(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 0-54876

United Community Bancorp
(Exact name of registrant as specified in its charter)

Indiana **36-4587081**
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

Edgar Filing: United Community Bancorp - Form 10-Q

92 Walnut Street, Lawrenceburg, Indiana 47025
(Address of principal executive offices) (Zip Code)

(812) 537-4822

(Registrant's telephone number, including area code)

N/A

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one)

Large accelerated filer Accelerated filer Non-accelerated filer Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of May 12, 2015, there were 4,631,439 shares of the registrant's common stock outstanding.

UNITED COMMUNITY BANCORP AND SUBSIDIARIES

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. **BASIS OF PRESENTATION** - United Community Bancorp, a federal corporation (“old United Community Bancorp”) completed its previously announced conversion from the mutual holding company form of organization to the stock holding company form on January 9, 2013. As a result of the conversion, United Community Bancorp, an Indiana corporation (“United Community Bancorp” or “Company”), became the holding company for United Community Bank (“Bank”), and United Community MHC and old United Community Bancorp, ceased to exist. As part of the conversion, all outstanding shares of old United Community Bancorp common stock (other than those owned by United Community MHC) were converted into the right to receive 0.6573 of a share of United Community Bancorp common stock.

The Company, through the Bank, operates in a single business segment providing traditional banking services through its office and branches in southeastern Indiana. UCB Real Estate Management Holding, LLC is a wholly-owned subsidiary of the Bank. The entity was formed for the purpose of holding assets that are acquired by the Bank through, or in lieu of, foreclosure. UCB Financial Services, Inc., a wholly-owned subsidiary of the Bank, was formed for the purpose of collecting commissions on investments referred to Lincoln Financial Group.

The accompanying unaudited consolidated financial statements were prepared in accordance with the rules and regulations of the Securities and Exchange Commission, and therefore do not include all information or footnotes necessary for complete financial statements in conformity with accounting principles generally accepted in the United States of America. However, all normal recurring adjustments that, in the opinion of management, are necessary for a fair presentation of the financial statements have been included. No other adjustments have been included. The results for the three and nine months ended March 31, 2015 are not necessarily indicative of the results that may be expected for the fiscal year ending June 30, 2015. These financial statements should be read in conjunction the Company’s audited consolidated financial statements and the accompanying notes thereto for the year ended June 30, 2014, which are included in the Company’s Annual Report on Form 10-K as filed with the Securities and Exchange Commission on September 26, 2014.

The Company evaluates events and transactions occurring subsequent to the date of the financial statements for matters requiring recognition or disclosure in the financial statements.

2. **EMPLOYEE STOCK OWNERSHIP PLAN (“ESOP”)** – As of March 31, 2015 and June 30, 2014, the ESOP owned 205,747 and 237,893 shares of the Company’s common stock, respectively. The shares owned by the ESOP are held in a suspense account until released for allocation to participants.

3. EARNINGS PER SHARE (“EPS”) – Non-vested shares with non-forfeitable dividend rights are considered participating securities and, thus, subject to the two-class method pursuant to ASC 260, *Earnings per Share*, when computing basic and diluted earnings per share. The Company’s restricted share awards contain non-forfeitable dividend rights but do not contractually obligate the holders to share in the losses of the Company. Accordingly, during periods of net income, unvested restricted shares are included in the determination of both basic and diluted EPS. During periods of net loss, these shares are excluded from both basic and diluted EPS.

Basic EPS is based on the weighted average number of common shares and unvested restricted shares outstanding, adjusted for ESOP shares not yet committed to be released. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock, such as outstanding stock options, were exercised or converted into common stock or resulted in the issuance of common stock. Diluted EPS is calculated by adjusting the weighted average number of shares of common stock outstanding to include the effects of contracts or securities exercisable or which could be converted into common stock, if dilutive, using the treasury stock method. For each of the three and nine months ended March 31, 2015 and 2014 outstanding options to purchase 227,626 shares were excluded from the computations of diluted earnings per share as their effect would have been anti-dilutive. The following is a reconciliation of the basic and diluted weighted average number of common shares outstanding:

	Three Months Ended		Nine Months Ended	
	March 31, 2015	2014	March 31, 2015	2014
Basic weighted average outstanding shares	4,428,861	4,814,774	4,478,328	4,855,390
Effect of dilutive stock options	—	—	—	—
Diluted weighted average outstanding shares	4,428,861	4,814,774	4,478,328	4,855,390

4. **STOCK-BASED COMPENSATION** – The Company applies the provisions of ASC 718, *Compensation – Stock Compensation*, which requires the Company to measure the cost of employee services received in exchange for awards of equity instruments and to recognize this cost in the financial statements over the period during which the employee is required to provide such services. The Company has elected to recognize compensation cost associated with its outstanding stock-based compensation awards with graded vesting on a straight-line basis pursuant to ASC 718. The expense is calculated for stock options at the date of grant using the Black-Scholes option pricing model. The expense associated with restricted stock awards is calculated based upon the value of the common stock on the date of grant. Stock-based compensation expense was \$65,000 and \$-0- for the three months ended March 31, 2015 and 2014, respectively and \$201,000 and \$-0- for the nine months ended March 31, 2015 and 2014, respectively. No stock-based compensation awards were granted during the three and nine months ended March 31, 2014.

5. **DIVIDENDS** – On July 24, 2014, November 14, 2014 and February 12, 2015 the Board of Directors of the Company declared cash dividends on the Company’s outstanding shares of stock of \$0.06 per share for each period. The dividends, totaling \$859,000, were paid during the nine months ended March 31, 2015.

6. **STOCK REPURCHASE PLAN** – On February 3, 2014 the Company’s board of directors approved the repurchase of up to 514,956 shares of the Company’s outstanding common stock, which represented approximately 10% of the Company’s outstanding shares at that date. Purchases were conducted solely through and based upon the parameters of a Rule 10b5-1 repurchase plan. As of December 31, 2014, all 514,956 shares were repurchased at a total cost of \$6.0 million.

7. **SUPPLEMENTAL CASH FLOW INFORMATION**

	Nine Months Ended	
	March 31, 2015	2014
	(Dollars in thousands)	
Supplemental disclosure of cash flow information is as follows:		
Cash paid during the period for:		
Income taxes	\$ 32	\$ 522

Edgar Filing: United Community Bancorp - Form 10-Q

Interest	\$ 1,264	\$ 2,010
----------	----------	----------

Supplemental disclosure of non-cash investing and financing activities is as follows:

Unrealized gain (loss) on securities designated as available for sale, net of tax	\$ 1,216	\$ (9)
Transfers of loans to other real estate owned	\$ 202	\$ 277
Beginning of period adjustment from transfer of mortgage servicing rights from amortized cost method to fair value method, net of tax	\$ -	\$ 45

8. DISCLOSURES ABOUT FAIR VALUE OF ASSETS AND LIABILITIES - ASC 820, *Fair Value Measurements and Disclosures*, requires disclosure of the fair value of financial instruments, both assets and liabilities, whether or not recognized in the consolidated balance sheet, for which it is practicable to estimate the value. For financial instruments where quoted market prices are not available, fair values are estimated using present value or other valuation methods.

The following methods and assumptions are used in estimating the fair values of financial instruments:

Cash and cash equivalents

The carrying values presented in the consolidated statements of position approximate fair value.

Investments and mortgage-backed securities

For investment securities (debt instruments) and mortgage-backed securities, fair values are based on quoted market prices, where available. If a quoted market price is not available, fair value is estimated using quoted market prices of comparable instruments.

Loans receivable

The fair value of the loan portfolio is estimated by evaluating homogeneous categories of loans with similar financial characteristics. Loans are segregated by types, such as residential mortgage, commercial real estate, and consumer. Each loan category is further segmented into fixed and adjustable rate interest, terms, and by performing and non-performing categories. The fair value of performing loans, except residential mortgage loans, is calculated by discounting contractual cash flows using estimated market discount rates which reflect the credit and interest rate risk inherent in the loan. For performing residential mortgage loans, fair value is estimated by discounting contractual cash flows adjusted for prepayment estimates using discount rates based on secondary market sources. The fair value for significant non-performing loans is based on recent internal or external appraisals. Assumptions regarding credit risk, cash flow, and discount rates are judgmentally determined by using available market information.

Federal Home Loan Bank stock

The Bank is a member of the Federal Home Loan Bank system and is required to maintain an investment based upon a pre-determined formula. The carrying values presented in the consolidated statements of position approximate fair value.

Deposits

The fair values of passbook accounts, NOW accounts, and money market savings and demand deposits approximate their carrying values. The fair values of fixed maturity certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently offered for deposits of similar maturities.

Advances from Federal Home Loan Bank

The fair value is calculated using rates available to the Company on advances with similar terms and remaining maturities.

Off-balance sheet items

Carrying value is a reasonable estimate of fair value. These instruments are generally variable rate or short-term in nature, with minimal fees charged.

The estimated fair values of the Company's financial instruments at March 31, 2015 and June 30, 2014 are as follows:

	March 31, 2015		June 30, 2014	
	Carrying Amounts	Fair Value	Carrying Amounts	Fair Value
	<i>(In thousands)</i>			
Financial assets:				
Cash and due from banks	\$23,558	\$23,558	\$24,970	\$24,970
Investment securities available for sale	48,786	48,786	39,965	39,965
Investment securities held to maturity	30,175	30,318	337	337
Mortgage-backed securities	127,016	127,016	179,017	179,017
Loans receivable and loans receivable held for sale	253,885	254,795	244,522	245,150
Accrued interest receivable	1,857	1,857	1,634	1,634
Investment in FHLB stock	5,339	5,339	6,588	6,588
Financial liabilities:				
Deposits	431,682	432,644	439,636	440,849
Accrued interest payable	22	22	25	25
FHLB advances	13,000	13,071	15,000	15,041
Off-balance sheet items	\$—	\$—	\$—	\$—

ASC 820-10-50-2 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Fair value methods and assumptions are set forth below for each type of financial instrument. Where quoted prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. Level 2 securities include U.S. Government and agency mortgage-backed securities, U.S. Government agency bonds, municipal securities, and other real estate owned. If quoted market prices are not available, the Bank utilizes a third party vendor to calculate the fair value of its available for sale securities. The third party vendor uses quoted prices of securities with similar characteristics when available. If such quotes are not available, the third party vendor uses pricing models or discounted cash flow models with observable inputs to determine the fair value of these securities.

Fair value measurements for certain assets and liabilities measured at fair value on a recurring basis:

	Total	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant other unobservable inputs (Level 3)
(In thousands)				
March 31, 2015:				
Mortgage-backed securities	\$ 127,016	\$ —	\$ 127,016	\$ —
Municipal Bonds	38,234	—	38,234	—
U.S. Government Agency Bonds	2,006	—	2,006	—
Small Business Admin	8,365	—	8,365	—

Edgar Filing: United Community Bancorp - Form 10-Q

Other equity securities	181	181	—	—
Mortgage servicing rights	576	—	576	—

June 30, 2014:

Mortgage-backed securities	\$179,017	\$ —	\$ 179,017	\$ —
Municipal Bonds	37,815	—	37,815	—
U.S. Government Agency Bonds	1,992	—	1,992	—
Other equity securities	158	158	—	—
Mortgage servicing rights	722	—	722	—

Edgar Filing: United Community Bancorp - Form 10-Q

Fair value measurements for certain assets and liabilities measured at fair value on a nonrecurring basis:

	Total	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant other unobservable inputs (Level 3)
	(In thousands)			
March 31, 2015:				
Other real estate owned	\$ 328	\$ —	\$ 328	\$ —
Impaired loans	12,533	—	12,533	—
June 30, 2014:				
Other real estate owned	\$ 598	\$ —	\$ 598	\$ —
Loans held for sale	138	—	138	—
Impaired loans	15,445	—	15,445	—

The adjustments to other real estate owned and impaired loans are based primarily on appraisals of the real estate, cash flow analysis or other observable market prices. The Bank's policy is that fair values for these assets are based on current appraisals or cash flow analysis.

The following table presents fair value measurements for the Company's financial instruments which are not recognized at fair value in the accompanying statements of financial position on a recurring or nonrecurring basis.

	Total	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant other unobservable inputs (Level 3)
March 31, 2015:

9. INVESTMENT SECURITIES

Investment securities available for sale at March 31, 2015 consisted of the following:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Market Value
Mortgage-backed securities	\$ 127,355	\$ 370	\$ 708	\$ 127,017
Municipal Bonds	37,667	720	153	38,234
U.S. Government Agency Bonds	2,000	6	—	2,006
Small Business Admin	8,364	—	—	8,364
Other equity securities	210	—	29	181
	\$ 175,596	\$ 1,096	\$ 890	\$ 175,802

Investment securities held to maturity at March 31, 2015 consisted of the following:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Market Value
Municipal Bonds	\$ 30,175	\$ 251	\$ 108	\$ 30,318

Investment securities available for sale at June 30, 2014 consisted of the following:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Market Value
Mortgage-backed securities	\$ 180,563	\$ 501	\$ 2,047	\$ 179,017
Municipal Bonds	38,000	479	664	37,815
U.S. Government Agency Bonds	2,000	—	8	1,992
Other equity securities	210	—	52	158
	\$ 220,773	\$ 980	\$ 2,771	\$ 218,982

Investment securities held to maturity at June 30, 2014 consisted of the following:

Edgar Filing: United Community Bancorp - Form 10-Q

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Market Value
Municipal Bonds	\$ 337	\$	— \$	— \$ 337

The mortgage-backed securities, callable bonds and municipal bonds have the following maturities at March 31, 2015:

	Available for Sale		Held to Maturity	
	Amortized cost	Estimated market value	Amortized cost	Estimated market value
Due or callable in one year or less	\$ 175	\$ 175	\$ 57	\$ 57
Due or callable in 1 - 5 years	114,748	114,454	194	205
Due or callable in 5 - 10 years	51,304	51,678	5,073	5,104
Due or callable in greater than 10 years	9,158	9,314	24,851	24,952
Total debt securities	\$ 175,385	\$ 175,621	\$ 30,175	\$ 30,318

All other securities available for sale at March 31, 2015 are saleable within one year.

Gross proceeds on the sale of investment and mortgage-backed securities were \$14.1 million and \$45,000 for the three months ended March 31, 2015 and 2014, respectively. Gross proceeds on the sale of investment and mortgage-backed securities were \$45.3 million and \$90,000 for the nine months ended March 31, 2015 and 2014, respectively. Gross realized gains for the three and nine months ended March 31, 2015 were \$136,000 and \$396,000, respectively. Gross realized losses for the three and nine months ended March 31, 2015 were \$393,000 and \$706,000, respectively. There were no gross realized losses for the three and nine months ended March 31, 2014.

The table below indicates the length of time individual investment securities and mortgage-backed securities have been in a continuous loss position at March 31, 2015:

	Less than 12 months		12 months or longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(In thousands)					
Mortgage-backed securities	\$22,371	\$ 45	\$ 52,739	\$ 664	\$75,110	\$ 709
Municipal Bonds	17,608	183	2,946	77	20,554	260

	\$48,343	\$ 228	\$ 55,866	\$ 770	\$104,209	\$ 998
Number of investments	47		25		72	

Securities available for sale are reviewed for possible other-than-temporary impairment on a quarterly basis. During this review, management considers the severity and duration of the unrealized losses as well as its intent and ability to hold the securities until recovery, taking into account balance sheet management strategies and its market view and outlook. Management also assesses the nature of the unrealized losses taking into consideration factors such as changes in risk-free interest rates, general credit spread widening, market supply and demand, creditworthiness of the issuer or any credit enhancement providers, and the quality of the underlying collateral. Management does not intend to sell these securities in the foreseeable future, and does not believe that it is more likely than not that the Bank will be required to sell a security in an unrealized loss position prior to a recovery in its value. The decline in market value is due to changes in market interest rates. The fair values are expected to recover as the securities approach maturity dates.

10. GOODWILL AND INTANGIBLE ASSET

In June 2010, old United Community Bancorp acquired three branches from Integra Bank National Association (“Integra”), which was accounted for under the purchase method of accounting. Under the purchase method, the Company is required to allocate the cost of an acquired company to the assets acquired, including identified intangible assets, and liabilities assumed based on their estimated fair values at the date of acquisition. The excess cost over the value of net assets acquired represents goodwill, which is not subject to amortization.

Goodwill arising from business combinations represents the value attributable to unidentifiable intangible elements in the business acquired. Goodwill recorded by the Company in connection with its acquisition relates to the inherent value in the business acquired and this value is dependent upon the Company's ability to provide quality, cost-effective services in a competitive market place. As such, goodwill value is supported ultimately by revenue that is driven by the volume of business transacted. A decline in earnings as a result of a lack of growth or the inability to deliver cost-effective services over sustained periods can lead to impairment of goodwill that could adversely impact earnings in future periods.

As permitted by current accounting rules, the Company completed its qualitative assessment to determine whether current events or changes in circumstances lead to a determination that it is more likely than not, as defined, that the fair value of the reporting unit is less than its carrying amount. Based upon the Company's assessment, there was no such determination that the fair value of the reporting unit is less than its carrying amount. Accordingly, the Company did not apply the traditional two-step goodwill impairment test.

The following table indicates changes to the core deposit intangible asset and goodwill balances for the nine months ended March 31, 2015:

	Core Deposit Intangible (In thousands)	Goodwill
Balance at June 30, 2014	\$547	\$ 2,522
Amortization	(90)	-
Balance at March 31, 2015	\$457	\$ 2,522

The core deposit intangible is being amortized using the double declining balance method over its estimated useful life of 8.75 years. Remaining amortization of the core deposit intangible is as follows (dollars in thousands) as of March 31, 2015:

April 1, 2015 through June 30, 2015	\$28
2016	117
2017	117
2018	117
2019	78
	\$457

11. DISCLOSURES ABOUT THE CREDIT QUALITY OF LOANS RECEIVABLE AND THE ALLOWANCE FOR LOAN LOSSES (IN THOUSANDS)

The following tables illustrate certain disclosures required by ASC 310-10-50-11B(c), (g) and (h), the changes to the allowance for loan losses, for the three and nine months ended March 31, 2015 (in thousands):

Federal regulations require us to review and classify our assets on a regular basis. In addition, the OCC has the authority to identify problem assets and, if appropriate, require them to be classified. There are three classifications for problem assets: substandard, doubtful and loss. "Substandard assets" must have one or more defined weaknesses and are characterized by the distinct possibility that we will sustain some loss if the deficiencies are not corrected. "Doubtful assets" have the weaknesses of substandard assets with the additional characteristic that the weaknesses make collection or liquidation in full on the basis of currently existing facts, conditions and values questionable, and there is a high possibility of loss. An asset classified "loss" is considered uncollectible and of such little value that continuance as an asset of the institution is not warranted. The regulations also provide for a "special mention" category, described as assets which do not currently expose us to a sufficient degree of risk to warrant classification but do possess credit deficiencies or potential weaknesses deserving our close attention. If we classify an asset as substandard, doubtful or loss, we analyze that asset and may establish a specific allocation for the asset at that time.

The following tables illustrate certain disclosures required by ASC 310-10-50-29(b).

The Bank did not have any investments in subprime loans at March 31, 2015. Impaired loans at March 31, 2015 included troubled debt restructurings (“TDR”) with an aggregate principal balance of \$7.5 million and a recorded investment of \$7.4 million. See Note 12 for a discussion on TDRs.

12. TROUBLED DEBT RESTRUCTURINGS - From time to time, as part of our loss mitigation process, loans may be renegotiated in a TDR when we determine that greater economic value will ultimately be recovered under the new restructured terms than through foreclosure, liquidation, or bankruptcy. We may consider the borrower's payment status and history, the borrower's ability to pay upon a rate reset on an adjustable rate mortgage, size of the payment increase upon a rate reset, period of time remaining prior to the rate reset, and other relevant factors in determining whether a borrower is experiencing financial difficulty. TDRs are accounted for as set forth in ASC 310-40 *Troubled Debt Restructurings by Creditors* ("ASC 310-40"). A TDR may be on nonaccrual or it may accrue interest. A TDR is typically on nonaccrual until the borrower successfully performs under the new terms for at least six consecutive months. However, a TDR may be placed on accrual immediately following the restructuring in those instances where a borrower's payments are current prior to the modification, the loan is restructured at a market rate and management determines that principal and interest under the new terms are fully collectible. All TDRs are considered to be impaired loans. A TDR will be removed from TDR classification if it is restructured at a market rate, is not impaired under those restructured terms and has been performing under those terms for at least twelve consecutive months.

Existing performing loan customers who request a loan (non-TDR) modification and who meet the Bank's underwriting standards may, usually for a fee, modify their original loan terms to terms currently offered. The modified terms of these loans are similar to the terms offered to new customers with similar credit risk. The fee assessed for modifying the loan is deferred and amortized over the life of the modified loan using the level-yield method and is reflected as an adjustment to interest income. Each modification is examined on a loan-by-loan basis and if the modification of terms represents more than a minor change to the loan, then the unamortized balance of the pre-modification deferred fees or costs associated with the mortgage loan are recognized in interest income at the time of the modification. If the modification of terms does not represent more than a minor change to the loan, then the unamortized balance of the pre-modification deferred fees or costs continue to be deferred.

The following tables summarize TDRs by loan type and accrual status.

		At March 31, 2015						
(In thousands)		Loan Status		Total Unpaid Principal	Related Allowance	Recorded Investment	Number of Loans	Average Recorded Investment
		Accrual	Nonaccrual	Balance

Total	\$ 40	\$ 93	\$ 159	\$ 368

At March 31, 2015, the Bank had 33 loans totaling \$7.4 million that were reported as TDRs, and had established an allowance for losses on these loans of \$120,000. With respect to the \$7.4 million in TDRs, the Bank charged-off \$4.6 million with respect to those loans at the time the loans were restructured into the Note A/B split note format. At June 30, 2014, the Bank had 39 loans totaling \$10.0 million that were reported as TDRs, and had an allowance for losses on these loans of \$120,000. With respect to the \$10.0 million in TDRs, the Bank charged-off \$4.9 million with respect to those loans at the time the loans were restructured into the Note A/B split note format. At March 31, 2015, the Bank had no other commitments to lend on its TDRs. Management continues to monitor the performance of loans reported as TDRs on a monthly basis.

Loans that were included in TDRs at March 31, 2015 and June 30, 2014 were generally given concessions of interest rate reductions of between 25 and 300 basis points. Six of these loans, having an aggregate carrying value of \$5.1 million at March 31, 2015, also have balloon payments due at the end of their lowered interest rate period. At March 31, 2015, there were 23 loans with an aggregate carrying value of \$5.3 million with required principal and interest payments and three loans with an aggregate carrying value of \$2.3 million with required interest only payments. At June 30, 2014, there were 27 loans with an aggregate carrying value of \$7.7 million with required principal and interest payments and three loans with an aggregate carrying value of \$2.3 million with required interest only payments.

The following table is a roll forward of activity in our TDRs:

(Dollar amounts in thousands)	Three Months Ended March 31, 2015		Nine Months Ended March 31, 2015	
	Recorded	Number	Recorded	Number
	<u>Investment</u>	<u>of Loans</u>	<u>Investment</u>	<u>of Loans</u>
Beginning balance	\$ 7,471	34	\$ 9,889	39
Additions to TDR	-	-	8	1
Charge-offs	-	-	(8) -
Removal of TDRs ⁽¹⁾	-	(1) (1,844) (7
Payments	(65) -	(639) -
Ending balance	\$ 7,406	33	\$ 7,406	33

⁽¹⁾ The removal of these loans from TDR was due to payoffs of loans and loans eligible for TDR removal during the nine months ended March 31, 2015.

13. EFFECT OF RECENT ACCOUNTING PRONOUNCEMENTS

In January 2015, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2015-01, *Income Statement – Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement*

Presentation by Eliminating the Concept of Extraordinary Items. This ASU simplifies the income statement presentation requirements by eliminating the concept of extraordinary items. This ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015 with early adoption permitted. We do not expect the adoption of this guidance to have any impact on the Company's consolidated financial statements.

In August 2014, the FASB issued ASU No. 2014-14, *Receivables – Troubled Debt Restructurings by Creditors (Subtopic 310-40): Classification of Certain Government-Guaranteed Mortgage Loans Upon Foreclosure – a consensus of the FASB Emerging Issues Task Force.* This ASU reduces diversity in practice with regards to the classification of foreclosed mortgage loans that are fully or partially guaranteed under government programs. For public companies, this ASU is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2014 with earlier adoption permitted for companies which have already adopted ASU 2014-04. We do not expect the adoption of this guidance to have a significant impact on the Company's consolidated financial statements.

In June 2014, the FASB issued ASU No. 2014-12, *Compensation – Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide that a Performance Target Could be Achieved After the Requisite Service Period – a consensus of the FASB Emerging Issues Task Force*. This ASU requires that a performance target that could be achieved after the requisite service period be treated as a performance condition. This ASU is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2015 with earlier adoption permitted. We do not expect the adoption of this guidance to have a significant impact on the Company's consolidated financial statements.

In June 2014, the FASB issued ASU No. 2014-11, *Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures*, which modifies the accounting for and disclosures related to such transactions. For public companies, the accounting changes in the ASU are effective for the first interim or annual period beginning after December 15, 2014. Early application is prohibited. We do not expect the adoption of this guidance to have a significant impact on the Company's consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers: Topic 606*. This ASU affects companies that enter into contracts with customers to transfer goods or services or enter into contracts for the transfer of nonfinancial assets, unless those contracts are within the scope of other standards. For public companies, this ASU is effective for annual reporting periods, including interim periods, beginning after December 15, 2016. Early application is not permitted. We do not expect the adoption of this guidance to have a significant impact on the Company's consolidated financial statements.

In January 2014, the FASB issued ASU No. 2014-04, *Receivables – Troubled Debt Restructurings by Creditors (Subtopic 310-40)*, which clarifies when an in substance repossession or foreclosure has occurred and the creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be derecognized and the real estate property recognized. A creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan either when legal title to the residential real estate property is obtained upon completion of a foreclosure or when the borrower has conveyed all interest in the residential real property to the creditor to satisfy the loan through completion of a deed in lieu of foreclosure or similar arrangement. The ASU also require disclosure of both the amount of foreclosed residential real estate property held by the creditor and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure. The guidance is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. We do not expect the adoption of these provisions to have a significant impact on the Company's consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This report contains forward-looking statements that are based on assumptions and may describe future plans, strategies and expectations of the Company. These forward-looking statements are generally identified by use of the words "believe," "expect," "intend," "anticipate," "estimate," "project" or similar expressions. The Company's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse effect on the operations of the Company and its subsidiaries include, but are not limited to, general economic conditions, changes in the interest rate environment, legislative or regulatory changes that may adversely affect our business, changes in accounting policies and practices, changes in competition and demand for financial services, adverse changes in the securities markets, changes in deposit flows, and changes in the quality or composition of the Company's loan or investment portfolios. Additionally, other risks and uncertainties may be described in the Company's Annual Report on Form 10-K as filed with the Securities and Exchange Commission on September 26, 2014, which is available through the SEC's website at www.sec.gov and in other reports filed by the Company. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Except as required by applicable law or regulation, the Company does not undertake the responsibility, and specifically disclaims any obligation, to release publicly the result of any revisions that may be made to any forward-looking statements to reflect events or circumstances after the date of the statements or to reflect the occurrence of anticipated or unanticipated events.

Critical Accounting Policies

We consider accounting policies involving significant judgments and assumptions by management that have, or could have, a material impact on the carrying value of certain assets or on income to be critical accounting policies. We consider the following to be our critical accounting policies: the allowance for loan losses and the valuation of deferred income taxes.

ALLOWANCE FOR LOAN LOSSES - The allowance for loan losses is the amount estimated by management as necessary to cover probable credit losses in the loan portfolio at the statement of financial condition date. The allowance is established through the provision for loan losses, which is charged to income. Determining the amount of the allowance for loan losses necessarily involves a high degree of judgment. Among the material estimates required to establish the allowance are: loss exposure at default; the amount and timing of future cash flows on affected loans; and the value of collateral. Inherent loss factors based upon environmental and other economic factors are then applied to the remaining loan portfolio. All of these estimates are susceptible to significant change. Management reviews the level of the allowance at least quarterly and establishes the provision for loan losses based upon an evaluation of the portfolio, past loss experience, current economic conditions and other factors related to the collectibility of the loan portfolio. Although we believe that we use the best information available to establish the allowance for loan losses,

future adjustments to the allowance may be necessary if economic conditions differ substantially from the assumptions used in making the evaluation. In addition, the OCC, as an integral part of its examination process, periodically reviews our allowance for loan losses. Such agency may require us to recognize adjustments to the allowance based on its judgments about information available to it at the time of its examination. A large loss could deplete the allowance and require increased provisions to replenish the allowance, which would negatively affect earnings. For additional discussion, see Notes 1 and 3 of the Notes to the Consolidated Financial Statements included in Item 8 of the Annual Report on Form 10-K filed with the Securities and Exchange Commission on September 26, 2014.

DEFERRED INCOME TAXES - We use the asset and liability method of accounting for income taxes as prescribed in Accounting Standards Codification (“ASC”) 740-10-50. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. If current available information raises doubt as to the realization of the deferred tax assets, a valuation allowance is established. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. We exercise significant judgment in evaluating the amount and timing of recognition of the resulting tax liabilities and assets. These judgments require us to make projections of future taxable income. The judgments and estimates we make in determining our deferred tax assets, which are inherently subjective, are reviewed on a continual basis as regulatory and business factors change. Any reduction in estimated future taxable income may require us to record a valuation allowance against our deferred tax assets. A valuation allowance would result in additional income tax expense in the period, which would negatively affect earnings. United Community Bancorp referred to as the Company, accounts for income taxes under the provisions of ASC 275-10-50-8 to account for uncertainty in income taxes. The Company had no unrecognized tax benefits as of March 31, 2015 and June 30, 2014. The Company recognized no interest and penalties on the underpayment of income taxes during the three and nine month periods ended March 31, 2015 and 2014, and had no accrued interest and penalties on the balance sheet as of March 31, 2015 and June 30, 2014. The Company has no tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly increase within the next fiscal year. The Company is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for tax years ended on or before June 30, 2011.

Comparison of Financial Condition at March 31, 2015 and June 30, 2014

Balance Sheet Analysis

Total assets were \$522.5 million at March 31, 2015, compared to \$530.5 million at June 30, 2014. The decrease is primarily due to a \$13.3 million decrease in investment securities resulting from sales of mortgage-backed securities with proceeds partially redeployed for the purchase of held to maturity investment securities and funding loan activity.

Total liabilities decreased \$6.9 million from \$457.5 million at June 30, 2014 to \$450.6 million at March 31, 2015 due to an \$8.0 million decrease in deposits during the current year period, primarily as a result of a decrease in municipal deposits.

Total stockholders' equity decreased \$1.1 million from \$72.9 million at June 30, 2014 to \$71.8 million at March 31, 2015. The decrease is primarily due to stock repurchases totaling \$3.9 million and dividends paid totaling \$859,500 during the nine months ended March 31, 2015, partially offset by net income of \$1.8 million, amortization of ESOP shares totaling \$300,000 and an increase in unrealized gains on available for sale securities totaling \$1.2 million during the current year period.

Loans. At March 31, 2015, one- to four- family residential loans totaled \$139.3 million, or 53.7% of total gross loans, compared to \$129.5 million, or 51.6% of total gross loans, at June 30, 2014.

Multi-family and nonresidential real estate loans totaled \$70.7 million and represented 27.3% of total loans at March 31, 2015, compared to \$72.4 million, or 28.9% of total loans, at June 30, 2014.

Consumer loans totaled \$34.6 million and represented 13.4% of total loans at March 31, 2015, compared to \$34.7 million or 13.8% of total loans at June 30, 2014.

The following table sets forth the composition of our loan portfolio at the dates indicated.

	At March 31, 2015		At June 30, 2014		
	Amount	Percent	Amount	Percent	
(Dollars in thousands)					
Residential real estate:

Allowance for loan losses	5,090		5,459		
Loans, net	\$253,885		\$244,384		

Loan Maturity

The following table sets forth certain information at March 31, 2015 regarding the dollar amount of loan principal repayments becoming due during the periods indicated. The table does not include any estimate of prepayments, which significantly shorten the average life of all loans and may cause our actual repayment experience to differ from the contractual requirements shown below. Demand loans having no stated schedule of repayments and no stated maturity are reported as due in one year or less.

	Less Than One Year	More Than One Year to Five Years	More Than Five Years	Total Loans
(in thousands)				
One- to four-family residential real estate	\$8,564	\$ 32,688	\$ 98,089	\$139,341

Results of Operations for the Three and Nine Months Ended March 31, 2015 and 2014

Overview. Net income increased \$111,000 to \$694,000 for the quarter ended March 31, 2015 from \$583,000 for the quarter ended March 31, 2014. Net income decreased \$86,000 to \$1.8 million for the nine months ended March 31, 2015 from \$1.9 million for the nine months ended March 31, 2014.

Net Interest Income. The following table summarizes changes in interest income and interest expense for the three and nine months ended March 31, 2015 and 2014.

	Three Months Ended			Nine Months Ended		
	March 31, 2015	March 31, 2014	% Change	March 31, 2015	March 31, 2014	% Change
	(Dollars in thousands)					
Interest income:						
Loans	\$2,789	\$2,847	(2.0)%	\$8,495	\$8,916	(4.7)%
Investment and mortgage backed securities	989	902	9.6	2,844	2,350	21.0
Other interest-earning assets	4	3	33.3	11	13	(15.4)
Total interest income	3,782	3,752	0.8	11,350	11,279	0.6
Interest expense:						
NOW and money market deposit accounts	47	42	11.9	204	232	(12.1)
Passbook accounts	58	50	16.0	170	155	9.7
Certificates of deposit	392	468	(16.2)	1,257	1,459	(13.8)
Total interest-bearing deposits	497	560	(11.3)	1,631	1,846	(11.6)
FHLB advances	60	62	(3.2)	186	162	14.8
Total interest expense	557	622	(10.5)	1,817	2,008	(9.5)
Net interest income	\$3,225	\$3,130	3.0	\$9,533	\$9,271	2.8

Net interest income increased to \$3.2 million for the quarter ended March 31, 2015 compared to \$3.1 million for the quarter ended March 31, 2014. Interest income increased \$30,000 and interest expense decreased \$65,000 from the prior year period. The increase in interest income was a result of a \$3.6 million increase in the average balance of loans, partially offset by a decrease in the average rate earned on loans from 4.59% for the quarter ended March 31, 2014 to 4.43% for the quarter ended March 31, 2015, and an increase in the average rate earned on investments from 1.73% for the quarter ended March 31, 2014 to 2.05% for the current year period. The increase in interest income was also partially offset by a \$15.4 million decrease in the average balance of investments. Net interest income increased \$262,000, or 2.8%, to \$9.5 million for the nine months ended March 31, 2015 as compared to \$9.3 million for the nine months ended March 31, 2014. The increase was attributable to an increase in interest income of \$71,000 and a decrease of \$191,000 in interest expense. The increase in interest income was primarily the result of an increase in the average rate earned on investments from 1.51% for the nine months ended March 31, 2014 to 1.91% for the nine months ended March 31, 2015, partially offset by an \$8.6 million decrease in the average balance of investments. The

decrease in interest expense was primarily the result of a decrease in the average interest rate paid on deposits from 0.58% for the nine months ended March 31, 2014 to 0.51%, for the nine months ended March 31, 2015. Net interest margin increased from 2.60%, for the nine months ended March 31, 2014 to 2.73% for the nine months ended March 31, 2015.

The following table summarizes average balances and average yields and costs of interest-earning assets and interest-bearing liabilities for the three and nine months ended March 31, 2015 and 2014. For the purposes of this table, average balances have been calculated using month-end balances, and nonaccrual loans are included in average balances only. Yields are not presented on a tax equivalent basis.

Provision for (Recovery of) Loan Losses. The provision for loan losses was a net recovery of \$289,000 for the quarter ended March 31, 2015 compared to a \$75,000 provision for the quarter ended March 31, 2014. The net recovery in the provision for loan losses is due to the recovery of \$301,000 on a nonresidential loan and a provision of \$12,000. The current quarter recovery of loan losses is reflective of continued improvement in our asset quality. The provision for loan losses was a net recovery of \$244,000 for the nine months ended March 31, 2015 compared to a recovery of loan losses of \$292,000 for the nine months ended March 31, 2014. The decrease in the recovery of provision for loan losses was primarily due to recoveries on one 1-4 family loan and one multi-family loan totaling \$492,000 with a provision of \$200,000 during the nine months ended March 31, 2014 compared to the recovery of a \$301,000 non-residential loan with a provision of \$12,000 during the nine months ended March 31, 2015. Nonperforming assets to total assets decreased to 1.48% from 1.99% at June 30, 2014, a decrease of 51 basis points, or 25.6%. Nonperforming loans as a percentage of total loans decreased from 3.97% at June 30, 2014 to 2.86% at March 31, 2015, and nonperforming loans as a percentage of total assets decreased from 1.88% at June 30, 2015 to 1.42% at March 31, 2015.

Other Income. The following table summarizes other income for the three and nine months ended March 31, 2015 and 2014.

	Three Months Ended March 31, 2015			Nine Months Ended March 31, 2015			2014		
	2015	2014	% Change	2015	2014	% Change	2015	2014	% Change
Service charges	\$643	\$594	8.2	\$2,024	\$1,889	7.1			
Gain on sale of loans	41	15	173.3	101	141	(28.4)			
Loss on sale of investments	(257)	-	(100.0)	(310)	-	(100.0)			
Gain on sale of other real estate owned	76	(1)	(7,700.0)	147	6	2,350.0			
Gain on sale of fixed assets	-	-	-	-	136	(100.0)			
Income from Bank Owned Life Insurance	131	150	(12.7)	400	362	10.5			
Other	49	129	(62.0)	178	416	(57.2)			
Total	\$683	\$887	(23.0)	\$2,540	\$2,950	(13.9)			

Other income decreased \$204,000, or 23% to \$683,000 for the quarter ended March 31, 2015 compared to \$887,000 for the prior year period. The decrease is primarily due to a \$257,000 increase in the loss on sale of investments and by an \$80,000 decrease in other income, partially offset by a \$26,000 increase in gain on sale of loans and a \$49,000 increase in service charge income. Other income decreased \$410,000, or 13.9%, to \$2.5 million for the nine months ended March 31, 2015 compared to \$3.0 million for the prior year period. The decrease is primarily due to a \$310,000 increase in loss on the sale of investments, a \$238,000 decrease in other income, a \$40,000 decrease in the gain on sale of loans and a \$136,000 decrease in the gain on sale of fixed assets, partially offset by a \$135,000 increase in service charges.

Noninterest Expense. The following table shows the components of noninterest expense and the percentage changes for the three and nine months ended March 31, 2015 and 2014.

	Three Months Ended			Nine Months Ended				
	March 31,		% Change	March 31,		% Change		
	2015	2014			2015	2014		
	(Dollars in thousands)							
Compensation and employee benefits	\$2,042	\$1,804	13.2	%	\$ 5,772	\$ 5,424	6.4	%
Premises and occupancy expense	299	322	(7.1)	922	919	.3	
Deposit insurance premium	89	93	(4.3)	277	269	3.0	
Advertising expense	76	61	24.6		289	239	20.9	
Data processing expense	293	324	(9.6)	1,049	1,069	(1.9)
Provision for loss on real estate owned	-	-	-		-	1	(100.0)
Intangible amortization	30	35	(14.3)	90	110	(18.2)
Professional fees	136	151	(9.9)	609	667	(8.7)
Other operating expenses	390	416	(6.3)	1,165	1,250	(6.8)
Total	\$3,355	\$3,206	4.6		\$ 10,173	\$ 9,948	2.3	

Noninterest expense increased \$149,000 to \$3.4 million for the quarter ended March 31, 2015 compared to \$3.2 million for the quarter ended March 31, 2014. The increase includes \$238,000 in compensation and employee benefits partially offset by a \$23,000 decrease in occupancy expense and a \$31,000 decrease in data processing expense. The increase in compensation and employee benefits was primarily due to a \$57,000 increase in normal annual compensation increases and expenses related to additional employees hired to enhance the Bank's commercial, nonresidential real estate and multi-family real estate lending pursuant to its controlled growth strategy. Since the quarter ended September 30, 2014, the Bank has hired a chief credit officer, two commercial lenders and other staff, and expects to continue to evaluate the need to add additional staff, to support this strategy. Non-interest expense also increased due to an increase in profit sharing expense of \$60,000. Additionally, compensation expense increased as a result of a \$65,000 stock-based compensation expense related to the vesting of stock options and restricted share awards issued in April 2014. There was no corresponding expense for this item in the prior year period. The decrease in occupancy expense was primarily due to a decrease in depreciation expense. The decrease in data processing expense is due to expenses related to a data conversion incurred in the previous period with no such expense in the current reporting period. Noninterest expense increased \$225,000 to \$10.2 million for the nine months ended March 31, 2015 compared to \$9.9 million for the prior year period. An increase of \$348,000 in compensation expense was partially offset by decreases of \$58,000 in professional fees and \$20,000 in data processing expenses. The increase in compensation was primarily the result of stock-based compensation expense of \$201,000 in the nine months ended March 31, 2015 related to the vesting of stock options and restricted share awards issued in April 2014 with no corresponding expense in the prior year period, \$84,000 in normal annual compensation increases, and increases relating to additional employees hired in the fiscal year to enhance the commercial loan department.

Income Taxes. Income tax expense for the three months ended March 31, 2015 was \$148,000 compared to \$153,000 for the three months ended March 31, 2014. The effective tax rate decreased to 17.6% for the three months ended March 31, 2015 from 20.8% for the three months ended March 31, 2014. The decrease in income tax expense and effective tax rate for the current year quarter is due to an increase of \$174,000 in non-taxable income from municipal bonds, net of a \$106,000 increase in income before income taxes and a \$19,000 decrease in non-taxable income from bank owned life insurance in the current year quarter compared to the prior year quarter.

Income tax expense for the nine months ended March 31, 2015 was \$303,000 compared to \$638,000 for the nine months ended March 31, 2014. The effective tax rate decreased to 14.1% for the nine months ended March 31, 2015 from 24.9% for the nine months ended March 31, 2014. The decrease in income tax expense and effective tax rate for the current year quarter is due to a \$421,000 decrease in income before income taxes combined with increases of \$366,000 in non-taxable income from municipal bonds and \$38,000 in non-taxable income from bank owned life insurance in the current year period compared to the prior year period.

Analysis of Nonperforming Assets. We consider foreclosed real estate, repossessed assets and nonaccrual loans, including nonaccrual TDR loans, to be nonperforming assets.

All of the TDRs at March 31, 2015 represented loan relationships with long-time borrowers. In measuring impairment, management considered the results of independent property appraisals, together with estimated selling

Edgar Filing: United Community Bancorp - Form 10-Q

expenses, and/or detailed cash flow analyses. At March 31, 2015, 33 loans were considered to be TDRs (with a recorded investment of \$7.4 million) of which 13 loans (with a recorded investment of \$2.3 million) were included in nonperforming assets.

The following table provides information with respect to our nonperforming assets at the dates indicated.

	At March 31, 2015	At June 30, 2014
(Dollars in thousands)	(Unaudited)	
Nonaccrual loans:		
One- to four-family residential real estate	\$ 1,945	\$ 1,788
Nonresidential real estate and land	2,718	3,136
Consumer	464	633
Total nonaccrual loans	5,127	5,557
Nonaccrual restructured loans:		
One- to four-family residential real estate	1,238	1,552

	At March 31, 2015 (Unaudited)	At June 30, 2014		
(Dollars in thousands)

Accruing restructured loans and nonperforming assets	\$ 12,981	\$ 16,164		
Total nonperforming loans to total loans	2.86	3.97	%	%
Total nonperforming loans to total assets	1.42	1.88		
Total nonperforming assets to total assets	1.48	1.99		
Total number of nonaccrual loans	65	76		

Interest income that would have been recorded for the three and nine months ended March 31, 2015 had nonaccruing loans been current according to their original terms was \$133,000 and \$357,000, respectively. Interest recognized on the cash basis with regard to nonaccrual restructured loans was \$5,000 and \$20,000, respectively, for the three and nine months ended March 31, 2015.

At March 31, 2015, the percentage of nonperforming assets to total assets decreased to 1.48% from 1.99% at June 30, 2014, a decrease of 51 basis points, or 25.6%. A discussion of United Community Bank's largest commercial real estate loans that were reported as nonperforming loans or TDRs at either March 31, 2015 or June 30, 2014 are described below in the "Loan Relationship" narratives. As discussed, some of the Loan Relationships include loans that were restructured using the "Note A/B split note" strategy for which the amount of the Note B loan has been charged-off, with the borrower remaining responsible for that charged-off amount unless otherwise agreed to by the Bank.

For purposes of this discussion, the loans are identified by a Loan number within each Loan Relationship, such as "Loan A-1", "Loan A-2" and "Loan M-1 and M-2".

At March 31, 2015, the five largest commercial real estate nonaccrual loans are Loans B-1, J-1, L, M-1, and M-2. At that time, the five largest charge-offs are related to loans in Loan Relationships B, F, H, K and M. Management monitors the performance of all of these loans and reviews all options available to keep the loans current, including further restructuring of the loans. If restructuring efforts ultimately are not successful, management will initiate foreclosure proceedings.

Loan Relationship B. At March 31, 2015, this Loan Relationship consisted of two loans (one Note A loan, Loan B-1, and one Note B loan) having an aggregate carrying value of \$771,000. At June 30, 2014, this Loan Relationship consisted of four loans (two Note A loans, Loan B-1 and Loan B-2, and two Note B loans) having an aggregate carrying value of \$1.3 million. At March 31, 2015, Loan B-1, which was restructured previously using the Note A/B split note strategy, had an aggregate carrying value of \$771,000, and is secured by a first mortgage on two separate retail strip shopping centers. At June 30, 2014, Loan B-1 had an aggregate carrying value of \$1.2 million and was secured by the same collateral. At March 31, 2015, Loan B-2, which was restructured previously using the Note A/B split note strategy, had no aggregate carrying value as its \$169,000 principal balance was paid off in the September 2014 quarter, with the Bank experiencing no additional principal balance loss. Loan B-1 is included in the above table as “Nonaccrual restructured loans, Nonresidential real estate” at March 31, 2015 and June 30, 2014. At March 31, 2015, Loan B-2 was not included in the above “Nonaccrual restructured loans, Nonresidential real estate” table. At June 30, 2014, Loan B-2 was included in the above “Nonaccrual restructured loans, Nonresidential real estate” table. In the “Credit Risk Profile by Internally Assigned Grade” table on page 40, Loan B-1 is classified as “Nonresidential real estate, Substandard” at March 31, 2015 and June 30, 2014. At March 31, 2015, Loan B-2 was not classified as “Nonresidential real estate, Substandard” in the “Credit Risk Profile by Internally Assigned Grade” table on page 40. At June 30, 2014, Loan B-2 was classified as “Nonresidential real estate, Substandard” in the “Credit Risk Profile by Internally Assigned Grade” table on page 40. Loan B-1 was performing in accordance with its restructured terms at March 31, 2015. A more detailed history of Loan Relationship B follows.

The loans comprising Loan Relationship B were originally restructured in June 2010, with an aggregate carrying value of \$4.1 million. At the time of the original restructuring, the property value was based primarily on the collateral's cash flow, including required personal cash infusions from the co-borrowers. Management believed that the lower debt service would improve the borrowers' cash flow, and in turn, the performance of the loans. One of the borrowers is a corporate entity. The principals of the corporate borrower are co-borrowers on the loans. The Bank analyzed the personal net worth, liquid net worth, debt to income ratios and credit scores of the co-borrowers. While the co-borrowers were not expected to cover a total loss on the loans, management believed the co-borrowers would mitigate the amount of potential future losses. The restructured loans were considered impaired at June 30, 2010, with an allowance for loan loss of \$600,000 to reflect the reduction in carrying value resulting from the exclusion of the required personal cash infusions from the co-borrowers from the calculation of the carrying value. In March 2011, the loans were again experiencing cash flow problems due to decreases in rental revenue from the properties. Due to financial difficulties experienced by the co-borrowers, including the cash flow problems of the subject properties and a decrease in other outside sources of income, the co-borrowers were unable to mitigate the losses on the loans. Therefore, in March 2011, the two loans secured by the two separate retail strip shopping centers were combined and refinanced into two loans, using the Note A/B split note strategy. The first loan (Loan B-1, a Note A loan) had a balance of \$2.4 million and was classified as substandard, reported as a TDR, and placed on nonaccrual. The second loan (a Note B loan) had a balance of \$1.3 million and was charged-off (inclusive of the \$600,000 specific allowance recorded for this Loan Relationship in the quarter ended June 30, 2010).

In March 2011, Loan B-2 was refinanced into two loans, using the Note A/B split note strategy. The first loan (Loan B-2, a Note A loan) was for \$238,000 and was classified as substandard, reported as a TDR, and placed on nonaccrual. The second loan (a Note B loan) was for \$169,000 and was charged-off. The restructured loans had interest rates 275 basis points lower than their 2010 restructured rates for a period of two years, and 500 basis points below their original rates.

In May 2012, one of the two retail strip shopping centers that secured Loan B-1 experienced the loss of a major tenant. The resultant decrease in cash flow caused the Bank to have the two retail strip shopping centers securing the loan appraised in June 2012. The appraisal reflected that the value of properties had declined to \$1.45 million from the February 2011 appraised value of \$2.95 million. Management determined that this loan would ultimately be settled through the sale of the property. A charge-off of \$956,000 was established in the quarter ended June 30, 2012 based on the then most recent appraisal which indicated a known loss, together with an additional impairment of \$189,000 based on the Bank's experience in settling foreclosed property. The carrying value of this loan was classified as substandard, and reported as a TDR, and placed on nonaccrual. The Bank also appraised the single purpose commercial use property in June 2012. The value of this property declined to \$225,000 from \$325,000 in February 2011 due to decreased cash flow from the then current tenant. Management determined that this loan would also be settled from the sale of the property. A charge-off in the amount of \$22,000 was established based on the then most recent appraisal indicating a known loss, together with an additional impairment of \$29,000 based on the Bank's experience in settling foreclosed property. The carrying value of this loan was classified as substandard, reported as a TDR, and placed on nonaccrual. During the quarter ended March 31, 2013, the balloon payment for the two loans secured by the two separate retail strip shopping centers became due. An independent appraisal was performed in March 2013 on the properties reflecting that the appraised value of the properties had increased to \$1.8 million. The loan was restructured during the March 2013 quarter using the Note A/B split note strategy. The first loan (Loan B-1, a Note A loan) was refinanced for \$1.3 million, with a market interest rate of 5.50% based on a 30 year loan term, and a three year balloon payment. As stated above, the carrying value of this loan was put on nonaccrual, classified as

substandard, and reported as a TDR. The second loan (a Note B loan) was for \$2.3 million was charged-off. This charged-off amount equaled the amount of the Note B loan balance in March 2011 (\$1.3 million) plus that portion Note A loan balance in March 2011 that was charged-off during the period ended June 30, 2012 (\$1.0 million).

The balloon payment for Loan B-2 also came due during the quarter ended March 31, 2013. The Note A loan and the Note B loan secured by the single purpose commercial use property were modified again using the Note A/B split note strategy. The first loan (Loan B-2, a Note A loan) was modified to a balance of \$185,000, with a market interest rate of 5.50%, for a 30-year term, and a three year balloon payment. As stated above, the carrying value of this loan was put on nonaccrual, classified as substandard, and reported as a TDR. The second loan (a Note B loan) was modified at its then current balance of \$191,000 and charged-off. This charged-off amount equaled the balance of the Note B loan balance in March 2011 (\$169,000) plus the balance of the Note A loan in March 2011 that was charged-off during the period ended June 30, 2012 (\$22,000). As noted above, the balance of Loan B-2 was paid off in the September 2014 quarter. In the December 31, 2014 quarter, the co-borrowers of Loan B-1 paid \$335,000 toward the loan's principal balance.

Loan Relationship E. At March 31, 2015, this Loan Relationship had no carrying value, as the borrower paid off the \$276,000 balance of the Note A loan during the quarter ended March 31, 2015. Additionally, the borrower paid \$300,000 towards the Note B loan, resulting in a recovery of \$300,000. As further described below, the Note B loan originally had a balance of \$508,000 which was charged-off in March 2011. The Bank realized no further loss on the Loan Relationship and the balance of the Note B loan has been released. At June 30, 2014, Loan Relationship E had an aggregate carrying value of \$276,000. The loans had been secured by nonresidential warehouse properties. There were no personal guarantees or co-borrowers on these loans. As described below, these loans were previously restructured using the Note A/B split note strategy. Because it was paid off during the March 2015 quarter, the Note A loan is not included in the above table "Accruing restructured loans," classified as "Nonresidential real estate, Watch" or included in the "Credit Risk Profile by Internally Assigned Grade" table on page 40 at March 31, 2015, but is included in the "Accruing restructured loans" table, the "Credit Risk Profile by Internally Assigned Grade" table on page 40, and classified as "Nonresidential real estate, Substandard," at June 30, 2014. A more detailed history of Loan Relationship E follows.

Loan Relationship E was originally comprised of one loan. The loan was restructured in April 2010. At June 30, 2010, the charge-off to the general allowance for loan losses, based upon a then current independent appraisal, was \$308,000. The restructured loan had payments deferred for one year, while accruing interest at a market rate. This loan was scheduled to undergo an interest rate and payment reset in February 2011. There were no personal guarantees or co-borrowers on this loan. At the time of the loan adjustment period, it became apparent that the borrower would have difficulty making the required monthly payments beginning in February 2011. As a result, management completed a detailed analysis of this loan and determined to again restructure the loan utilizing the Note A/B split note strategy in March 2011. The terms of the Note A loan were calculated using the borrower's then current financial information to yield a payment having a debt service coverage ratio of approximately 1.5x, which was more stringent than the Bank's normal underwriting standards. A restructuring fee of \$9,000 was charged and included in the Note B loan at March 31, 2011. The Note A loan had a balance of \$569,000, put on nonaccrual, classified as substandard and was reported as a TDR. The Note B loan had a balance of \$508,000, which was charged-off in the quarter ended March 31, 2011. This charged-off amount was inclusive of the previous specific reserve of \$308,000 recorded during the period ended June 30, 2010. During the quarter ended March 31, 2013, the balloon payments for these loans became due. At that time, the Bank had been reviewing the cash flow of the property on a monthly basis and verified that the cash flows had not changed. An independent appraisal was ordered to provide the "as is" value of the property. The Bank obtained the appraisal in February 2013, and the appraised value of the property had decreased to \$910,000 from \$997,000 in February 2011. The loans were refinanced into two loans, again using the Note A/B split note strategy. The first loan (a Note A loan) had a balance of \$519,000 with a market interest rate of 5.50%, for a 30-year term and a three year balloon payment. This loan was put on accrual (because of its sufficient payment history), classified as substandard,

and reported as a TDR. The second loan (a Note B loan) had a balance of \$508,000 and was charged-off. This charged-off amount equaled the amount of the Note B loan originated in March 2011. In the quarter ended December 31, 2013, the borrower sold one of the four nonresidential properties securing the Note A loan and the Note B loan. The Bank received the net proceeds of \$227,000 from this sale and applied these net proceeds to the balance of the Note A loan. As of September 30, 2014, Note A was no longer reported as a TDR loan because the loan was current and there were more than 12 consecutive monthly payments made on time. Appraisals received at that time indicated that the loan to value complied with the Bank's current underwriting standards. Cash flows of the properties securing the loan also indicated that the debt service coverage ratio complied with the Bank's current underwriting standards.

Loan Relationship F. At March 31, 2015 and June 30, 2014, Loan Relationship F was comprised of two loans, a Note A loan and a Note B loan, having an aggregate carrying value of \$428,000 and \$437,000, respectively. These loans are secured by a multi-family residential real estate property and a single-family real estate property. The borrower is a corporate entity, with three principals, each of whom is a co-borrower of the loan. At March 31, 2015 and June 30, 2014, the Note A loan is not included in the above table as “Accruing restructured loans”. In the “Credit Risk Profile by Internally Assigned Grade” table on page 40, the Note A loan is classified as “Multi-family real estate, Watch” at March 31, 2015 and June 30, 2014. As of June 30, 2014, Note A was no longer reported as a TDR loan because the loan was current and there were more than 12 consecutive monthly payments made on time. Additionally, recent appraisals obtained for the properties securing the loans indicated that the loan to value ratio of the loans complied with the Bank’s underwriting standards, and the cash flow analysis performed on the loans from updated financial information indicated that the debt service coverage ratio complied with the Bank’s underwriting standards. The Note A loan in Loan Relationship F was performing in accordance with its terms at March 31, 2015. A more detailed history of Loan Relationship F follows.

The original loan was initially restructured using the Note A/B split note strategy in June 2010 based on an 80% loan-to-value ratio derived from an April 2010 independent appraisal. The first loan (Note A loan) had a balance of \$631,000 with a market interest rate of 5.50%, for a 25-year term, based on a 3/1 ARM. This loan was put on nonaccrual and classified as substandard. The second loan (a Note B loan) had a balance of \$216,800 and there was a specific reserve established for the entire amount of the loan. The borrower was a corporate entity, with two principals, each of whom individually was a co-borrower of the loans. At December 31, 2010, the first loan was 160 days delinquent. The delinquency was a result of personal problems between the borrowers affecting their ability to manage the multi-family residential real estate and the single-family real estate. The personal problems between the borrowers also resulted in the borrowers’ inability to make the required personal cash infusions. In the latter part of 2010 and into early 2011, one of the borrowers effectively took control of the multi-family residential real estate and the single-family real estate, and brought the business current with respect to property taxes, deposit refunds to former tenants, and made required monthly loan payments in January and February 2011. Other than the January and February 2011 loan payments, the borrowers were unable to make payments to bring the loan current. Based upon those developments, management completed a detailed analysis of the total lending relationship with the borrowers. As a result of this analysis, these loans were again restructured, using the Note A/B split note strategy in March 2011. The terms of the first loan (a Note A loan) were calculated using the borrowers’ then current financial information to yield a payment having a debt service coverage ratio of approximately 1.5x, which was more stringent than the Bank’s normal underwriting standards. A restructuring fee of \$7,000 was charged and included in the second loan (a Note B loan) at March 31, 2011. After the restructuring in March 2011, the Note A loan had a balance of \$475,000, was put on nonaccrual, classified as substandard and reported as a TDR. The Note B loan had a balance of \$405,000. The full amount of the Note B loan was charged-off in the quarter ended March 31, 2011, inclusive of the previous specific reserve of \$216,800 from December 31, 2010. A two year balloon payment was due in March 31, 2013 on the loans unless the borrower refinanced the loans to a market rate loan at that time. During the quarter ended December 31, 2012, as a result of the continued personal problems of the co-borrowers, the two loans were modified with one of the borrowers who had taken control of the two properties in early 2011. The other borrower relinquished all of its interest in the two properties. However, in addition to the one borrower retained on the loan, two other borrowers were added to the loans to provide managerial strength to the relationship and increase the property’s income potential. The Bank had been reviewing the cash flow of the property on a monthly basis and determined that the cash flows had improved due to the borrowers’ enhanced managerial ability. An independent appraisal was ordered to provide the “as is” value of the properties. The Bank obtained the appraisal in December 2012, and the appraised value of the properties had decreased to \$730,000 from \$774,000 in February 2011. During the quarter ended December 31, 2012, the two loans were modified, again using the Note A/B split note strategy, with both loans having three year balloon payments. The Note A loan was modified to a market interest rate of 5.50%, with no increase in the principal balance (\$453,000).

The term of the loan was also reduced to 324 months from the remaining term of 339 months. Even with the higher market interest rate and the shorter term of the loan, the debt service coverage ratio is above 1.20x, which complied with the Bank's current loan underwriting standards. This loan was put on accrual (because of its sufficient payment history), classified as substandard, and reported as a TDR. There was no increase in the principal balance (\$405,000) of the Note B loan from that loan's prior restructuring in March 2011, and therefore, the charge-off amount (\$405,000) remained the same as in March 2011. However, the interest rate was reduced to 0%, as the loan had been charged-off.

Loan Relationship H. At March 31, 2015 and June 30, 2014, Loan Relationship H was comprised of three loans having an aggregate carrying value of \$951,000 and \$1.0 million, respectively. At March 31, 2015 and June 30, 2014, the loans comprising Loan H-1, which were previously restructured using the Note A/B split note strategy, had an aggregate carrying value of \$713,000 and \$723,000, respectively. Loan H-1 is secured by a first lien on an 18-unit apartment complex, a single-family dwelling, a 6.3 acre tract of land, and a second lien on a single-family owner occupied dwelling on 11.36 acres. The borrower is a limited liability corporation and the two co-borrowers are the principals of the limited liability corporation. At March 31, 2015 and June 30, 2014, Loan H-1 is included in the above table as “Accruing restructured loans” and classified as “Multi-family residential real estate, Watch” in the “Credit Risk Profile by Internally Assigned Grade” table on page 40. As of June 30, 2014, Note A was no longer reported as a TDR loan because the loan was current and there were more than twelve consecutive market rate monthly payments made on time. Also, recent appraisals indicated that the loan to value was adequate and the cash flows from updated financial information of the properties securing the loan indicated that the debt service coverage ratio was adequate.

During the quarter ended June 30, 2013, the Bank refinanced the principal residence of the co-borrowers (the single-family owner occupied dwelling on 11.36 acres mentioned above). This loan, Loan H-2, had an original balance of \$280,000 at a market rate of interest for a ten year term. At March 31, 2015 and June 30, 2014, the balance of Loan H-2 was \$238,000 and \$257,000, respectively. Loan H-2 is not included in the above table as “Accruing restructured loans” at March 31, 2015 and June 30, 2014. At March 31, 2015 and June 30, 2014, Loan H-2 was classified as “One- to Four-Family Owner-Occupied Mortgage, Watch” in the “Credit Risk Profile by Internally Assigned Grade” table on page 40. At March 31, 2015, Loan H-1 was performing in accordance with its terms and Loan H-2 was performing in accordance with its original terms. A more detailed history of Loan Relationship H-1 follows.

During the quarter ended September 30, 2008, Loan Relationship H was comprised of one loan with a carrying value of \$1.3 million and classified as special mention. In the quarter ended June 30, 2009, the co-borrowers approached the Bank and advised that the only co-borrower who was employed had experienced a substantial salary reduction. The borrowers requested an interest rate reduction to 3% and interest only payments for three years. Independent appraisals were ordered and received and reflected that the properties on which the Bank had a first and second lien position had an aggregate value of \$1.5 million. The loan was classified as substandard, placed on nonaccrual, and reported as a TDR. Due to the reduced interest rate, a specific valuation of \$123,000 was established for the loan through a charge-off to the general allowance. Under the loan’s modified terms, the interest rate was to reset to 5.75% on June 1, 2012. In June 2012, the borrowers approached the Bank and advised it that the properties’ cash flow could not service the increase in interest rate. Independent appraisals were ordered and received in June 2012 and reflected that the properties on which the Bank had a first lien position had a value of \$978,000. As a result, the Bank recorded a charge-off of \$481,000, inclusive of the \$123,000 specific allocation previously established, to reflect the carrying value of the loan at \$744,000. The one loan performed in accordance with its restructured terms until the September 30, 2012 quarter, when the borrowers again approached the Bank and advised it that the properties’ cash flow could not service the loan. Therefore, the one loan was restructured using the Note A/B split note strategy. The first loan (a Note A loan) was for \$748,000, with a market rate of interest of 5.00%, for a 30-year term and a three year balloon payment. The carrying value of this loan was placed on nonaccrual, classified as substandard, and reported as a TDR. The second loan (a Note B loan) was for \$515,000 (inclusive of the \$481,000 that was charged-off in the June 30, 2012 quarter) and was charged-off. The interest rate was reduced to 0% as the loan had been charged-off. As noted above, as of March 31, 2015, Loan H-1 has been performing in accordance with its restructured terms since September 30, 2012.

Loan Relationship J. At March 31, 2015 and June 30, 2014, this relationship was comprised of two loans having an aggregate carrying value of \$1.6 million. Loan J-1 is secured by a first mortgage on a nonresidential real estate property located on 2.17 acres of land and an additional 1.753 acre tract of land that is contiguous to the nonresidential real estate and is zoned for commercial development. Loan J-2 is secured by a first mortgage on six one-to four-family non owner-occupied residential properties and an 80 acre tract of land. Two of the Loan J-1 borrowers are corporate entities, each of whose principals individually signed as co-borrowers. One of the Loan J-2 borrowers is a corporate entity whose principal individually signed as a co-borrower. At March 31, 2015 and June 30, 2014, Loan J-1 is included in the above table in “Nonaccrual, Nonresidential Real Estate”, and was classified as “Nonresidential Real Estate, Substandard” in the “Credit Risk Profile by Internally Assigned Grade” table on page 40. At March 31, 2015 and June 30, 2014, Loan J-2 is not included in the Nonaccrual table and was classified as “One-to-Four-Family Non OwnerOccupied Mortgage, Watch” in the “Credit Risk Profile by Internally Assigned Grade” table on page 40. During the quarter ended March 31, 2015, the Bank entered into discussions with the co-borrowers about increasing the payments paid each month on loan J-1 and the fact that this property had not been sold after several promising leads. Subsequent to the quarter ended March 31, 2015, the Bank entered into a forbearance agreement with the borrower and co-borrowers. Basically, the terms of this agreement are that increasing principal and interest payments will be made over 12 months, beginning with the June, 2015 payment. Also, all escrow payments will continue to be made. Also, the Maturity date for this loan is now June 30, 2016. If the loan is paid off before the new maturity date, there will be a discounted payoff, but the Bank would experience no additional loss to the loan’s carrying value by any such discounted payoff. At March 31, 2015, Loan J-1 was performing in accordance with its restructured terms, and J-2 was performing in accordance with its original terms. A more detailed history of Loan Relationship J follows.

During the quarter ended June 30, 2013, the co-borrowers of Loan J-1 approached the Bank and advised it that the entity buying the nonresidential real estate portion of this property on land contract was vacating the premises. The contract buyers also stated they were unable to make the contract loan payments. The co-borrowers had been using the payments from this land contract to make loan payments to the Bank. The Bank ordered an independent appraisal of the nonresidential real estate and the contiguous 1.753 acre tract of land. The appraised value, received in June 2013, totaled \$1.1 million, \$720,000 for the nonresidential real estate property, and \$390,000 for the 1.753 acre tract of land. This was a decrease from the April 2007 aggregate appraised value of \$1.6 million. At that time, it was determined that the co-borrowers were able to pay \$1,550 per month for the monthly real estate taxes and \$3,450 per month on Loan J-1. Therefore, in the June 30, 2013 quarter, Loan J-1, with a carrying value of \$869,000, net of the charge off amount of \$161,000, was put on nonaccrual and classified as substandard and was reported as a TDR. The carrying value and the charge off amount were determined by an impairment analysis using 80% of the appraised value of the nonresidential real estate plus 75% of the appraised value of the 1.753 acre tract of land. Subsequent to June 30, 2013, the borrowers signed a purchase agreement with an unrelated third party for the nonresidential real estate property at a sales price that would enable any unpaid principal balance to be fully collateralized by the remaining collateral. During the quarter ended March 31, 2014, the purchase agreement expired and the potential purchaser determined not to purchase the property. At the time of this filing, the borrowers are pursuing other possible sale or refinance opportunities for this property.

Loan Relationship K. At March 31, 2015 and June 30, 2014, this Loan Relationship was comprised of seven loans having an aggregate carrying value of \$1.4 million and \$1.5 million, respectively. At March 31, 2015 and June 30, 2014, Loan K-1 had an aggregate carrying value of \$727,000 and \$735,000, respectively, and is secured by 11 one-to four-family non-owner occupied properties and one multi-family property. As further described below, Loan K-1 was previously restructured using the Note A/B strategy. Loan K-2 is secured by a first mortgage on the principal

residence of two of the individual co-borrowers. Loan K-3 is a home equity line of credit secured by a second mortgage on the principal residence of two of the individual co-borrowers. Loan K-5 is secured by a first mortgage on the principal residence of the two individual co-borrowers. Loan K-6 is secured by a UCC-1 filing and a second mortgage on the principal residence of the two individual co-borrowers. Loan K-7 is secured by a first mortgage on a nonresidential property and a third mortgage on the principal residence of the two individual co-borrowers. One of the Loan K-1 co-borrowers is a corporate entity, each of whose principals, together with their respective spouses, is a co-borrower. Two of the Loan K-2 and K-3 co-borrowers are individual co-signors. Loan K-5 co-borrowers are individually signed. One of the Loan K-6 and K-7 co-borrowers is a corporate entity whose principal, together with their spouse, is a co-borrower.

At March 31, 2015 and June 30, 2014, Note A of Loan K-1 is included in the above table in “Accruing Restructured Loans.” At March 31, 2015 and June 30, 2014, Loans K-2, K-3, K-5, K-6, and K-7, are not included in the above nonaccrual table because these loans were performing in accordance with their original terms. At March 31, 2015 and June 30, 2014, the Note A loan of Loan K-1 was classified as “Multi-Family, Substandard” in the “Credit Risk Profile by Internally Assigned Grade” table on page 40. At March 31, 2015 and June 30, 2014, Loan K-2 was classified as “One-to-Four-Family Owner-Occupied Mortgage, Watch” in the “Credit Risk Profile by Internally Assigned Grade” table on page 40. At March 31, 2015 and June 30, 2014, Loan K-3 was classified as “Consumer, Pass” in the “Credit Risk Profile by Internally Assigned Grade” table on page 40. At March 31, 2015 and June 30, 2014, Loan K-5 was classified as “One-to-Four-Family Owner-Occupied Mortgage, Pass” in the “Credit Risk Profile by Internally Assigned Grade” table on page 40. At March 31, 2015 and June 30, 2014, Loan K-6 was classified as “Commercial and Agricultural, Pass” in the “Credit Risk Profile by Internally Assigned Grade” table on page 40. At March 31, 2015 and June 30, 2014, Loan K-7 was classified as “Nonresidential Real Estate, Pass” in the “Credit Risk Profile by Internally Assigned Grade” table on page 40. At March 31, 2015, the Note A loan of Loan K-1 was performing in accordance with its restructured terms, and Loans K-2, K-3, K-5, K-6, and K-7, were performing in accordance with their original terms. A more detailed history of Loan K-1 follows.

In November 2011, a charge-off in the amount of \$406,000 was established for Loan K-1 because of cash flow issues of the rental properties securing this loan. At that time independent appraisals were ordered. The new appraisals, received in December 2011, reflected that the values of the properties had decreased to \$1.3 million from \$2.0 million as of May 2007. The Bank determined to restructure the loan utilizing the Note A/B split note strategy. The first loan (Loan K-1, a Note A loan) was for \$1.1 million with the market rate of interest of 5.50% and a two year balloon payment. This loan was put on nonaccrual, classified as substandard, and reported as a TDR. The second loan (a Note B loan) had a balance of \$415,000 and was charged-off and the interest rate reduced to 0%. This charge-off amount was \$9,000 more than the charge-off amount established in November 2011. In July 2012, the borrowers sold four of the rental properties and the net proceeds of \$301,000 were applied to Loan K-1, reducing the principal to \$823,000 from \$1.1 million. A fifth rental property was released because of the condition of the property.

Loan K-1 was restructured again utilizing the Note A/B split note strategy during the quarter ended December 31, 2013 due to the balloon payment described above. The first loan (a Note A loan) was for \$809,000 with the market rate of interest of 5.50% and a three year balloon payment. This loan was put on accrual (because of its sufficient payment history), classified as substandard, and reported as a TDR. The second loan (a Note B loan) had a balance of \$415,000 and was charged-off and the interest rate reduced to 0%. In March 2014, the borrowers sold one of the rental properties and the net proceeds of \$65,000 were applied to Loan K-1, reducing the loan’s principal balance to \$739,000. In the December 31, 2013 quarter, Loan K-4 was paid in full. Therefore, at March 31, 2015, there were a total of 12 rental properties remaining as collateral for this loan.

·Loan Relationship L. At March 31, 2015 and June 30, 2014, this Loan Relationship was comprised of one loan having an aggregate carrying value of \$277,000 and \$304,000, respectively. This loan is secured by a first mortgage on two one-to four-family non-owner occupied properties and two nonresidential properties. The borrowers are husband and wife who jointly own these properties. Each of the borrowers is also a co-borrower on the loan. The loan is included in the above table in “Nonaccrual restructured loans, Nonresidential real estate”, is classified as “Nonresidential real estate, Substandard, ” and reported as a TDR at March 31, 2015 and June 30, 2014. This loan was performing in accordance with its restructured terms at March 31, 2015. Following the March 31, 2015 quarter, the

\$277,000 balance of Loan Relationship L was paid off. Additionally, the Bank recovered \$122,000 of the \$154,000 previously charged-off on this loan Relationship. The Bank realized no further loss on the Loan Relationship and the balance of the charge off has been released. A more detailed history of Loan Relationship L follows.

This Loan Relationship was originally comprised of two loans originated in the first quarter of 2008 and had an aggregate net carrying value of \$743,000 at March 31, 2008. In early 2011, the borrowers began to experience cash flow problems because a major tenant in one of the nonresidential properties was making sporadic rental payments. At June 30, 2011, the two loans were not 30 days delinquent; nevertheless, the Bank ordered independent appraisals on the properties securing the loan due to the underlying cash flow problems. The appraisals were received in June 2011 and reflected a total value of \$676,000 compared to the original November 2007 appraised value of \$1.2 million. At September 30, 2011, one of the loans was 30 days delinquent at which time management determined to establish an impairment of \$93,000. Based on the then most recent appraisal indicating a known loss and the borrowers' cash flow problems, in the quarter ending December 31, 2011, management determined to refinance the two loans into one loan at a below market interest rate. A charge-off of \$124,000, inclusive of the impairment established in the September 30, 2011 quarter, was also recorded. As part of the Bank's ongoing monitoring and impairment analysis, the Bank obtained new appraisals on all five properties relating to this loan relationship in the quarter ended June 30, 2013. The total value of these new appraisals was \$680,000, reflecting an increase of \$4,000 from the appraisals completed in June 2011. In the quarter ended September 30, 2013, the borrowers received an offer from a qualified buyer to purchase one of the nonresidential properties for \$182,000. This property had appraised for \$185,000 in June 2013. Based on the anticipated net proceeds from the sale to be applied to the loan's principal balance, the Bank increased the charge off amount on this loan to \$154,000 as of December 31, 2013. In January 2014, the property was sold and net proceeds of \$65,000 were applied to the principal balance of the loan.

Loan Relationship M. At March 31, 2015 and June 30, 2014, Loan Relationship M was comprised of two loans having an aggregate carrying value of \$1.7 million and \$2.3 million, respectively. The loans are secured by a first mortgage on two golf courses, including a club house on each, in the greater Cincinnati area, an approximately 25 acre tract of land, and a second mortgage on the principal residence of two of the individual co-borrowers. The borrower of Loans M-1 and M-2 is a corporate entity, each of whose principals, a husband and wife, has individually signed as a co-borrower, as have the father and step mother of one of the co-borrowers. At March 31, 2015 and June 30, 2014, Loans M-1 and M-2 are included in the above table in "Nonaccrual, Nonresidential Real Estate" and classified as "Nonresidential Real Estate, Substandard" in the "Credit Risk Profile by Internally Assigned Grade" table on page 40. Following the March 31, 2015 quarter, the Bank entered into a forbearance agreement with the borrower and co-borrowers, pursuant to which full principal, interest and escrow payments will be made for the months of May through October of each year, beginning in 2015. The maturity date for these loans is now October 1, 2018. If any of these loans is paid off before the new maturity date, there will be a discounted payoff, but the Bank would experience no additional loss to the loan's carrying value by any such discounted payoff. Additionally, as of the date of this filing, the borrower has paid and brought current all delinquent real estate taxes. A more detailed history of Loan Relationship M follows.

Loan M-1 originated in December 2007 and Loan M-2 originated in July 2009, each with a 20 year term. Under each loan's terms, payments are due from April through December of each year; no payments are required in January, February and March of each year. Due to reduced cash flows resulting from inclement weather, in December 2013, the co-borrowers advised the Bank that they would pay the amounts due for November and December 2013 in February and March 2014, respectively. Due to the continuation of the severe winter weather and resultant reduced cash flows, borrowers were unable to make the payment due in February 2014 and were unable to make the real estate tax payment due during the period ended March 31, 2014. As a result of the failure to make the November payment, the decrease in cash flow and the borrowers' failure to pay real estate taxes, the Bank had both properties appraised. The appraisals were received in March 2014 and reflected an aggregate decrease in value of approximately \$500,000 as compared to their March 2009 appraised value. Based on the new appraised value, there was no known loss to the Bank. The Bank also performed an impairment analysis on each loan in March 2014 resulting in an aggregate impairment of \$41,000. In March 2014, the Bank and the co-borrowers agreed to a revised repayment plan to bring all payments, and real estate taxes due, but not paid during the period ended March 31, 2014, current by July 31, 2014. At June 30, 2014, an impairment analysis was performed. The impairment analysis showed that no further impairment was needed on either Loan M-1 or Loan M-2.

At September 30, 2014, the borrowers had successfully complied with the revised payment plan agreement from March 31, 2014 and both loans were current. Additionally, the real estate taxes due during the March 31, 2014 quarter, were paid. However, at September 30, 2014, the real estate taxes that were due in July 2014 were not paid. Also, subsequent to the quarter ending September 30, 2014, due to cash flow issues caused by inclement weather during the month of October 2014, the payments due for October 2014, were not made. During the December 31, 2014 quarter, the real estate taxes that were due in July 2014 were still not paid, and the loan payments due for October, November, and December 2014 were not paid. The Bank met with the husband and wife co-borrowers during the December 31, 2014 quarter. The co-borrowers advised the Bank that they would not be able to make the past due payments and the past due real estate taxes because of the inclement weather during the quarter until the golf season opened in Spring, 2015. Because of these developments, the Bank performed another impairment analysis of these two loans. While the appraisals of the properties showed no need for an impairment, the Bank further analyzed the cash flow of the golf courses. After this analysis, the Bank determined that an impairment of \$466,000 was needed and a charge-off of \$466,000 was established for this loan relationship. During the quarter ended March 31, 2015, the

Bank entered into discussions with the co-borrowers about another payment plan. As stated above, subsequent to the end of the March 31, 2015 quarter, the Bank entered into a forbearance agreement with the borrower and co-borrowers. An impairment analysis was performed for the quarter ended March 31, 2015. The impairment analysis showed that no further impairment was needed on either Loan M-1 or M-2.

Loan Relationship N. At March 31, 2015 and June 30, 2014, Loan Relationship N was comprised of four loans having an aggregate carrying value of \$713,000 and \$714,000, respectively. Loan N-1 is secured by a single family, non-owner occupied property located on 13 acres, and by another single family, non-owner occupied property on a .52 acre lot. The carrying value of loan N-1 is \$251,000. Loan N-2 is secured by land, on which there is a 17 lot residential development. The carrying value of Loan N-2 is \$168,000. Loan N-3 and Loan N-4 are secured by a single family non-owner occupied property, located on 51 acres, with Loan N-3 being the first mortgage on this property and Loan N-4 being a home equity line of credit secured by a second mortgage on this property. The carrying value of loan N-3 and N-4 are \$222,000 and \$72,000, respectively. The borrower of Loan N-1 is a corporate entity, each of whose principals, along with their spouses, have individually signed as a co-borrower. The borrower of Loan N-2 is a corporate entity, with one of the principals individually signed as a co-borrower, together with his wife and parents. The borrowers of Loans N-3 and N-4 are a husband and wife who are also co-borrowers on Loans N-1 and N-2. Loans N-1 and N-3 are included in the above table in “Nonaccrual, one- to-four Family, Non-owner Occupied” Loans as of March 31, 2015. Loan N-2 is included in the above table in “Nonaccrual, Land loans” as of March 31, 2015. Loan N-4 is included in the above table in “Nonaccrual, Consumer loans” as of March 31, 2015. Loans N-1, N-2, N-3, and N-4 were not included in any nonaccrual table as of June 30, 2014. In the “Credit Risk Profile by Internally Assigned Grade” table on page 40, Loans N-1 and N-3 are classified as “one-to-four Family, Non-owner Occupied, Substandard” at March 31, 2015, and as “One-to Four-Family, Non-owner Occupied, Special Mention” at June 30, 2014. Loan N-2 is classified as “Land, Substandard” at March 31, 2015 and “Land, Special Mention” at June 30, 2014. Loan N-4 is classified as “Consumer, Substandard” at March 31, 2015 and “Consumer, Special Mention” at June 30, 2014. These loans were not performing in accordance with their original terms at March 31, 2015. A more detailed history of Loan Relationship N follows.

Loan N-1 originated in March, 2009 to purchase a 13 acre tract of land on which there was a single family residence. This loan was secured by this property and an additional single family residence on a one acre lot. The house and one acre on which the house was located was to be sold, with the remaining 12 acres utilized for residential development. The original appraised value of the house and 13 acres was \$283,000. The single family residence on the one acre tract was destroyed by fire in December 2013. Before its destruction, the appraised value of that collateral was \$105,000. A separate single family residence on a .52 acre tract of land was substituted as collateral for the destroyed property. This replacement property was owned by one of the Loan N-1 principal borrowers and his father. The value of this replacement property was \$135,000 based on an appraisal dated February 2014. Because the loan became 90 days delinquent, the Bank reappraised all of the properties in December, 2014. The appraised value of all properties totaled \$352,500, compared to the original appraised aggregate value of \$418,000. The loan had a market rate of interest with monthly interest only payments and an original term of one year. The was renewed for an additional five years in 2010, with a maturity date of March 2015. Because of market conditions, the borrower was unable to sell the single family residence on one acre and was unable to develop the additional 12 acres for residential development. In the December 2014 quarter, the borrower was not able to make the monthly payments due to difficulties with other business ventures of the co-borrowers with which the Bank is not involved, and the loan became more than 90 days delinquent. The Bank is in regular contact with the borrower and co-borrowers of Loan N-1, and the borrower continues to try to sell the properties. If the borrower is not able to sell the properties within a reasonable time as determined by the Bank, the Bank may take legal action.

Loan N-2 originated in November 2012 to refinance two existing loans the Bank made that were secured by a 19 lot residential development. Proceeds from the sale of the lots were to be used to repay the loan. This property appraised for \$483,000 in 2012. During the previous two years, the borrower was able to sell two of the 19 lots. Because the loan went 90 days delinquent, the Bank obtained an updated appraisal of the remaining 17 lots in December 2014. The

updated appraised value was \$300,000. This loan had a market rate of interest with monthly interest only payments. The original term of this loan was three years, with a maturity date of December 2015. Because of market conditions, the borrower was not able to sell the lots in a timely manner. In the December 2014 quarter, the borrower was not able to make the monthly payments due to other business ventures of the co-borrowers with which the Bank is not involved, and the loan became more than 90 days delinquent. The Bank is in regular contact with the borrower and co-borrowers of Loan N-2 and the borrower continues to try to sell the properties. If the borrower is not able to sell the properties within a reasonable period of time as determined by the Bank, the Bank may take legal action.

Loan N-3 and Loan N-4 were originated in April 2007 and June 2008, respectively. The purpose of Loan N-3 was to refinance and purchase an additional 33 acres of adjoining property. Loan N-4, an equity line of credit, was used to buy a single family rental property. Loans N-3 and N-4 are secured by the same property, a single family residence and 50.57 acres of land. This property appraised for \$405,000 in March 2007 and \$406,000 in February 2008. Because the loan went 90 days delinquent, the Bank updated the appraisal on this property in December 2014. The updated appraised value was \$378,000. In the December, 2014 quarter, the borrowers were not able to make the monthly payments, mainly because of other business ventures of the borrowers with which the Bank is not involved, and the loan became more than 90 days delinquent. The Bank is in regular contact with the borrowers and the borrowers continue to try to sell the property. If the borrowers are not able to sell the property within a reasonable time as determined by the Bank, legal action may be taken. An impairment analysis showed that no impairment was needed on Loans N-1, N-2, N-3, or N-4.

The following table summarizes all Note A/B format loans at March 31, 2015:

(Dollars in thousands)	Loan Balances			Number of Loans	
	Note A	Note B	Total	Note A	Note B
One- to four-family residential real estate	\$95	\$20	\$115	1	1
Nonresidential real estate	1,872	2,778	4,650	3	3
Multi-family residential real estate	1,867	1,335	3,202	3	3
Total (1)	\$3,834	\$4,133	\$7,967	7	7

(1) Included in this total are an aggregate of \$2.6 million comprised of Note A loans and \$3.6 million comprised of Note B loans that are included in the discussion of Loan Relationships B, E, F, H and K.

The following table provides information with respect to all of our loans that are classified as troubled debt restructurings. For additional information regarding troubled debt restructurings on nonaccrual status, see the table of nonperforming assets above.

(in thousands)	At March 31, 2015						
	Loan Status		Total Unpaid Principal Balance	Related Allowance	Recorded Investment	Number of Loans	Average Recorded Investment
	Accrual	Nonaccrual	Balance	Allowance	Investment	of Loans	Investment
One- to four-family residential real estate	\$883	\$ 1,238	\$ 2,121	\$ -	\$ 2,121	20	\$ 2,181
Multi-family residential real estate	727	-	727	-	727	4	1,343
Nonresidential real estate	3,630	1,048	4,678	120	4,558	9	4,093
Total	\$5,240	\$ 2,286	\$ 7,526	\$ 120	\$ 7,406	3	\$ 7,617

The following table is a roll forward of activity in our TDRs:

	Three Months Ended March 31, 2015		Nine Months Ended March 31, 2015	
	<u>Recorded Investment</u>	<u>Number of Loans</u>	<u>Recorded Investment</u>	<u>Number of Loans</u>
(Dollar amounts in thousands)				
Beginning balance	\$ 7,471	34	\$ 9,889	39
Additions to TDR	-		8	1
Charge-offs	-	-	(8)	-
Removal of TDRs ⁽¹⁾	-	(1)	(1,844)	(7)
Payments	(65)	-	(639)	-
Ending balance	\$ 7,406	33	\$ 7,406	33

⁽¹⁾ The removal of these loans from TDR was due to payoffs of the loans and loans eligible for TDR removal during the nine months ended March 31, 2015.

Loans that were included in TDRs at March 31, 2015 and June 30, 2014 were generally given concessions of interest rate reductions of between 25 and 300 basis points, and/or structured as interest only payment loans for periods of one to three years. Six of these loans, with an aggregate carrying value of \$5.1 million at March 31, 2015, also have balloon payments due at the end of their lowered interest rate period. At March 31, 2015, there were 23 loans with an aggregate carrying value of \$5.3 million with required principal and interest payments and three loans with required interest only payments. At June 30, 2014, there were 27 loans having an aggregate carrying value of \$7.7 million with required principal and interest payments and three loans with required interest only payments.

The following table shows the aggregate amounts of our classified loans at the dates indicated.

Liquidity Management. Liquidity is the ability to meet current and future financial obligations of a short-term nature. Our primary sources of funds consist of deposit inflows, loan repayments, maturities and sales of securities and borrowings from the Federal Home Loan Bank of Indianapolis. While maturities and scheduled amortization of loans and securities are predictable sources of funds, deposit flows and loan prepayments are greatly influenced by general interest rates, economic conditions and competition.

We regularly adjust our investments in liquid assets based upon our assessment of: (1) expected loan demands; (2) expected deposit flows, in particular municipal deposit flows; (3) yields available on interest-earning deposits and securities; and (4) the objectives of our asset/liability management policy.

Our most liquid assets are cash and cash equivalents. The levels of these assets depend on our operating, financing, lending and investing activities during any given period. Cash and cash equivalents totaled \$23.6 million at March 31, 2015 and \$25.0 million at June 30, 2014. Securities classified as available-for-sale whose market value exceeds our cost, which provide additional sources of liquidity, totaled \$72.0 million at March 31, 2015. Total securities classified as available-for-sale were \$175.8 million at March 31, 2015. In addition, at March 31, 2015, we had the ability to borrow a total of approximately \$100.6 million from the Federal Home Loan Bank of Indianapolis.

At March 31, 2015, we had \$35.9 million in loan commitments outstanding, consisting of \$2.5 million in mortgage loan commitments, \$25.1 million in unused home equity lines of credit, \$5.0 million in commercial lines of credit and \$3.3 million in other loan commitments. Certificates of deposit due within one year of March 31, 2015 totaled \$89.2 million. This represented 56.9% of certificates of deposit at March 31, 2015. We believe that the large percentage of certificates of deposit that mature within one year reflects customers' hesitancy to invest their funds for longer periods in the current low interest rate environment. If these maturing deposits do not remain with us, we will be required to seek other sources of funding, including other certificates of deposit and borrowings. Depending on market conditions, we may be required to pay higher rates on such deposits or other borrowings than we currently pay on the certificates of deposit due on or before March 31, 2015. However, based on past experience, we believe that a significant portion of our certificates of deposit will remain with us. We have the ability to attract and retain deposits by adjusting the interest rates offered.

Our primary investing activities are the origination and purchase of loans and the purchase of securities. Our primary financing activities consist of activity in deposit accounts and Federal Home Loan Bank advances. Deposit flows are affected by the overall level of interest rates, the interest rates and products offered by us and our local competitors and other factors. We generally manage the pricing of our deposits to be competitive and to increase core deposit relationships. Occasionally, we offer promotional rates on certain deposit products to attract deposits.

Capital Management. United Community Bank is subject to various regulatory capital requirements administered by the OCC, including a risk-based capital measure. The risk-based capital guidelines include both a definition of capital and a framework for calculating risk-weighted assets by assigning balance sheet assets and off-balance sheet items to broad risk categories. At March 31, 2015, we exceeded all of our regulatory capital requirements and we are considered “well capitalized” under regulatory guidelines. See “*Regulation and Supervision—Regulation of Federal Savings Associations—Capital Requirements*,” and Note 15 to the Consolidated Financial Statements included in Item 8 to the Annual Report on Form 10-K filed with the Securities and Exchange Commission on September 26, 2014.

The following table summarizes the Bank’s capital amounts and the ratios required at March 31, 2015:

	Actual		For capital adequacy purposes		To be well capitalized under prompt corrective action provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
March 31, 2015 (unaudited)	(in thousands)					
Tier 1 capital to risk-weighted assets	\$62,870	23.59%	\$ 10,660	4 %	\$ 15,990	6 %
Total capital to risk-weighted assets	66,222	24.85%	21,320	8 %	26,650	10 %
Tier 1 capital to adjusted total assets	62,870	12.22%	20,581	4 %	25,726	5 %
Tangible capital to adjusted total assets	62,870	12.22%	7,718	1.5 %	NA	NA

Off-Balance Sheet Arrangements. In the normal course of operations, we engage in a variety of financial transactions that, in accordance with U.S. generally accepted accounting principles, are not recorded in our financial statements. These transactions involve, to varying degrees, elements of credit, interest rate and liquidity risk. Such transactions are used primarily to manage customers’ requests for funding and take the form of loan commitments, letters of credit and lines of credit. We currently have no plans to engage in hedging activities in the future.

For the three months ended March 31, 2015, we engaged in no off-balance sheet transactions reasonably likely to have a material effect on our financial condition, results of operations or cash flows.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

For a discussion of the Company’s asset and liability management policies as well as the potential impact of interest rate changes upon the market value of the Company’s portfolio equity, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in the Company’s Annual Report on Form 10-K, filed with the Securities and Exchange Commission on September 26, 2014. The main components of market risk for the Company

are interest rate risk and liquidity risk. The Company manages interest rate risk and liquidity risk by establishing and monitoring the volume, maturities, pricing and mix of assets and funding sources with the objective of managing assets and funding sources to provide results that are consistent with liquidity, growth, risk limits and profitability goals. Model simulation is used to measure earnings volatility under both rising and falling rate scenarios.

We use an economic value of equity analysis prepared by a consulting firm to review our level of interest rate risk. This analysis measures interest rate risk by computing changes in net economic value of our cash flows from assets, liabilities and off-balance sheet items in the event of a range of assumed changes in market interest rates. Economic value of equity represents the market value of portfolio equity and is equal to the market value of assets minus the market value of liabilities, with adjustments made for off-balance sheet items. These analyses assess the risk of loss in market risk-sensitive instruments in the event of a sudden and sustained 100 to 300 basis point increase or 100 and 200 basis point decrease in market interest rates with no effect given to any steps that we might take to counter the effect of that interest rate movement. Because of the low level of market interest rates, these analyses are not performed for decreases of more than 200 basis points.

The following table presents the change in our net economic value of equity at December 31, 2014, the most recently completed date, that would occur in the event of an immediate change in interest rates, with no effect given to any steps that we might take to counteract that change.

Basis Point ("bp")	Economic Value of Equity (Dollars in Thousands)			Economic Value of Equity as % of Economic Value of Total Assets		
	Amount	Change	% Change	Economic Value Ratio		
Change in Rates						
300	\$79,683	\$597	.75	%	16.78	%
200	80,730	1,644	2.08	%	16.57	%
100	80,886	1,800	2.28	%	16.17	%
0	79,086	—	—		15.37	%
(100)	78,903	(183)	(0.23)	%	14.97	%
(200)	88,405	9,319	11.78	%	16.46	%

The model uses various assumptions in assessing interest rate risk. These assumptions relate to interest rates, loan prepayment rates, deposit decay rates and the market values of certain assets under differing interest rate scenarios, among others. As with any method of measuring interest rate risk, certain shortcomings are inherent in the methods of analyses presented in the foregoing tables. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in different degrees to changes in market interest rates. Also, the interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types may lag behind changes in market rates. Additionally, certain assets, such as adjustable-rate mortgage loans, have features that restrict changes in interest rates on a short-term basis and over the life of the asset. Further, in the event of a change in interest rates, expected rates of prepayments on loans and early withdrawals from certificates could deviate significantly from those assumed in calculating the table. Prepayment rates can have a significant impact on interest income. Because of the large percentage of loans and mortgage-backed securities we hold, rising or falling interest rates have a significant impact on the prepayment speeds of our earning assets that in turn affect the rate sensitivity position. When interest rates rise, prepayments tend to slow. When interest rates fall, prepayments tend to rise. Our asset sensitivity would be reduced if prepayments slow and vice versa. While we believe these assumptions to be reasonable, there can be no assurance that assumed prepayment rates will approximate actual future mortgage-backed security and loan repayment activity.

Item 4. Controls and Procedures

The Company's management, including the Company's principal executive officer and principal financial officer, have evaluated the effectiveness of the Company's "disclosure controls and procedures," as such term is defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended, (the "Exchange Act"). Based upon their evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective for the purpose of ensuring that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act with the Securities and Exchange Commission (the "SEC") (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to the Company's

management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. During the quarterly period ended March 31, 2015, there were no changes in the Company's internal control over financial reporting which materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Periodically, there have been various claims and lawsuits against us, such as claims to enforce liens and contracts, condemnation proceedings on properties in which we hold security interests, claims involving the making and servicing of real property loans and other issues incident to our business. We are not party to any pending legal proceedings that we believe would have a material adverse effect on our financial condition, results of operations or cash flows.

Item 1A. Risk Factors

In addition to the risk factors and other information set forth in this report, you should carefully consider the factors discussed in Part I, “Item 1A. Risk Factors” in the Company’s Annual Report on Form 10-K for the year ended June 30, 2014, which could materially affect our business, financial condition or future results. The risks described in the Company’s Annual Report on Form 10-K are not the only risks that we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially affect our business, financial condition and/or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no repurchases of the Company’s common stock during the quarter ended March 31, 2015. Subsequent to March 31, 2015, the Company repurchased a total of 3,169 shares at a total cost of \$40,000 as a part of the Company’s Equity Incentive Plan.

Item 3. Defaults Upon Senior Securities

Not applicable

Item 4. Mine Safety Disclosures

Not applicable

Item 5. Other Information

Not applicable

46

Item 6. Exhibits

Exhibit
3.1 Articles of Incorporation of United Community Bancorp (1)

Exhibit
3.2 Bylaws of United Community Bancorp (2)

Exhibit
31.1 Certification of Chief Executive Officer

Exhibit
31.2 Certification of Chief Financial Officer

Exhibit
32 Section 1305 Certifications

Exhibit
101.0 The following materials from the Company's Quarterly Report on Form 10-Q for the quarter ended March 31, 2015, formatted in XBRL (Extensible Business Reporting Language): (i) the Consolidated Statements of Financial Condition, (ii) the Consolidated Statements of Income, (iii) the Consolidated Statements of Comprehensive Income, (iv) the Consolidated Statements of Cash Flows, and (v) the Notes to Unaudited Consolidated Financial Statements.

(1) Incorporated by reference to Exhibit 3.1 to the Company's Registration Statement on Form S-1, as amended, initially filed on March 15, 2011.

(2) Incorporated by reference to Exhibit 3.2 to the Company's Registration Statement on Form S-1, as amended, initially filed on March 15, 2011.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
