NOTES:**1. Financial Statements**

In the opinion of management, the accompanying unaudited consolidated condensed financial statements contain all adjustments necessary to present fairly the Company's financial position, results of operations and cash flows for the periods presented. The results of operations for the three and nine months ended September 30, 2014, are not necessarily indicative of the results for the full year.

2. New Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update ("ASU") No. 2014-09, *Revenue from Contracts with Customers*, as codified in Accounting Standards Codification 606. The amendments in this update affect any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets unless those contracts are within the scope of other standards. The amendments in this update require an entity to recognize revenue related to the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The amendments in this ASU will be effective for the Company for fiscal years, and interim periods within those years, beginning after December 15, 2016. Early adoption is not permitted. The Company is currently assessing the impact of this update on its consolidated financial statements.

The Company has two reportable segments: North American wholesale operations ("wholesale") and North American retail operations ("retail"). The chief operating decision maker, the Company's Chief Executive Officer, evaluates the performance of its segments based on earnings from operations and accordingly, interest income or expense, other income or expense, and income taxes are not allocated to the segments. The "other" category in the tables below includes the Company's wholesale and retail operations in Australia, South Africa, Asia Pacific and Europe, which do not meet the criteria for separate reportable segment classification. The following table summarizes the Company's stock option activity for the three and nine months ended September 30, 2014 and 2013:

The aggregate intrinsic value of non-vested restricted stock was calculated using the market value of the Company's stock on September 30, 2014, the last trading day of the quarter, of \$25.11 multiplied by the number of non-vested restricted shares outstanding.

9. Short-Term Borrowings

At September 30, 2014, the Company had a \$60 million unsecured revolving line of credit with a bank expiring November 5, 2014. The line of credit bears interest at LIBOR plus 0.75%. At September 30, 2014, outstanding borrowings were approximately \$24.3 million at an interest rate of 0.90%. The highest balance on the line of credit during the quarter was approximately \$24.3 million. The line of credit agreement was set to expire on November 5, 2014, but was renewed for another term that expires on November 5, 2015, on the same terms as the prior agreement.

10. Contingent Consideration

Contingent consideration is comprised of two contingent payments that the Company is obligated to pay the former shareholders of The Combs Company ("Bogs") related to the Company's acquisition of Bogs in 2011. The estimate of contingent consideration is formula-driven and is based on Bogs achieving certain levels of gross margin dollars between January 1, 2011, and December 31, 2015. The first contingent payment was due in 2013 and was paid on March 28, 2013, in the amount of \$1,270,000. The second payment is due in March 2016. In accordance with ASC 805, *Business Combinations* ("ASC 805"), the Company remeasures its estimate of the fair value of the contingent payments at each reporting date. The change in fair value is recognized in earnings.

The Company's estimate of the fair value of the contingent payments was approximately \$5.1 million as of September 30, 2014, and December 31, 2013. The balance was recorded within other long-term liabilities in the Consolidated

Condensed Balance Sheets (Unaudited).

The following table summarizes the activity during 2014 related to the contingent payments as recorded in the Consolidated Condensed Statements of Earnings and Comprehensive Income (Unaudited) (dollars in thousands):

	2014
Beginning balance, December 31, 2013	\$5,064
Interest expense	38
Ending balance, September 30, 2014	\$5,102

The fair value measurement of the contingent consideration is based on significant inputs not observed in the market and thus represents a level 3 valuation as defined by ASC 820.

11. Financial Instruments

At September 30, 2014, the Company had forward exchange contracts outstanding to sell \$13.0 million Canadian dollars at a price of approximately \$11.8 million U.S. dollars. Additionally, the Company's majority-owned subsidiary, Florsheim Australia, had forward exchange contracts outstanding to buy \$4.4 million U.S. dollars at a price of approximately \$4.9 million Australian dollars. Based on quarter-end exchange rates, the Company recorded gains of approximately \$200,000 related to the Australian contracts and there were no significant gains or losses on the Canadian contracts.

The Company determines the fair value of forward exchange contracts based on the difference between the foreign currency contract rates and the widely available foreign currency rates as of the measurement date. The fair value measurements are based on observable inputs in markets that are not active and thus represent a level 2 valuation as defined by ASC 820.

12. Comprehensive Income

Comprehensive income for the three and nine months ended September 30, 2014 and 2013, was as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,

FORWARD-LOOKING STATEMENTS

This report contains certain forward-looking statements with respect to the Company's outlook for the future. These statements represent the Company's reasonable judgment with respect to future events and are subject to risks and uncertainties that could cause actual results to differ materially. The reader is cautioned that these forward-looking statements are subject to a number of risks, uncertainties or other factors that may cause actual results to differ materially from those described in the forward-looking statements. These risks and uncertainties include, but are not limited to, the risk factors described under Item 1A, "Risk Factors," of the Company's Annual Report on Form 10-K for the year-ended December 31, 2013.

GENERAL

The Company designs and markets quality and innovative footwear for men, women and children under a portfolio of well-recognized brand names including: "Florsheim," "Nunn Bush," "Stacy Adams," "BOGS," "Rafters," and "Umi." Inventories are purchased from third-party overseas manufacturers. The majority of foreign-sourced purchases are denominated in U.S. dollars.

The Company has two reportable segments, North American wholesale operations ("wholesale") and North American retail operations ("retail"). In the wholesale segment, the Company's products are sold to leading footwear, department, and specialty stores, primarily in the United States and Canada. The Company also has licensing agreements with third parties who sell its branded apparel, accessories and specialty footwear in the United States, as well as its footwear in Mexico and certain markets overseas. Licensing revenues are included in the Company's wholesale segment. The Company's retail segment consisted of 17 Company-owned retail stores and an internet business in the United States as of September 30, 2014. Sales in retail outlets are made directly to consumers by Company employees.

The Company's "other" operations include the Company's wholesale and retail businesses in Australia, South Africa, Asia Pacific (collectively, "Florsheim Australia") and Europe ("Florsheim Europe"). The majority of the Company's operations are in the United States, and its results are primarily affected by the economic conditions and the retail environment in the United States.

EXECUTIVE OVERVIEW

Third Quarter Highlights

Consolidated net sales for the third quarter of 2014 were \$87.4 million, up 5% over last year's third quarter net sales of \$83.1 million. Earnings from operations increased 5% to \$9.0 million this quarter, from \$8.6 million in 2013.

Consolidated net earnings attributable to Weyco Group, Inc. were \$5.5 million in 2014, up 2% as compared to \$5.4 million in 2013. Diluted earnings per share increased to \$0.51 per share in the third quarter of 2014, from \$0.50 per share in the third quarter of 2013.

The majority of the increase in consolidated net sales came from the Company's wholesale segment. Wholesale net sales increased approximately \$3.3 million this quarter, compared to the same period last year. This increase was primarily due to higher sales of the BOGS and Stacy Adams brands, partially offset by decreased sales of the Company's other brands.

Consolidated earnings from operations were up approximately \$400,000 for the quarter, compared to the same period last year, primarily due to the increase in wholesale net sales.

Year-to-Date Highlights

Consolidated net sales for the first nine months of 2014 were \$225.2 million, up 2% over last year's year-to-date net sales of \$221.7 million. Earnings from operations increased 2% to \$17.3 million in the first nine months of 2014, from \$17.0 million in 2013. Consolidated net earnings attributable to Weyco Group, Inc. for the nine months ended September 30, 2014, were \$10.9 million, up 1% as compared to \$10.8 million last year. Diluted earnings per share were flat at \$1.00 per share for each of the nine month periods ended September 30, 2014 and 2013.

Approximately half of the increase in consolidated net sales for the nine months ended September 30, 2014, came from the Company's wholesale segment. Wholesale net sales increased \$2.1 million in the first nine months of 2014, compared to the same period last year. This increase was primarily due to higher sales of the BOGS brand, partially offset by lower sales of the Nunn Bush and Florsheim brands. Florsheim Australia's net sales were also up for the first nine months of this year, due to higher net sales in both its wholesale and retail businesses.

Consolidated earnings from operations were up approximately \$300,000 for the nine months ended September 30, 2014, compared to the same period last year. Earnings from operations in the Company's wholesale segment were down slightly for the year-to-date period. This decrease was primarily due to lower gross margins in the Company's Canadian business, caused by the weakening of the Canadian dollar relative to the U.S. dollar in 2014. Florsheim Australia's earnings from operations were up for the year-to-date period, mainly due to improved performance of its wholesale businesses.

Financial Position Highlights

At September 30, 2014, cash and marketable securities totaled \$42.4 million and outstanding debt totaled \$24.3 million. At December 31, 2013, cash and marketable securities totaled \$46.2 million and outstanding debt totaled \$12.0 million. During the first nine months of 2014, the Company drew down \$12.3 million on its revolving line of credit and received \$1.2 million from stock option exercises. The Company paid dividends of \$8.0 million, spent \$4.0 million on purchases of Company stock, and its operations resulted in a net \$3.4 million use of cash. The Company also had \$1.9 million of capital expenditures.

Total North American Wholesale Segment	\$68,067	\$64,752	5%	\$ 169,530	\$ 167,479	1%

The increase in Stacy Adams third quarter net sales was primarily due to higher sales volumes in the modern dress shoe category. The decrease in Nunn Bush third quarter and year-to-date net sales was mainly due to lower sales volumes with department stores. Florsheim's third quarter net sales were down due to lower sales with department stores and independent retailers. The decrease in Florsheim's year-to-date net sales was due to lower sales with department stores, independent retailers and off-price retailers, partially offset by higher sales to national shoe chains and internet retailers. BOGS net sales for the quarter and year-to-date periods were up across all major distribution categories.

Based on increased backlogs as of September 30, 2014, compared to the same date last year, management is anticipating continued sales growth of BOGS products during the final quarter of 2014. Management also expects fourth quarter 2014 sales for the Stacy Adams, Nunn Bush, and Florsheim brands to be comparative or up slightly from last year's fourth quarter.

Licensing revenues consist of royalties earned on the sales of branded apparel, accessories and specialty footwear in the United States and on branded footwear in Mexico and certain overseas markets.

Earnings from Operations

Earnings from operations in the North American wholesale segment were \$7.4 million in the third quarter of 2014, up 5% from \$7.1 million in 2013. Wholesale gross earnings were 31.7% of net sales in the third quarter of 2014, compared to 32.6% of net sales in last year's third quarter. The decrease in wholesale gross earnings as a percent of net sales was driven by the weaker Canadian dollar relative to the U.S. dollar in the third quarter of 2014, as compared to last year's third quarter. The increase in wholesale earnings from operations for the quarter ended September 30, 2014, was primarily due to higher net sales.

For the nine months ended September 30, 2014, earnings from operations for the wholesale segment were \$12.8 million, down 2% from \$13.0 million in the same period last year. Wholesale gross earnings were 31.0% of net sales for the nine months ended September 30, 2014, compared to 31.3% of net sales in the same period last year. The decrease in wholesale gross earnings as a percent of net sales was due to the weakening of the Canadian dollar relative to the U.S. dollar in 2014. The decrease in wholesale earnings from operations for the year-to-date period was mainly due to lower gross margins. Overall, the Company expects wholesale gross margins in the fourth quarter of 2014 to remain relatively flat with the third quarter of 2014.

The Company's cost of sales does not include distribution costs (e.g., receiving, inspection or warehousing costs). Distribution costs were \$2.7 million for each of the three month periods ended September 30, 2014 and 2013, and \$8.1 million for each of the nine month periods ended September 30, 2014 and 2013. These costs were included in selling and administrative expenses. The Company's gross earnings may not be comparable to other companies, as some companies may include distribution costs in cost of sales.

North American wholesale segment selling and administrative expenses include, and are primarily related to, distribution costs, salaries and commissions, advertising costs, employee benefit costs and depreciation. As a percent of net sales, wholesale selling and administrative expenses were 21% this quarter, as compared to 22% in the same quarter last year. For the nine months ended September 30, wholesale selling and administrative expenses were flat at 24% of net sales in 2014 and 2013.

North American Retail Segment

Net Sales

Net sales in the Company's North American retail segment increased \$125,000, or 2%, in the third quarter of 2014, compared to the same period last year and decreased \$524,000, or 3%, for the nine months ended September 30, 2014, compared to the same period last year. There were two fewer domestic retail stores during the third quarter of 2014 than there were in last year's third quarter, as the Company has been closing unprofitable stores. Same store sales (which include U.S. internet sales) were up 6% for the quarter and up 3% for the first nine months of 2014, compared to the same periods last year, primarily due to increased sales volumes in the Company's U.S. internet business. U.S. internet sales were up 12% and 7%, respectively, for the quarter and year-to-date periods.

Earnings from Operations

Retail earnings from operations increased \$126,000, or 25%, for the three months ended September 30, 2014, compared to the same period last year. This increase was due to the benefit of closing of underperforming stores and improved performance at both brick and mortar stores and the Company's U.S. internet business. For the nine months ended September 30, 2014, retail earnings from operations increased \$81,000, or 5%, compared to the same period last year, mainly due to the benefit of closing underperforming stores. On November 1, 2014, the Company closed one retail store and plans to close another store at the end of its lease term on January 31, 2015.

Gross earnings as a percent of net sales increased to 66.2% this quarter, from 65.7% in last year's third quarter. For the nine months ended September 30, retail gross earnings as a percent of net sales were 65.6% in 2014, compared to 65.4% in 2013.

Selling and administrative expenses for the retail segment include, and are primarily related to, rent and occupancy costs, employee costs and depreciation. Selling and administrative expenses were 54% of net sales in the third quarter of 2014 and 56% in last year's third quarter. To date in 2014, selling and administrative expenses were 55% of net

sales, compared to 56% of net sales for the first nine months of 2013.

Other

The Company's other net sales were \$14.0 million in the third quarter of 2014, up 7% as compared to \$13.1 million in 2013. The majority of the Company's other net sales were generated by Florsheim Australia. Florsheim Australia's net sales were up 9% for the quarter. This increase was due to higher sales volumes in both its retail businesses, where sales were up 4% (same store sales, including Florsheim Australia's internet sales, were up 1%), and its wholesale businesses, where sales were up 18%. The higher net sales in Florsheim Australia's wholesale businesses were driven by a significant increase in the Asian market and a smaller increase in the Australian market.

For the nine months ended September 30, 2014, other net sales increased 5% to \$39.8 million, from \$37.9 million in the same period last year. This increase was primarily due to higher net sales at Florsheim Australia, where sales were up 4%. In local currency, Florsheim Australia's net sales were up 11% for the first nine months of 2014, due to higher sales volumes in both its retail businesses, where same stores sales (including Florsheim Australia's internet sales) were up 12%, and its wholesale businesses, where sales were up 10%. The increase in Florsheim Australia's net sales was only 4% in U.S. dollars due to the weakening of the Australian dollar relative to the U.S. dollar in 2014.

Florsheim Europe's net sales increased approximately \$568,000, or 9%, for the first nine months of 2014, compared to the same period last year, primarily due to higher sales volumes in its wholesale business.

Collectively, the earnings from operations of the Company's other businesses were \$936,000 this quarter, down 6% as compared to \$1.0 million in the third quarter of 2013. This decrease was primarily due to lower wholesale gross margins and higher retail selling and administrative expenses relative to sales at Florsheim Australia. For the nine months ended September 30, 2014, earnings from operations of the Company's other businesses were \$2.9 million, up 19% as compared to \$2.4 million in the same period last year. This increase was primarily due to improved performance in Florsheim Australia's wholesale businesses.

Other income and expense and taxes

Interest income for the quarter and nine months ended September 30, 2014, was down approximately \$49,000 and \$252,000, respectively, compared to the same periods last year, due to lower average investment balances this year compared to last year. Interest expense for the three and nine months ended September 30, 2014, was down approximately \$23,000 and \$191,000, respectively, compared to the same periods last year, due to lower average debt balances this year compared to last year.

Other expense for the three months ended September 30, 2014, increased by approximately \$98,000. This increase was primarily due to foreign exchange losses resulting from the revaluation of intercompany loans between the Company's North American wholesale segment and Florsheim Australia. Last year's other expense for the third quarter included a \$200,000 other-than-temporary investment impairment loss, partially offset by foreign exchange gains resulting from the revaluation of intercompany loans with Florsheim Australia.

Other expense for the nine months ended September 30, 2014, decreased by approximately \$489,000. Last year's other expense for the year-to-date period included a \$200,000 other-than-temporary investment impairment loss as well as foreign exchange losses resulting from the revaluation of intercompany loans with Florsheim Australia.

The Company's effective tax rate for the quarter ended September 30, 2014, was 38.7% as compared to 35.9% for the same period in 2013. The effective tax rate for the nine months ended September 30 was 36.5% in 2014 and 35.5% in 2013. The higher effective tax rates for the quarter and year-to-date periods were primarily due to lower percentages of tax free municipal bond income relative to pretax earnings in the United States, and higher effective tax rates at the Company's foreign locations.

LIQUIDITY AND CAPITAL RESOURCES

The Company's primary sources of liquidity are its cash, short-term marketable securities and revolving line of credit. During the first nine months of 2014, the Company's operations resulted in a net \$3.4 million use of cash; the Company generated \$13.9 million of cash from operating activities during the same period one year ago. The decrease between years was primarily due to changes in operating assets and liabilities, principally inventory. The Company increased its BOGS inventory levels in order to accommodate expected sales growth in 2014. The third and fourth quarters constitute the main selling season for BOGS products.

The Company paid cash dividends of \$8.0 million and \$3.9 million during the nine months ended September 30, 2014 and 2013, respectively. No dividends were paid in the first half of 2013, as the Company accelerated the timing of two quarterly dividend payments into 2012.

The Company continues to repurchase its common stock under its share repurchase program when the Company believes market conditions are favorable. During the first nine months of 2014, the Company repurchased 152,660 shares at a total cost of \$4.0 million. As of September 30, 2014, the Company had 475,815 shares available under its previously announced stock repurchase program. See Part II, Item 2, "Unregistered Sales of Equity Securities and Use of Proceeds" below for more information.

Capital expenditures totaled \$1.9 million in the first nine months of 2014. Management estimates that annual capital expenditures for 2014 will be approximately \$2.5 million.

At September 30, 2014, the Company had a \$60 million unsecured revolving line of credit with a bank expiring November 5, 2014. The line of credit bears interest at LIBOR plus 0.75%. The Company used net proceeds of \$12.3 million from the line of credit during the first nine months of 2014, mainly to fund BOGS inventory purchases. At September 30, 2014, outstanding borrowings were \$24.3 million at an interest rate of 0.90%. The highest balance on the line of credit during the quarter was approximately \$24.3 million. The line of credit agreement was set to expire on November 5, 2014, but was renewed for another term that expires on November 5, 2015, on the same terms as the prior agreement.

The Company made a contingent consideration payment of \$1,270,000 in the first quarter of 2013. A second contingent consideration payment is due to the former shareholders of Bogs in March 2016. See Note 10 of the accompanying consolidated condensed financial statements.

At September 30, 2014, approximately \$2.7 million of cash and cash equivalents was held by the Company's foreign subsidiaries.

The Company will continue to evaluate the best uses for its available liquidity, including, among other uses, capital expenditures, continued stock repurchases and additional acquisitions.

The Company believes that available cash and marketable securities, cash provided by operations, and available borrowing facilities will provide adequate support for the cash needs of the business for at least one year, although there can be no assurances.
