For the fiscal year ended December 31, 2007

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to

Commission file number: 000-20997

SRI/SURGICAL EXPRESS, INC.

(Exact Name of Registrant as Specified in Its Charter)

Edgar Filing: SRI SURGICAL EXPRESS INC - Form 10-K

Florida <i>(State or other jurisdiction of incorporation or organization)</i>	59-3252632 <i>(I.R.S. Employer Identification No.)</i>
12425 Race Track Road Tampa, Florida <i>(Address of principal executive offices)</i>	33626 <i>(Zip Code)</i>

Registrant's telephone number, including area code:

(813) 891-9550

Securities registered pursuant to Section 12(b) of the Act:

Title of each class Common Stock, par value \$.001	Name of each exchange on which registered The NASDAQ Stock Market LLC
---------------------------------------------------------------------	----------------------------------------------------------------------------------------

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Small reporting company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting common stock held by non-affiliates of the registrant, based on the closing sale price of the common stock on June 30, 2007, as reported on the NASDAQ Global Market, was approximately \$21,900,000. For purposes of this determination, the registrant excluded shares of common stock known to be held by officers, directors, and 10% shareholders, because those persons might be

Edgar Filing: SRI SURGICAL EXPRESS INC - Form 10-K

deemed affiliates. This determination of affiliate status is not necessarily conclusive for other purposes.

The registrant had 6,470,978 shares of common stock outstanding as of February 29, 2008.

DOCUMENTS INCORPORATED BY REFERENCE

List hereunder the following documents if incorporated by reference and the Part of the Form 10-K (e.g., Part I, Part II, etc.) into which the document is incorporated.

Portions of the Proxy Statement for the registrant's 2008 Annual Meeting of Shareholders are incorporated by reference into Part III of this Annual Report on Form 10-K.

PART I

Item 1. Business

This Annual Report on Form 10-K, other documents that we publicly disseminate, and oral statements that are made on our behalf might contain both statements of historical fact and forward-looking statements. These forward-looking statements do not guarantee future performance, and our actual results could differ materially from those indicated by the forward-looking statements. Examples of forward-looking statements include: (i) projections of our revenue, earnings, capital structure, and other financial items, (ii) statements of our plans and objectives, (iii) statements of our expected future economic performance, and (iv) assumptions underlying our statements regarding SRI/Surgical Express, Inc. and our business. Among the factors that could cause or contribute to differences are those discussed below under the section entitled "Risk Factors". We do not undertake to update our forward-looking statements.

The Company

SRI Surgical Express, Inc. ("SRI Surgical", the "Company", we, us or our) provides operating room ("OR") supply chain and central sterilization management solutions to hospitals and surgery centers across the United States. Our solutions include daily processing, assembly and delivery of reusable and disposable supplies and instruments that our hospital customers require for surgery through state-of-the-art service facilities regulated by the Food and Drug Administration ("FDA"). We believe that this service establishes new benchmarks for hospital efficiency and OR productivity. We also believe that our daily delivery of surgical supplies and instruments improves our hospital customers' OR turnover and throughput and that our consistently high product quality and service levels enhance their physician and staff satisfaction and employee retention. Our surgical instruments' functionality and availability help ensure patient safety through standardized patient care. Our data management tools, such as ReadyView, facilitate our customers' best-practice decisions that drive their overall performance and profitability. The Company only has one reporting segment.

Our unique service model makes high-quality reusable textiles and basins viable, competitively priced alternatives to single-use disposable products. We offer an extensive reusable product offering designed to meet the requirements of the procedure and the physician, including gowns, back table and Mayo stand covers, towels, procedure and patient drapes and basin sets. We provide daily delivery, retrieval, processing, inspection, assembly and sterilization of reusable textiles from ten processing service facilities located strategically across the United States. We use technologically advanced materials in our gowns and drapes to provide unmatched comfort and exceptional barrier protection. Because our products are prepackaged to our customers' specific requirements, we do not include excess items that drive up costs and increase waste. Our patented Radio Frequency Identification ("RFID") process allows us to track product usage and test barrier properties at specified intervals. Reusable surgical products reduce the amount of environmental waste generated by our hospital customers. For situations in which disposable products are necessary, customized disposable accessory packs supplement our reusable textiles to provide our customers a complete OR supply solution. Our disposable products are assembled in our U.S.-based assembly facility.

We also offer expert daily instrument processing at both our facilities (off-site) and our customers' facilities (on-site). This innovative service provides customized, high-quality surgical instrument sets on a per-procedure fee basis. Sets processed at our FDA-regulated facilities have a consistently high level of quality built into every set. Our highly trained instrument-processing technicians follow a thorough inspection and cleaning process to help ensure that the instruments are in proper working order. We assure instrument availability and functionality, which offers our customers an opportunity to achieve high efficiency levels. We can also oversee management of a hospital's instrument processing and central sterilization services. In this setting, by using our expertise in implementing and managing FDA-regulated instrument processing facilities, we can deliver desired quality and performance levels that our customers seek.

Our integrated closed-loop process starts with daily delivery of reusable and disposable surgical supplies and instruments to the healthcare provider to support their surgical schedule. At the same time, we pick up the

Table of Contents

reusable textiles, basins, and instruments used in surgery and return them to our processing facility. Used products arriving at our processing facility are sorted, cleaned, inspected, packaged, sterilized, and subsequently, shipped back to the healthcare providers. This closed-loop system eliminates the need for healthcare providers to stock on-hand inventory and greatly simplifies our customers' surgical supply chain process. This process also allows healthcare providers to reduce medical waste disposal costs and increase the quality of products used by their staff and physicians. Additionally, with our daily just-in-time delivery model, our customers' working capital requirements are favorably affected by their ability to carry less on-hand inventory of disposable products to support their surgical procedures.

We are well positioned to help healthcare providers reduce operating costs while improving the quality of care, so that they can respond to pressures created by the continued growth of managed care and reductions in procedure reimbursement. To reduce operating costs, we offer comprehensive procedure bundling solutions and outsourcing of surgical instrument processing. By providing surgical instruments of superior functionality and bundling solutions that allow surgical staff to shift focus from supply management to patient management, we help our customers significantly reduce operating and capital costs, increase revenue, and improve the quality of patient care.

We maintain an internet website located at www.srisurgical.com. On our website we make available, free of charge, our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and any amendments to those reports filed or furnished to the Securities and Exchange Commission (SEC). This information is made available as soon as reasonably practicable after we electronically file with or furnish it to the SEC. Our Code of Ethics and Corporate Compliance Policy is also posted on our website. Information contained on our website, whether currently posted or posted in the future, is not part of this document or any documents incorporated by reference in this document.

Market

Since our introduction in the early 1990 s of reusable surgical gowns and drapes of exceptional quality for healthcare providers' use, we have added custom disposable surgical packs to our product offering. In recent years, we have supplied and reprocessed high quality surgical instruments for our customers. Our ability to offer reusable surgical gowns and drapes, custom disposable surgical packs and reusable surgical instruments enables us to supply most everything our customers require for surgical procedures.

According to the American Hospital Association, the Lewin Group, and SMG Marketing Group, Inc., the United States healthcare market includes approximately 5,800 acute care hospitals and 5,200 freestanding surgery centers.

The following market conditions and strategies provide continuing opportunities for us:

Continued Pressure on Providers to Contain Costs and Improve Profitability. With growth of managed care and a decrease in surgical service reimbursements, economic constraints require providers to continually increase their efficiency. To assist them in reducing their cost of operation, we offer products and services that help our customers eliminate inventory, reduce staff, capital expenditures and medical waste, and improve their overall supply chain efficiency.

Increased Outsourcing of Provider Functions That Do Not Involve Patient Care. Providers with significant staff, capital and space dedicated to in-house processing of reusable surgical products and surgical instruments are outsourcing these functions to qualified outsourcing providers. By enabling our customers to outsource non-core functions, we allow them to increasingly focus on patient care.

Concern Regarding the Transmission of Infectious Diseases. The healthcare industry must manage the risk of infectious disease. These concerns increase the need for surgical barrier fabrics that protect surgeons and surgical staff from bloodborne pathogens. Our line of ComfortSure™ gowns helps to prevent liquid and viral

Table of Contents

strike-through in critical areas during surgical procedures. Additionally, our FDA regulated processes for decontamination and reprocessing of surgical instrumentation enables healthcare providers to better manage the risk of transmission of infectious diseases.

Concern Regarding the Handling and Disposal of Biohazardous Waste. The disposal of large volumes of infectious and hazardous waste generated by the healthcare industry continues to attract increased public awareness. Healthcare providers are under pressure to reduce their generation of biohazardous waste because of restrictions on incineration and limited access to dump sites. This market dynamic offers an advantage to companies that provide outsourced reusable alternatives to disposable surgical products.

Leverage Infrastructure with Increased Penetration in Markets. Our existing facilities combined currently have significant available capacity to access more of the national market. Distribution expansion, if prudently executed, could provide opportunity for business growth with incremental capital investment.

Customers

As of December 31, 2007, we served a customer base of approximately 350 hospitals and surgery centers located throughout the United States. Our strategy is to further expand upon the supply chain management needs of our current customer base, and grow our customer base by focusing on hospitals and surgery centers that are surgical procedure intensive.

We maintain short-term agreements to supply several group purchasing organizations (GPOs), including Novation, LLC, HealthTrust Purchasing Group, L.P., MedAssets, Inc., Broadlane, Inc. (for Tenet Healthcare Corporation), Consorta, Inc., Premier Purchasing Partners, L.P., and Shared Services Healthcare, Inc. Novation is the supply company for Voluntary Hospitals of America, Inc. and University HealthSystem Consortium. HealthTrust Purchasing is a GPO representing over 4,300 hospitals and surgery centers. MedAssets is the largest independent purchasing group in the United States. Tenet owns and operates 54 acute care hospitals in 12 states. Consorta is a leading healthcare resource management and GPO, with shareholders consisting of faith-based or non-profit health systems. Premier has more than 1,500 member hospitals and 47,000 other healthcare sites. Shared Services is a southeastern GPO. Through these relationships our products and services are potentially available to the vast majority of providers and surgery centers in our service areas. We continue to pursue additional GPO contracts that would allow us opportunities to further penetrate the healthcare market.

Products

Our principal reusable surgical products are ComfortSure™ surgical gowns. We also offer reusable towels, surgical drapes, and stainless steel basin sets as part of our reusable surgical product line. We provide these products in a variety of configurations for a provider's specific needs. A major benefit of our reusable system is reduced medical waste because of the elimination of disposable, single-use products.

Our ComfortSure™ Premium Liquid Resistant and Liquid Proof gowns™ are made of some of the most technologically advanced materials available, providing users with a highly breathable gown and excellent protection. This added protection is critical to healthcare providers given continuing concerns of doctors, staff, and regulatory authorities regarding transmission of bloodborne pathogens, including HIV and hepatitis viruses. The Premium Liquid Resistant and Liquid Proof gowns are ideal for procedures with high bodily fluid volume and of longer duration. Our standard surgical gown is a cost-effective solution to higher priced gowns. Our standard gown is made from an advanced micro-fiber polyester liquid resistant fabric, ensuring a high degree of comfort to the user. We believe this gown is ideal for procedures with minimal fluid exposure and of shorter duration.

We implemented RFID technology in our ten processing facilities. RFID technology is a method for identifying and tracking objects based on the use of a small tag that stores a unique code. We incorporated

Table of Contents

multi-read RFID tags into our reusable surgical gowns and drapes, which allow us to replace the use of labor-intensive bar code scanning to track product usage. This technology offers us improved inventory control and monitoring of product quality. SRI holds a patent covering this process.

We contract with third-party vendors for cutting and sewing of gowns and drapes. In August 1998, we signed a ten-year sales and manufacturing agreement with Standard Textile Co., Inc. (Standard Textile), under which Standard Textile manufactures most of our reusable textile products, which expires in August of this year. We are discussing an extension of this agreement with Standard Textile and we also continue to explore other alternatives.

To complement our reusable surgical products, we offer disposable accessory packs containing single-use disposable products, such as gauze, needles, syringes, and tubing. These packs are developed to a customer's specifications, and in combination with our reusable line of surgical products, offer a cost-effective, high-quality alternative to custom procedure packs containing all disposable products.

Our instrument-processing program, called AccuSetSM, offers our customers the benefit of consistently available surgical instruments processed at an FDA-regulated facility. Our thorough cleaning and inspection process assures that surgical instruments are functional and meet rigorous quality standards. We offer general, laparoscopic, orthopedic, arthroscopic, ophthalmic, neuro, ENT (ear, nose and throat) and L&D (labor and delivery) instrument processing at our facilities. We have introduced an overnight instrument processing program, ReadyCaseSM OnDemand. The program makes available to hospitals and surgery centers additional processing capabilities at our FDA-regulated facilities should they find themselves in sudden need. As of December 31, 2007, we serviced instrument programs at 72 hospitals.

We offer instruments as part of the AccuSetSM program pursuant to a Joint Marketing Agreement with Aesculap, Inc. (Aesculap), one of the oldest and largest worldwide suppliers of surgical instruments. In March 2003, we signed a 10-year Joint Marketing Agreement with Aesculap whereby Aesculap provides most of the surgical instruments our customers use in their procedures. Aesculap furnishes the majority of the surgical instruments that we deliver to our customers. Aesculap receives an agreed upon fee from each procedure based on the number and kinds of procedures performed with its instruments and the number and combination of instruments used for each procedure. We have also developed vendor relationships with many leading manufacturers of surgical instruments to procure instrumentation preferred by our customers and that Aesculap does not manufacture. These vendor relationships expand the range of solutions that we offer our customers. We expect our instrument-processing program will continue to grow and, as a result, we expect our instrument inventory will continue to grow.

ReadyCaseSM, our surgical supply and instrument delivery system, combines reusable products, disposable packs, surgical instruments, and physician preference items to provide most of the products required for a surgical procedure. The system allows hospital customers to develop and implement best practice protocols. We believe that ReadyCaseSM is the most complete case cart system available in the market. By delivering a high percentage of surgical products and instruments used in a procedure, ReadyCaseSM offers our customers the potential to reduce their supply chain management costs, improve their operational efficiency, and increase their revenue by improving throughput in their surgical area. ReadyCaseSM customers are able to view and analyze cost per procedure data and identify product standardization opportunities through our proprietary web portal.

We also provide an outsource solution for our customers' instrument processing and sterilization needs. Utilizing our expertise in managing FDA-regulated instrument processing facilities, we offer cost-effective management of hospital and surgery center instrumentation supply chain and central sterilization facilities.

Employees

As of December 31, 2007, we employed 860 people. Our employees are not covered by a collective bargaining agreement. We consider our employee relations to be good.

Table of Contents

Competition

We compete primarily with sellers of disposable gowns, drapes, basins and custom packs. Our principal competitors are Allegiance Corporation (a subsidiary of Cardinal Health, Inc.), Medline Industries, Inc., DeRoyal Industries, Inc., and Kimberly Clark Corporation. We also compete with third party instrument processors and the in-house processing capabilities of hospitals and surgery centers to provide surgical instruments and reusable products.

The challenging healthcare environment in recent years has led to increasingly intense competition among suppliers and manufacturers of surgical products. As providers seek to reduce operating costs in response to pressure from governments, insurance companies, and health maintenance organizations, suppliers and manufacturers are being forced to compete on price, service, quality and delivery of innovative solutions that improve the healthcare supply chain. Because we believe competitive pressure will continue to intensify for the foreseeable future, we must position SRI Surgical to effectively compete based on our high-quality service and innovative outsourcing solutions.

Regulation

Substantially all of our products and services are subject to extensive government regulation in the United States by federal, state, and local governmental agencies, including the Food and Drug Administration (FDA), the Department of Transportation (DOT), and the Occupational Safety and Health Administration (OSHA).

Our reusable products are regulated as medical devices by the FDA, which regulates the development, production, distribution, and promotion of medical devices in the United States. Various states in which we do business also regulate medical devices. Pursuant to the Federal Food, Drug and Cosmetics Act (the FDA Act), our medical devices are subject to general controls regarding FDA inspections of our facilities, current Good Manufacturing Practices (cGMP s), the Quality System Regulations (QSR), labeling, maintenance of records, and medical device reporting with the FDA. To the extent required, we have obtained FDA pre-market approval of our devices under Section 510(k) of regulations issued under the Code of Federal Regulations (CFR), which provides for FDA approval on an expedited basis for products shown to be substantially equivalent to devices already cleared by the FDA and currently legally marketable in the United States. Products must be produced in establishments registered with the FDA and manufactured in accordance with the QSR, as defined under the FDA Act. In addition, our medical devices must be initially listed with the FDA, and our labeling and promotional activities are subject to scrutiny by the FDA and, in certain instances, by the Federal Trade Commission. The Medical Device Reporting regulation obligates us to provide information to the FDA on serious injuries or deaths alleged to have been associated with the use of a product or in connection with certain product failures that could have caused serious injury or death. If we fail to comply with the applicable provisions of the FDA Act, the FDA may institute proceedings to detain or seize products, impose fines, enjoin future company activities, impose product labeling restrictions, or enforce product recalls or withdrawals from the market.

We and our hospital customers also must comply with regulations of OSHA, including the blood borne pathogen standards requiring standard (universal) precautions be observed to minimize exposure to blood and other bodily fluids. To comply with these requirements, our employees wear appropriate personal protective equipment when handling soiled linens and materials in the facility s decontamination area. Properly used, our products allow our hospital customers to protect their employees in compliance with the OSHA regulations. Additionally, we must comply with local regulations governing the discharge of water used in our operations. We use locally licensed contractors to dispose of any biohazardous waste generated by our customers and received by us and therefore do not need to obtain permits for biohazardous waste disposal. We must comply with DOT and OSHA regulations governing the transportation of biohazardous materials, which include containing and labeling waste as well as reporting various discharges. We comply with these regulations by confining soiled products inside marked liquid proof bags for transport within secured and appropriately labeled transfer carts. A third-party contractor provides sterilization of our disposable accessory packs. The use of ethylene oxide by the contractor in the sterilization of our disposable accessory packs is subject to regulation by FDA, OSHA, and the Environmental Protection Agency.

Table of Contents

In addition, other federal, state and local regulatory authorities, including those enforcing laws which relate to the environment, fire hazard control, and working conditions, have jurisdiction to take actions that could have a material adverse effect on us. We make expenditures from time to time to comply with environmental regulations, but do not expect to make any material capital expenditures for environmental compliance during 2008. However, current environmental estimates could be modified as a result of changes in our plans, legal requirements or other factors.

Item 1A. Risk Factors

The cautionary statements set forth below, as well as factors described elsewhere in this Annual Report on Form 10-K and in other SEC filings, discuss important factors that could cause actual results to differ materially from any forward-looking statements.

Our future growth is dependent on the sales process and market acceptance of our products and services. Our future performance depends on our ability to maintain and increase revenues from new and existing customers. Our sales process to acquire new customers is typically extended in duration, because of industry factors such as the approval process in hospitals for purchases from new suppliers, the duration of existing supply contracts, and implementation delays pending termination of a hospital's previous supply relationships. Our future performance also depends on the market accepting our product and service offerings, which emphasize the supply of reusable surgical products to a market that predominantly uses disposable products. We are also regularly developing new instrument processing programs. We are subject to a risk that the market will not broadly accept these product offerings, which would adversely affect our revenues and operating results.

Our restructuring of our sales, service and operations might disrupt our business. We are in the process of implementing recommendations of our management consulting firm for a reorganization of our sales, service and operations. See *Management's Discussion and Analysis of Financial Condition and Results of Operations - Overview*. We are subject to risks that the reorganization might not be successful, and might result in business disruption and higher costs than anticipated.

We may need additional capital in the future, which might not be available; potential impact of covenant default. Our business is capital intensive and requires annual expenditures for additional surgical products. Should we need or otherwise decide to raise additional funds, we may not be able to obtain financing on favorable terms, if at all. If we cannot raise funds, if needed, on acceptable terms, we may not be able to develop or enhance our products, take advantage of future opportunities, respond to competitive pressures or unanticipated requirements or otherwise support our operations. As of December 31, 2007, we were unable to comply with certain financial covenants in our credit facility. The financial institutions providing the credit facility waived the requirement to meet these covenants as of December 31, 2007 and amended the amount of the credit facility and covenants thereafter. There can be no assurance that our lenders will issue a waiver or grant an amendment in future periods. The revolving credit facility expires in June 2008. We are negotiating an extension of the existing credit facility or a new credit facility to commence prior to the expiration of the current credit facility. We may not be able to extend or renew the credit facility, which would adversely affect us. Our continuing access to that facility depends on our ability to comply with or satisfactorily restructure these financial covenants, which is not assured. See *Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources*.

We rely on key suppliers. We rely on Aesculap as our major source of supply of instruments for our instrument processing programs. Any failure of Aesculap to furnish instruments for any reason would materially and adversely affect our ability to service these programs until we secured one or more alternative suppliers. We also have a procurement agreement with Standard Textile as our supply source for our reusable surgical products through August 2008. If Standard Textile were unable to perform under this agreement, or if we are unable to extend this agreement beyond August 2008 or find a suitable alternative, we would be materially and adversely affected.

Table of Contents

The loss of a significant customer or purchasing organization could adversely affect our operating results. During the year ended December 31, 2007, hospitals belonging to three group purchasing organizations (GPOs), Novation, LLC, HealthTrust Purchasing Group, L.P. and MedAssets, Inc. accounted for approximately 63% of our sales. One customer, a healthcare provider, accounted for approximately 11% of our revenues in 2007. Our business with these GPOs is pursuant to short-term agreements, which are subject to renewal from time to time through competitive processes. Although each GPO member hospital currently makes its purchasing decisions on an individual basis, the loss of a substantial portion of the GPO hospitals' business would adversely affect our revenues and results of operations.

Intense competition in the markets in which we operate could adversely affect us. Our business is highly competitive. Competitors include a number of distributors and manufacturers, as well as the in-house reprocessing operations of hospitals. Certain of our existing and potential competitors possess substantially greater resources than we. Some of our competitors, including Allegiance Corporation (a subsidiary of Cardinal Health, Inc.) and Medline Industries, Inc., serve as the sole supplier of a wide assortment of products to a significant number of hospitals. While we have a substantial array of surgical products, many of our competitors have a greater number of products for the entire hospital, which in some instances is a competitive disadvantage for us. There is no assurance that we will be able to compete effectively with existing or potential competitors. See *Business-Competition*.

The loss of key executives and employees could adversely affect us. Our success depends upon the contributions of executives and key employees. The loss of executives and certain key employees in sales, operations and marketing could have a significant adverse effect on our ability to penetrate our markets, operate efficiently, and develop and sell new products and services. We also believe our success will depend in large part upon our ability to attract and retain additional highly skilled personnel. In January 2008, we appointed a new Chief Executive Officer to lead the Company.

Our ability to effectively grow depends on our ability to improve our operational systems. We have expanded our operations since inception and expect to expand to pursue existing and potential market opportunities. This growth places a significant demand on management, financial and operational resources. To manage growth effectively, we must implement and improve our operational systems, procedures and controls on a timely basis and continue to invest in the operational infrastructure of our business.

Our product liability insurance may not be sufficient to cover all claims. The use of medical devices such as surgical instruments entails an inherent risk of product liability or other claims initiated by patients or hospitals. Any of those claims in excess of our insurance coverage or not covered by insurance could adversely affect our results of operations.

Changes in federal or state regulations could materially adversely affect us. Significant aspects of our businesses are subject to federal, state and local statutes and regulations governing, among other things, medical waste-disposal and workplace health and safety. In addition, most of the products furnished or sold by us are subject to regulation as medical devices by the FDA, as well as by other federal, state and local agencies. Our facilities are subject to quality systems inspections by FDA officials. The FDA has the power to enjoin future violations, seize adulterated or misbranded devices, and require the manufacturer to remove products from the market, and publicize relevant facts. Federal, state or local governments might impose additional restrictions or adopt interpretations of existing laws that could materially adversely affect us. See *Business-Regulation*.

Item 1B. Unresolved Staff Comments

Not applicable.

Table of Contents**Item 2. Properties**

We operate ten reusable processing facilities that range in size between 30,000 and 63,500 square feet in Baltimore, Chattanooga, Cincinnati, Dallas, Houston, Los Angeles, Raleigh, Salt Lake City, Stockton, and Tampa. Each facility has standardized processes and equipment, including computerized and fully automated heavy-duty washers, dryers, and sterilizers to achieve consistent decontamination and sterilization of reusable surgical products and instruments. We follow the Quality System Regulations at each facility, and regularly implement at all facilities efficiencies that have been developed and tested at another location.

We maintain service centers in Detroit, Louisville, Miami and Oklahoma City to facilitate distribution of our products to our customers.

We also operate a disposable accessory products facility in Plant City, Florida, where we assemble and package single-use surgical products into customized disposable accessory packs. We transport these disposable accessory packs to a third-party facility for sterilization before they are sent to our processing facilities for final delivery.

We own our Chattanooga, Cincinnati, Houston, and Stockton processing facilities and our corporate headquarters facility; we lease the remaining processing facilities, service centers, and the disposable accessory products facility.

We believe that our existing facilities adequately serve our current requirements. The table below summarizes our properties and the major markets they serve as of December 31, 2007:

	Square Footage (Approx.)	Lease Expiration	Selected Markets Served
<i>Processing Facilities:</i>			
Baltimore, Maryland	58,700	May 31, 2012 (Options to 2022)	Baltimore, Philadelphia, Richmond, New Jersey
Chattanooga, Tennessee	50,000	Owned	Atlanta, Birmingham, Nashville
Cincinnati, Ohio	50,000	Owned	Columbus, Cincinnati, Louisville, Lexington, Detroit, Cleveland
Dallas, Texas	53,000	March 31, 2008 (Options to 2010)	Dallas, Oklahoma City, Tulsa
Houston, Texas	30,000	Owned	Houston, San Antonio, Austin
Los Angeles, California	30,400	November 30, 2012	San Diego, Los Angeles
Raleigh, North Carolina	63,500	March 31, 2012 (Options to 2022)	South Carolina, North Carolina

Item 3. Legal Proceedings

From time to time, we are subject to legal proceedings that arise in the ordinary course of our business. We do not believe these proceedings, individually or in the aggregate, will have a material adverse effect on our financial position, results of operations, or cash flow.

Item 4. Submission of Matters to a Vote of Security Holders

No matters were submitted to a vote of shareholders during the fourth quarter of 2007.

Table of Contents**PART II****Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities
Common Stock Information**

Our common stock trades publicly on The NASDAQ Stock Market LLC (NASDAQ Global Market) (the "NASDAQ") under the symbol "STRC". On February 29, 2008, there were approximately 38 holders of record of our common stock. The table below sets forth the high and low sales prices for our common stock for fiscal years 2006 and 2007, as reported on the NASDAQ.

Common Stock Price Range

Year ended December 31, 2006	High	Low
First quarter	\$ 6.90	\$ 5.61
Second quarter	\$ 7.44	\$ 5.01
Third quarter	\$ 6.78	\$ 4.10
Fourth quarter	\$ 5.50	\$ 3.86
Year ended December 31, 2007		
First quarter	\$ 6.34	\$ 4.40
Second quarter	\$ 5.95	\$ 4.31
Third quarter	\$ 6.50	\$ 4.01
Fourth quarter	\$ 7.40	\$ 3.67

We have never declared or paid cash dividends on our common stock and do not anticipate paying dividends on our common stock in the foreseeable future. Additionally, financial covenants in our credit facility prohibit the payment of cash dividends. See *Management's Discussion and Analysis of Financial Condition and Results of Operations*, *Liquidity and Capital Resources* and *Notes to Financial Statements*.

Stock Performance Graph

The following graph shows a comparison of our cumulative total shareholder return, NASDAQ Global Market (U.S.), and the NASDAQ Health Care Index. This graph assumes that \$100 was invested on December 31, 2002 in our common stock and in the other indices and in each case, assumes reinvestment of all dividends. Historic stock price performance does not necessarily indicate future stock price performance.

Table of Contents**Item 6. Selected Financial Data**

The following table contains certain selected financial data that have been derived from our audited financial statements. The data should be read in conjunction with the Financial Statements and Notes thereto incorporated into Item 8 and *Management's Discussion and Analysis of Financial Condition and Results of Operations* incorporated into Item 7.

	2007	Years Ended December 31,			2003

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read with our financial statements and Notes included elsewhere in this Annual Report on Form 10-K. This discussion and analysis contains trend analysis and might contain forward-looking statements. These statements are based on current expectations and actual results might differ materially. Among the factors that could cause actual results to vary are those described in the Overview section below and in Item 1A. Risk Factors.

Overview

We provide daily processing, assembly and delivery of reusable and disposable products and instruments required for surgery through our state-of-the-art, FDA-regulated service centers. Our integrated closed-loop process starts with daily delivery of reusable and disposable surgical supplies and instruments to healthcare providers. At the same time, we pick up the reusable textiles, basins and instruments used in surgery and return them to our processing facility. Used products arriving at our processing facility are sorted, cleaned, inspected, packaged, sterilized, and subsequently, shipped back to the healthcare providers. In addition, we manage the instrumentation and supply chain of hospital and surgery centers, ORs and their central sterilization facilities.

We believe our facilities are strategically situated to capitalize on future market opportunities. These facilities have significant available capacity to access more of the national market.

We derive our revenue from the sale and servicing of reusable and disposable surgical products and instruments and the management of our customers' supply chain. Reusable products include linens (gowns, towels and drapes) and basins (stainless steel cups, carafes, trays and basins). Disposable accessory packs supplement the reusable products with highly customizable components. We sell our products and services through a direct sales force located throughout most of the major markets in the United States. Our revenue growth is primarily determined by the number of customers, the number and type of surgical procedures that we service for each customer, and pricing for our various types of surgical packs and procedures. Revenues are recognized as products and services are delivered, generally daily. We incur most of our cost of revenues from processing the reusable surgical products and instruments at our processing facilities.

Most of our surgical instrument supply arrangements with customers utilize instruments owned by Aesculap, Inc. (Aesculap), which receives an agreed upon fee for each procedure based on the number and kinds of procedures performed with its instruments and the number and combination of instruments used for each procedure. This arrangement allows us to limit our cost of capital for instrument programs. In addition to the Aesculap-owned instruments, we purchase surgical instruments from other vendors to service customers who have requirements that Aesculap cannot fulfill. We expect instrument revenues will continue to grow and, as a result, we expect our instrument inventory will continue to grow.

Our profitability is primarily determined by our revenues, the efficiency with which we deliver products and services to customers, and our ability to control our costs. We incurred operating and net losses in 2007, as our revenues were short of expectations and we experienced lower margins. Although sales to customers who predominantly purchase reusable textiles declined, we continue to see growth in other products sold with our ReadyCaseSM case cart management system (combining instruments, reusable textiles and disposable products). We are encountering compressed margins, primarily as a result of industry pricing trends. During 2007, we also incurred increased product and production labor costs, severance, and management consulting fees for the business assessment and planning described below.

Our principal strategic opportunity to improve our operating results is to capitalize on our service capabilities and considerable infrastructure by leveraging our current relationships with existing customers and adding new customers. We continue to focus on introducing our current and potential new customers to our physician-specific ReadyCaseSM case cart management system, which has been our principal source of new sales.

Table of Contents

In the fourth quarter of 2006, we engaged a global management consulting firm to conduct an in-depth business assessment and develop specific plans to optimize our performance and growth. During the second quarter of 2007, we re-engaged the management consulting firm to assist us in developing a plan for improving the effectiveness of our sales and service organizations which involves reorganizing and retraining our sales force, developing a customer service and sales training function, and implementing a technology platform to support our sales force and customer service initiatives. We incurred \$600,000 in 2007 as a result of this effort and expect to incur additional costs on a continuing basis to implement the plan. We expect that the costs will relate primarily to compensation, training and travel expenses associated with this reorganization as well as the implementation of technology. We expect these changes will generate revenue growth and, in the longer run, improve our financial performance. See *Certain Considerations Our restructuring of our sales, service and operations might disrupt our business* .

We continue to seek ways to improve the efficiency and effectiveness of our operations. During the year we completed a lean transformation at our Tampa and Cincinnati facilities. This process involved a review of every element of our operations to identify cost savings opportunities and generate efficiencies. We will continue to roll out the resulting cost-saving measures to our other facilities. We expect this initiative to have a positive impact on our performance in the years ahead.

In January 2008, we appointed a new Chief Executive Officer to lead the Company.

Critical Accounting Policies and Estimates

The preparation of our financial statements and related disclosures in conformity with accounting principles generally accepted in the United States of America requires management to make judgments, assumptions, and estimates that affect the amounts reported in our financial statements and accompanying notes. On an on-going basis, we evaluate our estimates and assumptions based upon historical experience and various other factors and circumstances. We believe that these estimates and assumptions are reasonable under the circumstances; however, actual results may vary from these estimates and assumptions. Note B to our financial statements describes the significant accounting policies and methods that we use in preparing our financial statements. We identified the following critical accounting policies that affect the more significant judgments, assumptions and estimates used in preparing our financial statements.

Allowance for Doubtful Accounts. Our allowance for doubtful accounts is based on our assessment of the collectability of specific customer accounts, the overall aging of the balances, and the financial stability of the customer. The use of different estimates or assumptions could produce different allowance balances. If a major customer's creditworthiness deteriorates or customer defaults run at a rate higher than historical experience, we would be required to increase this allowance, which could adversely affect our results of operations.

Reserves for Shrinkage, Obsolescence, and Scrap for Reusable Surgical Products and Instruments. We determine our reserves for shrinkage and obsolescence of our reusable surgical products and instruments based on historical experience. Any linen products not scanned by our RFID system for a 210-day period are considered lost and written off. We determine our reserve for scrap based upon quality assurance standards and historical evidence. We periodically verify the quantity of other reusable surgical products by counting and by applying observed turn rates. A third party, Aesculap, owns most of the surgical instruments that we use. We base our reserve for owned surgical instrument losses on our assessment of our historical loss experience, including periodic physical counts. Using different estimates or assumptions could produce different reserve balances for our reusable products and instruments. We review this reserve quarterly. If actual shrinkage, obsolescence or scrap differs from our estimates, our reserve would increase or decrease accordingly, which could adversely affect our results of operations.

Reserves for Shrinkage and Obsolescence for Inventories. We determine our reserves for shrinkage and obsolescence of our inventories based on historical data, including the results of cycle counts performed during

Table of Contents

the year and the evaluation of the aging of reusable and disposable surgical products and instruments. Using different estimates or assumptions could produce different reserve balances. We review this reserve quarterly. If actual losses differ from our estimates, our reserve would increase or decrease accordingly, which could adversely affect our results of operations.

Amortization of Reusable Surgical Products and Instruments. Our reusable surgical products are stated at cost. We amortize linens and basins on a basis similar to the units of production method. Estimated useful lives for each product are based on the estimated total number of available uses for each product. The expected total available usage for our linen products using the three principal fabrics (accounting for approximately 82% of the reusable surgical products) is 75, 100, and 125 uses, based on several factors, including our actual historical experience with these products. We believe our RFID technology enables us to evaluate the useful lives of linen products more often. Basins are amortized over their estimated useful life, which ranges from 25 to 200 uses. We amortize owned surgical instruments on the straight-line method based on a four-year useful life. If our actual use experience with these products is shorter than these assumptions, our amortization rates for reusable products and instruments would increase, which could adversely affect our results of operations.

Health Insurance Reserves. We offer employee benefit programs including health insurance to eligible employees. We retain a liability up to \$85,000 annually for each health insurance claim. Our policy has an estimated annual aggregate liability limit of \$3.1 million. We accrue health insurance costs using estimates to approximate the liability for reported claims and claims incurred but not reported. Using different estimates or assumptions could produce different reserve balances. If actual claim results exceed our estimates, our health insurance reserve would increase, which could adversely affect our results of operations.

Workers Compensation Insurance Reserve. Our workers compensation insurance program is a large dollar deductible, self-funded plan. We retain a liability of \$250,000 for each claim occurrence. Our policy has an annual aggregate liability limit of \$1.5 million. We base our reserve on historical claims experience and reported claims. We accrue workers compensation insurance costs using estimates to approximate the liability for reported claims and claims incurred but not reported. We review this reserve quarterly. If actual claims differ from our estimates, the reserve would increase or decrease accordingly, which could adversely affect our results of operations.

Income Taxes. Our effective tax rate is based on our losses and statutory tax rates in the various jurisdictions in which we operate. Significant judgment is required in determining our effective tax rate and evaluating our tax positions. Our effective tax rate depends upon our forecast of results for the fiscal year. Each quarter, we evaluate our forecasted fiscal year results and adjust our tax provision to reflect the effective tax rate on a cumulative basis. This rate is applied to our quarterly operating results. Income taxes have been provided using the liability method in accordance with Statement of Financial Accounting Standards Statement No. 109, *Accounting for Income Taxes* (SFAS 109). In accordance with SFAS 109, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in the tax rate is recognized in operations in the period that includes the enactment date of the rate change. The tax benefits must be reduced by a valuation allowance in certain circumstances. Realization of the deferred tax benefits is dependent on generating sufficient taxable income prior to expiration of any net operating loss carry-forwards. We periodically review deferred tax assets for recoverability, and provide valuation allowances as necessary.

Stock-Based Compensation. In accordance with the Statements of Financial Accounting Standards Statement No. 123R, *Share-Based Payment*, (SFAS 123R) and the Security and Exchange Commission Staff Accounting Bulletin No. 107 (SAB 107), we began recognizing stock-based compensation expense in our consolidated statements of operations on January 1, 2006. We have elected to use the binomial model to determine the fair value of our issued options. Option pricing models require the input of subjective assumptions,

Table of Contents

including the expected life of the option, the price volatility of the underlying stock, expected interest rates and forfeitures. If actual results differ significantly from our assumptions, stock-based compensation could increase or decrease. For further discussion of our stock-based compensation, see *Note B-Summary of Significant Accounting Policies Stock-Based Compensation* and *Note J Stock Options* to the financial statements.

Recently Issued Accounting Standards

In September 2006, the Financial Accounting Standards Board (the FASB) issued SFAS No. 157 (SFAS 157), *Fair Value Measurements*. SFAS 157 defines fair value, establishes a framework for measuring fair value and requires enhanced disclosures about fair value measurements. SFAS 157 creates a fair value hierarchy, which prioritizes the inputs to be used in determining fair value. Companies are required to disclose relevant fair value information in their financial statements that allows users to assess inputs used to measure fair value, and the effect of those measurements on earnings for the periods presented. Companies are also required to separately reconcile the beginning and ending balances for each major category of assets and liabilities. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. We believe that the adoption of SFAS 157 will not have a material impact on our financial statements.

In April 2007, the FASB issued SFAS 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. SFAS 159 permits an entity to measure certain financial assets and financial liabilities at fair value where entities will report unrealized gains and losses in earnings at each subsequent reporting date. The standard allows entities to elect fair value application on an instrument-by-instrument basis with certain exceptions. The fair value option election is irrevocable in most cases. The new standard establishes presentation and disclosure requirements and assets and liabilities that are measured at fair value must be displayed on the face of the balance sheet. SFAS 159 is effective for fiscal years beginning after November 15, 2007. We believe that the adoption of SFAS 159 will not have a material impact on our financial statements.

Results of Operations

We operate on a 52-53 week fiscal year ending the Sunday nearest December 31st. The financial statements are reflected as of December 31, 2007, 2006, and 2005 for presentation purposes only. The actual end of each period was December 30, 2007, December 31, 2006, and January 1, 2006, respectively. There are 52 weeks in each the years presented.

The following table sets forth for the periods shown the percentage of revenues represented by certain items reflected in our statements of income:

	Years Ended December 31,		
	2007	2006	2005
Revenues	100.0%	100.0%	100.0%
Cost of revenues	78.5	76.2	74.7
Gross profit	21.5	23.8	25.3
Distribution expenses	6.8	6.7	6.8
Selling and administrative expenses	18.9	18.8	16.5
Income (loss) from operations	(4.2)	(1.7)	2.0
Interest expense	1.5	1.3	1.3
Other income	(0.4)		
Income (loss) before income taxes	(5.3)	(3.0)	0.7
Income tax expense (benefit)	(1.9)	(0.9)	0.3
Net income (loss)	(3.4)%	(2.1)%	0.4%

Table of Contents

Year ended December 31, 2007 compared to year ended December 31, 2006

Revenues

Revenues increased \$370,000, or 0.4%, to \$94.2 million for the year ended December 31, 2007, compared to \$93.8 million for the year ended December 31, 2006. The increase in revenues is primarily attributable to the growth of our ReadyCaseSM delivery system and on-site management of hospital and surgery center instrumentation supply chain and central sterilization services, partially offset by industry pricing trends and a decline in our sales to customers who predominantly purchase reusable textiles.

Gross Profit

Gross profit decreased \$2.0 million, or 9.2%, to \$20.2 million for the year ended December 31, 2007 compared to \$22.3 million for the prior year. As a percentage of revenues, gross profit decreased by 2.3% to 21.5% for the year ended December 31, 2007 compared to 23.8% for the prior year. The decrease in gross profit was primarily due to continued industry pricing trends, higher material costs for disposable products, depreciation expense from our owned instruments, higher shipping and instrument labor costs, and higher facility maintenance costs, partially offset by lower facility overhead costs.

Distribution Expenses

Distribution expenses increased \$67,000, or 1.1%, to \$6.4 million for the year ended December 31, 2007 as compared to \$6.3 million in the prior year primarily due to compensation and contract labor costs.

Selling and Administrative Expenses

Selling and administrative expenses increased \$201,000, or 1.1%, to \$17.8 million for the year ended December 31, 2007 compared to \$17.6 million in the prior year. The increase in selling and administrative expenses for 2007 is primarily attributable to an increase in the provision for doubtful accounts, severance expenses for our former President and CEO, information technology related consulting fees and Sarbanes-Oxley compliance and internal audit consulting fees, partially offset by lower compensation costs, lower consulting fees paid to the global consulting firm, lower advertising costs and lower annual sales meeting related expenses.

Interest Expense

For the year ended December 31, 2007, interest expense increased \$179,000, or 14.8%, to \$1.4 million compared to the prior year. The higher expense when compared to last year is due primarily to a higher average interest rate during the year.

Other Income

Other income was \$342,000 for the year ended December 31, 2007, as a result of rental income. Effective March 1, 2007, we entered into an agreement to lease to a third party a portion of our corporate headquarters under the terms of a non-cancelable operating lease.

Income Tax Expense (Benefit)

Our effective tax rate is a function of our income or loss before taxes and statutory tax rates in the various jurisdictions in which we operate. Income tax expense (benefit) is a function of our net income or loss and effective tax rate. The effective tax rate for the year ended December 31, 2007 was 35.6% compared to 30.5% for the year ended December 31, 2006. The primary reason for the higher effective tax rate for the year ended December 31, 2007, as compared to the same period last year is due to lower permanent tax differences created by the non-deductibility of the portion of the stock option expense associated with incentive stock options granted and the higher loss before income taxes, which reduces the effect of permanent differences on the effective rate.

Table of Contents

Net Income (loss) Per Common Share

We recorded a net loss per common share of \$0.50 on a diluted and basic per share basis for 2007 compared with a net loss per common share of \$0.31 in 2006.

Year ended December 31, 2006 compared to year ended December 31, 2005

Revenues

Revenues increased \$2.1 million, or 2.3%, to \$93.8 million for the year ended December 31, 2006, compared to \$91.7 million for the year ended December 31, 2005. The increase is primarily attributable to the growth of our ReadyCaseSM delivery system (combining instruments, reusable textiles, and disposable products), partially offset by declining sales of reusable surgical products to customers who predominantly purchase reusable textiles.

Gross Profit

Gross profit decreased \$883,000, or 3.8%, to \$22.3 million for the year ended December 31, 2006, compared to \$23.2 million for the prior year. As a percentage of revenues, gross profit decreased by 1.5% to 23.8% for the year ended December 31, 2006 compared to 25.3% for the prior year. The decrease in gross profit was primarily due to continued industry pricing trends, higher material costs for disposable products due to generally higher prices and to higher production labor cost, partially offset by lower amortization of reusable products.

Distribution Expenses

Distribution expenses increased \$66,000, or 1.1%, to \$6.3 million for the year ended December 31, 2006, as compared to the prior year primarily due to fuel and vehicle leasing costs.

Selling and Administrative Expenses

Selling and administrative expenses increased \$2.5 million, or 16.4%, to \$17.6 million for the year ended December 31, 2006 compared to \$15.1 million in the prior year. The increase in selling and administrative expenses for 2006 is primarily attributable to \$1.2 million higher consulting fees, \$1.1 million higher salary and commission expense, and \$572,000 of higher stock based compensation expense (SFAS 123(R)), partially offset by \$532,000 of lower depreciation expense.

Interest Expense

Interest expense was virtually unchanged at \$1.2 million for the year ended December 31, 2006, in spite of generally higher interest rates this year. The prior year expense included a write-off of unamortized fees associated with the former line of credit that was replaced in June 2005.

Income Tax Expense (Benefit)

Our effective tax rate is a function of our income or loss before taxes and statutory tax rates in the various jurisdictions in which we operate. Income tax expense (benefit) is a function of our net income or loss and effective tax rate. The effective tax rate for the year ended December 31, 2006 was 30.5% compared to 37.5% for the year ended December 31, 2005. The primary reason for the lower effective tax rate in the year ended December 31, 2006 as compared to the same period last year is due to reporting a taxable loss and to the permanent tax difference created by the non-deductibility of the portion of the stock option expense associated with incentive stock options granted. See Note 1 to our financial statements Income Tax.

Table of Contents

Net Income (loss) Per Common Share

We recorded a net loss per common share of \$0.31 on a diluted and basic per share basis for 2006 compared with a net income per common share of \$0.06 in 2005.

Liquidity and Capital Resources

Our principal sources of capital have been cash flows from operations and borrowings under our revolving credit facility. As of December 31, 2007, we had approximately \$656,000 in cash and cash equivalents, compared to approximately \$283,000 as of December 31, 2006. In addition, as of December 31, 2007, we had \$19.7 million available under our credit facility, which takes into consideration the amounts already outstanding under the credit facility and certain letters of credit principally associated with the bonds payable. Net cash provided by operating activities for 2007 was \$9.0 million as compared to \$7.8 million last year. Net cash from operations during 2007 is primarily attributable to depreciation and amortization expense of \$9.3 million, an increase in the provisions for doubtful accounts, slow moving inventory and reusable surgical products shrinkage of \$2.3 million, an increase in our accounts payable and accrued expenses of \$2.2 million and stock-based compensation expense of \$783,000, partially offset by the net loss of \$3.2 million, a decrease in our deferred tax liability of \$1.7 million, and higher accounts receivable of \$1.0 million.

Net cash used in investing activities in 2007 was \$7.6 million as compared to \$6.5 million in 2006. Cash used in investing activities this year primarily related to purchases of property, plant and equipment and reusable surgical products. We estimate that our expenditures in 2008 for property, plant and equipment will be approximately \$2.0 million and our expenditures in 2008 for reusable surgical products will be approximately \$6.0 million, an amount that may fluctuate depending on the growth of our business. We expect instrument revenues will continue to grow and, as a result, we expect our instrument inventory will continue to grow. We estimate that our expenditures in 2008 for instrument inventory will be approximately \$1.2 million.

Net cash used in financing activities in 2007 was \$1.1 million compared to \$1.6 million in 2006. Cash used in financing activities was primarily a result of the repayment on our notes payable, mortgage payable and bonds payable, partially offset by our borrowings on our notes payable and proceeds from the exercise of stock options.

We have reorganized and retrained our sales team. We plan to implement in 2008 a customer service and sales training function, and a technology platform to support our sales and customer service initiatives. As a result, we incurred additional costs in late 2007 of \$600,000 and we expect to incur additional costs on a continuing basis to implement our plan. We expect these changes will accelerate our growth and, in the longer run, improve our financial performance. Our costs are primarily related to compensation, training, travel and technology expenses.

We have a three-year, \$30 million revolving credit facility with two financial institutions which is secured by substantially all of our assets and has an interest rate that varies between 200 and 300 basis points over LIBOR (4.60% as of December 31, 2007) depending on the quarterly results under our consolidated leverage ratio covenant. The available credit under the facility is subject to limitation based upon our consolidated leverage ratio. The credit facility, as amended in June 2007, requires us to maintain (a) a quarterly consolidated leverage ratio of not more than 2.50 to 1.00; (b) a funds flow coverage ratio of not less than 2.00 to 1.00; and (c) a tangible net worth at the end of each fiscal quarter beginning June 30, 2005, of at least \$45 million plus 75% of cumulative net positive income generated after March 31, 2005. In addition, the interest and the unused fee will be the highest allowed under the facility (300 basis points over LIBOR and 0.35%, respectively) until the funds flow coverage ratio returns to not less than 2.25 to 1.00 for two consecutive quarters. The credit facility places restrictions on us, including without limitation: the paying of dividends, incurring additional indebtedness, making loans and investments, encumbering our assets, entering into a new business, and entering into certain merger, consolidation or liquidation transactions.

Table of Contents

We did not satisfy the minimum funds flow coverage ratio or the tangible net worth covenants required by the amended credit facility for the fourth quarter of 2007. The financial institutions waived the requirement to meet these covenants as of December 31, 2007. In addition, the financial institutions amended the credit facility to permit a funds flow coverage ratio of not less than 1.00 to 1.00 and a tangible net worth of \$43.5 million as of March 31, 2008. The amendment also reduced the amount of the credit facility to \$20.0 million. There can be no assurance that our lenders will issue a waiver or grant an amendment in a future period.

As of December 31, 2007, we had \$19.7 million total available to be borrowed under the facility, which takes into consideration the \$2.5 million outstanding under the credit facility and certain letters of credit principally associated with the Company's bonds payable.

The revolving credit facility expires in June 2008. We are negotiating with our lenders an extension of the current agreement or a new credit facility to commence prior to the expiration of the current credit facility.

We are also obligated under a mortgage from our primary lenders for approximately \$4.3 million, which we incurred to finance the purchase of our corporate headquarters in 2005. The mortgage has a term of five years and an amortization schedule based on 20 years, with a balloon payment of \$3.6 million in 2010. The mortgage bears an interest rate of 250 basis points over LIBOR.

We have outstanding public bonds that we issued to fund the construction of two of our reusable processing facilities. Interest expense on these bonds adjusts based on rates that approximate LIBOR (5.27% at December 31, 2007). Starting in 2004, we began amortizing the bonds through quarterly payments of \$165,000. Balloon principal payments of \$3.1 million are due on the bonds in 2014. The bonds are secured by the two reusable processing facilities and backed by letters of credit issued by a financial institution. The letters of credit must be renewed in January of each year through maturity in 2014. We believe we will be able to extend the current credit agreement or obtain another credit facility for another year after June 2008; however, there can be no assurance that the credit facility will be extended or whether we will be able to obtain another credit facility after June 2008.

On August 20, 2007, we entered into a short-term agreement to finance the annual premiums under certain of our insurance contracts. The amount outstanding under the agreement was \$466,000 at December 31, 2007. The agreement calls for equal monthly payments of principal and interest over a term of nine months, with the final payment due on May 1, 2008. The stated interest rate under the agreement is 5.63%.

Our contractual cash obligations for future minimum payments, including interest, under our notes payable to bank, bonds payable, mortgage and operating leases as of December 31, 2007, are as follows:

Contractual Obligations

Payments due by period (000 \$)	Total	Less than 1 year	2-3 years	4-5 years	More than 5 years
Notes payable, mortgage and bonds payable	\$ 13,839	\$ 3,391	\$ 5,368	\$ 1,320	\$ 3,760
Operating leases	9,228	2,728	3,963	2,135	402
Total contractual cash obligations	\$ 23,067	\$ 6,119	\$ 9,331	\$ 3,455	\$ 4,162

In addition, as part of our ReadyCaseSM delivery system, we offer instruments for use and reprocessing pursuant to our Joint Marketing Agreement with Aesculap. Under the terms of this agreement, Aesculap furnishes and repairs the surgical instruments that we deliver to customers and receives an agreed upon fee for each procedure. We also have a procurement agreement with Standard Textile under which we agree to purchase 90% of our reusable surgical products from them. We are not bound to purchase any minimum quantity of products under these agreements; however, we expect to make payments under the contracts to fulfill our requirements. Our payments under these agreements in 2007 were \$14.0 million. Amounts paid under these agreements will vary based upon changes in customer demand, amortization rates, product prices, and other variables affecting our business.

Table of Contents

We believe that our existing cash and cash equivalents together with expected cash provided by operations and the revolving credit facility will be adequate to finance our operations for at least the next 12 months. Although it is difficult for us to predict our future liquidity needs with certainty, our ability to continue accessing the credit facility and our lenders' willingness to extend or renew our credit facility after June 2008 is an essential requirement for our continued operations.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Our principal exposure to market risk is change in interest rates under our various debt instruments and borrowings. The outstanding balances under our revolving credit facility were approximately \$2.5 million for the year ended December 31, 2007 and 2006. The credit facility's interest rate varies between 200 and 300 basis points over LIBOR (4.60% as of December 31, 2007), depending on our leverage ratio (earnings coverage of debt). We are subject to changes in our interest expense on this facility based on fluctuations in interest rates. Assuming an outstanding balance of this facility of \$2.5 million, if LIBOR were to increase (decrease) by 100 basis points, our interest payments would increase (decrease) by \$6,250 per quarter.

The outstanding balance under our real estate mortgage was approximately \$4.3 million as of December 31, 2007. The mortgage bears an interest rate of 250 basis points over LIBOR. Assuming an outstanding balance of this facility of \$4.3 million, if LIBOR were to increase (decrease) by 100 basis points, our interest payments would increase (decrease) by \$10,700 per quarter.

Interest on our bonds that financed two of our facilities is at a rate that approximates LIBOR. We are subject to changes in our interest expense on these bonds based on fluctuations in interest rates. Assuming an outstanding balance of these bonds of \$7.1 million, if LIBOR were to increase (decrease) by 100 basis points, our interest payments would increase (decrease) by \$17,650 per quarter.

We do not have any other material market risk sensitive instruments.

Item 8. Financial Statements and Supplementary Data

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Shareholders of

SRI/Surgical Express, Inc.

We have audited the accompanying balance sheets of SRI/Surgical Express, Inc. (a Florida corporation) as of December 31, 2007 and 2006, and the related statements of operations, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2007. Our audits of the basic financial statements included the financial statement schedule listed in the index appearing under Item 15 (a)(2). These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of SRI/Surgical Express, Inc. as of December 31, 2007 and 2006, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2007 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly, in all respects, the information set forth therein.

As discussed in Note B to the financial statements, the Company adopted FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes - An Interpretation of FASB Statement No. 109 as of January 1, 2007.

Table of Contents

NOTES TO FINANCIAL STATEMENTS

NOTE A - DESCRIPTION OF ORGANIZATION AND BUSINESS

SRI/Surgical Express, Inc. (SRI or the Company) provides central processing and supply chain management services to hospitals and surgery centers across the United States. The Company offers a combination of high quality disposable and reusable surgical products (including gowns, towels, drapes, and basins and surgical instruments), and instrument processing services in a comprehensive case cart management system. At ten regional facilities, the Company collects, sorts, cleans, inspects, packages, and sterilizes its reusable surgical products and instruments, and delivers daily on a just-in-time basis. The Company also provides an outsource solution for the management of hospital instrumentation and central sterilization. The Company operates in one industry segment.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Financial Statement Presentation

The Company presents an unclassified balance sheet as a result of the extended amortization period (predominantly three to six years) of its reusable surgical products. The Company provides reusable surgical products to its customers on a per use basis similar to a rental arrangement.

The Company operates on a 52-53 week fiscal year ending the Sunday nearest December 31st. The financial statements reflect the Company's year-end as of December 31st for presentation purposes. There were 52 weeks included for the years ended December 31, 2007, 2006 and 2005.

Use of Estimates

Management is required to make estimates and assumptions during the preparation of financial statements and accompanying notes in conformity with accounting principles generally accepted in the United States of America. These estimates and assumptions affect the amounts reported in the financial statements and accompanying notes. Actual results could differ materially from those estimates and assumptions.

Cash and Cash Equivalents

The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents.

Accounts Receivable, Net

The Company has accounts receivable from hospitals and surgery centers. The Company does not believe that there is sufficient credit risks associated with those receivables to require a form of collateral from its customers. The allowance for doubtful accounts as of December 31, 2007 and 2006 was approximately \$865,000 and \$235,000, respectively. The allowance for doubtful accounts relates to accounts receivable not expected to be collected and is based on management's assessment of specific customer balances, the overall aging of the balances, and the financial stability of the customers. In the fourth quarter of 2007, the Company reserved \$565,000 based on an assessment of collectibility of outstanding amounts at December 31, 2007. In 2006, a customer declared bankruptcy owing the Company approximately \$239,000. The amount was reclassified from accounts receivable to note receivable in 2006 and was written-off in 2007. The Company does not customarily charge interest on accounts receivable.

Concentration of Credit Risk

For the year ended December 31, 2007, revenues relating to hospitals belonging to three group purchasing organizations (Novation, LLC, HealthTrust Purchasing Group, L.P., and MedAssets, Inc.) collectively accounted

Table of Contents

for approximately 63% of the Company's revenues. For the years ended December 31, 2006 and December 31, 2005, revenues relating to hospitals belonging to these group purchasing organizations collectively accounted for approximately 54% and 56%, respectively, of the Company's revenues. The Company had one customer, a healthcare provider, who accounted for approximately 11% of its revenue for the year ended December 31, 2007. No single hospital or surgery center customer accounted for more than 8.0% of the Company's revenues for the years ended December 31, 2006, or 2005.

Unbilled Receivable

Included in prepaid expenses and other assets are unbilled receivables related to certain instruments purchased on behalf of a vendor in the amount of \$676,000 and \$342,000 at December 31, 2007 and 2006, respectively.

Inventories, Net

Inventories consist of raw materials, principally consumables, supplies, and disposable surgical products; work in progress consisting of partially assembled reusable and disposable packs; and finished goods consisting of company-assembled packs of various combinations of raw materials and reusable surgical products, and disposable accessory packs purchased from third parties. Inventories are valued at the lower of cost or market, with cost being determined on the first-in, first-out method. As of December 31, 2007 and 2006, inventory consists of the following:

	December 31,	
	2007	2006
	(in 000 s)	
Raw materials	\$ 3,092	\$ 3,830
Work in progress	232	114
Finished goods	3,360	3,171
	6,684	7,115
Less: Inventory reserve	(525)	(400)
	\$ 6,159	\$ 6,715

Reusable Surgical Products, Net

The Company's reusable surgical products, consisting principally of linens (gowns, towels, and drapes), basins (stainless steel medicine cups, carafes, trays, basins) and owned surgical instruments, are stated at cost. Amortization of linens and basins is computed on a basis similar to the units of production method. Estimated useful lives for each product are based on the estimated total number of available uses for each product. The expected total available usage for our linen products using the three principal fabrics (accounting for approximately 82% of the reusable surgical products) is 75, 100, and 125 uses, based on several factors, including our actual historical experience with these products. The Company believes RFID technology will enable it to evaluate the useful lives of linen products more efficiently. Basins are amortized over their estimated useful life, which ranges from 25 to 200 uses. Owned surgical instruments were amortized straight line over a period of four years. Accumulated amortization as of December 31, 2007 and 2006 was approximately \$13.2 million and \$11.9 million respectively.

As of December 31, 2007 and 2006, the Company had reserves for shrinkage, obsolescence and scrap related to reusable surgical products of approximately \$1,211,000 and \$1,554,000, respectively.

Table of Contents

Property, Plant and Equipment, Net

Property, plant and equipment are stated at cost. Depreciation and amortization are computed by the straight-line method with a half-year convention over the estimated useful lives of the assets, or the term of the related leases for leasehold improvements, whichever is shorter.

Health Insurance

The Company offers employee benefit programs, including health insurance, to eligible employees. The Company retains a liability of up to \$85,000 annually for each health insurance claim. The policy has an annual aggregate liability limit of \$3.1 million. Health insurance costs are accrued using estimates to approximate the liability for reported claims and claims incurred but not reported.

Workers Compensation Insurance

In 2005, the Company converted its workers compensation insurance program to a large dollar deductible, self-funded plan. The Company retains a liability of \$250,000 for each claim occurrence. The policy has an annual aggregate liability limit of \$1.5 million. The Company has obtained letters of credit in the amount of \$1,127,000 with its primary lender to secure the payment of future claims. The Company accrues workers compensation insurance costs using estimates to approximate the liability for reported claims and claims incurred but not reported, as determined by an independent actuary. As of December 31, 2007 and 2006, the Company accrued a liability of approximately \$1,057,000 and \$701,000, respectively, for claims incurred and claims incurred but not reported. The Company reviews this reserve quarterly. If actual claims differ from the Company's estimates, the reserve would increase or decrease accordingly, which could adversely affect the Company's results of operations.

Revenue Recognition

Revenues are recognized as products and services are delivered, generally daily. Packing slips, signed and dated by the customer evidence delivery of product. The Company's contractual relationships with its customers are primarily evidenced by purchase orders or service agreements with terms varying from one to five years, which are generally cancelable by either party.

The Company owns substantially all of the reusable surgical products provided to customers except the surgical instruments. A third party provides most of the surgical instruments that are included in the Company's comprehensive surgical procedure-based delivery and retrieval service. The Company pays a fee to the third party for the use of the surgical instruments. In accordance with Emerging Issues Task Force (EITF) No. 99-19, *Reporting Revenue Gross as a Principal versus Net as an Agent*, the Company acts as a principal in this arrangement and has reported the revenue gross for the comprehensive surgical procedure-based delivery and retrieval service. The third party agent fee charged to the Company is included in cost of revenues in the statements of operations.

Advertising

Costs associated with advertising are charged to expense as incurred. During the fiscal years ended December 31, 2007, 2006 and 2005, advertising costs of approximately \$7,000, \$152,000, and, \$165,000 respectively, were charged to selling and administrative expenses in the Company's statements of operations.

Income Taxes

Income taxes have been provided using the liability method in accordance with Statements of Financial Accounting Standards (SFAS) 109, *Accounting for Income Taxes*. In accordance with SFAS 109, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the

Table of Contents

financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in the tax rate is recognized in operations in the period that includes the enactment date of the rate change. The tax benefits must be reduced by a valuation allowance in certain circumstances. The deferred tax assets are reviewed periodically for recoverability, and valuation allowances are provided for as necessary.

In July 2006, the Financial Accounting Standards Board (the FASB) issued Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109*, which clarifies the accounting for and disclosure of uncertainty in tax positions. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition associated with tax positions. The provisions of FIN 48 were effective January 1, 2007. The Company completed an assessment of FIN 48 and determined that FIN 48 did not have a material impact on its financial statements.

On May 2, 2007, the FASB issued FASB Staff Position No. FIN 48-1, *Definition of Settlement in FASB Interpretation No. 48* (FIN 48-1), to provide guidance about how an enterprise should determine whether a tax position is effectively settled for the purpose of recognizing previously unrecognized tax benefits. Under FIN 48-1, a tax position is considered effectively settled if the taxing authority completed its examination, the company does not plan to appeal, and it is remote that the taxing authority would reexamine the tax position in the future.

Fair Value of Financial Instruments

The carrying amounts of cash and cash equivalents, accounts payable, accrued expenses and accounts receivables approximate fair value because of their short-term nature. The fair value of notes payable to bank, bonds payable and mortgage payable approximate the carrying amount as the interest rates are based on market interest rates.

Earnings (loss) Per Share

Basic earnings (loss) per share is calculated by dividing net income (loss) available for common shareholders by the weighted average number of common shares outstanding during the period. Diluted earnings (loss) per share is calculated by dividing net income (loss) by the weighted average number of common and potential common shares outstanding during the period. The number of potential common shares takes into account the dilutive effect of outstanding options, calculated using the treasury stock method.

Employee Termination Costs

The Company incurred an expense of \$442,000, \$241,000 and \$122,000 in 2007, 2006, and 2005 respectively, for expenses related to the termination of executive officers and various employees. The Company had \$52,000 and \$0 of employee termination expense accrued as of December 31, 2007 and 2006, respectively.

Stock-based Compensation

Effective January 1, 2006, the Company adopted the provisions of Statement of Financial Accounting Standard No. 123R, *Share-Based Payments*, (SFAS 123R) for its stock-based compensation plans. The Company previously accounted for these plans under the recognition and measurement principles of Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees*, (APB 25) and related

Table of Contents

interpretations and disclosure requirements established by Statement of Financial Accounting Standard No. 123, *Accounting for Stock-Based Compensation*, (SFAS 123), as amended by Statement of Financial Accounting Standards No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure*.

Under APB 25, no compensation expense was recorded in earnings for the Company's stock options granted under the Company's stock option plans. The pro forma effects on net income and earnings per share for stock options granted were instead disclosed in a footnote to the financial statements. Under SFAS 123R, all stock-based compensation cost is measured at the grant date, based on the fair value of the award, and is recognized as an expense over the requisite service period.

The Company adopted SFAS 123R using the modified prospective method. Under this transition method, compensation cost to be recognized in fiscal year 2006 and later periods includes the cost for all share-based awards granted prior to, but not yet vested as of January 1, 2006. This cost was based on the grant-date fair value estimated in accordance with the original provisions of SFAS 123. The cost for all stock-based awards granted subsequent to December 31, 2005, represents the grant-date fair value that was estimated in accordance with the provisions of SFAS 123R, utilizing the binomial (Lattice) model. Results for prior periods have not been restated. Stock-based compensation expense was \$783,000 and \$572,000, or \$579,000 and \$476,000 net of income tax, which contributed to a \$0.09 and \$0.08 reduction in basic and diluted earnings per share for the years ended December 31, 2007 and 2006, respectively.

If the Company had elected to recognize compensation expense based upon the fair value at the grant date for awards under these plans consistent with the methodology prescribed by SFAS 123, the Company's net income (loss) and earnings (loss) per share for the year ended December 31, 2005 would be reduced to the pro forma amounts indicated below (in 000's except per share data):

Reported net income	\$ 393
Pro forma net loss for calculation of earnings per share	(519)
	\$ (126)
Earnings per share:	
Reported earnings per share - basic	\$ 0.06
<i>Pro forma loss per share - basic</i>	\$ (0.02)
Reported earnings per share - diluted	\$ 0.06
<i>Pro forma loss per share - diluted</i>	\$ (0.02)

There was \$318,000, \$16,000 and \$338,000 of cash received from stock option exercises under all stock-based payment arrangements for the years ended December 31, 2007, 2006 and 2005, respectively. There were no capitalized stock-based compensation costs at December 31, 2007.

Comprehensive Income

The Company accounts for all components of comprehensive income under the provisions of Statement of Financial Accounting Standards No. 130, *Reporting Comprehensive Income* (SFAS 130), which requires that total comprehensive income and comprehensive earnings per share be disclosed with prominence equal to that of net income and earnings per share. Comprehensive income is defined as changes in stockholders equity exclusive of transactions with owners such as capital contributions and dividends and specifically excluded items such as deferred compensation. The Company did not have any items of other comprehensive income on which to report in any of the years presented.

Table of Contents*Recently Issued Accounting Standards*

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157 (SFAS 157), *Fair Value Measurements*. SFAS 157 defines fair value, establishes a framework for measuring fair value and requires enhanced disclosures about fair value measurements. SFAS 157 creates a fair value hierarchy, which prioritizes the inputs to be used in determining fair value. Companies are required to disclose relevant fair value information in their financial statements that allows users to assess inputs used to measure fair value, and the effect of those measurements on earnings for the periods presented. Companies are also required to separately reconcile the beginning and ending balances for each major category of assets and liabilities. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Company believes that the adoption of SFAS 157 will not have a material impact on its financial statements.

In April 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. SFAS 159 permits an entity to measure certain financial assets and financial liabilities at fair value where entities will report unrealized gains and losses in earnings at each subsequent reporting date. The standard allows entities to elect fair value application on an instrument-by-instrument basis with certain exceptions. The fair value option election is irrevocable in most cases. The new standard establishes presentation and disclosure requirements and assets and liabilities that are measured at fair value must be displayed on the face of the balance sheet. SFAS 159 is effective for fiscal years beginning after November 15, 2007. The Company believes that the adoption of SFAS 159 will not have a material impact on its financial statements.

NOTE C - PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment consist of the following:

	Useful Lives In Years	December 31, 2007 2006 (in 000 s)	
Land		\$ 1,582	\$ 1,582
Land improvements	15	646	
Construction in process		750	918
Buildings and improvements	20-40	16,016	14,939
Leasehold improvements	2-18	7,931	9,210
Machinery and equipment	3-12	24,827	24,261
Office furniture, equipment and computers	3-10	8,056	7,431
		59,808	58,341
Less: Accumulated depreciation and amortization		(28,531)	(25,970)
		\$ 31,277	\$ 32,371

For the years ended December 31, 2007, 2006 and 2005, depreciation and amortization expense was approximately \$3.4 million, \$3.5 million, and \$4.0 million, respectively.

NOTE D - NOTES PAYABLE

On June 20, 2005, the Company entered into a three-year \$30 million revolving credit facility with two financial institutions. The credit facility is secured by substantially all of the Company's assets and has an interest rate that varies between 200 and 300 basis points over LIBOR (4.60% as of December 31, 2007) depending on the quarterly results under the Company's consolidated leverage ratio covenant. The available credit under the facility is subject to limitation based upon the consolidated leverage ratio of the Company. The credit facility, as amended in June 2007, requires the Company to maintain (a) a quarterly consolidated leverage ratio of not more than 2.50 to 1.00; (b) a funds flow coverage ratio of not less than 2.00 to 1.00; and (c) a tangible

Table of Contents

net worth at the end of each fiscal quarter beginning June 30, 2005, of at least \$45 million plus 75% of cumulative net positive income generated after March 31, 2005. In addition, the interest and the unused fee will be the highest allowed under the facility (300 basis points over LIBOR and 0.35%, respectively) until the funds flow coverage ratio returns to not less than 2.25 to 1.00 for two consecutive quarters. The credit facility places restrictions on the Company, including without limitation: the paying of dividends, incurring additional indebtedness, making loans and investments, encumbering its assets, entering into a new business, and entering into certain merger, consolidation or liquidation transactions.

The Company did not satisfy the minimum funds flow coverage ratio or the tangible net worth covenants required by the amended credit facility for the fourth quarter of 2007. The financial institutions waived the requirement of the Company to meet these covenants as of December 31, 2007. In addition, the financial institutions amended the credit facility to permit a funds flow coverage ratio of not less than 1.00 to 1.00 and a tangible net worth of \$43.5 million as of March 31, 2008. The amendment also reduced the amount of the credit facility to \$20.0 million. There can be no assurance that the Company's lenders will issue a waiver or grant an amendment in a future period.

As of December 31, 2007, the Company had \$19.7 million total available to be borrowed under the facility, which takes into consideration the amounts already outstanding under the credit facility and certain letters of credit principally associated with the Company's bonds payable.

The credit facility allows the Company to repurchase its common stock through open market purchases at prevailing market prices. During 2007, 2006 and 2005, the Company did not repurchase any shares of its common stock.

The revolving credit facility expires in June 2008. The Company is currently negotiating with its lenders to extend the current credit facility or to enter into a new credit facility.

On August 20, 2007, the Company entered into a short-term agreement to finance the annual premiums under certain of our insurance contracts. The amount outstanding under the agreement was \$466,000 at December 31, 2007. The agreement calls for equal monthly payments of principal and interest over a term of nine months, with the final payment due on May 1, 2008. The stated interest rate under the agreement is 5.63%.

For the years ended December 31, 2007, 2006, and 2005, interest expense was approximately \$1.4 million, \$1.2 million, and \$1.2 million, respectively. Interest expense in 2005 included approximately \$370,000 of interest related to a capital lease. Interest expense in 2007 and 2006 included approximately \$356,000 and \$354,000, respectively, of interest related to a mortgage, see Note E Mortgage Payable. Interest expense in 2007 and 2006 included approximately \$410,000 and \$426,000, respectively, of interest related to our bonds, see Note F Bonds Payable.

NOTE E MORTGAGE PAYABLE

The Company purchased its corporate headquarters in Tampa, Florida on December 13, 2005 for \$5.3 million and closing costs of approximately \$109,000. The purchase was financed by a mortgage of \$4.8 million and the balance was drawn from the Company's credit facility. The mortgage has a term of five (5) years and an amortization schedule based on 20 years, with a balloon payment of \$3.6 million at its termination in 2010. The mortgage bears an interest rate of 250 basis points over LIBOR (LIBOR at December 31, 2007 was 4.75%).

Mortgage payments as of December 31, 2007 for the next three years are as follows (in 000's):

2008	\$ 238
2009	238
2010	3,810
Total	\$ 4,286

Table of Contents**NOTE F BONDS PAYABLE**

In 1999, the Company issued public bonds to fund the construction of two of its reusable processing facilities. Interest expense adjusts based on rates that approximate LIBOR (5.27% at December 31, 2007). Starting in 2004, the Company began amortizing the bonds through quarterly payments of \$165,000. A balloon principal payment of \$3.1 million on the bonds is due in 2014. The bonds payable are secured by the two reusable processing facilities.

Letters of credit issued by our lenders for amounts totaling \$7.1 million back these bonds. The Company paid a commitment fee of approximately \$111,000 (125 basis points) for the letters of credit in 2007. The letters of credit must be renewed each year through the bonds maturity in 2014.

Bond payments as of December 31, 2007 for the next five years are as follows (in 000 s):

Years ending December 31	
2008	\$ 660
2009	660
2010	660
2011	660
2012	660
Thereafter	3,760
Total	\$ 7,060

NOTE G - COMMITMENTS AND CONTINGENCIES*Operating Leases*

The Company leases facilities, office equipment, and distribution vehicles under non-cancelable operating leases with terms ranging from one to fifteen years. The processing facility leases contain various renewal options and escalating payments. The Company intends to exercise certain aspects of these renewal options when the initial terms expire. The vehicle leases contain contingent rentals based on mileage.

Future minimum lease payments as of December 31, 2007 are as follows (in 000 s):

Years ending December 31	
2008	\$ 2,728
2009	2,226
2010	1,737
2011	1,460
2012	675
Thereafter	402
Total	\$ 9,228

Rental expense for the years ended December 31, 2007, 2006 and 2005 totaled approximately \$3.9 million, \$4.1 million, and \$4.1 million (including contingent rentals of approximately \$275,000, \$277,000, and \$273,000), respectively.

Table of Contents*Contractual Obligations*

The Company offers instruments pursuant to a Joint Marketing Agreement with Aesculap, Inc. (Aesculap). Under the terms of this agreement, Aesculap furnishes and repairs all of the surgical instruments that are delivered to customers and receives an agreed upon fee for each procedure. The Company also has a procurement agreement with Standard Textile Co., Inc. (Standard Textile) under which the Company agrees to purchase 90% of its reusable surgical linens from Standard Textile through August 2008.

The Company's management believes that Aesculap and Standard Textile's prices are and will be comparable to prices available from other vendors. Standard Textile is a shareholder of the Company. If Aesculap or Standard Textile were unable to perform under these procurement agreements, the Company would need to obtain alternate sources for its reusable surgical products. The Company is not bound to purchase any minimum quantity of products under these agreements, however, the Company expects to make payments under them to fulfill its requirements. The Company estimates that its payments under these agreements will be between \$18.0 and \$20.0 million in 2008. Amounts in subsequent years will be comparable, adjusted by changes in the Company's customer demand, amortization rates, product prices, and other variables affecting its business. During the years ended December 31, 2007, 2006, and 2005, the Company purchased products in the amounts of \$3.0 million, \$2.8 million, and \$6.0 million, respectively, from Standard Textile. During the years ended December 31, 2007, 2006, and 2005, the Company incurred fees of \$11.0 million, \$10.0 million, and \$8.2 million, respectively, to Aesculap for instrument usage.

Management Employment Agreements

The Company has an employment agreement with its Chief Executive Officer and Chief Financial Officer that provides for payment of twelve months and nine months base salary, respectively and a pro-rated bonus as severance, if involuntarily terminated by the Company after six months of employment. We incurred a charge of approximately \$370,000 in 2007 in connection with the termination agreement between the Company and the former Chief Executive Officer. On January 31, 2008, our new Chief Executive Officer joined the Company. The officers are prohibited from competing with the Company during the two-year period following termination of their employment.

Legal Proceedings

From time to time, the Company is involved in claims, that arise in the ordinary course of business. The Company does not believe these proceedings, individually or in the aggregate, will have a material adverse effect on its financial position, results of operations, or cash flows.

NOTE H - INCOME TAX

The provisions (benefit) for income taxes from continuing operations for the three years ended December 31 were as follows (in 000's):

	2007	2006	2005
Current	\$ (115)	\$ (294)	\$ 443
Deferred	(1,650)	(563)	(206)
Total	\$ (1,765)	\$ (857)	\$ 237

Table of Contents

The reconciliation of the federal statutory income tax rate of 34.0% to the effective income tax rate for the three years ended December 31 was as follows:

	2007	2006	2005
Federal statutory income tax rate	34.0%	34.0%	34.0%
State income taxes, net of federal	3.8	2.7	4.3
Non-deductible items	(2.1)	(5.3)	2.0
Benefit of state tax credits		(1.7)	(22.9)
Valuation allowance	0.5	(0.1)	11.2
Expired state loss carryforwards	(0.1)		8.0
Rate change			8.0
Other	(0.5)	0.9	0.9
	35.6%	30.5%	37.5%

Significant components of the Company's deferred tax assets and liabilities were as follows (in 000's):

	December 31,	
	2007	2006
Deferred tax assets:		
Inventory	\$ 660	\$ 743
Accounts receivable	329	90
Accrued expenses	1,026	596
State tax credits	689	688
Federal and state net operating losses	1,024	100
Goodwill	67	78
Stock options	226	48
Other	47	72
	4,068	2,415
Valuation allowance	(544)	(570)
	3,524	1,845
Deferred tax liabilities:		
Property, plant & equipment	(3,322)	(3,446)
Other	(257)	(105)
	(3,579)	(3,551)
Net deferred income tax liability	\$ (55)	\$ (1,706)

At December 31, 2007, the Company has a net state tax credit carry-forward of approximately \$145,000 (\$689,000 less valuation allowance of \$544,000). Approximately \$30,000 of the state tax credit carry-forward has a 15-year carry-forward limitation, which begins to expire in 2012. The remaining state tax credit carry-forward amounts have no expiration period.

SFAS 109 requires a valuation allowance to reduce reported deferred tax assets if, based on the weight of the evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized. After consideration of all the evidence, an allowance of \$544,000 has been established to reduce the deferred tax assets to the amount that will more likely than not be realized. During 2005, the reserve increased \$71,000 to \$860,000 to reserve all new and remaining state tax credit carry-forward for the portion that would not be realized. During 2006, the reserve decreased \$290,000 to \$570,000 principally due to the reduction in the corresponding state tax credit. The decrease in the reserve during 2006

Edgar Filing: SRI SURGICAL EXPRESS INC - Form 10-K

resulted from a change in the estimated effective state tax rate. During 2007, the reserve decreased \$26,000 principally due to the life of the state tax credits they relate to and the amount that will more likely than not be realized.

Table of Contents

As of December 31, 2007, the Company has federal net operating loss carryforwards of \$2.3 million that will expire in the year 2027, as well as state net operating loss carryforwards of \$4.9 million that expire between 2008 and 2027.

NOTE I - SHAREHOLDERS EQUITY

Common Stock

Subject to preferences which might be applicable to the Company's outstanding preferred stock, the holders of common stock are entitled to receive dividends when, as, and if declared from time to time by the Board of Directors out of funds legally available. The Company's revolving credit facility restricts the Company from paying dividends. In the event of liquidation, dissolution, or winding-up of the Company, holders of the common stock are entitled to share ratably in all assets remaining after payment of liabilities, subject to prior distribution rights of any preferred stock then outstanding. The common stock has no preemptive or conversion rights and is not subject to call or assessment by the Company. There are no redemption or sinking fund provisions applicable to the common stock.

Preferred Stock

The Company is authorized to issue 5,000,000 shares of preferred stock, \$.001 par value per share. The Board of Directors has the authority, without any further vote or action by the Company's shareholders, to issue preferred stock in one or more series and to fix the number of shares, designations, relative rights (including voting rights), preferences, and limitations of those series to the full extent now or hereafter permitted by Florida law. The Company does not have any outstanding shares of preferred stock at December 31, 2007 or 2006.

NOTE J - STOCK OPTIONS

The Company maintains four stock option plans: the 1995 Stock Option Plan, the 1996 Non-Employee Director Plan, the 1998 Stock Option Plan, and the 2004 Stock Compensation Plan.

The 1995 Stock Option Plan

The 1995 Stock Option Plan was designed to provide employees with incentive or non-qualified options to purchase up to 700,000 shares of common stock. The options vest ratably over four to five years from the date of grant. All outstanding options vest upon a change in control of the Company. Options granted under this Plan expire no later than ten years after the date granted or sooner in the event of death, disability, retirement or termination of employment. As of December 31, 2007 and 2006, options to purchase 117,700 and 152,600 shares, respectively, were outstanding. The 1995 Stock Option Plan terminated on December 21, 2005, although that termination does not adversely affect any options outstanding under the Plan.

The 1996 Non-Employee Director Plan

As amended on May 16, 2001, the Non-Employee Plan is designed to provide for the grant of non-qualified stock options to purchase up to 200,000 shares of common stock to members of the Board of Directors who are not employees of the Company. At the completion of its initial public offering, each non-employee director was granted options to purchase 4,000 shares of common stock for each full remaining year of the director's term. Thereafter, on the date on which a new non-employee director is first elected or appointed, he or she is automatically granted options to purchase 4,000 shares of common stock for each year of his or her initial term, and will be granted options to purchase 4,000 shares of common stock for each year of any subsequent term to which he or she is elected. As of March 2006, the equity component of the director compensation plan was restructured, so that each non-employee director will receive an annual grant of options to purchase 7,500 shares of common stock as of the date of the Annual Shareholder Meeting. All options vest ratably over a three-year term and have an exercise price equal to the fair market value of the common stock on the date of grant. As of December 31, 2007 and 2006, options to purchase 120,000 shares were outstanding. The 1996 Non-Employee Director Plan terminated on July 14, 2006, although that termination does not adversely affect any options outstanding under the Plan.

Table of Contents

The 1998 Stock Option Plan

As amended on May 16, 2001, the 1998 Stock Option Plan is designed to provide employees with incentive or non-qualified options to purchase up to 600,000 shares of common stock. The options vest ratably over four to five years from the date of the grant. All outstanding options vest upon a change in control of the Company. Options granted under this Plan expire no later than ten years after the date granted or sooner in the event of death, disability, retirement, or termination of employment. As of December 31, 2007 and 2006, options to purchase 371,900 and 302,500 shares, respectively, were outstanding, and 146,727 and 278,084 options, respectively, were available to be granted under this Plan.

The 2004 Stock Compensation Plan

The 2004 Stock Compensation Plan is designed to further the interests of the Company and its shareholders by providing incentives in the form of incentive or non-qualified stock options or restricted stock grants of up to 500,000 shares to key employees and non-employee directors who contribute materially to the success and profitability of the Company. Under this Plan, restricted stock grants are not considered outstanding options upon grant but are considered issued and outstanding stock. When restricted stock awards are forfeited they are considered as available for grant. The equity awards typically vest ratably over five years from the date of the grant. All outstanding grants vest upon a change in control of the Company. Options granted under this Plan expire no later than ten years after the date granted or sooner in the event of death, disability, retirement, or termination of employment. At the Company's annual meeting of shareholders on May 24, 2007, the shareholders approved an amendment to the 2004 Stock Compensation Plan to authorize an additional 500,000 shares under the Plan. As of December 31, 2007 and 2006, options to purchase 274,000 and 244,000 shares respectively, were outstanding, and 655,200 and 135,200 options, respectively, were available to be granted as options or restricted stock under this Plan.

Summary Stock Option Information

The fair value of each option grant is estimated on the date of grant using a Binomial options-pricing model. The Company's stock-based compensation expense model uses graded vesting, with shares being earned per day under the accrual method. In addition, the Company estimates forfeitures on the date of grant. The following weighted-average assumptions were used for grants in the years ended December 31, 2007, 2006 and 2005, respectively; no dividend yield for all years; expected volatility of 63%, 62% and 62%; risk-free interest rates of approximately 3.8%, 4.7%, and 4.3%; and expected lives of 6.5, 7.6, and 5.4 years. The weighted average fair value of options granted during the years ended December 31, 2007, 2006 and 2005 were \$3.01, \$3.01, and \$3.02, respectively.

Table of Contents

A summary of the status of the Company's stock option plans as of December 31, 2007, 2006 and 2005 and changes during the years ended on those dates is presented below:

	Options	Weighted Average Exercise Price
Outstanding as of January 1, 2005	1,042,200	\$ 9.70
Granted	274,000	5.15
Exercised	(73,697)	4.58
Forfeited	(275,903)	9.36
Outstanding as of December 31, 2005	966,600	\$ 8.91
Granted	110,000	4.45
Exercised	(2,800)	5.60
Forfeited	(254,700)	9.26
Outstanding as of December 31, 2006	819,100	\$ 8.21
Granted	298,000	4.77
Exercised	(61,957)	5.15
Forfeited	(171,543)	7.87
Outstanding as of December 31, 2007	883,600	\$ 7.33

The following table summarizes information concerning outstanding and exercisable stock options as of December 31, 2007:

Range of Exercise Prices	Number Outstanding	Weighted Average Remaining Contractual Life (years)	Weighted Average Exercise Price
All Outstanding Options			
\$ 3.80 \$ 5.85	651,800	7.9	\$ 4.92
5.86 9.50	57,300	6.0	6.68
9.51 17.50	111,500	2.8	14.03
17.51 25.00	51,000	1.2	18.41
25.01 32.00	12,000	3.4	31.78
	 883,600		 \$ 7.33
Exercisable Options			
\$ 3.80 \$ 5.85	178,866		\$ 5.21
5.86 9.50	52,320		6.68
9.51 17.50	111,500		14.03
17.51 25.00	51,000		18.41
25.01 32.00	12,000		31.78
	 405,686		 \$ 10.27

Edgar Filing: SRI SURGICAL EXPRESS INC - Form 10-K

As of December 31, 2006 and December 31, 2005, there were 450,580 and 511,439 exercisable options outstanding at weighted average exercise prices of \$10.70 and \$11.72, respectively.

Table of Contents

The following table summarizes option grant activity from January 1, 2007 through December 31, 2007:

	Shares Available for Grant	Options Outstanding	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life
Balance at January 1, 2007	413,284	819,100	\$ 8.21	5.90
Options authorized	500,000			
Options expired	45,043	(79,943)	\$ 10.89	
Options granted	(298,000)	298,000	\$ 4.77	
Options and restricted stock cancelled	141,600	(91,600)	\$ 5.24	
Restricted stock awards				
Options exercised		(61,957)	\$ 5.15	
Balance at December 31, 2007	801,927	883,600	\$ 7.33	6.69
Options exercisable at December 31, 2007		405,686	\$ 10.27	4.33

The weighted-average grant date fair value of options granted during the years ended December 31, 2007 and 2006 was \$3.01 for both years. The total intrinsic value of options exercised in the years ended December 31, 2007 and 2006 was \$13,600 and \$10,000, respectively. As of December 31, 2007, there was \$834,000 of unrecognized compensation cost related to non-vested options that is expected to be recognized over a weighted average period of 1.24 years. The total fair value of options vested during the years ended December 31, 2007 and 2006 was \$783,000 and \$572,000, respectively. The total fair value of options vested during the year ended December 31, 2007 that were issued prior to adoption of SFAS 123R was \$213,000. The aggregate intrinsic value of options fully vested at December 31, 2007 was approximately \$3,000. The aggregate intrinsic value of options outstanding at December 31, 2007 and expected to vest was \$19,000.

The Company consistently used the binomial model for estimating the fair value of options granted in the years ended December 31, 2007 and 2006. The Company used historical data to estimate the option exercise and employee departure behavior used in the binomial valuation model. Forfeitures are estimated on the date of grant and shares vest on a graded schedule, with shares being earned per day under the accrual method. The expected term of options granted is derived from the output of the option pricing model and represents the period of time that options granted are expected to be outstanding. The risk-free rates for periods within the contractual term of the options are based on the U.S. Treasury stripped coupon interest in effect at the end of the quarter. Because the binomial valuation model accommodates multiple input values, the risk free interest rates and expected term rates used in calculating the fair value of the options, are expressed in ranges.

Following are the weighted-average and range assumptions, where applicable, used for each respective period:

	Twelve Months Ended	
	December 31, 2007	December 31, 2006
	(Binomial)	
Expected dividend yield	0.0%	0.0%
Risk-free interest rate	3.03 to 5.12%	4.46 to 5.19%
Weighted-average expected volatility	62.5%	61.5%
Expected term	1.8 to 9.4 years	3.1 to 8.9 years
Forfeiture rate	0.18 to 41.76%	0.29 to 17.51%
Respective service period	3 to 5 years	3 to 5 years

Table of Contents*Restricted Stock Awards*

In fiscal year 2006, the Company granted unvested common stock awards (restricted stock) to certain key employees pursuant to the 2004 Stock Compensation Plan. The shares vest ratably over five years. The restricted stock awards granted in 2006 were accounted for using the measurement and recognition principles of SFAS 123R. Compensation for restricted stock awards is measured at fair value on the date of grant based on the number of shares expected to vest and the quoted market price of the Company's common stock. Compensation cost for all awards will be recognized in earnings, net of estimated forfeitures, on a straight-line basis over the requisite service period.

The Company recorded \$76,000 and \$126,000 in compensation expense related to the restricted stock that vested during the years ended December 31, 2007 and 2006, respectively. As of December 31, 2007, there was \$223,000 of total unrecognized compensation cost related to restricted stock awards granted under the Plan. That cost is expected to be recognized over a period of 3.0 years.

NOTE K - EARNINGS (LOSS) PER SHARE

The following table sets forth the computation of basic and diluted earnings (loss) per share:

	Years ended December 31,		
	2007	2006	2005
	(in 000's except per share data)		
Basic			
Numerator:			
Earnings (loss) available for common shareholders	\$ (3,193)	\$ (1,953)	\$ 393
Denominator:			
Weighted average shares outstanding	6,399	6,338	6,277
Earnings (loss) per common share - basic	\$ (0.50)	\$ (0.31)	\$ 0.06
Diluted			
Numerator:			
Earnings (loss)	\$ (3,193)	\$ (1,953)	\$ 393
Denominator:			
Weighted average shares outstanding	6,399	6,338	6,277
Effect of dilutive securities:			
Employee stock options			34
Weighted average shares outstanding - Diluted	6,399	6,338	6,311
Earnings (loss) per common share - diluted	\$ (0.50)	\$ (0.31)	\$ 0.06

Options to purchase 820,675, 359,100 and 566,600 shares of common stock for the years ended December 31, 2007, 2006 and 2005, respectively, were not included in the computation of diluted earnings per common share, because the assumed proceeds per share were greater than the average market price, and therefore, were antidilutive. The dilutive effect of 44,185 and 460,000 options with assumed proceeds per share less than the average market price, were not included for the years ended December 31, 2007 and 2006, respectively, because the effect would be anti-dilutive due to the Company's net loss for the period.

Table of Contents**NOTE L - LEASE AGREEMENT**

Effective March 1, 2007, the Company entered into an agreement to lease to a third party a portion of its corporate headquarters under the terms of a non-cancelable operating lease. The lease calls for an initial term of five (5) years with a tenant option to renew for one extension period of five years. The lease agreement provides for escalating rental payments over its term. Under the agreement, the tenant pays an allocated share of the increase over the base year of certain costs, including utilities, maintenance costs and property taxes.

Future minimum lease payments expected to be received as of December 31, 2007 are as follows (in 000 s):

Year ending December 31	
2008	\$ 354
2009	364
2010	375
2011	387
2012	97
	\$ 1,577

Rental income, which is included in other income in the statements of operations, was approximately \$305,000 for the year ended December 31, 2007.

NOTE M - SRI 401(k) PLAN

The Company sponsors the SRI/Surgical Express, Inc. 401(k) Plan (the Plan), a defined contribution plan established under Section 401(k) of the U.S. Internal Revenue Code. Employees are eligible to contribute voluntarily to the Plan after six months of continued service, satisfying 1,000 hours of service and attaining age 21. In addition to the employees' contributions, at its discretion, the Company may contribute 50% of the first 4% of the employee's contribution. The Plan allows for employee elective contributions up to an amount equivalent to 15% of salary. Employees are always vested in their contributed balance and vest ratably in the Company's contribution over three years. For the years ended December 31, 2007, 2006, and 2005, the Company's expense related to the Plan was approximately \$228,000, \$220,000, and \$238,000, respectively.

NOTE N - RELATED PARTY TRANSACTIONS

The Company has a procurement agreement with Standard Textile under which the Company agrees to purchase 90% of its reusable surgical products from Standard Textile through 2008. Standard Textile is a shareholder of the Company. During the years ended December 31, 2007, 2006, and 2005, the Company purchased products in the amounts of \$3.0 million, \$3.3 million, and \$6.0 million, respectively, from Standard Textile.

During the years ended December 31, 2007, 2006 and 2005, the Company paid approximately \$13,500, \$18,300, and \$10,500, respectively, to a company to design and supply the components for water reclamation systems for Company facilities. A shareholder of the Company owns the business providing these services.

During the years ended December 31, 2007 and 2006, the Company paid approximately \$243,000 and \$172,000, respectively, in consulting fees to a director and shareholder of the Company for assistance with managing the facilities operations while the Company searches for a new operations leader.

Table of Contents**NOTE O SELECTED QUARTERLY FINANCIAL DATA**

The following selected unaudited quarterly information is being disclosed in accordance with Regulation S-K (Item 302):

	Mar. 31, 2007	Quarters Ended		Dec. 31, 2007
		Jun. 30, 2007	Sep. 30, 2007	
		(In thousands, except per share data)		
Revenues	\$ 23,377	\$ 23,717	\$ 23,151	\$ 23,956
Gross profit	\$ 5,369	\$ 5,600	\$ 4,545	\$ 4,740
Net loss	\$ (589)	\$ (342)	\$ (645)	\$ (1,617)
Basic loss per share	\$ (0.09)	\$ (0.05)	\$ (0.10)	\$ (0.26)

(1) Includes allowance for a note receivable at December 31, 2006 totaling \$239,000.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A(T). Controls and Procedures**Evaluation of Disclosure Controls and Procedures**

In accordance with Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended, we carried out an evaluation, under the supervision and with the participation of our management, including our chief executive officer and principal financial officer (our Executives), of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Annual Report. Based on this evaluation, our Executives concluded that our disclosure controls and procedures were effective as of December 31, 2007 to ensure that information we are required to disclose in the reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and (ii) accumulated and communicated to our management, including the Executives, as appropriate, to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f)). Our internal control over financial reporting process was designed to provide reasonable assurance to our management and our Board of Directors regarding the reliability of financial reporting and the preparation of our financial statements in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree or compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2007, based upon the criteria set forth by the Committee of Sponsoring Organizations of the

Table of Contents

Treadway Commission (COSO) in *Internal Control Integrated Framework*. Based on this assessment under the framework in *Internal Control Integrated Framework* issued by COSO, our management concluded that our internal control over financial reporting was effective as of December 31, 2007.

This Annual Report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this Annual Report.

Item 9B. Other Information

On March 21, 2008, we entered into a Fifth Amendment (the Amendment) to the Second Amended and Restated Credit and Security Agreement (the Credit Agreement), with Wachovia Bank, National Association, a national banking association (Wachovia), and LaSalle Bank National Association, a national banking association (LaSalle). The Amendment amended the Credit Agreement to:

reduce the Maximum Revolving Loan Amounts (as defined in the Credit Agreement) from \$17,000,000 to \$11,333,000 with respect to Wachovia and from \$13,000,000 to \$8,667,000 with respect to LaSalle;

reduce the Funds Flow Coverage Ratio (as defined in the Credit Agreement) from 2.00 to 1.00 to 1.00 to 1.00 for each fiscal quarter ending March 31, 2008 and thereafter; and

reduce the Tangible Net Worth (as defined in the Credit Agreement) requirement from at least \$45,000,000 plus 75% of the cumulative net income (to the extent positive) generated after March 31, 2005 to \$43,500,000 for each fiscal quarter ending March 31, 2008 and thereafter.

In connection with the execution of the Amendment, we paid to Wachovia and LaSalle aggregate fees of \$10,000.

Except as provided in the Amendment, all other provisions of the Credit Agreement remain in full force and effect. The foregoing description of the Amendment does not purport to be complete and is qualified in its entirety by reference to the Amendment, which is filed as Exhibit 10.43 to this Annual Report.
