As Placement Agents

The date of this prospectus supplement is April 14, 2004.

Use of Proceeds

We estimate that the net proceeds from the sale of the shares of common stock we are offering will be approximately \$24.02 million, assuming we sell the maximum number of shares offered hereby. Net proceeds is what we expect to receive after paying the placement agent fees and other expenses of the offering. Because there is no minimum offering amount required as a condition to closing this offering, the actual public offering amount, placement fees and proceeds to us, if any, are not presently determinable and may be substantially less than the maximum amount set forth above. We intend to use the net proceeds of this offering for general corporate purposes. We may also use a portion of the net proceeds to acquire or invest in businesses, products and technologies that are complementary to our own. However, we have no present understandings, commitments or agreements to enter into any such potential acquisition or investment. Pending these uses, the net proceeds will be invested in investment-grade, interest bearing securities.

Dilution

Our net tangible book value on December 31, 2003 was approximately \$28.32 million, or \$2.20 per share. Net tangible book value is total assets minus the sum of liabilities and intangible assets. Net tangible book value per share is net tangible book value divided by the total number of shares outstanding.

Assuming we sell all of the 2,570,000 shares of common stock offered by us by this prospectus supplement, the maximum number of share offered hereby, at the offering price of \$10.10 per share and after deducting the placement agent fees and estimated offering expenses, our pro forma net tangible book value on December 31, 2003 would have been \$52.34 million, or \$3.39 per share. The adjustments made to determine pro forma net tangible book value per share are the following:

An increase in total assets to reflect the net proceeds of the offering assuming we sell the maximum number of shares offered hereby as described under Use of Proceeds.

The addition of the number of shares offered by this prospectus supplement to the number of shares outstanding, assuming we sell the maximum number of shares offered hereby.

The following table illustrates the pro forma increase in net tangible book value of \$1.19 per share and the dilution (the difference between the offering price per share and net tangible book value per share) to new investors:

Offering price per share		\$ 10.10
Net tangible book value per share as of December 31, 2003	\$ 2.20	
Increase in net tangible book value per share attributable to the offering	1.19	
		<u>3.39</u>
Pro forma net tangible book value per share as of December 31, 2003, after giving effect to the offering		3.39
		<u>6.71</u>
Dilution per share to new investors in the offering		\$ 6.71
