Rubicon Technology, Inc.

NOTES TO UNAUDITED FINANCIAL STATEMENTS

June 30, 2008

1. BASIS OF PRESENTATION

Interim financial data

The accompanying unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by accounting principles generally accepted in the United States for complete financial statements and should be read in conjunction with the Company's annual report filed on Form 10-K for the fiscal year ended December 31, 2007. In the opinion of management, all adjustments (consisting only of adjustments of a normal and recurring nature) considered necessary for a fair presentation of the results of operations have been included. Operating results for the three and six month periods ended June 30, 2008 are not necessarily indicative of results that may be expected for the year ending December 31, 2008.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Initial public offering

On November 21, 2007, the Company completed its initial public offering (IPO) of common stock in which a total of 6,505,000 shares were sold at an issuance price of \$14.00 per share. The Company raised a total of \$ 91.1 million in gross proceeds from the IPO, or approximately \$81.0 million in net proceeds after deducting the underwriting discount and commissions of \$6.4 million and estimated other offering costs of approximately \$3.6 million. Upon the closing of the IPO, all shares of redeemable convertible preferred stock outstanding and preferred stock dividends automatically converted into 13,385,722 shares of common stock. Also, upon the closing of the IPO, 1,217,152 Series B preferred stock warrants, and 131,096 Series C preferred stock warrants were exercised on a net exercise basis, which resulted in the Company issuing 48,068 shares of common stock. The remaining preferred stock warrants outstanding converted into 806,972 warrants to purchase common stock.

Follow-on Public Offering

On May 12, 2008, the Company completed a public offering of 3,950,000 shares of its common stock at a price of \$24.00 per share. The Company did not receive any of the proceeds from the sale, as all of the shares were sold by certain selling stockholders of the Company. Additionally, the underwriters were granted a 30-day option to purchase up to an additional 592,500 shares of common stock from the selling stockholders at the public offering price to cover over-allotments. The underwriters exercised such option, in part, for 353,410 shares of common stock on June 6, 2008.

Reverse stock split

All prior period common stock amounts have been retroactively adjusted to reflect a 1 for 13 reverse stock split effective August 30, 2007. As a result of this common stock split, there was an automatic change in the conversion prices of all series of preferred stock and their related dividend conversion rates at the same 1 for 13 ratio.

Table of Contents**Rubicon Technology, Inc.****Inventories**

Inventories are valued at the lower of cost or market. Cost is determined using the first-in, first-out method, and includes materials, labor and overhead. The Company reduces the carrying value of its inventories for differences between the cost and the estimated net realizable value, taking into account usage, expected demand, technological obsolescence and other information. Inventories are composed of the following:

	June 30, 2008	December 31, 2007
	(in thousands)	
Raw materials	\$ 1,731	\$ 1,215
Work in progress	894	1,592
Finished goods	1,230	41
	3,855	2,848
Reserve for obsolescence and realization	(448)	(326)
	\$ 3,407	\$ 2,522

Property and equipment

Property and equipment consisted of the following:

	June 2008	December 2007
	(in thousands)	
Machinery, equipment and tooling	\$ 38,036	\$ 27,996
Leasehold improvements	5,292	3,608
Furniture and fixtures	715	708
Information systems	546	546
Construction in progress	5,291	6,150
Total cost	49,880	39,008
Accumulated depreciation and amortization	(14,754)	(12,705)
Property and equipment, net	\$ 35,126	\$ 26,303

Revenue recognition

The Company recognizes revenue from product sales when earned in accordance with Staff Accounting Bulletin, (SAB), No. 104, Revenue Recognition. Revenue is recognized when, and if, evidence of an arrangement is obtained and the other criteria to support revenue recognition are met, including:

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

Persuasive evidence of an arrangement exists. The Company requires evidence of a purchase order with the customer specifying the terms and specifications of the product to be delivered, typically in the form of a signed quotation or purchase order from the customer.

Title has passed and the product has been delivered. Title passage and product delivery generally occur when the product is delivered to a common carrier.

The price is fixed or determinable. All terms are fixed in the signed quotation or purchase order received from the customer. The purchase orders do not contain rights of cancellation, return, exchange or refund.

Collection of the resulting receivable is reasonably assured. The Company's standard arrangement with customers includes 30 day payment terms. Customers are subject to a credit review process that evaluates the customers' financial position and their ability to pay. Collectability is determined by considering the length of time the customer has been in business and history of collections. If it is determined that collection is not probable no revenue is recognized unless cash is received in advance.

The Company does not provide maintenance or other services and we do not have sales that involve multiple elements or deliverables as defined under Emerging Issues Task Force Issue (EITF) No. 00-21, Revenue Arrangements with Multiple Deliverables.

Table of Contents**Convertible preferred stock warrant liability**

Prior to the IPO, the Company accounted for the carrying value of the preferred stock warrants as a liability pursuant to FASB Staff Position (FSP) 150-5, Accounting Under SFAS 150 for Freestanding Warrants and Other Similar Instruments on Redeemable Shares (FSP 150-5) and adjusted the fair value at each reporting period with any increase or decrease in fair value reported in other income (expense). At the IPO closing, the warrants were either net exercised or became exercisable for common stock. For the three and six months ended June 30, 2007, \$335,000 and \$721,000 was recorded as the change in value in other income (expense).

Redeemable convertible preferred stock

Prior to the IPO, the Company had issued various series of preferred stock. The holders of Series A, B, B-2, C, C-2, D, D-2, and E preferred stock had the option to sell their shares back to the Company at the greater of the original purchase price plus accrued and unpaid dividends, or the current fair market value of the shares plus accrued and unpaid dividends. As a result, the carrying value of the preferred stock was increased by an accretion amount each period so that the carrying amount was equal to the greater of fair value plus accrued and unpaid dividends or the original cost plus accrued and unpaid dividends value for the Series A, B, B-2, C, C-2, D, D-2, and E preferred stock. The accreted amounts were recorded to additional paid-in capital, if any, and then to accumulated deficit. (See Note 6). At the IPO, the option to sell was terminated and the related accretion of the preferred shares was transferred to additional paid-in-capital.

Net income (loss) per common share attributable to common stockholders

Net income (loss) per share of common stock is as follows for the three and six months ended June 30, 2008 and 2007:

	Three months ended June 30,		Six months ended June 30,	
	2008	2007	2008	2007
Net income (loss) attributable to common stockholders (in thousands):	\$ 2,178	\$ (8,775)	\$ 4,450	\$ (22,992)
Net income (loss) per common share attributable to common stockholders:				
Basic	\$ 0.10	\$ (34.61)	\$ 0.22	\$ (90.70)
Diluted	\$ 0.10	\$ (34.61)	\$ 0.20	\$ (90.70)
Weighted average common shares outstanding used in:				
Basic	20,899,421	253,507	20,725,532	253,507
Diluted	22,337,443	253,507	22,352,049	253,507

Basic net income (loss) per common share attributable to common stockholders is computed by dividing net income (loss) attributable to common stockholders by the weighted-average number of common shares outstanding during the period. Diluted net income (loss) per common share attributable to common stockholders is computed by dividing net income (loss) attributable to common stockholders by the weighted-average number of diluted common shares outstanding during the period. Diluted shares outstanding are calculated by adding to the weighted-average shares outstanding any common stock equivalents from redeemable preferred stock, outstanding stock options and warrants based on the treasury stock method.

Diluted net loss attributable to common stockholders per share is the same as basic net loss attributable to common stockholders per share for the three and six months ended June 30, 2007, since the effects of potentially dilutive securities are anti-dilutive.

At June 30, 2007, the Company had the following anti-dilutive securities outstanding which were excluded from the calculation of diluted net loss per share.

	Six months ended June 30, 2007
Preferred stock	13,183,741
Warrants	853,019

Stock options	1,250,562
	15,287,322

Recent accounting pronouncement

In December 2007, the FASB issued SFAS No. 141(R), Business Combinations. This Statement replaces FASB Statement No. 141, Business Combinations. SFAS No. 141(R) establishes principles and requirements for how an acquiring company: recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree; recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase; and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the

Table of Contents

business combination. SFAS No. 141(R) further changes the accounting treatment for certain specific items, including: acquisition costs will be generally expensed as incurred; acquired contingent liabilities will be recorded at fair value at the acquisition date and subsequently measured at either the higher of such amount or the amount determined under existing guidance for non-acquired contingencies; in-process research and development will be recorded at fair value as an indefinite-lived intangible asset at the acquisition date; restructuring costs associated with a business combination will be generally expensed subsequent to the acquisition date; and changes in deferred tax asset valuation allowances and income tax uncertainties after the acquisition date generally will affect income tax expense. SFAS No. 141(R) applies prospectively to our business combinations for which the acquisition date is on or after January 1, 2009.

3. SEGMENT INFORMATION

The Company has determined that it operates in only one segment in accordance with SFAS No. 131, Disclosures About Segments of an Enterprise and Related Information, as it only reports profit and loss information on an aggregate basis to its chief operating decision maker.

Revenue is attributed by geographic region based on ship-to location of the Company's customers. The following table summarizes revenue by geographic region:

	Three months ended June 30,		Six months ended June 30,	
	2008	2007	2008	2007
	(in thousands)		(in thousands)	
Asia	\$ 6,196	\$ 5,453	\$ 11,932	\$ 10,830
North America	5,079	2,642	9,582	4,276
Europe	255	151	524	342
Revenue	\$ 11,530	\$ 8,246	\$ 22,038	\$ 15,448

4. INVESTMENTS

Investments are available-for-sale securities recorded at fair value and unrealized gains and losses are reported as part of accumulated other comprehensive income (loss).

The following table presents the amortized cost, and gross unrealized gains and losses on all securities at June 30, 2008:

	Available-for-sale securities (in thousands)			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value
U.S. Treasury securities and agency (taxable)	\$ 29,945	\$	\$ (68)	\$ 29,877
Corporate Notes/Bonds (taxable)	1,761		(9)	1,752
States and political subdivisions (taxable)	10,750		(592)	10,158
Commercial Paper (taxable)	21,737		(2)	21,735
Total available-for-sale securities	\$ 64,193	\$	\$ (671)	\$ 63,522

The net carrying value and estimated fair value of available-for-sale securities at June 30, 2008, by contractual maturity, were as follows:

	Cost	Fair value
Due in one year or less	\$ 53,443	\$ 53,364
Due after one year through three years		

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

Due after three years	\$ 10,750	\$ 10,158
-----------------------	-----------	-----------

A portion of our excess cash is invested in auction rate securities and, as of June 30, 2008, \$10.2 million of these securities are in the investment portfolio. All of these auction rate securities are AAA rated by one or more of the major credit rating agencies and have contractual maturities from 2036 to 2045. Further, all of these securities are collateralized by student loans, and approximately 99% of the collateral qualifies under the Federal Family Education Loan Program and is guaranteed by the US government. Auctions have failed for all of our auction rate securities, resulting in our inability to sell these securities in the short term. A failed auction results in

Table of Contents

a lack of liquidity in the securities but does not signify a default by the issuer. Upon an auction failure, the interest rates do not reset at market rate but instead reset based on a formula contained in the security. If we need access to these funds, we will not be able to do so without the possible loss of principal or until a future auction for these investments is successful, they are redeemed by the issuer, or they mature. We cannot predict if or when a successful auction or redemption will take place. We do not believe we need access to these funds for operational purposes for the foreseeable future. We continue to monitor and evaluate these investments on a quarterly basis for impairment and the need to reclassify as long-term investments. At June 30, 2008, all of these securities have been classified as long-term investments. All of the securities are due for auction again every 28 days.

Effective January 1, 2008, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements (SFAS No.157). In February 2008, the Financial Accounting Standards Board (FASB) issued FASB Staff Position No. FAS 157 2, Effective Date of FASB Statement No. 157 , which provides a one year deferral of the effective date of SFAS 157 for non-financial assets and non-financial liabilities, except those that are recognized or disclosed in the financial statements at fair value at least annually. Therefore, the Company has adopted the provisions of SFAS No. 157 with respect to its financial assets and liabilities only. SFAS No. 157 defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles and enhances disclosures about fair value measurements. Fair value is defined under SFAS No. 157 as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value under SFAS No. 157 must maximize the use of observable inputs and minimize the use of unobservable inputs. The standard describes a fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value which are the following:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The adoption of SFAS No. 157 did not have a material impact on the Company's results of operations and financial condition.

The following table summarizes the Company's financial assets measured at fair value on a recurring basis in accordance with SFAS No. 157 as of June 30, 2008:

	Level 1	Level 2	Level 3	Total
Cash Equivalents:				
Money market funds	\$ 2,632	\$	\$	\$ 2,632
Investments:				
Available-for-sales securities - current		53,364		53,364
Available-for-sales securities - non-current			10,158	10,158
Total	\$ 2,632	\$ 53,364	\$ 10,158	\$ 66,154

Level 3 assets consist of AAA-rated municipal bonds with an auction reset feature, and auction rate securities, whose underlying assets are generally student loans which are substantially backed by the federal government. In February 2008, auctions began to fail for these securities and each auction since then has failed. As of June 30, 2008, due to the auction failures, underlying maturities of the auction rate securities of greater than one year and the Company's ability to hold the securities beyond one year, the Company reclassified its investment in auction rate securities from short-term investments to long-term investments. These investments were valued at fair value as of June 30, 2008. The following table provides a summary of changes in fair value of the Company's Level 3 financial assets as of June 30, 2008:

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

	Auction rate securities
Balance at January 1, 2008	\$ 3,200
Net transfers in: auction rate securities with failed auctions	7,550
Unrealized losses included in other accumulated comprehensive income	(592)
Balance at June 30, 2008	\$ 10,158

In addition to the debt securities noted above, the Company had approximately \$1.1 million of time deposits included in cash and cash equivalents as of June 30, 2008.

Table of Contents**5. SIGNIFICANT CUSTOMERS**

For the three months ended June 30, 2008, we had four customers that accounted for approximately 30%, 15%, 13% and 11% of our revenue and for the three months ended June 30, 2007, we had three customers that accounted for approximately 28%, 21% and 13% of our revenue. For the six months ended June 30, 2008, we had four customers that accounted for approximately 36%, 16%, 14% and 11% of our revenue and for the six months ended June 30, 2007, we had two customers that accounted for approximately 28% and 20% of our revenue.

Customers individually representing more than 10% of trade receivables accounted for approximately 70% and 69% of accounts receivable as of June 30, 2008 and December 31, 2007, respectively. The Company grants credit to customers based on an evaluation of their financial condition. Losses from credit sales are provided for in the financial statements.

6. STOCKHOLDERS EQUITY, REDEEMABLE STOCK CONVERSIONS, ACCRUED DIVIDEND CONVERSIONS AND WARRANT CONVERSIONS

Common Stock As of June 30, 2008, the Company had 85,000,000 shares of common stock authorized with a par value of \$0.001 and the Company had reserved 1,192,671 shares of common stock for issuance upon the exercise of outstanding common stock options. Also, 2,054,337 shares of the Company's common stock were reserved for future grants of stock options (or other similar equity instruments) under the Company's 2001 Equity Plan (the 2001 Plan) and 2007 Stock Incentive Plan (the 2007 Plan) as of June 30, 2008. In addition, 562,763 shares of the Company's common stock were reserved for future exercise of outstanding warrants as of June 30, 2008.

On November 21, 2007, the Company completed an IPO of 6,505,000 shares of its common stock (including the underwriters' exercise of their over-allotment option) at a public offering price of \$14.00 per share. Net cash proceeds from the initial public offering were \$81 million after deducting offering costs.

Warrants and warrant conversions Upon the closing of the Company's IPO, all preferred stock warrants were either converted into common stock warrants or net exercised. For the six months ended June 30, 2008, 233,082 common stock warrants were exercised in full on a net exercise basis, which resulted in the Company issuing 197,103 shares of common stock to the warrant holders.

Redeemable convertible preferred stock Prior to the IPO, the Company issued various series of preferred stock. At anytime after December 15, 2008, the holders of Series E, D, D-2, C, C-2, B, B-2 and A preferred stock would have had the option to sell their shares back to the Company at the greater of original purchase price plus accrued and unpaid dividends, or the current fair market value of the shares plus accrued and unpaid dividends. As a result, the carrying value of the preferred stock was increased by an accretion each period so that the carrying amounts equaled the greater of original purchase price plus accrued and unpaid dividends, or the current fair market value of the shares plus accrued and unpaid dividends for the Series E, D, D-2, C, C-2, B, B-2 and A preferred stock. The accreted amounts were recorded to additional paid-in capital, if any, and then to accumulated deficit. The accretion recorded at June 30, 2007 was recorded to bring the carrying value of the redeemable convertible preferred stock to their redemption values as of June 30, 2007. At the IPO, the option to sell was terminated.

Dividend conversion feature

The Company's redeemable convertible preferred stock provided that the holders, at their discretion, could require the conversion of accumulated dividends into either cash or common stock based upon stated conversion rates. Accordingly, in accordance with EITF 00-27, Application of Issue No. 98-5 to Certain Convertible Instruments, any excess of the fair value of common stock a holder would receive over the accumulated dividends was recorded as the dividends accrued. At June 30, 2007 the accumulated dividends were less than the value of the common shares the holder would receive upon conversion. Accordingly, the Company recorded the excess fair value of the common shares that could be received upon conversion over the amount of cash dividends in the amount of \$2,812,491 to additional paid-in-capital and accumulated deficit. At November 21, 2007, the IPO date, the accumulated dividends were greater than the value of the shares the holder would receive upon conversion. At the closing of the IPO, accumulated dividends were converted to common stock.

7. STOCK INCENTIVE PLANS

The Company sponsors a stock option plan, the 2001 Plan, which allows for the grant of incentive and nonqualified stock options for the purchase of common stock. Each option entitles the holder to purchase one share of common stock at the specified option exercise price. The exercise price of each incentive stock option granted must not be less than the fair market value on the grant date. After the completion of our IPO, our Board of Directors determined not to grant any additional awards under the 2001 Plan. Management and the Board of Directors determine vesting periods and expiration dates at the time of the grant.

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

In August 2007, the Company adopted the 2007 Plan, which allows for the grant of incentive stock options, non-statutory stock options, stock appreciation rights, restricted stock, restricted stock units, performance awards and bonus shares. The maximum number of shares which may be awarded or sold under the 2007 Plan is 2,307,692 shares. The compensation committee of the Board of Directors administers the plan. The compensation committee determines the type of award to be granted, the fair market value, the number of shares covered by the award, and the time when the award vests and may be exercised.

Table of Contents

Upon the adoption of SFAS 123R, the Company began using the Black-Scholes option pricing model to value stock options. The Company uses historical stock prices of companies which it considers as a peer group as the basis for its volatility assumptions. The assumed risk-free rates were based on US Treasury rates in effect at the time of grant with a term consistent with the expected option lives. The expected term is based upon the vesting term of the Company's options, a review of a peer group of companies, and expected exercise behavior. The forfeiture rate is based on past history of forfeited options. The expense is being allocated using the straight-line method. For the three and six months ended June 30, 2008, the Company recorded \$159,063 and \$324,623, respectively, of stock compensation expense related to the adoption of SFAS 123R. For the three and six months ended June 30, 2007, the Company recorded \$185,884 and \$190,903, respectively, of stock compensation expense related to the adoption of SFAS 123R. As of June 30, 2008, the Company has \$2,498,805 of total unrecognized compensation cost related to nonvested awards granted under the Company's stock-based plans that it expects to recognize over a weighted-average period of 3.33 years. Under the prospective method of adoption of SFAS 123R, the Company continues to account for options issued prior to January 1, 2006 under the intrinsic value method of APB 25.

The following table summarizes the activity of the stock incentive and equity plans as of June 30, 2008 and changes during the six months then ended:

	Shares available for grant	Number of options outstanding	Weighted- average option exercise price	Number of restricted stock shares issued
At December 31, 2007	2,020,685	1,710,494	\$ 5.87	14,284
Authorized				
Granted	(39,587)	34,050	23.30	5,537
Exercised		(478,634)	1.24	
Cancelled/forfeited	73,239	(73,239)	8.83	
At June 30, 2008	2,054,337	1,192,671	8.04	19,821
Exercisable at June 30, 2008		405,867	6.09	

The weighted average fair value per share of options granted for the three and six months ended June 30, 2008 was \$11.64 and the fair value of each option grant was estimated at the date of grant using the Black-Scholes option-pricing model using an expected term of 4.8 years, risk-free interest rate ranging from 2.37% to 3.28%, expected volatility of 56% and no dividend yield. The Company used an expected forfeiture rate of 25%. The weighted average fair value per share of options granted for the three and six months ended June 30, 2007 was \$2.05 and the fair value of each option grant was estimated at the date of grant using the Black-Scholes option-pricing model using an expected term of 4.8 years, risk-free interest rate ranging from 4.9%, expected volatility of 56% and no dividend yield. The Company used an expected forfeiture rate of 25%.

During the six months ended June 30, 2008, the Company granted restricted stock shares totaling 5,537 shares to outside directors of the Company at a fair value of \$142,015. For the three and six months ended June 30, 2008, the Company recorded \$28,504 and \$51,078 of stock compensation expense related to restricted stock.

A summary of the Company's non-vested options during the six month period ended June 30, 2008 is presented below:

	Options	Weighted-average exercise price
Non-vested at January 1, 2008	899,768	\$ 8.37
Granted	34,050	23.30
Vested	(89,923)	6.56
Forfeited	(57,090)	10.80
Non-vested at June 30, 2008	786,805	\$ 9.04

Table of Contents

8. COMMITMENTS AND CONTINGENCIES

Purchase Commitments

The Company has entered into agreements to purchase equipment or components to construct furnaces. These agreements will result in the Company purchasing equipment or components for a total cost of approximately \$5,540,000 with deliveries occurring through March 2009.

Litigation

From time to time, the Company experiences routine litigation in the normal course of its business. Through June 2008, all pending litigation was settled and did not have a material adverse effect on the financial condition or results of operations of the Company.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

All statements, other than statements of historical facts, included in this Quarterly Report on Form 10-Q regarding our estimates, expectations, beliefs, intentions, projections or strategies for the future, results of operations, financial position, net sales, projected costs, prospects and plans and objectives of management for future operations may be forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995, as amended. We have based these forward-looking statements on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy, short-term and long-term business operations and objectives and financial needs. These forward looking statements can be identified by the use of terms and phrases such as believe, plan, intend, anticipate, target, estimate, expect, and the like, and/or future-tense or conditional constructions (will, may, etc.). Items contemplating or making assumptions about actual or potential future sales, market size and trends or operating results also constitute forward-looking statements.

Moreover, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. Before investing in our common stock, investors should be aware that the occurrence of the risks, uncertainties and events described in the section entitled Risk factors and elsewhere in this Quarterly Report could have a material adverse effect on our business, results of operations and financial condition.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, forward-looking statements are inherently subject to known and unknown business, economic and other risks and uncertainties that may cause actual results to be materially different from those discussed in these forward-looking statements. Readers are urged not to place undue reliance on these forward-looking statements, which speak only as of the date of this Quarterly Report. We assume no obligation to update any forward-looking statements in order to reflect any event or circumstance that may arise after the date of this Quarterly Report, other than as may be required by applicable law or regulation. If one or more of these risks or uncertainties materialize, or if the underlying assumptions prove incorrect, our actual results may vary materially from those expected or projected.

You should read this Quarterly Report, the documents that we reference in this Quarterly Report and have filed with the SEC as exhibits and our Annual Report on Form 10-K for the year ended December 31, 2007 with the understanding that our actual future results, levels of activity, performance and events and circumstances may be materially different from what we expect.

Unless otherwise indicated, the terms Rubicon, the Company, we, us, and our refer to Rubicon Technology, Inc.

OVERVIEW

We are an advanced electronic materials provider that develops, manufactures and sells monocrystalline sapphire and other innovative crystalline products for Light-Emitting Diodes (LEDs), radio frequency integrated circuits (RFICs), blue laser diodes, optoelectronics and other optical applications. The emergence of sapphire in commercial volumes at competitive prices has enabled the development of new technologies such as high brightness (HB) white, blue and green LEDs and highly-integrated RFICs. We apply our proprietary crystal growth technology to produce high-quality sapphire products efficiently to supply a large and growing end-market demand, and we work closely with our customers to meet their quality and delivery needs.

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

We are a vertically-integrated manufacturer of high-quality sapphire substrates and optical windows that are used in a variety of high-growth, high-volume end-market applications. Our largest product line is two inch to four inch sapphire wafers for use in LEDs and blue laser diodes for solid state lighting and electronic applications. In addition, we have developed six inch sapphire wafers that are used for Silicon-on-Sapphire (SOS) RFICs, as well as products for military, aerospace, sensor and other applications. We are also extending our technology to manufacture eight inch and larger diameter products to support next-generation LED, RFIC and optical window applications.

Table of Contents

Our revenue consists of sales of sapphire materials sold in core, as-cut, as-ground and polished forms in two, three, four and six inch diameters as well as optical materials sold as blanks or polished windows. Products are made to varying specifications, such as crystal planar orientations and thicknesses. We have focused on increasing sales of larger diameter substrates, which we define as three inch or greater in diameter, as they generally yield higher gross margins. Revenue from our SOS customers, which use six inch substrates, represented 30% of our total revenue for the three months ended June 30, 2008, as compared to 15% of total revenue for the three months ended June 30, 2007. Revenue from our SOS customers, which use six inch substrates, represented 32% of our total revenue for the six months ended June 30, 2008, as compared to 13% of total revenue for the six months ended June 30, 2007. Sales of larger diameter substrates to our LED customers also grew faster than sales of two inch diameter substrates over the past twelve months.

Historically, a significant portion of our revenue has been derived from sales to relatively few customers. For the three months ended June 30, 2008, we had four customers that accounted for approximately 30%, 15%, 13% and 11% of our revenue and for the three months ended June 30, 2007 we had three customers that accounted for approximately 28%, 21%, and 13% of our revenue. For the six months ended June 30, 2008, we had four customers that accounted for approximately 36%, 16%, 14%, and 11% of our revenue and for the six months ended June 30, 2007 we had two customers that accounted for approximately 28% and 20% of our revenue.

Other than as discussed above, none of our customers accounted for more than 10% of our revenue for such periods. Although we are attempting to diversify and expand our customer base, we expect our revenue to continue to be concentrated among a small number of customers. We expect that our significant customers may change from period to period. One of our significant customers in the SOS market has begun to accumulate an inventory of sapphire wafers. This could impact our revenue from this customer in early 2009.

We recognize revenue upon shipment to our customers. We derive a significant portion of our revenue from customers outside of the United States. The majority of our sales are to the Asian market and we expect that region to continue to be a major source of revenue for us. All of our revenue is denominated in US dollars.

Our cost of goods sold consists primarily of manufacturing materials, labor, manufacturing-related overhead such as utilities, depreciation and rent, provisions for excess and obsolete inventory reserves, freight and warranties. We manufacture our products at our Franklin Park, Illinois and Bensenville, Illinois manufacturing facilities based on customer orders. We purchase materials and supplies to support such demand. We are subject to variations in the cost of raw materials and consumables from period to period because we do not have long-term fixed-price agreements with our suppliers. For the three and six months ended June 30, 2008, utility costs represented approximately 10% of our cost of goods sold. Our one year contract for electric power expired on May 8, 2008. We renewed our contract on an index pricing basis where we are charged monthly the average of the daily rates per kilowatt hour. On May 23, 2008, we signed a contract that moved one half of our electricity usage off of the index pricing and on to a fixed rate per kilowatt hour through the remainder of 2008. The current blend of index and fixed pricing is approximately 20% higher than the average rate paid under the agreement that expired on May 8, 2008. As index rates fluctuate, these costs may fluctuate through the remainder of this year. On July 25, 2008, we signed a contract that provides electricity priced at a new fixed rate per kilowatt hour from January 1, 2009 through December 31, 2010. This new fixed rate is approximately 13% below the current blended average rate.

Our gross margin increased by 4 percentage points in the three months ended June 30, 2008 compared to the three months ended June 30, 2007 and 5 percentage points in the six months ended June 30, 2008 compared to the six months ended June 30, 2007 due to improved manufacturing and purchasing efficiencies, economies of scale related to higher unit volumes and product mix shift to larger diameters.

Our operating expenses are comprised of sales and marketing, research and development (R&D), and general and administrative expenses (G&A). G&A expenses consist primarily of salaries and associated costs for employees in finance, human resources, information technology and administrative activities, charges for accounting, legal, and insurance fees, and stock-based compensation under Statement of Financial Accounting Standards No. 123(R), Share-Based Payment (SFAS 123R). The majority of our stock-based compensation relates to administrative personnel and is accounted for as a general and administrative expense. For the three and six months ended June 30, 2008, our stock-based compensation expense was \$159,063 and \$324,623, respectively. For the three and six months ended June 30, 2007, our stock-based compensation expense was \$185,884 and \$190,903, respectively. In 2008, we began incurring additional accounting, legal, insurance, investor related and other costs associated with being a public company.

Other income (expense) consists of interest expense and change in carrying value of convertible preferred stock warrants, which is offset in part by interest income. Interest expense consists of interest on debt and amortization of the fair value of our convertible preferred stock warrants issued as part of debt financing transactions. For the three months ended June 30, 2007, interest expense was \$384,000. There was no interest expense for the three months ended June 30, 2008. For the six months ended June 30, 2008 and 2007, interest expense was \$2,000 and \$632,000, respectively. We repaid most of our outstanding indebtedness with a portion of the proceeds from our IPO in November 2007 and repaid the remainder in February 2008. The remaining unamortized debt discount associated with the convertible preferred stock warrants issued as part of debt financing transactions was expensed in November 2007 upon the repayment of the debt. Consequently, we incurred minimal interest

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

expense for the three and six months ended June 30, 2008 and we do not expect to incur interest expense for the next twelve months. Proceeds from our IPO are invested in available-for-sale securities.

Table of Contents

The change in carrying value of preferred stock warrants is associated with the value of warrants classified as liabilities. These warrants converted into common stock warrants in connection with our initial public offering. We no longer incur this non-cash gain or loss following the conversion of these warrants to common stock warrants. Additional information on our accounting for change in carrying value of preferred stock warrants is provided in Critical accounting policies and estimates.

We account for income taxes under the asset and liability method whereby the expected future tax consequences of temporary differences between the book value and the tax basis of assets and liabilities are recognized as deferred tax assets and liabilities, using enacted tax rates in effect for the year in which the differences are expected to be recognized. A full valuation allowance is provided as management cannot conclude that it is more likely than not that our deferred tax assets will be realized. At June 30, 2008, we had approximately \$33 million in net operating loss carryforwards (NOLs). We believe that we are not restricted in our ability to use the full amount of the NOLs, nor is there a limit to the amount of NOLs that may be used in any given year.

We opened our Bensenville, Illinois manufacturing facility in January 2008 and are installing crystal growth furnaces in order to expand our production capacity. We expect to spend between \$15 million and \$20 million per year for 2008 and 2009 on capital expenditures to support our expected sales growth. Our capital expenditures for the six months ended June 30, 2008 was \$10.9 million.

Table of Contents**RESULTS OF OPERATIONS THREE MONTHS ENDED JUNE 30, 2008 AND 2007**

The following table sets forth our statements of operations for the periods indicated:

	Three months ended June 30, 2008 2007 (in millions)	
Revenue	\$ 11.5	\$ 8.2
Cost of goods sold	7.2	5.4
Gross profit	4.3	2.8
Operating expenses:		
General and administrative	2.1	1.5
Sales and marketing	0.2	0.2
Research and development	0.2	0.1
Loss on disposal of assets		0.1
Total operating expenses	2.5	1.9
Income from operations	1.8	0.9
Other income (expense)	0.5	(0.7)
Income before income taxes	2.3	0.2
Income tax expense	0.1	
Net income	\$ 2.2	\$ 0.2

The following table sets forth our statements of operations as a percentage of revenue for the periods indicated:

	Three months ended June 30, 2008 2007 (percentage of total)	
Revenue	100%	100%
Cost of goods sold	62	66
Gross profit	38	34
Operating expenses:		
General and administrative	18	18
Sales and marketing	2	2
Research and development	2	1
Loss on disposal of assets		1
Total operating expenses	22	22
Income from operations	16	12
Other income (expense)	4	(9)

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

Income before income taxes	20	3
Income tax expense	1	
Net income	19%	3%

Revenue. Revenue was \$11.5 million for the three months ended June 30, 2008 and \$8.2 million for the three months ended June 30, 2007, an increase of \$3.3 million, or 40%. Revenue for the three months ended June 30, 2008 from larger diameter products, which we define as three inch or greater, represented 54% of revenue compared to 38% for the three months ended June 30, 2007. Revenue increased across all product lines except for larger diameter as-ground wafers, which declined by \$270,000 as we shifted capacity to other larger diameter product lines, mainly six inch polished production. Our revenue increase was primarily attributable to an increase in shipments of larger diameter substrates to the LED industry resulting in additional revenue of \$1.2 million, and sales of six inch polished products to the SOS RFIC market which increased by \$2.3 million mainly on higher volumes offset by a slight decline in sales prices totaling \$219,000. We had slightly higher contract research revenue of \$177,000.

Table of Contents

Gross profit. Gross profit was \$4.3 million for the three months ended June 30, 2008 and \$2.8 million for the three months ended June 30, 2007, an increase of \$1.5 million. This increase in gross profit represented an improvement of gross margin from 34% to 38%. The increase in gross margin in 2008 compared to 2007 was primarily due to a shift to higher margin larger diameter products and improved operating leverage from higher throughput and increased production yields.

General and administrative expenses. G&A expenses were \$2.1 million for the three months ended June 30, 2008 and 1.5 million for the three months ended June 30, 2007, an increase of \$559,000. The increase was primarily due to \$301,000 of higher audit, investor related, insurance, back office headcount, legal, and board costs associated with operating as a public company, \$543,000 of costs associated with the follow-on public offering offset by lower bonus costs of \$212,000 and lower debt financing costs of \$130,000, due to the extinguishment of our debt.

Sales and marketing expenses. Sales and marketing expenses were \$245,000 for the three months ended June 30, 2008 and \$170,000 for the three months ended June 30, 2007, an increase of \$75,000. The increase in sales and marketing expenses is attributable to additional headcount of \$54,200 and increased marketing and trade show expenses of \$19,400, all in support of increased revenue and initiatives to help grow sales with new customers.

Research and development expenses. R&D expenses were \$233,000 for the three months ended June 30, 2008 and \$160,000 for the three months ended June 30, 2007, an increase of \$73,000. The increase was primarily attributable to an increase in headcount.

Other income (expense). Other income (expense) was \$441,000 for the three months ended June 30, 2008 and (\$719,000) for the three months ended June 30, 2007, an increase in net other income of \$1.2 million. The increase was due in part to the elimination of charges relating to the carrying value of preferred stock warrants, which were \$335,000 in the three months ended June 30, 2007. Also, interest expense was lower by \$384,000 as a result of extinguishing our debt and interest income increased by \$441,000 as interest was earned on investing proceeds from our IPO.

RESULTS OF OPERATIONS SIX MONTHS ENDED JUNE 30, 2008 AND 2007

The following table sets forth our statements of operations for the periods indicated:

	Six months ended June 30, 2008 2007 (in millions)	
Revenue	\$ 22.0	\$ 15.4
Cost of goods sold	13.8	10.4
Gross profit	8.2	5.0
Operating expenses:		
General and administrative	3.9	2.4
Sales and marketing	0.5	0.3
Research and development	0.5	0.3
Loss on disposal of assets		0.1
Total operating expenses	4.9	3.1
Income from operations	3.3	1.9
Other income (expense)	1.3	(1.4)
Income before income taxes	4.6	0.5
Income tax expense	0.1	
Net income	\$ 4.5	\$ 0.5

Net income	20%	3%

Revenue. Revenue was \$22.0 million for the six months ended June 30, 2008 and \$15.4 million for the six months ended June 30, 2007, an increase of \$6.6 million, or 43%. Revenue for the six months ended June 30, 2008 from larger diameter products, which we define as three inch or greater, represented 53% of revenue compared to 32% for the six months ended June 30, 2007. Revenue increased across all product lines except for larger diameter as-ground and as cut wafers which decreased by \$556,000 and two inch core and wafer product, which declined by \$491,000 as we shifted capacity to larger diameter product lines, mainly six inch polished production. Our revenue increase was primarily attributable to an increase in shipments of larger diameter substrates to the LED industry resulting in additional revenue of \$2.7 million and sales of six inch polished products to the SOS RFIC market which increased by \$4.8 million mainly on higher volumes offset by a slight decline in sales prices totaling \$336,000. Revenue also increased on higher contract research revenue of \$346,000 and higher revenue of \$163,000 from optical products due to increased sales of sapphire and fluorides for military, aerospace, sensor and other applications.

Gross profit. Gross profit was \$8.2 million for the six months ended June 30, 2008 and \$5.0 million for the six months ended June 30, 2007, an increase of \$3.2 million. This increase in gross profit represented an improvement of gross margin from 32% to 37%. The increase in gross margin in 2008 compared to 2007 was primarily due to a shift to higher margin larger diameter products and improved operating leverage from higher throughput and increased production yields.

General and administrative expenses. G&A expenses were \$3.9 million for the six months ended June 30, 2008 and \$2.4 million for the six months ended June 30, 2007, an increase of \$1.5 million. The increase was primarily due to \$774,000 of higher audit, investor related, insurance, back office headcount, legal, and board costs associated with operating as a public company, \$729,000 of costs associated with the follow-on public offering, \$192,000 from higher payroll and payroll taxes associated with the exercise of stock options, and \$112,000 in higher franchise taxes partially offset by lower debt financing costs of \$160,000 due to the extinguishment of our debt.

Sales and marketing expenses. Sales and marketing expenses were \$481,000 for the six months ended June 30, 2008 and \$335,000 for the six months ended June 30, 2007, an increase of \$146,000. The increase in sales and marketing expenses is attributable to additional payroll and payroll taxes associated with the exercise of stock options of \$102,000, increased travel expense of \$21,300 and increased marketing and trade show expenses of \$32,700 all in support of increased revenue and initiatives to help grow sales with new customers.

Research and development expenses. R&D expenses were \$500,000 for the six months ended June 30, 2008 and \$376,000 for the six months ended June 30, 2007, an increase of \$124,000. The increase was primarily attributable to an increase in payroll costs of \$154,000 partially offset by a decrease in spending on research projects of \$33,900.

Other income (expense). Other income (expense) was \$1.3 million for the six months ended June 30, 2008 and (\$1.4 million) for the six months ended June 30, 2007, an increase in net other income of \$2.7 million. The increase was due in part to the elimination of charges relating to the carrying value of preferred stock warrants, which were \$721,000 in the six months ended June 30, 2007. Also interest expense was lower by \$630,000 as a result of extinguishing our debt and interest income increased by \$1.3 million as interest was earned on investing proceeds from our IPO.

LIQUIDITY AND CAPITAL RESOURCES

We historically funded our operations using a combination of issuances of common stock and preferred stock, a working capital line of credit and term loans and cash generated from our operations. Since our inception, we have raised approximately \$136 million of equity from the issuance of common and preferred stock.

Table of Contents

As of June 30, 2008, we had cash and short term investments totaling \$57.8 million, including cash of \$1.8 million held in deposits at a major bank, \$2.6 million invested in money market funds and had short term investments in commercial paper, corporate, state and local bonds, and US treasury securities of \$53.4 million. In addition, as of June 30, 2008, we had \$10.2 million of investments in municipal auction rate securities which we have classified as long-term investments. In February 2008, we began experiencing failed auctions for our entire auction rate securities portfolio, resulting in our inability to sell these securities in the short term. A failed auction results in a lack of liquidity in the securities but does not signify a default by the issuer. We may need to hold these investments for a longer period than was originally anticipated. More information on our auction rate security position can be found in Note 4 to our financial statements for the three and six months ended June 30, 2008, included elsewhere in this Quarterly Report.

Cash flows from operating activities

Cash provided by operating activities was \$3.6 million for the six months ended June 30, 2008. During such period, we generated net income of \$4.5 million and we incurred non-cash charges of \$2.4 million, including depreciation expense of \$2.1 million and stock-based compensation expense of \$376,000. We experienced an increase during such period in accounts receivable of \$2.7 million on increased sales and slower collection of receivables, an increase in accounts payable of \$3.0 million and an increase in spare parts of \$1.4 million due primarily to an increase in furnace material inventory. We also experienced a decrease in accrued payroll of \$427,000 due to pay outs of bonuses earned in 2007 and a decrease in deferred revenue of \$500,000 due to recognition of revenue deferred on a contract research project.

Cash provided by operating activities was \$2.3 million for the six months ended June 30, 2007. During such period, we generated net income of \$515,000 and we incurred non-cash charges of \$2.8 million, including depreciation expense of \$1.6 million, change in carrying value of preferred stock warrants of \$721,000, stock-based compensation expense of \$191,000 and interest expense related to debt accretion of \$284,000. We experienced an increase during the period in accounts receivable of \$901,000 on increased sales, an increase in accounts payable of \$678,000 and an increase in inventory of \$388,000 due to higher production to meet increased customer demand. We also experienced a decrease in accrued payroll of \$186,000 due to pay outs of bonuses earned in 2006.

The \$1.4 million increase in cash provided by operating activities for the six months ended June 30, 2008, compared to the six months ended June 30, 2007, is primarily attributable to an increase in net income of \$3.9 million, as sales of larger diameter, higher margin products increased, partially offset by a decrease in non-cash charges of \$394,000 primarily associated with our debt financing and change in carrying value of convertible preferred stock warrants which were retired with our IPO. On a period-over-period basis as sales increased, we experienced an increase in accounts receivable of \$1.8 million and an increase in inventory and spare parts inventory of \$1.6 million, the latter in order to have necessary stock on hand to meet customer needs and expansion efforts. We also experienced an increase in accounts payable of \$2.3 million in support of increased production and capital asset expansion. We also experienced a decrease in deferred revenue of \$500,000 due to recognition of revenue deferred on a contract research project and a decrease of \$542,000 in accrued liabilities on timing of payments.

Cash flows used in investing activities

Net cash used in investing activities was \$4.1 million and \$4.5 million for the six months ended June 30, 2008 and 2007, respectively. During the six months ended June 30, 2008, we used approximately \$7.2 million to purchase components used to construct additional crystal growth furnaces, approximately \$926,000 for infrastructure changes needed to expand operations in our facility in Bensenville, Illinois and approximately \$2.7 million to purchase various equipment used to expand our production capacity in support of our sales growth. This was partially offset by proceeds from sales of investments of \$6.7 million. During the six months ended June 30, 2007, we used approximately \$3.3 million to add crystal growth furnaces and approximately \$1.2 million to upgrade existing capacity in other areas. We expect to spend between \$15.0 million to \$20.0 million per year for 2008 and 2009 on capital expenditures to support our expected sales growth.

Cash flows from financing activities

Net cash provided by financing activities was \$520,000 and \$2.2 million for the six months ended June 30, 2008 and 2007, respectively. Net cash provided from financing activities for the six months ended June 30, 2008 reflects \$591,000 from proceeds from stock option exercises partially offset by remaining costs of \$38,000 from our IPO and \$29,000 of payments made on a capital lease. Net cash provided by financing activities for the six months ended June 30, 2007 reflects proceeds of \$8.1 million from refinancing our line of credit and term debt facility partially offset by \$5.9 million of payments made on capital leases and retirement of a refinanced line of credit and term debt facility.

Future liquidity requirements

We believe that our existing cash, cash equivalents, investments, and anticipated cash flows from operating activities will be sufficient to meet our anticipated cash needs for at least the next 12 months. These cash needs include cash required to fund our operations, taking into account

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

anticipated increases in operating expenses and our planned capital expenditures to support our continued growth. If the assumptions underlying our business plan regarding future revenues and expenses change or if unexpected opportunities or needs arise, we may seek to raise additional cash by selling equity or convertible debt securities. If we raise additional funds through the issuance of equity or convertible debt securities, the percentage ownership of our stockholders could be

Table of Contents

significantly diluted, and these newly-issued securities may have rights, preferences or privileges senior to those of existing stockholders. If we obtain debt financing, a substantial portion of our operating cash flow may be dedicated to the payment of principal and interest on such indebtedness, and the terms of the debt securities issued could impose significant restrictions on our operations. If we are unable to obtain financing on terms favorable to us, we may be unable to successfully execute our business plan.

Contractual obligations

The contractual obligations presented in the table below represent our estimates of future payments under fixed contractual obligations and commitments at June 30, 2008. Changes in our business needs, as well as actions by third parties and other factors, may cause these estimates to change. Because these estimates are complex and necessarily subjective, our actual payments in future periods are likely to vary from those presented in the table. The following table sets forth information relating to our contractual obligations at June 30, 2008:

	Less than 1 year	Payments due in			Total
		1-3 years	3-5 years (in millions)	More than 5 years	
Purchase obligations	\$ 5,540,000				\$ 5,540,000
Total contractual obligations	\$ 5,540,000	\$	\$	\$	\$ 5,540,000

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

We consider to be critical those accounting policies that require our most subjective or complex judgments, which often result from a need to make estimates about the effect of matters that are inherently uncertain, and that are among the most important of our accounting policies in the portrayal of our financial condition and results of operations. We believe the following to be our critical accounting policies, including the more significant estimates and assumptions used in preparation of our financial statements.

Revenue recognition

We recognize revenue from sales of products when:

Persuasive evidence of an arrangement exists. We require evidence of a purchase order with the customer specifying the terms and specifications of the product to be delivered, typically in the form of a signed quotation or purchase order from the customer.

Title has passed and the product has been delivered. Title passage and product delivery generally occurs when the product is delivered to a common carrier.

The price is fixed or determinable. All terms are fixed in the signed quotation or purchase order received from the customer. The purchase orders do not contain rights of cancellation, return, exchanges or refunds.

Collection of the resulting receivable is reasonably assured. Our standard arrangement with customers includes 30 day payment terms. Customers are subject to a credit review process that evaluates each customer's financial position and its ability to pay. We determine collectibility by considering the length of time the customer has been in business and our history of collections with that customer. If we determine that collection is not probable, no product is shipped and no revenue is recognized unless cash is received in advance.

Contract research revenue is recognized as services are performed. We execute agreements with our customers that clearly describe the scope of the project, the services we will provide, ownership of any tangible or intangible assets generated as part of the project, and the amount of consideration we will receive.

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

There are no significant judgments or estimates associated with our revenue recognition policies or processes. All of our revenue is denominated in US dollars.

Inventory valuation

We value our inventory at the lower of cost or market. Market is determined based on net realizable value. Cost is determined for raw materials on a first-in, first-out basis and work in process and finished goods are based on actual costs. We establish inventory reserves when conditions exist that suggest inventory may be in excess of anticipated demand or is obsolete based on customer required specifications. We evaluate the ability to realize the value of our inventory based on a combination of factors, including forecasted sales, estimated current and future market value and changes in customer's product specifications. Recoveries of previously written-down inventory are recognized only when the related inventory is sold and revenue has been recognized. Based on current demand and pricing of our products, we believe that it is unlikely that significant adjustments for inventory obsolescence will occur. Our method of estimating excess and obsolete inventory has remained consistent for all periods presented. However, if our recognition of excess or obsolete inventory is, or if our estimates of our inventory's potential utility become, less favorable than currently expected, additional inventory reserves may be required.

Table of Contents

Allowance for doubtful accounts

We estimate the allowance for doubtful accounts based on an assessment of the collectibility of specific customer accounts. The determination of risk for collection is assessed on a customer-by-customer basis considering our historical experience and future orders with the customer, changes in payment patterns, and recent information we have about the current status of our accounts receivable balances. If we determine that a specific customer is a risk for collection, we provide a specific allowance for credit losses to reduce the net recognized receivable to the amount we reasonably believe will be collected. We believe that, based on the customers to whom we sell and the nature of our agreements with them, our estimates are reasonable. Our method of estimating collectibility has remained consistent for all periods presented and with past collections experience. We believe that it is unlikely that significant adjustments to allowances for doubtful accounts will be necessary.

Stock-based compensation

Effective January 1, 2006, we adopted SFAS 123R which amends SFAS 123 Accounting for Stock-Based Compensation (SFAS 123), and requires us to expense stock options based upon the fair market value on the date of grant. We adopted SFAS 123R using the prospective method. Under this transition method, the provisions of SFAS 123R are applied to new awards and to awards modified, repurchased, or cancelled after January 1, 2006. We selected the Black-Scholes option pricing model to determine the fair value of stock options. The determination of the fair value of stock-based payment awards on the date of grant using an option-pricing model will be affected by assumptions regarding a number of complex and subjective variables. These variables include our expected stock volatility over the term of the awards, actual and projected employee stock option exercise behaviors, risk-free interest rates, forfeitures and expected dividends.

The expected term represents the weighted-average period that our stock options are expected to be outstanding and is based upon the vesting term of our options, a review of a peer group of companies, and expected exercise behavior. Until November 2007, we were operating as a private company, and, as a result, we were unable to use our actual price volatility data. Therefore, we estimate the volatility of our common stock based on volatility of similar entities over the expected term of our stock options. We base the risk-free interest rate that we use in the option pricing model on US Treasury zero-coupon issues with remaining terms similar to the expected term on the options. We do not anticipate paying any cash dividends in the foreseeable future and, therefore, use an expected dividend yield of zero in the option pricing model. We are required to estimate forfeitures at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from those estimates. The current forfeiture rate of 25% was based on our past history of pre-vesting forfeitures.

We had a choice of two attribution methods for allocating compensation costs under SFAS 123R, the straight-line method, which allocates expense on a straight-line basis over the requisite service period of the last separately vesting portion of an award, or the graded vesting attribution method, which allocates expense on a straight-line basis over the requisite service period for each separately vesting portion of the award as if the award was, in substance, multiple awards. We chose the former method and amortized the fair value of each option on a straight-line basis over the service period.

Based on the variables affecting the valuation of our common stock and the method used for allocating compensation costs, we recognized \$159,063 and \$324,623 in stock compensation expense during the three and six months ended June 30, 2008.

With respect to each option grant date for the three and six months ended June 30, 2007, we determined the deemed fair value of our common stock. As there was no public market for our common stock during these periods, this determination was necessarily subjective. In making this determination, we considered a number of factors, including:

the issuance price of our series of preferred shares to third parties;

the liquidation preference and other rights of the preferred shares; and

the fact that the option grants involved illiquid securities of a private company.

Valuation methodologies employed

The valuation methodologies we employed in connection with these 2007 option grants were based on various generally accepted valuation methods. Specifically, at each reporting date we analyzed the value of the company, or the business enterprise value, using market and income

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

approaches, and then allocated the business enterprise value using contingent claims analysis, an application of option pricing theory. The allocation of the business enterprise value to convertible preferred stock, common stock, warrants and stock options at June 30, 2007 used option pricing theory and considered the probability of an initial public offering.

In determining the business enterprise value at June 30, 2007, we used both market and income value approaches. The market approach used both comparable company and transaction valuation methods. The comparable company market approach used revenue multiples observed in active securities markets and the transaction method used both revenue and EBITDA (earnings before interest, taxes, depreciation and amortization) multiples observed in the mergers and acquisitions market. The income approach determines a business enterprise value using the discounted present value of projected cash flow streams.

Table of Contents

The final business enterprise value determined using the market and income approaches was then adjusted for appropriate marketability discounts. These marketability discounts were reduced at each reporting date, beginning with the December 31, 2006 reporting date, to reflect the increased probability of the initial public offering.

The allocation of the business enterprise value to each class of preferred stock and common stock was determined using contingent claims analysis, which is based on the principles of option pricing theory. Specifically, each class of security is modeled as a call option with a unique claim on our assets. The resulting claims allocate the anticipated proceeds between the different securities upon a liquidity event, which in our case was our initial public offering. In modeling each security as a call option, we used the Black-Scholes option pricing model.

Determining the fair value of our convertible preferred stock, common stock, warrants and stock options involves complex and subjective judgments involving estimates of revenue, earnings, assumed market growth rates and estimated costs, as well as appropriate discount rates. At the time of each valuation, the significant estimates used in the income approach (discounted cash flow model) included estimates of our revenue and revenue growth rates for several years into the future. Although each time we prepared such forecasts in the preparation of a valuation report, we did so based on assumptions that we believed to be reasonable and appropriate, there can be no assurance that any such estimates for earlier periods have come to pass or that any such estimates for future periods will prove to be accurate.

The most significant factors contributing to the difference between the fair value of the shares of our common stock subject to our 2007 stock option grants and the initial public offering price were the increase in probability of the completion of an initial public offering of our common stock and positive changes in market conditions. Due to our history of operating losses prior to 2007, including negative gross profit in 2005, our ability to achieve our initial public offering price was highly contingent on achieving current strong operating results. Achieving strong operating results in the quarter ended September 30, 2007 and through completion of our initial public offering validated our financial projections for subsequent periods and resulted in our ability to obtain the estimated initial public offering price.

The aggregate intrinsic value of all stock options outstanding at June 30, 2008 is \$14.7 million, based on the fair market value of the common stock at June 30, 2008.

Convertible preferred stock warrant liability

Beginning January 1, 2006, we began accounting for warrants to purchase our preferred stock issued in connection with financing agreements in accordance with FSP 150-5. Pursuant to FSP 150-5, we evaluate certain specifically identified conditions to determine whether the fair value of these warrants is required to be classified as a liability. The fair value of the warrants that were classified as liabilities was adjusted for changes in fair value at each reporting period, and the corresponding non-cash gain or loss was recorded in current period earnings. We estimated the fair market value of these warrants at the respective balance sheet dates using a Black-Scholes option-pricing model, based on the estimated market value of the underlying preferred stock at the measurement date, the remaining contractual term of the warrant, risk-free interest rates and expected dividends on and expected volatility of the price of the underlying preferred stock. These estimates, especially the market value of the underlying preferred stock and the expected volatility, are highly judgmental. The assumptions used in our Black-Scholes option pricing model for Series E, C, B, B-2 and A warrants at January 1, 2006 upon the adoption of FSP 150-5 were: (i) remaining contractual terms of 2.1 to 9.9 years; (ii) risk-free interest rate of 4.82% to 4.86%; (iii) expected volatility of 50% to 79%, and (iv) no expected dividend yield. The assumptions used in our Black-Scholes option pricing model for Series E, C, B, B-2 and A warrants at December 31, 2006 were: (i) remaining contractual terms of 1.3 to 9.1 years; (ii) risk-free interest rates of 4.70% to 5%; (iii) expected volatility of 47% to 76% and (iv) no expected dividend yield. In each case, the fair value of the underlying preferred stock was assessed primarily by a valuation prepared by management using the practice aid.

Upon the closing of our initial public offering in November 2007, outstanding warrants to purchase our preferred stock became warrants to purchase shares of our common stock and certain of these warrants to purchase our preferred stock were net exercised. As a result, upon the conversion of the preferred stock warrants to common stock warrants, the warrants were no longer subject to FSP 150-5. The then-current aggregate fair value of these warrants was reclassified from liabilities to additional paid-in-capital, a component of stockholders' equity, and we ceased to record any related periodic fair value adjustments.

Redeemable convertible preferred stock

Prior to our initial public offering, we issued various classes of preferred stock. The holders of Series A, B, B-2, C, C-2, D, D-2 and E preferred stock had the option to sell their shares back to us at the greater of the original purchase price plus accrued and unpaid dividends or the current fair market value of the shares plus accrued and unpaid dividends. As a result, the carrying value of the

Table of Contents

preferred stock was increased by an accretion amount each period so that the carrying amounts will equal the greater of fair value plus accrued and unpaid dividends or original purchase price plus accrued and unpaid dividends. The accreted amounts are recorded to accumulated deficit. The option to sell and the related accretion of the preferred shares terminated upon the closing of our initial public offering.

The fair value of our preferred stock was determined based upon the sales price of our preferred stock to third-party investors, and in 2007, when transactions in our preferred stock were not available, based upon valuations prepared by management using the methodology set forth in the practice aid. This methodology considered the probability and fair value of the sale of stock in an initial public offering. The valuation methodologies we used to estimate the fair value of our preferred stock have been applied consistently for all periods presented and the assumptions used were based on the best available information at that time. Accordingly, we do not believe that adjustments to amounts recorded in respect of our redeemable convertible preferred stock will be required.

RECENT ACCOUNTING PRONOUNCEMENTS

In December 2007, the FASB issued SFAS No. 141(R), Business Combinations. This Statement replaces FASB Statement No. 141, Business Combinations. SFAS No. 141(R) establishes principles and requirements for how an acquiring company: recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree; recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase; and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS No. 141(R) further changes the accounting treatment for certain specific items, including: acquisition costs will be generally expensed as incurred; acquired contingent liabilities will be recorded at fair value at the acquisition date and subsequently measured at either the higher of such amount or the amount determined under existing guidance for non-acquired contingencies; in-process research and development will be recorded at fair value as an indefinite-lived intangible asset at the acquisition date; restructuring costs associated with a business combination will be generally expensed subsequent to the acquisition date; and changes in deferred tax asset valuation allowances and income tax uncertainties after the acquisition date generally will affect income tax expense. SFAS No. 141(R) applies prospectively to our business combinations for which the acquisition date is on or after January 1, 2009.

OFF-BALANCE SHEET ARRANGEMENTS

For the quarter ended June 30, 2008, we did not engage in any off-balance sheet arrangements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Market risk is the risk of loss related to changes in market prices, including interest rates, of financial instruments that may adversely impact our financial position, results of operations or cash flows.

Foreign currency exchange risk. To date, substantially all of our international sales have been transacted in US dollars. Accordingly, we have limited exposure to foreign currency exchange rates and do not enter into foreign currency hedging transactions.

Interest rate risk. We do not have any long-term borrowings. Our investments consist of cash, cash equivalents, commercial paper, corporate, state and local bonds, and US treasury securities. The primary objective of our investment activities is to preserve principal while maximizing income without significantly increasing risk. We do not enter into investments for trading or speculative purposes. Our investments are exposed to market risk due to a fluctuation in interest rates, which may affect our interest income and the fair market value of our investments. Due to the short-term nature of our investment portfolio, we do not believe an immediate 10% increase or decrease in interest rates would have a material effect on the fair market value of our portfolio, and therefore we do not expect our operating results or cash flows to be materially affected by a sudden change in market interest rates.

Inflation. Our operations have not been, and we do not expect them to be, materially affected by inflation. However, historically, the prices we charge our customers are market driven, and therefore we may not be able to increase our prices to offset any increase in our material or labor costs. Our inability or failure to do so could harm our business, financial condition and results of operations.

ITEM 4. CONTROLS AND PROCEDURES

Management's evaluation of disclosure controls and procedures

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

Based on evaluations at June 30, 2008, our chief executive officer and chief financial officer (together, our certifying officers), with the participation of the management team, have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and that material information relating to the Company is accumulated and communicated to management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosures.

Table of Contents

Changes in internal control over financial reporting

Our management, including our chief executive officer and chief financial officer, believes that a controls system, no matter how well designed and operated, is based in part upon certain assumptions about the likelihood of future events, and therefore can only provide reasonable, not absolute assurance that the objectives of the control system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

Our certifying officers have concluded that there were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) during the three months ended June 30, 2008, that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Our Quarterly Report on Form 10-Q for the quarter ended June 30, 2008 does not include a report of management's assessment regarding internal control over financial reporting or an attestation report of our independent registered public accounting firm due to a transition period established by rules of the Securities and Exchange Commission for newly public companies. At the end of fiscal year 2008, Section 404 of the Sarbanes-Oxley Act of 2002 will require our management to provide an assessment of the effectiveness of our internal control over financial reporting, and our independent registered public accounting firm will be required to report on the effectiveness of our internal control over financial reporting.

Table of Contents

PART II

ITEM 1. LEGAL PROCEEDINGS

None.

ITEM 1A. RISK FACTORS

Our business is influenced by many factors that are difficult to predict, involve uncertainties that may materially affect actual results and are often beyond our control. We have identified a number of these risk factors in our Annual Report on Form 10-K for the year ended December 31, 2007, which factors should be taken into consideration when reviewing the information contained in this report. There have been no material changes with regard to the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2007.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

For the quarter ended June 30, 2008, three investors exercised warrants to purchase an aggregate of 28,791 shares of our common stock at an exercise price of \$7.28 and one investor exercised warrants to purchase 24,438 shares of our common stock at an exercise price of \$3.6478. In lieu of paying the exercise price in cash, the investors used the cashless exercise features of the warrants and surrendered to us for cancellation an aggregate of 10,566 shares of our common stock, resulting in a net issuance of 42,663 shares in the aggregate to the investors.

(b) On November 15, 2007, our Registration Statement on Form S-1 (333-145880) covering the initial public offering of our common stock was declared effective by the SEC. We registered 5,500,000 shares of common stock to be sold by us, 1,200,000 shares to be sold by selling stockholders and an additional 1,005,000 to be sold by us to cover an overallotment option granted to the underwriters. UBS Securities LLC, Canaccord Adams Inc., CIBC World Markets Corp. and Janney Montgomery Scott LLC acted as underwriters in the offering, and UBS Securities served as sole book-running manager of our initial public offering. The closing of the offering was on November 21, 2007, at which time we sold 6,505,000 shares (including the underwriters' overallotment) and the selling stockholders sold 1,200,000 shares.

The shares sold by us and the selling stockholders were sold at a price to the public of \$14.00 per share. Costs incurred in connection with the issuance and distribution of the securities registered were as follows:

Underwriting discounts and commissions \$6,374,900

Other expenses \$3,650,000, which included payments for legal services incurred on behalf of certain of the selling stockholders for their participation in the offering, including: Gazelle TechVentures Fund, L.P. and Gazelle Co-Investment Fund, L.P. (the "Gazelle Funds") who sold approximately 29.56% of the shares sold by the selling stockholders and benefited from offering expenses paid by us on their behalf. Don N. Aquilano, the chairman of our board of directors, is also the managing director and president of Gazelle TechVentures, Inc., the manager of Monument Technology Partners, LLC, which is the general partner of the Gazelle Funds.

Total expenses \$10,024,900

Except as described above, none of these payments were direct or indirect payments to directors or officers of the Company or their associates or to persons owning 10% or more of any class of equity securities of the Company or any of our affiliates. The net offering proceeds to us after deducting the total expenses described above totaled approximately \$81.0 million. We did not receive any portion of the proceeds from the sale of shares by the selling stockholders. The net proceeds were invested in interest bearing short-term and long-term marketable securities.

The principal purposes of the offering were to obtain additional capital, establish a public market for our common stock and facilitate our future access to public capital markets.

Edgar Filing: Rubicon Technology, Inc. - Form 10-Q

In 2007, we had used approximately \$7.6 million of the net proceeds to repay borrowings outstanding under the revolving line of credit financing agreement with Hercules Technology Growth Capital, Inc. and to pay related fees and expenses. In the six months ended June 30, 2008, we used \$10.9 million for the purchase and installation of leasehold improvements and machinery and equipment associated with the expansion of our Bensenville, Illinois and Franklin Park, Illinois manufacturing facilities. We intend to use the remaining \$62.5 million of the net proceeds from the offering for additional expansion of our manufacturing facilities, working capital and other general corporate purposes.

(c) We did not repurchase any shares of our equity securities during the quarter ended June 30, 2008.
