REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Date of event requiring this shell company report.....

Commission file number: 0-28950

MER TELEMAGEMENT SOLUTIONS LTD.
(Exact Name of Registrant as specified in its charter
and translation of Registrant's name into English)

Israel
(Jurisdiction of incorporation or organization)

14 Hatidhar Street, Ra'anana 4366516, Israel
(Address of principal executive offices)

Alon Mualem (Chief Financial Officer), +972-9-7777-555 (phone), +972-9-7777-566 (fax)
14 Hatidhar Street, Ra'anana 4366516, Israel
(Name, Telephone, E-mail and/or Facsimile number and Address of Company Contact Person)

Securities registered or to be registered pursuant to Section 12(b) of the Act:

| Title of each class | Name of each exchange on which registered |
|---------------------|---|
|---------------------|---|

Ordinary Shares, NIS 0.01 Par Value

NASDAQ Capital Market

Securities registered or to be registered pursuant to Section 12(g) of the Act: None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report:

Ordinary Shares, par value NIS 0.01 per share.....8,043,380
(as of December 31, 2015)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP International Financial Reporting Standards as issued by the International Accounting Standards Board Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow:

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

This Report on Form 20-F is incorporated by reference into our Form S-8 Registration Statements File Nos. 333-123321 and 333-180369.

INTRODUCTION

We are a worldwide provider of solutions for online video advertising and telecommunications expense management, or TEM, used by enterprises, and billing solutions used by information and telecommunication service providers.

The online video advertising is provided through Vexigo, a wholly-owned subsidiary of our company, which has a propriety in-house technology solution specifically designed for content publishers. The Vexigo solution for online and mobile platforms supports multiple ad formats and interactive ad units.

Our TEM solutions allow enterprises and organizations to make smarter choices with their telecommunications spending at each stage of the service lifecycle, including allocation of cost, proactive budget control, fraud detection, processing of payments and spending forecasting. Our converged billing solutions have been successfully implemented worldwide by wireless providers, Voice over Internet Protocol, Internet Protocol Television, and content service providers. Our converged billing solutions include applications for charging and invoicing customers, interconnect billing and partner revenue management using pre-pay and post-pay schemes, as well as a managed service for a mobile virtual network operator in the United States.

Since our public offering in May 1997, our ordinary shares have been listed on the NASDAQ Stock Market (symbol: MTSI) and are presently listed on the NASDAQ Capital Market. As used in this annual report, the terms “we,” “us” and “our” mean Mer Telemagement Solutions Ltd. and its subsidiaries, unless otherwise indicated. As used in this annual report, “MTS IntegraTRAK” means MTS IntegraTRAK Inc., our wholly-owned U.S. subsidiary, and “Vexigo” means Vexigo Ltd., our wholly-owned Israeli subsidiary.

We own U.S. trademark rights for CALLTRAC®, ANCHORPOINT®, MAP-TO-WIN® and TOTAL-e™ and have common law rights in the trademarks TABS.IT, PMSI, TELSOFT SOLUTIONS, TELSOFT, MEGACALL and CALLTRAC LITE, based on use of the marks in the United States. All other trademarks and trade names appearing in this annual report are owned by their respective holders.

Our consolidated financial statements appearing in this annual report are prepared in U.S. dollars and in accordance with generally accepted accounting principles in the United States, or U.S. GAAP. All references in this annual report to “dollars” or “\$” are to U.S. dollars and all references in this annual report to “NIS” are to New Israeli Shekels.

Statements made in this annual report concerning the contents of any contract, agreement or other document are summaries of such contracts, agreements or documents and are not complete descriptions of all of their terms. If we filed any of these documents as an exhibit to this annual report or to any registration statement or annual report that we previously filed, you may read the document itself for a complete description of its terms.

Except for the historical information contained in this annual report, the statements contained in this annual report are “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act, and the Private Securities Litigation Reform Act of 1995, as amended, with respect to our business, financial condition and results of operations. Such forward-looking statements reflect our current view with respect to future events and financial results. We urge you to consider that statements which use the terms “anticipate,” “believe,” “do not believe,” “expect,” “plan,” “intend,” “estimate,” “anticipate” and similar expressions are intended to identify forward-looking statements. We remind readers that forward-looking statements are merely predictions and therefore inherently subject to uncertainties and other factors and involve known and unknown risks that could cause the actual results, performance, levels of activity, or our achievements, or industry results, to be materially different from any future results, performance, levels of activity, or our achievements expressed or implied by such forward-looking statements. Such forward-looking statements are also included in Item 4 – “Information on the Company” and Item 5 –

“Operating and Financial Review and Prospects.” Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. Except as required by applicable law, including the securities laws of the United States, we undertake no obligation to publicly release any update or revision to any forward-looking statements to reflect new information, future events or circumstances, or otherwise after the date hereof. We have attempted to identify significant uncertainties and other factors affecting forward-looking statements in the Risk Factors section that appears in Item 3D. “Key Information - Risk Factors.”

ITEM 3. KEY INFORMATION

A. Selected Financial Data

The following selected consolidated financial data for and as of the five years ended December 31, 2015 are derived from our audited consolidated financial statements, which have been prepared in accordance with U.S. GAAP. Our audited consolidated financial statements for the three years ended December 31, 2015 and as of December 31, 2014 and 2015 appear elsewhere in this annual report. Our selected consolidated financial data as of December 31, 2011, 2012 and 2013 and for the years ended December 31, 2011 and 2012 have been derived from audited consolidated financial statements not included in this Annual Report. The selected consolidated financial data set forth below should be read in conjunction with and are qualified entirely by reference to Item 5. "Operating and Financial Review and Prospects," and our consolidated financial statements and notes thereto included elsewhere in this annual report.

Statement of Operations Data:

| | Year Ended December 31, | | | | |
|--|---|----------|----------|-----------|-----------|
| | 2011 | 2012 | 2013 | 2014 | 2015 |
| | (in thousands, except share and per share data) | | | | |

B. Capitalization and Indebtedness

Not applicable.

C. Reasons for the Offer and Use of Proceeds

Not applicable.

D. Risk Factors

Investing in our ordinary shares involves a high degree of risk and uncertainty. You should carefully consider the risks and uncertainties described below before investing in our ordinary shares. If any of the following risks actually occurs, our business, prospects, financial condition and results of operations could be harmed. In that case, the value of our ordinary shares could decline, and you could lose all or part of your investment.

Risks Relating to Our Business and Market

We have had operating losses in the past and may not sustain profitability in the future; to the extent that we incur operating losses, we may not have sufficient working capital to fund our operations in the future.

We have generated operating losses in the last two years and may not be able to regain profitable operations in the future or generate positive cash flows from operations. To the extent that we incur operating losses in the future or are unable to generate free cash flows from our business, we may not have sufficient working capital to fund our operations in the future. If we do not generate sufficient cash from operations, we will be required to obtain additional financing or reduce our level of expenditure. Such financing may not be available in the future, or, if available, may not be on terms satisfactory to us. If adequate funds are not available to us, our business, and results of operations and financial condition will be adversely affected.

Reliance on a small number of suppliers and customers, places our business, financial condition and results of operations at risk.

A relatively small number of customers have historically accounted for a majority of Vexigo's revenue. During 2015, Vexigo's top three customers accounted for 71% of its aggregate revenues. In addition, until January 2016 Vexigo relied on one major supplier, AppNexus, for a significant portion of its advertising space (approximately 54% during 2015). While our activity with AppNexus was reduced significantly in early 2016, we expect that we will continue to depend upon a relatively small number of suppliers and customers for a significant portion of our advertising space and revenue for the foreseeable future. As a result, if we fail to successfully attract or retain new or existing suppliers and customers, if the existing major supplier terminates or materially alters its commercial relationship with Vexigo or if existing customers run fewer advertising campaigns with Vexigo, defer or cancel their insertion orders, or terminate

their relationship with Vexigo altogether, whether through the actions of their agency representatives or otherwise, Vexigo will be required to compensate for the loss of advertising space or revenue by creating commercial relationships with new suppliers and attracting new customers, which cannot be assured.

This situation is similar to our experience in the mobile virtual network operator, or MVNO, services business. Our improved operations during the three years ended December 31, 2013 were attributable in great measure to our entry into the MVNO services business. As a Mobile Virtual Network Enabler, or MVNE, we provide services to MVNOs and assist them to reduce their time to market, focus on sales and marketing and reduce their initial capital expenses. Our first MVNO customer was Simple Mobile, a U.S.-based MVNO, for whom we provided MVNE services. In 2011, 2012 and 2013, sales attributable to Simple Mobile accounted for approximately 16.4%, 22.8% and 33.3% of our revenues, respectively. During 2012, Simple Mobile was acquired by another operator and did not renew its agreement with us, which ended in December 2013. We have been unable to replace this business and our future success in this market cannot be assured. If we are not successful in timely locating quality substitute suppliers or customers, our business, financial condition and results of operations would be harmed.

Vexigo may experience fluctuations in its operating results, which make its future results difficult to predict and could cause its operating results to fall below the expectations of investors.

Vexigo's operating results have fluctuated in the past and will likely fluctuate in the future due to a variety of factors, many of which are beyond Vexigo's control. Vexigo's fluctuating results could cause its performance to fall below our expectations and adversely affect our operating results. Because. Factors that may increase the volatility of Vexigo's operating results include the following:

- changes and new measures implemented by internet browsers and manufacturers of mobile devices limiting the scope and type of advertising that can be placed using Vexigo's solutions;

- increases in the percentage of advertising space that Vexigo acquires but does not sell, thereby increasing its operating costs without a parallel increase in its revenues;

- the addition or loss of media affiliates;

- changes in demand and pricing for Vexigo's solutions;

- Vexigo's ability to effectively market and integrate its newly introduced Visualizr solution;

- the seasonal nature of Vexigo's customers' spending on video advertising campaigns;

- changes in Vexigo's pricing policies or the pricing policies of its competitors and the pricing of video advertising space or of other third-party services;

- the introduction of new technologies, products or service offerings by Vexigo's competitors;

- changes in Vexigo's customers' video advertising budget allocations, agency affiliations, or marketing strategies;

- changes and uncertainty in the regulatory environment applicable to Vexigo or its affiliates;

- Changes in ad-exchanges that may prevent running rotating advertisements;

- changes in the economic prospects of Vexigo's video advertisers or the economy generally, which could alter current or prospective advertisers' spending priorities or could increase the time or costs required to complete sales with advertisers;

- changes in the availability of video advertising space through real-time advertising exchanges or in the cost to reach end consumers through video advertising;

- changes in Vexigo's capital expenditures as it acquires the hardware, equipment and other assets required to support its business; and

- costs related to acquisitions of businesses or technologies and to recruitment and retention of employees and consultants.

Vexigo's business is changing and evolving rapidly. Based upon all of the factors described above and others that Vexigo may not anticipate, including those beyond its control, it has a limited ability to forecast its future revenue, costs and expenses. As a result, our operating results, which are dependent in great measure on the results of Vexigo

may from time to time fall below our estimates or the expectations of investors.

6

The impairment of goodwill arising from our acquisition of Vexigo could continue to negatively impact our net income and stockholders' equity.

When we acquire a business, a substantial portion of the purchase price of the acquisition may be allocated to goodwill and other identifiable intangible assets. The amount of the purchase price which is allocated to goodwill and other intangible assets is determined by the excess of the purchase price over the net identifiable assets acquired. The current accounting standards require that goodwill and intangible assets should be deemed to have indefinite lives, which should be tested for impairment at least annually (or more frequently if impairment indicators arise). Other intangible assets are amortized over their useful lives. In light of changes that occurred in the online advertising market during the latter part of 2015 which resulted in reduced gross margins, we performed an impairment analysis in accordance with ASC 350 and re-evaluated the contingent consideration payable to the former shareholders of Vexigo. As a result of the analysis and reevaluation, we recorded a \$3.5 million non-cash charge for impairment of goodwill, net of the re-evaluation of the contingent consideration payable to the former shareholders of Vexigo.

We may not be able to successfully integrate Vexigo and may not be able to achieve our growth targets for the acquired businesses, which could result in our incurring additional goodwill and other intangible assets impairment charges. Declines in our market capitalization increase the risk that we may be required to perform another goodwill impairment analysis, which could result in an impairment of up to the entire balance of our goodwill and other identifiable intangible assets.

Payment of the cash consideration pursuant to the Vexigo acquisition has and will continue to significantly decrease our cash reserves, which could materially adversely affect our operations and financial strength.

The cash payments we made in connection with the recent Vexigo acquisition significantly decreased our cash reserves and the remaining payments due to the former Vexigo shareholders will negatively impact our cash position in the future. In September, 2015, we renegotiated and extended the payment schedule for the consideration payable to the former shareholders of Vexigo in order to improve our working capital and we further extended the payment schedule in February 2016. The February 2016 extension provides for the payment of \$400,000 that was made in February 2016, additional payments of \$100,000 on the 10th day of each month commencing in April 2016 and ending in March 2017 (\$1.2 million in the aggregate), a payment of \$300,000 on May 10, 2017, a payment of \$400,000 on July 10, 2017, and the remaining balance, including a final payment of \$300,000 and any earn out payments on October 10, 2017. In the event we will not be successful in generating sufficient cash from our operations, we will be required to obtain additional financing or reduce our level of expenditures. Such financing may not be available to us in the future, or, if available, may not be on terms satisfactory to us. If adequate funds are not available to us, our business, results of operations and financial condition will be adversely affected. See also the information in Item 5B.

The earn-out payments pursuant to the Vexigo acquisition will reduce our ability to use cash generated from Vexigo's operations in order to fund our operations and the potential growth of our business.

The terms of the Vexigo stock purchase agreement, or the Vexigo SPA, require us to pay the former Vexigo shareholders earn-out payments, or the Earn-out Payments, equal to 45% of the EBITDA from the Vexigo Products Line (as such term is defined in the Vexigo SPA) for a period of 5.5 years from the closing date of the acquisition, subject to certain limitations and up to a cap of \$16 million. As the Earn-out Payments are calculated based on EBITDA, certain payments and liabilities of Vexigo, including any tax liability, will not be taken into account in the calculation of the payments, which will further decrease the cash generated by Vexigo's operations that we will be able to use to fund our operations and growth. In the event we require additional funds for our ongoing operations beyond the funds remaining after deduction of the Earn-out Payments, we may be required to raise funds by means of an equity financing, which will dilute the holdings of our current shareholders or loans from financial institutions. Such

equity or debt financings may not be available on terms acceptable to us, or at all, which would have an adverse effect on our operations and business.

If Vexigo's access to quality digital video advertising space is diminished or if Vexigo fails to acquire new advertising space, its revenues could decline and its growth could be impeded.

Vexigo's success depends on its ability to secure a consistent supply of quality advertising space on reasonable terms across a broad range of advertising networks and exchanges, including LiveRail, Brightroll and SpotXchange. The amount, quality and cost of advertising space available to Vexigo can change at any time. Vexigo's suppliers are generally not bound by long-term contracts. The sellers that supply their advertising space to Vexigo typically do so on a non-exclusive basis and are not required to provide Vexigo with any minimum amounts of advertising space or with a consistent supply of advertising space. Sellers may seek to change the terms at which they offer advertising space to Vexigo, or they may elect to make advertising space available to Vexigo's competitors who offer advertisements to them on more favorable economic terms. As a result, Vexigo cannot provide any assurance that it will have access to a consistent supply of quality digital video advertisement space. Moreover, the number of competing intermediaries that purchase advertising space from real-time advertising exchanges continues to increase, which could put upward pressure on advertising space costs. If sellers decide not to make media space available to Vexigo, decide to increase the price of advertising space, or place significant restrictions on the sale of their advertising space, Vexigo may not be able to replace this with sufficient quality advertising space from other sellers in a timely and cost-effective manner. In addition, major sellers in the industry may enter into exclusivity arrangements with Vexigo's competitors, which could limit Vexigo's access to a meaningful supply of advertising space. If Vexigo is unable to compete favorably for advertising space available on real-time advertising exchanges, or if real-time advertising exchanges decide not to make their advertising space available to Vexigo, Vexigo may not be able to place advertisements at competitive rates or find alternative sources of advertising space with comparable traffic patterns and consumer demographics in a timely manner. Furthermore, the advertising space that Vexigo accesses through real-time advertising exchanges may be of low quality or misrepresented to it, despite attempts by Vexigo and its suppliers to prevent fraud and conduct quality assurance checks. In the event Vexigo detects the low quality or fraudulent advertising space, it will lose the funds invested in acquiring such advertising space. In the event Vexigo is not successful in detecting such low quality or fraudulent advertising space and sells it to its customers, Vexigo, and we, may become subject to indemnification claims by Vexigo's customers and its reputation may be harmed, resulting in decreased revenues from, or the cessation of commercial relationships with, the affected advertising agencies, advertisers or their affiliates.

We derive a significant portion of our revenues from TEM call accounting solutions, the market for which has declined in recent years.

A significant portion of our revenues is derived from our TEM call accounting solutions, whose revenues declined each year from 2006 through 2014. Revenues for these products may not grow or stabilize in the future. If the market for our TEM solutions fails to grow or stabilize in the future, our business, operating results and financial condition would be adversely affected. Our future financial performance will be dependent to a substantial degree on the successful introduction, marketing and customer acceptance of our current and future TEM call accounting solutions.

We are subject to risks associated with rapid technological change and risks associated with new versions, offerings, products and industry standards.

The information and telecommunication service providers market in which we compete is characterized by rapid technological change, introductions of new products, changes in customer demands and evolving industry standards. Our future success will depend upon our ability to keep pace with the technological developments and to timely address the increasingly sophisticated needs of our customers by supporting existing and new telecommunication technologies and services and by developing and introducing enhancements to our current and new products. We may not be successful in developing and marketing enhancements to our products that will respond to technological change, evolving industry standards or customer requirements. We may experience difficulties that could delay or prevent the successful development, introduction and sale of such enhancements or such enhancements may not adequately meet the requirements of the marketplace and achieve any significant degree of market acceptance. If release dates of any new products or enhancements are delayed, or if when released, they fail to achieve market acceptance, our business, operating results and financial condition would be materially and adversely affected. In addition, the introduction or announcement of new product offerings or enhancements by us or our competitors may cause customers to defer or forgo purchases of current versions of our products, which could adversely affect our business, operating results and financial condition.

With its digital video advertising solution, Vexigo competes for advertisers and publishers, which are often represented by agencies, who want to purchase digital media for advertising campaigns. Vexigo's industry is subject to rapid changes in standards, technologies, products and service offerings, as well as in advertiser and publisher demands and expectations. Vexigo continuously needs to make decisions regarding which offerings and technology to invest in to meet media affiliates' demand and evolving industry standards and regulatory requirements. Vexigo may make wrong decisions regarding these investments. If new or existing competitors offer more attractive offerings than those of Vexigo, it may lose affiliates or affiliates may decrease their spending on its solutions. New media affiliates' demand for superior competitive offerings or new industry standards could render Vexigo's existing solutions unattractive, unmarketable or obsolete and require it to make substantial unanticipated changes to its technology platform or business model, resulting in additional expenses and loss of revenues. Vexigo's failure to adapt to a rapidly changing market or to anticipate media affiliates' demand could harm our business and our financial performance.

Our results may be adversely affected by intense competition.

The market for telemagement products and invoice management solutions is fragmented and is intensely competitive. Competition in the industry is generally based on product performance, depth of product line, technical support and price. We compete both with international and local competitors (including providers of telecommunications services), many of whom have significantly greater financial, technical and marketing resources than us. We anticipate continuing competition in the telemagement products and invoice management solution market and the entrance of new competitors into the market. Our existing and potential customers, including business telephone switching system manufacturers and vendors, may be able to develop telemagement products and services that are as effective as, or more effective or easier to use than, those offered by us. Such existing and potential competitors may also enjoy substantial advantages over us in terms of research and development expertise, manufacturing efficiency, name recognition, sales and marketing expertise and distribution channels. We may not be able to compete successfully against current or future competitors and that competition may adversely affect our future revenues and, consequently, on our business, operating results and financial condition.

The online advertising market, although growing rapidly, is also characterized by extensive competition and consolidation. Due to the short-term nature of the commercial relationship and in order to compete effectively, market participants, including Vexigo, may be required to implement price cutting. There can be no assurance that the cost of advertising space will decline at all or to the same extent due, especially the cost of high-quality advertising space. In the event Vexigo's gross margin decreases, Vexigo will be required to implement measures to maintain or improve its profitability. Such measures include, among others, an attempt to increase sales, implementing improvements to the technology in order to decrease the amount of advertising space that expires before it is sold and improving the services provided in order to maintain and attract customers. There can be no assurance that Vexigo will succeed in implementing the required measures, resulting in a decrease in gross margin and an adverse effect on our financial condition and operating results. In addition, many of the players in the digital advertising market also compete in the performance-based segment including large and well-established technology companies, advertising agencies, digital marketing companies, and other players, including Vexigo's existing digital media sources, who also compete in the digital performance-based marketing segment through their relationships with advertisers. Other companies may seek to enter or expand their activities in the performance-based segment of the digital advertising market. Such existing and potential competitors are likely to have greater name recognition, more extensive customer and digital media source relationships, and significantly more financial, technical, marketing and other resources than Vexigo has, and may be able to devote greater resources to the development, promotion, sale and support of their products and services. As a result, these existing and potential competitors may be better able to respond more quickly to new technologies, develop deeper customer relationships or offer services at lower prices. This, in turn, may affect Vexigo's ability to retain existing customers, attract new customers, obtain competitive pricing from its digital media sources or increase its sales and marketing budget, and may, therefore, cause Vexigo to lose market share and revenues. We believe that the digital advertising market will continue to undergo rapid change and significant consolidation as Vexigo's competitors broaden their service offerings and expand into more media channels and more industry verticals. If competition persists or intensifies in the future, it could have a material and adverse effect on Vexigo's ability to increase sales and maintain profitability. Any of the above circumstances could have a material adverse effect on Vexigo's reputation, business operations, financial position, competitive position and prospects.

Vexigo relies on "Demand Side Platforms," or DSPs, and "Video Ad Exchanges" to purchase its solutions on behalf of advertising agencies or advertisers, and incurs the cost of an advertising campaign before it is paid for its services and the advertising space. Such agencies and advertisers may have or develop high-risk credit profiles, which may result in credit risk to Vexigo.

Vexigo must consider the effect of credit risk in transactions with agencies or other third parties and advertisers. A substantial portion of Vexigo's business is sourced through Video Ad Exchanges and DSPs. These Video Ad

Exchanges and DSPs represent advertising agencies and advertisers and payment of fees to Vexigo originates with the advertising agencies or advertisers and is submitted through the Video Ad Exchanges and DSPs. Certain of the advertising agencies or advertisers have or may develop high-risk credit profiles, and, to the extent they do, may not remit payment or transfer only a portion of the payment due to Vexigo. The credit risk of advertising agencies may vary depending on the nature of an advertising agency's aggregated advertiser base. There can be no assurances that Vexigo will not experience bad debt expense or deferred revenues in the future. Any such write-offs for bad debt or deferrals of revenues could have a materially negative effect on Vexigo's results of operations for the periods in which the write-offs occur. Even if Vexigo is not paid, Vexigo is still obligated to pay for the media it has purchased for the advertising campaign, and as a consequence, our results of operations and financial condition could be adversely impacted.

Vexigo's business is seasonal and its results generally vary from quarter to quarter.

Vexigo's revenues, cash flow, operating results and other key operating and performance metrics may vary from quarter to quarter due to the seasonal nature of customers' spending on digital marketing campaigns. For example, customers typically devote more of their marketing expenditure to the fourth calendar quarter to coincide with consumer holiday spending patterns. Moreover, digital media in the fourth quarter is generally more expensive due to increased overall demand for digital media. If seasonal spending patterns were to become more pronounced, seasonal fluctuations could have an increased effect on Vexigo's revenues, cash flow, operating results and other key operating and performance metrics from period to period.

Legislation and regulation of digital businesses and industry standards or technical measures adopted by key market players, such as Google, could create unexpected additional costs or termination of services, subject Vexigo to enforcement actions for compliance failures, or cause Vexigo to change its technology solutions or business models, which may have an adverse effect on the demand for Vexigo's solutions.

In the course of conducting its business, Vexigo collects, stores, transmits, and uses information related to computing and communications devices, user activity on devices, and advertisements placed through Vexigo's solutions. The online advertising field is subject to federal, European and other regulation, including with respect to privacy and data protection and targeting minors and children, for example, the Children's Online Privacy Protection Act of 1998. Several governments are considering legislation related to digital advertising and certain media advertising organizations, such as the Network Advertising Initiative and the Interactive Advertising Bureau, adopted "best practice" guidelines with which Vexigo may be required to comply pursuant to current or future contractual undertakings. Key market players, such as Google, have in the past and may in the future implement technical measures in their products that limit the options, opportunities and access of online advertisers. Such legislation, technical measures and industry standards could affect the costs of doing business online, and may adversely affect the demand for or effectiveness and value of Vexigo's solutions. If future regulation, industry standards or consumer preferences make the collection or use of such data more difficult or impracticable, the value of online advertising could be adversely affected which, in turn, could impact the demand for our products. The costs of compliance with privacy and other laws and regulations are high and are likely to increase in the future and any failure on our part to comply with laws and regulations may expose Vexigo to significant liabilities.

Widespread blocking or erasing of cookies or limitations on advertisers' ability to use cookies may diminish the interest of advertisers in online advertising campaigns, resulting in a material adverse effect on Vexigo's results of operations.

Vexigo's technology currently does not use cookies, which are small files of information placed on an internet user's computer, to collect information about the user's visits to websites, however, Vexigo may wish to use cookies in the future in order to improve and expand its services. In addition, advertisers who place ads using Vexigo's services do use cookies placed by them on the targeted users' computers. Third-party software and internet browsers make it easy for users to block or delete cookies and several regulators, currently mainly in Europe, impose restrictions and regulatory requirements on the ability to use and place cookies. Further, several software programs, sometimes marketed as ad-ware or spyware detectors, block cookies by default or prompt users to delete or block cookies. For example, in March 2013 Apple informed developers that starting May 1, 2013 the App Store will no longer accept new apps or app updates that access the device's unique identifier (UDID). If advertisers are not up to speed with these changes, their ability to benefit from Vexigo's services may be impaired. If a large proportion of users delete or block cookies, this could undermine the value of the data that advertisers collect and Vexigo's ability to use cookies for its business purposes. To the extent advertisers will not be able to place cookies or collect information using cookies or any other technology, their interest in online advertising campaigns may diminish, resulting in a material adverse effect on our results of operations.

Vexigo does not have long-term commitments from its advertisers, and it may not be able to retain advertisers or attract new advertisers that provide it with revenue that is comparable to the revenue generated by any advertisers it may lose.

Most of Vexigo's advertisers do business with it by placing insertion orders for particular advertising campaigns. If Vexigo performs well on a particular campaign, the advertiser or, most often, the advertising agency representing the advertiser, may place new insertion orders with it for additional advertising campaigns. Vexigo rarely has any commitment from an advertiser beyond the campaign governed by a particular insertion order. Vexigo's insertion orders may also be canceled by advertisers or their advertising agencies prior to the completion of the campaign without penalty. As a result, Vexigo's success is dependent upon its ability to outperform its competitors and win repeat business from existing advertisers, while continually expanding the number of advertisers for whom Vexigo provide services. In addition, it is relatively easy for advertisers and the advertising agencies that represent them to seek an alternative provider for their advertising campaigns because there are no significant switching costs. Agencies, with whom Vexigo does the majority of its business, often have relationships with many different providers, each of whom may be running portions of the same advertising campaign. Because Vexigo generally does not have long-term contracts, it may be difficult for to accurately predict future revenue streams. We cannot provide assurance that Vexigo's current advertisers will continue to use its solutions, or that it will be able to replace departing advertisers with new advertisers that provide it with comparable revenue. The termination of contracts or failure to retain a number of customers could have a material adverse effect on Vexigo's reputation, business operations, financial position, competitive position and prospects

If Vexigo fails to detect fraud or serve its advertisers' advertisements on undesirable mobile and online platforms or if Vexigo sells its advertising space in connection with undesirable advertising campaigns, its reputation will suffer and its brand will be harmed, which would negatively impact our business, financial condition and results of operations.

Vexigo's business depends in part on providing its advertisers with a service that they trust, and Vexigo has contractual commitments to take reasonable measures to prevent advertisements from appearing on undesirable websites, including certain websites that the advertisers identify as undesirable and on websites that are involved in click fraud, bot traffic or similar activities. In addition, Vexigo has contractual commitments to take reasonable measures to prevent undesirable advertising from appearing on the websites that sell the advertising space to Vexigo. Vexigo also uses third-party services in an effort to prevent its advertisers' advertisements from appearing on undesirable websites or buying fraudulent supply. Preventing and combating fraud requires constant vigilance, and Vexigo may not always be successful in its efforts to do so. In addition, Vexigo may serve advertising on advertising space that is objectionable to its advertisers, and may lose the trust of its advertisers, which would harm its brand and reputation and negatively impact its business, financial condition and results of operations. Vexigo may also purchase advertising space inadvertently that proves to be unacceptable for advertising campaigns, in which case Vexigo is responsible for the cost and cannot bill that cost to any campaign. If Vexigo buys substantial volumes of unusable advertising space, this could negatively impact our results of operations.

If mobile connected devices, their operating systems or content distribution channels, including those controlled by Vexigo's competitors, develop in ways that prevent its advertising campaigns from being delivered to their users, Vexigo's ability to grow its business will be impaired.

Vexigo's success in the mobile channel arena depends upon the ability of its technology platform to integrate with mobile advertising space suppliers and provide advertising for most mobile connected devices, as well as the major operating systems that run on them and the thousands of applications that are downloaded onto them. The design of mobile devices and operating systems is controlled by third parties with whom Vexigo does not have any formal relationships. These parties frequently introduce new devices, and from time to time they may introduce new operating systems or modify existing ones, which makes it easier to block ads. Network carriers may also impact the ability to access specified content on mobile devices or even block such access. If Vexigo's solution was unable to work on these devices or operating systems, either because of technological constraints or because an operating system or app developer, device maker or carrier wished to impair its ability to purchase advertising space and provide advertisements, our ability to generate revenue could be significantly harmed.

Vexigo's solutions include certain open source software components and failure to comply with the terms of the underlying open source software licenses could restrict Vexigo's ability to use its proprietary software.

Vexigo's platform includes certain software components licensed to Vexigo by third-parties under "open source" licenses. The use of open source software may entail greater risks than the use of third-party commercial software, as open source licensors generally do not provide warranties or other contractual protections regarding infringement claims or the quality of the code. Some open source licenses contain requirements that their users make available source code for modifications or derivative works or other compliance requirements. Therefore, if Vexigo combines its proprietary software with open source software subject to certain licenses in a certain manner, it could, under these open source licenses, be required to release the source code of its proprietary software to the public. This would allow Vexigo's competitors to create similar solutions with less development effort and time and ultimately put Vexigo at a competitive disadvantage.

The terms of many open source licenses have not been interpreted by United States courts at this time, and there is a risk that these licenses could be construed in a way that could impose unanticipated conditions or restrictions on Vexigo's ability to commercialize its services. Moreover, we cannot guarantee that Vexigo will be able to prevent use

of certain open source software subject to restrictive licenses or licenses requiring distribution of its software or that in the future the terms of licenses that apply to open source software will be interpreted in ways that will be harmful to Vexigo. If Vexigo fails to observe the terms of the applicable licenses, it may be subject to litigation, to a demand to make its proprietary software available to the public and to restriction on future use of the relevant open source software, any of which could adversely affect our business, financial condition and results of operations.

We are subject to risks relating to proprietary rights and risks of infringement.

Due to the rapid pace of technological change in the communications industry, we believe that the most significant factors in our intellectual property rights are the knowledge, ability and experience of our employees, the frequency of product enhancements and the timeliness and quality of support services provided by us. In addition, we rely upon a combination of security devices, copyrights, trademarks, patents, trade secret laws, confidentiality procedures and contractual restrictions to protect our rights in our products. We try to protect our software, documentation and other written materials under trade secret and copyright laws, which afford only limited protection. It is possible that others will develop technologies that are similar or superior to our technology. Unauthorized parties may attempt to copy aspects of our products or to obtain and use information that we regard as proprietary. It is difficult to police the unauthorized use of our products, and we expect software piracy to be a persistent problem, although we are unable to determine the extent to which piracy of our software products exists. In addition, the laws of some foreign countries do not protect our proprietary rights as fully as do the laws of the United States. Our means of protecting our proprietary rights in the United States or abroad may not be adequate or our competition may independently develop similar technology.

Vexigo's success depends, in part, on its ability to protect proprietary methods and technologies that it develops or otherwise acquires, so that Vexigo can prevent others from using Vexigo's inventions and proprietary information. If Vexigo fails to protect its intellectual property rights adequately, its competitors might gain access to its technology, and its business might be adversely affected. Vexigo relies on trademark, copyright and trade secret laws, confidentiality procedures and contractual provisions to protect its proprietary methods and technologies. Vexigo, whose patent strategy is still in its early stages, has one registered patent.

Vexigo generally enters into confidentiality and/or license agreements with its employees, consultants, vendors and advertisers, and generally limits access to and distribution of its proprietary information. However, Vexigo cannot assure that any steps taken by it will prevent misappropriation of its technology and proprietary information or infringement of its intellectual property rights. Policing unauthorized use of Vexigo's technology and intellectual property is difficult and expensive. Vexigo's competitors and others could attempt to capitalize on its brand recognition by using domain names or business names similar to Vexigo's, and Vexigo may be unable to prevent third parties from acquiring or using domain names and other trademarks that infringe on, are similar to, or otherwise decrease the value of its brands, trademarks or service marks. Also, despite the steps Vexigo has taken to protect its proprietary rights, it may be possible for unauthorized third parties to copy or reverse engineer aspects of Vexigo's technology or otherwise obtain and use information that it regards as proprietary, or to develop technologies similar or superior to its technology or design around its proprietary rights.

The digital advertising industry is characterized by the existence of large numbers of patents, copyrights, trademarks, trade secrets and other intellectual property and proprietary rights. Companies in this industry are often required to defend against litigation claims that are based on allegations of infringement or other violations of intellectual property rights. Vexigo's technologies may not be able to withstand any third-party claims or rights against their use.

It is possible that third parties will claim infringement by us of their intellectual property rights regarding both the TEM industry and the advertising industry. We believe that software product developers will increasingly be subject to infringement claims as the number of products and competitors in our industry segment grows and the functionality of products in different industry segments overlaps. As a result of the Vexigo acquisition, Vexigo's business and financial condition may become more visible, which may result in threatened or actual litigation, including by competitors and other third parties.

Regardless of whether claims that we are infringing patents or infringing or misappropriating other intellectual property rights have any merit, these claims are time-consuming and costly to evaluate and defend, and can impose a significant burden on management and employees. The outcome of any litigation is inherently uncertain, and we may receive unfavorable interim or preliminary rulings in the course of litigation. There can be no assurances that favorable final outcomes will be obtained in all cases. Any such litigation could also cause product set-up or maintenance delays or require us to enter into royalty or licensing agreements. Such royalty or licensing agreements, if required, may not be available on terms acceptable to us, if at all. Some of Vexigo's competitors for example have substantially greater resources than we do and are able to sustain the costs of complex intellectual property litigation to a greater degree and for longer periods of time than we could. If there is a successful claim of product infringement against us and we are not able to license the infringed or similar technology, our business, operating results and financial condition would be adversely affected. We cannot assure you that we are not infringing or violating any third-party intellectual property rights.

Our operating results fluctuate significantly.

Our quarterly and annual results have fluctuated significantly in the past and are likely to fluctuate significantly in the future. Our future operating results will depend on many factors, including, but not limited to the following:

- demand for our products;
- ability to retain existing customers;
- changes in our pricing policies or those of our competitors;
- new product announcements by us and our competitors;
- the number, timing and significance of product enhancements;
- product life cycles;
- our ability to develop, introduce and market new and enhanced products on a timely basis;
 - changes in the level of our operating expenses;
 - budgeting cycles of our customers;
- customer order deferrals in anticipation of enhancements or new products that we or our competitors offer;
 - changes in our strategy;
- seasonal trends and general domestic and international economic and political conditions, among others; and
- currency exchange rate fluctuations and economic conditions in the geographic areas where we operate.

Our expense levels are substantially based on our expectations for future revenues and are therefore relatively fixed in the short term. If revenue levels fall below expectations, our quarterly results are likely to be disproportionately adversely affected because a proportionately smaller amount of our expenses varies with our revenues. Our operating results are generally not characterized by a seasonal pattern, except that our sales in Europe are generally lower in the summer months.

We typically ship orders for our TABS product shortly after receipt of a purchase order and, consequently, order backlog at the beginning of any quarter has in the past represented only a small portion of that quarter's revenues. As a result, license revenues from our TABS product in any quarter depend substantially on orders for TABS products that have been booked and shipped in that quarter. Also, we cannot predict whether revenues from our TEM Suite will be recognized in any quarter because the delivery and, in some cases, the implementation of all the components of the TEM Suite (including among, other things, customer training) are dependent on the customers individual timing requirements, which can delay the completion of these orders. In addition, a portion of our revenues from billing solutions are generated by using contract accounting on a percentage of completion method and because the completion pace varies from quarter to quarter and is dependent on different variables that are out of our control, a portion of our billing solutions revenues in any quarter depend on our customers' operational plans, which can delay our ability to progress and complete the projects.

Due to the foregoing, our quarterly financial performance has varied significantly in the past and may vary significantly in the future. Our revenues and operating results in any quarter may not be indicative of our future performance, and it may be difficult for investors to evaluate our prospects. In some future quarter, our operating results may be below the expectations of public market analysts and investors. In such event, it is likely that the price of our ordinary shares would be adversely affected. Accordingly, quarterly revenues and operating results are difficult to forecast, and it is likely that our future operating results will be adversely affected by these or other factors. We believe that period-to-period comparisons of our operating results are not necessarily meaningful and you should not rely upon them as indications of future performance.

Unfavorable national and global economic conditions could adversely affect our business, operating results and financial condition.

Worsening economic conditions, such as the continued European sovereign debt uncertainty, may result in diminished demand for our products and in decreased sales volumes. Although global economic conditions have stabilized or improved since the 2008 financial crisis, many of the markets in which we operate have not fully recovered. If the economies in the countries in which we operate continue to be uncertain or weaken further, the demand for our products and technology may decrease as a result of constraints on capital spending by our customers. In addition, this could result in longer sales cycles and increased price competition for our products. Any of these events would likely harm our business, operating results and financial condition. If global economic and market conditions, or economic conditions in the United States, Europe or Asia or other key markets, remain uncertain or weaken further, our business, operating results and financial condition may be adversely affected.

Notably, Vexigo's business depends on the overall demand for advertising, specifically online video advertising, and on the economic health of its current and prospective publishers and advertisers. If advertisers reduce their overall advertising spending, Vexigo's revenue and results of operations are directly affected. Economic downturns or instability in political or market conditions generally may cause current or new advertisers to reduce their advertising budgets. Adverse economic conditions and general uncertainty about economic recovery are likely to affect Vexigo's business prospects.

Because we collect and recognize revenue from services over the term of our customer agreements, the lack of customer renewals or new customer agreements may not be immediately reflected in our operating results.

We collect and recognize revenue from our customers in service agreements over the term of their agreements with us. As a result, the aggregate effect of a decline in new or renewed customer agreements in any one quarter would not be fully recognized in our revenue for that quarter, but would negatively affect our revenue in future quarters. Consequently, the aggregate effect of significant upturns or downturns in sales of our solution would not be fully reflected in our results of operations until future periods.

We face risks associated with expanding and maintaining our distribution network.

We sell our products through distributors, business telephone switching systems manufacturers and vendors, post, telephone and telegraph authorities, or PTTs and our direct sales force. Our ability to achieve revenue growth in the future will depend in large part on our success in establishing and maintaining relationships with business telephone switching systems manufacturers and vendors and PTTs, and establishing and maintaining relationships with distributors. Historically, we have at times experienced difficulty in establishing effective distribution relationships. We may not be able to successfully expand our distribution channels or any such expansion may not result in an increase in revenues. The failure to expand or maintain our distribution channels could adversely affect our business, operating results and financial condition.

We are subject to risks associated with international operations.

We are based in Israel and generate a large percentage of our sales in the United States. Our sales in the United States accounted for 86.4%, 79.8% and 77.8% of our total revenues for the years ended December 31, 2013, 2014 and 2015, respectively. We may not be able to maintain or increase international market demand for our products. To the extent that we cannot do so in a timely manner, our business, operating results and financial condition will be adversely affected.

International operations are subject to inherent risks, including the following:

- the impact of recessionary environments in multiple foreign markets;
- costs of localizing products for foreign markets;
- longer receivables collection periods and greater difficulty in accounts receivable collection;
- unexpected changes in regulatory requirements;
- difficulties and costs of staffing and managing foreign operations;
- reduced protection for intellectual property rights in some countries;
- potentially adverse tax consequences; and
- political and economic instability.

Our distributors or resellers may not be able to sustain or increase revenues from international operations or the foregoing factors may adversely affect our future revenues and, as a result, on our business, operating results and financial condition.

The base erosion and profit shifting ("BEPS") project undertaken by the Organization for Economic Cooperation and Development, or OECD, may have adverse consequences to our tax liabilities. The BEPS project contemplates changes to numerous international tax principles, as well as national tax incentives, and these changes, if adopted by individual countries, could adversely affect our provision for income taxes. It is hard to predict how the principles and recommendations developed by the OECD in the BEPS project will translate into specific national laws, and therefore we cannot predict at this stage the magnitude of the effect of such rules on our financial results.

We may be adversely affected by fluctuations in currency exchange rates.

While our revenues are generally denominated in U.S. dollars and Euros, a portion of our expenses, primarily salaries, are incurred in NIS. From time to time, we may enter into hedging transactions in order to mitigate such fluctuations. Any hedging transactions that we enter into may not materially reduce the effect of fluctuations in foreign currency exchange rates on our results of operations. In addition, if, for any reason, exchange or price controls or other restrictions on the conversion of foreign currencies into NIS were imposed, our business could be adversely affected. Currency fluctuations in the future may adversely affect our revenues from international sales and, consequently, on our business, operating results and financial condition.

We depend on business telephone system manufacturers, vendors and distributors for our sales.

Historically, one of the primary distribution channels for our call accounting management products has been private branch exchange, or PBX, original equipment manufacturers, or OEMs, and vendors who market our products to end-users in conjunction with their own products. We are dependent upon the active marketing and distribution efforts of our PBX, OEMs and local master distributors.

Sales of call accounting solutions by PBX manufacturers and vendors have declined markedly in the recent past, and sales through this channel may continue to decline. Our future success will be dependent to a substantial degree on the marketing and sales efforts of such third parties in marketing and integrating our products. These third parties may not give priority to the sale of our products as an enhancement to their products. Although most of the major business telephone switching systems manufacturers and vendors currently rely on third party suppliers to provide call accounting and other telemanagement products, these manufacturers and vendors, including our current customers, may develop their own competing products or purchase competing products from others.

Because we sell our products through local master distributors in countries where we do not have a marketing subsidiary, we are highly dependent upon the active marketing and distribution efforts of our distributors. We also depend in large part upon our distributors for product maintenance and support. Our distributors may not continue to provide adequate maintenance and support to end-users or provide maintenance and support for new products, which might cause us to seek new or additional distributors or incur additional service and support costs. The distributors to whom we sell our products are generally not contractually required to make future purchases of our products and could, therefore, discontinue carrying our products at any time. None of our distributors or resellers is subject to any minimum purchase requirements under their agreements with us.

We may not be able to continue our relationships with our OEM customers or, if such relationships are not maintained, we may not be able to attract and retain comparable PBX OEMs. The loss of any of our major reseller or OEM relationships, either to competitive products offered by other companies or products developed by such resellers, would adversely affect our business, financial condition and results of operations. Our future performance will depend, in part, on our ability to attract additional PBX manufacturers and vendors that will be able to market and support our products effectively, especially in markets in which we have not previously distributed our products.

Breaches of network or information technology security, natural disasters or terrorist attacks could have an adverse effect on our business. Vexigo, in particular, relies heavily on its IT systems and on third party IT support and systems, including communications lines.

Cyber-attacks or other breaches of network or information technology, or IT, security, natural disasters, terrorist acts or acts of war may cause equipment failures or disrupt our systems and operations. In particular, both unsuccessful and successful cyber-attacks on companies have increased in frequency, scope and potential harm in recent years. Such an event may result in our inability to operate our facilities, which, even if the event is for a limited period of time, may result in significant expenses and/or loss of market share to other competitors in the market for telemanagement products and invoice management solutions. While we maintain insurance coverage for some of these events, the potential liabilities associated with these events could exceed the insurance coverage we maintain. A failure to protect the privacy of customer and employee confidential data against breaches of network or IT security could result in damage to our reputation. Any of these occurrences could result in a material adverse effect on our results of operations and financial condition.

Vexigo and our TEM services, in particular, rely heavily on IT systems to manage critical functions such as media campaign management and operations, data storage and retrieval, revenue recognition, budgeting, forecasting, financial reporting and other administrative functions. Certain of these IT services are provided by third parties, including communications lines, and certain of Vexigo's data is stored on third parties' servers, which exposes Vexigo to additional risks relating to loss of data and security breaches.

As Vexigo grows its business, we expect it will continue to invest in technology services, hardware and software, including data centers, network services, storage and database technologies. Creating the appropriate support for Vexigo's technology platform, including Big Data and computational infrastructure, is expensive and complex, and its execution could result in inefficiencies or operational failures and increased vulnerability to cyber-attacks, which, in turn, could diminish the quality of Vexigo's services and its performance for advertisers. Cyber-attacks could include denial-of-service attacks impacting service availability (including the ability to deliver ads) and reliability; the exploitation of software vulnerabilities in internet facing applications; social engineering of system administrators (tricking company employees into releasing control of their systems to a hacker); or the introduction of computer viruses or malware into Vexigo's systems with a view to steal confidential or proprietary data. Cyber-attacks of increasing sophistication may be difficult to detect and could result in the theft of Vexigo's intellectual property and its data or its advertisers' data. In addition, Vexigo is vulnerable to unintentional errors as well as malicious actions by persons with authorized access to its systems that exceed the scope of their access rights, or unintentionally or

intentionally alter parameters or otherwise interfere with the intended operations of its platform. The steps Vexigo takes to increase the reliability, integrity and security of its systems as they scale may be expensive and may not prevent system failures or unintended vulnerabilities resulting from the increasing number of persons with access to its systems, complex interactions within its technology platform and the increasing number of connections with third party partners and vendors' technology. Operational errors or failures or successful cyber-attacks could result in damage to Vexigo's reputation and loss of current and new advertisers and other business partners which could harm our business. In addition, we could be adversely impacted by outages and disruptions in the online platforms of Vexigo's key business partners, such as the real-time advertising exchanges, which Vexigo relies upon for access to advertising space.

We are subject to risks arising from product defects and potential product liability. Errors or failures in Vexigo's software and systems could adversely affect its operating results and growth prospects.

In the TEM business, we may generally provide a warranty for up to three months for end-users and, in limited instances, up to twelve months. Our sales agreements typically contain provisions designed to limit our exposure to potential product liability or related claims. The limitation of liability provisions contained in our agreements may not be effective. Our products are used by businesses to reduce communication costs, recover charges payable by third parties, prevent abuse and misuse of telephone networks and converged billing solutions for information and telecommunication service providers, and as a result, the sale of products by us may entail the risk of product liability and related claims. A product liability claim brought against us could adversely affect our business, operating results and financial condition. Products such as those offered by us may contain undetected errors or failures when first introduced or when new versions are released. Despite our testing and testing by current and potential customers, errors may be found in new products or releases after commencement of commercial shipments. The occurrence of these errors could result in adverse publicity, loss of or delay in market acceptance or claims by customers against us, any of which could adversely affect our business, operating results and financial condition.

Vexigo depends upon the sustained and uninterrupted performance of its technology platform to operate over 1,000 advertising campaigns at any given time; manage its advertising space supply; bid on advertising space for each campaign; serve or direct a third party to serve advertising; collect, process and interpret data to optimize campaign performance in real time; and provide billing information to its financial systems. If Vexigo's technology platform cannot scale to meet demand, or if there are errors in the execution of any of these functions on its platform, then its business could be harmed. Because Vexigo's software is complex, undetected errors and failures may occur, especially when new versions or updates are made. Vexigo does not have the capability to test new releases or updates to its code on a small subset of campaigns, which means that bugs or errors in code could impact all campaigns on its platform. Despite testing of the optimization platform by Vexigo, errors or bugs in its software may not be found until the software is in its live operating environment. Errors or failures in Vexigo's software could also result in negative publicity, damage to its brand and reputation, loss of or delay in market acceptance of its solutions, increased costs or loss of revenue, loss of competitive position or claims by advertisers for losses sustained by them. In such an event, Vexigo may be required or choose to expend additional resources to help mitigate any problems resulting from errors in its software. Vexigo may make errors in the measurement of its campaigns causing discrepancies with its advertisers' measurements leading to a lack in confidence with Vexigo or, on occasion, the need for advertiser "make-goods", the standard credits given to advertisers for campaigns that have not been delivered properly. Alleviating problems resulting from errors in Vexigo's software could require significant expenditures of capital and other resources and could cause interruptions, delays or the cessation of its business, any of which would adversely impact our financial position, results of operations and growth prospects.

We may not be able to retain or attract the key managerial, technical and research and development personnel we need to succeed.

Our success has largely depended on and will continue to depend in the future on our skilled professional and technical employees. The competition for these employees is intense. We may not be able to retain our present employees, or recruit additional qualified employees as we require them. Vexigo's ability to operate and grow its business successfully is highly dependent on the efforts and contribution of its key employees, including Kobi Ram, its chief executive officer, and Amit Reshef, its chief technology officer. Vexigo does not maintain "key person" insurance for these or any other employees. The loss of any key member of our management team might significantly delay or prevent the achievement of our business or development objectives. Our ability to replace key members of our management team and hire additional skilled personnel in the future might be negatively impacted by the use of restrictive covenants in our industry and market. Any failure to attract and retain key managerial, technical and research and development personnel could adversely affect our ability to generate sales, deploy our products or

successfully develop new products and enhancements.

The recent Vexigo acquisition was structured as a share purchase rather than an asset purchase, which could expose us to additional liabilities; we will only be entitled to request limited indemnification from Vexigo's former shareholders for damages arising out of the Vexigo acquisition and may be subject to indemnification claims from such former shareholders.

Except under specific circumstances, we are entitled to indemnification from Vexigo's former shareholders for damages resulting from certain breaches of representations and warranties and of the Vexigo SPA that are limited in amount and time. In addition, the Vexigo SPA provides for our obligation to indemnify the former shareholders for damages resulting from certain breaches of representations and warranties and of the Vexigo SPA that, except under specific circumstances, are also limited in amount and time. To the extent our damages are higher than the amounts set forth in the Vexigo SPA or are discovered after the expiration of the relevant representation or warranty, we will not be entitled to indemnification. To the extent Vexigo's former shareholders incur damages, we may be subject to indemnification obligations. The Vexigo acquisition was structured as a share acquisition rather than an asset acquisition, and we also acquired the shares of an additional company that held Vexigo shares. The purchase of shares, as opposed to an acquisition of assets could expose us to additional liabilities which are unrelated to the current business of Vexigo. Any such occurrences may have a material adverse effect on our financial position.

Prior to its acquisition, Vexigo was a private company and as such was not subject to the regulation applicable to us as an Israeli public company or as a foreign private issuer, including with respect to disclosure controls and procedures and internal control over financial reporting.

Until acquired by us, Vexigo was a privately-held company and was not subject to the reporting and other obligations applicable to foreign private issuers or to companies traded on the NASDAQ Stock Market or to requirements applicable to Israeli public companies. In addition, Vexigo's financial reporting was outsourced and Vexigo did not use in-house designated software for the creation and maintaining of its financial records. Since the acquisition we have worked to implement or strengthen the work procedures in Vexigo and to acquire appropriate software and enhance the finance team in Vexigo in order to ensure our continued compliance with applicable regulations, including with respect to disclosure controls and procedures and internal control over financial reporting. The implementation process will likely continue to divert management time and employee attention, both in Vexigo and our company, from the operations of both companies and will entail additional costs and expenses. If we are not successful in implementing the proper procedures, there could be future deficiencies in our disclosure controls and procedures and our internal control over financial that will render them ineffective and will require us to contain relevant declarations in our future filings with the SEC.

We may encounter difficulties in realizing the potential financial or strategic benefits of the Vexigo acquisition or any future transactions.

Mergers and acquisitions of companies are inherently risky and subject to many factors outside of our control and no assurance can be given that the acquisition of Vexigo or other companies in the future, will be successful and will not adversely affect our business, operating results, or financial condition. In the future, we may seek to acquire or make strategic investments in complementary businesses, technologies, services or products, or enter into strategic partnerships or alliances with third parties in the future in order to expand our business. Failure to manage and successfully integrate acquisitions could materially harm our business and operating results. Prior acquisitions have resulted in a wide range of outcomes, from successful introduction of new products and technologies to a failure to do so. Even when an acquired company has previously developed and marketed products, there can be no assurance that new product enhancements will be made in a timely manner or that pre-acquisition due diligence will have identified all possible issues that might arise with respect to such products. We may face difficulties in connection with the acquisition of Vexigo or other transactions, including:

- Difficulties in integrating the operations, systems, technologies, products, and personnel of the acquired businesses or enterprises;
- Diversion of management's attention from normal daily operations of the business and the challenges of managing larger and more widespread operations resulting from acquisitions;
 - Potential difficulties in completing projects associated with in-process research and development;
- Difficulties in entering markets in which we have no or limited direct prior experience and where competitors in such markets have stronger market positions;
 - Insufficient revenue to offset increased expenses associated with acquisitions; and
- The potential loss of key employees, customers, distributors, vendors and other business partners of the companies we acquire following and continuing after announcement of acquisition plans.

If we fail to manage our growth, our business could be disrupted and our results will likely decline.

If we experience significant growth, such growth may significantly strain our management and other operational and financial resources. To manage growth effectively, we must continue to improve and expand our infrastructure, including our IT systems, financial and administrative systems and controls. We must also continue to manage our employees, operations, finances, research and development and capital investments efficiently. Our productivity and the quality of our solutions may be adversely affected if we do not integrate and train our new employees, particularly our sales and account management personnel, quickly and effectively and if we fail to appropriately coordinate across our executive, engineering, finance, human resources, legal, marketing, sales, operations and customer support teams.

In particular, headcount growth increases the integration challenges involved in:

- recruiting, training and retaining skilled technical, marketing and management personnel;
 - maintaining high quality standards;
- preserving our corporate culture, values and entrepreneurial environment;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications and other internal controls; and
 - maintaining high levels of customer satisfaction.

Our systems, procedures or controls may not be adequate to support the growth in our operations, and our management may not be able to achieve the execution necessary to exploit the market opportunities for our businesses. Our future operating results will also depend on our ability to expand our development, sales and marketing organizations. If we are unable to manage growth effectively, we may not be profitable. Rapid growth may also entail incurring additional expenses, and a strain on resources, infrastructure and ability to maintain the quality of solutions. If we do not adapt to meet these evolving growth challenges, and if the current and future members of our management team do not effectively scale with our growth, the quality of our solutions may suffer and our corporate culture may be harmed. Failure to manage our future growth effectively could cause our business to suffer, which, in turn, could have an adverse impact on our financial condition and results of operations.

Vexigo has encountered and will continue to encounter risks and difficulties frequently experienced by growing companies in rapidly developing and changing industries, including challenges related to recruiting, integrating and retaining qualified employees; making effective use of its limited resources; achieving market acceptance of its existing and future offerings, including its newly introduced Visualizer solution, as well as its shift into the video advertiser industry; competing against companies with greater financial and technical resources; acquiring and retaining customers and maintaining relationships with advertisers, advertising agencies and owners of publishing space and publisher agencies; and developing new offerings. Vexigo's current operational infrastructure may require changes for it to scale its business efficiently and effectively to keep pace with demand for its solutions and achieve long-term profitability. If Vexigo fails to implement these changes on a timely basis, or if it is unable to implement them effectively or at all due to factors beyond its control or other reasons, its business may suffer. Vexigo cannot provide assurance that it will be successful in addressing these and other challenges it may face in the future.

In order for Vexigo to receive Israeli corporate tax benefits it will be required to meet various conditions. Such benefits may not be approved or may be terminated or reduced, all of which could increase the amount of corporate tax payable in Israel.

We believe that Vexigo is entitled to benefit from a reduced corporate tax rate under the Israeli privileged enterprise program. Under this program, a portion of Vexigo's income is subject to reduced corporate tax rates in Israel. In order to become eligible for the tax benefits for "Privileged Enterprises," Vexigo is required to meet certain conditions stipulated in the Israeli Law for the Encouragement of Capital Investments, 5719-1959, as amended, and the regulations promulgated thereunder. The view of the Israeli Tax Authority, or ITA, may be different and Vexigo's entitlement to the tax benefits can be revoked or reduced with retroactive effect, which would result in adverse tax consequences both for past and future tax years. Further, these tax benefits may be reduced or discontinued in the future and in such case, Vexigo's Israeli taxable income would be subject to regular Israeli corporate tax rates. The standard corporate tax rate for Israeli companies was 26.5% in 2015 and, commencing January 1, 2016, was set at 25%.

Actual results could differ from the estimates and assumptions that we use to prepare our financial statements.

In order to prepare our financial statements in conformity with accounting principles generally accepted in the United States (“U.S. GAAP”), our management is required to make estimates and assumptions, as of the date of the financial statements, which affect the reported values of assets and liabilities, revenues and expenses, and disclosures of contingent assets and liabilities. Areas that require significant estimates by our management include contract costs and profits, application of percentage-of-completion accounting, provisions for uncollectible receivables and customer claims, impairment of long-term assets, goodwill impairment, valuation of assets acquired and liabilities assumed in connection with business combinations, accruals for estimated liabilities, including litigation and insurance reserves, and stock-based compensation. Our actual results could differ from, and could require adjustments to, those estimates.

We may fail to maintain effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act of 2002, which could have an adverse effect on our financial results and the market price of our ordinary shares.

The Sarbanes-Oxley Act of 2002 imposes certain duties on us and our executives and directors. Our efforts to comply with the requirements of Section 404(a) of the Sarbanes-Oxley Act of 2002 governing internal control and procedures for financial reporting have resulted in increased general and administrative expense and a diversion of management time and attention, and we expect these efforts to require the continued commitment of significant resources. We may identify material weaknesses or significant deficiencies in our assessments of our internal control over financial reporting. Failure to maintain effective internal control over financial reporting could result in investigation or sanctions by regulatory authorities and could adversely affect our operating results, investor confidence in our reported financial information and the market price of our ordinary shares. We have excluded Vexigo from our assessment of internal control over financial reporting as of December 31, 2015 because it was first acquired by us during 2015.

Risk Factors Related to Our Ordinary Shares

A few of our shareholders who are also members of our Board, may have a significant influence over our business prospects. Future disagreements among these Board members may delay or prevent certain business developments.

Mr. Haim Mer, the Chairman of our Board of Directors, and his wife, Mrs. Dora Mer, currently beneficially own approximately 16.2% of our outstanding ordinary shares. The Info Group, Inc. (formerly AnchorPoint, Inc.) whose principal shareholder, Mr. Roger Challen, is one of our directors, currently beneficially owns 12.3% of our outstanding shares. Mr. Tzvika Friedman is one of our directors, currently beneficially owns 6.7% of our outstanding shares. As a result, each of these shareholders has a significant influence over the election of our Board of Directors and over our business and affairs. Any future disagreements between these board members in connection with our business and affairs, including with respect to any determinations relating to potential mergers or other business combinations involving us, our acquisition or disposition of assets, our incurrence of indebtedness, our issuance of any additional ordinary shares or other equity securities, our repurchase or redemption of ordinary shares and our payment of dividends, may delay or prevent certain of these developments and thereby harm our future prospects and results of operations. This concentration of ownership may also adversely affect our share price, especially if these shareholders sell substantial amounts of our ordinary shares. Our current officers and directors beneficially own, collectively, 3,925,998 ordinary shares, or approximately 46.8 percent of our outstanding shares.

If we fail to maintain compliance with NASDAQ’s continued listing requirements, our shares may be delisted from the NASDAQ Capital Market.

Our ordinary shares are listed on the NASDAQ Capital Market under the symbol “MTSL.” To continue to be listed on the NASDAQ Capital Market, we need to satisfy a number of conditions, including minimum shareholders’ equity of at least \$2.5 million and a minimum closing bid price per share of \$1.00 for 30 consecutive business days. In the past we fell below the minimum \$2.5 million shareholders’ equity, and we may not be able to maintain such minimum shareholders’ equity in the future. In December 2015, we were notified that that we were not in compliance with NASDAQ’s requirement that listed securities maintain a minimum bid price of \$1.00 per share. We have a period of 180 calendar days, until June 20, 2016, to achieve compliance by meeting the applicable standard for a minimum of ten consecutive business days. If we are not deemed in compliance before the expiration of the 180 day compliance period, NASDAQ may afford us an additional 180 day compliance period, provided that on the 180th day of the first compliance period we have demonstrated that we meet all applicable standards for initial listing on the NASDAQ Capital Market (except the bid price requirement) based on our most recent public filings and market information. If we are delisted from NASDAQ, trading in our ordinary shares would be conducted on a market where an investor would likely find it significantly more difficult to dispose of, or to obtain accurate quotations as to the value of, our ordinary shares.

We may be classified as a passive foreign investment company, or PFIC, which will subject our U.S. investors to adverse tax rules.

For U.S. federal income tax purposes, we may be classified as a PFIC for any taxable year in which either: (i) 75% or more of our gross income is passive income or (ii) at least 50% of the average quarterly value of our assets (which may be determined in part by the market value of our ordinary shares, which is subject to change) for the taxable year produce or are held for the production of passive income. We believe that we were not a PFIC in 2015 and we do not expect to become a PFIC in future years. If we are classified as a PFIC for U.S. federal income tax purposes, highly complex rules would apply to U.S. holders owning our ordinary shares and such U.S. holders could suffer adverse U.S. tax consequences. Accordingly, you are urged to consult your tax advisors regarding the application of such rules. For more information please see “Item 10. Additional Information – E. Taxation - United States Federal Income Taxation – Passive Foreign Investment Companies.”

Our share price has been volatile in the past and may decline in the future.

Our ordinary shares have experienced significant market price and volume fluctuations in the past and may experience significant market price and volume fluctuations in the future in response to factors such as the following, some of which are beyond our control:

- quarterly variations in our operating results;
- operating results that vary from the expectations of securities analysts and investors;
- changes in expectations as to our future financial performance, including financial estimates by investors;
- announcements of technological innovations or new products by us or our competitors;
- announcements by us or our competitors of significant contracts, acquisitions, strategic partnerships, joint ventures or capital commitments;
- announcements by third parties of significant claims or proceedings against us;
- changes in the status of our intellectual property rights;
- additions or departures of key personnel;
- future sales of our ordinary shares; and
- general stock market prices and volume fluctuations.

Domestic and international stock markets often experience extreme price and volume fluctuations. Market fluctuations, as well as general political and economic conditions, such as a recession or interest rate or currency rate fluctuations or political events or hostilities in or surrounding Israel, could adversely affect the market price of our ordinary shares.

In the past, securities class action litigation has often been brought against a company following periods of volatility in the market price of its securities. We may in the future be the target of similar litigation. Securities litigation could result in substantial costs and divert management’s attention and resources.

We do not expect to distribute cash dividends.

We do not anticipate paying cash dividends in the foreseeable future. According to the Israeli Companies Law, 1999-5759, or the Israeli Companies Law, a company may generally distribute dividends only out of its retained earnings (within the meaning of the Israeli Companies Law), so long as the company reasonably believes that such dividend distribution will not prevent the company from paying all its current and future debts. The declaration of dividends is subject to the discretion of our Board of Directors and will depend on various factors, including our operating results, financial condition, future prospects and any other factors deemed relevant by our board of directors. You should not rely on an investment in our company if you require dividend income from your investment in our company. The success of your investment will likely depend entirely upon any future appreciation of the market price of our ordinary shares, which is uncertain and unpredictable and there is no guarantee that our ordinary shares will appreciate in value or even maintain the price at which you purchased your ordinary shares.

Risks Relating to Operations in Israel

Political, economic and military instability in Israel may disrupt our operations and negatively affect our business condition, harm our results of operations and adversely affect our share price.

We are incorporated under the laws of, and our principal executive offices, production or manufacturing and research and development facilities are located in, the State of Israel. Vexigo is also based in Israel. As a result, political, economic and military conditions affecting Israel directly influence us. Any major hostilities involving Israel, a full or partial mobilization of the reserve forces of the Israeli army, the interruption or curtailment of trade between Israel and its present trading partners, or a significant downturn in the economic or financial condition of Israel could adversely affect our business, financial condition and results of operations.

In recent years, there have been hostilities between Israel and Hezbollah in Lebanon and Hamas in the Gaza strip, both of which resulted in rockets being fired into Israel causing casualties and disruption of economic activities. Most recently, in July 2014, an armed conflict commenced between Israel and Hamas. In addition, Israel faces threats from more distant neighbors, in particular, Iran. Also, since 2011, riots and uprisings in several countries in the Middle East and neighboring regions have led to severe political instability in several neighboring states and to a decline in the regional security situation. Such instability may affect the local and global economy, could negatively affect business conditions and, therefore, could adversely affect our operations. To date, these matters have not had any material effect on our business and results of operations; however, the regional security situation and worldwide perceptions of it are outside our control and there can be no assurance that these matters will not negatively affect our business, financial condition and results of operations in the future.

Furthermore, there are a number of countries, primarily in the Middle East, as well as Malaysia and Indonesia, that restrict business with Israel or Israeli companies, and we are precluded from marketing our products to these countries. Restrictive laws or policies directed towards Israel or Israeli businesses may have an adverse impact on our operations, our financial results or the expansion of our business.

Our results of operations may be negatively affected by the obligation of our personnel to perform military service.

Some of our directors, officers and employees in Israel are obligated to perform annual reserve duty in the Israeli Defense Forces, as well as some of the employees of Vexigo, and they may be called for active duty under emergency circumstances at any time. If a military conflict or war arises, these individuals could be required to serve in the military for extended periods of time. Our operations could be disrupted by the absence for a significant period of one or more of our executive officers or key employees or a significant number of other employees due to military service. Any disruption in our operations could adversely affect our business.

Our financial results may be adversely affected by inflation and currency fluctuations.

We report our financial results in dollars, while a portion of our expenses, primarily salaries, are paid in NIS. Therefore, our NIS related costs, as expressed in U.S. dollars, are influenced by the exchange rate between the U.S. dollar and the NIS. The appreciation of the NIS against the U.S. dollar will result in an increase in the U.S. dollar cost of our NIS expenses. We are also influenced by the timing of, and the extent to which, any increase in the rate of inflation in Israel over the rate of inflation in the United States is not offset by the devaluation of the NIS in relation to the dollar. Our dollar costs in Israel will increase if inflation in Israel exceeds the devaluation of the NIS against the dollar or if the timing of such devaluation lags behind inflation in Israel. In the past, the NIS exchange rate with the dollar and other foreign currencies had fluctuated, generally reflecting inflation rate differentials. We cannot predict any future trends in the rate of inflation in Israel or the rate of devaluation or appreciation of the NIS against the dollar. If the U.S. dollar cost of our operations in Israel increases, our dollar measured results of operations will be adversely affected. From time to time, we engage in currency-hedging transactions intended to reduce the effect of fluctuations in foreign currency exchange rates on our financial position and results of operations. However, any such hedging transaction may not materially reduce the effect of fluctuations in foreign currency exchange rates on such results.

The government programs and tax benefits we currently participate in or receive require us to meet several conditions. Such programs may be terminated or reduced in the future and restrict our ability to transfer technology outside of Israel.

We have benefited from certain Israeli Government grants, programs and tax benefits. In the past, until 2010, we received approvals from the Office of the Chief Scientist of the Israeli Ministry of Industry, Trade and Labor for grants for our research and development projects. While 2011 was the last year for which we applied for a grant (and were denied), any future grant applications may not be approved by the Office of the Chief Scientist. To remain eligible for these grants, programs and tax benefits, we must comply with certain conditions, including making specified investments in fixed assets from our own equity and paying royalties with respect to grants received. In addition, some of these programs restrict our ability to manufacture particular products and to transfer particular technology outside of Israel. If we do not meet these conditions in the future, the benefits we received could be canceled and we may have to refund payments previously received under these programs or pay increased taxes. The Government of Israel has reduced the benefits available under these programs in recent years and these programs and tax benefits may be discontinued or curtailed in the future.

Service and enforcement of legal process on us and our directors and officers may be difficult to obtain.

Service of process upon our directors and officers, most of whom reside outside the United States, may be difficult to obtain within the United States. Furthermore, since substantially all of our assets, and the assets of most of our directors and officers, are located outside the United States, any judgment obtained in the United States against us or these individuals or entities may not be collectible within the United States.

There is doubt as to the enforceability of civil liabilities under the Securities Act and the Exchange Act in original actions instituted in Israel. However, subject to certain time limitations and other conditions, Israeli courts may enforce final judgments of United States courts for liquidated amounts in civil matters, including judgments based upon the civil liability provisions of those Acts.

Provisions of Israeli law may delay, prevent or make difficult our acquisition by a third-party, which could prevent a change of control and therefore depress the price of our shares.

Provisions of Israeli corporate and tax law may have the effect of delaying, preventing or making more difficult a merger with us or other acquisition of our shares or assets. This could cause our ordinary shares to trade at prices below the price for which third parties might be willing to pay to gain control of us. Third parties who are otherwise willing to pay a premium over prevailing market prices to gain control of us may be unable or unwilling to do so because of these provisions of Israeli law.

The rights and responsibilities of our shareholders are governed by Israeli law and differ in some respects from the rights and responsibilities of shareholders under U.S. law.

We are incorporated under Israeli law. The rights and responsibilities of holders of our ordinary shares are governed by our memorandum of association, articles of association and Israeli law. These rights and responsibilities differ in some respects from the rights and responsibilities of shareholders in typical U.S. corporations. In particular, each shareholder of an Israeli company has a duty to act in good faith in exercising his or her rights and fulfilling his or her obligations toward the company and other shareholders and to refrain from abusing his power in the company, including, among other things, in voting at the general meeting of shareholders on certain matters. Israeli law provides that these duties are applicable in shareholder votes on, among other things, amendments to a company's articles of association, increases in a company's authorized share capital, mergers and interested party transactions requiring shareholder approval. In addition, a controlling shareholder of an Israeli company or a shareholder who

knows that it possesses the power to determine the outcome of a shareholder vote or who has the power to appoint or prevent the appointment of a director or officer in the company has a duty of fairness toward the company. However, Israeli law does not define the substance of this duty of fairness. Because Israeli corporate law has undergone extensive revision in recent years, there is little case law available to assist in understanding the implications of these provisions that govern shareholder behavior.

As a foreign private issuer, whose shares are listed on the NASDAQ Capital Market, we may follow certain home country corporate governance practices instead of certain NASDAQ requirements. We follow Israeli law and practice instead of NASDAQ Stock Market Rules regarding the requirement to maintain a majority of independent directors, the director nomination process and the requirement to obtain shareholder approval for certain dilutive events.

As a foreign private issuer whose shares are listed on the NASDAQ Capital Market, we are permitted to follow certain home country corporate governance practices instead of certain requirements of the NASDAQ Stock Market Rules. We follow Israeli law and practice instead of the NASDAQ Stock Market Rules regarding the requirement to maintain a majority of independent directors, the director nomination process and the requirement to obtain shareholder approval for certain dilutive events (such as for the establishment or amendment of certain equity based compensation plans, an issuance that will result in a change of control of the company, certain transactions other than a public offering involving issuances of a 20% or more interest in the company and certain acquisitions of the stock or assets of another company). As a foreign private issuer listed on the NASDAQ Capital Market, we may also follow home country practice with regard to, among other things, compensation of officers and quorum at shareholders' meetings. A foreign private issuer that elects to follow a home country practice instead of NASDAQ requirements must submit to NASDAQ in advance a written statement from an independent counsel in such issuer's home country certifying that the issuer's practices are not prohibited by the home country's laws. In addition, a foreign private issuer must disclose in its annual reports filed with the Securities and Exchange Commission, or the SEC, each such requirement that it does not follow and describe the home country practice followed by the issuer instead of any such requirement. Accordingly, our shareholders may not be afforded the same protection as provided under NASDAQ's corporate governance rules.

ITEM 4. INFORMATION ON THE COMPANY

A. History and Development of the Company

Our company was incorporated under the laws of the State of Israel in December 1995. We are a public limited liability company under the Israeli Companies Law and operate under such law and associated legislation. Our registered offices and principal place of business are located at 14 Hatidhar Street, Ra'anana 4366516, Israel, and our telephone number is +972-9-7777-555. Our website address is www.mtsint.com. The information on our website is not incorporated by reference into this annual report.

We are a worldwide provider of solutions for video advertising over the internet and mobile devices and TEM and billing tools and solutions. Our TEM solutions assist enterprises and organizations in making smarter choices with their telecommunications spending at each stage of the service lifecycle, including allocation of cost, proactive budget control, fraud detection, processing of payments and spending forecasting. Our converged billing solutions have been successfully implemented worldwide by wireless providers, Voice over Internet Protocol, Internet Protocol Television, mobile virtual network operators, or MVNOs, and content service providers. Our converged billing solutions include applications for charging and invoicing customers, interconnect billing and partner revenue management using pre-pay and post-pay schemes.

On December 30, 2008, we completed the acquisition of certain assets and liabilities of AnchorPoint, a Massachusetts-based provider of TEM solutions. This acquisition has enabled us to expand our product offerings. The aggregate consideration paid for the acquisition at the closing date was the issuance of 24.4% of our outstanding shares on a post-transaction basis.

In April 2015, we acquired 100% of the outstanding shares of Vexigo, a privately-held Israeli-based software company supporting video advertising over the internet and mobile devices, which continues to operate as our wholly-owned subsidiary. For a discussion of the consideration paid to the shareholders of Vexigo and FPSV

Holdings Ltd. (which held Vexigo shares), or FPSV, please see Item 5B. Operating and Financial Review and Prospects -- Liquidity and Capital Resources.

B. Business Overview

Industry Background

We are a global provider of services and solutions in video advertising over the internet and mobile devices, in the Telecom Expense Management (TEM), Cloud Billing, Mobile Virtual Network Enabler (MVNE), M2M/IoT service providers and Mobile Money markets. Our TEM Suite helps organizations reduce operational expenses, improve productivity and optimize networks and services associated with communications networks and information technology. Our MVNE and Mobile Money offerings enable MVNOs and financial service providers to manage their customers' and resellers' lifecycles. Our M2M/IoT Enablement Platform enables Mobile Network Operators (MNO) and MVNOs to create new revenue streams from selling management services in addition to the connectivity to M2M/IoT service providers.

Through Vexigo, we offer many advertising solutions, including delivery of video advertising campaigns to relevant, brand-receptive digital audiences. Vexigo manages and optimizes its customers' digital marketing campaigns assisting them to maximize the effectiveness of every advertisement delivered to its target audience. Through its proprietary optimization platform, Vexigo is able to perform accurate analysis of video campaigns across different devices and ad exchanges, managing a significant higher amount of campaigns, while driving better monetization for the digital media property owner.

Vexigo also developed the Visualizr tool, which is a mobile publishing platform that allows publishers to present their content as a personalized magazine. Vexigo generally contracts with digital platform owners to provide them with the Visualizr free of charge, in exchange for providing Vexigo with advertising space on their digital platform, thus providing Vexigo with high-quality advertising space that it does not need to compete for. Since acquiring Vexigo, we have been investing in advertising technology that incorporates Big Data analytics into Vexigo's cutting-edge real-time bidding (RTB) optimization technology.

TEM Industry

The advances in communications technologies and the proliferation of mobile devices have greatly increased the financial and personnel resources required by an enterprise to operate and manage its communications environment. The communications industry has also undergone significant regulatory changes that have resulted in the expansion of the number of service providers and available products. Enterprises need to manage an increasing number of service options and a growing volume and complexity of communications contracts and billing arrangements. Inefficient management of these expenses, including overpayments as a result of billing errors, often results in enterprises incurring significant unnecessary expenses.

Enterprises are increasingly seeking solutions to effectively and efficiently manage, control and optimize their expanding communications assets, services, usage and associated expenses. The TEM market provides solutions to help meet this demand. A number of trends have increased the demand for TEM solutions, such as the growing complexity of communications service plans, large volume and complexity of communications bills and the globalization of business that require corporations to manage their communications assets and services in a centralized fashion across carriers, countries of origin and languages.

Call accounting products, which are fundamental management tools, record, retrieve and process data received from a PBX or other telephone switching system. This information provides a telecommunications manager with information on telephone usage and enables the management of internal billing, fraud detection and optimizes an enterprise's telecommunications resources.

Digital Advertising Industry

The advertising market is generally divided into two broad categories: direct response and branding. Direct response advertising is designed to induce specific action, while brand advertising is designed to establish a long-term, positive consumer attitude toward a company or its product or service without a specific call to action. While direct response advertisers measure campaign effectiveness against consumer response to an advertisement's call to action, brand advertisers measure campaign effectiveness against metrics such as reach (how many consumers within the advertiser's target audience were exposed to the advertisement) and frequency (how many times was the consumer within the target audience exposed to the advertisement). Brand advertisers may conduct post-campaign surveys with their target audience to measure how well a campaign increased brand-relevant metrics, such as brand awareness, message recall, brand favorability and purchase intent.

Currently, direct response campaigns, such as search engine marketing, click-through banners and digital coupons, account for the majority of digital advertising. Historically, brand advertisers have relied on television, print and other traditional media to promote their brands, and we believe that digital video advertising remains underpenetrated by brand advertisers compared to traditional media. Brand advertisers' target audiences are spending less time watching traditional television and more time viewing video entertainment on internet connected devices.

Vexigo expects that television brand advertisers will in the future follow their target audiences onto digital video and allocate more of their budgets to digital video advertising. As new solutions address the challenges advertisers face with deploying digital video brand campaigns in a fragmented ecosystem, Vexigo believes this market is poised to capture increasing amounts of TV advertising dollars. U.S. digital video ad spending is expected to increase from \$5.24 billion in 2014 to \$14.77 billion in 2019, according to eMarketer Inc., a market research firm.

MVNE and Mobile Money Market

We provide services to MVNOs and assist them to reduce their time to market, focus on sales and marketing and reduce their initial capital expenses. An MVNO is a wireless communications services provider that does not own radio spectrum or wireless network infrastructure. An MVNO enters into a business agreement with a mobile network operator that owns network infrastructure in order to obtain bulk access to network services at wholesale rates, after which the MVNO sets retail plans and prices independently. The emergence of the MVNO model in various markets worldwide is mostly related to changes in regulations and in the ability of MVNOs to address new market segments that may increase their revenue streams.

The mobile money market targets financial service providers and MVNOs in emerging and developing markets that want to provide financial services. Their customers are mainly individuals that have cell phones but no bank accounts. Mobile money solutions provide services such as deposits, withdrawals, person-to-person transfers, bill payments, purchases of goods and more complex banking services over mobile phones.

M2M/IoT Enablement Platform Market

The rise of the Internet of Things (IoT) phenomenon is a direct result of the unprecedented acceleration of connectivity combined with the ability to embed computing into an endless array of objects. IoT is changing the playing field by redefining the "connected" world to extend far beyond the human realm into the world of "things." IoT is expected to be one of the most disruptive technology trends of the next decade with sweeping implications for businesses. The vision is that IoT will provide businesses with the ability to more effectively monitor and control operations while providing them with more information and control. It will offer innovative opportunities for new sources of revenue, intelligent interaction with customers that improve customer experience and greater efficiencies. However, along with the innumerable opportunities created by IoT come a myriad of challenges.

The IoT ecosystem is fragmented and complex and involves many participants using a range of connected devices. These devices are embedded with sensors, modules and SIMs that deliver new solutions and services all operating in various connectivity environments. The result is more of everything: more devices, transactions, services, applications and connections. The challenge for enterprises and IoT service providers offering M2M-based services is to take the complexity out of IoT.

Cloud Billing Industry

With the increase in bandwidth and the higher availability of cloud computing, enterprises and service providers are looking for cloud billing solutions in order to benefit from the flexibility, resiliency and scalability offered by cloud computing. A positive feature of cloud billing solutions is the change in cost structure from a relatively high upfront

capital expense to a cost effective monthly operational expense. Cloud billing solutions are easily adaptable to a company's offerings, pricing model, discounts and promotions.

Products

Call Accounting and Telecommunications Expense Management Solutions for Enterprises

TEM Suite

Our TEM Suite is a solution that assists organizations to reduce their telecom spending, manage their telecom assets, bill internal and external customers, and monitor the quality of service of their telecom networks. Our TEM Suite includes several modules that can be delivered as a SaaS. The TEM Suite software platform encompasses the business processes conducted by IT and finance departments in acquiring, provisioning and supporting corporate telecommunications assets. Solutions include software suites and the outsourcing of specific tasks to third-party service providers. At the heart of any TEM offering is an automated software platform used by the business or by an external service provider managing a company's telecom invoices and assets. In February 2014, our TEM Suite won a 2014 Product of the Year Award from TMC's "Internet Telephony" magazine.

Our TEM Suite enables IT managers and finance teams to monitor, control and save IT and communication expenses by utilizing the following features and functions:

- **Invoice Management** - Provides enterprises with a simplified and automated tool for monitoring, managing, verifying and routing invoices for payment or correction. Invoice items originate from various sources, which include the telecommunication service provider, the devices used such as calling cards, mobile lines, landlines, circuits as well as services and equipment provided. Our solution provides an analysis of all invoice data against the agreement between the enterprise and the service provider, real device usage, online inventory, as well as additional equipment or services. This reduces overhead costs caused by invoice and contract discrepancies, disputes and errors.
- **Call Accounting**- Collection of call data records directly from PBXs, including rates and pricing of calls, and generation of detailed and summary reports.

Additional features and functions:

- Asset Management
- Cable Management
- Private Calls Management
- My Portal
- VOIP Quality of Service
- Proactive Alerts
- Tenant Resale
- Work Order Management
- Procurement Management

TEM Services

Map-to-WinSM. Customer engagements begin with Map-to-WinSM, which is a strategic consulting approach for our TEM solution. Map-to-WinSM enables organizations to effectively align their business goals with their people, processes and technology investments to assure that their expense management initiatives will be successful. Our proprietary Map-to-WinSM approach ensures that proven business processes are used to define both the customer's and our responsibilities during setup and implementation. This enables our customers to maximize any process improvement opportunities and ensures that nothing is overlooked during this process.

Consulting Services. Consulting services for our TEM solution are designed to assist companies to develop a strategic telecom plan that is right for their needs and to address their tactical requirements as they arise. Our consulting services work closely with internal IT/telecom and finance teams to ensure a successful TEM solution from start to finish. Our TEM consultants support every stage of the TEM lifecycle, using best-practices-based analysis and processes to help leverage the customers' internal processes and technology. The end result is a long-term, measurable TEM strategy. Our consulting services include:

- invoice and inventory audit and recovery;
- contract negotiations and strategic sourcing;
- discovery and road mapping services;
- process diagnosis and solution design;
- wireless optimization; and
- creation and implementation of IT governance, risk and compliance policies.

MVNE and Cloud Billing Solutions

Our MVNE solution allows MVNOs to reduce their time to market, focus on sales and marketing and reduce their initial capital expenses. Our MVNE solution has the following modules:

- Product Catalog
- Point Of Sale
- Customer Service and Self Care
- Asset management
- Billing (prepaid and postpaid)
- Reseller and distributor management

Mobile Money Solution

Our Mobile Money solution, which can be sold separately or as part of our MVNE solution, allows MVNOs or financial service providers to offer their customers the ability to make deposits, withdrawals, person-to-person transfers, bill payments, purchases of goods and more complex banking services over mobile phones.

MTS M2M/IoT Enablement Platform Solution

Our M2M/IoT solution is a comprehensive, proven and highly scalable IoT enablement platform covering all the business, operational, management and analytics requirements of IoT service providers. It seamlessly integrates into any MNO operational environment and enables IoT service providers and enterprises, regardless of their size, service offerings or localization requirements, to deploy Internet-connected devices and easily manage all aspects of machine-to-machine (M2M) interactions. Our M2M/IoT solution provides all the services from a single platform

either from the cloud or from a local data center. Our IoT solution has the following modules:

- SIM Management: Full SIM management functionalities accessible from self-care interfaces including MACD (Move, Add, Change, Delete), activation, life-cycle management, suspend/resume and more, as well as notifications and alerts for connectivity, usage, fraud and security.

- **Location Management (GIS):** Enables the retrieval of geographical information from any SIM or sensor. Capabilities include device virtualization, location historical path, GIS layers management and geo-fencing, as well as notifications and alerts.
- **Flexible Billing Engine:** Accommodates and processes any type of billing structure. Sophisticated product catalog, Rating, Customer care supporting the full customer life cycle operations, Self care, Partner management for full sales channel operations management, Accounting and dunning, Invoicing and billing.
- **Big Data:** Enables gathering, filtering, validating, consolidating as well as auditing and controlling of information (records describing usage and performance events) from various data sources of the service delivery platform and application servers automatically or in near real time.

Services

Cloud and Managed Services

Our TEM, M2M/IoT and MVNE solutions are offered either as a perpetual license or as a managed service. Our operation in the U.S. provides cloud based call accounting, TEM managed services and MVNE services.

Implementation and Maintenance Service

We provide customer support to end-users and channels (distributors and business partners) through support centers located in the United States, Israel and Hong Kong on both a service contract and a per-incident basis. Our technical support engineers answer support calls directly and generally seek to provide same-day responses. We provide updated telephone rate tables to customers on a periodic basis under annual service contracts. The rate tables are obtained from third-party vendors who provide this data for all major long-distance service providers. Our distributors provide a full range of service and technical support functions for our products, including rate tables, to their respective end-user customers.

Vexigo's Solutions

Vexigo's solutions are built for brand advertisers and professional digital media property owners that produce content and applications. Vexigo built its data-science capabilities to deliver reliable campaign results for brand advertisers and monetization for digital media property owners. Vexigo's ads run when users choose to view video content on their internet-connected devices and platforms. Vexigo delivers video advertisements, largely on a pre-roll and in-banner basis, meaning that the advertisements are prominently displayed before the chosen video content is displayed. Utilizing its proprietary campaign management platform, Vexigo's advertiser customers reach large-scale, brand-receptive audiences, and digital media property owners capture brand advertising revenue with their content and applications.

Vexigo's proprietary Visualizr provides customization and optimization solutions to digital media owners. By using its proprietary analytics mechanisms, Vexigo is capable of constructing a visually appealing "magazine" type layout of digital properties for each viewer, and receives, in exchange, rights to utilize the digital platforms on which the Visualizr is installed for advertising space in a variety of monetization options tailored and optimized for each and every digital media owner. Vexigo's Visualizr is a development in webpage customization and optimization which is the product of extensive research and development commitment.

We believe that Vexigo's solutions are distinctive and have advantages which other solutions cannot offer. Vexigo's advanced optimization technology is capable of simultaneously analyzing a high number of single

impressions, effectively and efficiently determining each impression's quality and matching relevant advertiser to it. Vexigo believes that this leads to high user engagement, higher CPMs and better monetization on an uninterrupted basis, utilizing even those media properties which competitors overlook.

The solutions offered by Vexigo to digital media property owners and advertisers provide the following benefits:

- Vexigo's advanced automation technology allows for utilization of a wide range of digital media properties on a 24/7 basis;

- Digital media property owners enjoy Vexigo's solutions to effectively verify, validate, filter and sift through large quantities of media, thus obtaining high quality media that is appropriate to the nature of their properties, with lower quality or fraudulent media being eliminated by Vexigo's technology in the process;

- Vexigo offers digital advertisers an exceptional package of advertising opportunities by aggregating digital media property categories, providing an optimized solution and avoiding the need to manually select relevant media properties for advertising; and

- Vexigo's Visualizr enables mobile accessibility of digital media and provides advanced personalization and customization capabilities of digital properties, across a wide range of desktop, mobile and wearable internet-connected devices.

Vexigo's Strategy

Vexigo intends to pursue its business model by, among other things:

- continuing to leverage its business model and advanced proprietary technology as its customers allocate their digital marketing expenditure towards higher quality and more personalized exposures. Through its proprietary video optimization platform, Vexigo aims to attract new customers to its business, as well as capture a bigger share of its existing customers' advertising budgets by providing optimized results for advertisers and higher revenue sharing arrangements for digital property owners. By furthering the penetration of its proprietary Visualizr, Vexigo believes it will enhance advertising, revenue sharing and other monetization opportunities;

- increasing the number of digital advertising sources in its network to ensure its customers have access to a large and diversified supply of advertisements across a wide variety of media channels. This includes plans to strengthen Vexigo's relationships with advertising exchanges and direct advertisers. By expanding its network of digital advertisers, Vexigo believes it will strengthen its market profile as an independent digital marketing company with low dependency on any one advertising source and attract additional customers seeking a large and diversified network of digital media; and

- advancing its technological capabilities by continuing to invest in research and development efforts, which serve as the basis for its efforts to further enhance its existing platform and develop new platforms for publishers. Vexigo's video player has served over 400 advertisers and advertising agencies in over 20 countries with more than 8,000 domains, and ads served by it have generated over 3 billion video impressions around the world.

Sales and Marketing

Telecommunications Solutions

We rely on business partners, our existing customer base and new direct customers for our sales activities. We believe that partnering with business partners is the most advantageous means to generate new sales of our solutions. In addition, our broad base of previously installed solutions, primarily in the United States, provides us with opportunities to offer and sell any new products, solutions and services.

We sell our solutions worldwide through OEMs, distribution channels and our own direct sales force in the United States, Israel and Hong Kong, and through a network of local distributors in these and various other countries. We employed 14 persons in sales and marketing and 26 persons in support as of December 31, 2015, as compared to 12 persons in sales and marketing and 19 persons in support as of December 31, 2014 and 11 persons in sales and marketing and 20 persons in support as of December 31, 2013.

We conduct a wide range of marketing activities aimed at generating awareness and leads. We maintain our websites (www.mtsint.com and www.mtsbill.com), allowing for correspondence and queries from new potential customers as well as promoting support for our existing customer base. The information on our websites is not incorporated by reference into this annual report. In addition, we participate in certain tradeshows in order to increase our exposure to other market participants and potential customers.

Online Advertising Solutions

Vexigo's marketing strategy is focused on increasing awareness of its platform and monetization tools in order to expand its customer base and increase advertiser and digital media owner loyalty. Vexigo sells to its customers primarily through its direct sales force personnel, who have established relationships with major ad agencies and direct relationships with advertisers, as well as digital media platform owners.

Vexigo's Visualizr solution is promoted through digital marketing campaigns, including on sites and networks such as Google and Facebook, as well as by displays in industry trade shows and forums, and by direct contact with digital media property owners through Vexigo's sales force and business development personnel. Vexigo's website is maintained at www.vexigo.com/ and www.visualizr.me/. The information on Vexigo's websites is not incorporated by reference into this annual report.

Competition

Telecommunications Solutions

The Global TEM solution and services market is highly competitive and includes recognized leaders such as Tangoe, Inc. and Emptoris Rivermine (IBM's TEM Solution), covered by industry analysts such as Gartner. As an outcome, we focus on our existing installed base and partnerships to grow our business. We invest in the robustness of our products and the professionalism of our managed service team, to increase our value to our customers. There can be no assurance that we will be able to compete successfully against current or future competitors or that competition will not adversely affect our future revenues and, consequently, on our business, operating results and financial condition.

Our strategy is to focus on selling our M2M/IoT enablement platform to small and medium MNOs and in parallel to M2M/IoT service providers by playing the role of a M2M MVNO that will sell data connectivity with management and billing services. We believe that our principal competitor in this highly competitive market is Jasper Technologies, Inc. The MVNO market is also growing very fast and the principal competitors include Wyless Inc., RacoWireless and Aeris Communications Inc. We believe that our robust solution is a good fit for SMB M2M/IoT service providers. There can be no assurance that we will be able to compete successfully against our current or future competitors.

Online Advertising Solutions

Vexigo operates in a dynamic and competitive market, influenced by trends in both the overall advertising industry as well as the digital video advertising market. Vexigo competes with networks such as Matomy, DMG, 24/7 and bRealTime, as well as other ad networks. Vexigo also faces competition from direct response advertising providers who seek to target brands. Some large advertising agencies, which may represent Vexigo's current customers, build their own relationships with digital media properties and can directly connect advertisers with digital media properties. Other companies that offer analytics, mediation, exchange or other third party solutions are or may become intermediaries between advertisers and digital media properties and thereby compete with Vexigo.

In addition, many of the players in the digital advertising market also compete in the performance-based segment including:

- large and well-established technology companies, such as Facebook, Google, Twitter and Yahoo!;
- advertising agencies, such as Omnicom, Publicis and WPP;
- digital marketing companies, such as Conversant, Criteo, Millennial Media, Rocket Fuel, XL Marketing, YuMe and Zanox; and

- other players, including Vexigo’s existing digital media sources, who also compete in the digital performance-based marketing segment through their relationships with advertisers.

We believe that the principal competitive factors in the industry in which Vexigo operates include effective audience targeting capabilities, brand-oriented tools and user interface, multi-device campaign delivery capability, platform independence, proven and scalable technologies, audience scale and reach, relationships with leading brand advertisers and their respective agencies, brand awareness and reputation. Vexigo believes that it competes favorably with respect to all of these factors and that it is well-positioned as an independent provider of digital video brand advertising solutions.

Vexigo’s proprietary Visualizr faces competition from companies which provide similar webpage visualization capabilities, including Kargo, Onswipe and Padsquad. Vexigo believes that its personalization and customization technological capabilities position it as a market leader and provide a significant advantage over its competition.

Intellectual Property Rights

We believe that, because of the rapid pace of technological change in the communication industry, the most significant factors in our intellectual property rights are the knowledge, ability and experience of our employees, the frequency of product enhancements and the timeliness and quality of support services provided by us. In addition, we rely upon a combination of security devices, copyrights, trademarks, patents, trade secret laws, confidentiality procedures and contractual restrictions to protect our rights in our products. In 2005, we filed an international patent application (PCT application), relating to a mobile verification technique that verifies mobile phone usage against the bill received from the service provider. Our policy has been to pursue copyright protection for our software and related documentation and trademark registration of our product names. Some of our products have the added protection afforded by a hardware component which has embedded software that it is difficult to misappropriate. In addition, our key employees and independent contractors are required to sign non-disclosure and confidentiality agreements.

Our trademark rights include rights associated with the use of our trademarks and rights obtained by registration of our trademarks in Israel and the United States. We have also acquired rights in certain registered trademarks and common law trademarks and service marks in past acquisitions. The use and registration rights of our trademarks does not ensure that we have superior rights over other third parties that may have registered or used identical related marks on related goods or services. Trademark rights are territorial in nature; therefore we do not have rights in all jurisdictions.

Vexigo considers its proprietary technology to be important to the development of its video platform and Visualizr and seeks to protect such technology through trade secrets, confidentiality agreements and other contractual arrangements with its employees, consultants, publishers, end users and others. Vexigo has one registered patent in the United States. Vexigo’s management believes that, while a patent may provide it with a competitive advantage, its success depends primarily on its marketing, business development, applications, know-how and ongoing research and development efforts. There can be no assurance that Vexigo’s future patents or other intellectual property rights will afford it a meaningful competitive advantage.

Government Regulation

The online advertising field is subject to federal, European and other regulation, including with respect to privacy and data protection and targeting minors and children, for example, the Children's Online Privacy Protection Act of 1998. Several governments are considering legislation related to digital advertising and certain media advertising organizations, such as the Network Advertising Initiative and the Interactive Advertising Bureau, adopted “best

practice” guidelines with which Vexigo may be required to comply pursuant to current or future contractual undertakings. Key market players, such as Google, have in the past and may in the future implement technical measures in their products that limit the options, opportunities and access of online advertisers. Vexigo collects, stores, transmits, and uses information related to computing and communications devices, user activity on devices, and advertisements placed through Vexigo’s solutions in order to enhance the accuracy of our demographic categorization of websites and Internet users. In addition, Vexigo’s customers may elect to use their own data about target audiences collected by them or by third-party data companies to target advertisements to particular audiences. Although Vexigo does not use data that can be used to identify specific people, the definition of personally identifiable information, or personal data, varies by country and is evolving, and therefore could be exposed to claims based on local current or future privacy regulation. The collection and use of data about Internet users has come under scrutiny by consumer advocacy organizations and regulatory agencies in various countries, including the U.S., that focus on online privacy.

Vexigo's technology currently does not use cookies, which are small files of information placed on an internet user's computer, to collect information about the user's visits to websites, however, Vexigo may wish to use cookies in the future in order to improve and expand its services. In addition, advertisers who place ads using Vexigo's services do use cookies placed by them on the targeted users' computers. Various advocacy and consumer protection groups have in recent years voiced concern about the use of cookies and other online tools to record users' browsing history, and the use of that information to deliver advertisements online based on inferred interests of each user.

C. Organizational Structure

Our wholly-owned subsidiaries in the United States, Hong Kong and the Netherlands, MTS IntegraTRAK Inc., MTS Asia Ltd. and Bohera B.V., respectively, act as marketing and customer service organizations in those countries. Vexigo Ltd. is our wholly-owned subsidiary in Israel which provides our video advertising business. We hold Vexigo's shares partially directly and also indirectly through our 100% ownership of FPSV, who's only material asset is its holdings in Vexigo.

D. Property, Plants and Equipment

Our executive offices and research and development facilities are located at 14 Hatidhar Street, Ra'anana, Israel. We lease 5,490 square feet under a lease that expires in February 2017 at an annual rental charge of approximately \$127,000.

Our U.S. subsidiary, MTS IntegraTRAK, occupies approximately 2,944 square feet of space in River Edge, New Jersey for a monthly rental fee of approximately \$4,800 under a lease terminating in February 2019. We also have an office in Glendale, California, where we occupy approximately 400 square feet of space, under a month-to-month lease for a monthly rental fee of approximately \$750. In addition, we have an office in Powder Springs, Georgia, where we occupy approximately 4,800 square feet of space under a month-to-month lease for a monthly rental fee of approximately \$4,700. Vexigo leases facilities in Nes Ziona, Israel under lease agreements which expire on May 31, 2016, on September 30, 2016 and on and on January 14, 2019 and for which the aggregate annual rent amount is approximately \$87,000.

ITEM 4A. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

A. Operating Results

The following discussion of our results of operations should be read together with our audited consolidated financial statements and the related notes, which appear elsewhere in this annual report. The following discussion contains forward-looking statements that reflect our current plans, estimates and beliefs and involve risks and uncertainties. Our actual results may differ materially from those discussed in the forward-looking statements. Our past results may not be indicative of future results. Factors that could cause or contribute to such differences include those discussed below and elsewhere in this annual report.

Background

We were organized under the laws of the State of Israel in December 1995, as a subsidiary of C. Mer Industries Ltd., an Israeli public company (TASE: MER). Since our initial public offering in May 1997, our ordinary shares have

been listed on the NASDAQ Stock Market (symbol: MTSL) and are presently listed on the NASDAQ Capital Market.

We operate in three business segments. Our Telecom Business operates in two operation-based segments: Enterprise (TEM) Division and Service Providers (Billing) Division. Our Enterprise segment includes TEM solutions and services and our Service Providers segment includes billing, MVNO and IoT/M2M services and solutions. Following the acquisition of Vexigo in April 2015, we operate in a third operation-based segment of Video Advertising. We have wholly-owned subsidiaries in Israel, the United States, Hong Kong and the Netherlands, which act as marketing and customer service organizations in those countries. We also operate the Vexigo business as a wholly-owned subsidiary in Israel.

General

Our consolidated financial statements appearing in this annual report are prepared in U.S. dollars and in accordance with generally accepted accounting principles in the United States, or U.S. GAAP. Transactions and balances originally denominated in dollars are presented at their original amounts. Transactions and balances in other currencies are re-measured into dollars in accordance with the principles set forth in Financial Accounting Standards Board, or FASB, Accounting Standards Codification, or ASC, Topic 830, "Foreign Currency Translation." The majority of our sales are made outside Israel in dollars. In addition, substantial portions of our costs are incurred in dollars. Since the dollar is the primary currency of the economic environment in which we and certain of our subsidiaries operate, the dollar is our functional and reporting currency and, accordingly, monetary accounts maintained in currencies other than the dollar are re-measured using the foreign exchange rate at the balance sheet date. Operational accounts and non-monetary balance sheet accounts are measured and recorded at the exchange rate in effect at the date of the transaction. The financial statements of certain subsidiaries, whose functional currency is not the dollar, have been translated into dollars. All balance sheet accounts have been translated using the exchange rates in effect at the balance sheet date. Statement of operations amounts have been translated using the average exchange rate for the period. The resulting translation adjustments are reported as a component of shareholders' equity in accumulated other comprehensive income (loss).

Overview

Telecom Business: TEM (Enterprise) and Billing (Service Providers) Divisions

We are a worldwide provider of TEM solutions which assist enterprises and organizations to make smarter choices with their telecommunications spending at each stage of the service lifecycle, including allocation of cost, proactive budget control, fraud detection, processing of payments and spending forecasting.

Our converged billing solutions have been successfully implemented worldwide by wireless providers, Voice over Internet Protocol, or VOIP, Internet Protocol Television, or IPTV, MVNO and content service providers. Our converged billing solutions include applications for charging and invoicing customers, interconnect billing and partner revenue management using pre-pay and post-pay schemes as well as IoT/M2M services and solutions.

Video Advertising

Vexigo, which we acquired on April 1, 2015, is a provider of digital video advertising solutions for large and small brand advertisers, advertising agencies and other businesses around the world that promote or sell products and/or services to consumers through digital media, such as websites, mobile apps and social media networks and digital media properties. Through a sophisticated platform of proprietary embedded software, data science and machine learning algorithms, Vexigo delivers video advertising campaigns to relevant, brand-receptive digital audiences.

Vexigo generates revenue by delivering digital video advertisements on internet-connected devices. Vexigo's ads run when users choose to view video content on their devices. Advertising customers submit ad insertion orders to Vexigo and Vexigo fulfills those orders by delivering the customers' digital video advertisements to audiences available through digital media properties, a process referred to as an advertising campaign. Vexigo is typically paid on a cost per thousand advertising impressions basis, or CPM. In most cases Vexigo pays the publishers a fixed price for advertising space, however in certain cases Vexigo agrees on a revenue share arrangement with publishers where the payment to the publishers is based on CPM.

Key Factors Affecting Our TEM and Billing Businesses

Our operations and the operating metrics discussed below have been, and will likely continue to be, affected by certain key factors as well as certain historical events and actions. The key factors affecting our business and our results of operations include, among others, competition, government regulation, the build out of infrastructures, macro-economic and political risks, churn, seasonality, impact of currency fluctuations and inflation, effective corporate tax rate, conditions in Israel and trade relations. For further discussion of the factors affecting our results of operations, see “Risk Factors.”

Billing and MVNO Services

Our converged billing solutions include applications for charging and invoicing customers, interconnect billing and partner revenue management using pre-pay and post-pay schemes. In addition, we provide services to MVNOs and assist them to reduce their time to market, focus on sales and marketing and reduce their initial capital expenses. The emergence of the MVNO model in various markets worldwide is mostly related to changes in regulations and in the ability of MVNOs to address new market segments that may increase their revenue streams. Our first MVNO customer was Simple Mobile, a U.S.-based MVNO, for whom we provided MVNE services. In 2012 and 2013, sales attributable to Simple Mobile accounted for approximately 22.8% and 33.3% of our revenues, respectively. During 2012, Simple Mobile was acquired by TracFone and in 2013 TracFone migrated the hosted billing services to their own platform and did not renew their agreement with us. We are continuing our efforts to gain new customers for our MVNO services, but our future success cannot be assured. So far, we were not able to replace the revenues generated by Simple Mobile, and therefore our operating results and financial condition were adversely affected.

TEM Call Accounting Solutions

The majority of the TEM (Enterprise) Division revenues are derived from our TEM call accounting solutions, whose revenues declined each year from 2006 through 2015 and revenues for these products may not grow in the future. If the market for our TEM solutions fails to grow or stabilize in the future, our business, operating results and financial condition would be adversely affected. Our future financial performance will be dependent to a substantial degree on the successful introduction, marketing and customer acceptance of our TEM call accounting solutions.

Competition

The market for telemanagement products and invoice management solutions is fragmented and is intensely competitive. Competition in the industry is generally based on product performance, depth of product line, technical support and price. We compete both with international and local competitors (including providers of telecommunications services), many of whom have significantly greater financial, technical and marketing resources than us. We anticipate continuing competition in the telemanagement products and invoice management solution market and the entrance of new competitors into the market. Our existing and potential customers, including business telephone switching system manufacturers and vendors, may be able to develop telemanagement products and services that are as effective as, or more effective or easier to use than, those offered by us. Such existing and potential competitors may also enjoy substantial advantages over us in terms of research and development expertise, manufacturing efficiency, name recognition, sales and marketing expertise and distribution channels. We may not be able to compete successfully against current or future competitors and that competition may adversely affect our future revenues and, consequently, on our business, operating results and financial condition.

Proprietary Rights and Risks of Infringement

We believe that, because of the rapid pace of technological change in the communications industry, the most significant factors in our intellectual property rights are the knowledge, ability and experience of our employees, the frequency of product enhancements and the timeliness and quality of support services provided by us. We rely upon a combination of security devices, copyrights, trademarks, patents, trade secret laws, confidentiality procedures and contractual restrictions to protect our rights in our products. We try to protect our software, documentation and other written materials under trade secret and copyright laws, which afford only limited protection. It is possible that others will develop technologies that are similar or superior to our technology. Unauthorized parties may attempt to copy aspects of our products or to obtain and use information that we regard as proprietary. It is difficult to police the unauthorized use of our products, and we expect software piracy to be a persistent problem, although we are unable to determine the extent to which piracy of our software products exists. In addition, the laws of some foreign countries do not protect our proprietary rights as fully as do the laws of the United States. Our means of protecting our proprietary rights in the United States or abroad may not be adequate or our competition may independently develop similar technology.

It is possible that third parties will claim infringement by us of their intellectual property rights. We believe that software product developers will increasingly be subject to infringement claims as the number of products and competitors in our industry segment grows and the functionality of products in different industry segments overlaps. Any such claims, with or without merits, could: (i) result in costly litigation; (ii) divert management's attention and resources; (iii) cause product shipment delays; or (iv) require us to enter into royalty or licensing agreements. Such royalty or licensing agreements, if required, may not be available on terms acceptable to us, if at all. If there is a successful claim of product infringement against us and we are not able to license the infringed or similar technology, our business, operating results and financial condition would be adversely affected. We are not aware that we are infringing upon any proprietary rights of third parties.

Key Factors Affecting Our Video Advertising Business

Video advertising Solutions

The majority of this division's revenues are derived from delivery of video advertising campaigns to relevant, brand-receptive digital audiences. Vexigo manages and optimizes its customers' digital marketing campaigns to maximize the effectiveness of every advertisement to its target audience. However, Vexigo relies on "Demand Side Platforms," or DSPs, and "Video Ad Exchanges" to purchase its solutions on behalf of advertising agencies or advertisers and expects to continue to rely on a few major suppliers of its advertising space and a small number of customers for a significant portion of its revenue. As a result, if Vexigo fails to successfully attract or retain new or existing suppliers and customers, if the existing major supplier terminates or materially alters its commercial relationship with Vexigo or if existing customers run fewer advertising campaigns with Vexigo, defer or cancel their insertion orders, or terminate their relationship with Vexigo altogether, whether through the actions of their agency representatives or otherwise, Vexigo will be required to compensate for the loss of advertising space or revenue by creating commercial relationships with new suppliers and attracting new customers. If Vexigo is not successful in timely locating quality substitute suppliers or customers, Vexigo's business, financial condition and results of operations would be negatively affected.

Competition

Vexigo operates in a dynamic and competitive market, influenced by trends in both the overall advertising industry as well as the digital video advertising market. Vexigo competes with networks such as Matomy, DMG, 24/7 and bRealTime, as well as other ad networks. Vexigo also faces competition from direct response advertising providers who seek to target brands. Some large advertising agencies, which may represent Vexigo's current customers, build their own relationships with digital media properties and can directly connect advertisers with digital media properties. Other companies that offer analytics, mediation, exchange or other third party solutions are or may become intermediaries between advertisers and digital media properties and thereby compete with Vexigo.

Proprietary Rights and Risks of Infringement

The digital advertising industry is characterized by the existence of large numbers of patents, copyrights, trademarks, trade secrets and other intellectual property and proprietary rights. Companies in this industry are often required to defend against litigation claims that are based on allegations of infringement or other violations of intellectual property rights. Vexigo's technologies may not be able to withstand any third-party claims or rights against their use.

Third parties may assert claims of infringement or misappropriation of intellectual property rights in proprietary technology against Vexigo for which Vexigo may be liable or have an indemnification obligation. Vexigo cannot assure you that it is not infringing or violating any third-party intellectual property rights. From time to time, Vexigo may be subject to legal proceedings relating to Vexigo's solution or underlying technology and the intellectual

property rights of others, particularly as it expands the complexity and scope of its business. As a result of the Vexigo Transaction, Vexigo's business and financial condition may become more visible, which may result in threatened or actual litigation, including by competitors and other third parties.

Seasonality

Our operating results from our TEM and Billing Division are generally not characterized by a seasonal pattern except that our volume of sales in Europe is generally lower in the summer months. Vexigo's online advertising business is affected by the seasonality in the advertising market, with higher revenue in the summer months (June-August), in connection with special summer campaigns, and winter months (November-December), when many advertisers spend the largest proportion of their advertising budgets in anticipation of the holiday shopping season. The increase in the winter months is usually followed by a decrease in revenue in the first calendar quarter.

Results of Operations

The following table presents certain financial data expressed as a percentage of total revenues for the periods indicated:

| | Year Ended December 31, | | | | | |
|---|-------------------------|---|-------|---|-------|---|
| | 2013 | | 2014 | | 2015 | |
| Revenues: | | | | | | |
| Telecom Product sales | 16.6 | % | 19.7 | % | 11.4 | % |
| Telecom Services | 83.4 | % | 80.3 | % | 40.9 | % |
| Video Advertising, net | 0 | % | 0 | % | 47.7 | % |
| Total revenues | 100.0 | % | 100.0 | % | 100.0 | % |
| Cost of revenues: | | | | | | |
| Telecom Product sales | 6.2 | | 7.2 | | 4.3 | |
| Telecom Services | 26.1 | | 33.7 | | 20.7 | |
| Video Advertising | - | | - | | 32.2 | |
| Total cost of revenues | 32.3 | | 40.9 | | 57.2 | |
| Gross profit | 67.7 | | 59.1 | | 42.8 | |
| Selling and marketing | 17.4 | | 26.4 | | 15.1 | |
| Research and development | 11.1 | | 19.6 | | 12.3 | |
| General and administrative | 25.5 | | 34.8 | | 23.5 | |
| Goodwill impairment, net of evaluation of contingent consideration. | -- | | -- | | 23.9 | |
| Operating income (loss) | 13.7 | | (21.7 |) | (32.0 |) |
| Financial income (expenses), net | 0.5 | | (1.3 |) | (0.1 |) |
| Income (loss) before taxes on income | 14.2 | | (23.0 |) | (32.1 |) |
| Taxes on income, net | 3.5 | | 0.8 | | 1.3 | |
| Net income (loss) from continuing operations | 10.7 | | (23.8 |) | (33.4 |) |
| Net income from discontinued operations | 0.6 | | 1.1 | | 1.2 | |
| Net income (loss) | 11.3 | | (22.7 |) | (32.2 |) |

Year Ended December 31, 2015 Compared with Year Ended December 31, 2014

Revenue. Revenues from products and services consist primarily of software license fees and advertising campaigns sales and revenues from services, including managed services, hosting, consulting, maintenance, training, professional services and support. Revenues increased by 107.0% to \$14.7 million for the year ended December 31, 2015 from \$7.1 million for the year ended December 31, 2014. The increase in revenues in 2015 is primarily attributable to the acquisition of Vexigo.

Revenues from our Enterprise (TEM) segment increased by 4.5% to \$6.9 million, or 46.9% of our total revenues, for the year ended December 31, 2015 from \$6.6 million, or 93.0% of our total revenues, for the year ended December 31,

2014. Revenues from our Service Providers (Billing) segment increased by 60% to \$0.8 million, or 5.4% of our total revenues, for the year ended December 31, 2015 from \$0.5 million, or 7.0% of our total revenues, for the year ended December 31, 2014. Revenues from products and services from our wholly-owned U.S. subsidiary, MTS IntegraTrak increased by 7.1% to \$6.0 million, or 40.8% of our total revenues, for the year ended December 31, 2015 from \$5.6 million, or 78.9% of our total revenues, for the year ended December 31, 2014. From the date of acquisition, revenues from Vexigo were \$7.0 million, or 47.6% of our total revenues for the year ended December 31, 2015.

Cost of Revenues. Cost of revenues increased by 189.7% to \$8.4 million for the year ended December 31, 2015 from \$2.9 million for the year ended December 31, 2014. The increase in cost of revenues in 2015 is primarily attributable to the acquisition of Vexigo. Cost of revenues of our Enterprise (TEM) and Service Providers (Billing) segments consist primarily of (i) production costs and payments to subcontractors; (ii) certain royalties and licenses payable to third parties (including Asentinel and the Office of the Chief Scientist of the Ministry of Industry, Trade and Labor of the State of Israel, or the OCS), (iii) professional services costs; and (iv) support costs. Vexigo's cost of revenues consists primarily of (i) cost of advertising spaces; and (ii) salaries of employees engaged in on-going media activities. Cost of revenues of our Enterprise (TEM) and Service Providers (Billing) segments increased by 27.6% to \$3.7 million for the year ended December 31, 2015 compared to \$2.9 million for the year ended December 31, 2014. Cost of revenues from Vexigo's Video Advertising solution were \$4.7 million for the period since the date of acquisition and until the end of 2015.

Research and Development. Research and development expenses consist primarily of salaries of employees engaged in on-going research and development activities, outsourced subcontractor development and other related costs. Research and development expenses increased by 28.6% to \$1.8 million for the year ended December 31, 2015 from \$1.4 million for the year ended December 31, 2014. The increase in research and development expenses is primarily attributable to additional research and development expenses related to Vexigo. Research and development expenses are presented net of capitalized expenses in the amount of \$411,000 for the year ended December 31, 2015 compared to zero capitalized expenses for the year ended December 31, 2014. We expect that our research and development expenses will increase in 2016 compared to 2015.

Selling and Marketing. Selling and marketing expenses consist primarily of costs relating to sales representatives and their travel expenses, trade shows and marketing exhibitions and presales support. Selling and marketing expenses increased by 15.8% to \$2.2 million for the year ended December 31, 2015 from \$1.9 million for the year ended December 31, 2014, mainly as a result of the Vexigo acquisition. We expect that our selling and marketing expenses will increase in 2016 compared to 2015.

General and Administrative. General and administrative expenses consist primarily of compensation costs for administrative, finance and general management personnel, professional fees and office maintenance and administrative costs. General and administrative expenses increased by 40.0% to \$3.5 million for the year ended December 31, 2015 from \$2.5 million for the year ended December 31, 2014. The increase in general and administrative expenses is primarily attributable to additional merger and acquisition costs and additional general and administrative personnel related to Vexigo's business. We expect our general and administrative expenses will remain at the same level in 2016 compared to 2015.

Goodwill impairment, net of evaluation of contingent consideration. Following an annual impairment test of goodwill and other intangible assets that we performed, and in light of the significant changes in the video advertising market, the reduced gross margins in the video advertising business we experienced in the last months of 2015 and the decrease in the market price of our ordinary shares, we recognized \$6.3 million of goodwill impairment. No impairments were recognized in 2014.

The terms of the Vexigo SPA require us to pay the former Vexigo shareholders Earn-out Payments equal to 45% of the EBITDA from the Vexigo Products Line (as such term is defined in the Vexigo SPA) for a period of 5.5 years from the closing date of the acquisition of Vexigo, subject to certain limitations and up to a cap of \$16 million. Under ASC 805-30-35-1, consideration transferred that is accounted for as part of the business combination transaction is adjusted for changes in the fair value of contingent consideration during the measurement period. We performed a valuation study as of December 31, 2015 and as a result, we reduced the contingent earn-out liability by \$2.8 million. Contingent consideration is classified as a liability and may be adjusted to fair value at each reporting date through earnings, until the contingency is resolved and may affect our results in the future.

Financial Income (Expenses), Net. Financial income (expenses), net consists primarily of interest income on bank deposits, foreign currency translation adjustments, other interest charges and the financial income (expenses) from option contracts or other foreign hedging arrangements. We recorded \$17,000 of financial expenses, net for the year ended December 31, 2015, compared to \$95,000 of financial income, net for the year ended December 31, 2014. Our financial expense in 2015 and financial income in 2014 is primarily attributable to exchange rate and foreign currency translation adjustments.

Taxes on Income. We recorded taxes on income of \$194,000 for the year ended December 31, 2015, compared to taxes on income of \$54,000 for the year ended December 31, 2014. Our taxes on income for the year ended December 31, 2015 are primarily attributable to Vexigo's income taxes and changes in deferred tax liability. Our taxes on income for the year ended December 31, 2014 are primarily attributable to state income taxes paid by our subsidiary in the U.S.

Net Income from Discontinued Operations. We recorded net income from discontinued operations of \$177,000 in the year ended December 31, 2015, compared to net income from discontinued operations of \$80,000 in the year ended December 31, 2014.

Year Ended December 31, 2014 Compared with Year Ended December 31, 2013

Revenues. Our TEM and Billing Divisions revenues from products and services consist primarily of software license fees sales and revenues from services, including managed services, hosting, consulting, maintenance, training, professional services and support. Revenues from products and services decreased by 43.2% to \$7.1 million for the year ended December 31, 2014 from \$12.5 million for the year ended December 31, 2013. Revenues from our Enterprise segment decreased by 15.4% to \$6.6 million, or 93.0% of our total revenues, for the year ended December 31, 2014 from \$7.8 million, or 62.4% of our total revenues, for the year ended December 31, 2013. Revenues from our Service Providers segment decreased by 89.4% to \$0.5 million, or 7.0% of our total revenues, for the year ended December 31, 2014 from \$4.7 million, or 37.6% of our total revenues, for the year ended December 31, 2013. Revenues from products and services in the U.S. decreased by 48% to \$5.6 million, or 78.9% of our total revenues, for the year ended December 31, 2014 from \$10.8 million, or 86.4% of our total revenues, for the year ended December 31, 2013. Our revenues and our Service Providers segment revenues decreased in 2014 primarily as a result of the loss of Simple Mobile as a customer.

Cost of Revenues. Cost of revenues of our TEM And Billing Divisions for products and services consists primarily of (i) production costs and payments to subcontractors; (ii) certain royalties and licenses payable to third parties (including Asentinel and the Office of the Chief Scientist of the Ministry of Industry, Trade and Labor of the State of Israel, or the OCS), (iii) professional services costs; and (iv) support costs. Cost of revenues from products and services decreased by 27.5% to \$2.9 million for the year ended December 31, 2014 from \$4.0 million for the year ended December 31, 2013. The decrease in cost of revenues from products and services is primarily attributable to our ceasing to provide services to Simple Mobile during 2013. We expect that our cost of revenues for our legacy business will remain at the same level in 2015 as in 2014.

Research and Development. Research and development expenses consist primarily of salaries of employees engaged in on-going research and development activities, outsourced subcontractor development and other related costs. Research and development expenses remained at \$1.4 million for the years ended December 31, 2014 and 2013. We expect that our research and development expenses will decrease in 2015 compared to 2014, but will increase if the Vexigo transaction closes.

Selling and Marketing. Selling and marketing expenses consist primarily of costs relating to sales representatives and their travel expenses, trade shows and marketing exhibitions and presales support. Selling and marketing expenses decreased by 13.6% to \$1.9 million for the year ended December 31, 2014 from \$2.2 million for the year ended December 31, 2013. We expect to report an increase in our selling and marketing expenses in 2015.

General and Administrative. General and administrative expenses consist primarily of compensation costs for administration, finance and general management personnel, professional fees and office maintenance and administrative costs. General and administrative expenses decreased by 22% to \$2.5 million for the year ended December 31, 2014 from \$3.2 million for the year ended December 31, 2013. We expect an increase in our general

and administrative expenses in 2015 compared to 2014.

Financial Income (Expenses), Net. Financial income, net consists primarily of interest income on bank deposits, foreign currency translation adjustments, other interest charges and the financial income (expenses) from option contracts or other foreign hedging arrangements. We recorded \$95,000 of financial expenses, net for the year ended December 31, 2014, compared to \$61,000 of financial income, net for the year ended December 31, 2013. Our financial expense in 2014 and financial income in 2013 is primarily attributable to exchange rate and foreign currency translation adjustments.

Taxes on Income. We recorded taxes on income of \$54,000 for the year ended December 31, 2014, compared to taxes on income of \$435,000 for the year ended December 31, 2013. Our taxes on income for the year ended December 31, 2014 are primarily attributable to state income taxes paid by our subsidiary in the U.S.

Net Income from Discontinued Operations. We recorded net income from discontinued operations of \$80,000 in the year ended December 31, 2014, compared to net income from discontinued operations of \$73,000 in the year ended December 31, 2013. The income from discontinued operations was attributable to the decrease in certain contingent liabilities of our Brazilian subsidiary, TABS Brazil Ltda., whose operations were discontinued in March 2009.

Impact of Currency Fluctuation and of Inflation

We report our financial results in dollars and receive payments in dollars for most of our sales, while a portion of our expenses, primarily salaries, are paid in NIS. Therefore, the dollar cost of our operations in Israel is influenced by the extent to which any increase in the rate of inflation in Israel is not offset, or is offset on a lagging basis, by a devaluation of the NIS in relation to the dollar. When the rate of inflation in Israel exceeds the rate of devaluation of the NIS against the dollar, the dollar cost of our operations in Israel increase. If the dollar cost of our operations in Israel increases, our dollar-measured results of operations will be adversely affected. We cannot assure you that we will not be materially and adversely affected in the future if inflation in Israel exceeds the devaluation of the NIS against the dollar or if the timing of the devaluation lags behind inflation in Israel.

The following table presents information about the rate of inflation in Israel, the rate of devaluation or appreciation of the NIS against the dollar, and the rate of inflation in Israel adjusted for the devaluation:

| Year ended December 31, | Israeli inflation rate % | NIS devaluation (appreciation) rate % | Israeli inflation adjusted for devaluation (appreciation) % |
|----------------------------|--------------------------------|---|--|
| 2011 | 2.2 | 7.7 | (5.5) |
| 2012 | 1.6 | (2.3) | 3.9 |
| 2013 | 1.9 | (7.0) | 8.9 |
| 2014 | (0.2) | 12.0 | (12.3) |
| 2015 | (1.0) | 0.3 | (1.3) |

A depreciation of the NIS in relation to the dollar has the effect of reducing the dollar amount of any of our expenses or liabilities which are payable in NIS, unless those expenses or payables are linked to the dollar. This depreciation of the NIS in relation to the dollar has the effect of reducing the dollar amount of any of our expenses or liabilities and also has the effect of decreasing the dollar value of any asset which consists of NIS or receivables payable in NIS, unless the receivables are linked to the dollar. Conversely, any increase in the value of the NIS in relation to the dollar has the effect of increasing the dollar value of any unlinked NIS assets and the dollar amounts of any unlinked NIS liabilities and expenses. During 2011 the U.S. dollar appreciated against the NIS, which resulted in a decrease in the U.S. dollar cost of our NIS expenses. During 2012 and 2013, the NIS appreciated against the U.S. dollar. While the dollar appreciated relative to the shekel by 12% in 2014 and by 0.3% in 2015, there is no guarantee that the prior trend of dollar devaluation relative to the shekel will not return in the future. If the dollar cost of our operations in Israel increases, our dollar-measured results of operations will be adversely affected. Our operations also could be adversely affected if we are unable to effectively hedge against currency fluctuations in the future.

Because exchange rates between the NIS and the dollar fluctuate continuously, exchange rate fluctuations, particularly larger periodic devaluations, may have an impact on our profitability and period-to-period comparisons of our results. We cannot assure you that in the future our results of operations may not be materially adversely affected by currency fluctuations.

In 2015, we entered into forward, call and put option contracts in the amount of \$4.2 million that converted a portion of our floating currency liabilities to a fixed rate basis, which reduced the impact of the currency changes on our cash flow. The purpose of our foreign currency hedging activities is to protect us from the risk that the eventual dollar cash flows from international activities will be adversely affected by changes in the exchange rates. Our put option contracts did not qualify as hedging instruments under ASC 815. Changes in the fair value of put option contracts are reflected in the consolidated statement of comprehensive income as financial income or expense. In 2015, we recorded approximately \$7,000 as financial expenses with respect to such transactions in our consolidated statements of operations.

Conditions in Israel

We are incorporated under the laws of, and our principal executive offices and manufacturing and research and development facilities are located in, the State of Israel. See Item 3D “Key Information – Risk Factors – Risks Relating to Operations in Israel” for a description of governmental, economic, fiscal, monetary or political policies or factors that have materially affected or could materially affect our operations.

Trade Relations

Israel is a member of the United Nations, the International Monetary Fund, the International Bank for Reconstruction and Development and the International Finance Corporation. Israel is a member of the World Trade Organization and is a signatory to the General Agreement on Tariffs and Trade, which provides for reciprocal lowering of trade barriers among its members. Israel is also a member of the OECD, an international organization whose members are governments of mostly developed economies. The OECD’s main goal is to promote policies that will improve the economic and social well-being of people around the world. In addition, Israel has been granted preferences under the Generalized System of Preferences from the United States, Australia, Canada and Japan. These preferences allow Israel to export products covered by such programs either duty-free or at reduced tariffs.

Israel and the European Union Community concluded a Free Trade Agreement in July 1975, which confers certain advantages with respect to Israeli exports to most European countries and obligates Israel to lower its tariffs with respect to imports from these countries over a number of years. In 1985, Israel and the United States entered into an agreement to establish a Free Trade Area. The Free Trade Area has eliminated all tariff and specified non-tariff barriers on most trade between the two countries. On January 1, 1993, an agreement between Israel and the European Free Trade Association, known as EFTA, established a free-trade zone between Israel and the EFTA nations. In November 1995, Israel entered into a new agreement with the European Union, which includes re-defining of rules of origin and other improvements, including providing for Israel to become a member of the research and technology programs of the European Union. In recent years, Israel has established commercial and trade relations with a number of other nations, including China, India, Russia, Turkey and other nations in Eastern Europe and Asia.

Effective Corporate Tax Rate

The Israeli corporate tax rate was 25% in 2012 and in 2013. The corporate tax rate increased to 26.5% in 2014 and 2015 and, commencing January 1, 2016, was set at 25%.

However, certain of our activities have been granted “Approved Enterprise” status under the Law for the Encouragement of Capital Investments, 1959, as amended, commonly referred to as the Investment Law, and, consequently, are eligible, subject to compliance with specified requirements, for tax benefits beginning when such facilities first generate taxable income. Subject to certain restrictions, we are entitled to a tax exemption in respect of income derived from our approved facilities for a period of two years, commencing in the first year in which such income is earned, and will be entitled to a reduced tax rate of 10%-25% for an additional five to eight years if we qualify as a foreign investors’ company. If we do not qualify as a foreign investors’ company, we will instead be entitled to a reduced rate of 25% for an additional five, rather than eight, years.

In December 2010, the “Knesset” passed the Investment Law for Economic Policy for 2011 and 2012 (Amended Legislation), 2011, which prescribes, among other things, amendments to the Investment Law. The amendment became effective as of January 1, 2011. According to the amendment, the benefit tracks in the Law were modified and a flat tax rate applies to the company's entire preferred income. Vexigo chose to adopt this amendment and we believe it is entitled to benefit from a reduced corporate tax rate under the amendment. The company will be able to opt to apply (the waiver is non-recourse) the amendment and from then on it will be subject to the amended tax rates that

are: 2011, 2012 and 2013 - 15% (in development area A - 10%); 2014 and 2015 - 16 % (in development area A - 9%).

Our taxes outside Israel are dependent on our operations in each jurisdiction as well as relevant laws and treaties. Under Israeli tax law, the results of our foreign consolidated subsidiaries cannot be consolidated for tax

B. Liquidity and Capital Resources

As of December 31, 2015, we had \$3.4 million in cash and cash equivalents, \$134,000 in marketable securities and working capital of \$(0.4) million, compared to \$4.9 million in cash and cash equivalents, \$136,000 in marketable securities and working capital of \$1.8 million as of December 31, 2014. Our marketable securities are pledged to secure future rent payments for the Company's facilities in Israel. The decrease in our working capital at December 31, 2015 was primarily attributable to the current liabilities incurred and cash paid as part of the Vexigo acquisition.

Cash Flows

The following table summarizes our cash flows for the periods presented:

| | Year ended December 31, | | |
|--|-------------------------|----------|----------|
| | 2013 | 2014 | 2015 |
| | (in thousands) | | |
| Net cash provided by (used in) operating activities from continuing operations | 2,147 | (1,482) | 818 |
| Net cash used in investing activities | (58) | (37) | (2,789) |
| Net cash provided by financing activities from continuing operations | 90 | 14 | 551 |
| Net increase (decrease) in cash and cash equivalents | 2,179 | (1,505) | (1,420) |
| Cash and cash equivalents at beginning of period | 4,190 | 6,369 | 4,864 |
| Cash and cash equivalents at end of period | 6,369 | 4,864 | 3,444 |

Net cash provided by operating activities from continuing operations was approximately \$818,000 for the year ended December 31, 2015, compared to net cash used in operating activities from continuing operations of \$1.5 million for the year ended December 31, 2014. The increase in cash provided in operating activities in 2015 compared to cash used in operating activities in 2014 is primarily attributable to the expenses and losses that are not cash based such as amortization and impairment of goodwill. The net cash provided by operating activities from continuing operations was approximately \$2.1 million for the year ended December 31, 2013. The increase in cash used in operating activities in 2014 compared to cash generated from operating activities in 2013 is primarily attributable to the decrease in our net income, mainly as a result of the loss of Simple Mobile as a customer at the end of 2013, which significantly affected us in 2014.

Net cash used in investing activities was approximately \$2.8 million for the year ended December 31, 2015, primarily attributable to the acquisition of Vexigo. Net cash used in investing activities was approximately \$37,000 and \$58,000 for the years ended December 31, 2014 and December 31, 2013, respectively, primarily attributable to purchase of property and equipment.

Net cash provided by financing activities was approximately \$551,000 for the year ended December 31, 2015, attributable to the proceeds from the private placement consummated in May 2015 and proceeds received from employee stock option exercises. Net cash provided by financing activities was approximately \$14,000 and approximately \$90,000 for the years ended December 31, 2014 and December 31, 2013, respectively. In 2014 and 2013, net cash provided by financing activities was attributable to the proceeds received from employee stock option exercises.

In April 2015, we acquired 100% of the outstanding shares of Vexigo, a privately-held Israeli-based software company supporting video advertising over the internet and mobile devices, which continues to operate as our wholly-owned subsidiary. We paid cash consideration of \$3 million at closing. According to the original terms of the Vexigo SPA, we agreed to pay the former Vexigo shareholders two installments of \$500,000 each on July 1, 2015

(that was postponed to August 15, 2015) and on October 1, 2015 and to distribute to the former shareholders the net working capital of Vexigo as of the closing of the acquisition. In September 2015, the former shareholders agreed that payment of the two remaining installments would be postponed until January 1, 2016, conditioned on the payment to the former shareholders of \$200,000 in September and \$100,000 on the 10th day of each of October, November and December 2015, or \$500,000 in the aggregate, on account of the pre-closing obligation of Vexigo to pay the previously declared dividend to its shareholders. The Vexigo SPA also provides for earn out payments equal to 45% of the EBITDA from the Vexigo Products Line, over a 5.5 year period from the closing date up to a cap of \$16 million.

In February 2016, we renegotiated and extended again the payment schedule for the consideration due to be paid to the former shareholders of Vexigo. The agreed upon extension provides for the payment of \$400,000 in February 2016, additional payments of \$100,000 on the 10th day of each month commencing in April 2016 and ending in March 2017 (\$1.2 million in the aggregate), a payment of \$300,000 on May 10, 2017, a payment of \$400,000 on July 10, 2017, and the remaining balance, including a final payment of \$300,000 and any earn out payment on October 10, 2017. In addition, in the event that we have a cash balance (not including any draw down from our bank credit line) as of July 10, 2016 or on the 10th day of any succeeding month in excess of: (i) \$3.3 million, we will pay a one-time pre-payment of \$300,000 on account of the payments scheduled to be made in 2017; or (ii) if the cash balance is equal to or exceeds \$4.0 million, we will pay a one-time pre-payment of the lesser of \$900,000 or the remaining balance that is owed to the former Vexigo shareholders. The parties also agreed that if, at any time, our cash balance is lower than \$2.5 million, we shall stop all payments until our cash balances return to that level.

The consummation of the Vexigo acquisition significantly decreased our cash reserves. In the event we are not successful in generating sufficient cash from our current operations or from Vexigo's operations, we may be required to obtain financing from outside sources or reduce our level of expenditure. Such financing may not be available in the future, or, if available, may not be on terms satisfactory to us. If adequate funds are not available to us, our business, results of operations and financial condition will be adversely affected.

We were introduced to Vexigo by an independent business consultant. In connection with the execution of the Vexigo acquisition, we agreed to pay the consultant 2% of the consideration paid or issued by us in connection with the Vexigo acquisition. Accordingly, upon closing of the Vexigo acquisition and payment of the consideration, we paid the consultant 2% of the cash consideration, and 2% of the equity consideration (62,302 ordinary shares, representing approximately 0.8% of our outstanding shares following the closing, which was made by the issuance of a five-year warrant having a \$0 exercise price). We have also undertaken to pay the consultant 2% of any future Earn-out Payments.

In addition, Mr. Lior Salansky, our current chief executive officer who acted as a consultant to our Board of Directors in connection with prospective acquisitions, received a warrant to acquire 2% of our outstanding ordinary shares (based on the number of shares outstanding prior to the closing of the Vexigo acquisition), with an exercise price equal to the market price of our ordinary shares at the signing of the Vexigo SPA (\$0.96 per share), having a term five years and which may be exercised on a cashless basis.

Our capital expenditures for the years ended December 31, 2013, 2014 and 2015 were approximately \$1.5 million, \$1.4 million and \$1.9 million, respectively. These expenditures were principally for research and development equipment, office furniture and equipment and leasehold improvements.

We anticipate that our cash on hand and cash flow from operations will be sufficient to meet our working capital and capital expenditure requirements for at least 12 months.

Discussion of Critical Accounting Policies and Estimations

The preparation of financial statements in conformity with generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates and the use of different assumptions would likely result in materially different results of operations.

Critical accounting policies are those that are both most important to the portrayal of a company's financial position and results of operations, and require management's most difficult, subjective or complex judgments. Although not all

of our significant accounting policies require management to make difficult, subjective or complex judgments or estimates, the following policies and estimates are those that we deem most critical:

43

Revenue Recognition. We account for our revenue in accordance with the provisions ASC 985-605, “Revenue recognition – Software,” as amended, or ASC 985-605. When an arrangement does not require significant production, modification or customization of software or does not contain services considered to be essential to the functionality of the software, revenue is recognized when the following four criteria are met:

- Persuasive evidence of an arrangement exists. We require evidence of an agreement with a customer specifying the terms and conditions of the products or services to be delivered typically in the form of a purchase order or the customer’s signature on our proposal;
- Delivery has occurred. For software licenses, delivery takes place when the software is installed on site or remotely or is shipped via mail on a compact disc or server. For services, delivery takes place as the services are provided;
- The fee is fixed or determinable. Fees are fixed or determinable if they are not subject to a refund or cancellation and do not have payment terms that exceed our customary payment terms; and
- Collection is probable. We perform a credit review of all customers with significant transactions to determine whether a customer is credit worthy and collection is probable.

In general, revenue for transactions that do not involve software customization or services considered essential to the functionality of the software is recognized as follows: (i) software license fees for sales through OEMs are recognized upon receipt of license activity reports; (ii) all other software license fees are recognized upon delivery of the software; (iii) software maintenance renewals and technical support are recognized ratably over the contract term; and (iv) consulting, training and other similar services are recognized as the services are performed.

We exercise judgment and use estimates in connection with the determination of the amount of product software license and services revenues to be recognized in each accounting period. If the fee due from the customer is not fixed or determinable, revenue is recognized as payments become due from the customer. If collection is not considered probable, revenue is recognized when the fee is collected.

A limited number of our software arrangements involve multiple elements. Such elements typically include any or all of the following: software licenses, warranty, technical support and training services. For multiple-element arrangements that do not involve significant modification or customization of the software and do not involve services that are considered essential to the functionality of the software, we attempt to allocate value to each undelivered element based on vendor specific objective evidence, or VSOE, of the fair value of each undelivered element in the arrangement, in accordance with the residual method. However, since we have an immaterial number of multiple element arrangements, therefore no VSOE is established.

Under the residual method, the fair value of the undelivered elements is deferred and the remaining portion of the arrangement fee is allocated to the delivered element and is recognized as revenue when all revenue recognition criteria of ASC 985-605 are satisfied. Under the residual method, any discount in the arrangement is allocated to the delivered element. However, as stated above, when sufficient specific objective evidence does not exist for all undelivered elements, revenue is deferred for the entire arrangement until all revenue recognition criteria are met for such undelivered elements.

Deferred revenues include unearned amounts received under maintenance and support contracts, not yet recognized as revenues.

Revenues for hosting and managed services are recognized based on Staff Accounting Bulletin No. 104 and ASC 605-25, when delivery has occurred or services have been rendered, the fee is fixed or determinable, collectability is

probable and persuasive evidence of an arrangement exists. These revenues are recognized as one unit of accounting, on a straight line basis over the term of the last undelivered element.

Advertising Revenues - Vexigo specializes in video advertising solutions for online and mobile platforms, engaging multiple ad formats and interactive ad units. Vexigo recognizes revenue when all four revenue recognition criteria have been met: persuasive evidence of an arrangement exists, services are rendered, the fee or price charged is fixed or determinable and collectability is reasonably assured. Revenues for video advertising are recognized based on SAB 104 and ASC 605-45 "Principal Agent Considerations". ASC 605-45 addresses whether a company should recognize revenue based on (a) the gross amount billed to a customer because it has earned revenue from the sale of the goods or services or (b) the net amount retained (that is, the amount billed to a customer less the amount paid to a publisher) because it has earned a commission or fee. The determination of whether revenues should be reported on a gross or net basis is based on an assessment of whether the company is acting as the principal or an agent in the transaction. In determining whether the company acts as the principal or an agent, Vexigo follows the accounting guidance for principal-agent considerations. While none of the factors identified in this guidance is individually considered presumptive or determinative, Vexigo has determined that in certain transactions, Vexigo is the primary obligor and has a structured inventory risk resulting from the fact that not all purchased ad spaces will be sold. Accordingly, revenue from this activity should be recorded as the gross amount billed to a customer because Vexigo has earned revenue from the sale of the services. On the other hand, in arrangements in which Vexigo is not the primary obligor in the transaction and has no inventory risk, revenues are recognized on the net amount retained.

Allowances for Doubtful Accounts. We perform ongoing credit evaluations of our customers' financial condition and we require collateral as deemed necessary. We maintain allowances for doubtful accounts for estimated losses resulting from the inability of our customers to make payments. In judging the adequacy of the allowance for doubtful accounts, we consider multiple factors including the aging of our receivables, historical bad debt experience and the general economic environment. Management applies considerable judgment in assessing the realization of receivables, including assessing the probability of collection and the current credit worthiness of each customer. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

Income Taxes. Estimates and judgments are required in the calculation of certain tax liabilities and in the determination of the recoverability of certain of the deferred tax assets, which arise from net operating losses tax carryforwards and temporary differences between the tax and financial statement recognition of revenue and expense. FASB ASC Topic 740, "Income Taxes" also requires that the deferred tax assets be reduced by a valuation allowance, if based on the weight of available evidence, it is more likely than not that some portion or all of the recorded deferred tax assets will not be realized in future periods.

In evaluating our ability to recover our deferred tax assets, in full or in part, we consider all available positive and negative evidence including our past operating results, the existence of cumulative losses in the most recent fiscal years and our forecast of future taxable income on a jurisdiction by jurisdiction basis. In determining future taxable income, we are responsible for assumptions utilized, including the amount of Israeli and international pre-tax operating income, the reversal of temporary differences and the implementation of feasible and prudent tax planning strategies. These assumptions require significant judgment about the forecasts of future taxable income and are consistent with the plans and estimates we use to manage the underlying businesses.

Based on estimates of future taxable profits and losses in the tax jurisdictions that we operate, we determined that a valuation allowance of \$8.1 million is required for tax loss carryforwards and other temporary differences as of December 31, 2015. If these estimates prove inaccurate, a change in the valuation allowance could be required in the future.

Business Combinations. We allocate the fair value of purchase consideration to the tangible assets acquired, liabilities assumed and intangible assets acquired based on their estimated fair values. The excess of the fair value of purchase consideration over the fair values of these identifiable assets and liabilities is recorded as goodwill. When determining the fair values of assets acquired and liabilities assumed, management perform significant estimates and assumptions, especially with respect to intangible assets.

Critical estimates in valuing certain intangible assets include but are not limited to future expected cash flows from developed technology; and discount rates. Management's estimates of fair value are based upon assumptions believed to be reasonable, but which are inherently uncertain and unpredictable and, as a result, actual results may differ from estimates.

Other estimates associated with the accounting for acquisitions may change as additional information becomes available regarding the assets acquired and liabilities assumed, as more fully discussed in Note 3 of the Financial Statements.

Goodwill. Goodwill represents the excess of the purchase price in a business combination over the fair value of the net tangible and intangible assets acquired. Under ASC 350, "Intangibles—Goodwill and Other," goodwill is subject to an annual impairment test, or more frequently if impairment indicators are present. Goodwill impairment is deemed to exist if the net book value of a reporting unit exceeds its estimated fair value. All goodwill balances are assigned to our Enterprise and Video Advertising reporting units.

Under ASU 2011-08, "Intangibles Goodwill and Other" (Topic 350), or ASU 2011-08, which amended the rules for testing goodwill for impairment, an entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary.

We operate in three operating segments, which also comprise our reporting units: Enterprise, Service Providers and Video Advertising. Our goodwill balance is assigned to the Enterprise and Video Advertising reporting units.

In light of the decrease in our share price in NASDAQ Capital Market and the negative changes in the Video Advertising market through the year end, we performed an impairment test as of December 31, 2015. Consequently, we concluded that the carrying value of the Video Advertising reporting unit exceeded its fair value, and therefore, an impairment of goodwill existed and the second step of the goodwill impairment test was required. We did not identify impairment in any of our other reporting units.

As a result from the impairment test to the Video Advertising reporting unit, we recorded an impairment loss in the amount of \$6.3 million in 2015.

Critical estimates in valuing our reporting units include but are not limited to future expected cash flows from each reporting unit and discount rates. Management's estimates of fair value are based upon assumptions believed to be reasonable, but which are inherently uncertain and unpredictable and, as a result, actual results may differ from estimates.

Other intangible assets and long-lived assets. We are required to assess the impairment of tangible and intangible long-lived assets subject to amortization, under ASC 360 "Property, Plant and Equipment", on a periodic basis and when events or changes in circumstances indicate that the carrying value may not be recoverable. Impairment indicators include any significant changes in the manner of our use of the assets or the strategy of our overall business, significant negative industry or economic trends and significant decline in our share price for a sustained period.

Upon determination that the carrying value of a long-lived asset may not be recoverable based upon a comparison of aggregate undiscounted projected future cash flows from the use of the asset or asset group to the carrying amount of the asset, an impairment charge is recorded for the excess of carrying amount over the fair value. We measure fair value using discounted projected future cash flows. We base our fair value estimates on assumptions we believe to be reasonable, but these estimates are unpredictable and inherently uncertain. If these estimates or their related assumptions change in the future, we may be required to record impairment charges for our tangible and intangible long-lived assets subject to amortization. During 2013, 2014 and 2015, no impairment losses were identified.

Contingencies. We are involved in legal proceedings and other claims from time to time. We are required to assess the likelihood of any adverse judgments or outcomes to these matters, as well as potential ranges of probable losses. A determination of the amount of reserves required, if any, for any contingencies are made after careful analysis of each individual claim. The required reserves may change due to future developments in each matter or changes in approach, such as a change in the settlement strategy in dealing with any contingencies, which may result in higher net loss. If actual results are not consistent with our assumptions and judgments, we may be exposed to gains or losses that could be material. See "Item 8A. Financial Information – Consolidated Statements and Other Financial Information – Legal Proceedings."

Contingent earn-out consideration. The terms of the Vexigo SPA, require us to pay the former Vexigo shareholders Earn-out Payments, equal to 45% of the EBITDA from the Vexigo Products Line for a period of 5.5 years from the

closing date of the Vexigo acquisition, subject to certain limitations and up to a cap of \$16 million. We performed a valuation study as of December 31, 2015 and as a result, we reduced the contingent earn-out liability by \$2.8 million.

Capitalized development costs. We recognize capitalized development costs in accordance with ASC 350-40 "Capitalized Development Costs". Development activities involve a plan or design for the production of new or substantially improved products and processes. Development expenditures are capitalized only if development costs can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable, and we intend to and have sufficient resources to complete development and use or sell the asset. The expenditures capitalized include the direct labor costs that are directly attributable to preparing the asset for its intended use. Other development expenditure are recognized in profit or loss as incurred. Capitalized development expenditures are measured at cost less accumulated amortization and accumulated impairment losses. As of December 31, 2015, our total capitalized development costs amounted to \$411.

Stock based compensation. We apply ASC 718 "Compensation - Stock compensation," and ASC 505-50 "Equity-Based Payments to Non-Employees," with respect to options and warrants issued to non-employees. ASC 718 requires companies to estimate the fair value of stock-based awards on the date of grant using an option-pricing model, where applicable. Stock-based compensation expense recognized in our consolidated statements of operations for the three years ended December 31, 2015 include compensation expense for stock-based awards granted based on the grant date fair value estimated in accordance with the provisions of ASC 718.

We recognize these compensation costs net of a forfeiture rate and recognize the compensation costs for only those shares expected to vest on a straight-line basis over the requisite service period for each separately vesting portion of the award, which is the option vesting term of four years. ASC 718 requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. We estimate the fair value of stock options granted using the Black-Scholes-Merton option pricing model. Stock-based compensation expense recognized under ASC 718 and ASC 505-50 were approximately \$107,000, \$69,000 and \$117,000 for the years ended December 31, 2013, 2014 and 2015, respectively.

Recently Issued Accounting Standards

In May 2014, the FASB issued guidance on revenue from contracts with customers that will supersede most current revenue recognition guidance, including industry-specific guidance. The underlying principle is that an entity will recognize revenue upon the transfer of goods or services to customers in an amount that the entity expects to be entitled to in exchange for those goods or services. The guidance provides a five-step analysis of transactions to determine when and how revenue is recognized. Other major provisions include capitalization of certain contract costs, consideration of the time value of money in the transaction price, and allowing estimates of variable consideration to be recognized before contingencies are resolved in certain circumstances. The guidance also requires enhanced disclosures regarding the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. The guidance is effective for the interim and annual periods beginning on or after December 15, 2016 (early adoption is not permitted). The guidance permits the use of either a retrospective or cumulative effect transition method. We are currently evaluating the potential effect of the amended guidance on our consolidated financial statements.

In August 2014, the FASB issued amended guidance related to disclosure of uncertainties about an entity's ability to continue as a going concern. The new guidance requires management to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern and, as necessary, to provide related footnote disclosures. The guidance has an effective date of December 31, 2016. We believe that the adoption of this new standard will not have a material impact on our consolidated financial statements.

In November 2015, the FASB issued ASU No. 2015-17, "Income Taxes – Balance Sheet Classification of Deferred Taxes" ("ASU 2015-17"). The purpose of the standard is to simplify the presentation of deferred taxes on a classified balance sheet. Under current GAAP, deferred income tax assets and liabilities are separated into current and noncurrent amounts in the balance sheet. The amendments in ASU 2015-17 require that all deferred tax assets and liabilities be classified as noncurrent in the balance sheet. ASU 2015-17 is effective for interim and annual periods beginning after December 15, 2017, and interim periods within annual periods beginning after December 15, 2018. Companies can adopt the guidance either prospectively or retrospectively. The adoption of ASU 2015-17 is not expected to have a material effect on our consolidated financial statements.

C. Research and Development

Our product development plans are market-driven and address the major, fast-moving trends that are influencing the telecommunications industry. We intend to expand upon our existing family of TEM solutions by adding new

features and functions to address evolving market needs.

Our research and development staff is evaluating approaches to solutions that will permit an information technology manager to effectively measure the quality of the services received from their service providers and to ensure that the users within the organization received such services according to their needs and the overall policy and priorities of the organization.

We work closely with our customers and prospective customers to determine their requirements and design enhancements and develop new releases to meet their needs. Research and development activities take place in our facilities in Israel. We employed 22 persons in research and development as of December 31, 2015, as compared to 10 persons in research and development as of December 31, 2014 and 12 persons as of December 31, 2013.

We have committed substantial financial resources to research and development for our TEM, billing and Video Advertising solution activities. Among our various development plans, our roadmap includes the integration of our TEM products with our other complementary TEM products within the next few years as well as investing in our M2M/IoT and mobile money/MVNE solutions. In addition, we are investing in advertising technology that incorporates Big Data analytics into Vexigo's cutting-edge Real-Time Bidding (RTB) optimization technology. Development activities involve a plan or design for the production of new or substantially improved products and processes. Development expenditure is capitalized only if development costs can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable, and the company intends to and has sufficient resources to complete development and to use or sell the asset. The expenditure capitalized includes the cost of materials and direct labor costs that are directly attributable to preparing the asset for its intended use. Other development expenditure is recognized in profit or loss as incurred. Capitalized development expenditure is measured at cost less accumulated amortization and accumulated impairment losses. During 2013, 2014 and 2015, our research and development expenditures were \$1.4 million, \$1.4 million and \$1.8 million, respectively. Research and development expenses are presented net of capitalized expenses in the amount of \$411,000 for the year ended December 31, 2015 compared to zero capitalized expenses for the years ended December 31, 2014 and 2013. In the past, we received funding from the OCS for selected research and development projects. Vexigo maintains an ongoing program of research and development designated to expand its existing solutions and develop new solutions that will offer (i) better customization and personalization capabilities to its video platform; (ii) further monetization tools; and (iii) better features and capabilities to its Visualizr solution. Vexigo invests a significant amount of its resources in research and development as we believes that superior technology is key to maintaining a leading market position.

Under the terms of research and development grants that we have received from the OCS, we are required to pay royalties on the revenues derived from products incorporating know-how developed with such grants and ancillary services in connection therewith, up to 100% to 150% of the dollar-linked value of the total grants, plus interest. We are required to pay royalties at a rate of 3%-5%. The obligation to pay these royalties is contingent on actual sales of the products and in the absence of such sales, no payment is required. Since June 1997, we have paid the OCS royalties on all call accounting product sales at the applicable rates at the time of payment. See Item 10E. "Additional Information - Taxation - Grants under the Law for the Encouragement of Industrial Research and Development, 1984." As of December 31, 2015, we had a contingent obligation to pay royalties to the OCS in the amount of approximately \$8.6 million plus interest at a rate equal to the 12 month LIBOR rate for grants received after January 1999.

Our quality management system has been ISO 9001:2000 certified since the beginning of 2006, and prior thereto was ISO 9001:1994 certified.

D. Trend Information

As a result of a less predictable business environment and the decline in worldwide sales of PBX systems, we are unable to provide any guidance as to current sales and profitability trends for our TEM and Billing solutions. We expect that our results will continue to be impacted by a shift to telecom services and increased cost of services and selling and marketing expenditures which are associated with such services. Vexigo's future operating results may fluctuate due to a variety of factors, many of which are beyond Vexigo's control. Because Vexigo's business is changing and evolving rapidly, its historical operating results may not be useful in predicting its future operating results. In addition, because Vexigo generally does not have long-term contracts, it is difficult to predict future revenue stream, the related cost of revenues and operating results trend.

E. Off-Balance Sheet Arrangements

We are not a party to any material off-balance sheet arrangements. In addition, we have no unconsolidated special purpose financing or partnership entities that are likely to create material contingent obligations.

F. Tabular Disclosure of Contractual Obligations

The following table summarizes our minimum contractual obligations and commercial commitments as of December 31, 2015 and the effect we expect them to have on our liquidity and cash flow in future periods.

| Contractual Obligations | Total | Payments due by period | | | More than 5 years |
|-----------------------------|--------------|------------------------|------------|-----------|-------------------|
| | | Less than 1 year | 1-3 years | 3-5 years | |
| Operating lease obligations | 359 | 217 | 132 | 10 | - |
| Accrued severance pay* | 798 | -- | -- | -- | 798 |
| Total | 1,157 | 217 | 132 | 10 | 798 |

* See Item 6D. "Directors, Senior Management and Employees - Employees."

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

A. Directors and Senior Management

Set forth below are the name, age, principal position and a biographical description of each of our directors and executive officers:

| Name | Age | Position with the Company |
|------------------------|-----|--|
| Haim Mer | 68 | Chairman of the Board of Directors |
| Lior Salansky | 51 | Chief Executive Officer |
| Alon Mualem | 49 | Chief Financial Officer |
| Koby Ram | 41 | Vexigo CEO |
| Josef Brikman | 58 | President, North America Operations |
| Nir Flatau | 46 | Executive Vice President, Business Development |
| Roger Challen | 70 | Director |
| Tzvika Friedman | 54 | Director |
| Adi Orzel | 44 | Director |
| Steven J. Glusband | 69 | Director |
| Yaacov Goldman (1) (2) | 60 | Director |
| Eytan Barak (1) (2) | 71 | Outside Director |
| Varda Trivaks (1) (2) | 59 | Outside Director |

(1) Member of our audit committee

(2) Member of our compensation committee

Messrs. Mer, Challen, Glusband, Goldman, Friedman and Orzel will serve as directors until our 2016 Annual General Meeting of Shareholders. All of such persons were elected to serve as directors by our shareholders at our 2015 Annual General Meeting of Shareholders. We expect that Mr. Barak and Ms. Trivaks will serve as outside directors pursuant to the provisions of the Israeli Companies Law at least for their third three-year terms until December 2016 and August 2017, respectively.

Haim Mer has served as the Chairman of our Board of Directors and a director since our inception in December 1995. Mr. Mer has served as the Chairman of the Board of Directors of C. Mer Industries Ltd., a publicly traded company, since 1988 and served as its President and Chief Executive Officer from 1988 until January 2005. Mr. Mer holds a B.Sc. degree in Computer Sciences and Mathematics from the Technion - Israel Institute of Technology.

Lior Salansky has served as our Chief Executive Officer since January 2015. Mr. Salansky served as a director of our company from April 2008 until January 2014 and as our President from February 2008 until June 2010. In 1991, Mr. Salansky founded MIND C.T.I. Ltd. (NASDAQ: MNDO), a global provider of real-time, product-based mediation, billing and customer care solutions for voice, data, video and content services, where he served until February 2000 in a number of positions, including Co-Chief Executive Officer, Vice President of Business Development and Research and Development Manager and also served as a director from its inception until 2004. Mr. Salansky holds a B.Sc. degree in Computer Science from the Technion - Israel Institute of Technology and an M.B.A. degree from Tel Aviv University.

Alon Mualem has served as our Chief Financial Officer since September 2007. Prior to joining our company and from June 2005, Mr. Mualem held the responsibilities of chief financial officer at Xfone, Inc. (AMEX and TASE: XFN), an international communications services company and its subsidiary, Xfone 018 Ltd. Prior to that, Mr. Mualem served as chief financial officer of CheckM8, Ltd., a high-tech Internet advertising firm located in Israel. From 1998 to 2004, Mr. Mualem served as the corporate controller of RADVISION Ltd. (NASDAQ: RVSN) and from 1996 to 1998, Mr. Mualem served as a deputy controller of RAD Data Communication Ltd. From 1992 to 1996, Mr. Mualem served as a certified public accountant at Somekh Chaikin, a member firm of KPMG International. Mr. Mualem holds a B.A. degree in Economics and Accounting from Tel Aviv University and is Certified Public Accountant (Israel).

Koby Ram founded Vexigo and served as its Chief Executive Officer since its incorporation in 2010. During the years 2008 to 2010, Mr. Ram was working on various projects. He served as Vice President of business development for Civcom from 2006 to 2008, a fiber optic company. Previously, from 2000 to 2006 Mr. Ram was the co-founder and vice president of business development at Anywhere Technologies Ltd., a location based services platform. Mr. Ram holds a B.Sc. degree in computer science and mathematics from the University of Beer Sheva.

Josef Brikman has served as our President of North America operations since May 2011. Mr. Brikman also currently serves as President of MER Security Inc., which he joined in 2008. From 2006 to 2008, Mr. Brikman was a co-founder of a financial consulting company. Mr. Brikman had previously served our company as Chief Financial Officer from 1998 to 2004. Previously, Mr. Brikman was co-founder and co-manager of STS Software Systems Ltd. Mr. Brikman holds a B.Sc. degree from Fairleigh Dickenson University and a B.A. degree from Haifa University.

Nir Flatau has served as our Executive Vice President, Business Development since November 2014. Before joining us, Mr. Flatau held various senior executive positions with a number of high-tech companies. He served as Vice President Marketing and Business Development of the telecom division of the MER Group from April 2013 until November 2014 and Vice President Marketing and Business Development of Comverse Ltd. from March 2011 until April 2013. From February 2008 until March 2011, he served as Senior Account Director for Pontis Ltd. and previously served as Vice President EMEA Marketing, Sales and Business Development for Clarizen Ltd. Mr. Flatau obtained his B.A. degree in Computer and Political Science from the Tel Aviv University.

Roger Challen has served as a director since April 1, 2009. Mr. Challen co-founded The Info Group, Inc. (formerly AnchorPoint, Inc.), a company that developed and provided licensed software and managed services of telecommunications expense management solutions. Mr. Challen is an accomplished entrepreneur with a proven track record of founding, managing and developing companies in the software, telecommunications and information

services fields. Mr. Challen has founded or co-founded and been an active executive of several privately held companies in the software and IT services market. Mr. Challen is currently a director of The Info Group, Inc., Image Data, Inc. and Data Distributors, Inc., all of which are private companies. Mr. Challen began his career with IBM Corporation, in Waltham, Massachusetts, where he served as a systems engineer and then as a marketing representative. During his tenure with IBM, Mr. Challen won several awards for outstanding technical and sales achievements. Mr. Challen holds a B.A. in Economics and Mathematics from Yale University.

Tzvika Friedman has served as a director since April 1, 2015. Mr. Friedman is an active investor and coach for companies in the area of on-line advertising, social recommendation, smart acquiring solutions, messaging, homeland security, home networking, Smart meeting application, mobile networks optimization and Algo-Trading. Mr. Friedman served as Alvarion Ltd.'s Chief Executive Officer and President from 2005 through December 2009 and was a member of Alvarion's board of directors from July 2005 through August 2008. Mr. Friedman joined Floware Wireless Systems Ltd. in October 2000 as its President and Chief Operating Officer and served in this capacity in Alvarion since its merger with Floware. From 1998 to 2000, Mr. Friedman served as Corporate Vice President and General Manager of the DCME division at ECI Telecom Ltd. From 1992 to 1996, Mr. Friedman served as Vice President Marketing and Sales of ECI Telecom's SDH division. Mr. Friedman holds a B.S. and M.S. in Electrical Engineering, summa cum laude, from the Tel Aviv University, and graduated with distinction with an M.S. from the Sloan Program of Management of the London Business School.

Adi Orzel has served as a director since April 1, 2015 and as the Chairman of the Board of Vexigo since April 2012. Mr. Orzel is also the co-founder & CEO of Warlock Analytics Ltd. Prior to that he was the CEO of Way Better Ltd. Mr. Orzel is a co-founder of Matomy Media Group (MTMY.L), a global performance media company, and served as the CEO of its display division (Matomy Media) from 2006 to 2012 and as the CEO of the performance division (Matomy Market) from October 2010 to March 2012. In 2005-2006 Mr. Orzel served as VP Business Development for Soho Digital International and from 2003-2005 Mr. Orzel was the Executive Director of Advertising at 888.com (888.L). Mr. Orzel holds a B.A., cum laude, in Economics from the Tel Aviv University.

Steven J. Glusband has served as a director since August 1, 1996. Mr. Glusband has been a partner with Carter Ledyard & Milburn LLP, our U.S. counsel, since March 1987. Mr. Glusband holds a B.B.A. degree from the City College of the City University of New York, a J.D. degree from Fordham University School of Law and an L.L.M. degree from the New York University School of Law.

Yaacov Goldman has served as a director since May 2004 and is a member of our audit committee and compensation committee. Mr. Goldman provides consulting services to companies in strategic-financial areas, through his wholly owned company, Maanit-Goldman Management & Investments (2002) Ltd. Mr. Goldman also serves as a director of Golden House Ltd., Collect Biomed Ltd., Isrotel Ltd., Meitav Dash Investments Ltd., Medi Power (Overseas) Public Co. Limited, IceCure Medical Ltd., Proteologics Ltd. and Renewable Resources Ltd. and its affiliated companies. Until March 2012, Mr. Goldman served as a director of Elron Electronic Industries Ltd. and Negev Ceramics Ltd. Until July 2010, Mr. Goldman served as a director of Bank Leumi Le'Israel Ltd. and until June 2009 as Chairman of ITGI Medical Ltd. Mr. Goldman served as the Professional Secretary of the Peer Review Institute of the Certified Public Accountants Institute in Israel from October 2004 until September 2008. Commencing in 1981, Mr. Goldman worked for Kesselman & Kesselman (Israeli member firm of PricewaterhouseCoopers) for 19 years, and from 1991 until 2000, as a partner and then senior partner of such firm. From September 2000 until November 2001, Mr. Goldman served as managing director of Argoquest Holdings, LLC. From March 2002 until October 2002, Mr. Goldman acted as a consultant to a private equity initiative with Poalim Capital Markets & Investments Ltd. Mr. Goldman holds a B.A. degree in Economics and Accounting from Tel Aviv University and is a Certified Public Accountant (Israel).

Eytan Barak has served as an outside director since August 2007 and is the chairman of our audit committee and a member of our compensation committee. Mr. Barak was joint owner and chief executive officer of Dovrat - Barak, Investments in Advanced Technologies Ltd., which provided financial resources and management assistance to start-up companies. Mr. Barak also served as a member of the board of directors, audit committee and investment committee of Eltek Ltd., Spectronix Ltd., Menorah-Mivtachim Mutual Funds Ltd. and Yuval Education Ltd. Mr. Barak serves as a member of the board of directors, audit committee and investment committee of various Israeli companies, including Meshulam Levinstein Construction and Engineering Ltd., Tel-Aviv National Sport Center Ltd. and Ben-Gurion University Sport Center. From 1973 to 1997, Mr. Barak was with Israel Corporation, initially serving

as its corporate controller and thereafter as its chief financial officer, and also served as chairman or member of the board of directors of some of its subsidiaries. From 1967 until 1973, Mr. Barak was associated with Kesselman & Kesselman, the Israeli member firm of PricewaterhouseCoopers International Limited. Mr. Barak is a member of The Olympic Committee of Israel and of the Ben-Gurion University Board of Governors. Mr. Barak holds a B.A. degree in accounting from Tel Aviv University and has been a certified public accountant (Israel) since 1971.

Varda Trivaks has served as an outside director since August 2008 and is the chairwoman of our compensation committee and a member of our audit committee. Ms. Trivaks serves as the Managing Director and is one of the two founding partners of Mimitar Business Consulting, established in 2001. In that position, Ms. Trivaks acts as an advisor to companies on investments, mergers, spin-offs, valuation, control, budgeting, with a special focus on advising global companies and management of companies during times of restructuring and recovery. Ms. Trivaks serves as a member of the audit committee, board of directors and financial committee of Halamish - Municipal Government Company for housing and neighborhood renewal in Tel Aviv Jaffa Ltd. and E. Schnapp & Co. Works Ltd and previously served as a member of the board of directors and audit, balance sheet and compensation committees of Ginegar Plastic Products Ltd. From 1998 to 2004, Ms. Trivaks was a member of the Israel Accounting Institute's communications committee for Capital Markets and Insurance. From 1998 to 2001, Ms. Trivaks was a partner with the accounting and consulting firm, BDO, and served as the managing director of one of its subsidiaries. Ms. Trivaks is a Certified Public Accountant (Israel) since 1987 and holds a B.A. degree in Economics and Accounting from Tel Aviv University and a Master of Science in Management from Boston University.

B. Compensation

The aggregate compensation paid and share-based compensation and other payments expensed by us and our subsidiaries to our directors and executive officers with respect to the year ended December 31, 2015 was \$1.3 million. This amount includes approximately \$128,000 set aside or accrued to provide pension, severance, retirement or similar benefits or expenses, but does not include business travel, relocation, professional and business association dues and expenses reimbursed to office holders, and other benefits commonly reimbursed or paid by companies in our industry. As of December 31, 2015, options to purchase 354,145 ordinary shares granted to our current directors and executive officers were outstanding under our equity incentive plans at a weighted average exercise price of \$1.54 per share.

For so long as we qualify as a foreign private issuer, we are not required to comply with the proxy rules applicable to U.S. domestic companies, including the requirement to disclose information concerning the amount and type of compensation paid to our chief executive officer, chief financial officer and the three other most highly compensated executive officers. Nevertheless, a recent amendment to the regulations promulgated under the Israeli Companies Law requires us to disclose the annual compensation of our five most highly compensated officers (or all the named executive officers if there are less than five) on an individual basis, rather than on an aggregate basis, as was previously permitted for Israeli public companies listed overseas. Under the Israeli Companies Law regulations, this disclosure is required to be included in the notice of our annual meeting of shareholders each year or in a public document that accompanies such notice, which we furnish to the SEC under cover of a Report of Foreign Private Issuer on Form 6-K. The Israeli Companies Law regulations permit us to refer to a report filed pursuant to the laws of the country in which our shares are listed for trading that includes the required information in lieu of its inclusion in the notice of annual meeting. Because of that disclosure requirement under Israeli law, we are including such information in this annual report, pursuant to the disclosure requirements of Form 20-F.

The table below reflects the compensation granted to our five most highly compensated office holders during or with respect to the year ended December 31, 2015. All amounts reported in the table reflect the cost to the company, as recognized in our financial statements for the year ended December 31, 2015.

| Name and Position | Salary & Social Benefits (1) | Bonus | Share-Based Payment (2) (U.S. Dollars) (4) | Other Compensation (3) | Total |
|--|------------------------------|-------|---|------------------------|---------|
| Lior Salansky, Chief Executive Officer (5) | 283,778 | - | 101,265 | - | 385,043 |
| Alon Mualem, Chief Financial Officer | 191,272 | - | 12,051 | 18,326 | 221,649 |
| Josef Brikman, President, North America Operations (6) | 212,755 | - | 2,429 | - | 215,184 |
| Nir Flatau, Executive Vice President, Business Development | 153,404 | - | 9,210 | 14,708 | 177,322 |
| Kobi Ram, Chief Executive Officer of Vexigo (7) | 122,089 | - | 21,817 | - | 143,907 |

(1) Represents the office holder's gross salary or consulting fees plus payment of mandatory social benefits made by the company on behalf of such office holder, to the extent applicable. Such benefits may include, to the extent applicable to the executive, payments, contributions and/or allocations for savings funds (e.g., Managers' Life Insurance Policy), education funds (referred to in Hebrew as "keren hishtalmut"), pension, severance, risk insurances (e.g., life, or work disability insurance), payments

for social security, tax gross-up payments, vacation, car, phone, convalescence pay and other benefits and perquisites consistent with our policies.

- (2) Represents the equity-based compensation expenses recorded in the company's consolidated financial statements for the year ended December 31, 2015 based on the options' grant date fair value in accordance with accounting guidance for equity-based compensation.
- (3) Represents the other benefits to such officer, which includes car expenses, including lease costs, gas and maintenance, provided to the officers.
- (4) Translated (i) from NIS into U.S. dollars at the rate of NIS 3.88 = \$1.00, based on the average representative rate of exchange between the NIS and the U.S. dollar as reported by the Bank of Israel in the year ended December 31, 2015.
- (5) Share-based compensation of Mr. Salansky includes only expenses for options granted to him in his capacity of Chief Executive Officer, and excludes expenses related to warrants issued to him in connection with the Vexigo acquisition based on his consulting agreement.
- (6) Mr. Josef Brikman devotes 80% of his time to our company.
- (7) Represents compensation of Mr. Koby Ram since the acquisition of Vexigo on April 1, 2015.

In 2015, we paid each of Messrs. Challen and Glusband an annual fee of approximately \$8,400 and a per meeting attendance fee of \$300.

In 2015, Messrs. Friedman and Goldman, and our outside directors Messrs. Barak and Trivaks, received a quarterly fee of NIS 7,625 (approximately \$1,960) and a per meeting attendance fee of NIS 1,700 (approximately \$440).

Vexigo pays Mr. Orzel a monthly fee of \$4,000 plus VAT in consideration for his services to Vexigo as Chairman of the Vexigo Board.

As of December 31, 2015, our executive officers, Mr. Lior Salansky, Mr. Alon Mualem, Mr. Josef Brikman, Mr. Kobi Ram (Vexigo's CEO) and Mr. Nir Flatau, held options to purchase an aggregate of 354,145 ordinary shares with exercise prices ranging from \$0.90 to \$2.26 per share and a vesting period of four years commencing on the respective grant dates of the options, except for 80,000 options granted to Mr. Salansky that vest in four equal quarterly installments commencing their grant date. Of such options, options to purchase 112,500 ordinary shares will expire in August 2016, options to purchase 21,645 ordinary shares will expire in November 2016, options to purchase 40,000 ordinary shares will expire in May 2018, options to purchase 40,000 ordinary shares will expire in January 2020 and options to purchase 140,000 ordinary shares will expire in April 2020. Such options were granted under our 2003 Israeli Share Option Plan and 2006 Stock Option Plan. In 2015, 28,355 options were exercised.

For more information, see Item 6E., "Directors, Senior Management and Employees – Share Ownership – Stock Option Plans."

C. Board Practices

Election of Directors

Our Articles of Association provide for a Board of Directors consisting of up to twelve members or such other number as may be determined from time to time at a general meeting of shareholders. Our Board of Directors is currently

composed of eight directors.

Pursuant to our articles of association, all of our directors (except the outside directors) are elected at our annual general meeting of shareholders by a vote of the holders of a majority of the voting power represented and voting at such meeting and hold office until the next annual general meeting of shareholders and until their successors have been elected. The Board of Directors, may, at any time from time to time, appoint any other person as a director, whether to fill a casual vacancy or to add to their number. All the members of our Board of Directors (except the outside directors whose re-election is governed by specific terms of the Israeli Companies Law) may be re-elected upon completion of their term of office. All of our current directors (except our outside directors) were elected by our shareholders at our annual general meeting of shareholders held in October 2015.

We do not follow the requirements of the NASDAQ Stock Market Rules with regard to the nomination process of directors, and instead, we follow Israeli law and practice, in accordance with which our directors are recommended by our board of directors for election by our shareholders. See below in this Item 16G. "Corporate Governance."

Outside and Independent Directors

Outside Directors. Under the Israeli Companies Law, companies incorporated under the laws of the State of Israel whose shares have been offered to the public and are held by the public are required to appoint at least two outside directors. The Israeli Companies Law provides that a person may not be appointed as an outside director if the person is a relative of the controlling shareholder of the company, or if the person, the person's relative, partner, employer or an entity under that person's control, has or had during the two years preceding the date of appointment any affiliation with the company, the controlling shareholder of the company or its relative, or any entity controlling, controlled by or under common control with the company. The term "relative" means a spouse, sibling, parent, grandparent, child or child, sibling or parent of a spouse or spouse of any of the foregoing. The term affiliation includes:

- an employment relationship;
- a business or professional relationship maintained on a regular basis;
- control; and
- service as an officer holder, excluding service as an outside director of a company that is offering its shares to the public for the first time.

In addition, no person may serve as an outside director if the person's position or other activities create, or may create, a conflict of interest with the person's responsibilities as director or may otherwise interfere with the person's ability to serve as director. If, at the time an outside director is appointed all members of the board of directors are of the same gender, then that outside director must be of the other gender. A director of one company may not be appointed as an outside director of another company if a director of the other company is acting as an outside director of the first company at such time.

At least one of the outside directors elected must have "accounting and financial expertise" and any other outside director must have "accounting and financial expertise" or "professional qualification," as such terms are defined by regulations promulgated under the Israeli Companies Law.

Outside directors are elected by shareholders. In general, outside directors serve for a three-year term, which may be renewed for only two additional three-year term. However, Israeli companies listed on certain stock exchanges outside Israel, including the NASDAQ Capital Market, such as our company, may appoint an outside director for additional terms of not more than three years each, subject to certain conditions. Such conditions include the determination by the audit committee and board of directors that in view of the outside director's professional expertise and special contribution to the company's board of directors and its committees, the appointment of the outside director for an additional term is in the best interest of the company.

The election of an outside director for the initial three-year term requires the affirmative vote of a majority of the shares present, in person or by proxy, and voting on the matter, provided that either: (i) at least a majority of the shares of non-controlling shareholders and shareholders who do not have a personal interest in the resolution (excluding a personal interest that is not related to a relationship with the controlling shareholders) are voted in favor of the election of the outside director, or (ii) the total number of shares of non-controlling shareholders and of shareholders who do not have a personal interest in the resolution (excluding a personal interest that is not related to a relationship with the controlling shareholders) voted against the election of the outside director does not exceed 2% of the outstanding voting power in the company.

An outside director may be re-elected to serve for additional three-year terms in one of the two following methods: (i) the board of directors proposed the nomination of the outside director for an additional term and her or his appointment is approved by the shareholders in the manner required to appoint outside directors for an initial term as set forth above, or (ii) in the event a shareholder holding 1% or more of the voting rights nominates the outside director for an additional term or if the outside director nominated her or himself for an additional term, the nomination is required to be approved by a majority of the votes cast by the shareholders of the company; provided that: (x) the votes of controlling shareholders, the votes of shareholders who have a personal interest in the approval of the appointment of the outside director, other than a personal interest that is not as a result of such shareholder's connections to the controlling shareholder, and abstaining votes are excluded from the counting of votes and (y) the aggregate votes cast by shareholders in favor of the nomination that are counted for purposes of calculating the majority exceed 2% of the voting rights in the company. The outside director nominated by shareholders may not be a related or competing shareholder or a relative of such shareholder at the date of appointment and may not have an affiliation to a related or competing shareholder at the date of appointment or for the two year period prior to the appointment. A "related or competing shareholder" is defined by the Israeli Companies Law as the shareholder that proposed the nomination or a significant shareholder (a shareholder holding five percent or more of the outstanding shares of a company or of the voting rights in a company), provided that at the date of appointment of the outside director such shareholder, its controlling shareholder or a corporation controlled by either of them, have business connections with the company or are competitors of the company. The term "affiliation" is defined as set forth above.

Outside directors can be removed from office only by the same special percentage of shareholders as can elect them, or by a court, and then only if the outside directors cease to meet the statutory qualifications with respect to their appointment or if they violate their duty of loyalty to the company.

Any committee of the board of directors exercising powers delegated by the Board must include at least one outside director and the audit committee and compensation committee must include all of the outside directors. An outside director is entitled to compensation as provided in regulations adopted under the Israeli Companies Law and is otherwise prohibited from receiving any other compensation, directly or indirectly, in connection with such service.

Independent Directors. In general, NASDAQ Stock Market Rules require that the board of directors of a NASDAQ-listed company have a majority of independent directors, within the meaning of the NASDAQ Stock Market Rules, and our audit committee must have at least three members and be comprised only of independent directors, each of whom satisfies the respective "independence" requirements of the SEC and NASDAQ. However, foreign private issuers, such as our company, may follow certain home country corporate governance practices instead of certain requirements of the NASDAQ Stock Market Rules. A foreign private issuer that elects to follow a home country practice instead of such requirements must submit to NASDAQ in advance a written statement from an independent counsel in such issuer's home country certifying that the issuer's practices are not prohibited by the home country's laws. On March, 31, 2009, we provided NASDAQ with a notice of non-compliance with respect to the requirement to maintain a majority of independent directors, within the meaning of the NASDAQ Stock Market Rules. Instead, under Israeli law and practice, we are required to appoint at least two outside directors, within the meaning of the Israeli Companies Law, to our Board of Directors. In addition, in accordance with the rules of the SEC and NASDAQ, our audit committee is composed of three independent directors, as defined by the rules of the SEC and NASDAQ.

Pursuant to the Israeli Companies Law, a director may be qualified as an independent director if such director is either (i) an outside director; or (ii) a director that serves as a board member less than nine years (subject to the right to extend such period for additional three-year terms granted to certain companies, including companies whose shares are listed on Nasdaq) and the audit committee has approved that he or she meets the independence requirements of an outside director. A majority of the members serving on the audit committee must be independent under the Israeli Companies Law. In addition, a publicly traded company may elect to adopt a provision in its articles of association

pursuant to which a majority of its board of directors will be independent. We have not included such a provision in our articles of association.

Our Board of Directors has determined that our outside directors, Mr. Eytan Barak and Ms. Varda Trivaks, both qualify as independent directors under the rules of the SEC and NASDAQ. Our Board of Directors has further determined that Mr. Yaacov Goldman qualifies as an independent director under the requirements of the SEC, NASDAQ and the Israeli Companies Law.

Audit Committee

Our audit committee, which was established in accordance with Section 114 of the Israeli Companies Law and Section 3(a)(58)(A) of the Exchange Act, assists our board of directors in overseeing the accounting and financial reporting processes of our company and audits of our financial statements, including the integrity of our financial statements, compliance with legal and regulatory requirements, our independent public accountants' qualifications and independence, the performance of our internal audit function and independent public accountants, finding any defects in the business management of our company and proposing to the board of directors ways to correct such defects, and such other duties as may be directed by our board of directors. The Israeli Companies Law provides that the roles of an audit committee are: (i) monitoring deficiencies in the business management of a company, including by consulting with the internal auditor or independent accountants and suggesting methods of correction of such deficiencies to the board of directors, (ii) determining whether or not certain related party actions and transactions and actions taken by office holders that are "material actions" or "extraordinary transactions" in connection with their approval procedures as more fully described above, (iii) determining in connection with transactions with the controlling shareholder or with a third party in which the controlling shareholder has a personal interest (event if they are not extraordinary transactions) and in connection with transactions with the controlling shareholder or its relative, directly or indirectly, for the receipt of services or in connection with terms of employment or service, a duty to conduct a competitive process, supervised by the audit committee or anyone else appointed by the audit committee and based on criteria determined by the audit committee, or to determine that other procedures determined by the audit committee will be conducted, prior to execution of such transactions, all based on the type of the transaction (the audit committee is permitted to determine criteria for this matter once a year in advance), (iv) determining whether to approve actions and transactions that require audit committee approval under the Israeli Companies Law, (v) determining the method of approval of non-negligible transactions (i.e. transactions of a company with a controlling shareholder or with a third party in which the controlling shareholder has a personal interest that the audit committee determined are not extraordinary but are non-negligible), including to determine types of such transactions that will require the approval of the audit committee (the audit committee is permitted to determine a classification of transactions as non-negligible based on criteria determined once a year in advance), (vi) in a company in which the work plan of the internal auditor is approved by the board – examining the work plan before it is submitted to the board and suggesting revisions, (vii) assessing the company's internal audit system and the performance of its internal auditor and whether the internal auditor has the resources and tools required for the performance of its role, taking into account, among others, the special needs and size of the company, (viii) examining the scope of work and compensation of the company's independent auditor and (ix) setting procedures in connection with the method of dealing with complaints of employees regarding defects in the management of the company's business and with the protection provided to such employees. Under Israeli law an audit committee may not approve an action or a transaction with a controlling shareholder, or with an office holder, unless at the time of approval two outside directors are serving as members of the audit committee and it otherwise meets the composition requirements of the Israeli law.

Our audit committee consists of three members of our Board of Directors who satisfy the "independence" requirements of the SEC, NASDAQ and Israeli law for audit committee members. Our audit committee is currently composed of Messrs. Eytan Barak and Yaacov Goldman and Ms. Varda Trivaks. Our Board of Directors has determined that Mr. Goldman qualifies as an audit committee financial expert. The audit committee meets at least once each quarter.

Compensation Committee

In accordance with the Israeli Companies Law, our compensation committee's role is to: (i) recommend a compensation policy for office holders and to recommend to the board, once every three years, the continued validity of the compensation policy that was determined for a period exceeding three years; (ii) recommend an update the compensation policy from time to time and to examine its implementation; (iii) determine whether to approve the Terms of Service and Employment of Office Holders that require the committee's approval; and (iv) determine

whether a transaction is exempt from the requirement for shareholders' approval. The compensation committee also has oversight authority over the actual terms of employment of directors and officers and may make recommendations to the board of directors and the shareholders (where applicable) with respect to deviation from the compensation policy that was adopted by the company.

In accordance with the Israeli Companies Law, our compensation committee must consist of no less than three members, including all of our outside directors (who must constitute a majority of its members of the committee), and that the remainder of the members of the compensation committee be directors whose terms of service and employment were determined pursuant to the applicable regulations. Similar restrictions to the restrictions on the actions and membership in the audit committee, as discussed above under "Audit Committee", are imposed on the compensation committee, with respect to, among other things, the requirement that an outside director serve as the chairman of the committee and the list of persons who may not serve on the committee. We have established a compensation committee that is currently composed of our outside directors, Ms. Varda Trivaks, and Mr. Eytan Barak, and Mr. Yaacov Goldman. In February 2016, the Israeli Companies Law was amended to provide that an audit committee that meets the criteria for the composition of a compensation committee, such as our Audit Committee, can also act as the compensation committee.

Compensation Policy

In accordance with the Israeli Companies Law, in August 2013, our shareholders approved a compensation policy that must be approved at least once every three years.

The approval of the compensation policy by our shareholders requires the affirmative vote of the holders of a majority of the shares present, in person or by proxy, and voting on the matter provided that at least one of the following conditions is met: (i) the shares voting in favor of the matter include at least a majority of the shares voted by shareholders who are not controlling shareholders and who do not have a personal interest in the approval of the compensation policy (or the transaction, as the case may be) or (ii) the total number of shares voted against the compensation policy by shareholders referenced under (i) does not exceed 2% of the company's outstanding voting rights. We may approve a compensation policy even in the event it is rejected by the shareholders; provided that the compensation committee and thereafter the board of directors resolve that the approval of the compensation policy is for the benefit of our company.

The board of directors is required to periodically examine the compensation policy and the need for adjustments based on the considerations in determining a compensation policy in the event of a material change in the circumstances prevailing during the adoption of the compensation policy or for other reasons.

Our compensation policy is intended to assist our company to achieve its goals and its work plans with a long term view and to ensure that:

- The interests of the directors and officers of our company will be as close as possible and in the closest possible conformity to the interests of our shareholders.
- We will be able to recruit and retain senior managers who have the ability to lead our company to business success and to confront the challenges we face.
- Our directors and officers will be motivated to achieve a high level of business performance without taking unreasonable risks;
- An appropriate balance will be created between the various components of compensation - fixed components vs. variable components, short-term vs. long-term, and compensation in cash vs. equity based compensation.

The overall compensation of each employee and especially of our officers is based on a number of components, so that each component rewards the employee for a different aspect of his contribution to the company.

- Fixed base salary - intended to compensate the employee for the time spent in carrying out his work for the company and for execution of the ongoing tasks of his position on a daily basis. The base salary represents the employees' skills on one hand (such as: experience, job knowledge, expertise, education, professional qualifications, etc.) and on the other hand, the job requirements and the scope of authority and responsibilities of the employee.
- Social and Incidental Benefits - some of which are statutorily defined (pension savings, severance contributions, loss of work capacity insurance, vacation, sick leave, etc.), some of which reflect standard work market practice (such as savings in education funds in Israel while maximizing the inherent advantages for the employee in the tax benefits offered by the State of Israel) and some of which are intended to supplement the fixed salary and to compensate the employee for expenses incurred in the performance of his work (such as travel costs).

- Variable, Performance Based Rewards (Annual Bonus, Commissions and Grants) - Is intended to compensate the employee for his achievements and contribution to our company's goals during the period for which the variable compensation is paid. In general, the weight ascribed to this component as a part of the total compensation package increases as the employee is in a more senior position.
- Equity based compensation - is intended to tie between the maximization of shareholders' value as expressed in the value of our shares in the long-term and the compensation given to managers and employees of our company. We believe that this compensation creates proximity between the interests of our employees and managers and our shareholders, and thus assists in motivating and retaining the key positions holders in our company.

In order to ensure consistency between all of the compensation components, in their approval deliberations for each of the components of compensation for an officer, the Compensation Committee and the Board of Directors will be presented with the entire compensation package of the officer.

Our Compensation Committee and Board of Directors approved an updated version of our compensation policy at their meetings held on January 11, 2015 and January 18, 2015. Our shareholders approved this updated compensation policy on April 1, 2015.

Internal Audit

Under the Israeli Companies Law, the board of directors of a public company must appoint an internal auditor nominated by the audit committee. A person who does not satisfy the Israeli Companies Law's independence requirements may not be appointed as an internal auditor. The role of the internal auditor is to examine, among other things, the compliance of the company's conduct with applicable law and orderly business practice. Mr. Doron Cohen of Fahn Kanne & Co., the Israeli member firm of Grant Thornton International Ltd., serves as our internal auditor.

Directors' Service Contracts

There are no arrangements or understandings between us and any of our subsidiaries, on the one hand, and any of our directors, on the other hand, providing for benefits upon termination of their employment or service as directors of our company or any of our subsidiaries.

Approval of Related Party Transactions Under Israeli Law

Fiduciary Duties of Office Holders

The Israeli Companies Law codifies the fiduciary duties that "office holders," including directors and executive officers, owe to a company. An "office holder" is defined in the Israeli Companies Law as a director, general manager, chief business manager, deputy general manager, vice general manager, other manager directly subordinate to the general manager or any other person assuming the responsibilities of any of the foregoing positions without regard to such person's title. An office holder's fiduciary duties consist of a duty of care and a duty of loyalty. The duty of care requires an office holder to act at a level of care that a reasonable office holder in the same position would employ under the same circumstances. This includes the duty to utilize reasonable means to obtain (i) information regarding the appropriateness of a given action brought for his approval or performed by him by virtue of his position and (ii) all other information of importance pertaining to the foregoing actions. The duty of loyalty includes (i) avoiding any conflict of interest between the office holder's position in the company and any other position he holds or his personal affairs, (ii) avoiding any competition with the company's business, (iii) avoiding exploiting any business opportunity of the company in order to receive personal gain for the office holder or others, and (iv) disclosing to the company any information or documents relating to the company's affairs that the office holder has received due to his position as an

office holder.

Disclosure of Personal Interests of an Office Holder

The Israeli Companies Law requires that an office holder promptly, and no later than the first board meeting at which such transaction is considered, disclose any personal interest that he or she may have and all related material information known to him or her and any material documents in their possession, in connection with any existing or proposed transaction by us. In addition, if the transaction is an extraordinary transaction, that is, a transaction other than in the ordinary course of business, other than on market terms, or that may have a material impact on the company's profitability, assets or liabilities, the office holder must also disclose any personal interest held by the office holder's "relative" (as defined above), or by any corporation in which the office holder or a relative is a 5% or greater shareholder, director or general manager or in which he or she has the right to appoint at least one director or the general manager.

58

Approval of Transactions with Office Holders

Some transactions, actions and arrangements involving an office holder (or a third party in which an office holder has a personal interest) must be approved by the board of directors and, in some cases, by the audit committee and by the board of directors, and under certain circumstances shareholder approval may also be required, provided, however, that each such transaction is required also to be for the benefit of the company. A director who has a personal interest in a transaction may not be present during the discussions and may not vote on the transaction, unless the transaction does not pertain to terms of service and employment and is not an extraordinary transaction or the majority of the members of the board or the audit committee has a personal interest. In the event the majority of the members of the board of directors have a personal interest, they are entitled to participate in the meeting but the approval of the general meeting of shareholders is also required.

Approval Process of Terms of Service and Employment of Office Holders

The process for approval of Terms of Service and Employment of office holders is as follows:

- With respect to our chief executive officer, a controlling shareholder or a relative of a controlling shareholder, approval is required by the (i) compensation committee, (ii) board of directors and (iii) company's shareholders with the "special majority" described above (in that order). Subject to certain conditions, the Israeli Companies Law provides an exemption from the shareholder approval requirement in connection with the approval of the Terms of Service and Employment of a CEO candidate.
- With respect to a director, approval is required by the (i) compensation committee, (ii) board of directors and (iii) company's shareholders with a regular majority (in that order).
- With respect to any other office holder, approval is required by the Compensation Committee and the board of directors (in that order); however, in the event of an update of existing Terms of Service and Employment, which the Compensation Committee confirms is not material, Compensation Committee approval is sufficient.

In the event the transaction with any office holder is not in accordance with the compensation policy, the approval of the company's shareholders, by "special majority," is also required. In the event the company's shareholders do not approve the compensation of the CEO or other office holders (who are not directors, controlling shareholders or relatives of the controlling shareholders), the compensation committee and board of directors may, in special situations, approve the transaction, subject to their providing detailed reasons and after discussion and examination of the rejection by the company's shareholders.

Disclosure of Personal Interests of a Controlling Shareholder; Approval of Transactions with Controlling Shareholders

The disclosure requirements that apply to an office holder also apply to a transaction in which a controlling shareholder of the company has a personal interest. The Israeli Companies Law provides that an extraordinary transaction with a controlling shareholder or an extraordinary transaction with another person in which the controlling shareholder has a personal interest or a transaction with a controlling shareholder or his relative regarding terms of service and employment, must be approved by the audit committee, the board of directors and shareholders. The shareholders' approval of such a transaction requires a simple majority approval and the fulfillment of one of the following conditions: (i) at least a majority of the votes cast by shareholders who have no personal interest in the transaction and who vote on the matter are voted in favor of the transaction, or (ii) the votes cast by shareholders who have no personal interest in the transaction voted against the transaction do not represent more than two percent of the voting rights in the company. In addition, any such transaction with a term that exceeds three years requires approval as described above every three years, unless (with respect only to extraordinary transactions and not to other

transactions that require the special approval process) the audit committee approves that a longer term is reasonable under the circumstances.

Under the Companies Regulations (Relief from Related Party Transactions), 5760-2000, promulgated under the Israeli Companies Law, as amended, certain extraordinary transactions between a public company and its controlling shareholder(s) do not require shareholder approval. In addition, under such regulations, directors' compensation and employment arrangements in a public company do not require the approval of the shareholders if both the audit committee and the board of directors agree that such arrangements are solely for the benefit of the company or if the directors' compensation does not exceed the maximum amount of compensation for outside directors determined by applicable regulations. The foregoing exemptions from shareholder approval will not apply if one or more shareholders holding at least 1% of the issued and outstanding share capital of the company or of the company's voting rights, objects to the use of these exemptions provided that such objection is submitted to the company in writing not later than fourteen days from the date of the filing of a report regarding the adoption of such resolution by the company pursuant to the requirements of the Israeli Securities Law. If such objection is duly and timely submitted, then the transaction or compensation arrangement of the directors will require shareholders' approval as detailed above.

Exculpation, Indemnification and Insurance of Directors and Officers

Exculpation of Office Holders. The Israeli Companies Law provides that an Israeli company cannot exculpate an office holder from liability with respect to a breach of his or her duty of loyalty. If permitted by its articles of association, a company may exculpate in advance an office holder from his or her liability to the company, in whole or in part, with respect to a breach of his or her duty of care. However, a company may not exculpate in advance a director from his or her liability to the company with respect to a breach of his duty of care in connection with distributions.

Insurance of Office Holders. Israeli law provides that a company may, if permitted by its articles of association, enter into a contract to insure its office holders for liabilities incurred by the office holder with respect to an act or omission performed in his or her capacity as an office holder, as a result of: (i) a breach of the office holders duty of care to the company or another person; (ii) a breach of the office holders duty of loyalty to the company, provided that the office holder acted in good faith and had reasonable cause to assume that the act would not prejudice the company's interests; and (iii) a financial liability imposed upon the office holder in favor of another person.

Indemnification of Office Holders. Under Israeli law a company may, if permitted by its articles of association, indemnify an office holder for acts or omissions performed by the office holder in such capacity for (a) monetary liability imposed upon the office holder in favor of another person pursuant to a court judgment, including a settlement or an arbitration award approved by a court; (b) reasonable litigation expenses, including attorney's fees, actually incurred by the office holder as a result of an investigation or proceeding instituted against him or her by a competent authority, provided that such investigation or proceeding concluded without the filing of an indictment against the office holder or the imposition of any monetary liability in lieu of criminal proceedings, or concluded without the filing of an indictment against the office holder and a monetary liability was imposed on him or her in lieu of criminal proceedings with respect to a criminal offense that does not require proof of criminal intent; and (c) reasonable litigation expenses, including attorneys' fees, actually incurred by the office holder or imposed upon the office holder by a court: (i) in an action, suit or proceeding brought against the office holder by or on behalf of the company or another person, (ii) in connection with a criminal action in which the office holder was acquitted, or (iii) in connection with a criminal action in which the office holder was convicted of a crime that does not require proof of criminal intent.

Israeli law provides that a company's articles of association may permit the company to (a) indemnify an office holder retroactively, following a determination to this effect made by the company after the occurrence of the event in respect of which the office holder will be indemnified; and (b) undertake in advance to indemnify an office holder, except that with respect to a monetary liability imposed on the office holder by any judgment, settlement or court-approved

arbitration award, the undertaking must be limited to types of occurrences, which, in the opinion of the company's board of directors, are, at the time of the undertaking, foreseeable due to the company's activities and to an amount or standard that the board of directors has determined is reasonable under the circumstances.

Limitations on Exculpation, Insurance and Indemnification. The Israeli Companies Law provides that a company may not exempt or indemnify an office holder nor enter into an insurance contract which would provide coverage for liability incurred as a result of any of the following: (a) a breach by the office holder of his or her duty of loyalty (however, a company may insure and indemnify against such breach if the office acted in good faith and had reasonable cause to assume that his act would not prejudice the company's interests); (b) a breach by the office holder of his or her duty of care if the breach was done intentionally or recklessly, unless made in negligence only; (c) any act of omission done with the intent to derive an illegal personal benefit; or (d) any fine, civil fine, monetary sanction or penalty levied against the office holder.

Pursuant to the Israeli Companies Law, exculpation of, procurement of insurance coverage for, and an undertaking to indemnify or indemnification of, our office holders must be approved by our compensation committee and our board of directors and, if the office holder is a controlling shareholder, director or a general manager, also by our shareholders.

Our Articles of Association allow us to insure, indemnify and exempt our office holders, to the fullest extent permitted by the provisions of the Israeli Companies Law. We maintain a directors' and officers' liability insurance policy with a per claim and aggregate coverage limit of \$5.00 million, including legal costs incurred in Israel. We have provided several of our directors and officers a letter of indemnification for liabilities or expenses incurred as a result of their acts in their capacity as directors and officers of our company, in an aggregate amount not to exceed \$3 million.

Administrative Sanctions. The Israeli Securities Authority is authorized to impose administrative sanctions against companies like ours and their office holders for certain violations of the Israeli Securities Law or the Israeli Companies Law. These sanctions include monetary sanctions and certain restrictions on serving as a director or senior officer of a public company for certain periods of time. The maximum amount of the monetary sanctions that could be imposed upon individuals is a fine of NIS 1.0 million (currently equivalent to approximately \$260,000), plus the greater of the following amounts payable to persons who suffered damages as a result of the violation: (i) the amount of profits earned or losses avoided by the violator as a result of the violation, up to the amount of the applicable fine, or (ii) compensation for damages suffered by the injured persons, up to 20% of the fine imposed on the violator.

Only certain types of liabilities may be reimbursed by indemnification and insurance. Specifically, legal expenses (including attorneys' fees) incurred by an individual in the applicable administrative enforcement proceeding and any compensation payable to injured parties for damages suffered by them (as described in clause (ii) of the immediately preceding paragraph) are permitted to be reimbursed via indemnification or insurance, provided that such indemnification and insurance are authorized by the company's articles of association.

D. Employees

On December 31, 2015, we and our consolidated subsidiaries employed 82 persons, of which 22 persons were employed in research and development, 26 in professional services and technical support, 14 in sales and marketing and 20 in operations and administration. As of December 31, 2015, 47 of our employees were located in Israel, 33 of our employees were located in the United States and 2 of our employees were located in Hong Kong.

On December 31, 2014, we and our consolidated subsidiaries employed 58 persons, of which 10 persons were employed in research and development, 19 in training and technical support, 12 in sales and marketing and 17 in operations and administration. As of December 31, 2014, 24 of our employees were located in Israel, 32 of our employees were located in the United States and 2 of our employees were located in Hong Kong.

On December 31, 2013, we and our consolidated subsidiaries employed 59 persons, of which 12 persons were employed in research and development, 20 in training and technical support, 11 in sales and marketing and 16 in operations and administration. As of December 31, 2013, 23 of our employees were located in Israel, 34 of our employees were located in the United States and 2 of our employees were located in Hong Kong.

Certain provisions of the collective bargaining agreements between the General Federation of Labor in Israel, or the Histadrut, and the Coordination Bureau of Economic Organizations (including the Industrialists Association) are applicable to our employees by order of the Israeli Ministry of Labor. These provisions concern mainly the length of the workday, minimum daily wages for professional workers, contributions to a pension fund, insurance for work-related accidents, procedures for dismissing employees, determination of severance pay and other conditions of

employment. We generally provide our employees with benefits and working conditions beyond the minimum requirements.

Cost of living adjustment of employees' wages is determined on a nationwide basis and is legally binding, if and when applied. Israeli employers and employees are required to pay predetermined amounts to the National Insurance Institute, which is similar to the United States Social Security Administration and additional sums towards compulsory health insurance. In 2015, payments to the National Insurance Institute amounted to approximately 15% of wages, of which approximately two-thirds was contributed by employees with the balance contributed by the employer.

Pursuant to Israeli law, we are required to pay severance benefits upon certain circumstances, including the retirement or death of an employee or the termination of employment of an employee without due cause. The severance pay obligation generally requires the payment of severance pay equal to one month's salary, based on the most recent salary, for each year of employment or a prorated portion thereof upon the termination of employment of an employee. Pursuant to an order issued in December 2007 by the Israeli Minister of Industry, Trade and Labor, new provisions relating to pension arrangements in the collective bargaining agreements between the Histadrut and the Coordination Bureau of Economic Organizations apply to all employees in Israel. According to such provisions, all employees employed in Israel for at least six months are entitled to pension benefits to be funded by preset monthly contributions of the employee and the employer and to certain severance benefits regardless of whether they or we terminated their employment. We partly satisfy this obligation by contributing approximately 8.3% of between 80%-100% of the employee's annual gross salary to a fund known as "Managers' Insurance" or to pension fund. This fund provides a combination of savings plans, insurance and severance pay benefits to the employee, giving the employee a lump sum payment upon retirement and a severance payment, if legally entitled, upon termination of employment. The remaining part of this obligation is presented in our balance sheet as the difference between the "accrued severance pay" and "severance pay fund."

Certain employment agreements executed with some of our Israeli employees provide that the provisions of Section 14 of the Israeli Severance Pay Law, 1963, or the Severance Pay Law, will apply to such employee. This section provides that our contributions for severance pay are in lieu of our severance liability and the relevant employee is entitled to receive such contributions whether her or his employment is terminated by us or she or he resigns. Therefore, upon fulfillment of our obligation to make a monthly contribution to the managers' insurance policies or similar financial instruments in the amount of 8.33% of the employee's monthly salary and of the other terms of the relevant governmental permit issued with respect to this arrangement, no additional payments must later be made to the employee on account of severance pay upon termination of the employment relationship. Under these circumstances, the related obligation and amounts deposited on behalf of the employee for such obligation are not stated on the balance sheet, as we are released from the obligation to the employees once the amounts deposited have been paid.

E. Share Ownership

The following table sets forth certain information as of March 24, 2016 regarding the beneficial ownership of our ordinary shares by each of our directors and all of our executive officers and directors as a group:

| Name | Number of Ordinary Shares Beneficially Owned (1) | Percentage of Outstanding Ordinary Shares (2) | |
|--|--|---|---|
| Haim Mer and Dora Mer | 1,303,426 (3) | 16.2 | % |
| Roger Challen | 992,708 (4) | 12.3 | % |
| Tzvika Friedman | 539,940 (5) | 6.7 | % |
| Adi Orzel | 170,124 | 2.1 | % |
| Steven J. Glusband | 3,000 | * | |
| Yaacov Goldman | -- | -- | |
| Eytan Barak | -- | -- | |
| Varda Trivaks | -- | -- | |
| All directors and executive officers as a group (13 persons) | 3,925,998 (6) | 46.8 | % |

* Less than 1%.

(1) Beneficial ownership is determined in accordance with the rules of the SEC and generally includes voting or investment power with respect to securities. Ordinary shares relating to options currently exercisable or exercisable within 60 days of the date of this table are deemed outstanding for computing the percentage of the person holding such securities but are not deemed outstanding for computing the percentage of any other person. Except as indicated by footnote, and subject to community property laws where applicable, the persons named in the table above have sole voting and investment power with respect to all shares shown as beneficially owned by them.

- (2) The percentages shown are based on 8,043,380 ordinary shares (excluding 5,400 ordinary shares held as treasury stock) issued and outstanding as of March 24, 2016.
- (3) Based upon a Schedule 13D/A filed with the SEC on June 15, 2015 and other information available to us. Mr. Haim Mer and his wife, Mrs. Dora Mer, are the record holders of 425,382 ordinary shares and the beneficial owners of 872,226 ordinary shares through their controlling interest in Mer Ofekim Ltd., 5,770 ordinary shares through their controlling interest in Mer Services Ltd. and 48 ordinary shares through their controlling interest in Mer & Co. (1982) Ltd.
- (4) Based upon a Schedule 13D filed with the SEC on September 6, 2012 and other information available to us. The ordinary shares are held of record by the Info Group, Inc., a Massachusetts corporation controlled by Mr. Roger Challen. Accordingly, Mr. Roger Challen may be deemed to have the sole voting and dispositive power as to the ordinary shares held of record by The Info Group, Inc.
- (5) Based upon a Schedule 13D filed with the SEC on April 15, 2015.
- (6) Includes 352,598 ordinary shares subject to warrants and options granted under our 2003 Israeli Share Option Plan and 2006 Option Plan and that are all currently exercisable or exercisable within 60 days of the date of this table.

Stock Option Plans

2003 Israeli Share Option Plan

In August 2013, our shareholders approved amendments to the 2003 Israeli Share Option Plan, or the 2003 Plan. Its term was extended by ten years so that the 2003 Plan will expire on November 30, 2023, unless further extended and the number of ordinary shares issuable under the 2003 Plan was increased by an additional 500,000 ordinary shares, so that we are entitled to issue up to 946,957 ordinary shares under the 2003 Plan. Options granted under the 2003 Plan are not assignable or transferable by an optionee, other than by will or by laws of descent and distribution, and during the lifetime of an optionee may be exercised only by the optionee or by the optionee's legal representative. Such options may be exercised as long as the optionee is employed by, or providing services to us or any of our affiliates, to the extent the options have vested and, under certain circumstances set forth in the 2003 Plan, for a period of 90 days thereafter. The Board of Directors or the stock option committee, as the case may be, may permit options to continue to be in effect following the termination of employment, so long as the resolution is adopted prior to expiration of the options as a result of termination and there is no change in the original expiration date of the options.

During 2015, 296,000 options were granted under the 2003 Plan and 28,355 options were exercised. At December 31, 2015, options to purchase 418,645 ordinary shares were outstanding under the 2003 Plan, exercisable at an average exercise price of \$1.56 per share.

2006 Stock Option Plan

In June 2006, we adopted our 2006 Stock Option Plan, or the 2006 Plan, under which up to 200,000 ordinary shares may be issued (subject to standard adjustments) to employees, officers and non-employee directors of ours and our affiliates. Ordinary shares as to which an option granted under the 2006 Plan has not been exercised at the time of its expiration, cancellation or forfeiture may again be subject to new awards under the 2006 Plan. At our 2011 annual general meeting, our shareholders approved an amendment to our 2006 Stock Option Plan to provide for the issuance thereunder of an additional 200,000 ordinary shares and to increase the total number of ordinary shares with respect to which options may be granted thereunder to any eligible employee during any 12 month period to 150,000 (instead of

50,000 according to the original 2006 Plan) ordinary shares, subject to adjustment as provided in the 2006 Plan. At our 2013 annual general meeting, our shareholders approved an amendment to our 2006 Stock Option Plan to provide for the issuance thereunder of an additional 150,000 ordinary shares, such that we will be entitled to issue options to purchase up to 550,000 ordinary shares under the 2006 Plan.

The 2006 Plan will be administered by our Board of Directors or to the extent permitted by Israeli law, a Compensation Committee of our Board of Directors. All references below to the “Committee” refer to the Board of Directors or compensation committee established by our Board of Directors, as applicable. The Committee will have the authority, in its discretion, to establish from time to time guidelines or regulations for the administration of the 2006 Plan, to interpret the 2006 Plan, and to make all determinations it considers necessary or advisable for the administration of the 2006 Plan, in addition to the other responsibilities and powers assigned to the Committee in the 2006 Plan. All decisions, actions or interpretations of the Committee under the 2006 Plan will be final, conclusive and binding upon all parties.

Each option granted under the 2006 Plan will be either an option intended to be treated as an “incentive stock option,” within the meaning of Section 422 of the Internal Revenue Code of 1986, as amended, or the Code, or an option that will be treated as a “non-qualified stock option.” No incentive stock may be granted to any individual who is not an eligible employee of our company or a “subsidiary” within the meaning of the Code. No incentive stock option may be granted to an employee if, as of the date of grant of such option, such employee owns stock possessing more than ten percent of the total combined voting power of all classes of stock of our company or any affiliated company, a “10% Holder,” unless (a) the exercise price per share under such option is at least 110% of the fair market value of an ordinary share determined as of the date of grant of such option, and (b) such option is not exercisable after the expiration of five years from the date of grant of such option. No incentive stock option may be granted under the 2006 Plan after the ten year anniversary of its adoption.

In no event may the term of any option exceed ten years from the date of grant of the option. However, in no event may the term of any option granted to a 10% Holder exceed five years from the date of grant of the option. No option may be exercised after its expiration.

Each option granted under the 2006 Plan will become exercisable, in whole or in part, at such time or times during its term as the instrument evidencing the grant of such option may specify.

The price at which ordinary shares may be purchased upon any exercise of an option granted under the 2006 Plan will be the price per share determined by the Committee, and specified in the instrument evidencing the grant of such option, but in no event may the exercise price per share be less than (i) the fair market value of an ordinary share determined as of the date of grant of the option, or (ii), if greater, the par value of an ordinary share. However, with respect to an option granted to a 10% Holder, in no event may the exercise price per share be less than 110% of the fair market value of our ordinary shares determined as of the date of grant of such option.

Options granted under the 2006 Plan are nontransferable, other than by will or the laws of descent and distribution, and may be exercised during the grantee’s lifetime only by the grantee. However, if the instrument evidencing the grant of an option other than an incentive stock option so provides, the grantee may transfer his or her rights with respect to such option or any portion thereof, without consideration, to any “family member,” as such term is defined in the 2006 Plan.

The terms and conditions of an option grant may not be waived or amended without the consent of the grantee if it would adversely affect, to any material extent, any of the rights or obligations of the grantee with respect to such grant, or in the case of any option that was intended to constitute an incentive stock option, if such waiver or amendment would cause such option to fail to be treated as an incentive stock option.

Our Board of Directors may, with prospective or retroactive effect, amend, suspend or terminate the 2006 Plan or any portion of the 2006 Plan at any time. However, no amendment, suspension or termination of the 2006 Plan may adversely affect the rights of any grantee with respect to any options previously granted to the grantee without his or her written consent. Also, no amendment which constitutes a “material revision” of the 2006 Plan, within the meaning of such term under NASDAQ rules, may be effective unless approved by our shareholders in the manner required by such rules and by applicable law.

During 2015, no options were granted under the 2006 Plan and no options were exercised. At December 31, 2015, options to purchase 149,500 ordinary shares were outstanding under the 2006 Plan, exercisable at an average exercise price of \$1.52 per share.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

A. Major Shareholders

The following table sets forth certain information as of March 24, 2016 regarding the beneficial ownership by all shareholders known to us to own beneficially 5.0% or more of our ordinary shares:

| Name | Number of Ordinary Shares Beneficially Owned(1) | Percentage of Outstanding Ordinary Shares(2) |
|-----------------------|---|--|
| Haim Mer and Dora Mer | 1,303,426 (3) | 16.2 % |
| Roger Challen | 992,708 (4) | 12.3 % |
| Tzvika Friedman | 539,940 (5) | 6.7 % |
| David Sussan | 539,940 (6) | 6.7 % |
| Kobi Ram | 451,055 (7) | 5.6 % |
| Amit Reshef | 448,555 (8) | 5.6 % |

(1) Beneficial ownership is determined in accordance with the rules of the SEC and generally includes voting or investment power with respect to securities. Ordinary shares relating to options currently exercisable or exercisable within 60 days of the date of this table are deemed outstanding for computing the percentage of the person holding such securities but are not deemed outstanding for computing the percentage of any other person. Except as indicated by footnote, and subject to community property laws where applicable, the persons named in the table above have sole voting and investment power with respect to all shares shown as beneficially owned by them.

(2) The percentages shown are based on 8,043,380 ordinary shares (excluding 5,400 ordinary shares held as treasury stock) issued and outstanding as of March 24, 2016.

(3) Based upon a Schedule 13D/A filed with the SEC on June 15, 2015 and other information available to us. Mr. Haim Mer and his wife, Mrs. Dora Mer, are the record holders of 425,382 ordinary shares and the beneficial owners of 872,226 ordinary shares through their controlling interest in Mer Ofekim Ltd., 5,770 ordinary shares through their controlling interest in Mer Services Ltd. and 48 ordinary shares through their controlling interest in Mer & Co. (1982) Ltd.

(4) Based upon a Schedule 13D filed with the SEC on September 6, 2012 and other information available to us. The ordinary shares are held of record by the Info Group, Inc., a Massachusetts corporation controlled by Mr. Roger Challen. Accordingly, Mr. Roger Challen may be deemed to have the sole voting and dispositive power as to the ordinary shares held of record by The Info Group, Inc.

(5) Based upon a Schedule 13D filed with the SEC on April 15, 2015.

(6) Based upon a Schedule 13G filed with the SEC on April 30, 2015.

(7) Based upon a Schedule 13G filed with the SEC on April 23, 2015 and other information available to us. Includes options exercisable into 15,000 ordinary shares currently exercisable or exercisable within 60 days of the date of this table.

(8)Based upon a Schedule 13G filed with the SEC on April 30, 2015 and other information available to us. Includes options exercisable into 12,500 ordinary shares currently exercisable or exercisable within 60 days of the date of this table.

Significant Changes in the Ownership of Major Shareholders

In April 2015, we issued 3,115,090 ordinary shares in connection with the acquisition of Vexigo. This issuance had the effect of diluting the holdings of the existing shareholders and introduced four new major shareholders, key employees of Vexigo (Messrs. Friedman, Sussan, Ram and Reshef). As a result of the Vexigo transaction Messrs. Friedman, Sussan, Ram and Reshef acquired 539, 940 (6.7%), 539, 940 (6.7%), 451,055 (5.6%) and 451,055 (5.6%) of our ordinary shares, respectively.

Mr. Haim Mer purchased 102,272 of our ordinary shares pursuant to a share purchase agreement on May 11, 2015, among him, our company and other purchasers. The aggregate purchase price for such 102,272 ordinary shares was \$225,000, or \$2.20 per share. During 2015, Mr. Mer purchased 88,500 ordinary shares in the open market. The combined effect of these purchases during 2015 increased Haim Mer's and Dora Mer's holdings to 1,303,426 ordinary shares, while decreasing their ownership interest from 23.8% to 16.2%.

Mr. Challen's holdings were diluted from 21.2% to 12.3%.during 2015 because of the various issuances of ordinary shares by our company.

Major Shareholders Voting Rights

Our major shareholders do not have different voting rights.

Record Holders

Based on a review of the information provided to us by our transfer agent, as of March 25, 2016, there were 126 holders of record of our ordinary shares, of which 61 record holders holding approximately 41.5% of our ordinary shares had registered addresses in the United States. These numbers are not representative of the number of beneficial holders of our shares nor are they representative of where such beneficial holders reside, since many of these ordinary shares were held of record by brokers or other nominees (including one U.S. nominee company, CEDE & Co., which held approximately 28.6% of our outstanding ordinary shares as of such date).

B. Related Party Transactions

C. Mer is a publicly traded company in which Mr. Haim Mer, our chairman of the Board, is a member of the controlling group. Mr. Mer has been the chairman of the board of directors of C. Mer since 1988 and served as its President and Chief Executive Officer from 1988 until January 2005. Presently, the only service provided to us by C. Mer is our participation in its umbrella liability insurance coverage. We believe that the terms under which C. Mer provides such participation to us is on a basis no less favorable than could be obtained from an unaffiliated third party. In 2012, we engaged with Mer Telecom Ltd., a subsidiary of C. Mer, in a deployment of a Mobile Financial Services (MFS) solution for a customer in Africa in a revenue share model with a minimum total value of \$460,000 over a three year period. The transaction was approved by our board of directors and we completed its deployment in 2013 and received the setup fee of \$100,000. As of December 31, 2015, the solution was implemented, but the customer has not as yet activated the solution. In 2014 we engaged with Athena Ltd., a subsidiary of C. Mer, in a deployment of a Mobile Financial Services (MFS) solution for a customer in Africa for an aggregate amount of \$65,000. The transaction was approved by our board of directors and as of December 31, 2015, the solution was completed and delivered, and we recognized the revenues in connection with this transaction.

Beginning January 1, 2009 and as part of the acquisition of certain assets and liabilities of the telecommunications expense management solutions business of AnchorPoint (now known as The Info Group Inc.), or the AnchorPoint Acquisition, Mr. Roger Challen, the controlling shareholder and chief executive officer of AnchorPoint, was employed by us at an annual salary of \$77,760. We terminated such employment relationship effective as of June 30, 2011, and instead, our shareholders authorized his provision of consultancy services to us at a monthly cost of \$2,000. As we did not enter into a consulting agreement with Mr. Challen, nor were consulting fees paid, our audit committee, Board of Directors and shareholders approved the payment of fees to him effective from January 1, 2012 and for the duration of his service as a non-employee director. The fees are equivalent to the fees we pay to some of our other non-employee directors for their service in such capacity (an annual fee of \$8,400 and a per meeting attendance fee of \$300). Mr. Challen also receives reimbursement of travel related expenses in connection with his attendance of Board of Directors' meetings, pursuant to guidelines for reimbursement of director travel related expenses approved by our Audit Committee and Board of Directors. In addition, in connection with the AnchorPoint Acquisition, we received certain services from Data Distributors, Inc., a company controlled by Mr. Challen. These services include reimbursement for shared expenses, development and IT services, other administrative services and rental related fees. Expenses recognized with respect to the above mentioned services were approximately \$0, \$30 and \$9 for the year ended December 31, 2013, 2014 and 2015, respectively. We also rent an office from Mr. Challen in Powder Springs, Georgia, where we occupy approximately 4,800 square feet of space under a month-to-month lease, for a monthly rental fee of approximately \$4,700. Mr. Challen is the controlling shareholder of the Info Group Inc., which is the beneficial owner of 12.3% of our ordinary shares.

On March 25, 2009, our Audit Committee and Board of Directors approved a transaction with Mer & Co. (1982) Ltd., or Mer & Co., a subsidiary of C. Mer that is an approved supplier of the Israeli Defense Forces. According to the terms of the transaction, we sell our products to Mer & Co., which then represents us and resells our products to the Israeli Defense Forces. For these services, we agreed to pay Mer & Co. 5% of the amounts we receive from the Israeli Defense Forces for our products; however, as of December 31, 2015, the fee was immaterial and Mer & Co. has provided such services without charge.

Mr. Lior Salansky, our current chief executive officer, acted as a consultant to our Board of Directors prior to his assuming his position as chief executive officer in connection with prospective acquisitions. Under a consulting agreement entered into on May 18, 2014, he received a warrant based on a cashless exercise mechanism to acquire 2% of our outstanding ordinary shares on a pre-closing basis (93,453 ordinary shares based on the number of shares outstanding prior to the closing) with an exercise price equal to the market price of our ordinary shares at the signing of the relevant agreement (i.e., \$0.96 per share) valid for a period of five years.

We issued to Messrs. Haim Mer, Lior Salansky and Adi Orzel 102,272, 102,272 and 22,727 ordinary shares, respectively, pursuant to a share purchase agreement on May 11, 2015, among our company and these purchasers. The aggregate purchase price for such 227,721 ordinary shares was \$500,000, all of which amounts were paid by the officers from their personal funds.

For a description of the rescheduling of payments due to officers who were former shareholders of Vexigo, pursuant to the Vexigo SPA, see Item 3D. “Key Information - Risk Factors” and Item 5B. “Operating and Financial Review and Prospects -- Liquidity and Capital Resources.”

C. Interests of Experts and Counsel

Not applicable.

ITEM 8. FINANCIAL INFORMATION

A. Consolidated Statements and Other Financial Information

Financial Statements

See the consolidated financial statements, including the notes thereto included in Item 18.

Export Sales

See Note 14 of our consolidated financial statements.

Legal Proceedings

During August 2007, our now inactive Brazilian subsidiary, TABS Brazil Ltda., was ordered by the Labor Law Court in Brazil to pay approximately 167,000 Brazilian Reals (approximately \$43,000) to one of its former employees. Such amount bears interest at a rate of 1% per month from the date that the claim was filed. We recorded a provision in our financial statements for the amount deemed probable.

We are a party to various other claims that arise in the ordinary course of business. Accordingly, we have recorded a provision of approximately \$106,000 in respect of such claims in accordance with ASC 450, “Contingencies,” based on the opinion of our management and legal advisors. There were no legal or arbitration proceedings, including those relating to bankruptcy, receivership or similar proceedings and those involving any third party, which may have, or have had in the recent past, significant effects on our financial position or profitability.

Dividend Distribution Policy

We have never paid cash dividends to our shareholders. We intend to retain future earnings for use in our business and do not anticipate paying cash dividends on our ordinary shares in the foreseeable future. Any future dividend policy will be determined by our Board of Directors and will be based upon conditions then existing, including our results of operations, financial condition, current and anticipated cash needs, contractual restrictions and other conditions as the Board of Directors may deem relevant.

According to the Israeli Companies Law, a company may generally distribute dividends only out of its profits (as such term is defined in the Israeli Companies Law), provided that there is no reasonable concern that payment of the dividend will prevent the company from satisfying all its current and foreseeable obligations, as they become

due. Notwithstanding the foregoing, dividends may be paid with the approval of a court, at the company's request, provided that there is no reasonable concern that payment of the dividend will prevent the company from satisfying its current and foreseeable obligations, as they become due. In the event cash dividends are declared, such dividends will be paid in NIS.

B. Significant Changes

Except as otherwise disclosed in this annual report, no significant change has occurred since December 31, 2015.

ITEM 9. THE OFFER AND LISTING

A. Offer and Listing Details

Annual Stock Information

The following table sets forth, for each of the years indicated, the range of high ask and low bid prices of our ordinary shares on the NASDAQ Capital Market.

| Year | High | Low |
|------|---------|---------|
| 2015 | \$ 3.20 | \$ 0.75 |
| 2014 | \$ 2.67 | \$ 0.98 |
| 2013 | \$ 5.11 | \$ 1.55 |
| 2012 | \$ 3.99 | \$ 1.37 |
| 2011 | \$ 2.14 | \$ 1.15 |

Quarterly Stock Information

The following table sets forth, for each of the full financial quarters in the years indicated, the range of high ask and low bid prices of our ordinary shares on the NASDAQ Capital Market.

| | High | Low |
|----------------------------------|---------|---------|
| 2014 | | |
| First Quarter | \$ 2.63 | \$ 1.74 |
| Second Quarter | \$ 2.11 | \$ 1.49 |
| Third Quarter | \$ 1.99 | \$ 1.21 |
| Fourth Quarter | \$ 1.63 | \$ 0.99 |
| 2015 | | |
| First Quarter | \$ 2.30 | \$ 0.75 |
| Second Quarter | \$ 3.10 | \$ 1.50 |
| Third Quarter | \$ 3.20 | \$ 1.14 |
| Fourth Quarter | \$ 1.45 | \$ 0.75 |
| 2016 | | |
| First Quarter (through March 23) | \$ 1.16 | \$ 0.69 |

Monthly Stock Information

The following table sets forth, for each of the most recent six months, the range of high ask and low bid prices of our ordinary shares on the NASDAQ Capital Market.

| Month | High | Low |
|---------------|---------|---------|
| October 2015 | \$ 1.45 | \$ 1.21 |
| November 2015 | \$ 1.40 | \$ 0.75 |

| | | |
|-------------------------------|---------|---------|
| December 2015 | \$ 0.96 | \$ 0.79 |
| January 2016 | \$ 0.90 | \$ 0.72 |
| February 2016 | \$ 0.80 | \$ 0.71 |
| March 2016 (through March 23) | \$ 1.16 | \$ 0.69 |

B. Plan of Distribution

F. Expense of the Issue

Not applicable.

ITEM 10. ADDITIONAL INFORMATION

A. Share Capital

Not applicable.

B. Memorandum and Articles of Association

Set out below is a description of certain provisions of our Articles of Association and of the Israeli Companies Law related to such provisions. This description is only a summary and does not purport to be complete and is qualified by reference to the full text of the Articles of Association, which are incorporated by reference as exhibits to this Annual Report, and to Israeli law.

Purposes and Objects of the Company

We are a public company registered under the Israeli Companies Law as MER Telemanagement Solutions Ltd., registration number 520042904. Our objects and purposes, as provided by our Articles of Association, are to carry on any lawful activity.

The Powers of the Directors

Under the provisions of the Israeli Companies Law and our Articles of Association, a director cannot participate in a meeting nor vote on a proposal, arrangement or contract in which he or she is materially interested, unless the majority of the Board of Directors or relevant committee, as the case may be, has a personal interest in the transaction. In addition, our directors cannot approve compensation to themselves or any members of their body without the approval of our compensation committee and our shareholders at a general meeting. See Item 6C. "Directors, Senior Management and Employees – Board Practices – Compensation Committee."

The authority of our directors to enter into borrowing arrangements on our behalf is not limited, except in the same manner as any other transaction by us.

Under our Articles of Association, retirement of directors from office is not subject to any age limitation and our directors are not required to own shares in our company in order to qualify to serve as directors.

Rights Attached to Shares

Our authorized share capital consists of 20,000,000 ordinary shares of a nominal value of NIS 0.01 each. All outstanding ordinary shares are validly issued, fully paid and non-assessable.

The rights attached to the ordinary shares are as follows:

69

Dividend rights. Holders of our ordinary shares are entitled to the full amount of any cash or share dividend subsequently declared. The board of directors may declare interim dividends and propose the final dividend with respect to any fiscal year only out of the retained earnings, in accordance with the provisions of the Israeli Companies Law. Our Articles of Association provide that the declaration of a dividend requires approval by an ordinary resolution of the shareholders, which may decrease but not increase the amount proposed by the board of directors. See Item 8A. “Financial Information – Consolidated and Other Financial Information – Dividend Distribution Policy.” If after one year a dividend has been declared and it is still unclaimed, the board of directors is entitled to invest or utilize the unclaimed amount of dividend in any manner to our benefit until it is claimed. We are not obligated to pay interest or linkage differentials on an unclaimed dividend.

Voting rights. Holders of ordinary shares have one vote for each ordinary share held on all matters submitted to a vote of shareholders. Such voting rights may be affected by the grant of any special voting rights to the holders of a class of shares with preferential rights that may be authorized in the future.

The quorum required for an ordinary meeting of shareholders consists of at least two shareholders present in person or represented by proxy who hold or represent, in the aggregate, at least one third of the voting rights of the issued share capital. A meeting adjourned for lack of a quorum generally is adjourned to the same day in the following week at the same time and place or any time and place as the directors designate in a notice to the shareholders. At the reconvened meeting, the required quorum consists of any two members present in person or by proxy.

An ordinary resolution, such as a resolution for the declaration of dividends, requires approval by the holders of a majority of the voting rights represented at the meeting, in person, by proxy or by written ballot, and voting thereon. Under our Articles of Association, a special resolution, such as amending our memorandum of association or articles of association, approving any change in capitalization, winding-up, authorization of a class of shares with special rights, or other changes as specified in our Articles of Association, requires approval of a special majority, representing the holders of no less than 75% of the voting rights represented at the meeting in person, by proxy or by written ballot, and voting thereon.

Pursuant to our Articles of Association, our directors (other than outside directors) are elected at our annual general meeting of shareholders by a vote of the holders of a majority of the voting power represented and voting at such meeting and hold office until the next annual general meeting of shareholders and until their successors have been elected. All the members of our Board of Directors (except the outside directors who generally have a limitation of three three-year terms) may be reelected upon completion of their term of office. For information regarding the election of outside directors, see Item 6C. “Directors, Senior Management and Employees – Board Practices – Election of Directors - Outside and Independent Directors - Outside Directors.”

Rights to share in our company’s profits. Our shareholders have the right to share in our profits distributed as a dividend and any other permitted distribution. See this Item 10B. “Additional Information – Memorandum and Articles of Association – Rights Attached to Shares – Dividend Rights.”

Rights to share in surplus in the event of liquidation. In the event of our liquidation, after satisfaction of liabilities to creditors, our assets will be distributed to the holders of ordinary shares in proportion to the nominal value of their holdings. This right may be affected by the grant of preferential dividend or distribution rights to the holders of a class of shares with preferential rights that may be authorized in the future.

Liability to capital calls by our company. Under our memorandum of association and the Israeli Companies Law, the liability of our shareholders is limited to the par value of the shares held by them.

Limitations on any existing or prospective major shareholder. See Item 6C. “Directors and Senior Management –Board Practices - Approval of Related Party Transactions Under Israeli Law.”

Changing Rights Attached to Shares

According to our Articles of Association, in order to change the rights attached to any class of shares, unless otherwise provided by the terms of the class, such change must be adopted by a general meeting of the shareholders and by a separate general meeting of the holders of the affected class with a majority of 75% of the voting power participating in such meeting and voting on the matter.

Annual and Extraordinary Meetings

Under the Israeli Companies Law a company must convene an annual meeting of shareholders at least once every calendar year and within 15 months of the last annual meeting. Depending on the matter to be voted upon, notice of up to 35 days prior to the date of the meeting is required. Our board of directors may, in its discretion, convene additional meetings as “special general meetings.” In addition, the board must convene a special general meeting upon the demand of two of the directors or 25% of the directors, one or more shareholders holding at least 5% of the outstanding share capital and at least 1% of the voting power in the company, or one or more shareholders holding at least 5% of the voting power in the company. See Item 10B. “Additional Information - Memorandum and Articles of Association - Rights Attached to Shares - Voting Rights.”

Limitations on the Rights to Own Securities in Our Company

Neither our memorandum of association nor our articles of association nor any applicable law restrict in any way the ownership or voting of shares by non-residents of Israel, except with respect to subjects of countries that are in a state of war with Israel.

Provisions Restricting Change in Control of Our Company

Tender Offer

The Israeli Companies Law provides that an acquisition of shares in a public company must be made by means of a tender offer if as a result of the acquisition the purchaser would become a 25% or greater shareholder of the company. This rule does not apply if there is already another 25% or greater shareholder of the company. Similarly, the Israeli Companies Law provides that an acquisition of shares in a public company must be made by means of a tender offer if as a result of the acquisition the purchaser would hold greater than a 45% interest in the company, unless there is another shareholder holding more than a 45% interest in the company. These requirements do not apply if, in general, the acquisition: (1) was made in a private placement that received shareholder approval as a private placement and was meant to grant the purchaser 25% or more of the voting rights of a company in which no other shareholder holds 25% or more of the voting rights, or to grant the purchaser more than 45% of the voting rights of a company in which no other shareholder holds more than 45% of the voting rights, (2) was from a 25% or greater shareholder of the company which resulted in the acquiror becoming a 25% or greater shareholder of the company, or (3) was from a shareholder holding more than a 45% interest in the company which resulted in the acquiror becoming a holder of more than a 45% interest in the company.

If, as a result of an acquisition of shares, the acquiror will hold more than 90% of a company’s outstanding shares, the acquisition must be made by means of a tender offer for all of the outstanding shares, or a full tender offer. A full tender offer is accepted if either: (i) holders of less than 5% of the outstanding shares do not accept the tender offer and more than half of the offerees who do not have a personal interest in accepting the tender offer accepted it, or (ii) holders of less than 2% of the outstanding shares do not accept the tender offer. If the full tender offer is not accepted, then the acquiror may not acquire shares in the tender offer that will cause his shareholding to exceed 90% of the outstanding shares.

The Israeli Companies Law provides for appraisal rights in the event a full tender offer is accepted if the shareholder files a request with the court within six months following the consummation of a full tender offer. The acquirer may provide in the tender offer documents that any shareholder that accepted the offer and tendered his shares will not be entitled to appraisal rights.

Merger

The Israeli Companies Law permits merger transactions if approved by each party's board of directors and, except under certain circumstances specified below, by the majority of each party's shares voted on the proposed merger at a shareholders meeting convened upon prior notice of at least 35 days (which may be shortened to 14 days in certain circumstances). The Israeli Companies Law provides that a company that was incorporated prior to the enactment of the Israeli Companies Law, such as us, will be deemed to have a provision in its articles of association requiring a majority of 75% of the shareholders participating and voting on the matter for purposes of approval of a merger. A merger is defined as the transfer of all assets and liabilities, including conditional, future, known and unknown debts of the target company to the surviving company, as a result of which the target company is liquidated, and stricken out of the Companies Register.

Under the Israeli Companies Law, if one of the merging companies, or a shareholder that holds 25% or more of the means of control of one of the merging companies, or a 25% shareholder, holds shares of the other merging company, then a dissenting vote of holders of the majority of the shares of the other merging company present and voting, excluding shares held by the merging company or a 25% shareholder thereof, or by anyone acting on behalf of either of them, their relatives and corporations controlled by them, is sufficient to reject the merger transaction. Means of control are defined as any of the following: (i) the right to vote at a general meeting of a company; and (ii) the right to appoint a director of a company. If the transaction would have been approved but for the exclusion of the votes as previously indicated, a court may still approve the merger upon the request of holders of at least 25% of the voting rights of the company. The court will not approve a merger unless it is convinced that the merger is fair and reasonable, taking into account the values of the merging companies and the consideration offered to the shareholders. Upon the request of a creditor of either party to the proposed merger, the court may delay or prevent the merger if it concludes that there exists a reasonable concern that, as a result of the merger, the surviving company will be unable to satisfy the obligations of the merged company. In addition, a merger may not be completed unless at least 50 days have passed from the date that a proposal for approval of the merger was filed with the Israeli Registrar of Companies and 30 days have passed from the date that shareholder approval of both merging companies was obtained.

Notwithstanding the foregoing, a merger is not subject to the approval of the shareholders of the target company if the target company is a wholly-owned subsidiary of the surviving company. In addition, a merger is not subject to the approval of the shareholders of the surviving company if:

- the merger does not require the alteration of the memorandum or articles of association of the surviving company;
- the surviving company would not issue more than 20% of the voting rights thereof in the course of the merger and no person will become, as a result of the issuance, a controlling shareholder of the surviving company (for this purpose any securities convertible into shares of the surviving company that such person holds or that are issued to him in the course of the merger are deemed to have been converted or exercised);
 - neither the target company, nor any shareholder that holds 25% of the means of control of the target company is a shareholder of the surviving company; and
 - there is no person that holds 25% or more of the means of control in both companies.

Disclosure of Shareholders Ownership

The Israeli Securities Law and regulations promulgated thereunder do not require shareholders of a company whose shares are publicly traded solely on a stock exchange outside of Israel, as in the case of our company, to disclose their share ownership.

Changes in Our Capital

Changes in our capital are subject to the approval of the shareholders at a general meeting by a special majority of 75% of the votes of shareholders participating and voting in the general meeting.

C. Material Contracts

In April 2015, we entered into the Vexigo SPA, and certain terms were re-negotiated in September 2015 and February 2016. See Item 3D. “Key Information - Risk Factors” and Item 5B. “Operating and Financial Review and Prospects -- Liquidity and Capital Resources.”

We issued to Messrs. Haim Mer, Lior Salansky and Adi Orzel 102,272, 102,272 and 22,727 ordinary shares, respectively, pursuant to a share purchase agreement dated May 11, 2015. The aggregate purchase price for such 227,721 ordinary shares was \$500,000, all of which funds were received at the closing.

D. Exchange Controls

Israeli law and regulations do not impose any material foreign exchange restrictions on non-Israeli holders of our ordinary shares.

Non-residents of Israel who purchase our ordinary shares will be able to convert dividends, if any, thereon, and any amounts payable upon our dissolution, liquidation or winding up, as well as the proceeds of any sale in Israel of our ordinary shares to an Israeli resident, into freely repatriable dollars, at the exchange rate prevailing at the time of conversion, provided that the Israeli income tax has been withheld (or paid) with respect to such amounts or an exemption has been obtained.

E. Taxation

The following is a discussion of Israeli and United States tax consequences material to our shareholders. To the extent that the discussion is based on new tax legislation which has not been subject to judicial or administrative interpretation, the views expressed in the discussion might not be accepted by the tax authorities in question. The discussion is not intended, and should not be construed, as legal or professional tax advice and does not exhaust all possible tax considerations.

Holders of our ordinary shares should consult their own tax advisors as to the United States, Israeli or other tax consequences of the purchase, ownership and disposition of ordinary shares, including, in particular, the effect of any foreign, state or local taxes.

Israeli Tax Considerations

The following is a summary of the current tax structure applicable to companies in Israel, with special reference to its effect on us. The following also contains a discussion of the material Israeli tax consequences to purchasers of our ordinary shares and Israeli government programs benefiting us. This summary does not discuss all the aspects of Israeli tax law that may be relevant to a particular investor in light of his or her personal investment circumstances or to some types of investors subject to special treatment under Israeli law.

General Corporate Tax Structure

Generally, Israeli companies are subject to "Corporate Tax" at their taxable income. The Israeli corporate tax rate was 25% in 2012 and remained 25% in 2013. The corporate tax rate has been increased to 26.5% in 2014. On January 5, 2016 the Israeli Parliament passed an amendment to the Israeli Income Tax Ordinance, by which, inter alia, the corporate tax rate would be decreased to a rate of 25% as from 2016.

Controlled Foreign Companies

Under the controlled foreign companies rules an Israeli company may become subject to Israeli taxes (as deemed dividends) on non-distributed profits of a non-Israeli subsidiary if the subsidiary's primary source of income is passive income (such as interest, dividends, royalties, rental income or capital gains) and if the taxes imposed outside of Israel are no more than 15% of the profits.

Tax Benefits Under the Law for the Encouragement of Capital Investments, 1959

The Law for the Encouragement of Capital Investments, 1959, commonly referred to as the Investment Law, provides that a proposed capital investment in eligible facilities may, upon application to the Investment Center of the Ministry

of Industry, Trade and Labor of the State of Israel, be designated as an approved enterprise. Each certificate of approval for an approved enterprise relates to a specific investment program delineated both by its financial scope, including its capital sources, and by its physical characteristics, e.g., the equipment to be purchased and utilized pursuant to the program. An approved enterprise is entitled to benefits including Israeli Government cash grants and tax benefits in specified development areas. The tax benefits derived from any such certificate of approval relate only to taxable income attributable to the specific approved enterprise. If a company has more than one approval or only a portion of its capital investments is approved, its effective tax rate is the result of a weighted average of the applicable rates.

Taxable income of a company derived from an approved enterprise is subject to corporate tax at the maximum rate of 25% (rather than the regular corporate tax rate) for the benefit period. This period is ordinarily seven years (or 10 years if the company qualifies as a foreign investors' company as described below) commencing with the year in which the approved enterprise first generates taxable income, and is limited to 12 years from commencement of production or 14 years from the date of approval, whichever is earlier, referred to as "the years limitation." Tax benefits under the Investments Law also apply to income generated from the grant of a usage right with respect to know-how developed by the approved enterprise, income generated from royalties, and income derived from a service which is auxiliary to such usage right or royalties, provided that such income is generated within the approved enterprise's ordinary course of business. The Investment Law also provides that a company that has an approved enterprise within Israel will be eligible for a reduced tax rate and is entitled to claim accelerated depreciation on buildings, machinery and equipment used by the approved enterprise during the first five years of use.

A company owning an approved enterprise may elect to forego entitlement to the grants otherwise available under the Investment Law and in lieu thereof participate in an alternative track of benefits. Under the alternative track of benefits, a company's undistributed income derived from an approved enterprise will be exempt from company tax for a period of two years from the first year of taxable income and such company will be eligible for a reduced tax rate for the remainder, if any, of the otherwise applicable benefits period.

A company that has an approved enterprise program is eligible for further tax benefits if it qualifies as a foreign investors' company. A foreign investors' company is a company that more than 25% of its share capital and combined share and loan capital is owned by non-Israeli residents. A company, which qualifies as a foreign investors' company and has an approved enterprise program is eligible for tax benefits for a ten-year benefit period. The company tax rate applicable to income from the approved enterprise earned in the benefit period (distributed or not) is as follows:

| | The company tax rate is |
|--|-------------------------------|
| For a company with foreign investment of over 25% but less than 49% | 25 % |
| 49% or more but less than 74% | 20 % |
| 74% or more but less than 90% | 15 % |
| 90% or more | 10 % |

In addition, the dividend recipient is taxed at the reduced rate applicable to dividends from approved enterprises income (15%, unless a different tax rate is provided under an applicable tax treaty), if the dividend, deriving from the approved enterprises, is distributed during the tax benefit period or within 12 years thereafter, yet, no time limit is applicable to dividends from a foreign investment company. The dividend recipient is taxed at the rate applicable to dividends from preferred enterprise is 20%. The company must withhold this tax at source, regardless of whether the dividend is converted into foreign currency. However, if retained tax-exempt income is distributed in a manner other than upon the complete liquidation of the company, the company would be taxed at the reduced corporate tax rate applicable to such profits (between 10%-25%).

We have been granted approved enterprise status with respect to several investment programs and chose the alternative track with respect to each of these programs. See Item 5A. "Operating and Financial Review and Prospects - Operating Results - Effective Corporate Tax Rate."

The benefits available to an approved enterprise are conditional upon the fulfillment of conditions stipulated in the Investment Law and its regulations and the criteria set forth in the specific certificate of approval, as described above. In the event that a company does not meet these conditions, its tax benefits could be canceled, in whole or in part, and it would be required to refund the amount of tax benefits, with the addition of the Israeli consumer price

index linkage adjustment and interest.

An amendment to the Investments Law, which came into effect on April 1, 2005, changed certain provisions of such law, including the criteria for investments qualified to receive tax benefits under the Investments Law. An eligible investment program under the amendment will qualify for benefits as a “Privileged Enterprise” (rather than the previous terminology of Approved Enterprise). As a result of the amendment, a company is no longer obliged to acquire approved enterprise status in order to receive the tax benefits previously available under the alternative benefits track, and therefore there is no need to apply to the Investment Center for this purpose (however, approved enterprise status remains mandatory for companies seeking grants). Rather, a company may claim the tax benefits offered by the Investment Law directly in its tax returns, provided that its facilities meet the criteria for tax benefits set out by the amendment. Companies may also approach the Israeli Tax Authority for a pre-ruling regarding its eligibility for benefits under the amendment. The amendment does not apply to investment programs approved prior to December 31, 2004. The new tax regime will apply only to new investment programs.

Tax benefits are available under the April 2005 amendment to production facilities (or other eligible facilities), which are generally required to derive more than 25% of their business income from export. In order to receive the tax benefits, a company must make an investment in the Privileged Enterprise exceeding a minimum amount specified in the Investment Law. Such investment may be made over a period of no more than three years ending at the end of the year in which the company requested to have the tax benefits apply to the Privileged Enterprise, referred to as the Year of Election. Where the company requests to have the tax benefits apply to an expansion of existing facilities, only the expansion will be considered a Privileged Enterprise and the company's effective tax rate will be the result of a weighted combination of the applicable rates. In such case, the minimum investment required in order to qualify as a Privileged Enterprise is required to exceed a certain percentage of the company's production assets before the expansion.

To date, we have not utilized the benefits of the Investment Law, as amended subsequent to April 1, 2005, since we are utilizing carryforward losses from previous years for tax purposes.

Tax benefits under the 2011 Amendment that became effective on January 1, 2011:

The 2011 Amendment canceled the availability of the benefits granted in accordance with the provisions of the Investment Law prior to 2011 and, instead, introduced new benefits for income generated by a "Preferred Company" through its Preferred Enterprise (as such terms are defined in the Investment Law) as of January 1, 2011. A Preferred Company is defined as either (i) a company incorporated in Israel which is not wholly owned by a governmental entity or (ii) a limited partnership that (a) was registered under the Israeli Partnerships Ordinance and (b) all of its limited partners are companies incorporated in Israel, but not all of them are governmental entities; which has, among other things, Preferred Enterprise status and is controlled and managed from Israel. Pursuant to the 2011 Amendment, a Preferred Company is entitled to a reduced corporate tax rate of 15% with respect to its preferred income attributed to its Preferred Enterprise in 2011 and 2012, unless the Preferred Enterprise is located in a certain development zone, in which case the rate will be 10%. Such corporate tax rate was reduced to 12.5% and 7%, respectively, in 2013 and was increased to 16% and 9%, respectively, in 2014 and thereafter. Income derived by a Preferred Company from a 'Special Preferred Enterprise' (as such term is defined in the Investment Law) would be entitled, during a benefits period of 10 years, to further reduced tax rates of 8%, or to 5% if the Special Preferred Enterprise is located in a certain development zone.

The 2011 Amendment also provided transitional provisions to address companies already enjoying current benefits under the Investment Law. These transitional provisions provide, among other things, that unless an irrevocable request is made to apply the provisions of the Investment Law as amended in 2011 with respect to income to be derived as of January 1, 2011: (i) the terms and benefits included in any certificate of approval that was granted to an Approved Enterprise, which chose to receive grants, before the 2011 Amendment became effective, will remain subject to the provisions of the Investment Law as in effect on the date of such approval, and subject to certain conditions; (ii) the terms and benefits included in any certificate of approval that was granted to an Approved Enterprise, that had participated in an alternative benefits program, before the 2011 Amendment became effective, will remain subject to the provisions of the Investment Law as in effect on the date of such approval, provided that certain conditions are met; and (iii) a Benefited Enterprise can elect to continue to benefit from the benefits provided to it before the 2011 Amendment came into effect, provided that certain conditions are met. As of December 31, 2014, our Israeli subsidiaries had not filed a request to apply the new benefits under the 2011 Amendment.

Tax Benefits for Research and Development

Israeli tax law allows, under specified conditions, a tax deduction for expenditures, including capital expenditures, in the year incurred relating to scientific research and development projects, if the expenditures are approved by the Office of the Chief Scientist, determined by the field of research, and the research and development is for the

promotion of the company and is carried out by or on behalf of the company seeking such deduction. However, the amount of such deductible expenses shall be reduced by the sum of any funds received through government grants for the finance of such scientific research and development projects. Expenditures not so approved are deductible over a three-year period.

Tax Benefits Under the Law for the Encouragement of Industry (Taxes), 1969

Under the Law for the Encouragement of Industry (Taxes), 1969, or the Industry Encouragement Law, Industrial Companies are entitled to certain corporate tax benefits, including, among others:

- deduction, under certain conditions, of purchases of know-how and patents over an eight-year period for tax purposes;
- right to elect, under specified conditions, to file a consolidated tax return with additional related Israeli Industrial Companies; and
- deductions over a three-year period of expenses involved with the issuance and listing of shares on the Tel Aviv Stock Exchange or, on or after January 1, 2003, on a recognized stock market outside of Israel.

Eligibility for benefits under the Industry Encouragement Law is not subject to receipt of prior approval from any governmental authority. Under the Industry Encouragement Law, an “Industrial Company” is defined as a company resident in Israel, at least 90% of the income of which, in any tax year, determined in Israeli currency, exclusive of income from government loans, capital gains, interest and dividends, is derived from an “Industrial Enterprise” owned by it. An “Industrial Enterprise” is defined as an enterprise owned by an Industrial Company, whose major activity in a given tax year is industrial production activity.

We believe that we currently qualify as an Industrial Company within the definition of the Industry Encouragement Law. No assurance can be given that we will continue to qualify as an Industrial Company or that the benefits described above will be available in the future.

Grants under the Law for the Encouragement of Industrial Research and Development, 1984

The Government of Israel encourages research and development projects through the Office of Chief Scientist of the Israeli Ministry of Industry, Trade and Labor, or the Office of the Chief Scientist, pursuant to the Law for the Encouragement of Industrial Research and Development, 1984, and the regulations promulgated thereunder, commonly referred to as the Research Law. Grants received under such programs are repaid through a mandatory royalty based on revenues from products incorporating know-how developed with the grants. This government support is conditioned upon the ability of the participant to comply with certain applicable requirements and conditions specified in the Office of the Chief Scientist’s programs and with the provisions of the Research Law.

Under the Research Law, research and development programs which meet specified criteria and are approved by a research committee of the Office of the Chief Scientist are eligible for grants of up to 50% of certain of the project’s approved expenditure, as determined by the research committee.

In exchange, the recipient of such grants is required to pay the Office of the Chief Scientist royalties from the revenues derived from products incorporating technology developed within the framework of the approved research and development program or derived from such program (including ancillary services in connection with such program), usually up to 100% of the U.S. dollar-linked value of the total grants received in respect of such program, plus LIBOR interest.

The terms of the Israeli Government participation generally requires that the products developed with such grants be manufactured in Israel and that the know-how developed under an approved research and development program may not be transferred to any third parties outside Israel. However, the Office of the Chief Scientist may approve the transfer of manufacturing rights outside Israel in exchange for an import of different manufacturing into Israel as a

substitute. In addition, under certain circumstances and subject to the Office of the Chief Scientist's prior approval, know-how that has been funded by the Office of the Chief Scientist may be transferred outside of Israel, generally in the following cases: (a) the grant recipient pays to the Office of the Chief Scientist a portion of the consideration paid for such funded know-how (according to a certain formulas), (b) the grant recipient receives know-how from a third party in exchange for its funded know-how, or (c) such transfer of funded know-how arises in connection with certain types of cooperation in research and development activities. No approval is required for the sale or export of any products resulting from such research and development.

The Research Law imposes reporting requirements with respect to certain changes in the ownership of a grant recipient. The law requires the grant recipient and its controlling shareholders and interested parties to notify the Office of the Chief Scientist of any change in control of the recipient or a change in the holdings of the means of control of the recipient that results in a non-Israeli becoming an interested party directly in the recipient and requires the new interested party to undertake to the Office of the Chief Scientist to comply with the Research Law. In addition, the rules of the Office of the Chief Scientist may require prior approval of the Office of the Chief Scientist or additional information or representations in respect of certain of such events. For this purpose, “control” is defined as the ability to direct the activities of a company other than any ability arising solely from serving as an officer or director of the company. A person is presumed to have control if such person holds 50% or more of the means of control of a company. “Means of control” refers to voting rights or the right to appoint directors or the chief executive officer. An “interested party” of a company includes a holder of 5% or more of its outstanding share capital or voting rights, its chief executive officer and directors, someone who has the right to appoint its chief executive officer or at least one director, and a company with respect to which any of the foregoing interested parties owns 25% or more of the outstanding share capital or voting rights or has the right to appoint 25% or more of the directors. Accordingly, any non-Israeli who acquires 1% or more of our ordinary shares will be required to notify the Office of the Chief Scientist that it has become an interested party and to sign an undertaking to comply with the Research Law. Additionally, procedures regulated under the Research Law require the grant recipient to obtain the approval of the Office of the Chief Scientist prior to a change in the holdings of the recipient or change in the holdings of the means of control of the recipient if the recipient’s shares are being issued to a non-Israeli person or entity and require the new non-Israeli party to undertake to the Office of the Chief Scientist to comply with the Research Law.

In the past, we received funding from the Office of the Chief Scientist for selected research and development projects. We did not apply for or receive any research and development grants from the Office of the Chief Scientist during the three years ended December 31, 2015. See Item 5C. “Operating and Financial Review and Prospects - Research and Development” for additional details on the grants that we have received and our contingent liability to the Office of the Chief Scientist.

Taxation of Dividends Paid on Our Ordinary Shares

Taxation of Non-Israeli Shareholders

Under Israeli tax law, a distribution of dividends from income attributable to an Approved Enterprise and Privileged Enterprise will be subject to tax in Israel at the rate of 15%, which is withheld and paid by the company paying the dividend, if the dividend is distributed during the benefits period or within the following 12 years (but the 12-year limitation does not apply to a Foreign Investors Company). Any distribution of dividends from income that is not attributable to an Approved Enterprise will be subject to tax in Israel at the rate of 25%, except that dividends distributed on or after December 1, 2014 to an individual and an entity who is deemed “a substantial shareholder” will be subject to tax at the rate of 30%.

Under the U.S.-Israel tax treaty, the maximum tax on dividends paid to a holder of ordinary shares who is a U.S. resident is 25%. Dividends received by a U.S. company that holds at least 10% of our voting rights will be subject to withholding tax at the rate of 12.5%, provided certain other conditions in the tax treaty are met (or at the tax rate of 15% in respect of dividends paid from income attributable to our Approved Enterprises and Privileged Enterprises).

Dividends paid out of income attributed to a Preferred Enterprise are generally subject to withholding tax at source at the rate of 20% or such lower rate as may be provided in an applicable tax treaty.

Taxation of Israeli Shareholders

Israeli resident individuals are generally subject to Israeli income tax on the receipt of dividends paid on our ordinary shares, other than bonus shares (share dividends) or stock dividends, at the rate of 25%, or 30% for a shareholder that is considered a material shareholder (within the meaning of the Israeli Income Tax Ordinance) at any time during the 12-month period preceding such distribution. Dividends paid on our ordinary shares to Israeli companies are exempt from such tax, except for dividends distributed from income derived outside of Israel, which are subject to the 25% tax rate.

Dividends paid from income derived from attributable to an Approved Enterprise and Privileged Enterprise are subject to tax, which is withheld at the source, at the rate of 15% or 20%. However, if such dividends are paid to an Israeli company, no tax is required to be withheld (although, if such dividends are subsequently distributed to individuals or a non-Israeli company, withholding tax at a rate of 20% or such lower rate as may be provided in an applicable tax treaty will apply). We cannot assure you that we will designate the profits that are being distributed in a way that will reduce shareholders' tax liability to this tax rate.

Taxation of Capital Gains

Taxation of Israeli Shareholders

Israeli law generally imposes a capital gains tax on the sale of any capital assets by residents of Israel, as defined for Israeli tax purposes, and on the sale of assets located in Israel, including shares in Israeli companies, by both residents and non-residents of Israel, unless a specific exemption is available or unless a tax treaty between Israel and the shareholder's country of residence provides otherwise. The law distinguishes between real gain and inflationary surplus. The inflationary surplus is a portion of the total capital gain which is equivalent to the increase of the relevant asset's purchase price which is attributable to the increase in the Israeli consumer price index or, in certain circumstances, a foreign currency exchange rate, between the date of purchase and the date of sale. The real gain is the excess of the total capital gain over the inflationary surplus.

As of January 1, 2006, the tax rate applicable to capital gains derived from the sale of shares, whether listed on a stock market or not, is 20% for Israeli individuals, unless such shareholder claims a deduction for financing expenses in connection with such shares, in which case the gain will generally be taxed at a rate of 25%. Additionally, if such shareholder is considered a "material shareholder" at any time during the 12-month period preceding such sale, i.e., such shareholder holds directly or indirectly, including with others, at least 10% of any means of control in the company, the tax rate shall be 26.5%. Israeli companies are subject to the corporate tax rate on capital gains derived from the sale of shares, unless such companies were not subject to the Adjustments Law (or certain regulations) at the time of publication of the aforementioned amendment to the Tax Ordinance that came into effect on January 1, 2014, in which case the applicable tax rate is 26.5% and, commencing January 1, 2016, was set at 25%. However, the foregoing tax rates do not apply to: (i) dealers in securities; and (ii) shareholders who acquired their shares prior to an initial public offering (which shares may be subject to a different tax arrangement).

The tax basis of shares acquired prior to January 1, 2003 will be determined in accordance with the average closing share price in the three trading days preceding January 1, 2003. However, a request may be made to the tax authorities to consider the actual adjusted cost of the shares as the tax basis if it is higher than such average price.

Taxation of Non-Israeli Shareholders

Capital gains from the sale of our ordinary shares by non-Israeli shareholders are exempt from Israeli capital gains tax on any gains derived from the sale of shares of Israeli companies publicly traded on a recognized stock exchange or regulated market outside of Israel, provided however that such capital gains are not derived from a permanent establishment in Israel, such shareholders are not subject to the Adjustments Law, and such shareholders did not acquire their shares prior to an initial public offering. However, non-Israeli corporations will not be entitled to such exemption if an Israeli resident (i) has a controlling interest of 25% or more in such non-Israeli corporation, or (ii) is the beneficiary or is entitled to 25% or more of the revenues or profits of such non-Israeli corporation, whether directly or indirectly.

In some instances where our shareholders may be liable to Israeli tax on the sale of their ordinary shares, the payment of the consideration may be subject to the withholding of Israeli tax at the source.

Pursuant to the treaty between the government of the United States of America and the government of Israel with respect to taxes on income, as amended, or the U.S.-Israel Tax Treaty, the sale, exchange or disposition of ordinary shares by a person who (i) holds the ordinary shares as a capital asset, (ii) qualifies as a resident of the United States within the meaning of the U.S.-Israel Tax Treaty and (iii) is entitled to claim the benefits afforded to such person by the U.S.-Israel Tax Treaty, or Treaty U.S. Resident, generally, will not be subject to the Israeli capital gains tax. Such exemption will not apply if (i) the Treaty U.S. Resident holds, directly or indirectly, shares representing 10% or more

of our voting power during any part of the 12-month period preceding such sale, exchange or disposition, subject to certain conditions, or (ii) the capital gains from such sale, exchange or disposition can be allocated to a permanent establishment in Israel. In such case, the sale, exchange or disposition of ordinary shares would be subject to Israeli tax, to the extent applicable; however, under the U.S.-Israel Tax Treaty, such Treaty U.S. Resident would be permitted to claim a credit for such taxes against the U.S. federal income tax imposed with respect to such sale, exchange or disposition, subject to the limitations in U.S. laws applicable to foreign tax credits. The U.S.-Israel Tax Treaty does not relate to U.S. state or local taxes.

Foreign Exchange Regulations

Dividends (if any) paid to the holders of our ordinary shares, and any amounts payable with respect to our ordinary shares upon dissolution, liquidation or winding up, as well as the proceeds of any sale in Israel of the ordinary shares to an Israeli resident, may be paid in non-Israeli currency or, if paid in Israeli currency, may be converted into freely reparable U.S. dollars at the rate of exchange prevailing at the time of conversion, however, Israeli income tax is required to have been paid or withheld on these amounts.

Israeli Transfer Pricing Regulations

The Income Tax Regulations (Determination of Market Terms), November 2006, promulgated under Section 85A of the Tax Ordinance, generally require that all cross-border transactions carried out between related parties be conducted on an arm's length basis and be taxed accordingly.

United States Federal Income Taxation

The following is a description of the material U.S. federal income tax consequences of the acquisition, ownership and disposition of our ordinary shares. This description addresses only the U.S. federal income tax considerations that are relevant to U.S. Holders (as defined below) who hold our ordinary shares as capital assets. This summary is based on the U.S. Internal Revenue Code of 1986, as amended, or the Code, Treasury regulations promulgated thereunder, judicial and administrative interpretations thereof, and the U.S.-Israel Tax Treaty, or the Treaty, all as in effect on the date hereof and all of which are subject to change either prospectively or retroactively. There can be no assurance that the U.S. Internal Revenue Service, or the IRS, will not take a different position concerning the tax consequences of the acquisition, ownership and disposition of our ordinary shares or that such a position would not be sustained. This description does not address all tax considerations that may be relevant with respect to an investment in our ordinary shares. This description does not account for the specific circumstances of any particular investor, such as:

- broker-dealers,
- financial institutions,
- certain insurance companies,
- investors liable for alternative minimum tax,
- tax-exempt organizations,
- non-resident aliens of the United States or taxpayers whose functional currency is not the U.S. dollar,
- persons who hold the ordinary shares through partnerships or other pass-through entities,
- persons who acquire their ordinary shares through the exercise or cancellation of employee stock options or otherwise as compensation for services,
- investors that actually or constructively own 10% or more of our shares by vote or value, and
- investors holding ordinary shares as part of a straddle, appreciated financial position, a hedging transaction or conversion transaction.

If a partnership or an entity treated as a partnership for U.S. federal income tax purposes owns ordinary shares, the U.S. federal income tax treatment of a partner in such a partnership will generally depend upon the status of the partner and the activities of the partnership. A partnership that owns ordinary shares and the partners in such partnership should consult their tax advisors about the U.S. federal income tax consequences of holding and disposing of ordinary shares.

This summary does not address the effect of any U.S. federal taxation (such as estate and gift tax) other than U.S. federal income taxation. In addition, this summary does not include any discussion of state, local or foreign taxation. You are urged to consult your tax advisors regarding the foreign and U.S. federal, state and local tax consequences of an investment in ordinary shares.

For purposes of this summary, a U.S. Holder is:

- an individual who is a citizen or, for U.S. federal income tax purposes, a resident of the United States;
- a corporation or other entity taxable as a corporation created or organized in or under the laws of the United States or any political subdivision thereof;
 - an estate whose income is subject to U.S. federal income tax regardless of its source; or
- a trust that (a) is subject to the primary supervision of a court within the United States and the control of one or more U.S. persons or (b) has a valid election in effect under applicable U.S. Treasury regulations to be treated as a U.S. person.

Taxation of Distributions

Subject to limitations, including the discussion below under the heading “—Passive Foreign Investment Companies,” the gross amount of any distributions received with respect to our ordinary shares, including the amount of any Israeli taxes withheld therefrom, will constitute dividends for U.S. federal income tax purposes to the extent of our current and accumulated earnings and profits, as determined for U.S. federal income tax purposes. Because we do not expect to maintain calculations of our earnings and profits under U.S. federal income tax principles, it is expected that the entire amount of any distribution will generally be reported as dividend income to you. Dividends are included in gross income as ordinary income. Distributions in excess of our current and accumulated earnings and profits will be treated as a non-taxable return of capital to the extent of your tax basis in our ordinary shares and any amount in excess of your tax basis will be treated as gain from the sale of ordinary shares. See “—Disposition of Ordinary Shares” below for a discussion of the taxation of capital gains. Our dividends will not qualify for the dividends-received deduction generally available to corporations under section 243 of the Code.

Dividends that we pay in NIS, including the amount of any Israeli taxes withheld therefrom, will be included in your income in a U.S. dollar amount calculated by reference to the exchange rate in effect on the day such dividends are received, regardless of whether the payment is in fact converted into U.S. dollars. A U.S. Holder who receives payment in NIS and converts NIS into U.S. dollars at an exchange rate other than the rate in effect on such day may have a foreign currency exchange gain or loss that would be treated as U.S.-source ordinary income or loss. U.S. Holders should consult their own tax advisors concerning the U.S. tax consequences of acquiring, holding and disposing of NIS.

Subject to complex limitations, some of which vary depending upon the U.S. Holder’s circumstances, any Israeli withholding tax imposed on dividends paid with respect to our ordinary shares will be a foreign source income tax eligible for credit against a U.S. Holder’s U.S. federal income tax liability (or, alternatively, for deduction against income in determining such tax liability). The limitation on foreign income taxes eligible for credit is calculated separately with respect to specific classes of income. Dividends generally will be treated as foreign-source passive category income or, in the case of certain U.S. Holders, general category income for U.S. foreign tax credit purposes. Further, there are special rules for computing the foreign tax credit limitation of a taxpayer who receives dividends subject to a reduced tax rate (see discussion below). A U.S. Holder may be denied a foreign tax credit with respect to Israeli income tax withheld from dividends received on our ordinary shares if such U.S. Holder fails to satisfy certain

minimum holding period requirements or to the extent such holder's position in ordinary shares is hedged. The rules relating to the determination of the foreign tax credit are complex, and you should consult with your personal tax advisors to determine whether and to what extent you would be entitled to this credit.

Subject to certain limitations, "qualified dividend income" received by a non-corporate U.S. Holder will be subject to tax at the lower long-term capital gain rates (currently at 20%). Distributions taxable as dividends paid on our ordinary shares should qualify for a reduced rate provided that either: (i) we are entitled to benefits under the Treaty or (ii) our ordinary shares are readily tradable on an established securities market in the United States and certain other requirements are met. We believe that we are entitled to benefits under the Treaty and that our ordinary shares currently are readily tradable on an established securities market in the United States. However, no assurance can be given that our ordinary shares will remain readily tradable. The rate reduction does not apply unless certain holding period requirements are satisfied, nor does it apply to dividends received from a PFIC (see discussion below) or in respect of certain risk-reduction transactions or in certain other situations. The legislation enacting the reduced tax rate on qualified dividend income contains special rules for computing the foreign tax credit limitation of a taxpayer who receives dividends subject to the reduced tax rate. U.S. Holders of our ordinary shares should consult their own tax advisors regarding the effect of these rules in their particular circumstances.

Disposition of Ordinary Shares

If you sell or otherwise dispose of our ordinary shares, you will generally recognize gain or loss for U.S. federal income tax purposes in an amount equal to the difference between the amounts realized on the sale or other disposition and your adjusted tax basis in our ordinary shares, in each case determined in U.S. dollars. Such gain or loss will generally be capital gain or loss and will be long-term capital gain or loss if you have held the ordinary shares for more than one year at the time of the sale or other disposition. Long-term capital gain realized by a non-corporate U.S. Holder is generally eligible for a preferential tax rate (currently at 20%). In general, any gain that you recognize on the sale or other disposition of ordinary shares will be U.S.-source for purposes of the foreign tax credit limitation; losses will generally be allocated against U.S. source income. Deduction of capital losses is subject to certain limitations under the Code.

In the case of a cash basis U.S. Holder who receives NIS in connection with the sale or disposition of our ordinary shares, the amount realized will be based on the U.S. dollar value of the NIS received with respect to the ordinary shares as determined on the settlement date of such exchange. A cash basis U.S. Holder who receives payment in NIS and converts NIS into U.S. dollars at a conversion rate other than the rate in effect on the settlement date may have a foreign currency exchange gain or loss, which would be treated as ordinary income or loss.

An accrual basis U.S. Holder may elect the same treatment required of cash basis taxpayers with respect to a sale or disposition of our ordinary shares that are traded on an established securities market, provided that the election is applied consistently from year to year. Such election may not be changed without the consent of the IRS. In the event that an accrual basis U.S. Holder does not elect to be treated as a cash basis taxpayer (pursuant to the Treasury regulations applicable to foreign currency transactions), such U.S. Holder may have a foreign currency gain or loss for U.S. federal income tax purposes because of differences between the U.S. dollar value of the currency received prevailing on the trade date and the settlement date. Any such currency gain or loss would be treated as ordinary income or loss and would be in addition to the gain or loss, if any, recognized by such U.S. Holder on the sale or disposition of such ordinary shares.

Any foreign currency gain or loss a U.S. Holder realizes will be U.S. source ordinary income or loss.

Passive Foreign Investment Companies

If we were to be classified as a PFIC, in any taxable year, a U.S. Holder would be subject to special rules generally intended to reduce or eliminate any benefits from the deferral of U.S. federal income tax that a U.S. Holder could otherwise derive from investing in a non-U.S. company that does not distribute all of its earnings on a current basis. We will be considered a PFIC, for any taxable year in which either (i) 75% or more of our gross income is passive income, or (ii) at least 50% of the average value of all of our assets for the taxable year produce or are held for the production of passive income. For this purpose, passive income generally includes dividends, interest, royalties, rents, annuities and the excess of gains over losses from the disposition of assets that produce passive income. Included in the calculation of our income and assets is our proportionate share of the income and assets of each corporation in which we own, directly or indirectly, at least a 25% interest, by value. If we were determined to be a PFIC for U.S. federal income tax purposes, unfavorable and highly complex rules would apply to U.S. Holders owning ordinary shares directly or indirectly. Accordingly, you are urged to consult your tax advisors regarding the application of such rules.

We believe that we were not a PFIC in 2015 and do not expect to become a PFIC in future years. In determining the average quarterly value of our gross assets, the aggregate value of our assets will generally be deemed to be equal to the sum of the aggregate value of our outstanding shares (our "market capitalization") plus our liabilities. We intend to take the position that the excess of our market capitalization plus liabilities over the book value of our assets may

generally be treated as non-passive assets to the extent of our non-passive activities. Accordingly, if we are not now a PFIC, we may become a PFIC if our market capitalization were to decrease significantly while we still hold substantial cash.

If we are treated as a PFIC for any taxable year, dividends would not qualify for the reduced tax rate on qualified dividend income, discussed above, and, unless you elect to "mark-to-market" your ordinary shares, as described below,

- you would be required to allocate income recognized upon receiving certain dividends or gain recognized upon the disposition of ordinary shares ratably over your holding period for such ordinary shares,
- the amount allocated to the current taxable year, and to any taxable years in your holding period prior to the first day in which we were treated as a PFIC will be treated as ordinary income, and
- the amount allocated to each prior taxable year during which we are considered a PFIC would be subject to tax at the highest individual or corporate tax rate, as the case may be, and an interest charge would be imposed with respect to the resulting tax liability allocated to each such year.

If we were a PFIC for any taxable year during which a U.S. Holder holds our ordinary shares and any of our non-U.S. subsidiaries is also a PFIC, such U.S. Holder would generally be treated as owning a proportionate amount (by value) of the underlying shares of each such non-U.S. subsidiary classified as a PFIC for purposes of the application of these rules. U.S. Holders are urged to consult their tax advisers regarding the application of the PFIC rules to any of our subsidiaries.

If we are a PFIC for any taxable year during which a U.S. Holder holds our ordinary shares, then in lieu of being subject to the tax and interest charge rules discussed above, a U.S. Holder may make an election to include gain on the stock of a PFIC as ordinary income under a mark-to-market method, provided that such ordinary shares are "regularly traded" on a "qualified exchange." In general, our ordinary shares will be treated such as "regularly traded" for a given calendar year if more than a de minimis quantity of our ordinary shares is traded on a qualified exchange on at least 15 days during each calendar quarter of such calendar year. Our ordinary shares are listed on the Tel Aviv Stock Exchange and the NASDAQ. However, no assurance can be given that our ordinary shares will be regularly traded for purposes of the mark-to-market election. In addition, because a mark-to-market election cannot be made for any lower-tier PFICs that we may own, a U.S. Holder may continue to be subject to the PFIC rules with respect to such holder's indirect interest in any investments held by us that are treated as an equity interest in a PFIC for U.S. federal income tax purposes.

If you elect to mark to market your ordinary shares, you will generally include in income, in each year in which we are considered a PFIC, any excess of the fair market value of your ordinary shares at the close of each tax year over your adjusted basis in the ordinary shares. If the fair market value of the ordinary shares had depreciated below your adjusted basis at the close of the tax year, you may generally deduct the excess of the adjusted basis of the ordinary shares over its fair market value at that time. However, such deductions would generally be limited to the net mark-to-market gains, if any, that you included in income with respect to such ordinary shares in prior years. A U.S. Holder's adjusted tax basis in their ordinary shares will be increased by the amount of any income inclusion and decreased by the amount of any deductions under the mark-to-market rules. Income recognized and deductions allowed under the mark-to-market provisions, as well as any gain or loss on the disposition of ordinary shares with respect to which the mark-to-market election is made in a year in which we are classified as a PFIC, is treated as ordinary income or loss (except that loss on a disposition of ordinary shares is treated as capital loss to the extent the loss exceeds the net mark-to-market gains, if any, that you included in income with respect to such ordinary shares in prior years). Gain or loss from the disposition of ordinary shares (as to which a mark-to-market election was made) in a year in which we are no longer classified as a PFIC, will be capital gain or loss.

If a U.S. Holder owns our ordinary shares during any year in which we are a PFIC, the U.S. Holder generally must file an IRS Form 8621 with respect to the company, generally with the U.S. Holder's federal income tax return for that

year. U.S. Holders should consult their tax advisers regarding whether we are a PFIC and the potential application of the PFIC rules.

Additional Tax on Investment Income

In addition to the income taxes described above, U.S. Holders that are individuals, estates or trusts and whose income exceeds certain thresholds will be subject to a 3.8% Medicare contribution tax on net investment income, which includes dividends and capital gains.

Backup Withholding and Information Reporting

Payments in respect of our ordinary shares may be subject to information reporting to the IRS and to U.S. backup withholding tax at the rate (currently) of 28%. Backup withholding will not apply, however, if you (i) are a corporation or fall within certain exempt categories, and demonstrate the fact when so required, or (ii) furnish a correct taxpayer identification number and make any other required certification.

Backup withholding is not an additional tax. Amounts withheld under the backup withholding rules may be credited against a U.S. Holder's U.S. tax liability. A U.S. Holder may obtain a refund of any excess amounts withheld under the backup withholding rules by filing the appropriate claim for refund with the IRS.

U.S. citizens and individuals taxable as resident aliens of the United States that own "specified foreign financial assets" with an aggregate value in a taxable year in excess of certain thresholds (as determined under rules in Treasury regulations) and that are required to file a U.S. federal income tax return generally will be required to file an information report with respect to those assets with their tax returns. IRS Form 8938 has been issued for that purpose. "Specified foreign financial assets" include any financial accounts maintained by foreign financial institutions, foreign stocks held directly, and interests in foreign estates, foreign pension plans or foreign deferred compensation plans. Under those rules, our ordinary shares, whether owned directly or through a financial institution, estate or pension or deferred compensation plan, would be "specified foreign financial assets". Under Treasury regulations, the reporting obligation applies to certain U.S. entities that hold, directly or indirectly, specified foreign financial assets. Penalties can apply if there is a failure to satisfy this reporting obligation. A U.S. Holder is urged to consult his tax adviser regarding its reporting obligation.

Any U.S. Holder who holds 10% or more in vote or value of our ordinary shares will be subject to certain additional U.S. information reporting requirements.

The above description is not intended to constitute a complete analysis of all tax consequences relating to acquisition, ownership and disposition of our ordinary shares. You should consult your tax advisor concerning the tax consequences of your particular situation.

H. Documents on Display

We are subject to certain of the reporting requirements of the Exchange Act, as applicable to "foreign private issuers" as defined in Rule 3b-4 under the Exchange Act. As a foreign private issuer, we are exempt from certain provisions of the Exchange Act. Accordingly, our proxy solicitations are not subject to the disclosure and procedural requirements

of Regulation 14A under the Exchange Act, and transactions in our equity securities by our officers and directors are exempt from reporting and the “short-swing” profit recovery provisions contained in Section 16 of the Exchange Act. In addition, we are not required under the Exchange Act to file periodic reports and financial statements as frequently or as promptly as U.S. companies whose securities are registered under the Exchange Act. However, we file with the SEC an annual report on Form 20-F containing financial statements audited by an independent accounting firm. We also submit to the SEC reports on Form 6-K containing (among other things) press releases and unaudited financial information. We post our annual report on Form 20-F on our website (www.mtsint.com) promptly following the filing of our annual report with the SEC. The information on our website is not incorporated by reference into this annual report.

This annual report and the exhibits thereto and any other document we file pursuant to the Exchange Act may be inspected without charge and copied at prescribed rates at the SEC public reference room at 100 F Street, N.E., Room 1580, Washington, D.C. 20549. You may obtain information on the operation of the SEC's public reference room in Washington, D.C. by calling the SEC at 1-800-SEC-0330. The Exchange Act file number for our SEC filings is 0-28950.

The SEC maintains a website at www.sec.gov that contains reports, proxy and information statements, and other information regarding registrants that make electronic filings with the SEC using its EDGAR (Electronic Data Gathering, Analysis, and Retrieval) system.

The documents concerning our company that are referred to in this annual report may also be inspected at our offices located at 14 Hatidhar Street, Ra'anana 4366516, Israel.

I. Subsidiary Information

Not applicable.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Exposure to Market Risks

We may be exposed to a variety of risks, including changes in interest rates affecting primarily interest received on short-term deposits and foreign currency fluctuations. In 2015, our principal market risk was our exposure to currency exchange fluctuations. We attempt to limit our exposure to currency exchange rate risk by using various hedging techniques, including forward and option contracts. However, we cannot eliminate the effects of currency fluctuations altogether. Exchange rate fluctuations resulting in a devaluation of the U.S. dollar compared to the NIS could have a material adverse impact on our operating results and share price.

Foreign Currency Exchange Risk

We carry out transactions involving foreign currency exchange derivative financial instruments. The transactions are designed to hedge our exposure in NIS against the U.S. dollar. We recognize derivative instruments as either assets or liabilities and measure those instruments at fair value in accordance with FASB ASC 815. If a derivative meets the definition of a cash flow hedge and is so designated, changes in the fair value of the derivative are recognized in other comprehensive income until the hedged item is recognized in earnings. The ineffective portion of a derivative designated as a hedge is recognized in earnings. If a derivative does not meet the definition of a hedge, the changes in the fair value are included in earnings. Our call and put option contracts do not qualify as hedging instruments under ASC 815 "Derivatives and Hedging," as amended.

As of December 31, 2015, we had outstanding call and put option contracts in the amount of \$1.7 million. These contracts are for periods of up to ten months. Our accumulated other comprehensive income as of such date does not include any unrealized gain on the call and put option contracts. In 2015, we entered into forward, call and put option contracts, in the amount of \$4.2 million that converted a portion of our floating currency liabilities to a fixed rate basis, thus reducing the impact of the currency changes on our cash flows. The purpose of our foreign currency hedging activities is to protect the Company from risk that the eventual dollar cash flows from international activities will be adversely affected by changes in the exchange rates. Changes in the fair value of put option contracts are reflected in our consolidated statements of operations as financial income or expense. In 2015, we recorded financial expenses of approximately \$7,000 with respect to the above transactions in our consolidated statements of operations.

We have operations in several countries in connection with the sale of our products. A substantial portion of our sales and expenditures are denominated in dollars. We have mitigated, and expect to continue to mitigate, a portion of our foreign currency exposure through salaries, marketing and support operations in which all costs are local currency based. As a result, our results of operations and cash flows can be affected by fluctuations in foreign currency exchange rates (primarily the Euro and NIS). A hypothetical 10% movement in foreign currency rates (primarily the Euro and NIS) against the dollar, with all other variables held constant on the expected sales, would result in a decrease or increase in 2015 sales revenues of approximately \$150,000 and on the other hand a decrease or increase in 2015 expenses of approximately \$410,000.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

Not applicable.

PART II

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

None.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

Not applicable.

ITEM 15. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in its Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our chief executive officer and chief financial officer to allow timely decisions regarding required disclosure. Our management, including our chief executive officer and chief financial officer, conducted an evaluation of our disclosure controls and procedures, as defined under Exchange Act Rule 13a-15(e), as of the end of the period covered by this Annual Report on Form 20-F. Based upon that evaluation, our chief executive officer and chief financial officer have concluded that, as of such date, our disclosure controls and procedures were effective.

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over our financial reporting. Internal control over financial reporting is defined in Rule 13a-15(f) or 15d-15(f) promulgated under the Exchange Act as a process designed by, or under the supervision of, the company's principal executive and principal financial officers and effected by the company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transaction and dispositions of the assets of the company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2015. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO - 2013 framework) in Internal Control-Integrated Framework. Based on that assessment, our management concluded that as of December 31, 2015, our internal control over financial reporting was effective. Our management has excluded Vexigo from its assessment of internal control over financial reporting as of December 31, 2015 because it was first acquired by us during 2015. Total net assets and net income of Vexigo, which were consolidated in our financial statements included elsewhere in this annual report, represent approximately \$469,000 and \$411,000, respectively, of the related consolidated financial statement amounts as of, and for the year ended, December 31, 2015.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting that occurred during the period covered by this annual report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 16. [RESERVED]

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

Our board of directors has determined that Mr. Yaacov Goldman, an independent director, meets the definition of an audit committee financial expert, as defined by rules of the SEC.

ITEM 16B. CODE OF ETHICS

We have adopted a code of ethics that applies to our chief executive officer and all senior financial officers of our company, including the chief financial officer, chief accounting officer or controller, or persons performing similar functions. Our code of ethics has been filed as an exhibit to this annual report. Written copies are available upon request. If we make any substantive amendment to the code of ethics or grant any waivers, including any implicit waiver, from a provision of the codes of ethics, we will disclose the nature of such amendment or waiver on our website.

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Independent Registered Public Accounting Firm Fees

The following table sets forth, for each of the years indicated, the billed fees by our principal independent registered public accounting firm. All of such fees were pre-approved in advance by our audit committee.

| Services Rendered | Year Ended December 31, | |
|--------------------|-------------------------|------------|
| | 2014 | 2015 |
| Audit (1) | \$ 84,006 | \$ 123,000 |
| Audit Related | \$ 0 | \$ 0 |
| Tax | \$ 0 | \$ 12,000 |
| Other Services (2) | \$ 35,000 | \$ 3,000 |

(1) Audit fees relate to audit services provided for each of the years shown in the table, including fees associated with the annual audit and reviews of our interim financial results, consultations on various accounting issues and audit services provided in connection with other statutory or regulatory filings.

(2) Other services relate to due diligence services provided with respect to Vexigo transaction.

Pre-Approval Policies and Procedures

Our audit committee has adopted a policy and procedures for the pre-approval of audit and non-audit services rendered by our independent registered public accountants, Kost Forer Gabbay & Kasierer, a member firm of Ernst & Young Global. Pre-approval of an audit or non-audit service may be given as a general pre-approval, as part of the audit committee's approval of the scope of the engagement of our independent auditor, or on an individual basis. Any proposed services exceeding general pre-approved levels also require specific pre-approval by our audit committee. The policy prohibits retention of the independent public accountants to perform the prohibited non-audit functions defined in Section 201 of the Sarbanes-Oxley Act or the rules of the Securities and Exchange Committee, and also requires the audit committee to consider whether proposed services are compatible with the independence of the public accountants.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

Not applicable.

ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS

Issuer Purchase of Equity Securities

Neither we nor any affiliated purchaser has purchased any of our ordinary shares during 2014.

ITEM 16F. CHANGES IN REGISTRANT'S CERTIFYING ACCOUNTANT

None.

ITEM 16G. CORPORATE GOVERNANCE

Under NASDAQ Stock Market Rule 5615(a)(3), foreign private issuers, such as our company, are permitted to follow certain home country corporate governance practices instead of certain provisions of the NASDAQ Stock Market Rules. A foreign private issuer that elects to follow a home country practice instead of any of such NASDAQ rules must submit to NASDAQ, in advance, a written statement from an independent counsel in such issuer's home country certifying that the issuer's practices are not prohibited by the home country's laws. We have provided NASDAQ with notices of non-compliance with respect to the following NASDAQ rules:

- The requirement to maintain a majority of independent directors, as defined under the NASDAQ Marketplace Rules. Instead, under Israeli law and practice, we are required to appoint at least two outside directors, within the meaning of the Israeli Companies Law, to our board of directors. In addition, in accordance with the rules of the SEC and NASDAQ, we have the mandated three independent directors, as defined by the rules of the SEC and NASDAQ, on our audit committee. See Item 6C. "Directors, Senior Management and Employees - Board Practices - Outside and Independent Directors."
- The requirements regarding the directors' nominations process. Instead, we follow Israeli law and practice in accordance with which our directors are recommended by our board of directors for election by our shareholders. See Item 6C. "Directors, Senior Management and Employees - Board Practices - Election of Directors."
- The requirement to obtain shareholder approval for the establishment or amendment of certain equity based compensation plans, an issuance that will result in a change of control of the company, certain transactions other than a public offering involving issuances of a 20% or more interest in the company and certain acquisitions of the

stock or assets of another company. Under Israeli law and practice, the approval of the board of directors is required for the establishment or amendment of equity based compensation plans and private placements. Under Israeli regulations, Israeli companies whose shares have been publicly offered only outside of Israel or are listed for trade only on an exchange outside of Israel, such as our company, are exempt from the Israeli law requirement to obtain shareholder approval for private placements of a 20% or more interest in the company. For the approvals and procedures required under Israeli law and practice for an issuance that will result in a change of control of the company and acquisitions of the stock or assets of another company, see Item 6C. “Directors, Senior Management and Employee - Board Practices - Approval of Related Party Transactions Under Israeli Law-Disclosure of Personal Interests of a Controlling Shareholder; Approval of Transactions with Controlling Shareholders” and Item 10B. “Additional Information -- Memorandum and Articles of Association - Provisions Restricting Change in Control of Our Company.”

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

MER TELEMANAGEMENT SOLUTIONS LTD.

We have audited the accompanying consolidated balance sheets of Mer Telemanagement Solutions Ltd. ("the Company") and its subsidiaries as of December 31, 2014 and 2015, and the related consolidated statements of operations, statements of comprehensive income (loss), shareholders' equity and cash flows for each of the three years in the period ended December 31, 2015. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's and its subsidiaries internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's and its subsidiaries internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above, present fairly, in all material respects, the consolidated financial position of the Company and its subsidiaries as of December 31, 2014 and 2015, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2015, in conformity with U.S. generally accepted accounting principles.

MER TELEMAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share data)

NOTE 1:- GENERAL

- a. Mer Telemanagement Solutions Ltd. (the "Company" or "MTS") was incorporated on December 27, 1995. MTS and its subsidiaries (the "Group") is a worldwide provider of telecom expense management ("TEM"), mobile virtual network enabler ("MVNE"), mobile money solutions and online video advertising solutions and services.

The Company's wholly-owned subsidiaries in the United States and Hong Kong, namely, MTS IntegraTRAK Inc. and MTS Asia Ltd., respectively, act as marketing and customer service organizations in those countries.

On April 1, 2015, the Company acquired 100% of the outstanding shares of Vexigo Ltd. ("Vexigo"), a privately-held Israeli-based software company supporting video advertising over the internet and mobile devices (for further information refer to Note 3 - Business Combination). Vexigo is a global provider of online video advertising software and services delivering compelling results through a propriety in-house technology and an easy-to-use and very effective publishing platform specifically designed for content publishers. The online video advertising is provided through Vexigo, which has proprietary in-house technology solution specifically designed for content publishers. The Vexigo solution for online and mobile platforms supports multiple ad formats and interactive ad units.

The Company's shares are listed for trade on the NASDAQ Capital Market under the symbol "MTSL".

- b. In March 2009, the Company discontinued the operations of TABS Brazil Ltda. its wholly owned subsidiary in Brazil. Such subsidiary's results of operations were classified as discontinued operations in the statement of operations.

The summarized results of operations for TABS Brazil Ltda. for the years ended December 31, 2013, 2014 and 2015, are as follows:

| | Year ended December 31, | | |
|--|-------------------------|---------|---------|
| | 2013 | 2014 | 2015 |
| Net income from discontinued operations | \$ 73 | \$ 80 | \$ 177 |
| Basic and diluted net income per Ordinary share from discontinued operations | \$ 0.02 | \$ 0.02 | \$ 0.02 |

MER TELEMAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share data)

NOTE 1:- GENERAL (Cont.)

c. The Company has incurred an accumulated deficit of approximately \$19,483 since inception. As of December 31, 2015, the Company's total shareholders' equity amounted to \$6,149. During the year ended December 31, 2015, the Company incurred operating loss of \$4,705 and cash flows provided by operating activities amounting to \$818.

As of December 31, 2015, the Company had \$3,578 in cash and cash equivalents and short-term marketable securities, out of which \$134 held by the Company is pledged to secure future rent payments for the Company's facilities in Israel.

As stated above, the Company acquired 100% of the outstanding shares of Vexigo in consideration of the payment of \$3,000 at closing and two payments of \$500 each that were to be paid three months and six months following the closing date. The agreement further provides for earn-out payments of up to \$16,000 over a 5.5 years period from the closing date, based on the earnings of the Vexigo product line.

On May 11, 2015, the Company issued to its shareholders an aggregate of 227,271, Ordinary Shares, pursuant to a share purchase agreement. The aggregate purchase price for such 227,271 Ordinary Shares was \$500 all of which amounts were paid.

In September 2015, the former shareholders agreed that payment of the two remaining installments related to the acquisition proceeds, in the total amount of \$1,000 would be postponed until January 1, 2016. Total net shareholder's contribution is \$20.

Subsequent to the balance sheet date, the Company renegotiated and extended \$2,600 of payments due to Vexigo's former shareholders. The new payment schedule end in October 2017. As part of this arrangement, the parties also agreed that if, at any time, Company's cash balance will be lower than \$2,500, than the Company will stop payments until its cash balances return to that level. For further information refer to Note 14 Subsequent Event.

The Company believes that its cash on hand as of December 31, 2015 and cash flow from operations in 2016 will be sufficient to meet its working capital and capital expenditure requirements for at least the following 12 months. In the event the Company is not successful in generating sufficient cash from its current operations, the Company may be required to obtain financing from outside sources or reduce its level of expenditures.

MER TELEMAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share data)

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP").

a. Use of estimates

The preparation of consolidated financial statements in conformity with the U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. The Company's management believes that the estimates, judgments and assumptions used are reasonable based upon information available at the time they were made. These estimates, judgments and assumptions can affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements, and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

b. Financial statements in United States dollars

The majority of the revenues of the Group are generated in or linked to the U.S. dollar ("Dollar"). In addition, a substantial portion of the Group's costs are incurred in Dollars. The Company's management believes that the Dollar is the currency of the primary economic environment in which the Company and certain of its subsidiaries operate. Therefore, the functional and reporting currency of the Company and certain of its subsidiaries is the Dollar.

Transactions and balances denominated in U.S. dollars are presented at their original amounts. Monetary accounts maintained in currencies other than the U.S. dollar are re-measured into U.S. dollars in accordance with ASC 830-10, "Foreign Currency Matters". All transactions gains and losses of the re-measurement of monetary balance sheets items are reflected in the consolidated statements of comprehensive loss as financial income or expenses, as appropriate.

For those foreign subsidiaries, whose functional currency has been determined to be their local currency, assets and liabilities are translated at the year- end exchange rates and statements operations items are translated at the average exchange rate prevailing during the period. The resulting translation adjustments are recorded as a separate component of accumulated other comprehensive income (loss) in shareholders' equity or recorded in the consolidate statements of operations as financial income or expenses, as appropriate.

c. Principles of consolidation

The consolidated financial statements include the accounts of the Group. Intercompany transactions and balances, including profits from intercompany sales not yet realized outside the Group, have been eliminated upon consolidation.

MER TELEMAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share data)

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES (Cont.)

d. Cash equivalents

Cash equivalents are short-term unrestricted highly liquid investments that are readily convertible to cash with original maturities of three months or less from time to deposit.

e. Restricted cash

Restricted cash is a deposit account which is held by the Company on behalf of Company's customers. The Company accrued expenses in that such amount.

f. Marketable securities

The Company accounts for investments in debt and equity securities in accordance with ASC 320, "Debt and Equity Securities" ("ASC 320"). Management determines the appropriate classification of its investments in marketable securities at the time of purchase and reevaluates such determinations at each balance sheet date. The Company classifies all of its securities as available for sale carried at fair market value. Fair value is determined based on observable market value quotes. Available-for-sale securities are carried at fair value, with unrealized gains and losses reported in "accumulated other comprehensive income (loss)" in shareholders' equity. Realized gains and losses on sales of investments, are included in earnings and are derived using the specific identification method for determining the cost of securities (see also Note 4). Interest and dividends on securities are included in financial income (expense), net.

The Company periodically reviews its marketable securities for impairment. If the Company concludes that any of these investments are impaired, the Company determines whether such impairment is "other-than-temporary" as defined under ASC 320-10-35.

The Company accounts for investments in marketable securities in accordance with, ASC 320 "Recognition and Presentation of Other-Than-Temporary Impairments" that changed the impairment and presentation model for debt securities.

Under the amended impairment model, other-than-temporary impairment loss is recognized in earnings if the entity has the intent to sell the debt security, or if it is more likely than not that it will be required to sell the debt security before recovery of its amortized cost basis. However, if an entity does not expect to sell a debt security, it still needs to evaluate expected cash flows to be received and determines if a credit loss exists. In the event of a credit loss, only the amount of impairment associated with the credit loss is recognized currently in earnings. During 2014 and 2015 no other-than-temporary impairments were recorded. For further information refer to Note 4 - Marketable Securities.

The marketable securities held by the Company are pledged to secure future rent payments for the Company's facilities in Israel.

MER TELEMANAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share data)

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES (Cont.)

g. Property and equipment, net

Property and equipment are stated at cost, net of accumulated depreciation. Depreciation is calculated using the straight-line method over the estimated useful lives of the assets at the following annual depreciation rates:

| | % |
|------------------------------------|--|
| Computers and peripheral equipment | 33 |
| Office furniture and equipment | 3 - 20 (mainly 7) |
| Leasehold improvements | Over the shorter of the lease term or useful economic life |

h. Impairment of long-lived assets

The Company's long-lived assets and certain identifiable intangibles are reviewed for impairment in accordance with ASC 360, "Property, Plant and Equipment" ("ASC 360"), whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the future undiscounted cash flows expected to be generated by the assets. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. As of December 31, 2014 and 2015, no impairment losses were identified.

i. Goodwill

Goodwill and other certain purchased intangible assets have been recorded in the Company's financial statements as a result of acquisitions. Goodwill represents the excess of the purchase price in a business combination over the fair value of the net tangible and intangible assets acquired. Under ASC 350, "Intangible - Goodwill and Other," ("ASC 350") goodwill is not amortized, but rather is subject to an annual impairment test.

ASC 350 requires goodwill to be tested for impairment at the reporting unit level at least annually or between annual tests in certain circumstances, and written down when impaired. Goodwill is tested for impairment by comparing the fair value of the reporting unit with its carrying value.

ASC 350 allows an entity to first assess qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test. If the qualitative assessment does not result in a more likely than not indication of impairment, no further impairment testing is required. If it does result in a more likely than not indication of impairment, the two-step impairment test is performed. Alternatively, ASC 350 permits an entity to bypass the qualitative assessment for any reporting unit and proceed directly to performing the first step of the goodwill impairment test.

MER TELEMAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share data)

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES (Cont.)

The Company operates in three operating segments, which also comprise its reporting units: Enterprise, Service Providers and Video Advertising. The Company's goodwill balance is assigned to the Enterprise and Video Advertising reporting units. The Company performs an annual impairment test of its reporting units as of September 30 of each year, or more frequently if impairment indicators are present. Fair value of the reporting units is determined using discounted cash flows. Significant estimates used in the fair value methodologies include estimates of future cash flows, future growth rates and the weighted average cost of capital of the reporting units.

Based on the impairment analysis the Company did not identify any impairment losses for the goodwill assigned to the Enterprise reporting unit.

In light of the decrease in the Company's share price in NASDAQ Capital Market and negative changes in the Video Advertising market, through year end, the Company performed an impairment test as of December 31, 2015. As for the goodwill assigned to the Video Advertising business unit, the Company concluded that the carrying value of the reporting unit exceeded its fair value, and therefore, an impairment of goodwill existed and the second step of the goodwill impairment test was required.

In accordance with ASC350 if goodwill and another asset (or asset group) of a reporting unit are tested for impairment at the same time, the other asset (or asset group) shall be tested for impairment before goodwill. If the asset group was impaired, the impairment loss would be recognized prior to goodwill being tested for impairment. As stated above, no impairment losses that related to other long-lived assets was identified. The goodwill assigned to the Video Advertising business unit fair value was estimated to be \$4,819. As the goodwill balance as of December 31, 2015 was \$11,107, an impairment in amount of \$6,288 was recorded. For further information refer to Note 8 - Goodwill.

j.

Intangible assets:

Intangible assets that are considered to have definite useful life are amortized over their useful lives using a method of amortization that reflects the pattern in which the economic benefits of the intangible assets are consumed or otherwise used up in accordance with ASC 350. The Company's identifiable intangibles are reviewed for impairment in accordance with ASC 360 whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the future undiscounted cash flows expected to be generated by the assets. If such assets are considered to be impaired, the impairment is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets.

MER TELEMAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share data)

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES (Cont.)

The Company's intangible assets were all acquired in connection with historical acquisitions, including the Vexigo acquisition in 2015 and amortized mostly over 5.5 years. For further information refer to Note 3 - Business Combination. During 2014 and 2015, no impairment losses were identified. For further information refer to Note 7 - Intangible Assets.

k. Severance pay:

The Company's liability for severance pay for its Israeli employees is calculated pursuant to Israel's Severance Pay Law. Some of the Israeli employees are included under section 14 of the Israeli Severance Compensation Law ("Section 14"). Under Section 14, the Company's monthly deposits, at a rate of 8.33% of such employees' monthly salary, are made on their behalf with insurance companies on account of severance pay. Payments in accordance with Section 14 release the Israeli companies from any future severance payments in respect of those employees. Deposits under Section 14 are not recorded as an asset in the Company's balance sheet.

Employees that are not subject to section 14 of the Israeli Severance Pay Law are entitled to a severance pay of one month's salary for each year of employment or a portion thereof. The Company's severance pay liability for employees, that are not subject to Section 14, is fully provided by an accrual and the monthly deposits with insurance policies is recorded as an asset in the Company's balance sheet.

Severance expense for the years ended December 31, 2014 and 2015 amounted to approximately \$106 and \$88, respectively.

l. Revenue recognition:

The Company generates revenues from three major sources: telecom services, telecom product sales and video advertising.

Telecom services and product sales

The Company generates revenues mainly from licensing the rights to use its software products and from providing maintenance, hosting and managed services, support and training. Certain software licenses require significant customization. The Company sells its products directly to end-users and indirectly through resellers and OEMs (who are considered end users).

Revenues from maintenance, hosting and managed services are recognized when all criteria outlined in ASC 985-605, "Revenue Recognition -Software", are met. Revenue from license fees is recognized when persuasive evidence of an agreement exists, delivery of the product has occurred, no significant obligations with regard to implementation remain, the fee is fixed or determinable and collectability is probable. The Company does not grant a right of return to its customers.

MER TELEMANAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share data)

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES (Cont.)

Where software arrangements involve multiple elements, revenue should be allocated to each undelivered element based on vendor specific objective evidence ("VSOE") of the fair values of each undelivered element in the arrangement, in accordance with the "residual method".

Under the residual method, the fair value of the undelivered elements is deferred and the remaining portion of the arrangement fee is allocated to the delivered element and is recognized as revenue when all revenue recognition criteria of ASC 985-605, as amended, are satisfied. Under the residual method, any discount in the arrangement is allocated to the delivered element. If sufficient specific objective evidence does not exist for all undelivered elements, revenue is deferred for the entire arrangement until all revenue recognition criteria are met for such undelivered elements.

Revenues from maintenance and support services are recognized over the term of the maintenance and support agreement on a straight line basis.

Revenues for hosting and managed services are recognized based on SAB 104 and ASC 605-25, when delivery has occurred or services have been rendered, the fee is fixed or determinable, collectability is probable and persuasive evidence of an arrangement exists. These revenues are recognized as one unit of accounting, on a straight-line basis over the term of the last undelivered element.

Deferred revenues include advance and payment received under maintenance and support contracts, not yet been recognized as revenues.

Video advertising

The Company, through its Vexigo subsidiary, allows advertisers to improve their business results by promoting marketing campaigns online via performance-based models and provides them with access and exposure to a variety of media companies, other networks and general websites. Vexigo's innovative optimization technology also enables affiliates to fully monetize their media inventory. Vexigo's customers obtain access to the Company's technology which enables advertisers to improve their business results by optimization of marketing campaign targeting. Also, the Company enables partnerships between affiliates and advertisers. Revenue generally derived from charges to advertisers based on Cost per Mille ("CPM"). Advertisers are charged monthly based on the number of times a user clicks on ads. The Company recognizes revenue from advertisement at that time when all four mentioned revenue recognition criteria have been met.

MER TELEMAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share data)

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES (CONT.)

Revenues for video advertising are recognized based on SAB 104 and ASC 605-45 "Principal Agent Considerations". ASC 605-45 addresses whether a company should recognize revenue based on (a) the gross amount billed to a customer because it has earned revenue from the sale of the goods or services or (b) the net amount retained (that is, the amount billed to a customer less the amount paid to a publishers) because it has earned a commission or fee. The determination of whether revenues should be reported on a gross or net basis is based on an assessment of whether the company is acting as the principal or an agent in the transaction. In determining whether the company acts as the principal or an agent, the Company follows the accounting guidance for principal-agent considerations. While none of the factors identified in this guidance is individually considered presumptive or determinative, the Company has determined that in certain transactions, it is the primary obligor and has a structured inventory risk resulting from the fact that not all purchased ad spaces will be sold.

Accordingly, revenue from this activity recorded as the gross amount billed to a customer. On the other hand, in arrangements that Vexigo is not the primary obligor in the transaction and has no inventory risk, revenues are recognized on the net amount retained.

m. Research and development expenses:

Research and development costs are charged to the consolidated statements of operation, as incurred. Expenditure on research activities, undertaken with the prospect of gaining new scientific or technical knowledge and understanding, is recognized in the statement of operation when incurred.

n. Capitalized development costs:

Capitalized development costs are recognized in accordance with ASC 350-40 "Capitalized Development Costs". Development activities involve a plan or design for the production of new or substantially improved products and processes. Development expenditure is capitalized only if development costs can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable, and the Company intends to and has sufficient resources to complete development and to use or sell the asset. The expenditure capitalized includes the cost of direct labor costs that are directly attributable to preparing the asset for its intended use. Other development expenditure is recognized in profit or loss as incurred. Capitalized development expenditure is measured at cost less accumulated amortization and accumulated impairment losses. As of December 31, 2015, the Company's total capitalized development costs amounted to \$411.

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES (Cont.)

o. Income taxes:

The Group account for income taxes and uncertain tax positions in accordance with ASC Topic 740, "Income Taxes" ("ASC 740"). ASC 740 prescribes the use of the liability method, according to which deferred tax assets and liability account balances are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. Valuation allowances are provided to reduce deferred tax assets to the amounts that are more likely-than-not to be realized.

The Company implements a two-step approach to recognizing and measuring uncertain tax positions accounted for in accordance with ASC 740. The first step is to evaluate the tax position taken or expected to be taken in a tax return by determining if the weight of available evidence indicates that it is more likely than not that, on an evaluation of the technical merits, the tax position will be sustained on audit, including resolution of any related appeals or litigation processes. The second step is to measure the tax benefit as the largest amount that is more than 50% likely to be realized upon ultimate settlement.

p. Accounting for share-based compensation ("ASC 718"):

The Company accounts for share-based compensation in accordance with ASC 718, "Compensation - Stock compensation," which requires the measurement and recognition of compensation expense based on estimated fair values for all share-based payment awards made to employees, directors and non-employees. ASC 718 requires companies to estimate the fair value of equity-based payment awards on the date of grant using an option-pricing model. The value of the portion of the award that is ultimately expected to vest is recognized as an expense over the requisite service periods in the Company's consolidated statement of operations.

The Company recognizes these compensation costs net of a forfeiture rate and recognizes the compensation costs for only those shares expected to vest on an accelerated method over the requisite service period for each separately vesting portion of the award, which is the option vesting term of four years.

ASC 718 requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES (Cont.)

- q. Company shares held by MTS as treasury shares are recognized at cost, and as a deduction from equity. Any gain or loss arising from a purchase, sale, issuance or cancellation of treasury shares is recognized directly in equity.

The Company selected the Black-Scholes-Merton option pricing model as the most appropriate fair-value method for its stock-option compensation awards and values restricted stock units based on the market value of the underlying shares at the date of grant. The Company estimates the fair value of stock options granted with the following weighted average assumptions for 2014 and 2015:

| Stock options | Year ended December 31, | |
|---------------------------|-------------------------|----------------|
| | 2014 | 2015 |
| Expected volatility (1) | 85.2 % | 81.57%-85.95 % |
| Risk-free interest (2) | 0.93 % | 1.08%-1.09 % |
| Dividend yield (3) | 0 % | 0 % |
| Expected life (years) (4) | 3.75 | 3.75 |

(1)The computation of expected volatility is based on realized historical share price volatility of the Company's stock.

(2) The risk-free interest rate is based on the yield from U.S. Treasury Bonds with an equivalent term;

(3)The dividend yield assumption is based on the Company's historical experience and expectation of future dividend payouts. The Company has historically not paid dividends and has no foreseeable plans to pay cash dividends in the future.

(4)Expected term of options granted represents the period of time that options granted are expected to be outstanding, and is estimated based on the Company's history.

The Company applies ASC 505-50 "Equity-Based Payment to Non-Employees" ("ASC 505-50") with respect to options and warrants issued to non-employees which requires the use of option valuation models to measure the fair value of the options and warrants at the measurement date.

r. Fair value of financial instruments:

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

The carrying amounts of cash and cash equivalents, restricted cash, marketable securities, trade receivables, other accounts receivable, trade payables, long term contingent earn-out liability and accrued liabilities approximate their fair value, due to their short-term maturity of such instruments.

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES (Cont.)

The Company applies ASC 820 “Fair Value Measurement” (“ASC 820”) which clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or a liability. As a basis for considering such assumptions, ASC 820 establishes a three-tier value hierarchy, which prioritizes the inputs used in the valuation methodologies in measuring fair value:

Level 1 - quoted prices in active markets for identical assets or liabilities.

Level 2 inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The fair value hierarchy also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The marketable securities fair value, based on quoted market prices, classified within level 1 (Refer to Note 4). The derivatives instruments are classified within Level 2 as the valuation inputs are based on quoted prices and market observable data of similar instruments. The long term contingent earn-out consideration, based on future earnings of the Vexigo product line, classified within level 3 (Refer to Note 3).

s. Concentrations of credit risk:

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents, restricted cash, marketable securities, trade receivables and other account receivable.

Cash and cash equivalents are deposited with major banks in Israel, Hong Kong, and in the United States. Such deposits in the United States may be in excess of insured limit and are not insured in other jurisdictions. Management believes that the financial institutions that hold the Company's investments are institutions with high credit standing, and accordingly, minimal credit risk exists with respect to these investments.

The Company's customers are located mainly in the United States (see Note 14). The Company performs ongoing credit evaluations of its customers. In certain circumstances, the Company may require letters of credit, other collateral or additional guarantees.

MER TELEMAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share data)

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES (Cont.)

The allowance for doubtful accounts is determined with respect to specific debts that are doubtful of collection according to management estimates.

The Company's marketable securities include investments in equity securities and Israeli government securities. Management believes that the portfolio is well diversified, and accordingly, minimal credit risk exists with respect to these marketable securities. The Company has no off-balance-sheet concentrations of credit risk.

t. Basic and diluted net earnings (loss) per share:

Basic net earnings (loss) per share are computed based on the weighted average number of Ordinary shares outstanding during each year. Diluted net earnings (loss) per share is computed based on the weighted average number of Ordinary shares outstanding during each year, plus dilutive potential Ordinary shares considered outstanding during the year, in accordance with ASC topic 260, "Earnings Per Share" ("ASC 260").

Basic net earnings per share are computed based on the weighted average number of Ordinary shares outstanding during each year. No options have been included in the calculation of the diluted net earnings per Ordinary share due to the Company loss during 2015.

u. Derivatives instruments:

ASC 815, "Derivatives and Hedging" ("ASC 815"), as amended, requires the Company to recognize all derivatives on the balance sheet at fair value. The Company entered into put option contracts to hedge certain transactions denominated in foreign currencies. The purpose of the Company's foreign currency hedging activities is to protect the Company from risk that the eventual dollar cash flows from international activities will be adversely affected by changes in the exchange rates. The Company's put option contracts did not qualify as hedging instruments under ASC 815.

Changes in the fair value of put option contracts are reflected in the consolidated statements of operations as financial income or expense, when occur.

During 2013, 2014 and 2015, the Company entered into forward, call and put option contracts in the aggregate notional amounts of \$2,400, \$3,350 and \$4,200, respectively, which converted a portion of its floating currency liabilities to a fixed rate basis, thus reducing the impact of exchange rate fluctuations on the Company's cash flow. In 2013, 2014 and 2015, the revaluation income (expenses) from these contracts with respect to the above transactions were \$65, \$(79) and \$(7), respectively, and are presented in the statements of operations as financial income (expense), net. As of December 31, 2015, the Company had outstanding call and put option contracts in the amount of \$ 1,700.

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES (Cont.)

v. Comprehensive income (loss):

The Company accounts for comprehensive income (loss) in accordance with ASC Topic 220, "Comprehensive Income". This statement establishes standards for the reporting and display of comprehensive income and its components in a full set of general purpose financial statements. Comprehensive income (loss) generally represents all changes in shareholders' equity during the period except those resulting from investments by, or distributions to, stockholders. In May 2011, the FASB issued guidance that changed the requirement for presenting "Comprehensive Income" in the consolidated financial statements.

w. Impact of recently issued accounting standards

1. In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers (Topic 606) (ASU 2014-09), which amends the existing accounting standards for revenue recognition. In August 2015, the FASB issued ASU No. 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date, which delays the effective date of ASU 2014-09 by one year. The FASB also agreed to allow entities to choose to adopt the standard as of the original effective date. As such, the updated standard will be effective for us in the first quarter of 2018 with the option to adopt it in the first quarter of 2017. The Company is still evaluating the effect that the updated standard will have on the Company's consolidated financial statements and related disclosures.
2. In August 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-15, Presentation of Financial Statements-Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern, which defines management's responsibility to assess an entity's ability to continue as a going concern, and to provide related footnote disclosures if there is substantial doubt about its ability to continue as a going concern. The pronouncement is effective for annual reporting periods ending after December 15, 2016 with early adoption permitted. The adoption of this guidance is not expected to have a material impact on the Company's financial statements.

MER TELEMANAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES (Cont.)

3. In November 2015, the FASB issued ASU No. 2015-17, "Income Taxes – Balance Sheet Classification of Deferred Taxes" ("ASU 2015-17"). The purpose of the standard is to simplify the presentation of deferred taxes on a classified balance sheet. Under current GAAP, deferred income tax assets and liabilities are separated into current and noncurrent amounts in the balance sheet. The amendments in ASU 2015-17 require that all deferred tax assets and liabilities be classified as noncurrent in the balance sheet. ASU 2015-17 is effective for interim and annual periods beginning after December 15, 2017, and interim periods within annual periods beginning after December 15, 2018. Companies can adopt the guidance either prospectively or retrospectively. The Company does not expect the adoption of ASU 2015-17 to have a material impact on its consolidated financial statements or presentation. The Company is currently in the process of evaluating the impact of the adoption of ASU 2015-17 on its consolidated financial statements.

NOTE 3:- BUSINESS COMBINATION

Acquisition of Vexigo Ltd.

On April 1, 2015 ("Closing Date") the Company completed the acquisition of 100% of the shares of Vexigo Ltd. ("Vexigo") as defined in the share purchase agreement ("SPA") for the transaction. Vexigo was a privately-held Israeli-based software company supporting video advertising over the internet and mobile devices. The financial results of Vexigo are included in the consolidated financial statements from the Closing Date. The total consideration consisted of:

- Cash consideration of \$4,000, to be paid in three instalments as follows: (a) at Closing Date \$3,000 and, (b) two additional instalments of \$500 each, three and six months following the Closing Date. Such payments were further extended as described below.
- 3,115,090 ordinary shares of the Company issued at Closing having a total value of \$ 4,368, which considered the market restrictions on these shares.
- A milestones-based contingent cash payment based on Vexigo's product line EBITDA post acquisition, of up to \$16,000 payable over 5.5 years. The fair value of the contingent consideration amounted to approximately \$6,532, net of termination fees. At Closing Date the Company recorded a related liability.
- The SPA assumed zero working capital and included customary net working capital adjustments to the purchase price as defined in the SPA.

In addition, the Company incurred acquisition related costs of \$424, which are included in general and administrative expenses for the year ended December 31, 2015. Acquisition related costs include legal, accounting fees and other costs directly related to the acquisition.

MER TELEMANAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share data)

NOTE 3:- BUSINESS COMBINATION (Cont.)

In addition to the above, the company undertake to pay a pre-closing declared dividend, out of which, during 2015, the Company paid \$554 on account of the pre-closing obligation of Vexigo to pay the previously declared dividend to its shareholders.

Subsequent to the balance sheet date, the Company reached an agreement to extend the payment schedule for the consideration due to be paid to the former shareholders of Vexigo, including amounts due on account of the pre-closing obligation of Vexigo to pay the previously declared dividend to its shareholders. For further information refer to Note 15 - Subsequent Event.

Under business combination accounting the total purchase price was allocated to Vexigo's net tangible and intangible assets based on their estimated fair values as set forth below. The excess of the purchase price over the net tangible and identifiable intangible assets was recorded as goodwill.

| | Closing Date |
|----------------------------|------------------|
| Total assets | \$ 204 |
| Total liabilities | (148) |
| Technology | 4,433 |
| Goodwill | 11,107 |
| Deferred tax liability | (709) |
| Total consideration | \$ 14,887 |

Intangible asset

In performing the purchase price allocation, the Company considered, among other factors, analysis of historical financial performance, highest and best use of the acquired assets and estimates of future performance of Vexigo's products. The fair value of video advertising technology in amount of \$4,433 (useful life 5.5 years) was based on a valuation, performed by the Company's management with the assistance of third party valuation firm using estimates and assumptions provided by management.

Condensed combined pro forma information

The following unaudited condensed combined pro forma information for the years ended December 31, 2014 and 2015, gives effect to the acquisition of Vexigo as if the acquisition had occurred on January 1, 2014. The pro forma information is not necessarily indicative of the results of operations, which actually would have occurred if the acquisition had been consummated on that date, nor does it purport to represent the results of operations for future periods. For the purposes of the pro forma information, net income includes additional amortization of intangible assets related to the acquisition of \$ 806 in each of 2014 and 2015, and its related tax effects.

MER TELEMANAGEMENT SOLUTIONS LTD.

NOTE 3:- BUSINESS COMBINATION (Cont.)

| | Year ended December 31, | |
|---|-------------------------|------------|
| | 2014 | 2015 |
| | Unaudited | |
| Revenues | \$ 17,319 | \$ 18,964 |
| Net income (loss) | 251 | (3,923) |
| Basic and diluted earnings (loss) per share | \$ 0.03 | \$ (0.55) |

Contingent earn-out consideration

Under business combination accounting, Company requires to measure the contingent consideration related to earn-out in its fair value in each reporting date. For the purpose of ASC 805, the Company used a third party specialist, to perform the fair value valuation as of the closing date and as of December 31, 2015. The fair value of the earn-outs was measured using a Monte Carlo simulation of the triangular model, for possible EBITDA for the 5.5 years following the closing date. As of the Closing Date and December 31, 2015 the total contingent consideration sums to \$6,732 and \$4,255, respectively. Contingent consideration is classified as a liability and may be adjusted to fair value at each reporting date through earnings, until the contingency is resolved and may affect the Company's results in the future.

NOTE 4:- MARKETABLE SECURITIES

The following is a summary of the Company's accumulated gross unrealized gains/ losses from investment in marketable securities as of December 31, 2015:

| | December 31, 2014 | | | | December 31, 2015 | | | |
|-------------------------|-------------------|------------------------|-------------------------|-------------------|-------------------|------------------------|-------------------------|-------------------|
| | Amortized cost | Gross unrealized gains | Gross unrealized losses | Fair market value | Amortized cost | Gross unrealized gains | Gross unrealized losses | Fair market value |
| Available-for-sale: | | | | | | | | |
| Equity securities | \$ 62 | \$ - | \$ (3) | \$ 59 | \$ 87 | \$ - | \$ (2) | \$ 85 |
| Corporate bonds | 23 | 1 | - | 24 | 16 | *) - | - | 16 |
| Israeli Government debt | 56 | - | (3) | 53 | 36 | - | (3) | 33 |
| | \$ 141 | \$ 1 | \$ (6) | \$ 136 | \$ 139 | \$ - | \$ (5) | \$ 134 |

*) Represents an amount lower than \$ 1.

The net realized gains (losses) on sales of available-for-sale securities of \$ 1, \$ 10 and \$(8) in 2013, 2014 and 2015, respectively, were recorded in financial income (expense), net.

NOTE 10:- COMMITMENTS AND CONTINGENT LIABILITIES

a. Lease commitments:

The Group leases office space and motor vehicles through operating leases. The facilities of the Company and its subsidiaries are leased for periods ending February 2019. Future minimum lease commitments under non-cancelable operating leases as of December 31, 2015 are as follows:

| Year ended December 31, | USD |
|-------------------------|--------|
| 2016 | \$ 217 |
| 2017 | 74 |
| 2018 | 58 |
| 2019 | 10 |
| | \$ 359 |

Operating lease expenses for the years ended December 31, 2013, 2014 and 2015 were approximately \$480, \$379 and \$411, respectively.

b. Royalty commitments:

The Company is committed to pay royalties to the Office of the Chief Scientist ("OCS") of the Ministry of Industry, Trade and Labor of the Government of Israel on proceeds from sales of products resulting from the research and development projects in which the OCS participated. In the event that development of a specific product in which the OCS participated is successful, the Company will be obligated to repay the grants through royalty payments at the rate of 3% to 5% based on the sales of the Company, up to 100%-150% of the grants received linked to the dollar. Grants received after January 1999 is subject to interest at a rate equal to the 12 month LIBOR rate. The obligation to pay these royalties is contingent upon actual sales of the products and, in the absence of such sales, no payment is required.

As of December 31, 2015, the Company had a contingent liability to pay royalties in the amount of approximately \$8,552 plus interest for grants received after January 1999.

The Company has paid or accrued royalties in its cost of revenues relating to the repayment of such OCS grants in the amount of \$136, \$103 and \$115 for the years ended December 31, 2013, 2014 and 2015, respectively.

MER TELEMAGEMENT SOLUTIONS LTD.

NOTE 10:- COMMITMENTS AND CONTINGENT LIABILITIES (Cont.)

c. Claims and demands:

1. Claims related to discontinued operations:

The Company is a party to various tax claims that arose in TABS Brazil. Accordingly, the Company recorded a provision of approximately \$12 in respect of such claims in accordance with ASC 450, "Contingencies", based on the opinion of Company's management.

In August 2007, TABS Brazil was ordered by the Labor Law Court in Brazil to pay approximately \$43 to one of its former employees. Such amount bears a 1% interest rate per month from the date that the claim was filed. The Company recorded a provision in its financial statements for the total amount of the claim. As of December 31, 2015 total claims related to discontinued operations amounted to \$105.

2. The Israeli Government, through the Fund for Encouragement of Marketing Activities, awarded C. Mer Industries Ltd. ("C. Mer"), a related party of the Company grants for participation in foreign marketing expenses, partially related to the Company's marketing activities for the years 1996 - 1998. During 2012, the Company received through an affiliated company a demand with respect to the reimbursement of above-mentioned grants. As of December 31, 2014 and 2015, the Company made a provision in the amount that was considered probable.

d. Guarantees:

The Company provided a bank guarantee in the amount of \$ 69 to secure its obligations under one of its lease agreements, as describe in more details in Note 4.

NOTE 11:- TAXES ON INCOME

a. Israeli taxation:

1. Corporate tax rates:

Taxable income of the Company is subject to the Israeli corporate tax at the rate as follows: 2013 - 25%, 2014 and 2015- 26.5%. On January 5, 2016, the Israeli Parliament officially published the Law for the Amendment of the Israeli Tax Ordinance (Amendment 216), that reduces the standard corporate income tax rate from 26.5% to 25%.

MER TELEMANAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 11:- TAXES ON INCOME (Cont.)

2. Tax benefits under the Law for the Encouragement of Capital Investments, 1959 ("the Law"):

According to the Law, the Company is entitled to various tax benefits by virtue of the "approved enterprise" status granted to part of their enterprises, as implied by this Law. The principal benefits by virtue of the Law are:

According to the provisions of the Law, the Company has chosen to enjoy the "Alternative" track. Under this track, the Company is tax exempt in the first two years of the benefit period and subject to tax at the reduced rate of 10%-25% for a period of several years for the remaining benefit period.

Another condition for receiving the benefits under the alternative track is a minimum qualifying investment. This condition requires an investment in the acquisition of productive assets such as machinery and equipment which must be carried out within three years. The minimum qualifying investment required for setting up a plant is NIS 300,000.

As for plant expansions, the minimum qualifying investment is the higher of NIS 300,000 and an amount equivalent to the "qualifying percentage" of the value of the productive assets. Productive assets that are used by the plant but not owned by it will also be viewed as productive assets.

The Company was eligible under the terms of minimum qualifying investment and elected 2008 as its "year of election".

The qualifying percentage of the value of the productive assets is as follows:

| The value of productive assets before the expansion (NIS in millions) | The new proportion that the required investment bears to the value of productive assets |
|---|--|
| Up to NIS 140 (app. \$ 40) | 12% |

| More than NIS 500 (app.\$ 144) | 5% |

The income qualifying for tax benefits under the alternative track is the taxable income of a company that has met certain conditions as determined by the Investment Law ("a beneficiary company"), and which is derived from an industrial enterprise. The Investment Law specifies the types of qualifying income that is entitled to tax benefits under the alternative track with respect of an industrial enterprise, whereby income from an industrial enterprise includes, among others, revenues from the production and development of software products and revenues from industrial research and development activities performed for a foreign resident (and approved by the Head of the Administration of Industrial Research and Development).

MER TELEMANAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share data)

NOTE 11:- TAXES ON INCOME (Cont.)

The benefit period starts with the first year the beneficiary enterprise earns taxable income, provided that 14 years have not passed since the approval was granted and 12 years have not passed since the enterprise began operating. In respect of expansion programs pursuant to Amendment No. 60 to the Investment Law, the benefit period starts at the later of the year elected and the first year the Company earns taxable income provided that 12 years have not passed since the beginning of the year of election. The respective benefit period has not yet begun.

The above benefits are contingent upon the fulfillment of the conditions stipulated by the Investment Law, regulations published there-under and the letters of approval for the investments in the approved enterprises, as above. Non-compliance with the conditions may cancel all or part of the benefits and refund of the amount of the benefits, including interest. Management believes that the Company is meeting the aforementioned conditions.

Amendments to the Investment Law:

In December 2010, the "Knesset" passed the Investment Law for Economic Policy for 2011 and 2012 (Amended Legislation), 2011, which prescribes, among other things, amendments to the Investment Law. The amendment became effective as of January 1, 2011. According to the amendment, the benefit tracks in the Law were modified and a flat tax rate applies to the Company's entire preferred income. The Company and Vexigo will be able to opt to apply (the waiver is non-recourse) the amendment and from then on it will be subject to the amended tax rates that are: 2011, 2012 and 2013 - 15% (in development area A - 10%); 2014 and 2015 - 16 % (in development area A - 9%).

As of December 31, 2015, the Company chose not to adopt this amendment, but may elect to do so in the future. Vexigo chose to adopt this amendment and believes it is entitled to benefit from a reduced corporate tax rate under the Israeli privileged enterprise program.

3. Tax assessments:

The Company and Vexigo have received final tax assessments through the 2010 tax year.

4. Tax benefits under the Law for the Encouragement of Industry (Taxation), 1969:

The Law for the Encouragement of Industry (Taxation), 1969, provides several tax benefits for industrial companies. An industrial company is defined as a company resident in Israel, at least 90% of the income of which in a given tax year exclusive of income from specified government loans, capital gains, interest and dividends, is derived from an industrial enterprise owned by it. An industrial enterprise is defined as an enterprise whose major activity in a given tax year is industrial production activity.

MER TELEMANAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share data)

NOTE 11:- TAXES ON INCOME (Cont.)

MTS is currently qualified as an "industrial company" under the above definition and, as such, is entitled to certain tax benefits, mainly accelerated depreciation of machinery and equipment, as prescribed by regulations published under the Inflationary Adjustments Law, the right to claim public issuance expenses and amortization of intangible property rights as a deduction for tax purposes

Eligibility for benefits under the Law for the Encouragement of Industry (Taxation), 1969, is not subject to receipt of prior approval from any governmental authority. No assurance can be given that the Israeli Tax Authorities will agree that the Company qualifies, or, if the Company qualifies, then the Company will continue to qualify as an industrial company or that the benefits described above will be available to the Company in the future.

5. Tax Benefits for Research and Development:

Israeli tax law permits, under some conditions, a tax deduction for expenditures in the year incurred, including capital expenditures, in scientific research and development projects. The deduction is permitted if, among other things, the expenditures are approved by the relevant government ministry and the research and development is for the promotion of the enterprise and is carried out by, or on behalf of, a company seeking the deduction.

The OCS has approved some of the Company's research and development programs and the Company has been able to deduct, for tax purposes, a portion of its research and development expenses net of the grants received. Other research and development expenses that are not approved may be deducted for tax purposes in three equal installments during a three-year period.

b. Income taxes on non-Israeli subsidiaries:

Non-Israeli subsidiaries are taxed according to the tax laws in their respective countries of residence.

c. Net operating loss carry-forwards:

As of December 31, 2015, the Company and its subsidiaries in Hong Kong and the U.S. had an estimated total amount of available carry-forward tax losses of approximately \$ 19,950, \$ 358 and \$ 721, respectively, to offset against future taxable profits. The operating tax loss carry-forwards in Israel may be offset indefinitely against operating income. In addition, as of December 31, 2015, the Company had capital losses in the amount of approximately \$ 451 that can be carried forward indefinitely. As of December 31, 2015, Vexigo had utilized all of its available carry-forward tax losses.

MER TELEMANAGEMENT SOLUTIONS LTD.

AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share data)

NOTE 11:- TAXES ON INCOME (Cont.)

MTS IntegraTRAK is subject to U.S. income taxes. Total net operating loss carry-forwards of approximately \$ 721 as of December 31, 2015, will expire in the years 2021 to 2028. Utilization of the U.S. net operating losses may be subject to substantial annual limitation due to the "change in ownership" provisions of the Internal Revenue Code of 1986 and similar state provisions. Such annual limitation may result in the expiration of net operating losses before utilization.

d. Deferred income taxes:

Deferred taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The Group's deferred tax liabilities and assets are as follows:

| | December 31, | |
|---|--------------|-----------|
| | 2014 | 2015 |
| Deferred tax asset (liability): | | |
| Tax loss carry-forwards | \$ 5,221 | \$ 5,593 |
| Allowances for doubtful accounts and accruals for employee benefits | 84 | 103 |
| Intangible assets | 96 | 81 |
| Depreciation, accruals for interest and other | 732 | 746 |
| Deferred tax asset before valuation allowance | 6,133 | 6,523 |
| Goodwill and deferred tax | (888) | (834) |
| Valuation allowance | (5,299) | (6,369) |
| Deferred tax liability, net | \$ (54) | \$ (680) |

The Company and certain of its subsidiaries have provided valuation allowances in respect of deferred tax assets resulting from tax loss carry-forwards and other temporary differences, since they have a history of losses incurred over the past years. Management currently believes that it is more likely than not that part of the deferred tax relating to the loss carry-forwards in the Company and its subsidiaries and other temporary differences will not be realized in the foreseeable future.

NOTE 12:- RELATED PARTY TRANSACTIONS AND BALANCES

a. The Company receives certain services from C. Mer, a publicly traded company. Mr. Chaim Mer, the Company's chairman of the board and Mr. Isaac Ben Bassat, a director of the Company, are members of the controlling group of C. Mer. These services include reimbursement for shared expenses related to a commercial insurance policy. For the years ended December 31, 2013, 2014 and 2015, the Company paid or accrued \$ 16, \$ 11 and \$ 11, respectively, with respect to the above mentioned expenses. In 2012 MTS Ltd. engaged with Mer Telecom Ltd., a subsidiary of C. Mer, in a deployment of its mobile financial services ("MFS") solution for a customer in Africa and completed the deployment in 2013. The Company recorded revenue in the amount of \$ 29, \$ 33 and \$ 33 in 2013, 2014 and 2015, respectively.

NOTE 12:- RELATED PARTY TRANSACTIONS AND BALANCES (Cont.)

On March 25, 2009, the Company's Audit Committee and Board of Directors approved a transaction with Mer & Co. (1982) Ltd. ("Mer & Co"), a subsidiary of C. Mer. According to the terms of the transaction, the Company will sell its products to Mer & Co, which has an Israel Defense Forces approved supplier number, and Mer & Co will represent the Company and resell its products to the Israeli Defense Forces. During 2013, 2014 and 2015, revenues from the abovementioned transaction amounted to \$45, \$4 and \$ 0 respectively.

During middle of 2014, the company sells its products to Israel Defense Forces directly.

In 2014 the Company engaged with Athena Ltd., a subsidiary of C. Mer, in a deployment of a MFS solution for a customer in Africa in amount of \$ 65. As of December 31, 2015, the solution was completed and delivered and therefore revenue was recognized in 2015.

From January 1, 2009 until September 2011, as part of the acquisition of certain assets and liabilities of AnchorPoint, the Company received certain services from Data Distributors Inc., a company controlled by Mr. Roger Challen, a director of the Company and the controlling shareholder of the Info Group Inc., a beneficial owner of 12.3% of the Company's Ordinary shares as of December 31, 2015. These services include reimbursement for shared expenses, development and IT services, other administrative services. Expenses recognized with respect to the above mentioned services were approximately \$ 0, \$30 and \$ 9 for the years ended December 31, 2013, 2014 and 2015, respectively. In addition, the Company rents an office in Powder Springs, Georgia, from Mr. Challen, under a month-to-month lease. For the year ended December 31, 2013, 2014 and 2015, the Company paid or accrued \$ 56, \$56, \$ 56 with respect to the above mentioned rent expenses.

b. Balances and transactions with related parties were as follows:

1. Balances with related parties:

NOTE 13:- SHAREHOLDERS' EQUITY

a. Share capital:

The ordinary shares entitle their holders the right to receive notice to participate in and vote at general meetings of the Company and the right to receive cash dividends, if declared.

On April 1, 2015, upon closing the Vexigo transaction, the Company issued an aggregate of 3,115,090 restricted ordinary shares constituting 40% of the Company outstanding ordinary shares post-closing to the former shareholders of Vexigo.

Upon the closing of the Vexigo transaction, , the Company issued to an independent business consultant (who subsequently became the Company's chief executive officer) a warrant based on a cashless exercise mechanism to acquire 2% of the Company's outstanding ordinary shares on a pre-closing basis (93,453 ordinary shares based on the number of shares outstanding prior to the closing) with an exercise price equal to the market price of the Ordinary shares at the signing Vexigo SPA (i.e., \$0.96 per share) valid for a period of five years.

On May 11, 2015, the Company issued in a private placement to certain of its shareholders an aggregate of 227,271, Ordinary Shares, pursuant to a share purchase agreement. The aggregate purchase price for such 227,271 Ordinary Shares was \$500.

NOTE 13:- SHAREHOLDERS' EQUITY (Cont.)

b. Share options:

MTS's 1996 Incentive Share Option Plan (the "Plan") when adopted, authorized the grant of options to purchase up to 750,000 of its Ordinary shares to officers, employees and directors of MTS or any subsidiary, pursuant to section 102 of the Israel Income Tax Ordinance. Any option, which is canceled or forfeited before expiration, will become available for future grants.

Each option granted under the Plan is exercisable until the earlier of five years from the date of the grant of the option or the expiration dates of the option plan. The exercise price of the options granted under the plans may not be less than the nominal value of the shares into which such options were exercised. The options primarily vest gradually over four years of employment.

In 2003, pursuant to an amendment in section 102 of the Israeli Income Tax Ordinance the Company rolled-over the remaining 446,958 options available at that time under the Plan for future grants under the 2003 Incentive Share Option Plan (the "2003 Plan") that conforms with the amended provisions of section 102 of the Israel Income Tax Ordinance. In August 2013, shareholders approved amendments to the 2003 Plan. Its term was extended by ten years so that the 2003 Plan will expire on November 30, 2023, unless further extended. The number of ordinary shares issuable under the 2003 Plan was increased by an additional 500,000 Ordinary shares, so that the Company is entitled to issue up to 946,957 ordinary shares under the 2003 Plan.

In June 2006, the Company authorized pursuant to its 2006 Stock Option plan (the "2006 Plan"), to grant options to officers, employees and directors of MTS IntegraTRAK or any subsidiary of up to 200,000 of the Company's Ordinary shares. Each option granted under the 2006 Plan may be either an option intended to be treated as an "incentive stock option", within the meaning of section 422 of the Internal Revenue Code of 1986, as amended, or an option that will be treated as a "non-qualified stock option".

At the Company's 2011 annual general meeting, shareholders approved an amendment to the 2006 Plan to provide for the issuance thereunder of an additional 200,000 Ordinary shares and to increase the total number of Ordinary shares with respect to which options may be granted there-under to any eligible employee during any 12 month period to 150,000 Ordinary shares, subject to adjustment as provided in the 2006 Plan.

At the Company's 2013 annual general meeting, shareholders approved an amendment to the 2006 Plan to provide for the issuance thereunder of an additional 150,000 Ordinary shares, such that the Company will be entitled to issue options to purchase up to 550,000 Ordinary shares under the 2006 Plan. Each option granted under the 2006 Plan is exercisable until the earlier of five years from the date of the grant of the option or the expiration dates of the option plan. The exercise price of the options granted under the 2006 Plan may not be less than the fair market value of an Ordinary share determined as of the date of grant of the option.

NOTE 13:- SHAREHOLDERS' EQUITY (Cont.)

As of December 31, 2015 688,708 Ordinary shares are available for future option grants.

c. A summary of option activity under the Company's stock option plans to its employees as of December 31, 2015 and changes during the year ended December 31, 2015 are as follows:

| | Number of options | Weighted-average exercise price | Weighted-average remaining contractual term (in years) | Aggregate intrinsic value |
|----------------------------------|-------------------|---------------------------------|--|---------------------------|
| Outstanding at January 1, 2015 | 356,500 | \$ 1.68 | - | - |
| Granted | 296,000 | \$ 1.24 | 2.97 | - |
| Exercised | 28,355 | \$ 1.80 | - | - |
| Expired and forfeited | 58,000 | \$ 1.83 | - | - |
| Outstanding at December 31, 2015 | 566,145 | \$ 1.45 | 2.43 | \$ - |
| Vested and expected to vest | 522,392 | \$ 1.42 | 2.48 | \$ (314.06) |
| Exercisable at December 31, 2015 | 252,750 | \$ 1.46 | 0.91 | \$ (156.30) |

The weighted average grant-date fair value of options granted during 2014 and 2015 was \$ 1.38 and \$ 1.21 per option, respectively.

The total compensation cost related to options granted to employees under the Company's share-based compensation plans recognized for the years ended December 31, 2013, 2014 and 2015 amounted at \$93, \$84 and \$170, respectively, net of estimated forfeitures.

As of December 31, 2015, there was \$300 of total unrecognized compensation cost related to non-vested share-based compensation arrangements granted under the Company's stock option plans. That cost is expected to be recognized over a weighted-average period of three years.

| General and administrative | 79 | 59 | 96 |
| | \$ 93 | \$ 84 | \$ 170 |

NOTE 14:- REPORTABLE SEGMENTS AND GEOGRAPHIC INFORMATION

- a. Reportable segments:

The Chief Operating Decision Maker ("CODM") assesses the Company's business based on three operating segments: Enterprise, Service Providers and Video Advertising. Enterprise segment includes TEM, services and solutions. The Service Providers segments include Billing and MVNE services and solutions. These three segments also comprise the Company's reporting units. The CODM uses adjusted net income before interest, tax, depreciation and amortization, goodwill impairment, net of change in contingent earn-out considerations, capital gain and stock based compensation ("adjusted EBITDA"), to assess performance, measure liquidity and make decisions. Adjusted EBITDA is a non-GAAP unaudited measure of profit and loss.

The Company's segments are engaged in business activities for which they earn revenues and incur expenses, their results are reviewed by the CODM and discrete financial information is available.

Asset information, by reportable segment, is not reviewed by the CODM, therefore segment asset disclosure is not included.
