### **1. Overview**

#### **A. Industry**

##### **(1) Industry characteristics and growth potential**

- TFT-LCD technology is one of the most widely used technologies in the manufacture of flat panel displays and the demand for flat panel displays is growing. The flat panel display industry is characterized by entry barriers due to rapidly evolving technology, capital-intensive characteristics, and the significant investments required to achieve economies of scale, among other factors. There is strong competition between a limited number of players within the industry and production capacity in the industry, including ours, is being continually increased.
- The demand for LCD panels for Notebook Computers & Monitors has been closely related to the IT industry cycle. The demand for LCD panels for TVs is growing with the start of HDTV broadcasting and as LCD TV became to play a key role in the digital display market. There is a competition between TFT-LCD and PDP technologies in the area of large flat TV products. In addition, LCD panel markets for applications, such as mobile phones, P-A/V, medical applications and automobile navigation systems, among others, are growing steadily.
- The average selling prices of LCD panels have declined in general and are expected to continually decline with time irrespective of general business cycles as a result of, among other factors, technology advances and cost reductions.

##### **(2) Cyclicity**

- The TFT-LCD business has high cyclicity as well as being a capital-intensive business. In spite of the increase in demand for products, this industry has experienced periodic volatility caused by imbalances between demand and supply due to capacity expansion within the industry.
- Intense competition and expectations of demand growth may lead panel manufacturers to invest in manufacturing capacity on similar schedules, resulting in a surge in capacity when production is ramped up at new fabrication facilities.
- During such surges in capacity growth, our customers can exert and have exerted strong downward pricing pressure, resulting in sharp declines in average selling prices and significant fluctuations in our gross margins. Conversely, demand surges and fluctuations in the supply chain can lead to price increases.

##### **(3) Competitiveness**

- Our ability to compete successfully depends on factors both within and outside our control, including product pricing, performance and reliability, successful and timely investment and product development, success of our end-brand customers in marketing their brands and products, component and raw material supply costs, foreign exchange rate and general economic and industry conditions.

## Edgar Filing: LG Display Co., Ltd. - Form 6-K

- Core competitiveness includes technology leadership, capability to design new products and premium products, timely investment in advanced fabs, cost leadership through application of large production lines, innovation of process and productivity, and collaborative customer relationships.

**Table of Contents**

- Most importantly, cost leadership and stable and long-term relationships with customers are critical to secure profit even in a buyer's market.
  
  - A substantial portion of our sales is attributable to a limited group of end-brand customers and their designated system integrators. The loss of these end-brand customers, as a result of customers entering into strategic supplier arrangements with our competitors or otherwise, would thus result in reduced sales.
  
  - Developing new products and technologies that can be differentiated from those of our competitors is critical to the success of our business. We take active measures to protect our intellectual property internationally by obtaining patents and undertaking monitoring activities in our major markets. It is also necessary to recruit and retain the experienced key staffs and highly skilled line operators.
- (4) Sourcing material
- Materials are sourced in-house (color filters) as well as from domestic and overseas vendors.
  
  - The shortage of raw materials may arise temporarily due to the rapid increase in demand for raw materials resulting from capacity expansion in the TFT-LCD industry.
  
  - We have purchased, and expect to purchase, a substantial portion of our equipment from a limited number of qualified foreign and local suppliers. From time to time, increased demand for new equipment may cause lead times to extend beyond those normally required by the equipment vendors.
- (5) Others
- Most TFT-LCD panel makers are located in Asia.
    - a. Korea: LG Display, Samsung Electronics (including Joint Venture between Samsung Electronics and Sony Corporation), BOE-Hydis
  
    - b. Taiwan: AU Optronics, Chi Mei Optoelectronics, CPT, etc.
  
    - c. Japan: Sharp, IPS-Alpha, etc.
  
    - d. China: SVA-NEC, BOE-OT, etc.

B. Company

## Edgar Filing: LG Display Co., Ltd. - Form 6-K

### (1) Business overview

- Commercial production for our TFT-LCD business began in September 1995 at P1, which was then the first fabrication facility of LG Electronics. At the end of 1998, LG Electronics and LG Semicon transferred their respective TFT-LCD related businesses to LG Soft Co., Ltd (currently LG. Display). It became a joint venture between LG Electronics and Philips Electronics in August 1999. In July 2004, we completed our initial public offering and listed our common stock on the Korea Exchange and our ADSs on the New York Stock Exchange. As of March 31, 2008, we operate seven fabrication facilities located in Gumi and Paju, Korea, and seven module facilities located in Gumi and Paju, Korea; Nanjing (3 factories) and Guangzhou, China; and Wroclaw, Poland.

**Table of Contents**

- We became the first LCD maker in the world to commence commercial production at a 4th generation fab (P3) in July 2000 and at a 5th generation fab (P4) in March 2002, and we started mass production at our 6th generation fab (P6) in August 2004, which allows us to produce LCD panels for large TVs and monitors. With the commencement of mass production at our 7th generation fab (P7) in January 2006 and our decision to invest in an 8th generation fab (P8) in October 2007, we are expanding our production capacity in line with growing large-sized LCD TV market.
  - Our non-consolidated sales revenue increased by 60.5% from KRW 2,606 billion in the first quarter of 2007 to KRW 4,182 billion in the first quarter of 2008. We recorded non-consolidated operating income of KRW 948 billion in the first quarter of 2008 compared to non-consolidated operating loss of KRW 237 billion in the first quarter of 2007 and we recorded a non-consolidated net income of KRW 761 billion in the first quarter of 2008 compared to a non-consolidated net loss of KRW 169 billion in the first quarter of 2007. (Our consolidated sales revenue under Korean GAAP increased by approximately 48.2% from KRW 2,722 billion in the first quarter of 2007 to KRW 4,036 billion in the first quarter of 2008. We recorded a consolidated operating income under Korean GAAP of KRW 881 billion in the first quarter of 2008 compared to a consolidated operating loss of KRW 208 billion in the first quarter of 2007. And we recorded a consolidated net income of KRW 717 billion in the first quarter of 2008 compared to a consolidated net loss of KRW 169 billion in the first quarter of 2007.)
  - We reinforced our position as a leader in LCD technology by developing the world’s largest 52-inch multi-touch screen panel and the world’s largest 47-inch triple-view panel that also has the world’s highest resolution in its category, as well as developing ultra-slim panels for televisions and increasing the user-friendliness of LCD panels.
  - Moreover, we formed strategic alliances or entered into long-term sales contracts with major global firms such as Dell, HP and Kodak of the United States and Japan’s Toshiba, among others, to secure customers and expand partnerships for technology development.
  - Business area of the company for disclosure is limited to LCD business.
- (2) Market shares

- Worldwide market share of large-size TFT-LCD panels (≥ 10”) based on revenue.

	2008 Q1	2007	2006
Panel for Notebook Computer	30.0%	28.5%	26.2%
Panel for Monitor	15.7%	15.6%	15.6%
Panel for TV	18.9%	22.0%	23.6%
Total	19.8%	20.4%	20.5%

**Table of Contents**

(3) Market characteristics

- Due to the recent high growth in the display appliance market for the flat display format, the scale of the LCD market is growing at a rapid rate, resulting in expansion of the market centered mainly in America, Japan, Europe and China.

(4) New business

- P7 in our Paju Display Cluster reached an expanded production capacity of over 130 thousand sheets of glass substrates per month after the fourth quarter of 2007 and we have commenced the construction of P8 (8th generation fab) in anticipation of a growth in the larger TFT-LCD market.
- In September 2005, we entered into an agreement to build a back-end module production plant in Wroclaw, Poland, becoming the first global LCD panel manufacturer to establish a production facility in Europe. We broke ground on the plant in June 2006 and started mass production in March 2007.
- In May 2006, we entered into an investment agreement with the Guangzhou Development District Administrative Committee to construct a module production plant in Guangzhou, China, and in June 2006, we established LG.Philips LCD Guangzhou Co., Ltd. We commenced mass production at the new module production plant in December 2007.
- We also plan to strengthen the foundation for future growth by leading the market in the future display technologies which include preparing for the start of the AMOLED business, accelerating the development of flexible display technologies and leading the LED back-light LCD market.
- In order to facilitate a cooperative purchasing relationship with HannStar, a company that manufactures TFT-LCD panels in Taiwan, we decided to purchase 180 million shares of preferred stock of HannStar at a purchase price of NT\$3,170,250,000. We acquired the preferred shares in February 2008. The preferred shares mature in three years and are convertible into shares of common stock of HannStar.

  - Development of 6200nit luminance backlight
- 7) Development of world's largest 10.1-inch Flexible Display
  - Joint development with E-ink Corporation
- 8) 37-inch, 42-inch, 47-inch Full-HD Model Development, applying Low Resistance Line (Copper bus Line)
  - World's first mass production of copper bus line Model
  - Realize Full HD Resolution (1920×1080)

**Table of Contents**

- 9) 37-inch wide LCD Model development which is the world's best in power consumption
- The lowest power consumption of below 120W (applying EEFL)
  - High Contrast Ratio, Fast Response Time with DCR, ODC Technology.
- [Achievements in 2006]
- 10) Development of High Brightness/Color gamut 17-inch wide slim LCD for Notebook Computer
- Slim model (10t→7t), featuring 500nit, NTSC 72%
  - Development of Slim and High Brightness Backlight
- 11) World's largest size 100-inch TFT-LCD development
- High quality image without noise or signal distortion, applying low resistance copper bus line
  - High dignity picture for Full HDTV
- 12) 32-inch/42-inch HCFL Scanning Backlight applied LCD TV Model Development
- Realization of MBR (Motion Blur Reduction) by application of Backlight Scanning Technology
  - Lamp Quantity Reduction by HCFL (Hot Cathode Fluorescent Lamp) Application
- 13) World's largest 20.1-inch TFT-LCD for Notebook Computer Development
- S-IPS Mode, sRGB, Realization of DCR 3000:1 by Backlight Control, Brightness 300nit
- 14) Ultra-slim TFT-LCD development for mobile phones
- Realization of 1.3t by reducing light guide plate & glass thickness
- 15) The fast response 2.0" TFT-LCD development for mobile phones

## Edgar Filing: LG Display Co., Ltd. - Form 6-K

- Realization of high quality image by new liquid crystal development (25ms→16ms)
  
- 16) Wide Color Gamut 30" Wide TFT-LCD Monitor Development
  - Realization of 92% high color gamut by Application of WCG CCFL
  
- 17) LGE Chassis integration model (Tornado) development (32"/37"/42")
  - Maximized cost reduction by co-design with LGE & LPL
  
  - Improved product competitiveness by thin & light design
  
- 18) 32" 120Hz new-mode panel development
  - Cost reduction & spec. upgrade by new-mode panel
  
  - MBR (Motion Blur Reduction) by 120Hz driving

**Independent Accountants' Review Report**

Based on a report originally issued in Korean

To the Stockholders and Board of Directors

LG Display Co., Ltd.:

We have reviewed the accompanying non-consolidated balance sheet of LG Display Co., Ltd. (formerly LG.Philips LCD Co., Ltd.) (the Company) as of March 31, 2008, and the related non-consolidated statements of operations, changes in stockholders' equity and cash flows for the three-month period ended March 31, 2008. These non-consolidated financial statements are the responsibility of the Company's management. Our responsibility is to issue a report on these financial statements based on our review. The accompanying non-consolidated statements of operations, changes in stockholders' equity and cash flows for the three-month period ended March 31, 2007, presented for comparative purposes, were reviewed by Samil PricewaterhouseCoopers, whose report thereon dated April 24, 2007, stated that nothing had come to their attention that caused them to believe that these non-consolidated financial statements reviewed by them were not presented fairly, in all material respects, in accordance with accounting principles generally accepted in the Republic of Korea.

We conducted our review in accordance with the Review Standards for Semiannual Financial Statements established by the Securities and Futures Commission of the Republic of Korea. These Standards require that we plan and perform the review to obtain moderate assurance as to whether the financial statements are free of material misstatement. A review consists principally of inquiries of company personnel and analytical procedures applied to financial data and, thus provides less assurance than an audit. We have not performed an audit and, accordingly, we do not express an audit opinion.

Based on our review, nothing has come to our attention that causes us to believe that the non-consolidated financial statements referred to above are not presented fairly, in all material respects, in accordance with accounting principles generally accepted in the Republic of Korea.

The non-consolidated balance sheet of the Company as of December 31, 2007 and the related non-consolidated statements of operations, appropriation of retained earnings, changes in stockholders' equity and cash flows for the year then ended were audited by Samil PricewaterhouseCoopers and their report thereon, dated February 15, 2008, expressed an unqualified opinion. The accompanying non-consolidated balance sheet of the Company as of December 31, 2007, presented for comparative purposes, is not different from the above-stated non-consolidated balance sheet in all material respects.

As discussed in Note 2 (b) to the non-consolidated financial statements, accounting principles and review standards and their application in practice vary among countries. The accompanying non-consolidated financial statements are not intended to present the financial position, results of operations, changes in stockholders' equity and cash flows in accordance with accounting principles and practices generally accepted in countries other than the Republic of Korea. In addition, the procedures and practices utilized in the Republic of Korea to review such non-consolidated financial statements may differ from those generally accepted and applied in other countries. Accordingly, this report and the accompanying non-consolidated financial statements are for use by those knowledgeable about Korean accounting procedures and review standards and their application in practice.

**1 Organization and Description of Business**

LG Display Co., Ltd. (formerly LG.Philips LCD Co., Ltd.) (the Company) was incorporated in 1985 under its original name of LG Soft, Ltd. In 1998, LG Electronics and LG Semicon transferred their respective TFT-LCD-related business to the Company and its main business is manufacture and sale of Thin Film Transistor Liquid Crystal Display ( TFT-LCD ). In July, 1999, LG Electronics Inc., which held 100% of ownership of the Company then, Koninklijke Philips Electronics N.V. ( Philips ) entered into a joint venture agreement. Pursuant to the agreement, the Company changed its name to LG.Philips LCD Co., Ltd. However, on February 29, 2008, the Company changed its name from LG.Philips LCD Co., Ltd. to LG Display Co., Ltd. based upon the approval of shareholders at the general shareholders' meeting on the same date as a result of the decrease in Philips' share interest in the Company and the possibility of its business expansion to Organic Light Emitting Diode ( OLED ) and Flexible Display products. The share interest of Philips decreased, due to the disposition of shares, from 19.9% (71,225 thousand shares) to 13.2% (47,225 thousand shares) as of March 31, 2008.

As of March 31, 2008, the Company's LCD Research & Development Center is located in Anyang, TFT-LCD manufacturing plants are located in Gumi and Paju and OLED manufacturing plant is located in Gumi. The Company's overseas subsidiaries are located in the United States of America, Europe and Asia.

**2 Summary of Significant Accounting Policies and Basis of Presenting Financial Statements**

**(a) Significant Accounting Policies**

The significant accounting policies followed by the Company in the preparation of its interim non-consolidated financial statements are same as those followed by the Company in its preparation of annual non-consolidated financial statements as of December 31, 2007 except for the application of the Statements of Korea Accounting Standard No. 2, *Interim Financial Reporting*.

**(b) Basis of Presenting Financial Statements**

The Company maintains its accounting records in Korean Won and prepares statutory financial statements in the Korean language (Hangul) in conformity with the accounting principles generally accepted in the Republic of Korea. Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with generally accepted accounting principles in other countries. Accordingly, these non-consolidated financial statements are intended for use only by those who are informed about Korean accounting principles and practices. The accompanying non-consolidated financial statements have been translated into English from the Korean language non-consolidated financial statements.

9 Share-Based Payments

## Edgar Filing: LG Display Co., Ltd. - Form 6-K

(a) The terms and conditions of grants as of March 31, 2008 are as follows:

	<b>Descriptions</b>
Settlement method	Cash settlement
Type of arrangement	Stock appreciation rights (granted to senior executive)
Date of grant	April 7, 2005
Weighted-average exercise price (*1)	(Won)44,050
Number of rights granted	450,000
Number of rights cancelled (*2)	230,000
Number of rights outstanding (*3)	220,000
Exercise period	From April 8, 2008 to April 7, 2012
Vesting conditions	Two years of service from the date of grant

(\*1) The exercise price at the grant date was (Won)44,260 per stock appreciation rights ( SARs ). However, the exercise price was subsequently adjusted to (Won)44,050 due to additional issuance of common shares in 2005.

(\*2) The SARs were cancelled in connection with senior executives leaving the Company before meeting the vesting requirement.

(\*3) If the increase rate of the Company's share price is equal or less than that of the Korea Composite Stock Price Index ( KOSPI ) over the three-year period following the grant date, only 50% of the initially granted SARs are exercisable. The actual increase rate of the Company's share price for the three-year period ending April 7, 2008, was less than that of the KOSPI for the three-year period. As a result, only 50% of the SARs are exercisable.

1 **Organization and Description of Business**

The accompanying consolidated financial statements include the accounts of LG Display Co., Ltd. and its consolidated subsidiaries (collectively the Company ). The general information on the LG Display Co., Ltd. (the Controlling Company ) and its consolidated subsidiaries is described below.

(a) **Description of the Controlling Company**

LG Display Co., Ltd. (formerly, LG.Philips LCD Co., Ltd.) was incorporated in 1985 under its original name of LG Soft, Ltd. In 1998, LG Electronics and LG Semicon transferred their respective TFT-LCD-related business to the Controlling Company and its main business is manufacture and sale of Thin Film Transistor Liquid Crystal Display ( TFT-LCD ). In July, 1999, LG Electronics Inc., which wholly owned the Controlling Company then, Koninklijke Philips Electronics N.V. ( Philips ) entered into a joint venture agreement. Pursuant to the agreement, the Controlling Company changed its name to LG.Philips LCD Co., Ltd. However, on February 29, 2008, the Controlling Company changed its name from LG.Philips LCD Co., Ltd. to LG Display Co., Ltd. based upon the approval of shareholders at the general shareholders meeting on the same date as a result of the decrease in Philips share interest in the Controlling Company and the possibility of its business expansion to Organic Light Emitting Diode ( OLED ) and Flexible Display products. The share interest of Philips decreased, due to the disposition of shares, from 19.9% (71,225,000 shares) to 13.2% (47,225,000 shares).

As of March 31, 2008, the Controlling Company s LCD Research & Development Center is located in Anyang, TFT-LCD manufacturing plants are located in Gumi and Paju and OLED manufacturing plant is located in Gumi. The Controlling Company s overseas subsidiaries are located in the United States of America, Europe and Asia.

	Descriptions
Settlement method	Cash settlement
Type of arrangement	Stock appreciation rights (granted to senior executive)
Date of grant	April 7, 2005
Weighted-average exercise price (*1)	(Won)44,050
Number of rights granted	450,000
Number of rights cancelled (*2)	230,000
Number of rights outstanding (*3)	220,000
Exercise period	From April 8, 2008 to April 7, 2012
Vesting conditions	Two years of service from the date of grant

(\*1) The exercise price at the grant date was (Won)44,260 per stock appreciation rights ( SARs ). However, the exercise price was subsequently adjusted to (Won)44,050 due to additional issuance of common shares in 2005.

(\*2) The SARs were cancelled in connection with senior executives leaving the Company before meeting the vesting requirement.

(\*3) If the increase rate of the Company's share price is equal or less than that of the Korea Composite Stock Price Index ( KOSPI ) over the three-year period following the grant date, only 50% of the outstanding SARs are exercisable. The actual increase rate of the Company's share price for the three-year period ending April 7, 2008, was less than that of the KOSPI. As a result, only 50% of the outstanding SARs as of March 31, 2008 are exercisable.

Notes to Consolidated Financial Statements

(Unaudited)

March 31, 2007 and 2008

**1. Summary of Significant Accounting Policies****(a) *Basis of Presentation***

The unaudited consolidated financial statements of LG Display Co., Ltd. (formerly, LG.Philips LCD Co., Ltd.) ( LGD ) and its subsidiaries (collectively, the Company ) have been prepared in accordance with generally accepted accounting principles in the United States of America ( U.S. GAAP ) for the preparation of interim financial information. They do not include all information and notes required by U.S. GAAP in the preparation of annual consolidated financial statements. The information furnished in these unaudited interim statements reflects all adjustments that are, in the opinion of management, necessary for a fair statement of the results for the periods presented. These adjustments are of a normal recurring nature, unless otherwise disclosed. The results of operations in the interim statements do not necessarily indicate the results that may be expected for the full year. The accounting policies used in the preparation of the unaudited consolidated financial statements are the same as those described in LGD 's audited consolidated financial statements prepared in accordance with U.S. GAAP for the year ended December 31, 2007 except as discussed in note 2. The condensed consolidated balance sheet as of December 31, 2007 is derived from the December 31, 2007 audited financial statements which were audited by other accountants.

Toshiba Corporation ( Toshiba ) acquired 20% of LG Display Poland Sp. zo.o. (formerly, LG.Philips LCD Poland Sp. zo.o.) in December 2007. With the acquisition of the 20% interest, Toshiba and the Company entered into a derivative contract that is indexed to LG Display Poland Sp. zo.o. 's equity shares. According to the contract, LGD has a call option to buy Toshiba 's 20% interest in LG Display Poland Sp. zo.o. and Toshiba has a put option to sell its 20% interest in LG Display Poland Sp. zo.o. to LGD under the same terms, that is, the price of the call is equal to the price of the put option which is the total amount of Toshiba 's investment at cost. The call and put option is exercisable after five years from the date of acquisition and on each anniversary thereafter with no stated expiry date in whole or in part. In accordance with EITF 00-4, *Majority Owner 's Accounting for a Transaction in the Shares of a Consolidated Subsidiary and a Derivative Indexed to the Minority Interest in That Subsidiary*, LG Display Poland Sp. Zo.o is consolidated as a wholly owned subsidiary and Toshiba 's 20% interest in LG Display Poland Sp. zo.o. is accounted for as a financing by the Company and recorded as long-term other accounts payable in the amount of (Won)36,612 million as of March 31, 2008. The financing will be accreted to the fixed price of the call and put option under the effective yield method and recorded as interest expense over a five year period.

**(b) *Use of Estimates***

The preparation of the consolidated financial statements, in accordance with, U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

**(c) United States Dollar Amounts**

The Company operates primarily in Korea and its financial accounting records are maintained in Korean Won. These translations should not be construed as a representation that the Korean Won amounts shown could be converted, realized or settled in U.S. dollars at this or any other rate. The U.S. dollar amounts are provided herein as supplemental information solely for the convenience of the reader. Korean Won amounts are expressed in U.S. dollars at the rate of (Won)988.60 to USD 1, the US Federal Reserve Bank of New York noon buying exchange rate in effect on March 31, 2008. The U.S. dollar amounts are unaudited and are not presented in accordance with generally accepted accounting principles in either Korea or the United States of America.

**(d) Recent Accounting Pronouncements**

In December 2007, the FASB issued Statement of Financial Accounting Standards ( SFAS ) No. 141(R), *Business Combinations* ( SFAS No. 141(R) ). SFAS No. 141(R) establishes principles and requirements for how the acquirer in business combinations should recognize and measure identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree. SFAS No. 141(R) applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The Company is currently in the process of evaluating the impact, if any, of adopting this standard.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements* An amendment of ARB No. 51 ( SFAS No. 160 ). SFAS No. 160 requires that ownership interests in subsidiaries held by parties other than the parent be clearly identified, labeled, and presented in the consolidated statements of financial position within equity, but separate from the parent's equity. It also requires companies to clearly identify and present on the face of the consolidated statements of income, the amount of consolidated net income attributable to the parent and to the noncontrolling interest. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. The adoption of SFAS No. 160 will result in the reclassification of minority interests from long-term liabilities to stockholders' equity. The balance at March 31, 2008 was (Won)86 million. The Company does not believe the adoption of SFAS No. 160 will have a material impact on the Company's consolidated financial position, results of operations or cash flows.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* ( SFAS No. 161 ). The new standard is intended to help investors better understand how derivative instruments and hedging activities affect an entity's financial position, financial performance and cash flows through enhanced disclosure requirements. The enhanced disclosures include, for example:

a tabular summary of the fair value of derivative instruments and their gains and losses;

disclosure of derivative features that are credit-risk-related to provide more information regarding an entity's liquidity; and

cross-referencing within footnotes to make it easier for financial statement users to locate important information about derivative instruments.

SFAS No. 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. The Company is currently in the process of evaluating the impact, if any, of adopting this standard.

**2. Accounting Changes**

Effective January 1, 2008, the Company adopted SFAS No. 157, *Fair Value Measurement* ( SFAS No. 157 ) and SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities – including an amendment of FASB Statement No. 115* ( SFAS No. 159 ).

The adoption of SFAS No. 157 and SFAS No. 159 did not have any effect on our financial statements at the date of adoption. For additional information, see Note 15 (Fair Value of Assets and Liabilities) to Consolidated Financial Statements.

**10. Income Taxes**

The Company adopted FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - an Interpretation of SFAS Statement 109* ( FIN 48 ) on January 1, 2007. The Company recognizes the effect of income tax positions only if those positions are more likely than not of being sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. The adoption of FIN 48 did not have any impact on the Company's consolidated financial statements. The Company does not have any unrecognized tax positions as of March 31, 2008 and there has been no change since adoption.

The Company's primary tax jurisdictions are Korea, China, Japan, Germany, Poland and the United States. Open tax years of the Company are 5 years, 6 years, 1 year, 5 years, 3 years and 9 years in Korea, China, Japan, Germany, Poland and the United States, respectively. The Company has not made any provision for the disputed tax liabilities under SFAS No. 109 or FIN 48.

Management's policy is to recognize accrued interest on the underpayment of income taxes as a component of interest expense and penalties associated with tax liabilities as a component of income tax expense. However, there was no such interest or penalties incurred during the three-month period ended March, 31, 2008.

The valuation allowance for deferred tax assets as of January 1, 2007 was (Won)159,527 million, but there was no valuation allowance as of January 1, 2008. The net change in the total valuation allowance was an increase of (Won)15,268 million during the three-month period ended March 31, 2007, but there was no change in the valuation allowance during the three-month period ended March 31, 2008. In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized.

**11. Stockholders Equity**

On May 21, 2004, employees of the Company formed an employee stock ownership association, ( ESOA ), which has the right to purchase on behalf of its membership up to 20% (1,728,000 shares) of shares offered publicly in Korea, pursuant to the Korean Securities and Exchange Act. Employees purchased the shares through the ESOA with loans provided by the Company at the initial public offering price ((Won)34,500) and put under each individual employee's account. 20% of the 20% of shares (345,600 shares) purchased by employees with loans from the Company is accounted for as a restricted stock award which vests over four years. Unearned compensation, shown as a deduction of capital surplus, will be amortized over the 4-year vesting period. During the three-month period ended March 31, 2007 and 2008, the Company recorded compensation expense of (Won)476 million and (Won)738 million, respectively.

**12. Stock Option Plan**

Effective January 1, 2005, the Company adopted the provisions of SFAS No. 123(R), *Share-Based Payment* ( SFAS No. 123(R) ). SFAS No. 123(R) establishes accounting for share-based awards exchanged for employee services. SFAS No. 123(R) requires that an award that is classified as a liability to be initially measured at its grant date fair value and remeasured at fair value at the end of each reporting period until the award is settled or expires. The measurement is based on the current stock price and other relevant factors. The difference between the fair value amounts is recognized as compensation expense during the requisite service period, based on the percentage of the requisite service that the employee has rendered as of that date. In accordance with SFAS No. 123(R), compensation expense is remeasured at each reporting date, based on the fair value of the award, and is recognized as expense over the employee requisite service period.

On April 7, 2005, the Company granted 450,000 shares of stock appreciations rights ( SARs ) for selected management employees. Under the terms of this plan, management, upon exercise, receives cash equal to the amount that the market price of the Company's common stock exceeds the strike price ((Won)44,050) of the SARs. The vesting period is two years starting from the grant date, and exercisable period is April 8, 2008 through April 7, 2012.

The following table shows total share-based compensation expense included in the consolidated statement of operations for the three-month periods ended March 31, 2007 and 2008:

<i>(in millions of Korean Won)</i>	<b>2007</b>	<b>2008</b>
Selling general and administrative expense	(Won) 1,134	(2,801)

There were no capitalized share-based compensation costs for the three-month periods ended March 31, 2007 and 2008.

**Table of Contents****LG DISPLAY CO., LTD. (formerly, LG.Philips LCD Co., Ltd.) AND SUBSIDIARIES**

Notes to Consolidated Financial Statements

(Unaudited)

March 31, 2007 and 2008

The following tables summarize option activity under the SARs for the three-month period ended March 31, 2008:

	Weighted- average exercise price (in Korean Won)	Number of shares under option	Weighted- average remaining contractual life (in years)
Balance at December 31, 2007	(Won) 44,050	220,000	4
Options granted			
Options exercised			
Options canceled/expired			
Balance at March 31, 2008	(Won) 44,050	220,000	4
Exercisable at March 31, 2008	(Won)		

If the increase rate of the Company's share price is equal or less than that of the Korea Composite Stock Price Index ( KOSPI ) over the three-year period following the grant date, only 50% of the initially granted SARs are exercisable. The actual increase rate of the Company's share price for the three-year period ending April 7, 2008, was less than that of the KOSPI. As a result, only 50% of the SARs are exercisable.

In connection with the adoption of SFAS No. 123(R), the Company assessed its valuation technique and related assumptions. The Company estimates the fair value of stock options using a Black-Scholes valuation model, consistent with the provisions of SFAS No. 123(R) and Securities and Exchange Commission (SEC) Staff Accounting Bulletin No. 107. Key input assumptions used to estimate the fair value of stock options include the grant price of the award, the expected option term, volatility of the Company's stock, the risk-free rate and the Company's dividend yield. Estimates of fair value are not intended to predict actual future events or the value ultimately realized by selected managements who receive SARs, and subsequent events are not indicative of the reasonableness of the original estimates of fair value made by the Company under SFAS No. 123(R).

The fair value of SARs as of March 31, 2007 and 2008, was estimated using a Black-Scholes valuation model with the following assumptions:

	2007	2008
Volatility	48.13%	46.85%
Risk-free interest rate (Korean government bond)	4.80%	5.13%
Dividend yield	0%	0%
Weighted-average fair value per option granted	(Won) 12,978	(Won) 21,338

Volatility is measured using historical weekly price changes of the Company's stock over the respective term of the option.

The number of years that the Company estimates that options will be outstanding prior to settlement as of March 31, 2008, is two years.

Investigation on anti-competitive activities by authorities in Korea, Japan and U.S.

The Company is currently under investigation by the fair trade or antitrust authorities in Korea, Japan, US and other markets with respect to possible anti-competitive activities in the LCD industry. As of March 31, 2008, the Company, along with a number of other companies in the LCD industry, has been named as defendants in a number of purported federal class actions in the United States alleging that the defendants violated the antitrust laws in connection with the sale of LCD panels. In February 2007, the Company and certain of its officers and directors have been named as defendants in a federal class action in the United States by the shareholders of the Company alleging violations of the U.S. Securities Exchange Act of 1934, as amended, by the Company and certain of its officers and directors in connection with possible anti-competitive activities in the LCD industry. The Company and the officers and directors intend to defend themselves vigorously in this matter.

While the Company intends to defend each of the abovementioned suits vigorously, it is too early in the proceedings to evaluate the probability of a favorable or unfavorable outcome of the actions, or to estimate the potential loss, if any.

**Investment agreement with Polish Government**

The Company acquired land at EUR 1 and received cash grants which are intended to be used for the construction of a plant according to an investment agreement with the Polish Government. The land was recognized at the fair value at acquisition date, amounting to PLN57,413 thousand ((Won)25,517 million) and the corresponding amount was recorded as a liability. The cash grants amounting to PLN40,005 thousand ((Won)17,780 million) were also recorded as a liability due to the repayment contingency to be determined in 2012 based on the level of employment and investment.

**15. Fair Value of Assets and Liabilities**

The Company uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Available-for-sale securities, derivatives and long-term debts including the current portion are recorded at fair value on a recurring basis.

Effective January 1, 2008, upon adoption of SFAS No. 159, the Company may elect to use fair value to measure eligible items at specified election dates and report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. However, as of March 31, 2008, the Company did not elect to measure any eligible assets or liabilities at fair value in accordance with the Standard.

SFAS No. 157 defines fair value, establishes a consistent framework for measuring fair value and expands disclosure requirements for fair value measurements. Additionally, SFAS No. 157 amended SFAS No. 107, *Disclosure about Fair Value of Financial Instruments* ( SFAS No. 107 ), and, as such, the Company follows SFAS No. 157 in determination of SFAS No. 107 fair value disclosure amounts. The disclosures required under SFAS No. 157 and SFAS No. 107 has been included in this note. However, as of March 31, 2008, the Company has deferred the application of SFAS No. 157 for its nonfinancial assets and liabilities.

**Fair Value Hierarchy**

Under SFAS No. 157, the Company groups its assets and liabilities at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1 Valuation is based upon quoted prices for identical instruments traded in active markets.

Level 2 Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Company's own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of option pricing models, discounted cash flow models and similar techniques.

**Determination of Fair Value**

Under SFAS No. 157, the Company bases its fair value on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is the Company's policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements, in accordance with the fair value hierarchy in SFAS No. 157.

Fair value measurements for assets and liabilities where there exists limited or no observable market data and, therefore, are based primarily upon the Company's own estimates, are often calculated based on current pricing policy, the economic and competitive environment, the characteristics of the asset or liability and other such factors. Therefore, the results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability. Additionally, there may be inherent weaknesses in any calculation technique, and changes in the underlying assumptions used, including discount rates and estimates of future cash flows, that could significantly affect the results of current or future value.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value and for estimating fair value for financial instruments not recorded at fair value (SFAS No. 107 disclosures).

**Assets**

**Available-for-sale securities**

Available-for-sale securities are recorded at fair value on a recurring basis. Fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating and other factors such as credit loss assumptions.

**Derivatives**

The Company measures fair value of derivatives using internally developed models that use primarily market observable inputs, such as yield curves and option volatilities, and, accordingly, classify as Level 2. Examples of Level 2 derivatives are basic interest rate swaps and forward contracts.

**Liabilities**

**Long-term debt and payables**

Long-term debt is carried at amortized cost. However, the Company is required to estimate the fair value of long-term debt and payables under SFAS No. 107. Generally, the discounted cash flow method is used to estimate the fair value of the Company's long-term debt and payables. Contractual cash flows are discounted using rates currently traded for the bonds with similar remaining maturities and, as such, these discount rates include the Company's current spread levels.

**16. Segment Information**

The Company has one reportable business segment, the manufacture and sale of TFT-LCDs. The following is a summary of operations by country based on the location of the customer, where the Company's products are shipped to, as of and for the three-month periods ended March 31, 2007 and 2008.

<b>By Geography</b> <i>(in millions of Korean Won)</i>	<b>2007</b>	<b>2008</b>
<b>Revenue from external customers:</b>		
Republic of Korea	(Won) 218,608	280,977
China	1,316,338	2,065,712
Asia	375,689	583,588
America	238,889	372,120
Europe	476,253	696,809
Others	96,679	36,405
<b>Total</b>	(Won) 2,722,456	4,035,611

During the three-month periods ended March 31, 2007 and 2008, the Company's revenue from its three largest customers, LG Electronics, Hewlett-Packard and Philips Electronics, accounted for 42.5% and 43.5% of total revenue, respectively. Sales to LG Electronics constituted 20.7% and 22.7% of total revenue, for the three-month periods ended March 31, 2007 and 2008, respectively. Sales to Hewlett-Packard constituted 9.5% and 10.5% of total revenue, for the three-month periods ended March 31, 2007 and 2008, respectively. Sales to Philips Electronics constituted 12.3% and 10.3% of total revenue, for the three-month periods ended March 31, 2007 and 2008, respectively.

Approximately 94% of the Company's total assets are located in the Republic of Korea.

The Company purchases a number of components from various sources. In some cases, alternative sources of supply are not available. In other cases, the Company may establish a working relationship with a single source, even when multiple suppliers are available, if the Company believes it is advantageous to do so due to performance, quality, support, delivery, capacity or price considerations. If the supply of a critical material or component were delayed or curtailed, the Company's ability to ship the related product in desired quantities and in a timely manner could be adversely affected. Even where alternative sources of supply are available, qualification of the alternative suppliers and establishment of reliable supplies could result in delays and a possible loss of sales, which could adversely affect operating results.
