BHP Billiton and Rio Tinto, a natural fit

Whether you are a shareholder in Rio Tinto or BHP Billiton or both companies, BHP Billiton believes a combination makes enormous sense

Both have world-leading portfolios of large-scale, low-cost, long-life assets

For many of the assets ownership is shared, or they are neighbouring or very nearby

The unique overlap offers substantial opportunities to save money and add value through managing the assets as one collective group under single ownership

Together, BHP Billiton and Rio Tinto can generate substantial additional value for shareholders

Apart, BHP Billiton believes both companies will continue to incur more expense, develop duplicate infrastructure and miss opportunities to manage their assets more efficiently

BHP Billiton has conducted global roadshows speaking to the major shareholders of BHP Billiton and Rio Tinto which has confirmed that shareholders have a clear understanding of the compelling industrial logic of the deal

Conclusion

Strength, stability and growth

The core strategy of BHP Billiton remains unchanged

BHP Billiton is focused on producing volumes from its low cost assets to take advantage of

the strong market conditions

BHP Billiton on a standalone basis has a bright future

A combination of BHP Billiton and Rio Tinto can generate substantial additional value for shareholders
they are a natural fit

In addition to the synergies, combining the two would create a company that is:

Unique in character;

Capable of delivering superior returns for its shareholders; and

An Australian champion on the global stage

BHP Billiton believes the terms of the Rio Tinto offer reflect a good deal for both companies
shareholders

The support of retail shareholders will be critical for the offer to succeed

The process has a long time to run
an offer document is not expected to be posted to shareholders until late 2008 following BHP Billiton completing the necessary anti-trust and other regulatory processes
