Comments of Management

Commenting on the results, Shaikhe Orbach, President and CEO, said, "The second quarter was another period of strong momentum marked by 50% revenue growth and significant new Design Wins with both new and existing customers.

"During the quarter, we were excited to report two major deals: one with a long-term strategic customer, which is now standardizing on our solutions for a variety of modules and appliance product lines, ramping our sales to that customer to about \$4 million per year; and a Design Win from an important new customer for SETAC kits and modules with potential sales of about \$1 million per year. Both of these customers are considering ways to use additional Silicom products in more of their products: a concrete demonstration of the continued growth-driving power of our 90+ customers."

Mr. Orbach continued, “In fact, close customer relationships such as these are the ‘secret weapon’ that enables us to continue creating truly innovative solutions – solutions that match the real needs and the new trends emerging in this rapidly evolving industry, while at the same time expanding our total addressable market. With the SDN, NFV, virtualization and cloud computing concepts all based on the use of standard servers, and with our solutions recognized as important building blocks for enhancing standard server performance, we now have a major opportunity to benefit from these new market trends. The combination of our customer-driven market insight, our technological expertise, our quick response time and our collaborative approach helps us take full advantage of these and other external growth drivers, enabling us to continue growing and developing our Company for the benefit of our shareholders.”
