**1. Summary of APS revisions**

	Original APS	Revised APS
Capital injection	£19.5 billion	£25.5 billion
Contingent capital reserve	£6.0 billion	£8.0 billion, (fee of 4% p.a.)
<i>Details on Insurance cover:</i>		
Covered assets at 31 December 2008	£325 billion	£282 billion
RWA relief at 30 June 2009	£149.6 billion	£140.7 billion
First loss	£42.2 billion	£60.0 billion
- provisions recorded at 31 December 2008	£22.7 billion	£21.3 billion
- remaining	£19.5 billion	£38.7 billion
Fees:		
- base	£6.5 billion	£700 million p.a. (2009 to 2011), £500 million thereafter
- in deferred tax assets ('DTA') give up	£5.2 billion historical plus DTA on future tax losses	Nil
Termination rights	Limited	At any time provided FSA stress test framework is met
Exit fees	Negotiable	£2.5 billion less cumulative fees paid
FSA stress test	Meets FSA framework	Meets FSA framework

**Key messages:**

- .
- RBS continues to meet the FSA stress test framework
- .
- RBS is exposed to higher credit losses and less capital relief under revised APS
- .
- However, RBS will have more capital to serve as offsets through:
  - (a) lower fees and retention of deferred tax assets

- (b) issuance of additional B shares
- (c) access to contingent capital

Original APS structure provided higher equivalent capital benefits relative to 8% CT1 target than revised APS because of the way the securitisation formula works. Lower deductible policy resulted in lower capital charges through the period as the first loss is fully utilised.

2. Asset coverage  
(continued)

**2.5 Credit quality**

The internal reporting and oversight of risk assets principles are set out in the Group 2008 Report and Accounts credit risk section on page 90. The table below shows the credit quality of the Group's credit risk assets by risk bands and the proportion relating to assets in the Scheme.

Asset quality band	Probability of default	30 June 2009		31 December 2008	
		Group £bn	% relating to assets in the Scheme	Group £bn	% relating to assets in the Scheme
AQ1	0% - 0.034%	109	2%	127	3%
AQ2	0.034% - 0.048%	20	9%	26	16%
AQ3	0.048% - 0.095%	33	10%	38	17%
AQ4	0.095% - 0.381%	114	16%	150	15%

AQ10	100%	33	81%	18	72%
Other (1)		38	5%	41	8%
		658	24%	735	24%

## Notes:

- (1) 'Other' largely comprises assets covered by the standardised approach for which a probability of default (PD) equivalent to those assigned to assets covered by the internal ratings based approach is not available.
- (2) Reverse repurchase agreements, carrying value relating to net derivative positions and issuer risk relating to debt securities are excluded from both Group numbers and APS covered assets above.

Over 80% of Group's credit risk assets with 100% probability of default are in the Scheme.

## 2.6 Risk-weighted assets

### 3. Basis of asset selection

The selection has been carried out primarily between February and April 2009 and was driven by three principal criteria

- (1) Risk and degree of impairment in base case and stressed scenarios;
- (2) Liquidity of exposure; and
- (3) Capital intensity under procyclicality.

The approach for high volume commercial and retail exposures was on a portfolio basis. Selection for large corporates and GBM was at the counterparty/asset level.

Set out below are the selection criteria for the affected divisions.

<b>GBM*</b>	<p>Banking book: Selection by individual asset pool (e.g., Corporate loans, Real estate finance, Leveraged finance), Global Restructuring Group (GRG) work-out unit counterparties/assets and high risk counterparties/assets. Additional counterparties/assets were selected through an individual risk review of the total portfolio.</p> <p>Trading book: Selection by individual assets (e.g., Monolines, Derivatives, Mortgage trading).</p>
<b>UK Corporate*</b>	<p>Commercial &amp; Corporate real estate: All defaulted assets in the work-out/restructuring unit or in high risk bands.</p> <p>Corporate: All defaulted assets in the work-out/restructuring unit. Corporate banking clients in high risk sectors or with high concentration risk.</p> <p>Business Banking: Portfolios in the work out / restructuring unit or in high risk bands.</p>
<b>UK Retail*</b>	<p>Mortgages: assets with higher Loan to Values and in higher risk segments (e.g. LTVs &gt;97% on general book, LTVs &gt;85% on buy-to-let book), and those assets in arrears (at 31 December 2008).</p> <p>Loans and overdrafts - higher risk customers based on internal bandings, and those assets in arrears (as at 31 December 2008).</p>
<b>EME* (Corporate &amp; Retail)</b>	<p>Mortgages: Assets with greater than 85% LTV, broker mortgages and interest only with a higher probability of default.</p> <p>Retail: Portfolios of accounts in default, &gt;1 month arrears, &lt;2 years old and a higher probability of default.</p>

Corporate: Counterparties/assets in work-out / restructuring groups or in high risk bands, and other assets identified as part of an individual review of cases.
