BARCLAYS PLC

GROUP REPORTING CHANGES IN 2006

Barclays PLC today announces the impact of certain changes in Group structure and reporting on 2005 and 2004 results, as advised in the conference call for the Trading Update on 25th May 2006. Barclays has realigned a number of reportable business segments based on the reorganisation of certain portfolios to better reflect the type of client served, the nature of the products offered and the associated risks and rewards. The Group's policy for the internal cost of funding and the segmental disclosure of risk weighted assets was also revised with effect from 1st January 2006. The restatements have no impact on the Group Income Statement or Balance Sheet. The 2005 and 2004 results for all the businesses are restated on pages 4 to 37 to show the effects of all of these changes.

Group structure changes - effective 1st January 2006

UK Retail Banking comprises Personal Customers, Local Business (formerly Small Business), UK Premier and Home Finance (formerly Mortgages). A number of smaller business clients previously within UK Business Banking are now managed and reported within UK Retail Banking.

UK Business Banking comprises Larger Business and Medium Business including Asset and Sales Finance. A number of financial institution, large corporate and property clients previously within UK Business Banking are now managed by and reported in Barclays Capital. A number of smaller business clients previously within UK Business Banking are now managed and reported within UK Retail

Banking. Certain portfolios have been reclassified as businesses in transition and are now managed and reported in Head office functions and other operations.

Barclays Capital has added a number of financial institutions, large corporates and property companies previously managed within UK Business Banking and International Retail and Commercial Banking - Absa.

International Retail and Commercial Banking - Absa. The majority of Absa Corporate and Merchant Banking has been relaunched as Absa Capital and is being managed and reported in Barclays Capital.

Head office functions and other operations. Certain lending portfolios previously managed within UK Business Banking have been reclassified as businesses in transition. These businesses are now centrally managed with the objective of maximising the recovery from these assets.

The structure remains unchanged for: Barclays Global Investors; Wealth Management; Wealth Management - closed life assurance activities; Barclaycard and; International Retail and Commercial Banking excluding Absa.

Changes to internal cost of funding - effective 1st January 2006

All transactions between the businesses are conducted on an arm's length basis. Internal charges and transfer pricing adjustments are reflected in the performance of each business. Head office functions and other operations contains a centralised Treasury function which manages the Group's capital base, generating a net interest income. Previously the net interest income was allocated to the businesses based on the level of economic capital held by each business as a proportion of that held by the Group, which ensured a nil net interest income result in Treasury. The allocation is now determined by applying Treasury's effective rate of return on capital to the average economic capital held by each business. In 2005 this had the effect of retaining a greater proportion of Treasury income within Head office functions and other operations, reflecting the capital and goodwill balances held centrally. This approach has been applied to all businesses. There is no change to the Group's net interest income as previously reported.

Changes to risk weighted assets by business - effective 1st January 2006

Under the Group's securitisation programme, certain portfolios of loans and advances to customers and other assets subject to securitisation or similar risk transfer are adjusted in calculating the Group's risk weighted assets. With effect from 1st January 2006 the costs associated with each securitisation, which were previously held centrally, will be allocated to the relevant businesses. The regulatory capital adjustments arising from the securitisation programme will be attributed to the business which bears the costs. This approach has been applied to all businesses. There is no change to the Group's total risk weighted assets as previously reported.

The information in this announcement does not comprise statutory accounts within the meaning of Section 240 of the Companies Act 1985 (the 'Act'). Statutory accounts for the year ended 31 December 2005, which also include certain information required for the joint Annual Report on Form 20-F of Barclays PLC

and Barclays Bank PLC to the US Securities and Exchange Commission, have been delivered to the Registrar of Companies in accordance with Section 242 of the Act.

International Financial Reporting Standards

The Group has applied International Financial Reporting Standards (IFRS) from 1st January 2004, with the exception of the standards relating to financial instruments and insurance contracts which are applied only with effect from 1st January 2005. Therefore the impacts of adopting IAS 32, IAS 39 and IFRS 4 are not included in the 2004 comparatives in accordance with IFRS 1 and financial instruments and insurance contracts are accounted for under UK GAAP in 2004.

The results for 2005 are therefore not entirely comparable to those for 2004 in affected areas. For a fuller disclosure of the transitional impacts of IFRS, please refer to the 2005 Annual Report, which contains re-measurement and reclassification reconciliations in the Notes to the Accounts. A summary of the Group's significant accounting policies can also be found in the 2005 Annual Report. The financial information in this announcement has been prepared in accordance with these accounting policies. Dashes have been used to indicate where changes in policy cause an item to be not applicable and where there is no amount to report.

- 1 Period from 27th July until 31st December 2005.
- 2 In 2005, International Retail and Commercial Banking Absa bore an internal charge equivalent to Barclays cost of funding the acquisition of the business. The net impact of this policy in 2005 was similar to that reflected in this document, resulting in a modest change in internal cost of funding relative to that experienced by other businesses.
- 3 The cost:income ratio is defined as operating expenses compared to total income net of insurance claims.
- 4 The cost:net income ratio is defined as operating expenses compared to total income net of insurance claims, less impairment charges.

² In 2005, International Retail and Commercial Banking - Absa bore an internal charge equivalent to Barclays cost of funding the acquisition of the business. The net impact of this policy in 2005 was similar to that reflected in this document, resulting in a modest change in internal cost of funding relative to that experienced by other businesses.

³ The cost:income ratio is defined as operating expenses compared to total income net of insurance claims.

⁴ The cost:net income ratio is defined as operating expenses compared to total income net of insurance claims, less impairment charges.

Group net interest income	8,075	3,700	 6,833

Business net interest income is derived from the interest rate earned on average assets or paid on average liabilities relative to the average Bank of England

base rate, local equivalents for international businesses or the rate managed by the bank using derivatives. The margin is expressed as annualised business interest income over the relevant average balance. Asset and liability margins cannot be added together as they are relative to the average Bank of England base rate, local equivalent for international businesses or the rate managed by the bank using derivatives.

Average balances are calculated on daily averages for most UK banking operations and monthly averages elsewhere.

Within the reconciliation of Group net interest income, there is an amount captured as Other. This relates to: benefit of capital, including the restatement of Reserve Capital Instruments and other capital instruments; Head office functions and other operations; net funding on non customer assets and liabilities; and Wealth Management - closed life assurance activities.

1 Period from 27th July until 31st December 2005.

- 1 Year-end economic capital is calculated using a five point average over the year. For the half-year a three point average is used.
- 2 Average economic capital demand for Absa relates to 5 months of 2005. As at 31st December 2005 the capital demand amounted to ${\tt GBP950m}$.
- 3 Includes businesses in transition and capital for Head office and central support functions.
- 4 The Group's practice is to maintain an appropriate level of excess capital, held at Group centre, which is not allocated to business units. This variance arises as a result of capital management timing and includes capital held to cover pension contribution risk.
- 5 Average goodwill relates to purchased goodwill and intangible assets from business acquisitions. Absa goodwill is included for 5 months of 2005. As at 31st December 2005 Absa goodwill and intangibles amounted to GBP1.8bn and total goodwill and intangibles was GBP7.9bn.
- 6 Total period-end economic capital requirement as at 31st December 2005 stood at GBP21,850m (30th June 2005: GBP20,750m; 31st December 2004: GBP18,700m).
