase shares under the authorization, and the timing, actual number and value of shares to be purchased will depend on the Company's stock price and market conditions.

During fiscal year 2009, the Company repurchased 688,200 shares of its Common Stock, at a median price of \$28.72 per share, and an aggregate cost of approximately \$20 million. As set forth in the table below, the Company did not repurchase any shares during the fourth quarter of fiscal year 2009. The Company had a balance of \$167,442,663 available to repurchase shares as of November 28, 2009.

TABLE OF CONTENTS**ISSUER PURCHASES OF EQUITY SECURITIES⁽¹⁾**

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of the Company's Publicly Announced Plan	(d) Maximum Approximate Dollar Value of Shares that may yet be Purchased under the Plan
Aug. 30 Sep. 30, 2009		\$		\$ 167,442,663
Oct. 1 Oct. 31, 2009		\$		\$ 167,442,663
Nov. 1 Nov. 28, 2009		\$		\$ 167,442,663
TOTAL				\$ 167,442,663

(1) The Purchase Plan announced June 25, 2007 for aggregate purchases up to \$250 million. The program expires June 25, 2010.

5-Year Performance of the Company**PERFORMANCE GRAPH**

The following Performance Graph compares the Company's cumulative total return on its Common Stock for a five-year period (November 27, 2004 to November 28, 2009) with the cumulative total return of the S&P SmallCap 600 Index and the S&P 500 Industrial Machinery Index.

Item 6.

Selected Financial Data.

The information required hereunder is included as Exhibit 13 to this 2009 Form 10-K.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The information presented in this discussion should be read in conjunction with other financial information provided in the Consolidated Financial Statements and Notes thereto. The analysis of operating results focuses on the Company's three reportable business segments: Engine/Mobile Filtration, Industrial/Environmental Filtration and Packaging. Except as otherwise set forth herein, references to particular years refer to the applicable fiscal year of the Company.

EXECUTIVE SUMMARY

Management Discussion Snapshot (Dollars in millions except per share data)

	2009	2008	2007	2009 vs. 2008		
				\$ Change	% Change	
Net sales	\$ 907.7	\$ 1,059.6	\$ 921.2	\$ (151.9)	-14	%
Cost of sales	628.5	719.7	641.5	(91.2)	-13	%
Gross profit	279.3	339.9	279.7	(60.6)	-18	%
Selling and administrative expenses	173.6	188.0	149.9	(14.4)	-8	%
Operating profit	105.7	151.9	129.8	(46.2)	-30	%
Other income (expense)	(0.1)	(6.6)	0.7	6.5		
Provision for income taxes	33.8	49.3	39.7	(15.5)	-31	%
Net earnings	71.5	95.7	90.7	(24.2)	-25	%
Average diluted shares (millions)	51.0	51.4	50.9	(0.4)	-1	%
Diluted earnings per share	\$ 1.40	\$ 1.86	\$ 1.78	\$ (0.46)	-25	%
Percentages:						
Gross margin	30.8 %	32.1 %	30.4 %		-1.3	pt
Selling and administrative percentage	19.1 %	17.7 %	16.3 %		1.4	pt
Operating margin	11.6 %	14.3 %	14.1 %		-2.7	pt
Effective tax rate	32.0 %	33.9 %	30.4 %		-1.9	pt
Net earnings margin	7.9 %	9.0 %	9.8 %		-1.1	pt

Fiscal year 2009 was a challenging year as we were significantly impacted by the global economic recession. Our net sales declined 14% or \$151.9 million from \$1,059.6 million in 2008 to \$907.7 million in 2009. This sales reduction and the resulting under-absorption of fixed manufacturing costs was the primary reason for our reduced operating profit which declined 30% or \$46.2 million from \$151.9 million in 2008 to \$105.7 million in 2009. The negative

impact of lower sales was offset in part by three significant cost items:

Lower material costs

Reduced discretionary spending

Benefits from HVAC filter operations restructuring program

TABLE OF CONTENTS

We realized a \$10 to \$12 million benefit from the reduction of material costs in 2009 compared to 2008. This reduction was driven by lower commodity pricing primarily in steel, filter media and adhesives. In addition, we initiated several projects in 2009 which removed material cost from our products without compromising the quality of the product to the end customer.

Due to the challenging economic environment in 2009, we established several cost initiatives including headcount reductions, wage freezes and significant cuts in discretionary spending including travel and outside professional services. As a result of these cost initiatives, we were able to reduce our selling and administrative expenses by \$14.4 million from \$188.0 million in 2008 to \$173.6 million in 2009. Despite this focus on lower costs, we did not sacrifice spending on future growth initiatives including our sales force, customer service or product development.

We largely completed our restructuring program at our HVAC filter operations in 2009. At the beginning of fiscal year 2009, we completed the consolidation of two manufacturing operations, one distribution facility and one office location facility into one facility in Indiana. As a result of this consolidation and the full year benefits of facilities closed in 2008, we recognized approximately \$4.0 million in fixed cost savings in 2009 compared to 2008. These fixed cost savings were offset in part by a \$1.2 million impairment charge recognized on a HVAC facility in North Carolina which we closed in 2008.

Despite the negative comparisons to fiscal 2008, we generated sequentially improving operating performance for each quarter in 2009 as follows:

(Dollars in millions except per share data)	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Net sales	\$ 213.7	\$ 229.4	\$ 230.3	\$ 234.3
Operating profit	13.7	25.2	32.1	34.7
Operating margin	6.4 %	11.0 %	13.9 %	14.8 %
Diluted earnings per share	\$ 0.17	\$ 0.33	\$ 0.42	\$ 0.49

Other significant items impacting the comparison between the years presented are as follows:

Acquisitions

During fiscal year 2009 we completed six small acquisitions and paid an earn-out amount and received a refund related to two acquisitions completed prior to fiscal year 2009, all for aggregate consideration of approximately \$11.9 million. Four of these fiscal year 2009 acquisitions (approximately \$6.0 million) were related to companies located in China, including \$4.6 million to purchase the remaining 20% minority interest in our subsidiary in Weifang. The majority of the remaining \$5.9 million of the \$11.9 million was for the purchase of the Keddeg Company, a U.S.-based manufacturer of aerospace filtration products. These combined acquisitions increased 2009 net sales by approximately \$5.5 million and 2009 operating profit by approximately \$0.4 million.

At the beginning of fiscal 2008 we completed the acquisition of Perry Equipment Corporation (Peco), a manufacturer of engineered filtration products and technologies primarily used in the natural gas industry. The purchase price was \$145.8 million, excluding cash acquired. The Peco acquisition increased 2008 net sales by approximately \$116.0 million and 2008 operating profit by approximately \$15.0 million.

Foreign exchange

Although most foreign currencies strengthened against the U.S. dollar throughout 2009, the average exchange rate for most foreign currencies versus the U.S. dollar was weaker for 2009 compared to 2008. For example, the average exchange rate for the Euro was \$1.38 in 2009 and \$1.47 in 2008. Weaker foreign currencies negatively impacted our

translated 2009 U.S. dollar value of net sales by \$24.8 million and operating profit by \$2.7 million compared to 2008.

The average exchange rate for most foreign currencies versus the U.S. dollar was stronger in 2008 compared to 2007.

As a result, stronger foreign currencies positively impacted our translated U.S. dollar value of net sales by \$9.5 million and operating profit by \$1.4 million in 2008 compared to 2007.

TABLE OF CONTENTS

Other income (expense)

Interest expense

Interest expense declined \$4.4 million in 2009 compared to 2008. \$2.8 million of this decrease was driven by lower interest expense on our line of credit driven by both lower average interest rates (0.8% in 2009 and 3.7% in 2008) and lower average outstanding balances (\$61.3 million in 2009 and \$90.4 million in 2008). In addition, the \$1.1 million impact of the mark-to-market adjustment on the interest rate swap was \$1.3 million lower in 2009 compared to 2008.

Interest expense increased \$5.5 million in 2008 compared to 2007. \$3.4 million of this increase was driven by higher interest expense on our line of credit primarily as a result of amounts borrowed to fund the acquisition of Peco. There was no balance on our line of credit in 2007. The remainder of the higher interest expense was related to a \$2.4 million mark-to-market adjustment on the interest swap in 2008.

Foreign currency gains and losses

Changes in foreign currency transaction gains and losses contributed a positive \$2.7 million change in other income (expense) in 2009 compared to 2008. As most foreign currencies strengthened against the U.S. dollar throughout 2009, we recognized approximately \$1.2 million of foreign currency gains in 2009 mostly related to the translation of U.S. dollar intercompany debt at our non-U.S. subsidiaries. The weakening of foreign currencies against the U.S. dollar generated \$1.5 million of foreign currency losses in 2008. Changes in foreign currency transaction gains and losses contributed an additional loss of \$1.6 million in other income (expense) in 2008 compared to 2007.

Provision for income taxes

The effective tax rate in 2009 was 32.0% compared to 33.9% in 2008. This reduction was driven by a higher mix of taxable income in foreign operations with lower tax rates than in the U.S. In addition, several favorable provision-to-return state tax return adjustments lowered the effective rate. The relatively low effective tax rate of 30.4% in 2007 was driven by a 3.2% benefit from the completion of various income tax audits, the finalization of certain income tax liabilities and the cumulative tax benefit from the research and experimentation tax credit extension in 2007.

Shares outstanding

Average diluted shares outstanding declined 0.4 million in 2009 compared to 2008. This reduction was driven almost entirely by the lower dilution from our outstanding stock options and restricted share units as average basic shares outstanding remained consistent from 2008 to 2009. The full year benefit of our 0.7 million share repurchase executed in the third quarter of 2009 will not be fully realized until 2010.

Average diluted shares outstanding increased 0.5 million in 2008 compared to 2007. This increase was driven by a 0.4 million increase in basic shares outstanding. Average basic shares outstanding increased in 2008 due to the issuance of 2.1 million shares pursuant to the Peco acquisition and 0.4 million shares issued pursuant to stock incentive programs offset by the repurchase of 1.0 million shares at the beginning of 2008 and the full year impact of 2.3 million shares repurchased throughout 2007.

TABLE OF CONTENTS**SEGMENT ANALYSIS**

(Dollars in millions)	2009	% Total	2008	% Total	2007	% Total
Net sales:						
Engine/Mobile Filtration	\$373.3	41 %	\$439.0	42 %	\$430.0	47 %
Industrial/Environmental Filtration	461.0	51 %	543.1	51 %	414.5	45 %
Packaging	73.4	8 %	77.5	7 %	76.7	8 %
	\$907.7	100 %	\$1,059.6	100 %	\$921.2	100 %
Operating profit:						
Engine/Mobile Filtration	\$75.2	71 %	\$99.4	65 %	\$98.8	76 %
Industrial/Environmental Filtration	24.7	23 %	45.8	30 %	25.5	20 %
Packaging	5.8	6 %	6.7	5 %	5.5	4 %
	\$105.7	100 %	\$151.9	100 %	\$129.8	100 %
Operating margin:						
Engine/Mobile Filtration	20.1 %		22.6 %		23.0 %	
Industrial/Environmental Filtration	5.4 %		8.4 %		6.1 %	
Packaging	7.9 %		8.6 %		7.2 %	
	11.6 %		14.3 %		14.1 %	

Net sales, operating profit and operating margin declined for each of our segments in 2009 compared to 2008. Net sales were down approximately 15% at both our Engine/Mobile Filtration and Industrial/Environmental Filtration segments and 5% at our Packaging segment. In general, this decline in net sales was the primary reason for the reduction in operating profit at each of our segments.

Net sales and operating profit increased for each of our segments in 2008 compared to 2007. Of the \$138.4 million increase in consolidated net sales from 2007 to 2008, approximately \$116.0 million was related to our acquisition of Peco, whose results are included in our Industrial/Environmental Filtration segment. Similarly, of the \$22.1 million increase in consolidated operating profit from 2007 to 2008, approximately \$15.0 million was related to the acquisition of Peco.

Engine/Mobile Filtration Segment

(Dollars in millions)	2009	2008	2007	2009 v 2008		2008 v 2007	
				\$ Change	% Change	\$ Change	% Change
Net sales	\$ 373.3	\$ 439.0	\$ 430.0	\$ (65.7)	-15 %	\$ 9.0	2 %
Operating profit	75.2	99.4	98.8	(24.2)	-24 %	0.6	1 %
Operating margin	20.1 %	22.6 %	23.0 %		-2.5 pt		-0.4 pt

Our Engine/Mobile Filtration segment sells after-market filters for heavy-duty trucks, heavy-duty off-highway vehicles, locomotives and automobiles. The largest market included in this segment is engine filters for heavy-duty trucks produced at our Baldwin business unit.

Net sales for our Engine/Mobile Filtration segment declined \$65.7 million or 15% from 2008 to 2009 as detailed in the following table:

(Dollars in millions)	Net Sales
2008	\$ 439.0
U.S. sales	(39.2)
Foreign sales	(14.2)
Foreign exchange	(12.3)
Net decrease	(65.7)
2009	\$ 373.3

21

TABLE OF CONTENTS

The \$39.2 million decline in U.S. sales was the result of lower demand from our heavy-duty truck and locomotive customers. Truck tonnage in the U.S. declined approximately 10-12% from 2008 to 2009, and locomotive car loadings in North America declined approximately 20%. The \$14.2 million reduction in sales to customers outside the U.S. was driven by an approximate \$7.0 million decline at our subsidiary in the United Kingdom. This subsidiary lost a major customer at the end of 2008 and was also significantly impacted by the downturn in the power generation market. The remainder of the decrease in non-U.S. sales was spread throughout our remaining foreign subsidiaries. Each of our major foreign locations had lower net sales in 2009 compared to 2008 with the exception of our South Africa subsidiary which was flat year-over-year.

Operating profit for our Engine/Mobile Filtration segment declined \$24.2 million or 24% from 2008 to 2009. In general, the \$24.2 million reduction in operating profit was primarily driven by the \$65.7 million reduction in net sales and the resulting under-absorption of fixed manufacturing costs world-wide. The negative impact of this net sales reduction was offset in part by reduced material cost and a \$10.0 million reduction in selling and administrative expenses driven by headcount reductions and limits on discretionary spending such as travel and outside professional services. The change in average foreign exchange rates from 2008 to 2009 negatively impacted the translated U.S. dollar value of operating profit by approximately \$1.4 million.

Net sales for our Engine/Mobile Filtration segment increased \$9.0 million or 2% from 2007 to 2008 as detailed in the following table:

(Dollars in millions)	Net Sales
2007	\$ 430.0
U.S. sales	(6.3)
Foreign sales (including export)	12.1
Foreign exchange	3.2
Net increase	9.0
2008	\$ 439.0

The \$6.3 million decline in U.S. sales was the result of lower heavy-duty truck and automotive filter sales in 2008 compared to 2007 offset by higher sales to our locomotive customers. The \$12.1 million increase in sales to customers outside the U.S. was driven by a \$3.4 million increase in sales at our China subsidiary and a \$2.3 million increase at our 80%-owned Morocco subsidiary which we acquired in 2007. Sales at all of our other foreign subsidiaries increased in 2008 compared to 2007 with the exception of our U.K. subsidiary which declined approximately \$1.9 million.

Operating profit for our Engine/Mobile Filtration segment increased \$0.6 million or 1% from 2007 to 2008. Operating profit on U.S. sales declined due to lower net sales and an approximate \$2.0 million increase in selling and administrative expenses including an insurance deductible due to a weather related incident and increased legal costs related to certain patent disputes. Operating profit on foreign sales increased primarily due to the \$12.1 million increase in foreign sales. This foreign operating profit increase was offset in part by a \$2.0 million increase in selling and administrative expenses to support this international growth. The change in average foreign exchange rates from 2007 to 2008 positively impacted the translated U.S. dollar value of operating profit by approximately \$0.8 million.

Industrial/Environmental Filtration Segment

2009 v 2008

2008 v 2007

Edgar Filing: CLARCOR INC - Form 10-K

(Dollars in millions)	2009	2008	2007	\$ Change	% Change	\$ Change	% Change
Net sales	\$ 461.0	\$ 543.1	\$ 414.5	\$ (82.1)	-15 %	\$ 128.6	31 %
Operating profit	24.7	45.8	25.5	(21.1)	-46 %	20.3	80 %
Operating margin	5.4 %	8.4 %	6.1 %		-3.0 pt		2.3 pt

Our Industrial/Environmental Filtration segment sells a large variety of filtration products to various end-markets. Included in this market are HVAC filters, natural gas vessels and replacement filters, aviation fuel filters and filter systems, and other markets including oil drilling, aerospace, fibers and resins and dust collector systems and replacement cartridges.

TABLE OF CONTENTS

Net sales for our Industrial/Environmental Filtration segment declined \$82.1 million or 15% from 2008 to 2009 as detailed in the following table:

(Dollars in millions)	Net Sales
2008	\$ 543.1
U.S. sales	(47.3)
Foreign sales (including export)	(22.3)
Foreign exchange	(12.5)
Net decrease	(82.1)
2009	\$ 461.0

The \$47.3 million decrease in net sales to customers within the U.S. was driven by the following:

HVAC filter sales were down approximately \$20.9 million in 2009 compared to 2008. This decline was driven in part by an approximate \$11.0 million reduction in air filters sold to automobile companies and related tier one and tier two suppliers through our Total Filtration Services business unit as a result of the downturn in the automotive industry. An additional \$9.0 million reduction was driven by lower air filter sales to 3M. We had supplied HVAC filters to 3M for many years although our annual sales have been declining for years as 3M moved production into its Mexican manufacturing facility. In the third quarter of 2009, we were informed by 3M that it would no longer be purchasing HVAC filters from us. The lost sales in the fourth quarter in addition to generally lower demand from 3M in the prior three quarters contributed to the \$9.0 million reduction from 2008.

Sales of natural gas vessels and replacement filter elements grew by \$0.6 million in 2009 compared to 2008. Sales of filters and filter systems to the aviation market grew by approximately \$0.8 million in 2009 compared to 2008.

Sales in the remaining filter markets in our Industrial/Environmental Filtration segment were down significantly in 2009 compared to 2008. We were particularly impacted by the downturn in the oil and gas industry as off-shore drilling activity declined with lower oil prices. Accordingly, our U.S. sales related to oil and gas drilling declined approximately \$16.5 million in 2009 compared to 2008. In other markets: sales of wire mesh filters to the chemical fiber and plastics markets declined approximately \$8.9 million in 2009 compared to 2008, and sales of dust collector systems declined approximately \$5.3 million as this market was significantly impacted by reduced capital spending in the U.S.

The \$22.3 million reduction in foreign sales from 2008 to 2009 was driven by a \$10.0 million decrease in foreign export sales of our natural gas original equipment vessels produced at our North American manufacturing facilities.

Approximately \$8.0 million of this \$10.0 million decline was related to 2008 shipments to India, Africa and the Middle East which did not recur in 2009. The remainder of the decline in foreign sales was due to an approximate \$5.7 million reduction in dust collector sales in Europe.

Operating profit for our Industrial/Environmental Filtration segment declined \$21.1 million or 46% from 2008 to 2009. In general, the reduction in operating profit was driven by the aforementioned \$82.1 million reduction in net sales and the resulting under-absorption of fixed manufacturing costs world-wide, including a \$10.1 million operating profit decline at our oil filtration business which was significantly impacted by reduced offshore drilling activity. The

negative impact of the significant sales decline was offset in part by a \$9.5 million reduction in selling and administrative expenses. In addition, the near completion of our restructuring program at our HVAC operations reduced fixed manufacturing costs by approximately \$4.0 million in 2009. However, these savings were offset in part by a \$1.2 million impairment charge recognized in 2009 for a HVAC facility in North Carolina. The change in average foreign exchange rates from 2008 to 2009 negatively impacted the translated U.S. dollar value of operating profit by approximately \$1.3 million.

TABLE OF CONTENTS

Despite the negative 2009 comparisons to 2008, the operating profit and margin at our Industrial/Environmental Filtration segment improved sequentially each fiscal quarter in 2009 as follows:

(Dollars in millions)	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Net sales	\$ 113.5	\$ 119.9	\$ 114.6	\$ 113.0
Operating profit	0.7	5.9	7.9	10.2
Operating margin	0.6 %	4.9 %	6.9 %	9.1 %

This sequential quarter-to-quarter improvement in operating profit and margin on relatively flat sales was the direct result of the restructuring activities at our HVAC operations, cost reduction initiatives at our Total Filtration Services business unit, reduced discretionary selling and administrative expenses and improved margins at our natural gas original equipment vessel business.

Net sales for our Industrial/Environmental Filtration segment increased \$128.6 million or 31% from 2007 to 2008 as detailed in the following table:

(Dollars in millions)	Net Sales
2007	\$ 414.5
U.S. sales	53.4
Foreign sales (including export)	69.0
Foreign exchange	6.2
Net increase	128.6
2008	\$ 543.1

Approximately \$116.0 million of the \$128.6 million increase in net sales was due to our acquisition of Peco in December 2007. The remaining \$12.6 million increase in sales from 2007 to 2008 was driven by a combined \$29.0 million increase in sales from the oil and gas, aviation, dust collector and fiber and mesh markets offset in part by approximately \$17.0 million in lower sales of air filters at our combined HVAC operations and our Total Filtration Services business unit.

Operating profit for our Industrial/Environmental Filtration segment increased \$20.3 million or 80% from 2007 to 2008. Approximately \$15.0 million of this increase was related to our acquisition of Peco. The remaining \$5.3 million increase in operating profit was driven by increased sales in our oil and gas and aviation markets offset by significantly lower operating profit at our Total Filtration Services business unit which was severely impacted by lower demand from automotive companies purchasing filters for their manufacturing facilities. The change in average foreign exchange rates from 2007 to 2008 positively impacted the translated U.S. dollar value of operating profit by approximately \$0.6 million.

Packaging Segment

(Dollars in millions)	2009	2008	2007	2009 v 2008			2008 v 2007		
				\$ Change	% Change		\$ Change	% Change	
Net sales	\$ 73.4	\$ 77.5	\$ 76.7	\$ (4.1)	-5 %		\$ 0.8	1 %	
Operating profit	5.8	6.7	5.5	(0.9)	-13 %		1.2	22 %	

Edgar Filing: CLARCOR INC - Form 10-K

Operating margin	7.9	%	8.6	%	7.2	%	-0.7	pt	1.4	pt
------------------	-----	---	-----	---	-----	---	------	----	-----	----

Net sales for our Packaging segment decreased \$4.1 million or 5% from 2008 to 2009. This decrease was driven by \$10.7 million lower sales due to the downturn in the confectionary, film, health and beauty and pharmaceutical markets offset in part by \$7.0 million of additional sales from smokeless tobacco packaging and decorated flat sheet metal. Operating profit declined \$0.9 million or 13% from 2008 to 2009. This reduction in operating profit was driven by the reduction in sales but was offset in part by savings resulting from cost initiatives to reduce direct labor and manufacturing overhead. Virtually all sales in this segment are denominated in U.S. dollars with about 6% exported outside the U.S.

TABLE OF CONTENTS

Net sales for our Packaging segment increased \$0.8 million or 1% from 2007 to 2008. The additional \$1.2 million of operating profit from 2007 to 2008 was driven by several initiatives which lowered costs including selling and administrative expenses, direct labor as a percentage of sales and manufacturing overhead.

FINANCIAL CONDITION

LIQUIDITY AND CAPITAL RESOURCES

Our financial position remains strong with adequate cash resources and sufficient borrowing capacity under our line of credit. In the first quarter of 2008, we entered into a five-year multicurrency revolving credit agreement (Credit Facility) with a group of financial institutions under which we may borrow up to \$250.0 million under a selection of currencies and rate formulas. This Credit Facility replaced the \$165.0 million credit agreement that was scheduled to expire in April 2008. We believe the financial institutions that are party to this arrangement have adequate capital resources and will be able to fund future borrowings under the Credit Facility. At our election the interest rate is based upon either a defined base rate or the LIBOR interest rate plus or minus applicable margins. At year-end 2009, the LIBOR interest rate including margin was 0.6%. At November 30, 2009 there was \$35.0 million outstanding on the Credit Facility with an additional \$8.4 million outstanding on a \$75.0 million letter of credit sub-line. Accordingly, we had approximately \$206.6 million available for further borrowing at year-end 2009. In December 2009, we paid down an additional \$10.0 million on the Credit Facility.

In the first quarter of 2008, we entered into an interest rate swap agreement (Swap Agreement) with a bank to manage our interest rate exposure on certain amounts outstanding under our Credit Facility. The Swap Agreement provided for us to pay a 3.93% fixed interest rate plus applicable margins and receive interest based on a three-month LIBOR on a notional amount of \$100.0 million. The Swap Agreement was not designated as a hedge for financial reporting purposes. Accordingly, unrealized gains and losses were recorded as interest expense in the Consolidated Statements of Earnings. Periodic settlement payments or receipts were recorded as a component of cash flows from operating activities in the Consolidated Statements of Cash Flows. The fair value of the Swap Agreement at November 30, 2009 was approximately \$1.0 million and was recorded as part of current accrued liabilities. The Swap Agreement expired January 1, 2010.

From time to time, we use derivative financial instruments such as the Swap Agreement to mitigate our exposure to certain market risks. However, by using derivative financial instruments, we are exposed to credit risk. Credit risk is the failure of the counterparty to perform under the terms of the derivative contract. When the fair value of a derivative contract is positive, the counterparty owes us, which creates credit risk. We minimize this credit risk by entering into transactions with counterparties which we believe have the financial resources to meet their obligations.

Cash and cash equivalents, restricted cash and short-term investments increased \$43.7 million to \$92.2 million at year-end 2009 from \$48.5 million at year-end 2008. Short-term investments primarily include tax-exempt municipal money market funds. Cash and cash equivalents are held by financial institutions throughout the world. We regularly review the credit worthiness of these institutions and believe our funds at these institutions are not at significant risk. The current ratio of 3.4 at year-end 2009 was higher than the current ratio of 3.0 at year-end 2008.

Long-term debt of \$52.1 million at year-end 2009 included \$35.0 million outstanding on our Credit Facility, \$15.8 million outstanding on industrial revenue bonds and \$1.3 million of other long-term debt. At November 30, 2008 and 2009 we were in compliance with all financial covenants as included in our Credit Facility. We expect to be in

compliance with these covenants in the foreseeable future despite the global economic downturn. The ratio of total debt to total capitalization (defined as long-term debt plus total shareholders' equity) was 7.1% at the end of 2009 compared to 11.4% at the end of 2008.

We had 50.4 million shares of common stock outstanding at November 30, 2009 compared to 50.8 million outstanding at November 30, 2008. The 0.4 million decrease in outstanding shares was driven by our repurchase of 0.7 million shares in the third quarter of 2009 offset in part by 0.3 million shares issued in conjunction with incentive plans. Shareholders' equity increased to \$686.6 million at year-end 2009 compared to \$651.8 million at year-end 2008. This \$34.8 million increase was driven by additional net earnings of \$71.5 million, currency translation adjustments of \$14.7 million and stock and stock compensation expense pursuant to incentive plans of

TABLE OF CONTENTS

\$8.2 million offset by pension and other postretirement benefits adjustments of \$21.3 million, dividend payments of \$18.7 million and our repurchase of common stock of \$19.8 million.

Net cash provided by operating activities increased \$6.3 million to \$113.4 million in 2009 from \$107.1 million in 2008. This \$6.3 million increase was driven by \$28.6 million of additional cash generated from changes in working capital offset by lower earnings adjusted for non-cash items of \$22.3 million. The \$28.6 million of additional cash generated from changes in working capital was significantly impacted by the \$45.8 million of cash generated from a reduction in accounts receivable which declined as a result of lower net sales. This cash generated was offset in part by \$22.5 million of additional cash invested in short-term investments. Our 2009 inventory levels did not decline significantly with lower net sales based upon our strategic decision to maintain high customer fill rates. Net cash provided by operating activities decreased \$30.2 million to \$107.1 million in 2008 from \$137.3 million in 2007. This \$30.2 million decrease was driven by a \$41.9 million decline in cash generated from changes in working capital offset by higher earnings adjusted for non-cash items of \$11.7 million. The \$41.9 million decline in cash generated from changes in working capital was driven by a \$29.7 million swing in our short-term investments as we generated \$27.3 million of net cash in 2007 from the sale of short-term investments while we invested \$2.4 million of net cash in 2008.

Net cash used in investing activities decreased \$74.7 million to \$34.2 million in 2009 compared to \$108.9 million in 2008. This decrease was driven by a \$63.0 million reduction in cash used for business acquisitions. The \$74.9 million invested in business acquisitions in 2008 was primarily related to our acquisition of Peco. The \$11.9 million invested in business acquisitions in 2009 was driven by several smaller acquisitions. In addition to reduced investment for business acquisitions, we used \$13.2 million less cash for additions to plant assets in 2009 compared to 2008. This reduction was primarily related to lower spending for the restructuring of our HVAC operations of approximately \$7.0 million. Net cash used in investing activities increased \$61.0 million to \$108.9 million in 2009 from \$47.9 million in 2007. This increase was driven by an additional \$62.6 million invested in business acquisitions in 2008 primarily related to the Peco acquisition.

Net cash used in financing activities increased \$81.6 million in 2009 compared to 2008. The \$65.4 million cash used in financing activities in 2009 was driven by payments of \$40.0 million on our Credit Facility, \$19.8 million for our repurchase of stock and \$18.7 million for dividends. These cash outflows were offset by proceeds of \$8.4 million from the re-issuance of an industrial revenue bond and \$3.6 million from the issuance of stock pursuant to incentive plans. The \$16.2 million cash provided by financing activities in 2008 was driven by proceeds of \$80.0 million from our Credit Facility primarily to finance the Peco acquisition and \$8.9 million from the issuance of stock pursuant to incentive plans. These cash proceeds were offset by payments of \$5.0 million on our Credit Facility, payments of \$37.3 million for the repurchase of stock, \$16.8 million for dividends and \$16.1 million for payments on an industrial revenue bond. Net cash provided by financing activities increased \$101.7 million in 2008 compared to 2007. This increase in cash generated from 2007 to 2008 was driven by \$75.0 million of net proceeds under our Credit Facility and \$37.6 million less cash paid for the repurchase of stock in 2008 compared to 2007.

In June 2007, our Board of Directors authorized a \$250.0 million stock repurchase program of our common stock in the open market and through private transactions over a three-year period. This authorization replaced our previous \$150.0 million share repurchase program that expired in June 2007. During 2009, we repurchased and retired 0.7 million shares of our common stock for \$19.8 million. During 2008, we repurchased and retired 1.0 million shares of our common stock for \$37.3 million. At November 30, 2009, there was approximately \$167.4 million available for repurchase under the current authorization. Future repurchases of our common stock may be made after considering cash flow requirements for internal growth including working capital, capital expenditures, acquisitions, interest rates and the current market price of our common stock.

We believe that our current operations will continue to generate cash and that sufficient lines of credit remain available to fund current operating needs, pay dividends, invest in the development of new products and filter media, fund planned capital expenditures and expansion of current facilities, provide for interest payments and required principal payments related to debt agreements, fund pension plan contributions and repurchase common stock. We also continue to assess acquisition opportunities in related filtration businesses that would expand our market base, distribution coverage or product offerings. Any such acquisitions may affect operating cash flows

TABLE OF CONTENTS

and may require changes in our debt and capitalization. In addition, capital market disruptions may affect the cost or availability of future borrowings. We have no material long-term purchase commitments.

The following table summarizes our current fixed cash obligations as of November 30, 2009 for the years indicated:

(Dollars in millions)	Payments Due by Period				
	Total	Less than 1 Year	1 to 3 Years	3 to 5 Years	More than 5 Years
Operating leases	\$59.8	\$ 10.6	\$ 16.3	\$ 12.0	\$ 20.9
Credit Facility	35.0			35.0	
Pension plan and other post-retirement contributions	74.0	6.3	30.1	18.1	19.5
Long-term debt (excluding line of credit)	17.2	0.1	1.3		15.8
Payments for acquisitions	3.3	0.1	3.1	0.1	
Interest on Credit Facility	1.1	0.4	0.7		
Payment on Swap Agreement	1.0	1.0			
Interest on long-term debt (excluding line of credit)	0.9	0.2	0.3	0.2	0.2
Total	\$192.3	\$ 18.7	\$ 51.8	\$ 65.4	\$ 56.4

Interest payments on our variable rate debt in the table above are determined based upon current interest rates as of year-end 2009 and assume that no additional borrowings or payments will be made on our Credit Facility during the periods presented. The \$35.0 million outstanding on our Credit Facility at November 30, 2009 will be due at the maturity of the Credit Facility in December 2012. The \$1.0 million payment for our Swap Agreement is due in January 2010.

We do not have a minimum required contribution under the Pension Benefit Guarantee Corporation requirements for our U.S. qualified pension plans for 2010. However, we anticipate contributing \$0.1 million in a voluntary contribution to our U.S. qualified pension plans in 2010. In addition, we anticipate contributing \$0.4 million to our non-U.S. qualified plan and \$0.1 million to our post-retirement health care benefit plan during 2010. We anticipate contributing \$5.7 million and \$14.2 million in 2010 and 2011, respectively, to our U.S. combined non-qualified pension plans covering certain management employees. Future estimates of our pension plan contributions may change significantly depending upon the actual rate of return on plan assets, discount rates and regulatory requirements.

At November 30, 2009, our liability for uncertain income tax provisions was \$2.2 million including interest and penalties. Due to the high degree of uncertainty regarding the timing of potential future cash outflows associated with these liabilities, we were unable to make a reasonably reliable estimate of the amount and period in which these remaining liabilities might be paid.

Off-Balance Sheet Arrangements

Our off-balance sheet arrangements relate to various operating leases as discussed in Note H to the Consolidated Financial Statements. We had no variable interest entity or special purpose entity agreements during 2009 or 2008.

OTHER MATTERS

—

CRITICAL ACCOUNTING ESTIMATES

Our critical accounting policies, including the assumptions and judgments underlying them, are disclosed in the Notes to the Consolidated Financial Statements. These policies have been consistently applied in all material respects and address such matters as revenue recognition, depreciation methods, inventory valuation, asset impairment recognition, business combination accounting and pension and postretirement benefits. These critical accounting policies may be affected by recent relevant accounting pronouncements discussed in the following section.

27

TABLE OF CONTENTS

While the estimates and judgments associated with the application of these critical accounting policies may be affected by different assumptions or conditions, we believe the estimates and judgments associated with the reported amounts are appropriate in the circumstances. The following lists the most critical accounting estimates used in preparing the consolidated financial statements which requires us to use significant judgment and estimates of amounts that are inherently uncertain:

Goodwill and Indefinite-lived Intangible Assets We annually review goodwill and indefinite-lived intangible assets for impairment. These reviews of fair value involve judgment and estimates of discount rates, terminal values, transaction multiples and future cash flows for the reporting units that may be impacted by future sales and operating results for the reporting units, market conditions and worldwide economic conditions. All goodwill and intangibles are allocated to the reporting unit component at the time of acquisition. We have determined that the reporting unit components meet the criteria for aggregation into five reporting units. These reporting units are aggregated based upon similar economic characteristics, nature of products and services, nature of production processes, type of customers and distribution methods. In performing our impairment reviews, we estimated the fair values of the aggregated reporting units using a present value method that discounted future cash flows. For our indefinite-lived intangibles, we performed annual impairment tests using the relief-from-royalty method to determine the fair value of our trademarks and trade names. We further analyzed various discount rates, transaction and capital market multiples and cash flows for aggregated reporting units to assess the reasonableness of our estimates and assumptions. We believe our valuation techniques and assumptions are reasonable for this purpose. We have not materially changed our methodology for valuing goodwill and indefinite-lived intangible assets. Based upon our analysis at November 30, 2009, the estimated fair value for each of our reporting units exceeded its carrying value by at least approximately 30%. The weighted average excess of fair value over carrying value of all our reporting units was approximately 200%.

Allowance for Losses on Accounts Receivable Allowances for losses on customer accounts receivable balances are estimated based on economic conditions in the industries to which we sell and on historical experience by evaluating specific customer accounts for risk of loss, fluctuations in amounts owed and current payment trends. Our concentration of risk is also monitored and at year-end 2009, the largest outstanding customer account balance was \$3.8 million and the five largest account balances totaled \$15.4 million. The allowances provided are estimates that may be impacted by economic and market conditions which could have an effect on future allowance requirements and results of operations. Given the current economic conditions, we are monitoring receivables and credit worthiness of our customers and managing our collections more closely.

Pensions Our pension obligations are determined using estimates including those related to discount rates, asset values and changes in compensation. The discount rate used for each plan was based on the Citigroup Pension Discount Curve. The projected benefit payments in each year were discounted using the appropriate spot rate from the curve. For each plan, a single discount rate was determined that produced the same total discounted value. That rate, rounded to 25 basis points, was the discount rate selected for the plan. The 5.50% discount rate used for the qualified plans for U.S. employees was selected as the best estimate of the rate at which the benefit obligations could be effectively settled on the measurement date taking into account the nature and duration of the benefit obligations of the plan using high-quality fixed-income investments currently available (rated Aa or better) and expected to be available during the period to maturity of the benefits. The 7.75% expected return on plan assets was determined based on historical long-term investment returns as well as future expectations given target investment asset allocations and current economic conditions. The 4.0% rate of compensation increase represents the long-term assumption for expected increases in salaries among continuing active participants accruing benefits under the qualified plan. The mortality table for the qualified plans is determined based on the actuarial table that is most reflective of the expected mortality of the plan participants. The mortality table adopted (RP 2000 Projected) was developed for pension plans by a Society of Actuaries study. The mortality table used for the nonqualified pension plan is specified by the

TABLE OF CONTENTS

plan agreement. The assumptions are similarly determined for each pension obligation. Actual results and future obligations will vary based on changes in interest rates, stock and bond market valuations and employee compensation.

In 2010, a reduction in the expected return on plan assets of 0.25% would result in additional expense in fiscal 2010 of approximately \$0.2 million, while a reduction in the discount rate of 0.25% would have resulted in additional expense of approximately \$0.3 million for our qualified defined benefit pension plans for U.S. covered employees. Interest rates and pension plan valuations may vary significantly based on worldwide economic conditions and asset investment decisions. The unrecognized net actuarial loss of \$63.9 million at year-end 2009 is due primarily to prior changes in assumptions related to discount rates and expected compared to actual asset returns. This actuarial loss will be recognized as pension expense in the future over the average remaining service period of the employees in the plans. See Note I to the Consolidated Financial Statements.

Income Taxes We are required to estimate and record income taxes payable for each of the U.S. and international jurisdictions in which we operate. This process involves estimating actual current tax expense and assessing temporary differences resulting from differing accounting treatment between tax and book which result in deferred tax assets and liabilities. In addition, accruals are also estimated for federal, state and international tax transactions for which deductibility is subject to interpretation. Taxes payable and the related deferred tax differences may be impacted by changes to tax laws, changes in tax rates and changes in taxable profits and losses. Reserves are also estimated for uncertain tax positions that are currently unresolved. We routinely monitor the potential impact of such situations and believe that it is properly reserved.

Recent Market Events

Current market conditions and economic events have significantly impacted the financial condition, liquidity and outlook for a wide range of companies, including many companies outside the financial services sectors. We have considered the potential impact of such conditions and events as it relates to currently reported financial results of operations and liquidity, including consideration of the possible impact of other than temporary impairment, counterparty credit risk and hedge accounting. We do not believe that, based on our current investment policies and contractual relationships, we are subject to greater risk from such factors than other companies of similar size and market breadth.

RECENT ACCOUNTING PRONOUNCEMENTS

In December 2008, the Financial Accounting Standards Board (FASB) expanded the required disclosures for pension and other postretirement plans by requiring disclosures about how investment allocation decisions are made by management, major categories of plan assets and significant concentration of risk. Additionally, an employer is required to disclose information about the valuation of plan assets. This accounting guidance is effective for our fiscal year 2010 and will affect the disclosures in our financial statements.

In June 2008, the FASB issued guidance that requires that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) be considered participating securities and be included in the computation of earnings per share pursuant to the two-class method. This guidance is effective for our fiscal year 2010 and requires the restatement of all previously reported earnings per share data. Our unvested restricted stock units qualify as participating securities under this guidance. Our preliminary assessment is the unvested restricted stock units will not materially affect the computation of earnings per share.

In December 2007, the FASB issued guidance that will affect our accounting for businesses acquired after November

30, 2009, the presentation of noncontrolling interests, previously called minority interests, in our Consolidated Financial Statements and will also require that assets acquired or liabilities assumed in a business combination and arising from a contingency be recognized at fair value at the acquisition date if the acquisition date fair value can be determined during the measurement period. We will adopt this guidance in fiscal year 2010 which will impact the way we account for future business acquisitions and present noncontrolling interests.

TABLE OF CONTENTS

OUTLOOK

Engine/Mobile Filtration Segment

We expect net sales for our Engine/Mobile Filtration segment to increase between 5.0% and 7.0% in 2010 compared to 2009 due to anticipated improving demand in the over-the-road trucking and locomotive markets. Based on these forecasted higher sales and continued cost reduction initiatives, we anticipate our Engine/Mobile Filtration segment's 2010 operating margin to be between 20.0% and 22.0% compared to 20.1% in 2009.

Industrial/Environmental Filtration Segment

We expect net sales for our Industrial/Environmental Filtration segment to increase between 6.0% and 8.0% in 2010 compared to 2009. This forecasted growth includes the negative impact of the lost 3M business at our HVAC operations, which contributed sales of \$13.7 million in 2009. However, we anticipate offsetting this lost business through additional retail air filter sales opportunities in 2010. We expect solid year-over-year growth in our oil drilling, natural gas and dust collector markets and slower growth in our aerospace and aviation fuel filtration markets. Based on forecasted higher sales in addition to the expected continued positive impact of our HVAC operations restructuring, we expect that our operating margin in our Industrial/Environmental Filtration segment will increase to the range of 8% to 10% in 2010 compared to 5.4% in 2009.

Packaging

We expect net sales for our Packaging segment to increase 8.0% to 11.0% in 2010 compared to 2009. This forecasted increase in sales is primarily driven by anticipated higher sales in the smokeless tobacco market and a one-time, low margin tooling sale offset by lower sales in decorated flat sheet including battery and film products. We anticipate the Packaging segment 2010 operating margin to be consistent with historical operating margins in the range of 7.0% to 8.0%.

Interest Expense and Income Taxes

Assuming no changes in average interest rates, we anticipate interest expense will decline in 2010 compared to 2009 due to the expiration of the interest rate swap agreement and the continued reduction of outstanding balances on our Credit Facility. We expect the 2010 effective tax rate to be in the range of 32.0% and 33.0%.

Cash Flow

We expect to generate from \$80.0 million to \$100.0 million in cash from operating activities in 2010. We anticipate using this cash to fund capital expenditures, potential acquisitions, dividend payments, share repurchases and the repayment of balances on our Credit Facility. We anticipate payments for the addition of plant assets in 2010 to be in the range of \$35.0 million to \$45.0 million including expanding our technical facilities in China for product development and testing.

Diluted Earnings per Share

We expect 2010 diluted earnings per share to be in the range of \$1.55 to \$1.70.

FORWARD LOOKING STATEMENTS

This 2009 Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements made in this 2009 Form 10-K, other than statements of historical fact, are forward-looking statements. You can identify these statements from use of the words may, should, could, potential, continue, plan, forecast, estimate, p intent, anticipate, expect, target, is likely, will, or the negative of these terms, and similar expressions. T statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995.

These forward-looking statements may include, among other things:

Statements and assumptions relating to future growth, earnings, earnings per share and other financial performance measures, as well as our short-term and long-term performance goals;

Statements relating to the anticipated effects on results of operations or financial condition from recent and expected developments or events;

30

TABLE OF CONTENTS

Statements relating to our business and growth strategies; and
Any other statements or assumptions that are not historical facts.

We believe that our expectations are based on reasonable assumptions. However, these forward-looking statements involve known and unknown risks, uncertainties and other important factors that could cause our actual results, performance or achievements, or industry results, to differ materially from our expectations of future results, performance or achievements expressed or implied by these forward-looking statements. In addition, our past results of operations do not necessarily indicate our future results. These and other uncertainties are discussed in the Risk Factors section of this 2009 Form 10-K. Our future results may fluctuate as a result of these and other risk factors detailed from time to time in our filings with the SEC.

You should not place reliance on any forward-looking statements. These statements speak only as of the date of this 2009 Form 10-K. Except as otherwise required by applicable laws, we undertake no obligation to publicly update or revise any forward-looking statements or the risk factors described in this 2009 Form 10-K, whether as a result of new information, future events, changed circumstances or any other reason after the date of this 2009 Form 10-K.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

Our market risk is primarily related to the potential loss arising from adverse changes in interest rates and foreign currency fluctuations. In the normal course of business, we may also be exposed to various market risks that arise from transactions entered into in the normal course of business related to items such as the cost of raw materials and changes in inflation. Certain contractual relationships with customers and vendors mitigate risks from changes in raw material costs and currency exchange rate changes that arise from normal purchasing and normal sales activities.

Interest Rates

We are exposed to changes in interest rates, primarily due to our financing and cash management activities, which include long and short-term debt as well as cash, cash equivalents and certain short-term, highly liquid investments.

Interest rate fluctuations could affect earnings, cash flows or the fair value of our financial liabilities. Our debt obligations are primarily at variable rates and are denominated in U.S. dollars. To minimize the long-term costs of borrowing, we manage our interest rate risk by monitoring trends in rates as a basis for determining whether to enter into fixed rate or variable rate agreements and the duration of such agreements. We mitigated our interest rate risk on our borrowing under our revolving line of credit in 2008 and 2009 by entering into a fixed interest rate swap agreement at the beginning of 2008 which fixed our interest until January 2010. Interest rate risk is not expected to be significant to us in fiscal 2010 as amounts outstanding on our long-term debt agreements are more than offset by cash, cash equivalents and short-term investments. We anticipate paying all amounts outstanding on our revolving line of credit in 2010. As a result, the primary interest rate risk will be driven by our return on short-term investments. Based upon the \$32.2 million in short-term investments at November 30, 2009, a 1% increase in interest rates could positively impact annual interest income by \$0.3 million. This potential interest income benefit would increase or decrease as short-term investment balances increase or decrease.

Foreign Currency

Since we operate through subsidiaries in several countries around the world, our reported financial results of operations, including the reported value of assets and liabilities, are exposed to translation risk when the financial statements of our subsidiaries, as stated in their functional currencies, are translated into the U.S. Dollar. The assets and liabilities of subsidiaries outside the U.S. are translated at period end rates of exchange for each reporting period. Earnings and cash flow statements are translated at weighted-average rates of exchange. Although these translation changes have no immediate cash impact, the translation changes may impact the overall value of net assets.

We are also exposed to transaction risk from changes in foreign currency rates through sales and purchasing transactions when we sell products in functional currencies different from the currency in which product and manufacturing costs were incurred. The functional currencies of our worldwide facilities primarily include the U.S. Dollar, the Euro, the British Pound Sterling, the Canadian Dollar, the Chinese Yuan Renminbi and the

TABLE OF CONTENTS

Mexican Peso. As these currencies fluctuate against each other, and other currencies, we are exposed to foreign currency transaction risk on sales and purchasing transactions.

Currency exchange rates vary daily and often one currency strengthens against the U.S. Dollar while another currency weakens. Because of the complex interrelationship of the worldwide supply chains and distribution channels, it is difficult to quantify the impact of a particular change in exchange rates. However, we estimate that if the U.S. dollar strengthened or weakened 10% relative to the currencies where our foreign income and cash flows are derived the effect on the consolidated results of operations could be \$0.03 to \$0.05 per diluted share. We estimate that the effect of changes in the average foreign currency translation rates in 2009 compared to 2008 negatively impacted our operating profit by approximately \$2.7 million in 2009.

As a result of continued foreign sales and business activities, we continue to evaluate derivative financial instruments, including forwards, swaps and purchased options, to manage foreign currency exchange rate changes in the future. We did not hold any such derivatives during 2009, 2008 or 2007 related to foreign currency exchange.

Item 8. Financial Statements and Supplementary Data.

The Consolidated Financial Statements, the Notes thereto and the report thereon of PricewaterhouseCoopers LLP, an independent registered public accounting firm, required hereunder with respect to the Company and its consolidated subsidiaries are included in this 2009 Form 10-K on pages F-2 through F-36.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure. None.

Item 9A. Controls and Procedures.

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

Under the supervision and with the participation of the Company's management, including its Chief Executive Officer and Chief Financial Officer, the Company conducted an evaluation of its disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Exchange Act. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of November 28, 2009, the end of the period covered by this annual report.

Management's Report on Internal Control Over Financial Reporting

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f), for the Company. Under the supervision and with the participation of management, including the Company's Chief Executive Officer and Chief Financial Officer, an evaluation of the effectiveness of the Company's internal control over financial reporting was conducted based on the framework in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on that evaluation, the Company's management concluded that the Company's internal control over financial reporting was effective as of November 28, 2009.

The effectiveness of the Company's internal control over financial reporting as of November 28, 2009, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report

which appears on page F-2 of this 2009 Form 10-K.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To The Board of Directors and Shareholders
CLARCOR Inc.

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of CLARCOR Inc. and its subsidiaries (the Company) at November 28, 2009 and November 29, 2008, and the results of their operations and their cash flows for each of the three years in the period ended November 28, 2009 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of November 28, 2009, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, appearing on page 32 of the 2009 Form 10-K under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note A to the consolidated financial statements, the Company changed the manner in which it accounts for uncertain tax positions in fiscal year 2008.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS **(Dollars in thousands except per share data)**

A. Accounting Policies

Principles of Consolidation

The Consolidated Financial Statements include all domestic and foreign subsidiaries that were more than 50% owned and controlled as of fiscal year-end 2009. CLARCOR Inc. and its subsidiaries are hereinafter collectively referred to as the Company or CLARCOR. The Company has three reportable segments: Engine/Mobile Filtration, Industrial/Environmental Filtration and Packaging. All intercompany accounts and transactions have been eliminated.

Use of Management's Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results will differ from those estimates.

Review of Subsequent Events

The Company performed a review of subsequent events through January 22, 2010, the date the Consolidated Financial Statements were issued, and concluded no events or transactions occurred during that period requiring recognition or disclosure.

Accounting Period

The Company's fiscal year-end is the Saturday closest to November 30. The fiscal years ended November 28, 2009, November 29, 2008 and December 1, 2007 were comprised of fifty-two weeks. In the Consolidated Financial Statements, all fiscal years are shown to begin as of December 1 and end as of November 30 for clarity of presentation.

Foreign Currency Translation

Financial statements of foreign subsidiaries are translated into U.S. dollars at current rates, except that revenues, costs, expenses and cash flows are translated at average rates during each reporting period and equity accounts are translated at historical rates. Net exchange gains or losses resulting from the translation of foreign financial statements are accumulated with other comprehensive earnings (losses) as a separate component of shareholders' equity and are presented in the Consolidated Statements of Shareholders' Equity.

Cash and Cash Equivalents, Restricted Cash and Short-term Investments

Highly liquid investments with an original maturity of three months or less when purchased or that are readily saleable are considered to be cash and cash equivalents. Restricted cash primarily represents cash balances held by a German bank as collateral for certain guarantees of an overseas subsidiary. Restricted cash classified as current corresponds to guarantees that expire within one year. The Company also has \$1,040 and \$972 of noncurrent restricted cash recorded

in other noncurrent assets as of November 30, 2009 and 2008, respectively, corresponding to guarantees that expire longer than one year from the dates of the Consolidated Balance Sheets.

Cash and cash equivalents, restricted cash and short-term investments represent financial instruments with potential credit risk. The Company mitigates the risk by investing the assets with financially strong institutions and by limiting the amount of credit exposure to any one institution.

Short-term investments primarily include tax-exempt municipal money market funds classified as trading securities.

Short-term investments are carried at fair value. Management determines the appropriate classification of its short-term investments at the time of acquisition and reevaluates such determination at each balance sheet date. The carrying values of cash and cash equivalents and restricted cash approximate fair value.

F-7

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

Derivatives

From time-to-time, the Company may make use of derivative financial instruments to manage certain interest rate and foreign currency risks. Interest rate swap agreements may be utilized to convert certain floating rate debt into fixed rate debt (see Note G). Unrealized gains or losses are recorded in interest expense in the Consolidated Statements of Earnings, and periodic settlement payments are a component of cash flows from operating activities in the Consolidated Statements of Cash Flows. The Company recognizes all derivatives on the balance sheet at fair value (see Note E). Derivatives that are not accounted for as hedges are adjusted to fair value through income.

The Company documents all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedge transactions. In addition, the Company assesses (both at the hedge's inception and on an ongoing basis) the effectiveness of the derivatives that are used in hedging transactions. If it is determined that a derivative is not (or has ceased to be) effective as a hedge, the Company would discontinue hedge accounting prospectively. Ineffective portions of changes in the fair value of cash flow hedges would be recognized in earnings. At November 30, 2009 and 2008, the Company did not have any derivative financial instruments that qualified for hedge accounting.

Accounts Receivable and Allowance for Losses

Trade accounts receivable are recorded at the invoiced amount and generally do not bear interest. Trade accounts receivable represent financial instruments with potential credit risk. The allowance for losses is the Company's best estimate of the amount of probable credit losses in its existing accounts receivable. The Company determines the allowance based on economic conditions in the industries to which the Company sells and on historical experience by evaluating specific customer accounts for risk of loss, fluctuations in amounts owed and current payment trends. The allowances provided are estimates that may be impacted by economic and market conditions which could have an effect on future allowance requirements and results of operations. The Company reviews its allowance for doubtful accounts monthly. Past due balances over ninety days and over a specified amount are reviewed individually for collectability. Account balances are charged off against the allowance when it is probable the receivable will not be recovered. The Company does not have any off-balance sheet credit exposure related to its customers.

Inventories

Inventories are valued at the lower of cost or market primarily determined on the first-in, first-out (FIFO) method of inventory costing, which approximates current cost. Inventories of approximately \$24,000 and \$26,000 are stated at the lower of weighted average cost or market at November 30, 2009 and 2008, respectively. The Company periodically assesses its inventories for potential excess, slow movement and obsolescence and adjusts inventory values accordingly. Inventories are summarized as follows:

	2009	2008
Raw materials	\$ 57,579	\$ 60,575

Work in process	23,405	27,318
Finished products	76,432	70,308
	\$ 157,416	\$ 158,201

Plant Assets

Depreciation is determined by the straight-line method for financial statement purposes and by the accelerated method for tax purposes. The provision for depreciation is based on the estimated useful lives of the assets (15 to 40 years for buildings and improvements, the shorter of the asset life or the life of the lease for leasehold improvements and leased equipment and 3 to 15 years for machinery and equipment). It is the Company's policy to capitalize the cost of renewals and betterments and to charge to expense the cost of current maintenance and repairs. When property or equipment is retired or otherwise disposed of, the net book value of the asset is removed from the Company's books and the resulting gain or loss is reflected in earnings.

F-8

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

Goodwill and Acquired Intangible Assets

The Company recognizes the excess of the cost of an acquired entity over the net amount assigned to assets acquired and liabilities assumed as goodwill. Goodwill is tested for impairment at the reporting unit level on an annual basis and between annual tests in certain circumstances. Impairment losses would be recognized whenever the implied fair value of goodwill is less than its carrying value.

The Company recognizes an acquired intangible asset apart from goodwill whenever the asset arises from contractual or other legal rights, or whenever it is capable of being separated or divided from the acquired entity and sold, transferred, licensed, rented or exchanged, either individually or in combination with a related contract, asset or liability. An intangible asset other than goodwill is amortized over its estimated useful life unless that life is determined to be indefinite. Most of the Company's trade names and trademarks have indefinite useful lives and are subject to impairment testing. All other acquired intangible assets, including patents (average thirteen year life), and other identifiable intangible assets with lives ranging from two to thirty years, are being amortized using the straight-line method over the estimated periods to be benefited. The Company reviews the lives of its definite-lived intangible assets annually, and if necessary, impairment losses are recognized if the carrying amount of an intangible subject to amortization is not recoverable from expected future cash flows and its carrying amount exceeds its fair value.

Impairment of Long-Lived Assets

The Company determines any impairment losses based on underlying cash flows related to specific groups of acquired long-lived assets, including plant assets, associated identifiable intangible assets and goodwill, when events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. As discussed in Note K, the Company recorded an impairment charge of \$1,200 for the year ended November 30, 2009.

Income Taxes

The Company provides for income taxes and recognizes deferred tax liabilities and assets for the expected future tax consequences of temporary differences between the financial statement carrying amounts and the tax basis of assets and liabilities. The Company adopted new income tax guidance pertaining to uncertain tax positions issued by the Financial Accounting Standards Board (FASB) at the beginning of fiscal year 2008. This new guidance was issued to clarify what criteria must be met prior to recognition of the financial statement benefit of a position taken in a tax return. The provisions of this guidance apply broadly to all tax positions taken by a company, including decisions to not report income in a tax return or to classify a transaction as tax exempt. The prescribed approach is determined through a two-step benefit recognition model. The amount of benefit to recognize is measured as the largest amount of tax benefit that is greater than 50 percent likely of being ultimately realized upon settlement. The tax position must be derecognized when it is no longer more likely than not of being sustained.

Accumulated Other Comprehensive Earnings (Loss)

Accumulated other comprehensive earnings (loss), net of tax, consists of foreign currency translation adjustments and pension related gains and losses, prior service costs and credits and any remaining transition amounts that have not yet been recognized through net periodic benefit costs. The components of the ending balances of accumulated other comprehensive earnings (loss) are as follows:

	2009	2008	2007
Pension liability, net of tax	\$(39,212)	\$(18,178)	\$(6,994)
Translation adjustments, net of tax	6,333	(8,384)	12,906
Accumulated other comprehensive earnings (loss)	\$(32,879)	\$(26,562)	\$5,912

The pension liability is net of tax of \$22,796, \$10,790 and \$4,152 for the years ended November 30, 2009, 2008 and 2007, respectively. The translation adjustments are net of tax of \$155 for each of the years ended November 30, 2009, 2008 and 2007.

F-9

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

Stock-based Compensation

Stock-based employee compensation cost is recognized using the fair-value based method for all awards granted on or after the beginning of fiscal year 2006. The Company issues stock option awards and restricted stock unit awards to employees and issues stock option awards and restricted stock to non-employee directors under its stock-based incentive plans. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model. Compensation cost related to restricted stock units is recorded based on the market price of the Company's common stock on the grant date. The Company recognizes compensation expense from the date of grant on a straight-line basis over a four year period or to the date retirement eligibility is achieved, whichever is shorter. For those who are already retirement eligible on the date of grant, compensation expense is recognized immediately.

Revenue Recognition

In general, revenue is recognized when product ownership and risk of loss have transferred to the customer or performance of services is complete and the Company has no remaining obligations regarding the transaction. Estimated discounts, rebates and sales returns are recorded as a reduction of sales in the same period revenue is recognized. Shipping and handling costs are recorded as revenue when billed to customers. The related shipping and handling expenses are included in cost of sales.

The Company acquired a business during 2008, as discussed in Note B, which uses the percentage of completion accounting revenue recognition method for qualifying contracts under which products are manufactured to customer specifications. Approximately \$35,600 and \$29,000 of the Company's total revenue for fiscal year 2009 and 2008, respectively, was recognized under the percentage of completion accounting method. Revenue is recognized on contracts utilizing the percentage of completion method based on costs incurred as a percentage of estimated total costs. Revenue recognized on uncompleted contracts in excess of amounts billed to customers is reflected as a current asset. Amounts billed to customers in excess of revenue recognized on uncompleted contracts are reflected as a current liability. When it is estimated that a contract will result in a loss, the entire amount of the estimated loss is accrued. The effect of revisions in costs and profit estimated for contracts is reflected in the accounting period in which the facts requiring the revisions become known.

Product Warranties

The Company provides for estimated warranty costs when the related products are recorded as sales or for specific items at the time existence of the claims is known and the amounts are reasonably determinable.

Research and Development

The Company charges research and development costs, relating to the development of new products or the improvement or redesign of its existing products, to expense when incurred. These costs were approximately \$9,595 in 2009, \$9,343 in 2008 and \$8,996 in 2007.

Self-Insurance

Insurance coverage is generally obtained for certain property and casualty exposures, as well as risks that require insurance by law or contract. The Company self-insures for certain other insurable risks: primarily workers compensation, general liability, property losses and employee medical coverage. The Company carries insurance for certain losses above specified amounts. Liabilities are determined using actuarial estimates of the aggregate liability for claims incurred and an estimate of incurred but not reported claims, on an undiscounted basis.

Guarantees

The Company has provided letters of credit of approximately \$23,395 to various government agencies, primarily related to industrial revenue bonds, and to insurance companies and other entities in support of its obligations. The Company believes that no payments will be required resulting from these obligations.

In the ordinary course of business, the Company also provides routine indemnifications and other guarantees whose terms range in duration and often are not explicitly defined. The Company does not believe these will have a material impact on the results of operations or financial condition of the Company.

F-10

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

New Pronouncements

During the fourth quarter of fiscal year 2009, the Company adopted FASB-issued guidance on retirement benefits requiring the funded status of pension and other postretirement plans be measured as of the date of the Consolidated Balance Sheet. The Company previously used a November 1st measurement date. The impact of the transition to fiscal year-end measurement dates was recorded as an adjustment to beginning fiscal year 2009 balances as summarized below.

	December 1, 2008 Prior to Adjustment for Measurement Date	Adjustment for Measurement Date	December 1, 2008 After Adjustment for Measurement Date
Noncurrent deferred income taxes	\$ 39,317	\$ (325)	\$ 38,992
Liability for postemployment benefits	27,307	886	28,193
Accumulated other comprehensive loss	(26,562)	(268)	(26,830)
Retained earnings	579,502	(293)	579,209

In August 2009, the FASB issued guidance regarding the measuring of liabilities at fair value. The guidance indicates that if an identical liability is traded in an active market, the quoted price of that liability represents a Level 1 fair value measurement. If a quoted price for an identical liability traded in an active market is not available, an entity must use one of the following approaches to maximize the use of relevant observable inputs and minimize the use of unobservable inputs: (1) the quoted price of the identical liability when traded as an asset in an active market, (2) the quoted price of the identical liability or the identical liability when traded as an asset in an inactive market, (3) the quoted price for similar liabilities or similar liabilities when traded as assets in an inactive market, or (4) another valuation technique that is consistent with FASB Accounting Standards Codification (Codification) Topic 820, such as an income approach or a market approach. The guidance was effective upon issuance, and is applicable to the Company's fair value measurement of the interest rate agreement and the disclosure of the fair value estimate of the Company's long-term debt at November 30, 2009.

On June 29, 2009, the FASB issued guidance establishing the Codification as the source of authoritative U.S. GAAP recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal securities laws are also sources of authoritative U.S. GAAP for SEC registrants. The Codification supersedes all existing non-SEC accounting and reporting standards. All other nongrandfathered non-SEC accounting literature not included in the Codification will become nonauthoritative. The FASB will no longer issue new standards in the form of Statements, FASB Staff Positions, or Emerging Issues Task Force Abstracts. Instead, the FASB will issue Accounting Standards Updates, which will serve only to update the Codification, provide background information about the guidance and provide the bases for conclusions on changes in the Codification. All content in the Codification carries the same level of authority, and the U.S. GAAP

hierarchy was modified to include only two levels of U.S. GAAP: authoritative and nonauthoritative. The Codification is effective for the Company's interim and annual periods beginning with the Company's year ending November 30, 2009. Adoption of the Codification affected disclosures in the Consolidated Financial Statements by eliminating references to previously issued accounting literature, such as FASBs, EITFs and FSPs.

In May 2009, the FASB issued guidance establishing general standards for accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued and shall be applied to subsequent events not addressed in other applicable generally accepted accounting principles. This guidance, among other things, sets forth the period after the balance sheet date during which management should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements and the disclosures an entity should make about events or transactions that occurred after the balance sheet date. This guidance was adopted for the Company's quarterly period ended August 29, 2009.

F-11

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

In April 2009, the FASB issued guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased. The guidance also re-emphasizes that regardless of market conditions the fair value measurement is an exit price concept as defined. The scope of this guidance does not include asset and liability measurements based upon quoted prices in active markets for identical assets (level 1 inputs). The Company adopted this guidance, which is applied prospectively to all fair value measurements where appropriate, effective as of the beginning of the third quarter of fiscal year 2009. The majority of the Company's fair value measurements (see Note E) consist of level 1 inputs, except for the interest rate agreement, which expired January 1, 2010.

In April 2009, the FASB issued guidance requiring publicly-traded companies to provide disclosures on the fair value of financial instruments in interim financial statements. This guidance was adopted effective as of the beginning of the third quarter of fiscal year 2009. The Company added additional disclosures similar to Note E in its interim Consolidated Condensed Financial Statements.

In December 2008, the FASB expanded the required disclosures for pension and other postretirement plans by requiring disclosures about how investment allocation decisions are made by management, major categories of plan assets and significant concentration of risk. Additionally, an employer is required to disclose information about the valuation of plan assets. This accounting guidance is effective for the Company's fiscal year 2010 and will affect the disclosures in the financial statements.

During fiscal year 2009, the Company adopted additional FASB guidance relating to nonrecurring measurements of nonfinancial assets and liabilities, which had been previously deferred by the FASB in February 2008. Effective December 1, 2007, the Company adopted FASB guidance, which defines fair value, establishes a framework for measuring fair value pursuant to GAAP and expands disclosures about fair value. These provisions relate to the Company's financial assets and liabilities. See Note E for further discussion.

In June 2008, the FASB issued guidance that requires that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) be considered participating securities and be included in the computation of earnings per share pursuant to the two-class method. This guidance is effective for the Company's fiscal year 2010 and requires the restatement of all previously reported earnings per share data. The Company's unvested restricted stock unit awards discussed in Note N qualify as participating securities under this guidance. The Company's preliminary assessment is the unvested restricted stock unit awards will not materially affect the computation of basic earnings per share or change basic earnings per share as previously reported.

In March 2008, the FASB issued guidance requiring enhanced disclosures of derivative and hedging activity to enable investors to better understand their effects on an entity's financial position, financial performance and cash flows. The Company adopted this guidance effective as of the beginning of the first quarter of fiscal year 2009 by adding additional disclosure of the fair values of derivative instruments and their gains and losses in a tabular format.

In December 2007, the FASB issued guidance that will affect the Company's accounting for businesses acquired after November 30, 2009, the presentation of noncontrolling interests, previously called minority interests, in its

Consolidated Financial Statements and will also require that assets acquired or liabilities assumed in a business combination and arising from a contingency be recognized at fair value at the acquisition date if the acquisition date fair value can be determined during the measurement period. The Company will adopt this guidance in fiscal year 2010 which will impact the way the Company accounts for future business acquisitions and presents noncontrolling interests. The guidance dealing with noncontrolling interests will be retroactively applied to all period presented in the Company's Consolidated Financial Statements. Noncontrolling interests will be reflected as part of shareholders' equity and as a result, will increase shareholders' equity by \$3,268, \$4,172 and \$4,577 at November 30, 2009, 2008 and 2007, respectively. Additionally, minority interests in earnings of subsidiaries will no longer be deducted in the determination of net earnings.

In September 2006, the FASB issued guidance requiring recognition of the overfunded or underfunded status of defined benefit postretirement plans as an asset or liability in the statement of financial position and to

F-12

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

recognize changes in the funded status in other comprehensive earnings in the year in which the changes occur. This guidance was effective for recognition of the funded status of the benefit plans for the Company's fiscal year 2007 and resulted in an after-tax decrease to shareholders' equity of \$4,895, net of tax of \$2,906. See Note I for further discussion of the impact of this change on the Company's Consolidated Financial Statements.

B. Investments and Business Acquisitions

Investments

Effective May 1, 2008, the Company acquired a 30% share in BioProcessH₂O LLC (BPH), a Rhode Island based manufacturer of industrial waste water and water reuse filtration systems, for \$4,000, payable \$2,000 in cash at the acquisition date with the remaining \$2,000 to be paid by December 31, 2009. The Company paid the remaining \$2,000 during fiscal year 2009. Under the terms of the agreement with BPH, the Company has the right, but not the obligation, to acquire additional ownership shares and eventually complete ownership of the company over several years at a price based on, among other factors, BPH's operating income. The investment, with a carrying amount of \$4,045 included in other noncurrent assets, is being accounted for under the equity method of accounting. The carrying amount is adjusted each period to recognize the Company's share of the earnings or losses of the investee based on the percentage of ownership, as well as the receipt of any dividends. During the year ended November 30, 2008, the Company received dividends of \$206 from BPH. The equity investment is periodically reviewed for indicators of impairment. The Company's share of undistributed earnings was not material at November 30, 2009 or 2008.

Business Acquisitions

On April 20, 2009, the Company purchased the remaining 20% minority interest in its consolidated subsidiary based in Weifang, China for \$4,592 including acquisition costs. This subsidiary is part of the Company's Engine/Mobile Filtration segment and manufactures heavy-duty engine filters, certain lines of environmental filters and filter systems and filters used in off-shore oil drilling. An allocation of the purchase price for the acquisition has been made to major categories of assets and liabilities. Acquired intangible assets of \$1,960 were recorded in connection with the purchase. The \$222 excess of the initial purchase price over the estimated fair value of the assets acquired and liabilities assumed was recorded as goodwill.

On April 6, 2009, the Company purchased Weifang Yuhua Filters Ltd. (Yuhua), based in Weifang, China for \$643, excluding cash acquired and including acquisition costs. Yuhua manufactures heavy-duty engine filters. The business is included in the Company's Engine/Mobile Filtration segment from the date of acquisition. The acquisition is not material to the results of the Company. An allocation of the purchase price for the acquisition has been made to major categories of assets and liabilities. The Company did not recognize any goodwill in connection with this acquisition.

On February 1, 2009, the Company purchased 85% ownership interests in Pujiang Novaeastern International Mesh Co., Ltd. (Pujiang) and Quzhou Chinagrace Filter Co., Ltd. (Quzhou). Both companies are based in China and were under common ownership. Pujiang and Quzhou are manufacturers of wire mesh filtration products sold primarily to

the fibers, resin and aerospace industries. The combined purchase price for the ownership interests in both companies was \$618, excluding cash acquired and including acquisition costs. The Company has the right, but not the obligation, to purchase the remaining 15% ownership interests using a formula based on the combined companies' future operating results. The businesses are included in the Company's Industrial/Environmental Filtration segment from the date of acquisition. The acquisition is not material to the results of the Company. An allocation of the purchase price for the acquisition has been made to major categories of assets and liabilities. Acquired intangible assets of \$201 were recorded in connection with the purchase. The Company did not recognize any goodwill in connection with this acquisition.

On January 16, 2009, the Company purchased certain assets of Meggitt (UK) Limited (Meggitt), for \$578. This business was acquired to expand the Company's product range of aerospace filters sold primarily to European aircraft manufacturers and aerospace parts distributors. The purchased assets were combined into an existing Company subsidiary which is part of the Company's Industrial/Environmental Filtration segment. The Company expects to make an additional payment in 2010 of approximately \$146 to the former owner of the

F-13

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

Meggitt assets contingent upon the renewal of a contract with a customer. The acquisition is not material to the results of the Company. An allocation of the purchase price for the acquisition has been made to major categories of assets. Acquired intangible assets included customer relationships valued at \$201 which will be amortized over their estimated useful life of 13 years. The \$231 excess of the initial purchase price over the estimated fair value of the net assets acquired was recorded as goodwill.

On December 29, 2008, the Company purchased the Keddeg Company (Keddeg), a manufacturer of aerospace filtration products based in Lenexa, Kansas. The purchase price was \$5,570, excluding cash acquired and including acquisition costs. Keddeg's results are included as part of the Company's Industrial/Environmental Filtration segment from the date of acquisition. The acquisition is not material to the results of the Company. An allocation of the purchase price has been made to major categories of assets and liabilities assumed. The \$1,828 excess of the purchase price over the fair value of the net tangible and identifiable intangible assets acquired was recorded as goodwill. The fair value of the identifiable intangible assets and their respective lives are shown in the following table.

Identifiable Intangible Asset	Value	Estimated Useful Life
Trade names	\$ 553	Indefinite
Non-compete agreements	86	5 years
Customer relationships	875	12 years
Developed technology	1,256	10 years
Total fair value	\$ 2,770	

On December 3, 2007, the Company acquired Perry Equipment Corporation (Peco), a privately-owned manufacturer of engineered filtration products and technologies used in a wide array of industries, including oil and natural gas, refining, power generation, petrochemical, food and beverage, electronics, polymers and pulp and paper. Peco is based in Mineral Wells, Texas with operations in Mexico, Canada, the United Kingdom, Italy, Romania, Malaysia and China. Peco was merged with the Company's Facet operations with the combined headquarters based in Mineral Wells. Peco was acquired to expand the Company's product offerings, technology, filtration solutions and customer base in the oil and natural gas industries. Its results are included as part of the Company's Industrial/Environmental Filtration segment since the date of acquisition. The purchase price was \$145,807 excluding cash acquired and including acquisition costs. The Company issued 2,137,797 shares of CLARCOR common stock with a value of approximately \$71,954 and paid the remaining purchase price with available cash of \$5,301 and \$80,000 of cash borrowed under the Company's multicurrency revolving credit agreement. For accounting purposes, the basis for determining the value of the common stock issued in connection with the acquisition was the average closing price per share of CLARCOR stock for the five trading days centered on the October 17, 2007 announcement of the purchase agreement.

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

During fiscal year 2009, the Company resolved various tax accrual issues resulting in a decrease to goodwill of \$510. An allocation of the purchase price for the acquisition has been made to major categories of assets and liabilities. The \$101,477 excess of the purchase price over the fair value of the net tangible and identifiable intangible assets acquired was recorded as goodwill. The fair value of the identifiable intangible assets and their respective lives are shown in the following table.

Identifiable Intangible Asset	Value	Estimated Useful Life
Trade names	\$ 11,800	Indefinite
Non-compete agreements	800	2 years
Customer relationships	14,200	15 years
Developed technology	20,300	16 years
Total fair value	\$ 47,100	

The following condensed balance sheet is based on the fair values of the assets acquired and liabilities assumed as of December 3, 2007.

Cash	\$11,448
Accounts receivable, less allowance for losses	18,658
Inventory, net	15,220
Prepaid expenses and current assets	2,512
Current deferred tax assets	2,119
Plant assets	17,114
Goodwill	101,477
Trademarks and trade names	11,800
Other acquired intangibles	35,300
Other noncurrent assets	1,013
Total assets acquired	216,661
Current notes payable	(7,411)
Accounts payable and accrued liabilities	(32,102)
Long-term deferred tax liabilities	(17,954)
Long-term liabilities	(1,939)
Net assets acquired	157,255
Less cash acquired	(11,448)
Assets acquired, net of cash	\$ 145,807

The following unaudited pro forma information summarizes the results of operations as if the Peco acquisition had been completed as of the beginning of fiscal year 2007. The pro forma information gives effect to actual operating results prior to the acquisition, adjusted to include the estimated pro forma effect of interest expense, depreciation, amortization of intangible assets, income taxes and the additional Company shares issued. These pro forma amounts are based on an allocation of the purchase price to estimates of the fair values of the assets acquired and liabilities

assumed. The pro forma amounts include the Company's determination of purchase accounting adjustments based upon available information and certain assumptions that the Company believes are reasonable. The unaudited pro forma results do not include the impact of any revenues, costs or other operating synergies and non-recurring charges resulting from the acquisition. In addition, management has performed a review of the respective accounting policies and has determined that conforming Peco's policies to the Company's policies, where applicable, creates no significant differences that impact the unaudited pro forma amounts shown below.

F-15

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

The unaudited pro forma amounts do not purport to be indicative of the results that would have actually been obtained if the acquisition had occurred as of the beginning of the periods presented or that may be obtained in the future.

	For the Year Ended November 30, 2007 (Unaudited)
Net sales	\$ 1,034,815
Operating profit	136,955
Net earnings	93,174
Earnings per share basic	\$ 1.78
Earnings per share diluted	\$ 1.76

Also in December 2007, the Company purchased a distributor of engineered filtration products in Canada for \$1,402 including acquisition costs. During fiscal year 2008, \$811 of the purchase price was paid, \$198 was paid during fiscal year 2009 and the remaining amount will be paid over the next three years. An allocation of the purchase price for the acquisition has been made to major categories of assets and liabilities. The \$698 excess of the purchase price over the fair value of the net tangible and identifiable intangible assets acquired was recorded as goodwill. The business is included in the Industrial/Environmental Filtration segment from the date of acquisition and is not material to the results of the Company.

On March 5, 2007, the Company acquired an 80% ownership share in Sinfa SA, a manufacturer of automotive and heavy-duty engine filters based in Casablanca, Morocco, which is included in the Engine/Mobile Filtration segment from the date of acquisition. As part of the purchase agreement, the Company and the minority owners each have an option to require the purchase of the remaining 20% ownership share by the Company after December 31, 2012. As of the end of 2009, the preliminary purchase price for such 20% ownership share is estimated to be \$3,364 based on the formula in the purchase agreement. Any change in the estimated purchase price for the remaining ownership share will be adjusted through net earnings. During fiscal year 2009, the Company was refunded a portion of its purchase price which had been held in escrow. This refund reduced goodwill by \$243.

During fiscal year 2009, the Company paid an additional \$160 related to a 2006 Industrial/Environmental Filtration segment acquisition, pursuant to the terms of the purchase agreement. The payment was recorded as goodwill. Additional payments, not to exceed approximately \$923, may be required in future years based on the operating performance of this entity.

Also during fiscal year 2009, the Company recognized additional tax benefits related to a prior year acquisition which increased goodwill by \$580.

C. Plant Assets

Plant assets at November 30, 2009 and 2008 were as follows:

	2009	2008
Land	\$8,801	\$8,757
Buildings and building fixtures	98,264	97,459
Machinery and equipment	317,686	309,213
Construction in process	22,490	23,994
	447,241	439,423
Accumulated depreciation	(259,150)	(246,824)
	\$188,091	\$192,599

F-16

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

D. Goodwill and Acquired Intangible Assets

The following table reconciles the activity for goodwill by segment for fiscal years 2009 and 2008. All goodwill is stated on a gross basis, as the Company has not recorded any impairment charges against goodwill.

	Engine/Mobile Filtration	Industrial/ Environmental Filtration	Packaging	Total
Balance at 2007:	\$ 24,185	\$ 100,533	\$	\$ 124,718
Acquisitions	14	102,942		102,956
Currency translation adjustments	(3,056)	(654)		(3,710)
Balance at 2008	21,143	202,821		223,964
Acquisitions	(21)	2,289		2,268
Currency translation adjustments	1,429	521		1,950
Balance at 2009	\$ 22,551	\$ 205,631	\$	\$ 228,182

The Company completed an annual impairment review at each fiscal year-end and concluded there was no impairment of goodwill. In performing the impairment reviews, the Company estimated the fair values of the reporting units using a present value method that discounted future cash flows. Such valuations are sensitive to assumptions associated with cash flow growth, discount rates, terminal value and the aggregation of reporting unit components. The Company further assessed the reasonableness of these estimates by using valuation methods based on market multiples.

The following table summarizes acquired intangible assets by segment. Other acquired intangible assets include parts manufacturer regulatory approvals, proprietary technology, patents and noncompete agreements.

	Engine/Mobile Filtration	Industrial/ Environmental Filtration	Packaging	Total
Balance at 2009:				
Trademarks, gross indefinite lived	\$ 603	\$ 41,022	\$	\$41,625

F-17

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

The Company performed annual impairment tests on its indefinite-lived intangible assets at each fiscal year-end using the relief-from-royalty method to determine the fair value of its trademarks and trade names. There was no impairment as the fair value was greater than the carrying value for these indefinite-lived intangible assets as of these dates.

In addition, the Company reassessed the useful lives and classification of identifiable finite-lived intangible assets at each year-end and determined that they continue to be appropriate. Amortization expense was \$4,957, \$5,157 and \$2,531 for the years ended November 30, 2009, 2008 and 2007, respectively. The estimated amounts of amortization expense for the next five years are: \$4,636 in 2010, \$4,575 in 2011, \$4,560 in 2012, \$4,490 in 2013 and \$4,304 in 2014.

E. Fair Value Measurements

The Company measures certain assets and liabilities at fair value, as discussed throughout the footnotes to its Consolidated Financial Statements. Assets and liabilities that have recurring fair value measurements are shown below:

	Fair Value Measurements at Reporting Date			
	Using	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Total				
Balance at 2009:				
Short-term investments	\$32,171	\$ 32,171	\$	\$
Restricted trust (part of noncurrent assets)	1,419	1,419		
Interest rate agreement (part of current liabilities)	(961)		(961)	
Balance at 2008:				
Short-term investments	\$7,269	\$ 7,269	\$	\$
Restricted trust (part of noncurrent assets)	1,428	1,428		
Interest rate agreement (part of long-term liabilities)	(2,007)		(2,007)	

The Company's short-term investments primarily consist of tax-exempt municipal money market funds which are actively traded. The restricted trust, which is used to fund certain payments for the Company's U.S. combined nonqualified pension plans, consists of actively traded equity and bond funds. The interest rate agreement's fair value was determined using the present value of expected future cash flows using forward rates as of the Consolidated

Balance Sheet dates and discount rates commensurate with the risks associated with those cash flows. See Note A and Note G for further discussions regarding the interest rate agreement.

F. Accounts Payable and Accrued Liabilities

Accounts payable and accrued liabilities at November 30, 2009 and 2008 were as follows:

	2009	2008
Accounts payable	\$ 54,627	\$ 65,398
Accrued salaries, wages and commissions	8,599	14,292
Compensated absences	7,903	8,004
Accrued insurance liabilities	10,572	9,668
Customer deposits	8,705	11,777
Other accrued liabilities	36,018	29,153
	\$ 126,424	\$ 138,292

F-18

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

No amounts within the other accrued liabilities amount shown above exceed 5% of total current liabilities.

Warranties are recorded as a liability on the balance sheet and as charges to current expense for estimated normal warranty costs and, if applicable, for specific performance issues known to exist on products already sold. The expenses estimated to be incurred are provided at the time of sale and adjusted as needed, based primarily upon experience. Changes in the Company's warranty accrual for the years ended November 30, 2009, 2008 and 2007 are as follows:

	2009	2008	2007
Balance at beginning of period, included in other accrued liabilities	\$2,494	\$1,485	\$1,486
Business acquisitions		1,732	
Accruals for warranties issued during the period	2,324	1,015	1,028
Accruals related to pre-existing warranties	39	48	211
Settlements made during the period	(965)	(1,637)	(1,056)
Other adjustments, including currency translation	97	(149)	(184)
Balance at end of period, included in other accrued liabilities	\$3,989	\$2,494	\$1,485

G. Long-Term Debt and Interest Rate Agreement

Long-term debt at November 30, 2009 and 2008 consisted of the following:

	2009	2008
Multicurrency Revolving Credit Agreements, at an interest rate of 0.583% and 1.740%, respectively, at November 30	\$35,000	\$75,000
Industrial Revenue Bonds, at a weighted average interest rate of 0.51% and 1.30%, respectively, at November 30	15,820	7,410
Note payable, due March 2012, at a fixed interest rate of 6.00% at both year ends	1,116	1,147
Other	259	393
	52,195	83,950
Current portion	(99)	(128)
	\$52,096	\$83,822

An expected present value technique is used to estimate the fair value of long-term debt. A fair value estimate of \$49,513 and \$82,858 for long-term debt in 2009 and 2008, respectively, is based on the current interest rates available to the Company for debt with similar remaining maturities.

On December 18, 2007, the Company entered into a five-year multicurrency revolving credit agreement (Credit Facility) with a group of financial institutions under which it may borrow up to \$250,000 under a selection of currencies and rate formulas. The Credit Facility replaced the existing \$165,000 five-year multicurrency revolving

credit agreement entered into in April 2003. The Credit Facility interest rate is based upon, at the Company's election, either a defined Base Rate or the London Interbank Offered Rate (LIBOR) plus or minus applicable margins.

Commitment fees, letter of credit fees and other fees are also payable as provided in the credit agreement and approximate \$100 per year.

Borrowings under the Credit Facility are unsecured, but are guaranteed by certain subsidiaries of the Company. The agreement contains certain restrictive covenants that include limiting new borrowings, maintaining minimum interest coverage and restricting certain changes in ownership. The Credit Facility includes a \$75,000 letter of credit subline, against which \$8,491 in letters of credit had been issued at both November 30, 2009 and 2008.

As of November 30, 2009 and 2008, the industrial revenue bonds include \$7,410 issued in cooperation with the Campbellsville-Taylor County Industrial Development Authority (Kentucky) due May 1, 2031. The interest

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

rate on this bond is reset weekly. As of November 30, 2009, the industrial revenue bonds also included \$8,410 re-issued in cooperation with the South Dakota Economic Development Finance Authority which is due February 1, 2016. The interest rate on this bond is also reset weekly.

Required principal maturities of long-term debt as of year-end 2009 for the next five fiscal years ending November 30 are as follows: \$99 in 2010, \$92 in 2011, \$1,170 in 2012, \$35,014 in 2013, \$0 in 2014 and \$15,820 thereafter.

On January 2, 2008, the Company entered into a fixed rate interest swap agreement (Swap Agreement) to manage its interest rate exposure on certain amounts outstanding under the Credit Facility. The Company's accounting policies for derivatives are discussed in Note A. The Swap Agreement provides for the Company to receive interest at floating rates based on LIBOR and pay a 3.93% fixed interest rate plus an applicable margin on a notional amount of \$100,000. Payments pursuant to the Swap Agreement are settled on a net basis quarterly. The agreement expired January 1, 2010. Hedge accounting has not been applied to the Swap Agreement and therefore, unrealized gains or losses are recorded in interest expense in the Consolidated Statements of Earnings. Periodic settlement payments are recorded as a component of cash flows from operating activities in the Consolidated Statements of Cash Flows.

The Swap Agreement incorporates by reference the non-financial and financial debt covenants included in the Credit Facility. The Swap Agreement also includes other events which would qualify as a default or termination event, whereby the counterparty could request payment on the derivative instrument. Should the counterparty to the Swap Agreement fail to meet its obligations, the Company would be exposed to greater interest rate fluctuations along with the cost, if any, to extinguish the contract. The Company manages exposure to counterparty credit risk by entering into derivative financial instruments with institutions that can be expected to perform fully under the terms of the agreements.

At November 30, 2009 and 2008, the Company had the following derivative in a liability position (see Note E). The Company did not have any derivatives in an asset position at either reporting date.

Derivatives Not Designated as Hedging Instruments	Derivatives in Liability Position	
	Consolidated Balance Sheet Location	Fair Value
2009		
Fixed rate interest swap agreement	Current liabilities	\$ 961
Total		\$ 961
2008		
Fixed rate interest swap agreement	Other long-term liabilities	\$ 2,007
Total		\$ 2,007

The following table reflects the loss on the interest rate agreement for the years ended November 30, 2009 and 2008, respectively.

Derivatives Not Designated as Hedging Instruments	Location of Loss on Interest Rate Agreement	Amount of Loss on Interest Rate Agreement	
		2009	2008
Fixed rate interest swap agreement	Interest expense	\$ 1,123	\$ 2,408
The Company made net settlement payments on the fixed interest rate swap agreement of \$2,169 and \$401 for the years ended November 30, 2009 and 2008, respectively.			

H. Leases

The Company has various lease agreements for offices, warehouses, manufacturing plants and equipment that expire on various dates through December 2025. Some of these lease agreements contain renewal options and provide for payment of property taxes, utilities and certain other expenses. Commitments for minimum

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

rentals under noncancelable leases having initial or remaining terms in excess of one year at November 30, 2009 are: \$10,624 in 2010, \$9,159 in 2011, \$7,118 in 2012, \$6,324 in 2013, \$5,687 in 2014 and \$20,873 thereafter. Rent expense totaled \$13,804, \$12,254 and \$9,228 for the years ended November 30, 2009, 2008 and 2007, respectively.

I. Pension and Other Postretirement Plans

The Company has defined benefit pension plans and a postretirement healthcare benefit plan covering certain current and retired employees. During fiscal year 2008, the Company acquired a qualified U.S. pension plan related to the Peco acquisition discussed in Note B. The pension obligation and plan assets on the date of acquisition were \$16,399 and \$14,561, respectively. Participation in that plan was frozen in 2000, prior to the Company's acquisition of Peco.

Effective November 30, 2007, the Company adopted FASB guidance requiring recognition of the overfunded or underfunded status of defined pension and other postretirement plans as an asset or liability in the Consolidated Balance Sheet. Changes in that funded status are recognized in accumulated other comprehensive earnings (loss) in the year in which the adoption occurs and in other comprehensive earnings in the following years. Additional FASB guidance regarding the change in the measurement date of pension and other postretirement plans from a November 1st date to the Company's fiscal year-end date was effective for fiscal year 2009.

The Company has frozen participation in its defined benefit plans. For one of the plans, certain current plan participants continue to participate in the plan, while other current participants do not accrue future benefits under the plan but participate in an enhanced defined contribution plan which offers an increased Company match.

The Company's policy is to contribute to its qualified U.S. and non-U.S. pension plans at least the minimum amount required by applicable laws and regulations, to contribute to the U.S. combined nonqualified plans when required for benefit payments, and to contribute to the postretirement healthcare benefit plan an amount equal to the benefit payments. The Company, from time to time, makes voluntary contributions in excess of the minimum amount required as economic conditions warrant. The Company did not make a voluntary contribution to its qualified U.S. pension plans in 2009, 2008 or 2007. The Company has not determined whether it will make a voluntary contribution to its U.S. qualified plans in 2010; however, it does expect to contribute \$55 to its U.S. qualified plans, \$5,719 to its U.S. combined nonqualified plans, \$407 to its non-U.S. plan and \$154 to its postretirement healthcare benefit plan to pay benefits during 2010.

The accumulated benefit obligation (ABO) and fair value of plan assets for qualified pension plans with ABOs in excess of plan assets were \$136,461 and \$95,604, respectively, at November 30, 2009. The projected benefit obligation (PBO) and fair value of plan assets for qualified pension plans with PBOs in excess of plan assets were \$142,262 and \$95,604, respectively, at November 30, 2009.

In addition to the plan assets related to its qualified plans, the Company has also funded \$1,419 and \$1,428 at November 30, 2009 and 2008, respectively, into a restricted trust for its U.S. combined nonqualified plans, see Note E. This trust is included in other noncurrent assets in the Consolidated Balance Sheets. Both the ABO and PBO for the U.S. combined nonqualified plans were \$20,808, at November 30, 2009.

During the fourth quarter of fiscal year 2009, the method of determining the amortization of unrealized gains and losses included in accumulated other comprehensive earnings (loss) related to the U.S. combined nonqualified plans was changed from a simple average of the remaining years of future service of participants to a weighted average approach to more accurately reflect the expense incurred related to participants over their remaining expected service with the Company. Additionally, the gains and losses being amortized include gains and losses occurring during the year. As a result of this change, a \$2,000 charge was recorded which increased pension expense, included in selling and administrative expenses in the accompanying Consolidated Statements of Earnings. This charge also reduced earnings before income taxes and minority interests by \$2,000 and reduced net earnings by \$1,266. The Company determined that the retroactive effect of applying this change was not material to any prior periods or the current period and therefore recorded the entire amount during the current year.

F-21

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

During fiscal year 2008, as a result of two plant closings in the Industrial/Environmental Filtration segment, the Company recognized a curtailment loss of \$516 in current earnings and \$6,478, net of tax, in other comprehensive earnings due to the significant reduction in the expected aggregate years of future service cost for employees covered by one of its U.S. qualified pension plans. The curtailment loss includes recognition of the change in the PBO and a portion of the previously unrecognized prior service cost reflecting the reduction in expected future service. The PBO increased by \$333. The remeasurement of the U.S. qualified pension plan as of the July 1, 2008 curtailment date increased fiscal year 2008 pension costs by \$575.

The following table shows reconciliations of the pension plans and other postretirement plan benefits as of November 30, 2009 and 2008. The accrued pension benefit obligation includes an unfunded benefit obligation of \$20,808 and \$15,006 as of November 30, 2009 and 2008, respectively, related to the Company's U.S. combined nonqualified plans.

	Pension Benefits		Other Postretirement Benefits	
	2009	2008	2009	2008

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

As discussed in Note A, in 2009 the Company adjusted accumulated other comprehensive earnings (loss) by \$268, net of tax of \$155 in connection with the adoption of pension and other postretirement plans measurement date guidance.

This adjustment is included in the 2009 amounts in the previous table.

The discount rate is used to calculate the present value of the PBO. The Company's objective in selecting a discount rate is to select the best estimate of the rate at which the benefit obligations could be effectively settled on the measurement date taking into account the nature and duration of the benefit obligations of the plan. In making this estimate, the Company looks at rates of return on high-quality fixed-income investments currently available and expected to be available during the period to maturity of the benefits. This process includes looking at the bonds available on the measurement date with a quality rating of Aa or better. Similar appropriate benchmarks are used to determine the discount rate for the non-U.S. plan. The difference in the discount rates between the qualified, the nonqualified and the other postretirement plans is due to different expectations as to the period of time in which plan members will participate in the various plans. In general, higher discount rates correspond to longer participation periods. The assumptions for the discount rate, rate of compensation increase and expected rate of return and the asset allocations related to the non-U.S. plan are not materially different than for the U.S. qualified plans.

The rate of compensation increase represents the long-term assumption for expected increases in salaries among continuing active participants accruing benefits in the pay-related plans. The Company considers the impact of profit-sharing payments, merit increases and promotions in setting the salary increase assumption as well as possible future inflation increases and its impact on salaries paid to plan participants at the locations where the Company has facilities.

For the U.S. combined nonqualified plans, the rate of compensation increase is assumed to be zero. The liability is based on the three highest consecutive compensation years for a small group of active participants. It is unlikely that future compensation will exceed the highest level already achieved over three consecutive past years.

The target allocation for the U.S. plans is 70% equity securities, 25% debt securities and 5% real estate. The target allocation is based on the Company's desire to maximize total return, considering the long-term funding objectives of the pension plans, but may change in the future. Plan assets are diversified to achieve a balance between risk and return. The Company does not invest plan assets in private equity funds or hedge funds. The Company's expected long-term rate of return considers historical returns on plan assets as well as future expectation given the current and target asset allocation and current economic conditions with input from investment managers and actuaries. The expected rate of return on plan assets is designed to be a long-term assumption that may be subject to considerable year-to-year variance from actual returns.

As of the November measurement dates, the fair values of actual pension asset allocations were as follows:

November 30, 2009	November 1, 2008
-------------------------	---------------------

Equity securities	71.2	%	70.6	%
Debt securities	24.9	%	22.2	%
Real estate and other	3.9	%	7.2	%
	100.0	%	100.0	%

F-24

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

The components of net periodic benefit cost for pensions are shown below. Net periodic benefit cost is based on assumptions determined at the prior year-end measurement date. Increases in the liability due to changes in plan benefits are recognized in the net periodic benefit costs through straight-line amortization over the average remaining service period of employees expected to receive benefits.

	Pension Benefits			
	2009	2008	2007	
Components of net periodic benefit cost:				
Service cost	\$1,799	\$2,411	\$2,819	
Interest cost	9,275	8,452	7,241	
Expected return on plan assets	(6,938)	(9,863)	(8,601)	
Amortization of unrecognized:				
Prior service cost	127	158	163	
Net actuarial loss	3,559	451	1,252	
Net periodic benefit cost	7,822	1,609	2,874	
Curtailment settlement cost		516		
Total increases to accrued benefit cost	\$7,822	\$2,125	\$2,874	
Assumptions:				
Discount rate qualified plans	8.25 %	6.25 %	5.75 %	
Discount rate nonqualified plans	7.50 %	5.25 %	5.25 %	
Expected return on plan assets	8.00 %	8.00 %	8.00 %	
Rate of compensation increase qualified plans	4.00 %	4.00 %	4.00 %	
Rate of compensation increase nonqualified plans	0.00 %	0.00 %	0.00 %	
Measurement date	11/1/2008	11/1/2007	11/1/2006	

For the determination of 2010 expense, the Company will decrease its assumptions for the long-term return on assets for its qualified plans to 7.75%, decrease the discount rates on its qualified plans to 5.50%, and leave the rate of compensation increase unchanged. For its U.S. combined nonqualified plans, the Company will decrease the discount rates to 2.50%.

The changes in the fair value of plan assets and in the assumptions will result in a net increase in fiscal year 2010 expense of approximately \$2,110 for the qualified U.S. pension plans and a net decrease of approximately \$2,443 for the U.S. combined nonqualified plans unless the Company makes contributions to the plans in fiscal year 2010.

The postretirement obligations represent a fixed dollar amount per retiree. The Company has the right to modify or terminate these benefits. The participants will assume substantially all future healthcare benefit cost increases, and future increases in healthcare costs will not increase the postretirement benefit obligation or cost to the Company.

Therefore, the Company has not assumed any annual rate of increase in the per capita cost of covered healthcare benefits for future years. The Company discontinued the prescription drug benefit portion of its plan effective January 31, 2006.

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

The components of net periodic benefit income for postretirement healthcare benefits are shown below.

	Other Postretirement Benefits					
	2009		2008		2007	
Components of net periodic benefit income:						
Service cost	\$		\$		\$1	
Interest cost	61		61		74	
Amortization of unrecognized:						
Prior service cost	(123)	(123)	(122)
Net actuarial gain	(184)	(133)	(126)
Net periodic benefit income	\$(246)	\$(195)	\$(173)
Assumptions:						
Discount rate	8.25	%	5.75	%	5.50	%
Measurement date	11/1/2008		11/1/2007		11/1/2006	

The Company froze participation in the postretirement healthcare plan to eligible retirees effective January 1, 2007.

As a result, unrecognized prior service costs of \$1,708 are being amortized over the average remaining years of service for active plan participants. The Company will decrease its discount rate assumption to 4.25% in 2010 for its other postretirement benefits plan, which will not significantly affect the fiscal year 2010 expense.

The estimated amounts that will be amortized from accumulated other comprehensive earnings (loss) at November 30, 2009 into net periodic benefit cost, pre-tax, in fiscal year 2010 are as follows:

	Pension Benefits	Other Postretirement Benefits
Prior service cost (credit)	\$ 152	\$ (123)
Actuarial loss (gain)	4,724	(129)
Total	\$ 4,876	\$ (252)

The expected cash benefit payments from the plans for the next ten fiscal years are as follows:

	Pension Benefits	Other Postretirement Benefits
2010	\$ 12,238	\$ 154
2011	20,891	134
2012	7,362	106
2013	7,811	85
2014	8,213	79

2015 2019

46,718

257

The Company also sponsors various defined contribution plans that provide employees with an opportunity to accumulate funds for their retirement. The Company may match, at its discretion, the contributions of participating employees in the respective plans. The Company recognized expense related to these plans of \$3,658, \$3,841 and \$3,166 in 2009, 2008 and 2007, respectively.

F-26

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

J. Income Taxes

The following is a reconciliation of the beginning and ending amount of gross unrecognized tax benefits for uncertain tax positions, including positions which impact only the timing of tax benefits for the years ended November 30, 2009 and 2008.

	2009	2008
Balance at December 1,	\$ 1,970	\$ 1,650
Additions for current period tax positions	163	245
Additions for prior period tax positions	59	196
Reductions for lapse of statute of limitations	(128)	(185)
Changes in interest and penalties	97	64
Balance at November 30,	\$ 2,161	\$ 1,970

At November 30, 2009 and 2008, the amount of unrecognized tax benefit, that would impact the effective tax rate if recognized, was \$1,907 and \$1,527, respectively. The Company recognizes interest and penalties related to unrecognized benefits in income tax expense. As of November 30, 2009 and 2008, the Company had \$483 and \$386, respectively, accrued for the payment of interest and penalties.

The Company believes it is reasonably possible that the total amount of unrecognized tax benefits as of November 30, 2009, will decrease by \$384 over the next twelve months as a result of expected settlements with taxing authorities. Due to the various jurisdictions in which the Company files tax returns and the uncertainty regarding the timing of settlements it is possible that there could be other significant changes in the amount of unrecognized tax benefits in fiscal year 2010; however, the amount cannot be estimated.

The Company is regularly audited by federal, state and foreign tax authorities. The Internal Revenue Service has completed its audits of the Company's U.S. income tax returns through fiscal year 2005 and is currently auditing 2006 through 2008. With few exceptions, the Company is no longer subject to income tax examinations by state or foreign tax jurisdictions for years prior to 2004.

The provision for income taxes consisted of:

	2009	2008	2007
Current:			
Federal	\$ 25,938	\$ 36,240	\$ 30,046
State	970	2,975	2,042
Foreign	7,773	8,004	5,071
Deferred:			
Federal	(1,564)	2,241	1,402
State	(53)	(72)	100

Edgar Filing: CLARCOR INC - Form 10-K

Foreign	755	(78)	1,014
	\$ 33,819	\$ 49,310	\$ 39,675

Earnings before income taxes and minority interests included the following components:

	2009	2008	2007
Domestic income	\$ 77,276	\$ 120,815	\$ 111,701
Foreign income	28,373	24,556	18,808
	\$ 105,649	\$ 145,371	\$ 130,509

F-27

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

The provision for income taxes resulted in effective tax rates that differ from the statutory federal income tax rates. The reasons for these differences are as follows:

	Percent of Pre-Tax Earnings		
	2009	2008	2007
Statutory U.S. tax rates	35.0 %	35.0 %	35.0 %
State income taxes, net of federal benefit	0.6	1.3	1.6
Tax credits	(0.7)	(0.9)	(0.6)
Foreign taxes at different rates, net of credits	(2.4)	(0.7)	(1.0)
Domestic production activities deduction	(1.3)	(1.4)	(0.8)
Settlement of certain tax liabilities			(3.2)
Other, net	0.8	0.6	(0.6)
	32.0 %	33.9 %	30.4 %

The components of the net deferred tax liability as of November 30, 2009 and 2008 were as follows:

	2009	2008
Deferred tax assets:		
Deferred compensation	\$ 9,019	\$ 8,682
Tax credits and foreign loss carryforwards	2,822	3,127
Accounts receivable	6,185	5,266
Inventories	4,779	4,751
Pensions	23,932	8,999
Accrued liabilities and other	7,700	7,315
Valuation allowance	(2,328)	(2,921)
Total deferred tax assets, net	52,109	35,219
Deferred tax liabilities:		
Percentage of completion	(40)	(1,395)
Plant assets	(21,981)	(19,332)
Goodwill and acquired intangible assets	(33,437)	(30,365)
Other deferred tax liabilities	(590)	(99)
Total deferred tax liabilities	(56,048)	(51,191)
Deferred tax liability, net	\$ (3,939)	\$ (15,972)

Of the tax credits and foreign loss carryforwards, \$2,632 expires in 2010 through 2019 and \$190 may be carried over indefinitely. The Company changed the valuation allowance by \$593 and \$(2,161) in 2009 and 2008, respectively, related to foreign net operating losses and foreign tax credit carryovers. The valuation allowance reflects the estimated amount of deferred tax assets due to foreign net operating losses that may not be realized. The Company expects to realize the remaining deferred tax assets through the reversal of taxable temporary differences and future earnings.

The Company repatriated \$991 of accumulated foreign earnings in 2009 related to a Canadian subsidiary due to favorable tax rates. The Company did not repatriate any accumulated foreign earnings related to the Canadian subsidiary in 2008. For the Company's other foreign subsidiaries, the Company has not provided deferred taxes on unremitted foreign earnings from certain foreign affiliates of approximately \$87,495 that are intended to be indefinitely reinvested to finance operations and expansion outside the United States. If such earnings were distributed beyond the amount for which taxes have been provided, foreign tax credits could offset in part any incremental U.S. tax liability. Determination of the unrecognized deferred taxes related to these undistributed earnings is not practicable.

F-28

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

K. Restructuring Charges

In July 2006, the Company began a restructuring program focused on the heating, ventilating and air conditioning (HVAC) filter manufacturing operations within its Industrial/Environmental Filtration segment. The HVAC restructuring program was substantially complete in fiscal year 2009. All of the restructuring expenses were paid as of November 30, 2009, except for accrued severance of \$28 related to Kentucky facilities, which is included in accrued liabilities.

As an ongoing part of this program, during the first and second quarters of fiscal year 2009, the Company consolidated four Louisville, Kentucky area facilities into one location in Jeffersonville, Indiana to realize cost savings and efficiency benefits. Restructuring severance costs of \$170 were expensed during the year ended November 30, 2009 and were included in cost of sales in the Consolidated Statements of Earnings. Land of \$398 and building and building fixtures of \$1,602, included in plant assets, are idle and available for sale related to one Kentucky plant.

During May 2009, the Company also closed a small facility in Clover, South Carolina. The Company did not incur any material expenses related to this closure.

The Company discontinued production at an HVAC filter manufacturing plant in Davenport, Iowa during the second quarter 2008. The Company did not incur any restructuring expenses related to the Davenport, Iowa location during the year ended November 30, 2009. The Company expensed and paid \$154 for the year ended November 30, 2008, which is included in cost of sales in the Consolidated Statements of Earnings, mainly for employee termination costs, related to the Iowa plant closing. Minimal additional restructuring charges related to contract termination costs and facility consolidation costs will be recognized when the Company exits a lease related to that facility in 2012. In addition to costs classified as restructuring expenses, the Company has incurred and will continue to incur other non-restructuring costs related to this facility until the expiration of the lease.

The Company also discontinued production at an HVAC filter manufacturing plant in Henderson, North Carolina during the third quarter 2008. The Company recorded restructuring expenses of \$47, which is included in cost of sales in the Consolidated Statements of Earnings, related to the Henderson, North Carolina location during the year ended November 30, 2009, mainly for facility consolidation and employee termination costs. The Company expensed \$1,081 for the year ended November 30, 2008, mainly for employee termination costs and a pension curtailment expense of \$516 (see Note I), related to the North Carolina plant closing. Minimal additional restructuring charges related to facility consolidation costs will be recognized when the Company exits that facility. In addition to costs classified as restructuring expenses, the Company has incurred and will continue to incur other non-restructuring costs related to this facility until it is sold. The Company recorded an impairment charge of \$1,200, \$1,050 of which was recorded during the fourth quarter, related to the North Carolina property for the year ended November 30, 2009 which is included in cost of sales in the Consolidated Statements of Earnings. Land of \$230 and building and building fixtures of \$1,637, included in plant assets, are idle and available for sale related to the North Carolina plant.

The Company discontinued production at an HVAC filter manufacturing plant in Kenly, North Carolina in November 2006. Restructuring severance costs of \$164 were accrued and paid during fiscal year 2006 and were included in cost

of sales in the Consolidated Statements of Earnings.

L. Insurance Claims and Settlements

During June 2009, an Industrial/Environmental Filtration segment warehouse that the Company leases was damaged by fire. A loss of \$250, representing the Company's deductible, was recorded in cost of sales for the quarter ended August 29, 2009. Additional losses, which could be as high as \$1,284, resulting from the loss of inventory and physical assets above the \$250 are expected to be covered by insurance. During September 2009, the Company received \$500 from the insurance company. At November 30, 2009, the Company has recorded a receivable of \$505.

In the second quarter of fiscal year 2008, four of the Company's facilities in three states were damaged in weather-related events. The Company's Industrial/Environmental Filtration segment recognized a gain, resulting

F-29

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

from the excess of insurance proceeds received over the net book value of the property, of \$1,963 (net of the \$500 deductible paid by the Company) as a reduction of cost of sales. The Company's Engine/Mobile Filtration segment recognized a loss, resulting from costs incurred below the Company's deductible limit, of \$178 in cost of sales. During fiscal year 2009, the Company received \$654 from the insurance company, which had been recorded as a receivable at November 30, 2008. The repairs to the buildings were substantially complete at three of the facilities as of November 30, 2008.

M. Contingencies

Legal Contingencies

From time to time, the Company is subject to lawsuits, investigations and disputes (some of which involve substantial claimed amounts) arising out of the conduct of its business, including matters relating to commercial transactions, product liability, intellectual property, and other matters. Included in these other matters are the following:

Donaldson

On May 15, 2009, Donaldson Company, Inc. (Donaldson) filed a lawsuit in the U.S. Federal District Court for the District of Minnesota alleging that certain ChannelFlow engine/mobile filters manufactured and sold by a subsidiary of the Company infringe one or more patents held by Donaldson. Donaldson served this lawsuit on August 26, 2009, and through the suit seeks various remedies, including injunctive relief and monetary damages of an unspecified amount. Management believes that the products in question do not infringe the asserted patents and that such patents are invalid, and the Company is vigorously defending the action.

Antitrust

On March 31, 2008, S&E Quick Lube, a filter distributor, filed suit in U.S. District Court for the District of Connecticut alleging that virtually every major North American filter manufacturer, including Baldwin Filters, Inc., engaged in a conspiracy to fix prices, rig bids and allocate U.S. customers for aftermarket filters. This suit seeks various remedies, including injunctive relief and monetary damages of an unspecified amount, and is a purported class action on behalf of direct purchasers of filters from the defendants. Parallel purported class actions, including on behalf of indirect purchasers of filters, have been filed by other plaintiffs in a variety of jurisdictions in the United States and Canada. The U.S cases have been consolidated into a single multi-district litigation in the Northern District of Illinois. The Company intends to vigorously defend the claims raised in these actions. In this regard, the Company filed a motion to be dismissed from these cases, due to the lack of any factual allegations against the Company specifically and the fact that the allegations center predominantly on the automotive filtration market rather than on the heavy-duty filtration market. On November 9, 2009, the presiding court denied the Company's motion, a decision that the Company is seeking to overturn. The Antitrust Division of the Department of Justice (DOJ) is also investigating the allegations raised in these suits. Management does not believe that the Company is the subject of the DOJ investigation, and the Company has not been contacted by the DOJ in connection with this matter.

3M

On August 14, 2009, 3M Company (3M) filed a lawsuit in the U.S. Federal District Court for the Eastern District of Virginia, alleging that various statements and imagery on the packaging of certain retail residential filters being sold by a subsidiary of the Company are untrue or misleading to consumers, and thus violate various aspects of the Lanham Act and Virginia consumer protection law. 3M is a former customer of the Company, and the products in question compete with those offered by 3M in the retail marketplace. The Company filed counterclaims against 3M in respect of its own packaging. This lawsuit was concluded on November 17, 2009, at which time the Company and 3M entered into a confidential settlement agreement pursuant to which each party dropped all of its claims and counterclaims.

F-30

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

Additionally, the Company is party to various proceedings relating to environmental issues. The U.S. Environmental Protection Agency and/or other responsible state agencies have designated the Company as a potentially responsible party, along with other companies, in remedial activities for the cleanup of waste sites under the federal Superfund statute. Although it is not certain what future environmental claims, if any, may be asserted, the Company currently believes that its potential liability for known environmental matters does not exceed its present accrual of \$50. However, environmental and related remediation costs are difficult to quantify for a number of reasons, including the number of parties involved, the difficulty in determining the nature and extent of the contamination at issue, the length of time remediation may require, the complexity of the environmental regulation and the continuing advancement of remediation technology. Applicable federal law may impose joint and several liability on each potentially responsible party for the cleanup.

In addition to the matters cited above, the Company is involved in legal actions arising in the normal course of business. The Company records provisions with respect to identified claims or lawsuits when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Claims and lawsuits are reviewed quarterly and provisions are taken or adjusted to reflect the status of a particular matter. No such provisions have been taken in respect of the Donaldson or antitrust legal proceeding referred to above.

The Company believes recorded reserves in its Consolidated Financial Statements are adequate in light of the probable and estimable outcomes of the items discussed above. These recorded liabilities were not material to the Company's financial position, results of operation or liquidity and the Company does not believe that any pending claims or litigation, including those identified above, will materially affect its financial position, results of operation or liquidity.

Other Contingencies

In the event of a change in control of the Company, termination benefits are likely to be required for certain executive officers and other employees.

N. Incentive Plan

On March 23, 2009, the shareholders of CLARCOR approved the 2009 Incentive Plan, which replaced the 2004 Incentive Plan. The 2009 Incentive Plan allows the Company to grant stock options, restricted stock unit awards, restricted stock and performance awards to officers, directors and key employees of up to 3,800,000 shares during a ten-year period that ends in December 2019. Upon share option exercise or restricted stock unit award conversion, the Company issues new shares unless treasury shares are available.

Stock Options

Under the 2009 Incentive Plan and the 2004 Incentive Plan, nonqualified stock options are granted at exercise prices equal to the market price at the date of grant. All outstanding stock options have been granted at the fair market value on the date of grant, which is the date the Board of Directors approves the grant and the participants receive it. The

Company's Board of Directors determines the vesting requirements for stock options at the time of grant and may accelerate vesting. In general, options granted to key employees vest 25% per year beginning at the end of the first year; therefore, they become fully exercisable at the end of four years. Vesting may be accelerated in the event of retirement, disability or death of a participant or change in control of the Company. Options granted to non-employee directors vest immediately. All options expire ten years from the date of grant unless otherwise terminated. Beginning in fiscal year 2006, the Company no longer grants options with reload features.

The Company recorded pre-tax compensation expense related to stock options of \$3,027, \$3,368 and \$2,929 and related tax benefits of \$969, \$1,160 and \$978 for the years ended November 30, 2009, 2008 and 2007, respectively.

F-31

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

The following table summarizes activity with respect to nonqualified stock options granted by the Company and includes options granted under both the 1994 Incentive Plan and the 2004 Incentive Plan. No options were granted under the 2009 Incentive Plan during fiscal year 2009.

	2009 Shares Granted under Incentive Plans	Weighted Average Exercise Price	2008 Shares Granted under Incentive Plans	Weighted Average Exercise Price	2007 Shares Granted under Incentive Plans	Weighted Average Exercise Price
Outstanding at beginning of year	3,132,111	\$ 25.75	3,191,598	\$ 23.79	3,253,059	\$ 21.56
Granted	466,025	\$ 31.94	477,900	\$ 36.38	453,525	\$ 33.60
Exercised	(322,236)	\$ 16.40	(458,701)	\$ 21.43	(501,936)	\$ 18.19
Surrendered	(46,713)	\$ 35.45	(78,686)	\$ 35.86	(13,050)	\$ 25.83
Outstanding at end of year	3,229,187	\$ 27.43	3,132,111	\$ 25.75	3,191,598	\$ 23.79
Options exercisable at end of year	2,372,757	\$ 25.02	2,486,807	\$ 23.28	2,694,598	\$ 22.36

At November 30, 2009, there was \$2,704 of unrecognized compensation cost related to nonvested option awards which the Company expects to recognize over a weighted-average period of 2.4 years.

The following table summarizes information about stock option exercises during the fiscal years shown.

	2009	2008	2007
Fair value of options exercised	\$ 1,597	\$ 2,542	\$ 2,051
Total intrinsic value of options exercised	4,975	7,535	8,304
Cash received upon exercise of options	2,479	7,649	4,924
Tax benefit realized from exercise of options	1,809	2,752	3,028

The following table summarizes information about the Company's outstanding and exercisable options at November 30, 2009.

Options Outstanding				Options Exercisable			
Range of Exercise Prices	Number	Weighted Average Exercise Price	Intrinsic Value	Weighted Average Remaining Life in Years	Number	Weighted Average Exercise Price	Weighted Average Remaining Life in Years

Edgar Filing: CLARCOR INC - Form 10-K

\$ 9.19	\$ 9.75	53,884	\$ 9.25	\$ 1,226	0.81	53,884	\$ 9.25	\$ 1,226	0.81
\$11.50	\$13.75	157,300	\$ 13.11	2,971	1.83	157,300	\$ 13.11	2,971	1.83
\$16.01	\$22.80	795,745	\$ 20.35	9,270	3.10	795,745	\$ 20.35	9,270	3.10
\$25.31	\$31.96	977,083	\$ 27.66	4,236	5.27	976,583	\$ 27.66	4,234	5.26
\$32.78	\$38.23	1,245,175	\$ 34.38		7.65	389,245	\$ 34.93		6.33
		3,229,187	\$ 27.43	\$ 17,703	5.41	2,372,757	\$ 25.02	\$ 17,701	4.38

The weighted average fair value per option at the date of grant for options granted in 2009, 2008 and 2007 was \$7.62, \$9.37 and \$9.36, respectively. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model with the following weighted average assumptions by grant year. The expected life selected for options granted during each year presented represents the period of time that the options are expected to be outstanding based on historical data of option holder exercise and termination behavior. Expected volatilities are based upon historical volatility of the Company's monthly stock closing prices over a period equal to the expected life of each option grant. The risk-free interest rate is selected based on yields from U.S. Treasury zero-coupon issues with a remaining term approximately equal to the expected term of the options being valued.

F-32

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

	2009		2008		2007
Risk-free interest rate	1.91 %		3.76 %		4.52 %
Expected dividend yield	1.25 %		0.85 %		0.89 %
Expected volatility factor	24.16 %		20.24 %		20.55 %
Expected option term in years	6.1		6.1		6.1

Subsequent to the end of fiscal year 2009, the Company granted 420,525 options under the 2009 Incentive Plan with exercise prices of \$32.30.

Restricted Stock Unit Awards

The Company's restricted stock unit awards are considered nonvested share awards. The restricted stock unit awards require no payment from the employee. Compensation cost is recorded based on the market price of the stock on the grant date and is recorded equally over the vesting period of four years. During the vesting period, officers and key employees receive compensation equal to dividends declared on common shares. Upon vesting, employees may elect to defer receipt of their shares. Compensation expense related to restricted stock unit awards totaled \$1,061, \$1,106 and \$1,085 in 2009, 2008 and 2007, respectively.

The following table summarizes the restricted stock unit awards.

	2009		2008		2007	
	Units	Weighted Average Grant Date Fair Value	Units	Weighted Average Grant Date Fair Value	Units	Weighted Average Grant Date Fair Value
Nonvested at beginning of year	57,724	\$ 33.66	57,371	\$ 29.76	58,466	\$ 24.75
Granted	36,368	\$ 32.78	25,989	\$ 36.48	26,200	\$ 33.75
Vested	(25,135)	\$ 31.42	(25,636)	\$ 27.79	(27,295)	\$ 22.86
Surrendered	(1,481)	\$ 34.19				
Nonvested at end of year	67,476	\$ 34.01	57,724	\$ 33.66	57,371	\$ 29.76

The total fair value of shares vested during 2009, 2008 and 2007, was \$790, \$712 and \$624, respectively. As of November 30, 2009, there was \$599 of total unrecognized compensation cost related to restricted stock unit awards that the Company expects to recognize during fiscal years 2010, 2011 and 2012. Subsequent to the end of fiscal year 2009, the Company granted 34,128 restricted stock unit awards, each with a fair value of \$32.30 at the date of grant.

Directors Restricted Stock Compensation

The incentive plans provide for grants of shares of common stock to all non-employee directors equal to a one-year annual retainer in lieu of cash at the directors' option. The directors' rights to the shares vest immediately on the date of grant; however, the shares cannot be sold for a six-month period from the date of grant. In 2009, 2008 and 2007, respectively, 8,298, 5,910 and 8,323 shares of Company common stock were issued under the plans. Compensation expense related to directors' restricted stock totaled \$210, \$210 and \$270 in 2009, 2008 and 2007, respectively.

Employee Stock Purchase Plan

The Company sponsors an employee stock purchase plan which allows employees to purchase stock at a discount of 5%. Effective January 1, 2006, the plan was amended to be in compliance with safe harbor rules so that the plan is not compensatory, and no expense is recognized related to the plan. The Company issued stock under this plan for \$1,138, \$1,234 and \$1,305 during 2009, 2008 and 2007, respectively.

F-33

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

O. Earnings Per Share and Treasury Transactions

The Company calculates basic earnings per share by dividing net earnings by the weighted average number of shares outstanding. Diluted earnings per share reflects the impact of outstanding stock options, restricted stock and other stock-based arrangements. The following table provides a reconciliation of the denominators utilized in the calculation of basic and diluted earnings per share:

	2009	2008	2007
Weighted average number of shares outstanding	50,779,594	50,783,862	50,345,774
Dilutive effect of stock-based arrangements	265,537	626,574	539,540
Weighted average number of diluted shares outstanding	51,045,131	51,410,436	50,885,314
Net earnings	\$71,543	\$95,654	\$90,659
Basic earnings per share	\$1.41	\$1.88	\$1.80
Diluted earnings per share	\$1.40	\$1.86	\$1.78

For fiscal years ended November 30, 2009, 2008 and 2007, respectively, 1,297,675, 5,325 and 57,825 stock options with a weighted average exercise price of \$34.28, \$38.23 and \$35.90 were not included in the computation of diluted earnings per share as the exercise prices of the options were greater than the average market price of the common shares during the respective periods.

On June 25, 2007, the Company's Board of Directors authorized a \$250 million stock repurchase program of the Company's common stock in the open market and through private transactions over a three-year period. This authorization replaced the Company's previous \$150 million share repurchase authorization that expired on June 16, 2007 which covered a two-year period. During 2009, the Company purchased and retired 688,200 shares of its common stock for \$19,767. During 2008, the Company purchased and retired 1,000,000 shares of common stock for \$37,260. During 2007, the Company purchased and retired 2,272,477 shares of common stock for \$74,863. The number of issued shares was reduced as a result of the retirement of these shares. At November 30, 2009, there was approximately \$167,443 available for future purchases under the 2007 stock repurchase program.

P. Segment Information

Based on the economic characteristics of the Company's business activities, the nature of products, customers and markets served and the performance evaluation by management and the Company's Board of Directors, the Company has identified three reportable segments: Engine/Mobile Filtration, Industrial/Environmental Filtration and Packaging.

The Engine/Mobile Filtration segment manufactures and markets a complete line of filters used in the filtration of oils, air, fuel, coolant, hydraulic and transmission fluids in both domestic and international markets. The Engine/Mobile Filtration segment provides filters for certain types of transportation equipment including automobiles, heavy-duty and light trucks, buses and locomotives, marine and mining equipment, industrial equipment and heavy-duty

construction and agricultural equipment. The products are sold to aftermarket distributors, original equipment manufacturers and dealer networks, private label accounts and directly to truck service centers and large national accounts.

The Industrial/Environmental Filtration segment manufactures and markets a complete line of filters, cartridges, dust collectors, filtration systems, engineered filtration products and technologies used in the filtration of air and industrial fluid processes in both domestic and international markets. The filters and filter systems are used in commercial and industrial buildings, hospitals, manufacturing processes, pharmaceutical processes, clean rooms, airports, shipyards, refineries and other oil and natural gas facilities, power generation plants, petrochemical plants, residences and various other infrastructures. The products are sold to commercial and industrial distributors, original equipment manufacturers and dealer networks, private label accounts, retailers and directly to large national accounts.

F-34

TABLE OF CONTENTS

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data) (Continued)

The Packaging segment manufactures and markets consumer and industrial packaging products including custom-designed plastic and metal containers and closures and lithographed metal sheets in both domestic and international markets. The products are sold directly to consumer and industrial packaging customers.

Net sales represent sales to unaffiliated customers. Intersegment sales were not material. No single customer accounted for 10% or more of the Company's consolidated 2009 sales. Assets are those assets used in each business segment. Corporate assets consist of cash and short-term investments, deferred income taxes, headquarters facility and equipment, pension assets and various other assets that are not specific to an operating segment. Unallocated amounts include interest income and expense and other non-operating income and expense items.

The segment data for the years ended November 30, 2009, 2008 and 2007 were as follows:

	2009	2008	2007
Net sales:			
Engine/Mobile Filtration	\$ 373,295	\$ 439,033	\$ 430,029
