FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2008

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number 001-31721

AXIS CAPITAL HOLDINGS LIMITED

(Exact name of registrant as specified in its charter)

BERMUDA

(State or other jurisdiction of incorporation or organization)

98-0395986

(I.R.S. Employer Identification No.)

92 Pitts Bay Road, Pembroke, Bermuda HM 08

(Address of principal executive offices and zip code)

(441) 496-2600

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of August 1, 2008 there were 144,925,025 Common Shares, \$0.0125 par value per share, of the registrant outstanding.

PART I FINANCIAL INFORMATION

Cautionary Statement Regarding Forward-looking Statements

This quarterly report contains forward-looking statements within the meaning of the U.S. federal securities laws. We intend these forward-looking statements to be covered by the safe harbor provisions for forward-looking statements in the United States securities laws. In some cases, these statements can be identified by the use of forward-looking words such as may, should, could, anticipate, estimate, expect, plan, believe, predict, potential and intend . Forward-looking statements contained in this report may include information regarding our estimation of losses related to hurricanes and other catastrophes, our expectations regarding pricing and other market conditions, our growth prospects, the amount of our acquisition costs, the amount of our net losses and loss reserves, the projected amount of our capital expenditures, managing interest rate and foreign currency risks, valuations of potential interest rate shifts and foreign currency rate changes and measurements of potential losses in fair market values of our investment portfolio. Forward-looking statements only reflect our expectations and are not guarantees of performance.

These statements involve risks, uncertainties and assumptions. Accordingly, there are or will be important factors that could cause actual results to differ materially from those indicated in such statements. We believe that these factors include, but are not limited to, the following:

the occurrence of natural and man-made disasters,

actual claims exceeding our loss reserves,

the failure of any of the loss limitation methods we employ,

the effects of emerging claims and coverage issues,

the failure of our cedants to adequately evaluate risks,

the loss of one or more key executives,

a decline in our ratings with rating agencies,

loss of business provided to us by our major brokers,

changes in accounting policies or practices,

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

changes in governmental regulations,

increased competition,

changes in the political environment of certain countries in which we operate or underwrite business,

interest rate and/or currency value fluctuations,

general economic conditions, and

the other matters set forth under Item 1A, Risk Factors and Item 7, Management's Discussion and Analysis of Financial Conditions and Results of Operations included in our Annual Report on Form 10-K for the year ended December 31, 2007.

We undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

AXIS CAPITAL HOLDINGS LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. BASIS OF PRESENTATION AND ACCOUNTING POLICIES

Basis of Presentation

Our consolidated balance sheet at June 30, 2008 and the consolidated statements of operations, comprehensive income, shareholders' equity and cash flows for the periods ended June 30, 2008 and 2007 have not been audited. The balance sheet at December 31, 2007 is derived from the audited financial statements.

These statements have been prepared in accordance with U.S. Generally Accepted Accounting Principles (U.S. GAAP) for interim financial information and with the Securities and Exchange Commission's instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, these financial statements reflect all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of our financial position and results of operations as at the end of and for the periods presented. The results of operations for any interim period are not necessarily indicative of the results for a full year. All significant inter-company accounts and transactions have been eliminated. In these notes, the terms we, us, our, or the Company refer to AXIS Capital Holdings Limited and its subsidiaries.

The following information is unaudited and should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2007. Certain reclassifications have been made to prior period amounts to conform to the current period presentation. Tabular dollars and share amounts are in thousands, except per share amounts.

Adoption of New Accounting Standards

The terms FAS and FASB used in these notes refer to Statements of Financial Accounting Standards issued by the United States Financial Accounting Standards Board.

(a) Fair Value Measurement

We adopted FAS 157, *Fair Value Measurements* (FAS 157), effective January 1, 2008. Under this standard, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e. the exit price) in an orderly transaction between market participants at the measurement date.

In determining fair value, we use various valuation approaches, including market and income approaches. FAS 157 establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1 Valuations based on quoted prices in active markets for identical assets or liabilities that we have the ability to access. Valuation adjustments and block discounts are not applied to Level 1 instruments. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail a significant degree of judgment. Examples of assets and liabilities utilizing Level 1 inputs include: exchange-traded equity securities and listed derivatives that are actively traded.

Table of Contents

AXIS CAPITAL HOLDINGS LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. BASIS OF PRESENTATION AND ACCOUNTING POLICIES (CONTINUED)

Level 2 Valuations based on quoted prices in markets that are not active or for which significant inputs are observable (e.g. interest rates, yield curves, prepayment speeds, default rates, loss severities, etc.) or can be corroborated by observable market data.

Examples of assets and liabilities utilizing Level 2 inputs include: exchange-traded equity securities and listed derivatives that are not actively traded; U.S. government and agency securities; non-U.S. government obligations; corporate and municipal bonds; mortgage-backed securities (MBS) and asset-backed securities (ABS); and over-the-counter (OTC) derivatives (e.g. foreign currency options and forward contracts).

Level 3 Valuations based on inputs that are unobservable and significant to the overall fair value measurement. The unobservable inputs reflect our own assumptions about assumptions that market participants might use.

Examples of assets and liabilities utilizing Level 3 inputs include: insurance and reinsurance derivative contracts; hedge funds with partial transparency; and collateralized loan obligation (CLO) equity tranche securities, credit funds and short duration high yield funds that are traded in less liquid markets.

The availability of observable inputs can vary from financial instrument to financial instrument and is affected by a wide variety of factors, including, for example, the type of financial instrument, whether the financial instrument is new and not yet established in the marketplace, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires significantly more judgment. Accordingly, the degree of judgment exercised by management in determining fair value is greatest for instruments categorized in Level 3. We use prices and inputs that are current as of the measurement date, including during periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified between levels.

The adoption of FAS 157 did not result in any cumulative-effect adjustment to our beginning retained earnings at January 1, 2008, or any material impact on our results of operations, financial position or liquidity. In February 2008, the FASB issued FSP FAS 157-2, *Effective Date of FASB Statement No. 157* (FSP FAS 157-2), which permits a one-year deferral of the application of FAS 157 for all non-financial assets and non-financial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). Accordingly, we have also adopted FSP FAS 157-2 effective January 1, 2008, FAS 157 will not be applied to our goodwill and other intangible assets measured annually for impairment testing purposes only. We will adopt FAS 157 for non-financial assets and non-financial liabilities on January 1, 2009. We do not anticipate this adoption will have a material impact on our results of operations, financial position or liquidity.

(b) Fair Value Option

FAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (FAS 159), became effective on January 1, 2008. Under this standard, an entity is permitted to irrevocably elect fair value on a contract-by-contract basis as the initial and subsequent measurement attribute for many financial instruments and certain other items including insurance contracts. We did not elect the fair value option for our available for sale investments and therefore future changes in unrealized gains and losses on these investments, net of tax, will continue to be reported through accumulated other comprehensive income (loss) in our shareholders' equity. Accordingly, FAS 159 did not have an impact on our results of operations, financial position or liquidity.

Table of Contents

AXIS CAPITAL HOLDINGS LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. BASIS OF PRESENTATION AND ACCOUNTING POLICIES (CONTINUED)

Accounting Standards Not Yet Adopted

(a) Business Combinations and Non-controlling Interests

In December 2007, the FASB issued FAS No. 141(R), *Business Combinations* (FAS 141(R)) and FAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements* an amendment of Accounting Research Bulletin No. 51 (FAS 160). SFAS 141(R) requires the acquiring entity in a business combination to recognize the full fair value of assets acquired and liabilities assumed in the transaction (whether a full or partial acquisition); establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed; requires expensing of most transaction and restructuring costs; and requires the acquirer to provide additional disclosures on the nature and financial effect of the business combination. FAS 141(R) applies to all transactions or other events in which the acquirer obtains control of one or more businesses, even if control is not obtained by purchasing equity interests or net assets. FAS 160 requires reporting entities to present noncontrolling (minority) interests as equity (as opposed to as a liability or mezzanine equity) and provides guidance on the accounting for transactions between an entity and noncontrolling interests. Both FAS 141(R) and FAS 160 apply prospectively to business combinations for which the acquisition date is on or after December 15, 2008, except for the presentation and disclosure requirements of FAS 160 which will be applied retrospectively for all periods presented.

(b) Derivative Instruments and Hedging Activities

In March 2008, the FASB issued FAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* an amendment of FASB Statement No. 133 (FAS 161). This Statement expands the disclosure requirements of FAS 133 and requires the reporting entity to provide enhanced disclosures about the objectives and strategies for using derivative instruments, quantitative disclosures about fair values and amounts of gains and losses on derivative contracts, and credit-risk related contingent features in derivative agreements. FAS 161 will be effective for fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. As FAS 161 requires only additional disclosures concerning derivatives and hedging activities, its adoption will not affect our results of operations, financial position or liquidity.

(c) Financial Guarantee Insurance Contracts

On May 23, 2008, the FASB issued FAS No. 163, *Accounting for Financial Guarantee Insurance Contracts* (FAS 163). This new standard clarifies how FAS No. 60, *Accounting and Reporting by Insurance Enterprises*, applies to financial guarantee insurance contracts issued by insurance enterprises, including the recognition and measurement of premium revenue and claim liabilities. It also requires expanded disclosures about financial guarantee insurance contracts. FAS 163 is effective for fiscal years beginning after December 15, 2008, and all interim periods within those fiscal years, except for disclosures about the insurance enterprise's risk-management activities, which are effective the first period (including interim periods) beginning after May 23, 2008. Except for the required disclosures, earlier application is not permitted. We are currently evaluating the impact of the adoption of FAS 163 on our financial condition and results of operations.

AXIS CAPITAL HOLDINGS LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

2. SEGMENT INFORMATION

Our underwriting operations are organized around our two global underwriting platforms, AXIS Insurance and AXIS Re and therefore we have determined that we have two reportable segments, insurance and reinsurance. Except for goodwill and intangible assets, we do not allocate our assets by segment as we evaluate the underwriting results of each segment separately from the results of our investment portfolio.

Insurance

Our insurance segment offers specialty insurance products to a variety of niche markets on a global basis. The following are the lines of business in our insurance segment:

Property: provides physical damage and business interruption coverage primarily for industrial and commercial properties and physical damage, business interruption and liability coverage for onshore energy properties and operations. The book consists of both primary and excess risks, some of which are catastrophe-exposed.

Marine: provides coverage for hull, liability, cargo and specie and recreational marine risks. These risks include property damage or physical loss to ships, pollution damage caused by vessels on a sudden and accidental basis, protection for general cargo and the contents of armored cars, vaults, exhibitions and museums, and specific war related risks. This line of business also provides physical damage, business interruption and liability coverage for offshore energy property and operations.

Terrorism: provides coverage for physical damage and business interruption of an insured following an act of terrorism.

Aviation: includes hull and liability and specific war coverage for passenger and cargo airlines and privately owned aircraft as well as select aviation product liability coverage.

Political risk: provides protection against sovereign default or sovereign actions that result in the impairment of cross-border investments for banks and major corporations. This book also provides sovereign and corporate credit insurance within emerging markets, where lenders seek to mitigate the risk of non-payment from their borrowers.

Professional lines: includes coverage for directors and officers liability, errors and omissions liability, employment practices liability, media, cyber, technology and miscellaneous professional liability coverage.

Liability: primarily targets general liability and umbrella and excess liability in the U.S. excess and surplus lines markets. Target classes include mercantile, manufacturing and building/premises, with particular emphasis on commercial and consumer products, commercial construction and miscellaneous general liability.

Other: primarily includes employee medical coverage for self-insured, small and medium sized employers for losses in excess of a retention.

2. SEGMENT INFORMATION (CONTINUED)

Reinsurance

Our reinsurance segment provides treaty and facultative property and casualty reinsurance to insurance companies on a worldwide basis. The following are the lines of business in our reinsurance segment:

Catastrophe: provides protection for most catastrophic losses that are covered in the underlying insurance policies written by our ceding company clients. The exposure in the underlying policies is principally property exposure but also covers other exposures including workers compensation, personal accident and life. The principal perils in this portfolio are hurricane and windstorm, earthquake, flood, tornado, hail and fire. In some instances, terrorism may be a covered peril or the only peril. We underwrite catastrophe reinsurance principally on an excess of loss basis, meaning that our exposure only arises when our customers' claims exceed a certain retained amount.

Property: includes reinsurance written on both a pro rata and a per risk basis and covers underlying personal lines and commercial property exposures. Property pro rata treaty reinsurance covers a cedent's aggregate losses from all events in the covered period on a proportional basis. Property per risk treaty reinsurance reinsures a portfolio of particular property risks of ceding companies on an excess of loss basis.

Professional Liability: covers directors' and officers' liability, employment practices liability, medical malpractice and miscellaneous errors and omissions insurance risks.

Credit and Bond: consists principally of reinsurance of trade credit insurance products and includes both proportional and excess-of loss structures. The underlying insurance indemnifies sellers of goods and services against a payment default by the buyer of those goods and services. Also included in this book is coverage for ceding insurers against losses arising from a broad array of surety bonds issued by bond insurers principally to satisfy regulatory demands in a variety of jurisdictions around the world, but predominantly in Europe.

Motor: provides coverage to insurers for motor liability losses arising out of any one occurrence. The occurrence can involve one or many claimants where the ceding insurer aggregates the claims from the occurrence.

Liability: provides coverage to insurers of standard casualty lines, including auto liability, general liability, personal and commercial umbrella and workers' compensation.

Engineering: provides coverage for all types of civil construction risks and risks associated with erection, testing and commissioning of machinery and plants during the construction stage. This line of business also includes operational risks for machinery, plant and equipment, electronic equipment and business interruption. We write engineering business on a proportional and non-proportional treaty basis as well as on a facultative basis.

Other: includes aviation, marine, personal accident and crop reinsurance.

At June 30, 2008, 1,894 securities (2007: 1,440) were in an unrealized loss position with a fair value of \$4,853 million (2007: \$2,718 million) of which 372 securities (2007: 1,065) have been in an unrealized loss position for 12 months or greater and have a fair value of \$526 million (2007: \$1,422 million). The unrealized losses from these securities were primarily as a result of interest rates movements. In the first six months of 2008, we recorded an impairment charge of \$16 million (2007: \$2 million) relating to 26 securities (2007: 8) that we determined to be other than temporarily impaired which were included in net realized investment gains (losses) in the Consolidated Statements of Operations.

Table of Contents**AXIS CAPITAL HOLDINGS LIMITED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****4. FAIR VALUE****a) Fair Value Hierarchy**

At June 30, 2008, we classified our financial instruments measured at fair value on a recurring basis in the following valuation hierarchy:

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total Fair Value
Assets				
Fixed maturities	\$ -	\$ 8,703,346	\$ -	\$ 8,703,346
Equity securities	247,845	-	-	247,845
Other investments	-	46,551	677,688	724,239
Total	\$ 247,845	\$ 8,749,897	\$ 677,688	\$ 9,675,430
Liabilities				
Derivative liabilities	-	750	23,790	24,540

b) Level 3 Financial Instruments

The following table presents changes in Level 3 for our financial instruments measured at fair value on a recurring basis for the three months ended June 30, 2008:

	Other Investments	Derivative Liability
Balance as at April 1, 2008	\$ 600,897	\$ 16,346
Change in net unrealized gains/losses	12,869	7,444
Net purchases, sales, and distributions	63,923	-
Net transfers in (out of) of Level 3	-	-
Balance as at June 30, 2008	\$ 677,689	\$ 23,790
Change in net unrealized gains/losses relating to financial instruments held at reporting date	\$ 12,869 ⁽¹⁾	\$ 7,444 ⁽²⁾

⁽¹⁾Included in net investment income

⁽²⁾Included in other insurance related (loss) income

Table of Contents

AXIS CAPITAL HOLDINGS LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

4. FAIR VALUE (CONTINUED)

The following table presents changes in Level 3 for our financial instruments measured at fair value on a recurring basis for the six months ended June 30, 2008:

	Other Investments	Derivative Liability
Balance as at January 1, 2008	\$ 592,593	\$ 16,346
Change in net unrealized gains/losses	(29,764)	7,444
Net purchases, sales, and distributions	114,860	-
Net transfers in (out of) of Level 3	-	-
Balance as at June 30, 2008	\$ 677,689	\$ 23,790
Change in net unrealized (losses) gains relating to financial instruments held at reporting date	\$ (29,764) ⁽¹⁾	\$ 7,444 ⁽²⁾

⁽¹⁾Included in net investment income

⁽²⁾Included in other insurance related (loss) income

Other Investments

Hedge funds, credit funds and equity tranches of CLOs are included within Level 3. The fair value for hedge funds and credit funds are based on the most recently published net asset value as advised by the external fund manager or third party administrator. For these funds we do not have full access to the underlying investment holdings to enable us to corroborate the fair value measurement used by the fund managers. However, we regularly review performance directly with the fund managers and perform qualitative analysis to corroborate the reasonableness of the published net asset values.

Observable equity tranche CLO trades in the secondary markets are infrequent, particularly given the dislocation in the current credit markets. Accordingly, because we were unable to corroborate non-binding quotes from brokers with observable market data, we continue to use a valuation model which includes inputs such as industry default rates, collateral spreads, and prepayments.

Derivative Liability

We classified our insurance derivative contract with longevity risk exposure within Level 3 as the inputs used in our valuation model include significant unobservable inputs. The most significant unobservable input used in this model is the margin that a market participant would require for insuring a \$400 million note collateralized by a portfolio of life settlements comprising less than 200 insured individuals. We exercised significant judgment in determining a fair value for this derivative instrument.

Table of Contents**AXIS CAPITAL HOLDINGS LIMITED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****5. RESERVE FOR LOSSES AND LOSS EXPENSES**

The following table shows a reconciliation of our beginning and ending gross unpaid losses and loss expenses for the periods indicated:

Six months ended June 30,	2008	2007
Gross unpaid losses and loss expenses at beginning of period	\$ 5,587,311	\$ 5,015,113
Less reinsurance recoverable balances at beginning of period	(1,356,893)	(1,359,154)
Net losses and loss expense reserves at beginning of period	4,230,418	3,655,959
Net incurred losses related to:		
Current year	908,253	914,305
Prior years	(174,855)	(162,784)
	733,398	751,521
Net paid losses related to:		
Current year	(57,385)	(36,771)
Prior years	(350,832)	(359,890)
	(408,217)	(396,661)
Foreign exchange loss	17,003	11,534
Net losses and loss expense reserves at end of period	4,572,602	4,022,353
Reinsurance recoverable balances at end of period	1,423,129	1,337,711
Gross unpaid losses and loss expenses at end of period	\$ 5,995,731	\$ 5,360,064

Net losses and loss expenses incurred includes net favorable prior period reserve development of \$175 million and \$163 million for the six months ended June 30, 2008 and 2007, respectively. Prior period development arises from changes to loss estimates recognized in the current year that relate to losses incurred in previous calendar years. The following table summarizes net favorable reserve development by segment:

Six months ended June 30,	2008	2007
Insurance	\$ 100,686	\$ 84,541
Reinsurance	74,169	78,243
Total	\$ 174,855	\$ 162,784

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

The first six months of 2008 included favorable development of \$60 million from the political risk line of business of our insurance segment, to recognize both the absence of reported losses on the sovereign and corporate credit products within the line and the lower likelihood of future reported losses emanating from our traditional political risk coverage from accident years 2004 and prior. We also refined the loss development profile on the sovereign and corporate credit portion of our book during the second quarter of 2008. Following an actuarial review, we began to use a more accelerated loss development profile.

The remaining net favorable development in both periods was predominately generated from our short tail insurance and reinsurance lines of business, and reflected the occurrence of fewer late reported claims than we originally anticipated in our reserving process. In addition to the many uncertainties inherent in our reserving process, the potential for deviation between expected and actual claims experience is often greater for a company like ours which relies more heavily upon industry based loss development profiles as a result of having a limited operating history. Given the inherent limitations of this, our estimate of ultimate losses in prior years have included a provision for reporting delays and other uncertainties specific to our business. This includes, for example, the inherent delays we expect to arise from obtaining loss information on high excess layers of business across our diverse worldwide exposures. Because late reporting has been less prevalent than we anticipated, our actual claims experience has been better than we projected.

Table of Contents**AXIS CAPITAL HOLDINGS LIMITED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****6. STOCK-BASED COMPENSATION****Stock Options**

The following is a summary of stock options outstanding and exercisable at June 30, 2008, and related activity for the six months ended:

	Number of Stock Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value*
Outstanding - January 1, 2008	4,810	\$ 18.46		
Granted	-	-		
Exercised	(1,631)	12.98		
Forfeited	-	-		
Outstanding - June 30, 2008	3,179	\$ 21.27	5.00 years	\$ 30,188

* The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value (the difference between our closing stock price on June 30, 2008, and the exercisable price, multiplied by the number of in-the-money-options) that would have been received by the stock option holders had all stock option holders exercised their stock options on June 30, 2008.

The total intrinsic value of stock options exercised during the first six months of 2008 and 2007 was \$34 million and \$4 million, respectively, and we received proceeds of \$21 million and \$6 million, respectively. At December 31, 2007, there was no remaining unrecognized compensation cost related to stock options and accordingly we incurred no related compensation costs during 2008.

The following table summarizes information about our stock options outstanding and exercisable at June 30, 2008:

Range of Exercise Prices	Number of Stock Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term
\$12.50 - \$13.75	930	\$ 12.61	3.55
\$13.76 - \$15.00	582	14.50	4.45
\$15.01 - \$16.25	29	16.25	5.00
\$16.26 - \$25.65	40	25.50	5.09
\$25.66 - \$29.62	1,598	28.77	6.05
Total	3,179	\$ 21.27	5.00

Restricted Stock

The following table provides a reconciliation of the beginning and ending balance of nonvested restricted stock for six months ended June 30, 2008:

	Number of Shares	Weighted Average Grant Date Fair Value
Non-vested restricted stock - January 1, 2008	3,312	\$ 31.44
Granted	2,665	37.45
Vested	(773)	29.81
Forfeited	(100)	34.03
Non-vested restricted stock - June 30, 2008	5,104	\$ 34.77

Table of Contents**AXIS CAPITAL HOLDINGS LIMITED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****6. STOCK-BASED COMPENSATION (CONTINUED)**

During the three months ended June 30, 2008, we granted 1,106,480 restricted shares to employees, including 1,000,000 shares with a grant date fair value of \$35.17 per share to our Chief Executive Officer (CEO) in connection with an amendment to his employment agreement. The grant made to our CEO will vest as follows: 500,000 shares on January 31, 2009; 166,667 shares on January 1, 2010; 166,667 shares on January 1, 2012; and 166,666 shares on January 1, 2013. We have elected the straight-line recognition method for awards subject to graded vesting based on a service condition.

For the three months ended June 30, 2008 and 2007, we incurred compensation costs of \$19 million and \$9 million, respectively, in respect of restricted stock, and recorded tax benefits thereon of \$3 million and \$2 million, respectively. For the first six months ended June 30, 2008 and 2007, we incurred compensation costs of \$29 million and \$16 million, respectively, in respect of restricted stock, and recorded tax benefits thereon of \$4 million and \$3 million, respectively. The compensation costs incurred in 2008 include \$2 million for modified grants and an additional charge for the acceleration of restricted shares vesting for certain employees that have reached retirement eligibility under our 2007 Plan.

The total fair value of shares vested during the three months ended June 30, 2008 and 2007, was \$7 million and negligible, respectively. At June 30, 2008 and December 31, 2007, there was \$121 million and \$47 million, respectively, of unrecognized compensation cost related to restricted stock awards, which is expected to be recognized over the weighted average period of 2.8 years.

During the first six months ended June 30, 2008 and 2007, we also realized additional tax benefits for certain vested restricted stocks and exercised stock options of \$1 million. These excess tax benefits are included in our cash flows from financing activities in the Consolidated Statements of Cash Flows.

7. EARNINGS PER COMMON SHARE

The following table sets forth the comparison of basic and diluted earnings per common share:

	Three months ended June 30,		Six months ended June 30,	
	2008	2007	2008	2007
Basic earnings per common share				
Net income available to common shareholders	\$ 231,267	\$ 251,590	\$ 468,989	\$ 479,168
Weighted average common shares outstanding	142,333	149,027	142,786	149,727
Basic earnings per common share	\$ 1.62	\$ 1.69	\$ 3.28	\$ 3.20
Diluted earnings per common share				
Net income available to common shareholders	\$ 231,267	\$ 251,590	\$ 468,989	\$ 479,168
Weighted average common shares outstanding	142,333	149,027	142,786	149,727
Share equivalents:				
Warrants	12,579	13,305	12,870	12,844
Restricted stock	1,496	1,505	1,511	1,265

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

Options	1,194	2,483	1,726	2,339
Weighted average common shares outstanding - diluted	157,602	166,320	158,893	166,175
Diluted earnings per common share	\$ 1.47	\$ 1.51	\$ 2.95	\$ 2.88

For the three and six months ended June 30, 2008, there were 911,537 and 891,175 restricted shares, respectively, which would have resulted in the issuance of common shares that were excluded in the computation of diluted earnings per share because the effect would be anti-dilutive. There were no such anti-dilutive restricted shares or options for the three or six months ended June 30, 2007.

AXIS CAPITAL HOLDINGS LIMITED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

8. COMMITMENTS AND CONTINGENCIES

a) Legal Proceedings

Except as noted below, we are not a party to any material legal proceedings. From time to time, we are subject to routine legal proceedings, including arbitrations, arising in the ordinary course of business. These legal proceedings generally relate to claims asserted by or against us in the ordinary course of insurance or reinsurance operations. In our opinion, the eventual outcome of these legal proceedings is not expected to have a material adverse effect on our financial condition or results of operations.

In 2005, a putative class action lawsuit was filed against our U.S. insurance subsidiaries. In re Insurance Brokerage Antitrust Litigation was filed on August 15, 2005 in the United States District Court for the District of New Jersey and includes as defendants numerous insurance brokers and insurance companies. The lawsuit alleges antitrust and Racketeer Influenced and Corrupt Organizations Act (RICO) violations in connection with the payment of contingent commissions and manipulation of insurance bids and seeks damages in an unspecified amount. On October 3, 2006, the District Court granted, in part, motions to dismiss filed by the defendants, and ordered plaintiffs to file supplemental pleadings setting forth sufficient facts to allege their antitrust and RICO claims. After plaintiffs filed their supplemental pleadings, defendants renewed their motions to dismiss. On April 15, 2007, the District Court dismissed without prejudice plaintiffs' complaint, as amended, and granted plaintiffs thirty (30) days to file another amended complaint and/or revised RICO Statement and Statements of Particularity. In May 2007, plaintiffs filed (i) a Second Consolidated Amended Commercial Class Action complaint, (ii) a Revised Particularized Statement Describing the Horizontal Conspiracies Alleged in the Second Consolidated Amended Commercial Class Action Complaint, and (iii) a Third Amended Commercial Insurance Plaintiffs' RICO Case Statement Pursuant to Local Rule 16.1(B)(4). On June 21, 2007, the defendants filed renewed motions to dismiss. On September 28, 2007, the District Court dismissed with prejudice plaintiffs' antitrust and RICO claims and declined to exercise supplemental jurisdiction over plaintiffs' remaining state law claims. Plaintiffs have appealed this decision to the United States Court of Appeals for the Third Circuit, where their appeal is currently pending. We believe that the lawsuit is completely without merit and we continue to vigorously defend the filed action.

b) Dividends for Common Shares and Preferred Shares

On May 9, 2008 the Board of Directors declared a dividend of \$0.185 per common share to shareholders of record at June 30, 2008 and payable on July 15, 2008. The Board of Directors also declared a dividend of \$0.453125 per Series A 7.25% Preferred Share and a dividend of \$1.875 per Series B 7.5% Preferred Share. The Series A Preferred Share dividend is payable on July 15, 2008, to shareholders of record at the close of business on June 30, 2008 and the Series B Preferred Share dividend is payable on September 2, 2008, to shareholders of record at the close of business on August 15, 2008.

c) Reinsurance Purchase Commitment

During the second quarter of 2008, we purchased reinsurance coverage for our insurance lines of business. The minimum reinsurance premiums are contractually due on a quarterly basis in advance. Accordingly at June 30, 2008, we have an outstanding reinsurance purchase commitment of \$141 million.

9. SHAREHOLDERS EQUITY

During the three and six months ended June 30, 2008, we repurchased in the open market 5,009,195 shares at an average price of \$34.96 per share, for a total cost of \$175 million. For the six months ended June 30, 2008, we repurchased 201,081 common shares from employees for \$8 million to satisfy withholding tax liabilities upon the vesting of restricted stock awards and the exercise of stock options. These share repurchases are held in treasury.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is a discussion and analysis of our financial condition and results of operations. This should be read in conjunction with the consolidated financial statements and related notes included in Item 1 of this report and also our Management's Discussion and Analysis of Results of Operations and Financial Condition contained in our Annual Report on Form 10-K for the year ended December 31, 2007. Tabular dollars are in thousands, except per share amounts. Amounts in tables may not reconcile due to rounding differences.

FINANCIAL MEASURES

We believe the following financial indicators are important in evaluating our performance and measuring the overall growth in value generated for our common shareholders:

Return on average common equity (ROACE): ROACE represents the level of net income available to common shareholders generated from the average of the opening and closing common shareholders' equity during the period. Our objective is to generate superior returns on capital that appropriately reward our common shareholders for the risks we assume and to grow revenue only when we deem the returns meet or exceed our requirements. ROACE was 19.2% and 19.9% for the three and six months ended June 30, 2008, respectively, compared to 24.1% and 23.6% for the same periods in 2007. The reduction in our ROACE ratios in 2008 was primarily related to a 16% increase in our average common shareholders' equity in both the three and six months ended June 30, 2008 versus the prior year periods. The increase in shareholders' equity was largely generated from additional retained earnings over the last year.

Diluted book value per common share: Diluted book value per common share represents total common shareholders' equity divided by the number of common shares and diluted common share equivalents outstanding, using the treasury stock method. We consider diluted book value per common share an appropriate measure of our returns to common shareholders, as we believe growth in our book value on a diluted basis ultimately translates into growth of our stock price. Diluted book value per share increased from \$28.79 at December 31, 2007 to \$30.30 at June 30, 2008. The increase was substantially due to earnings generated in the first six months of 2008.

Cash dividends per common share: Our dividend policy is an integral part of the value we create for our shareholders. Our quarterly cash dividend was \$0.185 per common share in the first two quarters of 2008 compared to \$0.165 in the first two quarters of 2007. Our Board of Directors reviews our dividend policy on a regular basis and in December 2007, they authorized a 12% increase in the quarterly dividend.

Table of Contents**RESULTS OF OPERATIONS OVERVIEW**

The table below breaks out net income into three components; underwriting income, investment income and net realized gains/losses, and other revenues and expenses. Underwriting income on a segment basis is a measure of underwriting profitability that takes into account net premiums earned and other insurance related income as revenue and net losses and loss expenses, acquisition costs and underwriting related general and administrative costs as expenses. Underwriting income is the difference between these revenue and expense items. Because our investment portfolio is managed on a total return basis, we have reviewed investment income and net realized gains/losses together. Other revenues and expenses represent corporate expenses, foreign exchange gains/losses, interest expense and income tax expense.

	Three months ended June 30,			Six months ended June 30,		
	2008	2007	Change	2008	2007	Change
Underwriting income:						
Insurance	\$ 50,963	\$ 98,428	(48%)	\$ 112,724	\$ 157,303	(28%)
Reinsurance	87,344	87,348	-	164,869	174,514	(6%)
Investment income and net realized gains/losses	138,567	109,029	27%	259,903	234,609	11%
Other revenues and expenses	(36,388)	(33,989)	7%	(50,069)	(68,828)	(27%)
Net income	240,486	260,816	(8%)	487,427	497,598	(2%)
Preferred share dividends	(9,219)	(9,226)	-	(18,438)	(18,430)	-
Net income available to common shareholders	\$ 231,267	\$ 251,590	(8%)	\$ 468,989	\$ 479,168	(2%)

Our results for the three and six months ended June 30, 2008, were impacted, by among other things, the following significant items:

Underwriting Results

Higher current accident year claims: our current accident year loss ratio increased 1.7 ratio points to 67.4% for the quarter and by 1.5 ratio points to 67.8% for the year to date. These increases were primarily due to the higher frequency and severity of large property losses within our insurance segment this year. The current year loss ratio in our reinsurance segment for the quarter and year to date was largely consistent with the prior year periods with catastrophe and other large losses impacting both years.

Prior year favorable reserve development: total net favorable development in the three and six months ended June 30, 2008 was \$87 million and \$175 million respectively, compared to \$97 million and \$163 million in the respective periods of 2007.

A declining premium base in both our underwriting segments: net premiums earned decreased by \$14 million, or 2%, in the quarter, and by \$40 million, or 3%, over the year to date. The reduction in net premiums earned, which impacted both our segments, largely related to a 7% reduction in net premiums written in the rolling twelve months to June 30, 2008 and 2007, respectively. The decrease in net premiums written is primarily associated with exposure reductions in many of our lines as a result of deteriorating market conditions, coupled with rate reductions on new and renewed business.

Higher general and administrative costs: including corporate expenses, our general and administrative costs increased \$14 million, or 2.3 ratio points, this quarter, and by \$31 million, or 2.6 ratio points, year to date. The increase in our general and administrative ratio was primarily due to a combination of lower net premiums earned, additional headcount and higher share-based compensation costs. The increase in share-based compensation costs was primarily driven by the renewed employment contract for our CEO and a higher grant date fair value on issued awards year over year (refer to Item 1, Note 6 to the Consolidated Financial Statements).

Overall, total underwriting income from our segments for the three and six months ended June 30, 2008 decreased 26% and 16%, respectively, over the same periods in 2007. For further discussion of our underwriting results, including segmental analysis, refer to *Underwriting Results* sections below.

Table of Contents**Investment Results**

Higher average fixed maturity balances: Our average fixed maturity balances in the three and six months ended June 30, 2008 increased 21% and 23%, respectively, over the comparative periods of 2007. This drove an increase in net investment income from our fixed maturities of \$16 million, or 18%, in the quarter, and \$45 million, or 27%, over the year to date.

Other investment income: Other investment income increased \$17 million in the quarter. Other investment income in the second quarter of 2007 included a loss of \$17 million on our life settlements investment. Other investment income quarter over quarter was otherwise largely comparable. Over the year to date, income from our other investments decreased \$44 million, largely emanating from a decline in the fair value of our credit related funds, and to a lesser extent, hedge funds, during the first quarter of 2008. These losses were related to technical imbalances and illiquidity proliferating throughout the credit markets resulting in a continued re-pricing of risk. During the second quarter of 2008, there was a recovery in overall prices, but this was not sufficient enough to fully recover the declines that occurred during the first quarter.

Reduction in interest income from cash and cash equivalents: Interest income from our cash and cash equivalent balances decreased \$13 million, or 55%, in the quarter and \$21 million, or 45%, over the year to date. These decreases reflect both a reduction in average U.S. dollar deposit rates and also a reduction in our average cash balances during 2008.

Increase in net realized investment gains: For the three and six months ended June 30, 2008, we experienced net realized investment gains of \$2 million and \$37 million, respectively, compared to a loss of \$5 million and \$4 million in the same periods last year. For further discussion and analysis of our investment results, refer to Investment Income section below.

Other Revenues and Expenses

Our other revenues and expenses were as follows:

	Three months ended June 30,			Six months ended June 30,		
	2008	Change	2007	2008	Change	2007
Corporate expenses	\$ 17,735	25%	\$ 14,184	\$ 31,296	18%	\$ 26,524
Foreign exchange losses (gains)	6,564	(195%)	(6,883)	(13,733)	48%	(9,274)
Interest expense	7,890	(44%)	14,169	15,848	(46%)	29,312
Income tax expense	4,199	(66%)	12,519	16,658	(25%)	22,266
Total	\$ 36,388	7%	\$ 33,989	\$ 50,069	(27%)	\$ 68,828

Corporate expenses: Our corporate expenses include holding company costs necessary to support our worldwide insurance and reinsurance operations and costs associated with operating as a publicly-traded company. As a percentage of net premiums earned corporate expenses were 2.6% and 2.3%, in the three and six months ended June 30, 2008, compared to 2.0% and 1.9%, in the same periods of 2007.

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

Foreign exchange gains: Some of our business is written in currencies other than U.S. dollars. The foreign exchange losses in second quarter of 2008 were primarily due to an increase and remeasurement of claims reserves denominated in Euro, and the remeasurement of net asset balances denominated in the Japanese Yen, following its depreciation against the U.S. dollar during this period. The foreign exchange gains in the first six months of 2008 were principally made on the remeasurement of net asset balances denominated in Euro, the Australian dollar and Swiss Franc, following substantial appreciation of these currencies against the U.S. dollar. The gains in the three months and six months ended June 30, 2007, were principally made on the remeasurement of net asset balances denominated in Sterling and Euro, following appreciation of these currencies against the U.S. dollar. Net asset balances referred to above exclude foreign currency denominated investments. Changes in remeasurements of foreign currency denominated investments are not included in the foreign exchange gains/ losses, but are reflected in changes in accumulated other comprehensive income/ loss.

Interest expense: Interest expense in the three and six months ended June, 30 2007 included interest costs of \$6 million and \$13 million on a \$400 million repurchase agreement we entered into in 2006 to finance a life settlements investment. We terminated the repurchase agreement in September 2007.

Table of Contents

Income tax expense: Income tax expense is generated primarily through our foreign operations in the United States and Europe. Our effective tax rate on net income, which we calculate as income tax expense divided by income before income tax, was 1.7% and 3.3% in the three and six months ended June 30, 2008 compared to 4.6% and 4.3% in the same periods of 2007. Our effective tax rate may vary between periods depending on the distribution of net income or losses among our various taxable jurisdictions. During the three and six months ended June 30, 2008, the portion of total income generated by our U.S. subsidiaries was lower than the comparative periods of 2007, which therefore reduced our effective tax rates.

Table of Contents

UNDERWRITING RESULTS - GROUP

UNDERWRITING REVENUES

Premiums Written: Gross and net premiums written, by segment, for the three and six months ended June 30, were as follows:

	Gross Premiums Written					
	Three months ended June 30,			Six months ended June 30,		
	2008	Change	2007	2008	Change	2007
Insurance	\$ 555,464	(9%)	\$ 612,671	\$ 990,321	(6%)	\$ 1,049,159
Reinsurance	318,705	(8%)	346,707	1,148,029	(5%)	1,212,842
Total	\$ 874,169	(9%)	\$ 959,378	\$ 2,138,350	(5%)	\$ 2,262,001

% ceded

Insurance	34.2%	0.6%	33.6%	35.6%	1.3%	34.3%
Reinsurance	0.0%	0.5%	(0.5%)	0.8%	0.2%	0.6%
Total	21.7%	0.4%	21.3%	16.9%	0.7%	16.2%

	Net Premiums Written					
	Three months ended June 30,			Six months ended June 30,		
	2008	Change	2007	2008	Change	2007
Insurance	\$ 365,511	(10%)	\$ 406,885	\$ 637,243	(8%)	\$ 688,931
Reinsurance	318,705	(9%)	348,457	1,138,748	(6%)	1,205,769
Total	\$ 684,216	(9%)	\$ 755,342	\$ 1,775,991	(6%)	\$ 1,894,700

The reduction in gross premiums written in the three and six months ended June 30, 2008 compared to the same periods of 2007 primarily reflects the impact of increasing competition across the insurance and reinsurance markets. This has led to deteriorating market rates and/or deteriorating market terms and conditions for new and renewal business, and we have therefore reduced our exposures accordingly. In addition, we have experienced a continued trend within our reinsurance segment for some cedants to purchase less reinsurance. We did find opportunity to grow certain parts of our portfolio during 2008. In our insurance segment, we wrote additional political risk and professional lines business in both the quarter and year to date. In our reinsurance segment, favorable rates and market growth allowed us to write additional excess of loss crop reinsurance business this quarter, while over the year to date we increased our market participation on engineering and credit and bond pro rata business.

The increase in our ceded premium ratios in 2008 reflects the purchase of additional quota share reinsurance coverage within our casualty and professional lines insurance business this year. This was partially offset by lower reinsurance costs within our property book this quarter. Our main property treaty renews in the second quarter and the reduced costs reflect rate reductions, increased retentions within certain parts of our book, and the impact of renewal timing this quarter versus the prior year quarter.

Premiums Earned: Net premiums earned by segment were as follows:

	Three months ended June 30,					Six months ended June 30,				
	2008		2007		Change	2008		2007		Change
Insurance	\$ 297,429	44%	\$ 298,245	43%	-	\$ 596,986	45%	\$ 613,177	44%	(3%)
Reinsurance	382,862	56%	395,696	57%	(3%)	741,939	55%	766,068	56%	(3%)
Total	\$ 680,291	100%	\$ 693,941	100%	(2%)	\$ 1,338,925	100%	\$ 1,379,245	100%	(3%)

Table of Contents

Changes in net premiums earned reflect period to period changes in net premiums written and business mix, together with normal variability in premium earning patterns. In our reinsurance segment, where a significant portion of our business is written in the first half of the year, the reduction in net premiums earned this year largely reflects the lower gross premiums written, as discussed above.

In our insurance segment, where premiums are written more evenly throughout the year, the reduction in year to date net premiums earned of 3% was driven by a 4% reduction in gross premiums written in the rolling twelve months to June 30, 2008 and 2007, respectively. In the quarter, the impact of this was largely offset by lower ceded premium amortized costs in our property line of business, which is discussed further in the insurance section below.

UNDERWRITING EXPENSES

The following table shows the components of our combined ratio:

	Three months ended June 30,			Six months ended June 30,		
	2008	Change	2007	2008	Change	2007
Loss ratio	54.6%	2.9%	51.7%	54.8%	0.3%	54.5%
Acquisition cost ratio	14.4%	0.6%	13.8%	14.3%	0.2%	14.1%
General and administrative expense ratio ⁽¹⁾	12.2%	2.3%	9.9%	12.1%	2.6%	9.5%
Combined ratio	81.2%	5.8%	75.4%	81.2%	3.1%	78.1%

(1) Our general and administration expense ratio includes corporate expenses not allocated to our underwriting segments of 2.6% and 2.3%, for the three and six months ended June 30, 2008, respectively, and 2.0% and 1.9% for the three and six months ended June 30, 2007, respectively. These costs are discussed further in Other Revenue and Expenses above.

Loss Ratio: The table below shows the components of our net loss and loss expense ratio (loss ratio):

	Three months ended June 30,			Six months ended June 30,		
	2008	Change	2007	2008	Change	2007
Current year	67.4%	1.7%	65.7%	67.8%	1.5%	66.3%
Prior period development	(12.8%)	1.2%	(14.0%)	(13.0%)	(1.2%)	(11.8%)
Loss ratio	54.6%	2.9%	51.7%	54.8%	0.3%	54.5%

Current Year:

The increase in our current year loss ratio in the three and six months ended June 30, 2008 compared to the prior year periods emanates from our insurance segment, where we experienced a higher frequency and severity of large property losses. The quarter and year to date current year loss ratios in our reinsurance segment were largely comparable with the prior year periods, with similar levels of catastrophe and other large losses impacting both years. Our expected loss ratios in 2008 were generally higher than those in 2007, primarily reflecting the impact of pricing deterioration in several of our lines of business, as discussed above. Partially offsetting this, our initial loss ratios were favorably impacted by the incorporation of more of our own historical loss experience, rather than industry benchmarks, relative to the prior year quarter.

Prior Year Reserve Development:

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

Prior period development was the net favorable result of several underlying reserve developments, identified during our quarterly reserving process. The following table provides a break down of prior period development by segment:

	Three months ended June 30,		Six months ended June 30,	
	2008	2007	2008	2007
Insurance	\$ 46,106	\$ 55,814	\$ 100,686	\$ 84,541
Reinsurance	40,638	41,006	74,169	78,243
Total	\$ 86,744	\$ 96,820	\$ 174,855	\$ 162,784

Table of Contents

The three and six months ended June 30, 2008 included favorable development from the political risk line of business of our insurance segment of \$26 million and \$60 million, respectively. The remaining net favorable development in both years was predominately generated from our short tail insurance and reinsurance lines of business, and reflected the occurrence of fewer late reported claims than we originally anticipated in our reserving process. During the first six months of 2008, there was no material development in our expected losses from our sub-prime related exposures from accident year 2007.

In addition to the many uncertainties inherent in our reserving process, the potential for deviation between expected and actual claims experience is often greater for a company like ours which relies more heavily upon industry based loss development profiles as a result of having a limited operating history. Given the inherent limitations of this, our estimate of ultimate losses in prior years have included a provision for reporting delays and other uncertainties specific to our business. This includes, for example, the inherent delays we expect to arise from obtaining loss information on high excess layers of business across our diverse worldwide exposures. Because late reporting has been less prevalent than we anticipated, our actual claims experience has been better than we projected.

As our company matures and we accumulate more loss experience, we expect that our loss profiles will become more credible, and our reserving assumptions will incorporate more of our own experience, as discussed above. Conditions and trends that affected the development of liabilities in the past may not necessarily occur in the future. Accordingly, it is inappropriate to anticipate future redundancies or deficiencies based on historical experience. Prior period reserve development is discussed in more detail in our segmental sections below.

Table of Contents**UNDERWRITING RESULTS BY SEGMENT****INSURANCE SEGMENT**

Results from our insurance segment were as follows:

	Three months ended June 30,			Six months ended June 30,		
	2008	Percentage Change	2007	2008	Percentage Change	2007
Revenues:						
Gross premiums written	\$ 555,464	(9%)	\$ 612,671	\$ 990,321	(6%)	\$ 1,049,159

Table of Contents

Insurance markets globally continued to be highly competitive during 2008 with surplus capacity and price deterioration remaining prevalent. Gross premiums written declined in most of our lines of business in 2008 reflecting declining rates for new and renewal business, as well as the non-renewal of business that did not meet our underwriting requirements. Partially offsetting this, new opportunities allowed us to grow the emerging market sovereign and corporate credit lines of our political risk book this year. Premiums on this line can vary considerably between periods depending on the timing of major transactions and pricing is not correlated to the property and casualty cycle. Gross premiums written also increased in our professional lines book in 2008, largely driven by the additional renewal rights we acquired in conjunction with our purchase of the Media Pro business at the end of the second quarter of 2007. During the second quarter of 2008 we also experienced some rate increases and new opportunities within our financial institutions business.

Ceded Premiums: Premiums ceded in the second quarter of 2008 were \$190 million, or 34.2% of gross premiums written, compared with \$206 million, or 33.6%, in the comparative period of 2007. For the first six months of 2008, premiums ceded were \$353 million, or 35.6% of gross premiums written, compared with \$360 million, or 34.3%, in the prior year period. The increase in our ceded premium ratios in 2008 reflects the purchase of additional quota share coverage within our casualty and professional lines business this year. This was partially offset by lower reinsurance costs within our property book this quarter. Our main property treaty renews in the second quarter and the reduced costs reflect rate reductions, increased retentions within certain parts of our book, and the impact of renewal timing this quarter versus the prior year quarter. Overall, we expect the ceded premium ratio in our insurance segment through the rest of 2008 to be broadly similar with the prior year.

Net Premiums Earned: The following table provides net premiums earned by line of business:

	Three months ended June 30,					Six months ended June 30,				
	2008		2007		Change	2008		2007		Change
Property	\$ 87,644	30%	\$ 77,745	26%	13%	\$ 163,748	28%	\$ 160,351	26%	2%
Marine	35,618	12%	37,469	13%	(5%)	80,165	13%	83,478	14%	(4%)
Terrorism	10,679	4%	14,735	5%	(28%)	22,533	4%	34,047	6%	(34%)
Aviation	15,255	5%	21,258	7%	(28%)	32,727	6%	47,177	8%	(31%)
Political risk	33,828	11%	29,874	10%	13%	67,062	11%	55,194	9%	22%
Professional lines	84,519	28%	81,854	27%	3%	166,736	28%	164,050	27%	2%
Liability	26,579	9%	26,476	9%	-	55,622	9%	51,922	7%	7%
Other	3,307	1%	8,834	3%	(63%)	8,393	1%	16,958	3%	(51%)
Total	\$ 297,429	100%	\$ 298,245	100%	-	\$ 596,986	100%	\$ 613,177	100%	(3%)

The 3% reduction in net premiums earned over the year to date was driven by a 4% reduction in gross premiums written in the rolling twelve months to June 30, 2008 and 2007, respectively. This downward trend was less marked in the second quarter of 2008, which benefited from additional net premiums earned from our property line of business. Although gross premiums written on this line decreased 11% in the rolling twelve months to June 30, 2008 and 2007, respectively, we benefited from lower ceded premium amortized costs this quarter, as discussed above. Overall, we expect net premiums earned to decrease throughout the remainder of 2008 compared to the prior year, given the level of pricing deterioration continuing to impact many of our lines.

Other Insurance Related Income / Loss: During the current quarter, we recorded a reduction in value of \$7 million relating to longevity risk exposure on our insurance derivative contract (refer to Item 1, Note 4(b) to the Consolidated Financial Statements).

Table of Contents**Insurance Losses**

Loss Ratio: The table below shows the components of our loss ratio:

	Three months ended June 30,			Six months ended June 30,		
	2008	Point Change	2007	2008	Point Change	2007
Current year	69.2%	5.7%	63.5%	70.3%	4.4%	65.9%
Prior period reserve development	(15.5%)	3.2%	(18.7%)	(16.8%)	(3.0%)	(13.8%)
Loss ratio	53.7%	8.9%	44.8%	53.5%	1.4%	52.1%

Current Year:

The increase in our current year loss ratio in the second quarter of 2008 compared to the same quarter in 2007 is primarily associated with a higher frequency and severity of large property losses. Large property losses this quarter were only partially within our expectations, and therefore our current year loss ratio increased over the prior year quarter.

The increase in our current accident year loss ratio for the first six months of 2008 compared to the same period in 2007 also reflects a higher frequency and severity of large property losses. In addition to the second quarter losses, 2008 also included estimated losses of \$25 million from mining losses in Australia and other worldwide property risk losses in the first quarter. This was partially offset by a lower level of large losses within our marine lines of business this year.

Our initial expected loss ratios in 2008 are generally higher than those in 2007, reflecting the impact of pricing deterioration in many of our lines of business, as discussed above. Offsetting this, our initial loss ratios were favorably impacted by the incorporation of more of our own historical loss experience, rather than industry benchmarks, relative to the prior year quarter.

Prior Period Reserve Development:

We experienced net favorable prior period reserve development of \$46 million and \$101 million in the three and six months ended June 30, 2008, respectively. Included in these amounts is favorable development from our political risk line of business of \$26 million, or 8.9 ratio points, for the second quarter, and \$60 million, or 10.0 ratio points, for the year to date. The favorable development for the quarter was primarily related to the sovereign and corporate credit portion of our political risk book. This was partially in recognition of an absence of reported losses from prior years and also due to a change in our loss development profiles. Following an actuarial review, we began to use a more accelerated loss development profile. Favorable development on our political risk book for the first six months of 2008 also included recognition of the lower likelihood of future reported losses emanating from our traditional political risk coverage from accident years 2004 and prior.

The balance of the favorable reserve development in 2008 has predominately been generated from our accident years 2006 and 2007 property lines of business, and has been in recognition of limited late reporting of losses as well as minimal deterioration on previously reported claims in these lines. The second quarter of 2008 included favorable reserve development of \$8 million, or 2.6 ratio points, from a reduction in an individual property per risk loss from accident year 2007.

The net favorable development of \$56 million and \$85 million in the three and six months ended June 30, 2007, was predominately generated from our accident year 2006 property lines of business, recognizing lower than expected emergence of claims on these lines. The second quarter of 2007 also included \$15 million, or 5.0 ratio points, of favorable development on our directors and officers liability business. This related to a specific claim, which we had previously made provision for, but removed following a favorable court ruling.

Table of Contents

Insurance Outlook

In our insurance segment, all of our lines of business are under pricing pressure with only one notable exception. We continue to see improvement in the financial institutions classes within our professional lines business. However, the balance of our professional lines business remains under pressure with rate decreases in the single digits. On most lines of business we are beginning to witness pressure on terms and conditions, including increased sub limits and lower deductibles, and we continue to maintain a cautious posture on those lines where this is most prevalent.

For property and energy business, although current rate levels are generally within our profitability targets, given the significant surplus of capacity within most of these lines, we expect to see further erosion of pricing during the year. Large account property rate decreases freely applied by the market continue to be in the range of 20-50%, although our own experience is generally within the lower end of this range given our declination of under-priced business. Despite recent market losses, there has been no noticeable impact on general levels of pricing in the market. In the mining and heavy industrial sectors where recent large losses have been concentrated, the market has put through price increases at renewal but at levels we do not consider adequate. Overall property account retention in our U.S. surplus lines insurance business has been impacted by extreme competition, particularly for the Californian Earthquake peril, and this has led us to declining business in an increasing number of cases. Exposure-adjusted offshore energy rate decreases are in the region of 20% for international business and 15% for Gulf of Mexico business. Our aviation and terrorism lines continue to be under significant pricing pressure and we expect to further reduce our participation on this business in 2008.

U.S. liability insurance business continues to see rate decline. Umbrella business has lagged primary casualty for some time in terms of the level of competition, but competition here has accelerated to the point where it has caught up with primary casualty. Our U.S. liability portfolio, which we believe is not representative of the overall market, because we write this account very selectively, is seeing rate decline by about 10%. We believe our areas of focus in both our liability and professional lines business still contain good profit potential, but risk selection and overall execution strategy have become more critical.

Table of Contents**REINSURANCE SEGMENT****Overview**

⁽¹⁾Foreign exchange

In general, the reinsurance markets continued to be increasingly competitive during the second quarter of 2008, with softening rates and/or deteriorating terms and conditions impacting several of our business lines. In addition, we have experienced a continued trend among some of our cedants to increase their retentions and/or purchase less reinsurance compared to 2007. In the second quarter of 2008, these conditions primarily impacted our catastrophe and professional lines business, where exposure reductions were the main driver for the premium decreases.

Table of Contents

These premium reductions were partially offset by additional excess of loss crop business (included in other premium), where pricing improved during the quarter. In addition, our property and motor lines of business benefited from positive premium adjustments to prior year proportional and excess of loss contracts. In the second quarter of 2008, we recorded positive premium adjustments of \$10 million and \$9 million on our property and motor lines of business, respectively, compared to \$5 million and \$5 million, respectively, in the second quarter of 2007.

Six months ended June 30,	2008		2007		Change	Excluding FX ⁽¹⁾ Impact
	\$	%	\$	%		
Catastrophe	\$ 330,254	29%	\$ 386,727	32%	(15%)	(18%)
Property	227,824	20%	225,976	19%	1%	(4%)
Professional Lines	119,182	10%	147,486	12%	(19%)	(19%)
Credit and bond	143,804	13%	112,908	9%	27%	18%
Motor	92,357	8%	90,211	7%	2%	(6%)
Liability	137,676	12%	176,902	15%	(22%)	(23%)
Engineering	61,119	5%	47,962	4%	27%	23%
Other	35,813	3%	24,670	2%	45%	39%
Total	\$ 1,148,029	100%	\$ 1,212,842	100%	(5%)	(9%)

⁽¹⁾Foreign exchange

Gross premiums written in our reinsurance segment in the six months ended June 30, 2008 benefited from a weakened U.S. dollar, most significantly against the Euro, relative to the same period in 2007. The impact of foreign exchange rate movements is highlighted in the table above. Gross premiums written otherwise decreased 9% this year, reflecting exposure reductions, and to a lesser extent, rate deterioration across several of our lines. In addition, our professional lines business was negatively impacted by premium adjustments to prior year proportional and excess of loss contracts. In the first six months of 2008, we recorded negative premium adjustments in our professional lines business of \$14 million, compared to positive adjustments of \$11 million in the same period of 2007.

These premium reductions were partially offset by growth within our crop, engineering and credit and property pro rata lines of business, where margins were generally more favorable. Our property line of business benefited from the renewal of a significant 16-month pro rata contract in the first quarter of 2008, previously renewed in the fourth quarter of 2006.

Net Premiums Earned: The following table shows net premiums earned by line of business:

	Three months ended June 30,			Six months ended June 30,		
	2008	2007	Change	2008	2007	Change
Catastrophe	\$ 108,747	\$ 119,231	(9%)	\$ 214,158	\$ 233,785	(8%)
Property	81,341	89,246	(9%)	152,700	170,785	(11%)
Professional Lines	54,172	63,127	(14%)	109,100	127,262	(14%)

Other	14,515	7,605	91%	21,010	14,640	44%
Total	\$ 382,862	\$ 395,696	(3%)	\$ 741,939	\$ 766,068	(3%)

Table of Contents

The reductions in net premiums earned in the three and six months ended June 30, 2008 compared to the comparative periods of 2007 is driven by a 5% reduction in year to date gross premiums written. This was partially offset by growth of our liability business over the last few years, which given the large level of pro rata business on this line, had a positive impact on our net premiums earned this year. The reduction in net premiums earned on our property lines of business during 2008 reflects a 21% reduction in gross premiums written on this line over the rolling twelve months to June 30, 2008 and 2007, respectively, offset partially by higher positive premium adjustments to prior year business this year. We expect our total net premiums earned in our reinsurance segment to continue to decline through the remainder of 2008, given the prevailing unfavorable market conditions impacting many of our lines.

Reinsurance Losses

Loss Ratio: The following table shows the components of our loss ratio:

	Three months ended June 30,			Six months ended June 30,		
	2008	Point Change	2007	2008	Point Change	2007
Current year	66.0%	(1.3%)	67.3%	65.8%	(0.8%)	66.6%
Prior period reserve development	(10.6%)	(0.2%)	(10.4%)	(10.0%)	0.2%	(10.2%)
Loss ratio	55.4%	(1.5%)	56.9%	55.8%	(0.6%)	56.4%

Current Year:

Our current year loss ratio for the second quarter of 2008 was largely consistent with the same quarter in 2007, with large losses impacting both periods. The second quarter of 2008 includes estimated losses of \$19 million, or 5.0 ratio points, from several named U.S. catastrophes, generated from our regional mid-west treaty business. Our results for the quarter also included estimated losses from an earthquake in China and other world property per risk losses. In comparison, the second quarter of 2007 included losses of \$47 million, or 11.9 ratio points, associated with flooding and storms in Australia and the U.K.

Our current year loss ratio for the first six months of 2008 was also comparable with the same period in 2007. In addition to the second quarter losses discussed above, 2008 also included an estimated \$21 million of estimated losses related to several large property per risk and catastrophe losses in the first quarter. Our results for the first six months of 2007 included large losses of \$76 million, including losses incurred of \$29 million on Windstorm Kyrill in the first quarter.

Our initial expected loss ratios in 2008 were generally higher than those in 2007, reflecting the impact of pricing deterioration in many of our lines of business, as discussed above. In addition, we increased the expected loss ratios on our credit and bond and motor lines of business to reflect our outlook on current market conditions. Offsetting this, our initial loss ratios were favorably impacted by the incorporation of more of our own historical loss experience, rather than industry benchmarks, relative to the prior year quarter.

Prior Period Reserve Development:

We experienced net favorable prior period reserve development of \$41 million and \$74 million in the three and six months ended June 30, 2008, respectively. The favorable reserve development in 2008 has principally emanated from our accident year 2007 and 2006 property and catastrophe lines of business, in recognition of lower-than-expected claims emergence on these lines. The second quarter of 2008 also included \$12 million, or 3.1 ratio points, of favorable development from accident year 2005, which included a reported reserve reduction on a large property catastrophe claim. The second quarter of 2008 also included adverse development on our accident year 2007 credit pro rata business of \$4 million, or 1.1 ratio points, relating to our outlook on current market conditions.

The net favorable development of \$41 million and \$78 million in the three and six months ended June 30, 2007, was predominately generated from our accident year 2006 property and catastrophe lines of business and was due to better than expected emergence of claims identified as part of our regular quarterly reserving process. This includes the fact that our exposure to certain events was less than we had originally estimated as resultant claims did not reach the attachment points for potentially impacted treaties.

Table of Contents

Reinsurance Outlook

Although reinsurance markets remain relatively disciplined compared to the primary markets, we continue to observe increased competition and rate deterioration across most of our lines. The balance of our reinsurance writing in 2008 will largely emanate from our U.S. property, catastrophe, professional lines and casualty lines given the main renewal date for our other lines was January 1. On the non-proportional property and catastrophe front, although we observed rate reductions on our July 1 renewals in the region of 5-15%, slightly higher than earlier in the year, critically, we did not experience any significant erosion to major terms and conditions.

We continue to experience significant pressure within our U.S. liability business, largely emanating from the continuing trend among certain cedants to retain more of their own business, as well as rate reductions in the region of 10%. Within our professional lines reinsurance business, although we are beginning to experience deteriorating terms and conditions in certain parts of the book, we are also identifying new opportunities, particularly in our financial institutions and commercial directors and officers lines, which we believe will perform well.

Table of Contents**NET INVESTMENT INCOME AND NET REALIZED INVESTMENT GAINS/LOSSES**

Our investment portfolio is structured to preserve capital and provide us with a high level of liquidity. Additionally, we invest our portfolio with a focus on total return rather than establishing yield or income targets. The following table provides a breakdown of net investment income, net realized investment gains/losses and average investment balances:

	Three months ended June 30,			Six months ended June 30,

nm- not meaningful

(1) The average investment balances are calculated by taking the average of the month-end balances during the quarter and six month periods.

Net Investment Income:***Fixed Maturities:***

The increase in investment income from our fixed maturities in the quarter and year to date reflects the impact of positive operating cash flows on our average investment balances over the last year. Our annualized effective yield on fixed maturities was 4.8% and 4.9% for the three and six months ended June 30, 2008 respectively, comparable with a 5.0% yield in both the three and six months ended June 30, 2007.

Cash and Cash Equivalents:

The reduction in investment income from our cash and cash equivalents in the quarter and year to date reflects a substantial reduction in average U.S. dollar deposit rates, coupled with lower average cash balances this year. The reduction in our cash balances is largely associated with the strategic funding of our fixed income and equity portfolios, as well as funding of share repurchases over the last year.

Table of Contents*Other Investments:*

Net investment income from other investments by category was as follows:

	Three months ended June 30,			Six months ended June 30,		
	2008	2007	Change	2008	2007	Change
Hedge funds	\$ 8,237	\$ 9,915	\$ (1,678)	\$ (4,468)	\$ 19,912	\$ (24,380)
Credit funds	4,757	6,105	(1,348)	(24,677)	14,137	(38,814)
CLO- equity tranches	5,995	3,186	2,809	12,332	12,373	(41)
Short duration high yield fund	894	559	335	902	2,113	(1,211)
Life settlement contracts	-	(16,407)	16,407	-	(19,865)	19,865
Total	\$ 19,883	\$ 3,358	\$ 16,525	\$ (15,911)	\$ 28,670	\$ (44,581)

In general, the performance of our other investment portfolio during 2008 has been negatively impacted by illiquidity and volatility in the markets resulting in generally depressed prices across most sectors. During the second quarter of 2008, there was a recovery in overall prices but not sufficient to recover the losses incurred during the first quarter of the year. Our hedge funds have significant exposure to equity strategies with net long positions that were impacted by the negative returns in this sector over the year to date. The performance of our credit funds resulted from the significant declines in market prices of the securities that form the collateral of these funds. This was related to the ongoing technical imbalances and illiquidity proliferating throughout the credit markets rather than from a fundamental deterioration of the underlying collateral. The \$17 million loss on our life settlements investment in the second quarter of 2007 was related to the negative mark-to-market impact of rising interest rates on the fair value of our investment.

Equities:

During 2008, we began funding an allocation to global equities. In addition, we purchased non-redeemable preferred stocks. The income for the period represents dividends received, net of applicable withholding taxes.

Net Realized Investment Gains/Losses:

Our investment strategy is to take a long-term view by actively managing our investment portfolio to maximize total return (see below) within specific guidelines, designed to minimize risk. Our fixed maturities and equity portfolios are considered available for sale and reported at fair value. The effect of market movements on our available for sale investment portfolio impacts net income (through net realized gains/losses) when securities are sold or when other than temporary impairments are recorded on invested assets. Additionally, net income is impacted (through net realized gains/losses) by changes in the fair value of investment derivatives, mainly forward contracts. Changes in unrealized appreciation and depreciation on available for sale securities, which result from the revaluation of securities held, are reported as a separate component of accumulated other comprehensive income in shareholders' equity.

The following table provides a breakdown of our net realized investment gains/losses:

	Three months ended June 30,			Six months ended June 30,		
	2008	2007	Change	2008	2007	Change
On sale of fixed maturities	\$ 2,111	\$ (4,831)	\$ 6,942	\$ 53,729	\$ (2,948)	\$ 56,677
Other than temporary impairments	(645)	(336)	(309)	(16,141)	(1,837)	(14,304)
Change in fair value of investment derivatives	86	511	(425)	(351)	429	(780)
Net realized investment gains/(losses)	\$ 1,552	\$ (4,656)	\$ 6,208	\$ 37,237	\$ (4,356)	\$ 41,593

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

Net realized gains on the sale of fixed maturities during the first six months of 2008 of \$54 million largely reflect the repositioning of our high grade fixed income portfolio during the first quarter in order to take advantage of dislocations in certain sectors of the fixed income markets. As a result of this repositioning there was considerably less portfolio turnover during the second quarter of 2008. The other than temporary impairment charge in the first six months of 2008 related to the write down of 26 securities, some of which were downgraded or placed on negative watch by rating agencies.

Table of Contents**Total Return:**

The following table provides a breakdown of our total return:

	Three months ended June 30,		Six months ended June 30,	
	2008	2007	2008	2007
Net investment income	\$ 137,015	\$ 113,685	\$ 222,666	\$ 238,965
Net realized investments gains (losses)	1,552	(4,656)	37,237	(4,356)
Change in unrealized losses	(151,279)	(85,866)	(179,427)	(63,153)
Total	\$ (12,712)	\$ 23,163	\$ 80,476	\$ 171,456
Average cash and investments	\$ 10,815,369	\$ 10,082,229	\$ 10,703,958	\$ 9,948,653
Total return on average cash and investments	(0.12%)	0.23%	0.75%	1.72%

Our portfolio is managed to maximize total return within certain guidelines and constraints. In assessing returns under this approach, we include net investment income, net realized investment gains and losses and the change in unrealized gains and losses generated by our investment portfolio. The decrease in our total return for the quarter primarily reflects the increase in yields that occurred in the second quarter of 2008 which increased unrealized losses within our fixed maturity portfolio. Additionally, there were net unrealized losses of \$21 million on our equity portfolio this quarter which generally reflected a decrease in prices across equity markets. These unrealized losses coupled with losses from our credit and hedge funds in the first quarter, drove the reduction in our six-month total return compared to last year. This was partially offset by higher net realized investments gains this year, as discussed above.

Table of Contents**CASH AND INVESTMENTS**

At June 30, 2008 and December 31, 2007, total cash and investments, including accrued interest receivable and net payable for investments purchased were \$10.8 billion and \$10.5 billion, respectively. Our investment strategy seeks to preserve principal and maintain liquidity while trying to maximize investment return through a high quality, diversified portfolio. In this regard, at June 30, 2008 and December 31, 2007, our investment portfolio consisted primarily of fixed maturity investments and cash and cash equivalents. The composition of our investment portfolio is summarized as follows:

	June 30, 2008		December 31, 2007	
U.S. government and agency	\$ 1,219,257	11%	\$ 1,058,926	10%
Non U.S. government	262,608	2%	280,577	3%
Corporate debt	2,345,783	22%	2,149,666	21%
Mortgage-backed	3,698,986	34%	3,482,215	33%
Asset-backed	447,634	4%	532,780	5%
Municipals	729,078	7%	827,502	8%
Total Fixed Maturities	8,703,346	80%	8,331,666	80%
Total Equities	247,845	2%	7,746	0%
Cash at investment managers, net of unsettled trades	322,643	3%	572,897	5%
Total Invested Assets	9,273,834	85%	8,912,309	85%
Other cash and cash equivalents	734,513	7%	846,380	8%
Total Cash, Fixed Maturities and Equities	\$ 10,008,347	92%	\$ 9,758,689	93%
Other investments	724,239	7%	638,241	6%
Accrued interest receivable	89,261	1%	87,338	1%
Total Cash and Investments	\$ 10,821,847	100%	\$ 10,484,268	100%

Fixed Maturities:

At June 30, 2008 and December 31, 2007, 79.2% and 78.6%, respectively, of our fixed maturities were rated AA- or better, with an overall weighted average rating of AA+, based on ratings assigned by Standard & Poor's. At June 30, 2008 and December 31, 2007, we did not have an aggregate exposure to any single issuer of 10% or more of shareholders' equity, other than in respect to U.S. government and agency securities.

At June 30, 2008 and December 31, 2007, our invested assets had an approximate average duration of 2.9 years and 2.7 years, respectively. When incorporating our other cash and cash equivalents into this calculation, the average duration at June 30, 2008 and December 31, 2007, is reduced to 2.7 years and 2.5 years, respectively.

Table of Contents

The amortized cost and fair values of our fixed maturities were as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
At June 30, 2008				
U.S. government and agency	\$ 1,217,753	\$ 10,779	\$ (9,275)	\$ 1,219,257
Non-U.S. government	251,790	14,286	(3,468)	262,608
Corporate debt	2,430,469	27,311	(111,997)	2,345,783
Mortgage-backed	3,750,263	14,925	(66,202)	3,698,986
Asset-backed	455,750	2,159	(10,275)	447,634
Municipals	728,989	2,587	(2,498)	729,078
Total fixed maturities	\$ 8,835,014	\$ 72,047	\$ (203,715)	\$ 8,703,346

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
At December 31, 2007				
U.S. government and agency	\$ 1,032,441	\$ 26,672	\$ (187)	\$ 1,058,926
Non-U.S. government	264,109	20,712	(4,244)	280,577
Corporate debt	2,174,333	36,020	(60,687)	2,149,666
Mortgage-backed	3,467,573	29,946	(15,304)	3,482,215
Asset-backed	539,125	1,800	(8,145)	532,780
Municipals	823,947	3,792	(237)	827,502
Total fixed maturities	\$ 8,301,528	\$ 118,942	\$ (88,804)	\$ 8,331,666

The change in net unrealized losses in the first six months of 2008 was primarily related to our corporate and mortgage-backed securities, following a widening of credit spreads in this sector during the first half of the year.

The following table summarizes the fair value of our asset-backed securities (ABS) by rating and class at June 30, 2008:

	AAA	AA	A	BBB	BB	Total
Auto	\$ 174,184	\$ 13,234	\$ -	\$ 612	\$ -	\$ 188,030
Credit card	92,442	-	-	-	-	92,442
CLO ^(a)	-	-	36,784	18,348	-	55,132
Home equity	39,912	944	-	1,152	4,138	46,146
CDO ^(b)	8,565	411	459	186	-	9,621
Equipment	8,024	-	-	-	-	8,024
Other	48,239	-	-	-	-	48,239
Total	\$ 371,366	\$ 14,589	\$ 37,243	\$ 20,298	\$ 4,138	\$ 447,634

(a) Collateralized loan obligation debt tranche securities

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

(b) Collateralized debt obligation

At June 30, 2008 and December 31, 2007, we held ABS of \$448 million and \$533 million, respectively. At June 30, 2008, 83% of our ABS had a credit rating of AAA. Approximately 42% of our ABS were related to the auto loans, with the remainder of our portfolio diversified across economic sectors and geographical areas.

Table of Contents

The following tables summarize the fair value of our mortgage-backed securities (MBS) by rating and class at June 30, 2008:

	Agency ^(a)	AAA	AA	A	BBB	Total
Residential	\$ 2,239,631	\$ 469,197	\$ 3,813	\$	\$ 2,397	\$ 2,715,038
Commercial	16,622	946,952	11,799	8,575		983,948
Total	\$ 2,256,253	\$ 1,416,149	\$ 15,612	\$ 8,575	\$ 2,397	\$ 3,698,986

(a) These represent securities backed by U.S. Government sponsored agencies.

At June 30, 2008 and December 31, 2007, we held MBS of \$3,699 million and \$3,482 million, respectively. At June 30, 2008, \$2,256 million of these securities, or the loans backing such securities, contain guarantees by the U.S. Government or a government-sponsored enterprise. Of the remaining securities held at June 30, 2008, 38% had a credit rating of AAA. Our mortgage-backed portfolio is supported by loans that are diversified across economic sectors and geographical areas.

Equity Securities:

During 2008 we began funding an allocation to global equities. At June 30, 2008 we held \$130 million and \$118 million of common and non-redeemable preferred stocks respectively. At June 30, 2008 there were net unrealized losses of \$21 million on our equity portfolio that were largely consistent with the decline in global markets in that period.

Other Investments:

The composition of our other investment portfolio is summarized as follows:

	June 30, 2008		December 31, 2007	
Hedge funds	\$ 338,675	47%	\$ 277,757	44%
Credit funds	224,443	31%	194,241	30%
CLO - equity tranches	114,570	16%	120,596	19%
Short duration high yield fund	46,551	6%	45,647	7%
Total other investments	\$ 724,239	100%	\$ 638,241	100%

The increase in our hedge funds and credit funds in the first six months of 2008 reflect net subscriptions of \$65 million and \$56 million respectively, partially offset by the negative performance of these funds during the period. Refer to *Net Investment Income and Net Realized Investment Gains* above.

Impact of Credit market movements:

Beginning in 2007, increasing delinquencies in the U.S. sub-prime residential mortgage collateral triggered increased volatility and decreased liquidity across financial markets as a whole, particularly in the area of structured credit assets. We define sub-prime related risk as any security that is backed by or contains sub-prime collateral even if that sub-prime component is incidental. We do not invest directly in sub-prime loans nor do we have any direct sub-prime investment commitments. Our exposure to the sub-prime sector is within our fixed maturity portfolio as part of the collateral in our MBS and ABS. We also have exposure to Alternative-A mortgages which are considered to present more risk than prime but less risk than sub-prime.

Table of Contents

The following tables summarize our holdings with exposure to these investment types at June 30, 2008 and December 31, 2007, including net realized investment losses and impairments recorded in the second quarter of 2008 and year ended December 31, 2007, respectively:

At June 30, 2008	Holdings at Fair Value	% of Total Shareholders Equity	Net Unrealized Gain/(Loss)	Realized Losses and Impairments
Sub-prime Agency MBS	\$ 5,581	0.10%	\$ (27)	\$ -
Sub-prime Non-Agency MBS	555	0.01%	(11)	-
Sub-prime ABS	39,344	0.75%	(6,078)	(3,704)
Total Sub-prime	\$ 45,480	0.86%	\$ (6,116)	\$ (3,704)
Alternative-A Agency MBS	\$ 504	0.01%	\$ (17)	\$ -
Alternative-A Non-Agency MBS	152,263	2.89%	(8,363)	-
Alternative-A ABS	7,933	0.15%	(1,216)	-
Total Alternative-A	\$ 160,700	3.05%	\$ (9,596)	\$ -
Total Sub-prime and Alternative-A	\$ 206,180	3.91%	\$ (15,712)	\$ (3,704)

At December 31, 2007	Holdings at Fair Value	% of Total Shareholders Equity	Net Unrealized Gain/(Loss)	Realized Losses and Impairments
Sub-prime Agency MBS	\$ 26,398	0.51%	\$ 38	\$ -
Sub-prime Non-Agency MBS	1,892	0.04%	(26)	-
Sub-prime ABS	47,874	0.93%	(3,456)	(427)
Total Sub-prime	76,164	1.48%	(3,444)	(427)
Alternative-A Agency MBS	604	0.01%	1	-
Alternative-A Non-Agency MBS	127,845	2.48%	56	(730)
Alternative-A ABS	6,611	0.13%	(283)	-
Total Alternative-A	135,060	2.62%	(226)	(730)
Total Sub-prime and Alternative-A	\$ 211,224	4.10%	\$ (3,670)	\$ (1,157)

Our total sub-prime and Alternative-A portfolio at June 30, 2008 is relatively unchanged from December 31, 2007. There was, however, a significant pay down of principal on the Agency Sub-prime securities. As a result of the deterioration of valuations during 2008 we recognized an impairment charge of \$4 million this year, relating to one security that was downgraded. At June 30, 2008, 95% of our investment in this sector were rated Agency or AAA (December 31, 2007: 98%). The duration and weighted average life of our sub-prime investments at June 30, 2008 was 1.02 years and 2.19 years, respectively, compared to 1.61 years and 2.39 years, respectively at December 31, 2007. At June 30, 2008, 62% of our sub-prime securities originated in 2006 and 2007, compared to 73% at December 31, 2007. At June 30, 2008, 22% of our Alternative-A securities originated in 2006 and 2007, compared to 12% at December 31, 2007.

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

With respect to the rest of our investment portfolio, our exposure to credit risk is broadly diversified by industry, concentration and geography through our investments in high grade fixed maturities and our other investments. As discussed above, the credit and hedge funds, within our other investment portfolio, have experienced increased volatility during 2008, in line with the financial markets. All securities, including those with sub-prime exposure, are reviewed as part of our ongoing other-than-temporary-impairment monitoring process. We continue to monitor our exposures, and to the extent market disruptions continue, our financial position may be negatively impacted.

Table of Contents

Fair Value Measurements

On January 1, 2008, we adopted FAS 157, Fair Value Measurements (FAS 157), which defines fair value as the price that would be received to sell an asset or paid to transfer a liability (i.e. the exit price) in an orderly transaction between market participants at the measurement date. Refer to Note 1 of our Consolidated Financial Statements for a further discussion on this new standard.

The following is a summary of valuation techniques or models we used to measure fair value by asset and liability classes, which have not changed significantly since December 31, 2007.

Fixed Maturities

The fair value measurements for our fixed maturities are all based on observable market data and accordingly we have classified these securities within Level 2 of the fair value hierarchy.

The investment accounting services for our fixed maturity portfolios are outsourced to a third party. Through this third party, we receive prices from nationally recognized independent pricing services (including Lehman Index, Reuters Pricing Service, FT Interactive Data and others) to estimate fair value measurements for our fixed maturity investments.

When available, the pricing services use market quotations for securities that have quoted prices in active markets. When quoted market prices are unavailable, the pricing services will only produce an estimate of fair value if there is objectively verifiable information to produce a valuation. The observable inputs used in their valuation assessment include: reported trades, benchmark yields, broker/dealer quotes, issuer spreads, two-side markets, benchmark securities, bids, offers, reference data, and industry and economic events. For securities whose inputs are based on bid-ask prices, the bid price is generally used for estimating fair values. Additionally, the pricing services use an option adjusted spread model to develop prepayment and interest rate scenarios, a model commonly used to estimate fair value for mortgage-backed and asset-backed securities. Where prices are unavailable from pricing services, we obtain quotes directly from broker-dealers for estimating fair values.

As management is ultimately responsible for determining the fair value measurements for all securities, we validate prices received by comparing the fair value estimates to our knowledge of the current market and will challenge any prices deemed not to be representative of fair value. Our review process includes, but is not limited to: (i) a review of the third party models for the highest risk securities within our portfolio; (ii) quantitative analysis and attribution analysis; and (iii) select randomly purchased or sold securities and compare the executed prices to the fair value estimates from the pricing service.

Further, on a quarterly basis, we evaluate whether the fair value of a fixed maturity security is other-than-temporarily impaired when its fair value is below amortized cost. To make this assessment we consider several factors including (i) the time period during which there has been a decline below cost, (ii) the extent of the decline below cost, (iii) our intent and ability to hold the security, (iv) the potential for the security to recover in value, (v) an analysis of the financial condition of the issuer, and (vi) an analysis of the collateral structure and credit support of the security, if applicable. If we conclude a security is other-than-temporarily impaired, we write down the amortized cost of the security to fair value, with a charge to net realized investment gains (losses) in the Consolidated Statement of Operations. During the first six months ended June 30, 2008 and 2007, we recorded a total other-than-temporary impairment charge of \$16 million and \$2 million, respectively.

Equity Securities

The fair values for equity securities are based on closing exchange prices from independent pricing sources and accordingly we have classified all the equity securities within Level 1.

Table of Contents

Other Investments

For hedge and credit funds, we measure fair value by obtaining the most recently published net asset value as advised by the external fund manager or third party administrator, which involves limited management judgment. The financial statements of each fund generally are audited annually, using fair value measurement for the underlying investments. In addition to reviewing these audited financial statements, we regularly review fund performance directly with the fund managers and perform qualitative analysis to corroborate the reasonableness of the published net asset values. Certain of these funds have lock-up and other redemption provisions which limit our ability to liquidate these funds in the short term. As these provisions are common in the investment industry, we do not believe a market participant would apply a significant discount, if any, to the published net asset value and accordingly we have not reflected such adjustment in the fair value of the above funds. We have classified the hedge and credit funds as Level 3 within the fair value hierarchy as for most of these funds we do not have full access to the underlying investment holdings to enable us to corroborate the fair value measurement used by the fund managers. For the three and six months ended June 30, 2008, we earned \$13 million and incurred a \$30 million loss, respectively, in fair value on these funds due to market conditions as previously noted. This unrealized gain and loss were included in our net investment income.

For collateralized loan obligation securities (CLOs), we invest in both the debt and equity tranches. The debt tranches are included in our fixed maturity portfolio (refer to the ABS tabular disclosure above); whereas the equity tranches are reported under other investments in our Consolidated Balance Sheets. For the latter, the initial purchase price is amortized, on a straight-line basis, over the expected life of the equity tranche CLO investment with interest income being recognized using the effective yield method. The effective yield method is calculated using market assumptions such as industry default and recovery rates, collateral spreads, and prepayments. At the end of each reporting period, we review the performance of the overall CLO structure and make an adjustment to the carrying value if it does not reflect a reasonable estimate of fair value. In conjunction with this review, we also evaluate whether the estimated fair value of the CLO is other-than-temporarily impaired when its fair value is below amortized cost.

Due to the current technical imbalances and illiquidity proliferating through the credit markets, observable CLO trades in the secondary markets are infrequent. These market conditions have increased the reliance on management judgments in determining the estimated fair value of these equity tranche CLOs. The most significant market assumption used in estimating fair value for this investment type is the default rate. As the current default experience in the underlying loans has not changed significantly, there was no significant change in our estimated fair value of these CLOs at June 30, 2008, from December 31, 2007. Due to the significant management judgment in establishing this fair value, we have classified the equity tranche CLOs as Level 3.

We also have one open-end short-duration high yield fund with daily liquidity that is measured using a published net asset value. For this fund, we have classified it as Level 2.

Derivative Instruments

The foreign currency forward contracts and options we use to economically hedge currency risk are characterized as over-the-counter (OTC) due to their customized nature, and the fact that they do not trade on a major exchange. These instruments are valued using market transactions and other market evidence whenever possible, including market-based inputs to models. Forward contracts trade in a very deep and liquid market, providing substantial price transparency, while our vanilla currency options are priced using a Black-Scholes option-pricing model. This model is a widely-accepted pricing source, and requires the use of transparent market inputs to calculate values, involving minimal management judgment. Accordingly, we have classified these derivatives as Level 2.

We classified our insurance derivative contract with longevity risk exposure within Level 3 as the inputs used in our valuation model include significant unobservable inputs. The most significant unobservable input used in this model is the margin that a market participant would require for insuring a \$400 million note collateralized by a portfolio of life settlements comprising less than 200 insured individuals. We exercised significant judgment in determining a fair value for this derivative instrument. For more details on this insurance-related derivative contract, refer to Item 8, Note 8(c) of the Consolidated Financial Statements included in our Annual Report on Form 10K for the year ended December 31, 2007.

Table of Contents

The following tables summarize all of our financial assets and liabilities measured at fair value at June 30, 2008 by FAS 157 hierarchy:

At June 30, 2008	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total Fair Value
Assets				
Fixed maturities	\$ -	\$ 8,703,346	\$ -	\$ 8,703,346
Equity securities	247,845	-	-	247,845
Other investments	-	46,551	677,688	724,239
Total	\$ 247,845	\$ 8,749,897	\$ 677,688	\$ 9,675,430
As a percentage of total assets	1.6%	56.1%	4.3%	62.0%
Liabilities				
Derivative liabilities	\$ -	\$ 750	\$ 23,790	\$ 24,540
As a percentage of total liabilities	nm	nm	0.2%	0.2%

nm- not meaningful

For fair value sensitivity analysis on our investments portfolio, refer to Item 3 Quantitative and Qualitative Disclosure about Market Risk .

LIQUIDITY AND CAPITAL RESOURCES

There has been no material change in our liquidity and capital resource requirements since December 31, 2007. For more information refer to *Liquidity and Capital Resources* included under Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2007. At June 30, 2008, our shareholders' equity was \$5.3 billion compared to \$5.2 billion at December 31, 2007. The following is a summary reconciliation of those balances:

Shareholders' equity - December 31, 2007	\$ 5,158,622
Net income	487,427
Share repurchases	(182,795)
Change in accumulated other comprehensive income (loss)	(173,389)
Common share dividends	(60,838)
Preferred share dividends	(18,438)
Share-based compensation and other	52,573

Shareholders' equity - June 30, 2008

\$ 5,263,162

During the first six months of 2008, we repurchased \$183 million of our common shares, of which \$175 million was made under our share repurchase plan, with the remaining \$8 million repurchase to satisfy employee's tax liabilities upon the vesting of restricted stock. The change in accumulated other comprehensive income (loss) largely relates to the movement in unrealized losses associated with our available for sale fixed maturities and equity securities, as discussed above.

Table of Contents

COMMITMENTS AND CONTINGENCIES

There have been no other material changes in our commitments or contingencies since December 31, 2007. Refer to Item 7 included in our Annual Report on Form 10-K for the year ended December 31, 2007.

CRITICAL ACCOUNTING ESTIMATES

There are certain accounting policies that we consider to be critical due to the amount of judgment and uncertainty inherent in the application of those policies. In calculating financial statement estimates, the use of different assumptions could produce materially different estimates. We believe the following critical accounting policies affect significant estimates used in the preparation of our consolidated financial statements:

Reserve for losses and loss expenses

Reinsurance recoverable balances

Premiums

We discuss our Critical Accounting Estimates in Item 7, *Management's Discussion and Analysis of Results of Operations and Financial Condition* in our Annual Report on Form 10-K for the year ended December 31, 2007.

NEW ACCOUNTING STANDARDS

See Item 1, Note 1 to the Consolidated Financial Statements for a discussion of new accounting standards we have recently adopted and recently issued accounting pronouncements we have not yet adopted.

OFF-BALANCE SHEET AND SPECIAL PURPOSE ENTITY ARRANGEMENTS

At June 30, 2008, we have not entered into any off-balance sheet arrangements, as defined by Item 303 (a) (4) of Regulation S-K.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK**

Our Balance Sheets include a substantial amount of assets and to a lesser extent liabilities whose fair values are subject to market risks. Market risk represents the potential for an economic loss due to adverse changes in the fair value of a financial instrument. Our most significant market risks are primarily associated with changes in interest rates and foreign currency exchange rates. The following provides a sensitivity analysis on the potential effects that these market risk exposures could have on the future earnings, fair values or cash flows of our material financial instruments.

INTEREST RATE RISK

Fluctuations in interest rates have a direct impact on the market valuation of our fixed maturities and non-redeemable preferred stocks. As interest rates rise, the market value of these financial instruments fall, and the converse is also true. In a declining interest rate environment, it includes prepayment risk on our MBS and ABS. Prepayment risk results from potential accelerated principal payments that shorten the average life, and therefore the expected yield of the security. At June 30, 2008, the impact on our fixed maturities and non-redeemable preferred stocks from a hypothetical case of an immediate 100 basis point increase in global bond rates would have resulted in an estimated decrease in market value of 3.14%, or approximately \$269 million, on a pre-tax basis. The hypothetical change in interest rate risk does not reflect what could be deemed the worst case scenario.

We manage interest rate risk by selecting investments with durations, yields, currency and liquidity tailored to the anticipated cash outflow characteristics of our insurance and reinsurance liabilities. Refer to *Cash and Investments* section above, for a discussion of target and actual durations on our investment portfolios.

FOREIGN CURRENCY RISK

Fluctuations in foreign currency exchange rates have a direct impact on the valuation of our assets and liabilities denominated in those currencies. Therefore, we attempt to manage our foreign currency risk by seeking to match our liabilities under insurance and reinsurance policies that are payable in foreign currencies with cash and investments that are denominated in such currencies. However, changes in value of investments due to foreign currency rate movements are reported in shareholders' equity (accumulated other comprehensive income/ loss) rather than in statements of operations.

We may also use derivatives to hedge un-matched foreign currency exposures, specifically forward contracts and currency options. Additionally, we may also enter into foreign currency forward contracts to manage portfolio risk and enhance our investment returns. Currency derivatives do not eliminate fluctuations in the value of our assets and liabilities denominated in foreign currencies but rather allow us to establish a base rate of exchange for a future point in time. Foreign currency forward contracts and options are not specifically identified against cash, any single security or any groups of securities and, therefore, do not qualify and are not designated as a hedge for financial reporting purposes. All realized gains and losses and unrealized gains and losses on foreign currency derivatives are recognized in our Consolidated Statements of Operations. In 2008, the principal currencies creating foreign exchange risk to the Company are Sterling and Euro. The following table provides a hypothetical analysis on our exposure to foreign exchange rate risk at June 30, 2008 and December 31, 2007:

	June 30, 2008	December 31, 2007
Fair value of net assets denominated in foreign currencies	\$ 1,383,408	\$ 862,664
As a percentage of total shareholders' equity	26%	17%
Pre-tax impact on equity of hypothetical 10% movement of the U.S. dollar	\$ 125,764	\$ 78,424

Edgar Filing: AXIS CAPITAL HOLDINGS LTD - Form 10-Q

At June 30, 2008, the total fair value of net assets dominated in foreign currencies were 72% and 18% based on the Euro and Sterling currencies respectively.

Table of Contents

VALUE AT RISK

Value at Risk: Our management uses Value-at-Risk (VaR) as one of its tools to measure potential losses in the fair values of our cash and investments. The VaR calculation is calculated using a Monte Carlo simulation to project many different prices of fixed income securities, derivatives and currencies taking into account, among other things, the volatility and the correlation between security price changes over various forecast horizons. The VaR of our cash and investments at June 30, 2008 was approximately \$528 million, or 4.9%, compared to \$276 million, or 2.6% at December 31, 2007, which represents the potential loss in fair value of our cash and investments over a one year time horizon within a 95% confidence level. The increase in our VaR was primarily related to increased market volatilities across substantially all asset classes that our investment portfolio is exposed to. The VaR computation is a risk analysis tool and does not purport to represent actual losses in fair value. We cannot predict actual future movements in market rates and do not present these results to be indicative of future movements in such market rates or to be representative of any actual impact that future changes in market rates may have on our future results of operations or financial position. During 2008 actual changes in fair value did not exceed the VaR amount.

ITEM 4. CONTROLS AND PROCEDURES

The Company's management has performed an evaluation, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934 (the Exchange Act)) as of June 30, 2008. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and is accumulated and communicated to management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

The Company's management has performed an evaluation, with the participation of the Company's Chief Executive Officer and Chief Financial Officer of changes in the Company's internal control over financial reporting that occurred during the quarter ended June 30, 2008. Based upon that evaluation, there have been no changes to the Company's internal control over financial reporting during the quarter ended June 30, 2008 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Except as noted below, we are not a party to any material legal proceedings. From time to time, we are subject to routine legal proceedings, including arbitrations, arising in the ordinary course of business. These legal proceedings generally relate to claims asserted by or against us in the ordinary course of insurance or reinsurance operations. In our opinion, the eventual outcome of these legal proceedings is not expected to have a material adverse effect on our financial condition or results of operations.

In 2005, a putative class action lawsuit was filed against our U.S. insurance subsidiaries. In re Insurance Brokerage Antitrust Litigation was filed on August 15, 2005 in the United States District Court for the District of New Jersey and includes as defendants numerous insurance brokers and insurance companies. The lawsuit alleges antitrust and Racketeer Influenced and Corrupt Organizations Act (RICO) violations in connection with the payment of contingent commissions and manipulation of insurance bids and seeks damages in an unspecified amount. On October 3, 2006, the District Court granted, in part, motions to dismiss filed by the defendants, and ordered plaintiffs to file supplemental pleadings setting forth sufficient facts to allege their antitrust and RICO claims. After plaintiffs filed their supplemental pleadings, defendants renewed their motions to dismiss. On April 15, 2007, the District Court dismissed without prejudice plaintiffs' complaint, as amended, and granted plaintiffs thirty (30) days to file another amended complaint and/or revised RICO Statement and Statements of Particularity. In May 2007, plaintiffs filed (i) a Second Consolidated Amended Commercial Class Action complaint, (ii) a Revised Particularized Statement Describing the Horizontal Conspiracies Alleged in the Second Consolidated Amended Commercial Class Action Complaint, and (iii) a Third Amended Commercial Insurance Plaintiffs' RICO Case Statement Pursuant to Local Rule 16.1(B)(4). On June 21, 2007, the defendants filed renewed motions to dismiss. On September 28, 2007, the District Court dismissed with prejudice plaintiffs' antitrust and RICO claims and declined to exercise supplemental jurisdiction over plaintiffs' remaining state law claims. Plaintiffs have appealed this decision to the United States Court of Appeals for the Third Circuit, where their appeal is currently pending. We believe that the lawsuit is completely without merit and we continue to vigorously defend the filed action.

ITEM 1A. RISK FACTORS

There were no material changes from the risk factors as previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2007.

Table of Contents**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

The following table sets forth information regarding the number of shares we repurchased during each month in the first six months of 2008.

ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total		Total Number	Maximum Number
	Number of	Average	Of Shares	(or Approximate Dollar Value) of Shares
	Shares	Price Paid	Purchased as Part	that May Yet Be
			Of Publicly Announced	Purchased Under the Announced Plans
	Purchased	Per Share	Plans or Programs	or Programs ^(a)
January 1-31, 2008	117,189 ^(b)	\$40.12	-	\$494.9 million
February 1-29, 2008	-	-	-	\$494.9 million
March 1-31, 2008	2,050 ^(b)	\$36.87	-	\$494.9 million
April 1-30, 2008	46,695 ^(b)	\$35.28	-	\$494.9 million
May 1-31, 2008	4,602,942 ^(c)	\$34.95	4,567,795	\$335.2 million
June 1-30, 2008	441,400 ^(d)	\$35.01	441,400	\$319.7 million
Total	5,210,276		5,009,195	\$319.7 million

- (a) On December 7, 2006, our Board of Directors authorized a renewal of our share repurchase plan with the authorization to repurchase up to \$400 million of our common shares to be effected from time to time in the open market or privately negotiated transactions. This repurchase plan will expire on December 31, 2008. On December 6, 2007, our Board of Directors approved a new share repurchase plan with the authorization to repurchase up to an additional \$400 million of our common shares. This repurchase plan is authorized to continue until December 31, 2009.
- (b) Comprises shares withheld to satisfy tax liabilities upon the vesting of restricted stocks awarded under our 2003 or 2007 Long Term Equity Compensation Plan. These shares are not included in our repurchase program.
- (c) In May 2008, we repurchased in the open market 4,567,795 shares at an average price of \$34.96 per share, for a total cost of \$160 million. In addition, we repurchased 35,147 common shares from employees for \$1 million to satisfy withholding tax liabilities upon the vesting of restricted stocks. These shares, however, are not included in our repurchase program.
- (d) In June 2008, we repurchased in the open market 441,400 shares at an average price of \$35.01 per share, for a total cost of \$15 million.

Table of Contents**ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS**

The 2008 Annual General Meeting of Shareholders of AXIS Capital Holdings Limited was held on May 9, 2008. Proxies with regard to the matters voted upon at the Annual General Meeting were solicited under Regulation 14A of the Securities Exchange Act of 1934, as amended. Set forth below is a brief description of each matter voted upon at the Annual General Meeting and the results of voting on each such matter.

- (a) The election of the Class II Directors named below to serve until the 2011 Annual General Meeting of Shareholders. There was no solicitation in opposition to any of the nominees listed in the proxy statement, and all of the nominees were elected.

Nominee	Votes	
	For	Withheld
Robert L. Friedman	79,267,866	49,405,374
Donald J. Greene	127,781,376	891,864
Jurgen Grupe	127,785,976	887,264
Frank J. Tasco	127,794,474	878,766

- (b) To approve the appointment of Deloitte & Touche, Hamilton, Bermuda to act as our independent registered public accounting firm for the fiscal year ending December 31, 2008 and to authorize the Board of Directors, acting through the Audit Committee, to set the fees for the registered public accounting firm.

For	Votes	
	Against	Abstain
128,595,629	74,328	3,283
