EXPLANATORY NOTE

This Report of Foreign Private Issuer on Form 6-K (this “Form 6-K”) contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, and Section 21E of the Securities Exchange Act of 1934. These statements relate to future events or the future financial performance of Fuwei Films (Holdings) Co., Ltd. (the “Company”). The Company has attempted to identify forward-looking statements by terminology, including, but not limited to, “anticipates”, “believes”, “expects”, “can”, “continue”, “could”, “estimates”, “intends”, “may”, “plans”, “potential”, “should” or “will” or the negative of these terms or other comparable terminology.

The forward-looking statements included in this Form 6-K are subject to risks, uncertainties and assumptions about the Company’s businesses and business environments. These statements reflect the Company’s current views with respect to future events and are not a guarantee of future results, operations, levels of activity, performance or achievements. Actual results of the Company’s results, operations, levels of activity, performance or achievements may differ materially from information contained in the forward-looking statements as a result of risk factors. They include, among other things, trends affecting the global economy, including the devaluation of the RMB by China in August 2015, significant competition in the BOPET film industry, especially the significant oversupply of BOPET films resulting from the rapid growth of the Chinese BOPET industry capacity, changes in the international market and trade barriers, especially the adverse impact of the 2018 trade war between the United States and the People’s Republic of China (“China”) involving the imposition of tariffs and levies on over \$250 billion of goods imported into the U.S. from China; fluctuations of RMB exchange rate, the reduction in demand for the Company’s products or the loss of main customers which may result in the decrease of sales, and negatively influencing the Company’s financial performance, uncertainty as to the future profitability, uncertainty as to the Company’s ability to successfully obtain additional funds to meet the working capital needs of the new BOPET production line, uncertainty as to the Company’s ability to continuously develop new BOPET film products to be produced by the third production line and keep up with changes in BOPET film technology, risks associated with possible defects and errors in its products including complaints and claims from clients, uncertainty as to its ability to protect and enforce its intellectual property rights, uncertainty as to its ability to attract and retain qualified executives and personnel, and uncertainty in acquiring raw materials on time and on acceptable terms, particularly in light of the volatility in the prices of petroleum products in recent years, instability of power and energy supply, and the uncertainty regarding the future operation of the Company in connection with the changes in the labor law in China, the measures taken by the Chinese government to save energy and reduce emissions, and the complaints from nearby residents and local government about the noise caused by our production as well as the uncertainty of the impact of major shareholder transfer that have substantial influence over the Company and the Company’s business operation including possible overlap of our BOPET products, customers and market orientation with an BOPET film manufacturer, which is controlled by the same individual who has control over the shares of our major shareholder. The Company’s expectations are as of the date of filing of this Form 6-K, and the Company does not intend to update any of the forward-looking statements after the date this Form 6-K is filed to confirm these statements to actual results, unless required by law.

On November 27, 2018, the Company announced its unaudited consolidated financial results for the nine-month period ended September 30, 2018.

NOTE 1 – BACKGROUND

Fuwei Films (Holdings) Co., Ltd. and its subsidiaries (the “Company” or the “Group”) are principally engaged in the production and distribution of BOPET film, a high-quality plastic film widely used in packaging, imaging, electronics, electrical and magnetic products in the People’s Republic of China (the “PRC”). The Company is a holding company incorporated in the Cayman Islands, established on August 9, 2004 under the Cayman Islands Companies Law as an exempted company with limited liability. The Company was established for the purpose of acquiring shares in Fuwei (BVI) Co., Ltd. (“Fuwei (BVI)”), an intermediate holding company established for the purpose of acquiring all of the ownership interest in Fuwei Films (Shandong) Co., Ltd. (“Shandong Fuwei”).

On August 20, 2004, the Company was allotted and issued one ordinary share of US\$1.00 in Fuwei (BVI) (being the entire issued share capital of Fuwei (BVI)), thereby establishing Fuwei (BVI) as the intermediate investment holding company of the Company.

NOTE 2 - BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Accounting Principles

The accompanying unaudited condensed consolidated financial statements have been prepared by the Company, pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (the “SEC”) as applicable to smaller reporting companies, and generally accepted accounting principles for interim financial reporting. The information furnished herein reflects all adjustments (consisting of normal recurring accruals and adjustments) which are, in the opinion of management, necessary to fairly present the operating results for the respective periods. Certain information and footnote disclosures normally presented in annual consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) have been omitted pursuant to such rules and regulations. These unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and footnotes

included in the Company's Annual Report on Form 20-F for the year ended December 31, 2017 filed on April 23, 2018 with the SEC. The results of the nine-month period ended September 30, 2018 are not necessarily indicative of the results to be expected for the full year ended December 31, 2018.

Principles of Consolidation

The condensed consolidated financial statements include the financial statements of the Company and its three subsidiaries. All significant inter-company balances and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of the condensed consolidated financial statements in accordance with U.S. GAAP requires management of the Company to make a number of estimates and assumptions relating to the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. On an ongoing basis, management reviews its estimates and assumptions, including those related to the recoverability of the carrying amount and the estimated useful lives of long-lived assets, valuation allowances for accounts receivable and realizable values for inventories. Changes in facts and circumstances may result in revised estimates.

Foreign Currency Transactions

The Company's reporting currency is Chinese Yuan (Renminbi or "RMB").

Fuwei Films (Holdings) Co., Ltd. and Fuwei (BVI) operate in Hong Kong as investment holding companies and their financial records are maintained in Hong Kong dollars, being the functional currency of these two entities. Assets and liabilities are translated into RMB at the exchange rates at the balance sheet date, equity accounts are translated at historical exchange rates and income, expenses, and cash flow items are translated using the average rate for the period. The translation adjustments are recorded in accumulated other comprehensive income in the statements of equity. The changes in the translation adjustments for the current period were reported as the line items of other comprehensive income in the consolidated statements of comprehensive income.

Transactions denominated in currencies other than RMB are translated into RMB at the exchange rates quoted by the People's Bank of China (the "PBOC") prevailing at the dates of transactions. Monetary assets and liabilities denominated in foreign currencies are translated into RMB using the applicable exchange rates quoted by the PBOC at the balance sheet dates. The resulting exchange differences are recorded in the consolidated statements of comprehensive income.

RMB is not fully convertible into foreign currencies. All foreign exchange transactions involving RMB must take place either through the PBOC or other institutions authorized to buy and sell foreign currency. The exchange rate adopted for the foreign exchange transactions are the rates of exchange quoted by the PBOC which are determined largely by supply and demand.

Commencing July 21, 2005, the PRC government moved the RMB into a managed floating exchange rate regime based on market supply and demand with reference to a basket of currencies.

For the convenience of the readers, the third quarter of 2018 RMB amounts included in the accompanying condensed consolidated financial statements in our quarterly report have been translated into U.S. dollars at the rate of US\$1.00 = RMB6.8680, on the last trading day of the third quarter of 2018 (September 30, 2018) as set forth in the H.10 statistical release of the U.S. Federal Reserve Board. No representation is made that the RMB amounts could have been, or could be, converted into U.S. dollar at that rate or at any other certain rate on September 30, 2018, or at any other date.

Cash and Cash Equivalents and Restricted Cash

For statements of cash flow purposes, the Company considers all cash on hand and in banks, including accounts in book overdraft positions, certificates of deposit and other highly-liquid investments with maturities of three months or less, when purchased, maintained within the United States as well as in foreign countries to be cash and cash equivalents. The Company maintains balances at financial institutions which, from time to time, may exceed Federal Deposit Insurance Corporation insured limits for the banks located in the United States. Balances at financial institutions within certain foreign countries are not covered by insurance.

(Unaudited)

Restricted cash refers to the cash balance held by bank as deposit for Letters of Credit and Bank Acceptance Bill. The Company has restricted cash of RMB60,990 (US\$8,880) and RMB56,501 as of September 30, 2018 and December 31, 2017, respectively.

Trade Accounts Receivable

Trade accounts receivable are recorded at the invoiced amount after deduction of trade discounts, value added taxes and allowances, if any, and do not bear interest. The allowance for doubtful accounts is the Group's best estimate of the amount of probable credit losses in the Group's existing accounts receivable. The Group determines the allowance based on historical write-off experience, customer specific facts and economic conditions.

The Group reviews its allowance for doubtful accounts monthly. Past due balances over 90 days and over a specified amount are reviewed individually for collectability. All other balances are reviewed on a pooled basis by aging of such balances. Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote.

Inventories

Inventories are stated at the lower of cost or market value as of balance sheet date. Inventory valuation and cost-flow is determined using Moving Weighted Average Method basis. The Group estimates excess and slow-moving inventory based upon assumptions of future demands and market conditions. If actual market conditions are less favorable than projected by management, additional inventory write-downs may be required. Cost of work in progress and finished goods comprises direct material, direct production cost and an allocated portion of production overheads based on normal operating capacity.

Property, Plant and Equipment

Property, plant and equipment are stated at cost less accumulated depreciation and impairment. Depreciation on property, plant and equipment is calculated on the straight-line method (after taking into account their respective estimated residual values) over the estimated useful lives of the assets. They are as follows:

	Years
Buildings and improvements	25 - 30
Plant and equipment	10 - 15
Computer equipment	5
Furniture and fixtures	5
Motor vehicles	5

Depreciation of property, plant and equipment attributable to manufacturing activities is capitalized as part of the inventory and expensed to cost of goods sold when inventory is sold. Depreciation related to abnormal amounts from idle capacity is charged to general and administrative expenses for the period incurred.

Construction in progress represents capital expenditures with respect to the BOPET production line. No depreciation is provided with respect to construction in progress.

Leased Assets

An arrangement, comprising a transaction or a series of transactions, is or contains a lease if the Group determines that the arrangement conveys a right to use a specific asset or assets for an agreed period of time in return for a payment or a series of payments. Such a determination is made based on an evaluation of the substance of the arrangement and is regardless of whether the arrangement takes the legal form of a lease.

Classification of assets leased to the Group. Assets that are held by the Group under leases which transfer to the Group substantially all the risks and rewards of ownership are classified as being held under capital leases. Leases which do not transfer substantially all the risks and rewards of ownership to the Group are classified as operating leases.

Assets acquired under capital leases. Where the Group acquires the use of assets under capital leases, the amounts representing the fair value of the leased asset, or, if lower, the present value of the minimum lease payments, of such assets are included in property, plant and equipment and the corresponding liabilities, net of finance charges, are recorded as obligations under capital leases. Depreciation is provided at rates which write off the cost or valuation of the assets over the term of the relevant lease or, where it is likely the Group will obtain ownership of the asset, the life of the asset. Finance charges implicit in the lease payments are charged to the consolidated income statement over the period of the leases so as to produce an approximately constant periodic rate of charge on the remaining balance of the obligations for each accounting period. Contingent rentals are charged to the consolidated income statement in the accounting period in which they are incurred.

Operating lease charges. Where the Group has the use of assets held under operating leases, payments made under the leases are charged to the consolidated income statement in equal installments over the accounting periods covered by the lease term, except where an alternative basis is more representative of the pattern of benefits to be derived from the leased asset. Lease incentives received are recognized in the consolidated income statement as an integral part of the aggregate net lease payments made. Contingent rentals are charged to the consolidated income statement in the accounting period in which they are incurred.

Sale and leaseback transactions. Gains or losses on equipment sale and leaseback transactions which result in capital leases are deferred and amortized over the terms of the related leases. Gains or losses on equipment sale and leaseback transactions which result in operating leases are recognized immediately if the transactions are established at fair value. Any loss on the sale perceived to be a real economic loss is recognized immediately. However, if a loss is compensated for by future rentals at a below-market price, then the artificial loss is deferred and amortized over the period that the equipment is expected to be used. If the sale price is above fair value, then any gain is deferred and amortized over the useful life of the assets.

Lease Prepayments

Lease prepayments represent the costs of land use rights in the PRC. Land use rights are carried at cost and charged to expense on a straight-line basis over the respective periods of rights of 30 years. The non-current portion and current portion of lease prepayments have been reported in Lease Prepayments, Prepayments and Other Receivables in the balance sheets, respectively.

Impairment of Long-lived Assets

The Company recognizes an impairment loss when circumstances indicate that the carrying value of long-lived assets with finite lives may not be recoverable. Management's policy in determining whether an impairment indicator exists, a triggering event, comprises measurable operating performance criteria at an asset group level as well as qualitative measures. If an analysis is necessitated by the occurrence of a triggering event, the Company uses assumptions, which are predominately identified from the Company's strategic long-range plans, in determining the impairment amount. In the calculation of the fair value of long-lived assets, the Company compares the carrying amount of the asset group with the estimated future cash flows expected to result from the use of the assets. If the carrying amount of the asset group exceeds the estimated expected undiscounted future cash flows, the Company measures the amount of the impairment by comparing the carrying amount of the asset group with their estimated fair value. We estimate the fair value of assets based on market prices (i.e., the amount for which the asset could be bought by or sold to a third party), when available. When market prices are not available, we estimate the fair value of the asset group using discounted expected future cash flows at the Company's weighted-average cost of capital. Management believes its policy is reasonable and is consistently applied. Future expected cash flows are based upon estimates that, if not achieved, may result in significantly different results.

Revenue Recognition

Sales of plastic films are reported, net of value added taxes ("VAT"), sales returns, and trade discounts. The standard terms and conditions under which the Company generally delivers allow a customer the right to return product for refund only if the product does not conform to product specifications; the non-conforming product is identified by the customer; and the customer rejects the non-conforming product and notifies the Company within 30 days of receipt for both PRC and overseas customers. The Company recognizes revenue when products are delivered, and the customer takes ownership and assumes risk of loss, collection of the relevant receivable is probable, persuasive evidence of an arrangement exists and the sales price is fixed or determinable.

In the PRC, VAT of 16% on the invoice amount is collected with respect to the sales of goods on behalf of tax authorities. The VAT collected is not revenue of the Company, instead, the amount is recorded as a liability on the

consolidated balance sheet until such VAT is paid to the authorities.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

(Loss) Earnings Per Share

Basic (loss) earnings per share is computed by dividing net earnings by the weighted average number of ordinary shares outstanding during the year. Diluted (loss) earnings per share is calculated by dividing net earnings by the weighted average number of ordinary and dilutive potential ordinary shares outstanding during the year. Diluted potential ordinary shares consist of shares issuable pursuant to the Company's stock option plan.

Share-Based Payments

The Company accounts for share based payments under the modified-prospective transition method, which requires companies to measure and recognize the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value.

Contingencies

In the normal course of business, the Company is subject to contingencies, including legal proceedings and claims arising out of the business that relate to a wide range of matters, including among others, product liability. The Company recognizes a liability for such contingency if it determines it is probable that a loss has occurred, and a reasonable estimate of the loss can be made. The Company may consider many factors in making these assessments including past history and the specifics of each matter.

Reclassification

For comparative purposes, the prior year's consolidated financial statements have been reclassified to conform to reporting classifications of the current year periods. These reclassifications had no effect on net loss or total net cash flows as previously reported.

Going Concern Matters

The accompanying condensed consolidated financial statements have been prepared in conformity with generally accepted accounting principles which contemplate continuation of the company as a going concern. However, as of September 30, 2018 and 2017, the Company had a working capital deficiency of RMB164,885 (US\$24,008) and RMB176,150 and accumulated deficit of RMB18,715 (US\$2,725) and RMB35,877 from net losses incurred during the first nine months of 2018 and 2017. Confronted with the fierce competition in the BOPET industry in China, the Company may still witness losses over the next twelve months. The ability of the Company to operate as a going concern depends upon its ability to obtain loans from financial institutions and a related party and/or generate positive cash flow from operations. The Company accordingly has obtained loans from financial institutions and related party to meet the need of working capital for our operation or debts. At the same time, the Company will continue implementing strict cost reductions on both manufacturing costs and operating expenses to improve profit margins. The accompanying consolidated financial statements do not include any adjustments relating to the recoverability and classification of asset carrying amounts or the amount and classification of liabilities that might result should the Company be unable to continue as a going concern.

Recently Issued Accounting Standards

Revenue Recognition: In May 2014, the FASB issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers (Topic 606) (ASU 2014-09), which amends the existing accounting standards for revenue recognition. In August 2015, the FASB issued ASU No. 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date, which delays the effective date of ASU 2014-09 by one year. The FASB also agreed to allow entities to choose to adopt the standard as of the original effective date. In March 2016, the FASB issued Accounting Standards Update No. 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net) (ASU 2016-08) which clarifies the implementation guidance on principal versus agent considerations. The guidance includes indicators to assist an entity in determining whether it controls a specified good or service before it is transferred to the customers. The new revenue recognition standard was effective for us in the first quarter of 2018. We adopted the new standard effective January 1, 2018 using the modified retrospective method.

(Unaudited)

Based on the evaluation for our sales contracts under the ASC 606 requirement of following the five-step actions to judge revenue recognition, we usually recognize our revenue when the film-products have been delivered to our customers and all the risks relating to the goods have been transferred, and rights of payment for delivered goods have been vested as well.

Financial Instrument

In January 2016, the FASB issued ASU No. 2016-01, “Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities” (“ASU 2016-01”). The standard addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. ASU 2016-01 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017, and early adoption is not permitted. Accordingly, the standard is effective for us on September 1, 2018. The Company is currently evaluating the impact that the standard will have on the Company’s consolidated financial statements.

Leases

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) (“ASU 2016-2”), which provides guidance on lease amendments to the FASB Accounting Standard Codification. This ASU will be effective for us beginning in May 1, 2019. The Company is currently in the process of evaluating the impact of the adoption of ASU 2016-2 on the Company’s consolidated financial statements.

Financial Instruments - Credit Losses

In June 2016, the FASB issued ASU 2016-13, Financial Instruments - Credit Losses (Topic 326): The amendments in this Update require a financial asset (or a group of financial assets) measured at amortized cost basis to be presented at

the net amount expected to be collected. The amendments broaden the information that an entity must consider in developing its expected credit loss estimate for assets measured either collectively or individually. The use of forecasted information incorporates more timely information in the estimate of expected credit loss, which will be more decision useful to users of the financial statements. ASU 2016-13 is effective for the Company for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Early adoption is allowed as of the fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company is still evaluating the effect that this guidance will have on the Company's consolidated financial statements and related disclosures.

In the third quarter of 2018, although sales were higher, we continued to be adversely affected by enhanced competition and increased supply over demand in China's BOPET market.

We believe that in the remaining quarter of 2018, there will be a growing capacity of BOPET films in China and stronger competition in the market. Our ability to retain effective control over the pricing of our products on a timely basis is limited due to the enhanced competition in the BOPET market.

On August 14, 2013, we announced the receipt of the first notice from our controlling shareholder, the Weifang State-owned Assets Operation Administration Company, a wholly-owned subsidiary of Weifang State-owned Asset Management and Supervision Committee (collectively, the "Administration Company") indicating that the Administration Company had determined to place control over 6,912,503 (or 52.9%) of its outstanding ordinary shares up for sale at a public auction to be held in China. Four public auctions were held in Jinan, Shandong Province, China. We learned that they failed due to a lack of bidders registered for the auction. On March 25, 2014, the fifth public auction was held in Jinan, Shandong Province, China. The beneficial ownership of 6,912,503 of our ordinary shares previously owned by the Administration Company through Apex Glory Holdings Limited, a British Virgin Islands corporation, was bid on by Shandong SNTON Optical Materials Technology Co., Ltd. ("Shandong SNTON") through the public auction. Shandong SNTON received 6,912,503 (or 52.9%) of our outstanding ordinary shares at a price of RMB101,800,000 (approximately US\$16,572,787) or approximately US\$2.40 per ordinary share.

On May 12, 2014, we announced that we had learned that the successful bidder, Shandong SNTON in the fifth public auction of 6,912,503 (or 52.9%) of our outstanding ordinary shares (the "Shares") held on March 25, 2014, was entrusted by Hongkong Ruishang International Trade Co., Ltd., a Hong Kong corporation, ("Hongkong Ruishang") to handle all the formalities and procedure in connection with the public auction. As a result of the entrusted arrangement, we believe Hongkong Ruishang is the party controlling the Shares acquired in the fifth public auction. According to publicly available information in the People's Republic of China, Shandong SNTON is a wholly owned subsidiary of Shandong SNTON Group Co., Ltd. (the "SNTON Group"). Mr. Xiusheng Wang, the chairman of the Board of Directors of SNTON Group is also Hongkong Ruishang's chairman.

On May 14, 2014, we announced that we had received a notification from Shandong Fuhua Investment Company Limited. ("Shandong Fuhua") with respect to an entire ownership transfer of our 12.55% outstanding ordinary shares from the Administration Company to Shandong Fuhua. The Administration Company originally held these shares indirectly through an intermediate holding company, Easebright Investments Limited ("Easebright"). As a result of this transfer, Shandong Fuhua indirectly owns 12.55% of our outstanding ordinary shares through Easebright. Mr. Jingang Yang has been appointed as the director of Easebright.

Cost of Goods Sold

Our cost of goods sold comprises mainly of material costs, factory overhead, power, packaging materials and direct labor. The breakdown of our cost of goods sold in percentage is as follows:

	Nine-Month Period Ended September 30, 2018		Nine-Month Period Ended September 30, 2017	
	% of total		% of total	
Materials costs	72.7	%	69.4	%
Factory overhead	9.2	%	10.3	%
Energy expense	8.9	%	11.3	%
Packaging materials	4.8	%	4.4	%
Direct labor	4.4	%	4.6	%

Cost of goods sold during the first nine months of 2018 totaled RMB210.1 million (US\$30.6 million) as compared to RMB196.4 million in the same period of 2017. This was RMB13.7 million or 7.0% higher than the same period in 2017. The increase of unit cost of goods sold caused an increase of RMB17.5 million and the decrease in sales volumes caused a decrease of RMB3.8 million.

Gross Profit

Our gross profit was RMB33.3 million (US\$4.9 million) for the first nine months ended September 30, 2018, representing a gross margin of 13.7%, as compared to a gross margin of 7.3% for the same period in 2017. Correspondingly, gross margin increased by 6.4 percentage. Our average product sales prices increased by 17.2% compared to the same period last year while the average cost of goods sold increased by 9.1% compared to the same period last year. Consequently, the amount of increase in sales price was higher than that in cost of goods sold during the nine months ended September 30, 2018 compared with the same period in 2017, which resulted in an increase in our gross profit.

Operating Expenses

Operating expenses for the nine months ended September 30, 2018 were RMB47.0 million (US\$6.8 million), compared to RMB44.3 million in the same period in 2017, which was RMB2.7 million or 6.1% higher than the same period in 2017. This increase is mainly due to increased expenses on research and development.

Other Expense

Total other expense is a combination result of interest income, interest expense and other income (expense). Total other expense during the first nine months of 2018 was RMB5.1 million (US\$0.7 million), RMB2.2 million lower than the same period in 2017.

Income Tax Expense

The income tax benefit was RMB0.05 million (US\$0.007 million) during the nine months ended September 30, 2018, compared to income tax benefit of RMB0.2 million during the same period in 2017. This increase of income tax

expense was due to changes in deferred tax.

Net Loss

Net loss attributable to the Company during the first nine-month period of 2018 was RMB18.7 million (US\$2.7 million) compared to net loss attributable to the Company of RMB35.9 million during the same period in 2017, representing a decrease of RMB17.2 million from the same period in 2017 due to the factors described above.

Liquidity and Capital Resources

Our capital expenditures have been financed primarily through cash generated from our operations and borrowings from related parties, financial institutions, and entering into sale-leaseback transactions. The interest rates of borrowings from financial institutions during the period from the third quarter of 2017 to the third quarter of 2018 ranged from 5.22% to 7.50%.

In April 2014, we obtained a loan for a total amount of RMB105,000 from Shandong SNTON Optical Materials Technology Co., Ltd. (the “Shandong SNTON”) to pay off certain short-term loans due to Bank of Communications Co., Ltd. The interest shall be calculated at the benchmark rate, plus an additional 20% of the said benchmark rate, for the loan of the same term announced by the People’s Bank of China. The interest must be paid quarterly and settled in full at the end of the year. As of December 31, 2014, the principal of this loan and the interest have not been paid. In March 2015, we entered into a supplemental agreement with Shandong SNTON pursuant to which the parties agreed that we will pay off the principal of this loan plus interest upon availability of new loans from banks or other financial institutions.

As of December 31, 2017, the principal of this loan from Shandong SNTON was RMB104.71 million and the interest was RMB22.93 million.

As of September 30, 2018, the principal of this loan from Shandong SNTON was RMB86,874 and the interest payable was RMB26,806. The main source of cash inflow for the next twelve months will come from sales of products, and the estimated inflow is RMB432.4 million. The estimated cash outflow is RMB343.06 million. The amount of cash used in the purchase of raw materials and packaging materials is estimated to be RMB251.92 million and RMB13.56 million, respectively. Cash used for power costs, labor costs, maintenance and renovation expenses is estimated to be RMB25.42 million, RMB16.56 million and RMB12.2 million, respectively. Total cash used in sales expenses, financial expenses and administrative expenses is estimated to be RMB23.4 million. The foregoing description has been prepared based on the information available to us as of the date of this report on Form 6-K and there are numerous factors that could contribute to a different result such as risks inherent in, the BOPET film industry in China; uncertainty as to future profitability and competition in the BOPET film industry; growth of, and risks inherent in, the BOPET film industry in China and numerous other factors as more fully disclosed in our reports filed with the U.S. Securities and Exchange Commission.

We believe that, after taking into consideration our present and potential future loans from related parties and banking facilities, existing cash and the expected cash flows to be generated from our operations, we will have adequate sources of liquidity to meet our short-term obligations and our working capital requirements.

Operating Activities

Net cash provided by operating activities for the nine months ended September 30, 2018 was RMB22.4 million (US\$3.3 million) compared to net cash provided by operating activities of RMB7.3 million for the nine months ended September 30, 2017. This increase in cash flows provided by operating activities was primarily attributable to the decreased loss.

Investing Activities

Net cash flows used in investing activities for the nine months ended September 30, 2018 was RMB9.3 million (US\$1.4 million) compared to net cash used in investing activities of RMB2.9 million for the nine months ended September 30, 2017. This increase in cash flows used in investing activities was primarily attributable to the changes of restricted cash.

Financing Activities

Net cash provided by financing activities for the nine months ended September 30, 2018 was RMB0.6 million (US\$0.1 million) compared to net cash provided by financing activities of RMB5.1 million for the nine months ended September 30, 2017, which is a decrease of RMB4.5 million (US\$0.7 million). This decrease in cash flows provided by financing activities was primarily attributable to changes of notes payable.

Working Capital

As of September 30, 2018 and December 31, 2017, we had a working capital deficit of RMB164.9 million (US\$24.0 million) and RMB172.9 million, respectively. Working capital deficit decreased by RMB8.0 million (US\$1.2 million), or 4.6% compared to the amount as of December 31, 2017. Our main current liability was loans from a related party.

Third Production Line Update

The third production line started its trial operation at the end of January 2013. Our third production line manufactures high-performance electric insulation film, base film for solar backsheet and TFT-LCD optical film with an annual design capacity of 23,000 metric tons and thickness between 38 and 250 μ m. It officially started its operation in September 2013. A sample diffusion film (a type of TFT-LCD optical film) was preliminarily accepted by four customers after being delivered to them for testing. We supplied small batches of products according to one of the four customer's purchase order. In addition, a sample base film for solar backsheets was delivered to a customer for initial testing and we received an initial feedback from this customer and are adjusting the formulas accordingly. The third production line has not been able to continue its production since April 2015 due to lack of purchase orders. The total volume of the third production line from January 2015 to March 2015 was 293 Metric Tons.

Legal Proceedings

From time to time, we may be subject to legal actions and other claims arising in the ordinary course of business. Shandong Fuwei is currently a party to one legal proceeding in China.

On July 9, 2012, a client filed a lawsuit in Beijing Daxing District People's Court against Shandong Fuwei claiming RMB953,113 plus interest over disputes arising from a Procurement Contract between the parties. Shandong Fuwei raised a jurisdictional objection upon filing its plea, and Beijing Daxing District People's Court overruled the objection. Shandong Fuwei filed an appeal against the judgment in the First Intermediate People's Court of Beijing. The appeal was dismissed on January 23, 2013. On May 15, 2013, Beijing Daxing District People's Court heard the case and adjourned the hearing due to the fact that plaintiff failed to provide sufficient evidence. On June 25, 2013, the case was heard in Beijing Daxing District People's Court again and it was further adjourned due to plaintiff's failure to provide sufficient evidence. The case was then scheduled to be heard on August 7, 2013. However, on the day prior to re-scheduled hearing, Shandong Fuwei was informed by Beijing Daxing District People's Court that the hearing was adjourned further for the same reason that plaintiff failed to provide sufficient evidence. On April 21, 2014, the case was heard, and the plaintiff failed to provide sufficient evidence and the hearing was further adjourned. On May 28, 2014, the case was heard and the plaintiff provided some evidence. On August 25, 2014, the case was heard again. On November 5, 2014, the court accepted the withdrawal application from the plaintiff. On November 26, 2014, the plaintiff filed a second lawsuit in Beijing Daxing District People's Court against Shandong Fuwei over disputes arising from the Procurement Contract between the parties claiming RMB618,230 plus interest as a result of non- payment. The case was heard on January 26, 2015, where the two parties testified over the relevant evidence. The case was heard on March 3, 2015, October 26, 2015 and May 11, 2016. To date, the case has not been decided.
