Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act.) Yes  No

## Edgar Filing: SI Financial Group, Inc. - Form 10-K

The aggregate market value of the voting and non-voting common equity held by non-affiliates was \$41.2 million, which was computed by reference to the closing price of \$8.30, at which the common equity was sold as of June 30, 2008. Solely for the purposes of this calculation, the shares held by SI Bancorp, MHC and the directors and officers of the registrant are deemed to be affiliates.

As of March 16, 2009, there were 11,800,445 shares of the registrant's common stock outstanding.

### **DOCUMENTS INCORPORATED BY REFERENCE**

Portions of the Company's Annual Report to Stockholders and the Proxy Statement for the 2009 Annual Meeting of Stockholders are incorporated by reference into Parts II and III of this Form 10-K.

**Forward-Looking Statements**

*This report may contain certain forward-looking statements within the meaning of the federal securities laws, which are made in good faith pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements are not historical facts; rather, they are statements based on management's current expectations regarding our business strategies, intended results and future performance. Forward-looking statements are generally preceded by terms such as expects, believes, anticipates, intends, estimates, projects and similar expressions. Management's ability to predict results of the effect of future plans or strategies is inherently uncertain. Factors that could have a material adverse effect on the operations of SI Financial Group, Inc. (the Company) and its subsidiaries include, but are not limited to, changes in interest rates, national and regional economic conditions, legislative and regulatory changes, monetary and fiscal policies of the United States government, including policies of the United States Treasury and the Federal Reserve Board, the quality and composition of the loan or investment portfolios, demand for loan products, deposit flows, competition, demand for financial services in the Company's market area, changes in real estate market values in the Company's market area and changes in relevant accounting principles and guidelines. Additional factors that may affect the Company's results are discussed in Item 1A. Risk Factors in the Company's annual report on Form 10-K and in other reports filed with the Securities and Exchange Commission. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Except as required by applicable law or regulation, the Company does not undertake, and specifically disclaims any obligation, to release publicly the result of any revisions that may be made to any forward-looking statements to reflect events or circumstances after the date of the statements or to reflect the occurrence of anticipated or unanticipated events.*

**PART I.**

**Item 1. Business.**

**General**

*In certain instances where appropriate, the terms we, us and our refer to SI Financial Group, Inc. and Savings Institute Bank and Trust Company or both.*

SI Financial Group, Inc. was established on August 6, 2004 to become the parent holding company for Savings Institute Bank and Trust Company (the Bank or Savings Institute) upon the conversion of the Bank's former parent, SI Bancorp, Inc., from a state-chartered to a federally-chartered mutual holding company. At the same time, the Bank also converted from a state-chartered to a federally-chartered savings bank. On September 30, 2004, the Company completed its minority stock offering with the sale of 5,025,500 shares of its common stock to the public, 251,275 shares contributed to SI Financial Group Foundation and 7,286,975 issued to SI Bancorp, MHC. The Bank is a wholly-owned subsidiary of the Company and management of the Company and the Bank are substantially similar. The Company neither owns nor leases any property, but instead uses the premises, equipment and other property of the Bank. Thus, the financial information and discussion contained herein primarily relates to the activities of the Bank.

The Bank operates as a community-oriented financial institution offering a full range of financial services to consumers and businesses in its market area, including insurance, trust and investment services. The Bank attracts deposits from the general public and uses those funds to originate one- to four-family residential, multi-family and commercial real estate, commercial business and consumer loans, which it holds primarily for investment.

## **Table of Contents**

### **Branch Acquisitions**

The Company completed acquisitions of branch offices in Colchester and New London, Connecticut (the Branch Acquisitions ) in January and March 2008, respectively. In accordance with Financial Accounting Standards Board No. 141, *Business Combinations*, the Company accounted for the acquisitions as purchases during the first quarter of 2008. Related to the Colchester branch acquisition, the Company acquired loans and fixed assets totaling \$460,000 and assumed deposit liabilities of \$18.4 million. The Company purchased loans and fixed assets aggregating \$7.9 million and assumed deposit liabilities of \$9.3 million in the New London acquisition. The Company received \$15.8 million in cash related to the Branch Acquisitions.

### **Sale of Branch Office**

In January 2009, the Company completed the sale of its Gales Ferry, Connecticut branch office to Putnam Bank. According to the terms of the agreement, the Company provided \$619,000 in cash in connection with the sale of deposit liabilities totaling \$1.7 million and fixed assets and other assets aggregating \$1.0 million, resulting in a gain on the sale of \$100,000.

### **Availability of Information**

The Company's annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to such reports filed or furnished pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934, as amended, are made available free of charge on the Company's website, [www.mysifi.com](http://www.mysifi.com), as soon as reasonably practicable after the Company electronically files such material with, or furnishes it to, the Securities and Exchange Commission (the SEC ). The information on the Company's website shall not be considered as incorporated by reference into this Form 10-K.

### **Market Area**

The Company is headquartered in Willimantic, Connecticut, which is located in eastern Connecticut approximately 30 miles east of Hartford. The Bank operates offices in Windham, New London, Tolland, Hartford and Middlesex Counties, which the Bank considers its primary market area. The economy in its market area is primarily oriented to the educational, service, entertainment, manufacturing and retail industries.

The major employers in the area include several institutions of higher education, the Mohegan Sun and Foxwoods casinos, General Dynamics Defense Systems and Pfizer, Inc. According to published statistics, Windham County's population in 2008 was 119,053 and consisted of 44,712 households. The population increased 9.1% from 2000. Median household income in Windham County is \$55,000, compared to \$67,000 for Connecticut as a whole and \$44,000 nationally. The surrounding counties of Hartford, New London, Tolland and Middlesex Counties have median household incomes of \$63,000, \$62,000, \$74,000 and \$74,000, respectively.

### **Competition**

The Bank faces significant competition for the attraction of deposits and origination of loans. The most direct competition for deposits has historically come from the several financial institutions operating in the Bank's market area and, to a lesser extent, from other financial service companies, such as brokerage firms, credit unions and insurance companies. The Bank also faces competition for investors' funds from money market funds and other corporate and government securities. At June 30, 2008, which is the most recent date for which data is available from the Federal Deposit Insurance Corporation (the FDIC ), the Bank held approximately 20.64% of the deposits in Windham County, which is the largest market share

**Table of Contents**

out of 10 financial institutions with offices in this county. Also, at June 30, 2008, the Bank held approximately 1.05% of the deposits in Hartford, New London and Tolland Counties, which is the 15<sup>th</sup> market share out of 37 financial institutions with offices in these counties. Banks owned by Bank of America Corp., Webster Bank Financial Corporation, TD Banknorth Group, Inc., Banco Santander and Citizens Financial Group, Inc., all of which are large regional bank holding companies, also operate in the Bank's market area. These institutions are significantly larger and, therefore, have significantly greater resources than the Bank does and may offer products and services that the Bank does not provide.

The Bank's competition for loans comes primarily from financial institutions in its market area, and to a lesser extent from other financial service providers, such as mortgage companies and mortgage brokers. Competition for loans also comes from the increasing number of non-depository financial service companies entering the mortgage market, such as insurance companies, securities companies and specialty finance companies.

The Bank expects competition to increase in the future as a result of legislative, regulatory and technological changes and the continuing trend of consolidation in the financial services industry. Technological advances, for example, have lowered barriers to entry, allowed banks to expand their geographic reach by providing services over the Internet and made it possible for non-depository institutions to offer products and services that traditionally have been provided by banks. Changes in federal law permit affiliation among banks, securities firms and insurance companies, which promotes a competitive environment in the financial services industry. Competition for deposits and the origination of loans could limit the Company's growth in the future.

**Lending Activities**

**General.** The Bank's loan portfolio consists primarily of one- to four-family residential mortgage loans, multi-family and commercial real estate loans and commercial business loans. To a much lesser extent, the loan portfolio includes construction and consumer loans. The Bank historically and currently originates loans primarily for investment purposes. At December 31, 2008, the Bank had no loans that were held for sale. The following table summarizes the composition of the Bank's loan portfolio in dollar amounts and as a percentage of the respective portfolio at the dates indicated.

<i>(Dollars in Thousands)</i>	2008		2007		At December 31, 2006		2005		2004

**Table of Contents**

***One- to Four-Family Residential Loans.*** The Bank's primary lending activity is the origination of mortgage loans to enable borrowers to purchase or refinance existing homes or to construct new residential dwellings in its market area. The Bank offers fixed-rate and adjustable-rate mortgage loans with terms up to 40 years. Borrower demand for adjustable-rate loans versus fixed-rate loans is a function of the level of current and anticipated future interest rates, the difference between the interest rates and loan fees offered for fixed-rate mortgage loans and the initial period interest rates and loan fees for adjustable-rate loans. The relative amount of fixed-rate mortgage loans and adjustable-rate mortgage loans that can be originated at any time is largely determined by the demand for each in a competitive environment and the effect each has on the Bank's interest rate risk. The loan fees charged, interest rates and other provisions of mortgage loans are determined on the basis of the Bank's own pricing criteria and competitive market conditions. Additionally, the Bank offers reverse mortgages to its customers, through a correspondent relationship with another institution, in response to increasing demand for this type of product.

The Bank offers fixed-rate loans with terms of 10, 15, 20, 30 or 40 years. The Bank's adjustable-rate mortgage loans are based primarily on 30 year amortization schedules. Interest rates and payments on adjustable-rate mortgage loans adjust annually after a one, three, five, seven or ten-year initial fixed period. Interest rates and payments on adjustable-rate loans are adjusted to a rate typically equal to 2.75% (2.875% for jumbo loans) above the one-year constant maturity Treasury index. The maximum amount by which the interest rate may be increased or decreased is generally 2% per adjustment period and the life time interest rate cap is generally 6% over the initial interest rate of the loan.

While the Bank anticipates that adjustable-rate loans will better offset the adverse effects of an increase in interest rates as compared to fixed-rate mortgages, the increased mortgage payments required of adjustable-rate loan borrowers in a rising interest rate environment could cause an increase in delinquencies and defaults. The marketability of the underlying property also may be adversely affected in a high interest rate environment. In addition, although adjustable-rate mortgage loans help make the Bank's asset base more responsive to changes in interest rates, the extent of this interest sensitivity is limited by the annual and life time interest rate adjustment limits.

Generally, the Bank does not originate conventional loans with loan-to-value ratios exceeding 95% and generally originates loans with a loan-to-value ratio in excess of 80% only when secured by first liens on owner-occupied one- to four-family residences. Loans with loan-to-value ratios in excess of 80% generally require private mortgage insurance or additional collateral. The Bank requires all properties securing mortgage loans to be appraised by a board approved independent licensed appraiser and requires title insurance on all first mortgage loans. Borrowers must obtain hazard insurance and flood insurance for loans on property located in a flood zone, before closing the loan.

In an effort to provide financing for moderate income and first-time buyers, the Bank offers Federal Housing Authority, Veterans Administration and Connecticut Housing Finance Agency loans and a first-time home buyers program. The Bank offers fixed-rate residential mortgage loans through these programs to qualified individuals and originates the loans using modified underwriting guidelines.

***Multi-Family and Commercial Real Estate Loans.*** The Bank makes multi-family and commercial real estate loans throughout its market area for the purpose of acquiring, developing, improving or refinancing multi-family and commercial real estate where the property is the primary collateral securing the loan, and the income generated from the property is the primary repayment source. The Bank offers fixed-rate and adjustable-rate mortgage loans secured by multi-family and commercial real estate. The Bank's multi-family and commercial real estate loans are generally secured by condominiums, apartment buildings, retail facilities, single-family subdivisions as well as owner-occupied properties located in its market area and used for businesses. The Bank intends to continue to emphasize this segment of its loan portfolio as a result of yields that are generally higher than one- to four-family residential loans, and are more sensitive to changes in market interest rates.

---

**Table of Contents**

The Bank originates adjustable-rate multi-family and commercial real estate loans for terms up to 25 years. Interest rates and payments on these loans typically adjust every five years after a five-year initial fixed-rate period. Interest rates and payments on adjustable-rate loans are adjusted to a rate typically 3.0-3.5% above the classic advance rates offered by the Federal Home Loan Bank of Boston (the FHLB). There are no adjustment period or life time interest rate caps. Loans are secured by first mortgages that generally do not exceed 75% of the property's appraised value. At December 31, 2008, the largest outstanding multi-family or commercial real estate loan was \$7.2 million. This loan is secured by a nursing home and rehabilitation facility and was performing according to its terms at December 31, 2008.

Loans secured by multi-family and commercial real estate generally have larger balances and involve a greater degree of risk than one- to four-family residential mortgage loans. Of primary concern in multi-family and commercial real estate lending is the borrower's creditworthiness and the feasibility and cash flow potential of the project. Payments on loans secured by income properties often depend on the successful operation and management of the properties. As a result, repayment of such loans may be subject, to a greater extent than residential real estate loans, to adverse conditions in the real estate market or the economy. To monitor cash flows on income properties, the Bank requires borrowers and loan guarantors, if any, to provide annual financial statements on multi-family and commercial real estate loans. In reaching a decision on whether to make a multi-family or commercial real estate loan, consideration is given to the net operating income of the property, the borrower's expertise, credit history and profitability and the value of the underlying property. In addition, with respect to commercial real estate rental properties, the Bank will also consider the term of the lease and the quality of the tenants. The Bank generally requires that the properties securing these real estate loans have debt service coverage ratios of at least 1.20. The debt service coverage ratio is equal to cash flows before interest, depreciation and required principal payments. Appropriate environmental assessments are generally required for commercial real estate loans over \$100,000, based upon the environmental risk factors for the subject collateral property.

***Construction and Land Loans.*** The Bank originates loans to individuals, and to a lesser extent, builders, to finance the construction of residential dwellings. The Bank also originates construction loans for commercial development projects, including condominiums, apartment buildings, single-family subdivisions as well as owner-occupied properties used for businesses. Residential construction loans generally provide for the payment of interest only during the construction phase, which is usually twelve months. At the end of the construction phase, the loan generally converts to a permanent mortgage loan. Commercial construction loans generally provide for the payment of interest only during the construction phase which may range from three to twenty-four months. Loans generally can be made with a maximum loan-to-value ratio of 80% on residential construction and 75% on commercial construction for nonresidential properties and 80% on commercial multi-family construction of the lower of appraised value or cost of the project, whichever is less. At December 31, 2008, the largest outstanding residential construction loan commitment was for \$663,000, of which \$116,000 was outstanding. At December 31, 2008, the largest outstanding commercial construction loan commitment for the construction of a retail strip mall was \$4.6 million, of which \$2.5 million was outstanding. These loans were performing according to their terms at December 31, 2008. Primarily all commitments to fund construction loans require an appraisal of the property by a board approved independent licensed appraiser. Also, inspections of the property are required before the disbursement of funds during the term of the construction loan.

Construction financing is generally considered to involve a higher degree of risk of loss than long-term financing on improved, occupied real estate. Risk of loss on a construction loan depends largely upon the accuracy of the initial estimate of the property's value at completion of construction or development and

---

**Table of Contents**

the estimated cost, including interest, of construction. During the construction phase, a number of factors could result in delays and cost overruns. If the estimate of construction costs proves to be inaccurate, the Bank may be required to advance funds beyond the amount originally committed to permit completion of the development. If the estimate of value proves to be inaccurate, the Bank may be confronted, at or before the maturity of the loan, with a project having a value which is insufficient to assure full repayment. As a result of the foregoing, construction lending often involves the disbursement of substantial funds with repayment dependent, in part, on the success of the ultimate project rather than the ability of the borrower or guarantor to repay principal and interest. If the Bank is forced to foreclose on a project before or at completion due to a default, there can be no assurance that the Bank will be able to recover all of the unpaid balance of, and accrued interest on, the loan as well as related foreclosure and holding costs.

The Bank also originates land loans to individuals, local contractors and developers only for making improvements on approved building lots, subdivisions and condominium projects within two years of the date of the loan. Such loans to individuals generally are written with a maximum loan-to-value ratio based upon the appraised value or purchase price of the land. Maximum loan-to-value ratio on raw land is 50%, while the maximum loan-to-value ratio for land development loans involving approved projects is 65%. The Bank offers fixed-rate land loans and variable-rate land loans that adjust annually. Interest rates and payments on adjustable-rate land loans are adjusted to a rate typically equal to the then current *The Wall Street Journal* prime rate plus a 1.0 2.0% margin. The maximum amount by which the interest rate may be increased or decreased is generally 2% annually and the life time interest rate cap is generally 6% over the initial rate of the loan. Land loans totaled \$738,000 at December 31, 2008.

**Commercial Business Loans.** The Bank originates commercial business loans to a variety of professionals, sole proprietorships and small businesses primarily in its market area. The Bank offers a variety of commercial lending products, the maximum amount of which is limited by the Bank's in-house loans to one borrower limit. At December 31, 2008, the largest commercial loan was a \$1.4 million loan, which is secured by a business asset consisting of a waste processing system. This loan was performing according to its terms at December 31, 2008.

When originating commercial business loans, the Bank considers the financial statements of the borrower, the borrower's payment history of both corporate and personal debt, the debt service capabilities of the borrower, the projected cash flows of the business, viability of the industry in which the customer operates and the value of the collateral.

Unlike residential mortgage loans, which generally are made on the basis of the borrower's ability to make repayment from his or her employment or other income, and which are secured by real property whose value tends to be more easily ascertainable, commercial loans are of higher risk and typically are made on the basis of the borrower's ability to make repayment from the cash flow of the borrower's business. As a result, the availability of funds for the repayment of commercial loans may depend substantially on the success of the business itself. Further, any collateral securing such loans may depreciate over time, may be difficult to appraise and may fluctuate in value.

The Bank offers loans secured by business assets other than real estate, such as business equipment and inventory. These loans are originated with maximum loan-to-value ratios of 75% of the value of the personal property. The Bank originates lines of credit to finance the working capital needs of businesses to be repaid by seasonal cash flows or to provide a period of time during which the business can borrow funds for planned equipment purchases. These loans convert to a term loan at the expiration of a draw period, which is not to exceed twelve months and will be paid over a pre-defined amortization period. Additional products such as time notes, letters of credit, equipment lease financing and Small Business Administration guaranteed loans are offered. Additionally, the Bank purchases loans guaranteed by the Small Business Administration (SBA) and the United States Department of Agriculture (USDA). At December 31, 2008, SBA and USDA loans totaled \$45.7 million.

## **Table of Contents**

**Consumer Loans.** The Bank offers a variety of consumer loans, primarily home equity lines of credit, and, to a lesser extent, loans secured by marketable securities, passbook or certificate accounts, motorcycles, automobiles and recreational vehicles, as well as unsecured loans. Generally, the Bank offers automobile loans with a maximum loan-to-value ratio of 100% of the purchase price for new vehicles. Unsecured loans generally have a maximum borrowing limit of \$10,000 and a maximum term of five years.

The procedures for underwriting consumer loans include an assessment of the applicant's payment history on other debts and their ability to meet existing obligations and payments on the proposed loans. Although the applicant's creditworthiness is a primary consideration, the underwriting process also includes a comparison of the value of the collateral, if any, to the proposed loan amount. Home equity lines of credit have adjustable rates of interest that are indexed to the prime rate as reported in *The Wall Street Journal*. The Bank will offer home equity loans with a maximum combined loan-to-value ratio of 80%. A home equity line of credit may be drawn down by the borrower for an initial period of five years from the date of the loan agreement. During this period, the borrower has the option of paying, on a monthly basis, either principal and interest or only interest. If not renewed, the borrower has to pay back the amount outstanding under the line of credit over a term not to exceed ten years, beginning at the end of the five-year period.

Consumer loans may entail greater risk than do residential mortgage loans, particularly in the case of consumer loans that are unsecured or secured by assets that depreciate rapidly. In such cases, repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment for the outstanding loan and the remaining deficiency often does not warrant further substantial collection efforts against the borrower. In addition, consumer loan collections depend on the borrower's continuing financial stability, and therefore, are more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy. Furthermore, the application of various federal and state laws, including federal and state bankruptcy and insolvency laws, may limit the amount which can be recovered on such loans.

**Loan Originations, Purchases, Sales and Servicing.** Loan originations come from a number of sources. The primary source of loan originations are the Bank's in-house loan originators, and to a lesser extent, local mortgage brokers, advertising and referrals from customers.

From time to time, the Bank will purchase whole participations in loans fully guaranteed by the United States Department of Agriculture and the Small Business Administration. The loans are primarily for commercial and agricultural properties located throughout the United States. The Bank purchased \$12.3 million in loans during 2008 and no loans in fiscal 2007.

The Bank generally originates loans for portfolio but from time to time will sell loans in the secondary market, primarily fixed-rate one- to four-family residential mortgage loans with servicing retained, based on prevailing market interest rate conditions, an analysis of the composition and risk of the loan portfolio, liquidity needs and interest rate risk management. Generally, loans are sold without recourse. The Bank utilizes the proceeds from these sales primarily to meet liquidity needs. In 2008, the Bank began selling loans to the Federal Home Loan Bank of Boston under the Mortgage Partnership Finance program. Proceeds from the sale of loans totaled \$14.4 million and \$13.8 million for the years ended December 31, 2008 and 2007, respectively.

At December 31, 2008, the Bank retained the servicing rights on \$81.5 million of loans for others, consisting primarily of fixed-rate mortgage loans sold with or without recourse to third parties. Loan repurchase commitments are agreements to repurchase loans previously sold upon the occurrence of

**Table of Contents**

conditions established in the contract, including default by the underlying borrower. At December 31, 2008, the balance of loans sold with recourse totaled \$43,000. Loan servicing includes collecting and remitting loan payments, accounting for principal and interest, contacting delinquent mortgagors, processing insurance and tax payments on behalf of borrowers, assisting in foreclosures and property dispositions when necessary and general administration of loans. The related servicing rights for these loans were \$423,000 and \$422,000 at December 31, 2008 and 2007, respectively. Amortization of mortgage servicing rights totaled \$114,000 and \$94,000 for the years ended December 31, 2008 and 2007, respectively.

The following table sets forth the Bank's loan originations, loan purchases, loan sales, principal repayments, charge-offs and other reductions on loans for the years indicated.

<i>(Dollars in Thousands)</i>	Years Ended December 31,	
	2008	2007
<b>Loans at beginning of year</b>	\$ 591,393	\$ 577,218

<b>Net increase in loans</b>	30,347	14,175
<b>Loans at end of year</b>	\$ 621,740	\$ 591,393

**Table of Contents**

**Loan Maturity.** The following table shows the contractual maturity of the Bank's loan portfolio at December 31, 2008. The table does not reflect any estimate of prepayments, which significantly shortens the average life of all loans, and may cause actual repayment experience to differ from that shown below. Demand loans having no stated schedule of repayment and no stated maturity are reported as due in one year or less.

<i>(Dollars in Thousands)</i>	Amounts Due In			Total Amount Due
	One Year or Less	More Than One Year to Five Years	More Than Five Years	
<b>Real estate loans:</b>				
Residential 1 to 4 family	\$ 88	\$ 9,911	\$ 322,400	\$ 332,399
Multi-family and commercial	760	4,930	153,003	158,693

<b>Total real estate loans</b>	<b>8,124</b>	<b>15,727</b>	<b>495,133</b>	<b>518,984</b>
<b>Commercial business loans</b>	<b>12,638</b>	<b>10,376</b>	<b>57,635</b>	<b>80,649</b>
<b>Consumer loans</b>	<b>92</b>	<b>1,781</b>	<b>20,234</b>	<b>22,107</b>
<b>Total loans</b>	<b>\$ 20,854</b>	<b>\$ 27,884</b>	<b>\$ 573,002</b>	<b>\$ 621,740</b>

While one- to four-family residential real estate loans are normally originated with terms of up to 40 years, such loans typically remain outstanding for substantially shorter periods because borrowers often prepay their loans in full upon the sale of the property pledged as security or upon refinancing the original loan. Therefore, average loan maturity is a function of, among other factors, the level of purchase, sale and refinancing activity in the real estate market, prevailing interest rates and the interest rates payable on outstanding loans.

The following table sets forth, at December 31, 2008, the dollar amount of gross loans receivable contractually due after December 31, 2009, and whether such loans have either fixed interest rates, floating or adjustable interest rates.

<i>(Dollars in Thousands)</i>	Due After December 31, 2009		
	Fixed Rates	Floating or Adjustable Rates	Total
<b>Real estate loans:</b>			
Residential 1 to 4 family	\$ 199,331	\$ 132,980	\$ 332,311
Multi-family and commercial	11,423	146,510	157,933
Construction	14,241	6,375	20,616
<b>Total real estate loans</b>	<b>224,995</b>	<b>285,865</b>	<b>510,860</b>
<b>Commercial business loans</b>	<b>34,631</b>	<b>33,380</b>	<b>68,011</b>
<b>Consumer loans</b>	<b>5,447</b>	<b>16,568</b>	<b>22,015</b>
<b>Total loans</b>	<b>\$ 265,073</b>	<b>\$ 335,813</b>	<b>\$ 600,886</b>

**Loan Approval Procedures and Authority.** The Bank's lending activities follow written, nondiscriminatory, underwriting standards and loan origination procedures established by the Board of Directors and management. All residential mortgages and consumer home equity lines of credit in excess of \$6.0 million or all commercial loans and other consumer loans in excess of \$2.0 million require the approval of the Board of Directors. The Loan Committee of the Board of Directors has the authority to approve: (1) residential mortgage loans and consumer home equity lines of credit up to \$6.0 million and

**Table of Contents**

(2) commercial and other consumer loans up to \$2.0 million. The President and the Senior Credit Officer have approval for: (1) residential mortgage loans that conform to Fannie Mae and Freddie Mac standards up to \$2.0 million or \$417,000 for those that are non-conforming and (2) consumer and commercial loans up to \$250,000 individually or \$2.0 million jointly for consumer home equity lines of credit or \$1.0 million jointly for commercial and other consumer loans.

***Loans to One Borrower.*** The maximum amount that the Bank may lend to one borrower and the borrower's related entities is limited, by regulation, to generally 15% of the Bank's stated capital and reserves. At December 31, 2008, the Bank's regulatory limit on loans to one borrower was \$10.4 million. At that date, the Bank's largest lending relationship was \$8.6 million, representing two commercial business loans, a commercial permanent mortgage loan for the construction of a nursing home and rehabilitation facility, and a commercial permanent mortgage loan to purchase an adjacent property, of which \$8.2 million was outstanding and performing according to the original repayment terms.

***Loan Commitments.*** The Bank issues commitments for fixed-rate and adjustable-rate mortgage loans conditioned upon the occurrence of certain events. Commitments to originate mortgage loans are legally binding agreements to lend to customers and generally expire in 90 days or less from the date of the application.

***Delinquencies.*** When a borrower fails to make a required loan payment, the Bank takes a number of steps to have the borrower cure the delinquency and restore the loan to current status. The Bank makes initial contact with the borrower when the loan becomes 15 days past due. If payment is not then received by the 30th day of delinquency, additional letters and phone calls generally are made. When the loan becomes 90 days past due, a letter is sent notifying the borrower that foreclosure proceedings will commence if the loan is not brought current within 30 days. Generally, when the loan becomes 120 days past due, the Bank will commence foreclosure proceedings against any real property that secures the loan or attempt to repossess any personal property that secures a consumer or commercial loan. If a foreclosure action is instituted and the loan is not brought current, paid in full, or refinanced before the foreclosure sale, the real property securing the loan is typically sold at foreclosure. The Bank may consider loan repayment arrangements with certain borrowers under certain circumstances.

On a monthly basis, management informs the Board of Directors of the amount of loans delinquent more than 30 days and over, all loans in foreclosure and other real estate owned.

**Table of Contents**

The following table sets forth the delinquencies in the Bank's loan portfolio as of the dates indicated.

(Dollars in Thousands)	December 31, 2008				December 31, 2007			
	60 Number of Loans	89 Days Principal Balance of Loans	90 Days or More Number of Loans	Principal Balance of Loans	60 Number of Loans	89 Days Principal Balance of Loans	90 Days or More Number of Loans	Principal Balance of Loans

<b>Commercial business loans</b>	<b>2</b>	<b>843</b>	<b>5</b>	<b>1,457</b>	<b>3</b>	<b>499</b>	<b>1</b>	<b>8</b>
<b>Total delinquent loans</b>	<b>13</b>	<b>\$ 3,200</b>	<b>20</b>	<b>\$ 9,431</b>	<b>12</b>	<b>\$ 4,691</b>	<b>10</b>	<b>\$ 3,075</b>

At December 31, 2008, total delinquencies of 60 days or more past due totaled \$12.6 million, which represented an increase of \$4.8 million compared to \$7.8 million at December 31, 2007. Of the \$2.3 million in commercial business loans that were delinquent 60 days or more at December 31, 2008, \$1.8 million represented purchased USDA loans that are guaranteed by the full faith and credit of the United States.

**Classified Assets.** Management of the Bank, including the Managed Asset Committee, consisting of a number of the Bank's officers, review and classify the assets of the Bank on a monthly basis and the Board of Directors reviews the results of the reports on a quarterly basis. Federal regulations and the Bank's internal policies require that management utilize an internal asset classification system to monitor and evaluate the credit risk inherent in its loan portfolio. The Bank currently classifies problem and potential problem assets as *substandard*, *doubtful*, *loss* or *special mention*. An asset is considered *substandard* if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. *Substandard* assets include those assets that are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Assets characterized as *doubtful* have all the weaknesses inherent in those classified as *substandard* with the additional characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, conditions and values, questionable, and there is a high probability of loss. Assets classified as *loss* are those assets considered uncollectible and of such little value that their continuance as assets, without the establishment of a specific loss reserve, is not warranted. In addition, assets that do not currently expose the Bank to sufficient risk to warrant classification in one of the aforementioned categories but possess credit deficiencies or potential weaknesses are required to be designated *special mention*. When an asset is classified as *substandard* or *doubtful*, a specific allowance for loan losses may be established. If an asset is classified as a *loss*, the Bank charges-off an amount equal to the portion of the asset classified as *loss*. All the loans mentioned above are included in the Bank's Managed Asset Report. This report serves as an integral part in the evaluation of the adequacy of the Bank's allowance for loan losses.

**Table of Contents**

The following table sets forth the principal balance of the Bank's classified loans as of December 31, 2008.

<i>(Dollars in Thousands)</i>	Loss	Doubtful	Substandard	Special Mention
<b>Real estate loans:</b>				
Residential 1 to 4 family	\$	\$	\$ 2,795	\$
Multi-family and commercial			1,607	7,927
Construction			5,484	848
<b>Total real estate loans</b>			<b>9,886</b>	<b>8,775</b>
<b>Consumer loans:</b>				
Home equity				
Other		1		
<b>Total consumer loans</b>		<b>1</b>		
<b>Commercial business loans</b>			<b>939</b>	<b>2,269</b>
<b>Total classified loans</b>	<b>\$ 1</b>	<b>\$</b>	<b>\$ 10,825</b>	<b>\$ 11,044</b>

Of the \$10.8 million of substandard loans at December 31, 2008, \$9.3 million were nonperforming loans. The largest substandard loan, a commercial construction loan totaling \$2.0 million, was more than 90 days past due at December 31, 2008. Of the \$11.0 million of special mention loans, only one loan totaling \$517,000 million was 60 days past due at December 31, 2008.

At December 31, 2008, total classified loans related predominately to twenty-eight commercial real estate loans totaling \$9.5 million, six commercial construction loans totaling \$6.3 million and fourteen residential real estate loans totaling \$2.8 million. Declining economic conditions have negatively impacted the residential and commercial construction markets and contributed to the decrease in credit quality for commercial loans. The continued weakening of both the local and national real estate markets has contributed to the inability of commercial developers to sell completed units, which resulted in declining collateral values and an increased risk of default.

**Nonperforming Assets and Restructured Loans.** When a loan becomes 90 days delinquent or there is reasonable doubt that principal and interest will be received, the loan is placed on nonaccrual status at which time the accrual of interest ceases and the allowance for any uncollectible accrued interest is established and charged against operations. Typically, payments received on nonaccrual loans are applied to the outstanding principal and interest balance as determined at the time of collection of the loan.

The Bank considers repossessed assets and loans that are 90 days or more past due to be nonperforming assets. Real estate acquired as a result of foreclosure or by deed-in-lieu of foreclosure is classified as other real estate owned until it is sold. When property is acquired it is recorded at the lower of its cost, which is the unpaid balance of the loan plus foreclosure costs or fair value at the date of the foreclosure. Holding costs and declines in fair value after acquisition of the property are charged against income as incurred.

Troubled debt restructurings occur when debtors are granted concessions that the Bank would not otherwise consider because of economic or legal reasons pertaining to the debtor's financial difficulties. Such concessions would include, but are not limited to, the transfer of assets or the issuance of equity interest by the debtor to satisfy all or part of the debt, modification of the terms of debt or the substitution or addition of debtor(s).

**Table of Contents**

The following table provides information with respect to the Bank's nonperforming assets and troubled debt restructurings as of the dates indicated. The Company had no accruing loans past due 90 days or more at each of the dates indicated.

<i>(Dollars in Thousands)</i>	2008	2007	December 31, 2006	2005	2004
<b>Nonaccrual loans:</b>					
Real estate loans	\$ 9,110	\$ 6,879	\$ 392	\$ 224	\$ 943

Total nonperforming loans to total assets	1.09	0.97	0.18	0.03	0.15
Total nonperforming assets and troubled debt restructurings to total assets	1.10	1.09	0.19	0.09	0.16

<sup>(1)</sup> Includes indirect automobile loans totaling \$925,000 at December 31, 2006.

<sup>(2)</sup> Other real estate owned balances are shown net of related loss allowance.

In addition to the loans disclosed in the above table, at December 31, 2008, management identified three loans totaling \$1.5 million in which the borrowers had possible credit problems that caused management to have doubts about the ability of the borrowers to comply with the present loan repayment terms and that may result in the future inclusion of such loans in the table above. All of the aforementioned loans have been classified as substandard and are contained in the classified loan table on the previous page.

Interest income that would have been recorded for the year ended December 31, 2008 had nonaccruing loans and troubled debt restructurings been current in accordance with their original terms and had been outstanding throughout the period amounted to \$609,000. The amount of interest related to nonaccrual loans and troubled debt restructurings included in interest income was \$27,000 for the year ended December 31, 2008.

**Allowance for Loan Losses.** The allowance for loan losses, a material estimate which could change significantly in the near-term, is established through a provision for loan losses charged to earnings to account for losses that are inherent in the loan portfolio and estimated to occur, and is maintained at a level that management considers adequate to absorb losses in the loan portfolio. Loan losses are charged against the allowance for loan losses when management believes that the uncollectibility of the principal loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance for loan losses when received. The Bank evaluates the allowance for loan losses on a monthly basis.

## Table of Contents

The methodology for assessing the appropriateness of the allowance for loan losses consists of the following key elements:

Specific allowances for identified impaired loans;

General valuation allowance on the remainder of the loan portfolio

The loan portfolio is segregated first between loans that are on the Bank's Managed Asset Report and loans that are not. The Managed Asset Report includes: (1) loans that are 60 or more days delinquent, (2) loans with anticipated losses, (3) loans referred to attorneys for collection or in the process of foreclosure, (4) nonaccrual loans, (5) loans classified as substandard, doubtful, loss or special mention by either the Bank's internal classification system or by regulators during the course of their examination of the Bank and (6) troubled debt restructurings and other nonperforming loans.

*Specific Allowance for Identified Impaired Loans.* For loans that are identified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of the loan.

The Bank reviews and establishes, as needed, a specific allowance for certain identified non-homogeneous problem loans. In accordance with Statement of Financial Accounting Standards No. 114, *Accounting by Creditors for Impairment of a Loan* as amended by Statement of Financial Accounting Standards No. 118, *Accounting by Creditors for Impairment of a Loan- an amendment of FASB Statement No. 114*, a loan is impaired when, based on current information and events, it is probable that a creditor will be unable to collect all amounts due under the contractual terms of the original loan agreement. Measurement of the impairment is based on the present value of expected future cash flows or the fair value of the collateral, if the loan is collateral dependent. A specific allowance on impaired loans is established if the present value of the expected future cash flows, or fair value of the collateral for collateral dependent loans, is lower than the carrying value of the loan.

*General Valuation Allowance on the Remainder of the Loan Portfolio.* The Bank establishes a general allowance on the remainder of the loan portfolio, after excluding impaired loans. This general valuation allowance is determined by segregating the loans by loan category and assigning allowance percentages based on the Bank's historical loss experience and delinquency trends. The allowance may be adjusted for significant factors that, in management's judgment, affect the collectibility of the portfolio as of the evaluation date. These significant factors may include changes in lending policies and procedures, changes in existing general economic and business conditions affecting the Bank's primary lending areas, credit quality trends, collateral value, loan volumes and concentrations, seasoning of the loan portfolio, specific industry conditions within portfolio segments, recent loss experience in particular segments of the portfolio, duration of the current business cycle and the Bank's regulatory examination results. The applied loss factors are re-evaluated quarterly to ensure their relevance in the current economic environment.

Although management believes that it uses the best information available to establish the allowance for loan losses, future adjustments to the allowance for loan losses may be necessary and the Company's results of operations could be adversely affected if circumstances differ substantially from the assumptions used in making the determinations. In addition, because future events affecting borrowers and collateral cannot be predicted with certainty, there can be no assurance that the existing allowance for loan losses is adequate or that increases will not be necessary should the quality of any loans deteriorate as a result of the factors discussed above. Any material increase in the allowance for loan losses would adversely affect the Company's financial condition and results of operations.

**Table of Contents**

The following table sets forth an analysis of the allowance for loan losses for the years indicated.

<i>(Dollars in Thousands)</i>	Years Ended December 31,				
	2008	2007	2006	2005	2004

The higher provision for 2008 reflects increases in the Bank's nonperforming loans, charge-offs and the increased allowance loss factors for commercial mortgage, construction and commercial business loan portfolios due to adverse market conditions and loan growth. While the Company has no direct exposure to sub-prime mortgages in its loan portfolio, declining economic conditions have negatively impacted the residential and commercial construction markets and contributed to the decrease in credit quality for commercial loans. As a result, the Company has increased its provision for loan losses on this portion of the loan portfolio during the second half of 2008 to reflect the increased risk of loss associated with this type of lending. Specific reserves relating to impaired loans decreased to \$1.2 million at December 31, 2008 compared to \$1.3 million at December 31, 2007. The ratio of the allowance for loan losses to total loans increased from 0.89% at December 31, 2007 to 0.97% at December 31, 2008. At December 31, 2008, nonperforming loans totaled \$9.3 million, of which two commercial construction relationships accounted for \$5.5 million of nonperforming loans and \$1.0 million in specific reserves. Nonperforming loans totaled \$7.6 million at December 31, 2007.

**Table of Contents**

**Investment Activities**

The Company has legal authority to invest in various types of liquid assets, including U.S. Treasury obligations, securities of various federal agencies, government-sponsored enterprises, state and municipal governments, mortgage-backed securities and certificates of deposit of federally-insured institutions. Within certain regulatory limits, the Company also may invest a portion of its assets in corporate securities and mutual funds. The Company is also required to maintain an investment in FHLB stock. While the Company has the authority under applicable law and its investment policies to invest in derivative securities, the Company had no such investments at December 31, 2008.

The Company's primary source of income continues to be derived from its loan portfolio. The investment portfolio is mainly used to meet the cash flow needs of the Company, provide adequate liquidity for the protection of customer deposits and yield a favorable return on investments. The type of securities and the maturity periods are dependent on the composition of the loan portfolio, interest rate risk, liquidity position and tax strategies of the Company. The Company's investment objectives are to provide and maintain liquidity, to maintain a balance of high quality, diversified investments to minimize risk, to provide collateral for pledging requirements, to establish an acceptable level of interest rate and credit risk, to provide an alternate source of low-risk investments when demand for loans is weak, to generate a favorable return and to assist in the financing needs of various local public entities, subject to credit quality review and liquidity concerns. The Company's Board of Directors has the overall responsibility for the investment portfolio, including approval of the Company's Investment Policy and appointment of the Investment Committee. The Investment Committee is responsible for the approval of

**Table of Contents**

investment strategies and monitoring investment performance. The execution of specific investment initiatives and the day-to-day oversight of the Company's investment portfolio is the responsibility of the Chief Executive Officer and the Chief Financial Officer. These officers, and others designated by the Board, are authorized to execute investment transactions up to specified limits based on the type of security without prior approval of the Investment Committee. Transactions exceeding these limitations require the approval of two of these officers, one of whom must be either the President and Chief Executive Officer or the Chief Financial Officer. Individual investment transactions are reviewed and approved by the Board of Directors on a monthly basis, while portfolio composition and performance are reviewed at least quarterly by the Investment Committee.

Statement of Financial Accounting Standards No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (SFAS 115), requires that securities be categorized as either held to maturity, trading securities or available for sale based on management's intent as to the ultimate disposition of each security. Debt securities may be classified as held to maturity, and reported in the financial statements at amortized cost, only if the Company has the positive intent and ability to hold those securities until maturity. Securities purchased and held principally for the purpose of trading in the near term are classified as trading securities. These securities are reported at fair value in the financial statements, with unrealized gains and losses recognized in earnings. Debt and equity securities not classified as either held to maturity or trading securities are classified as available for sale securities. These securities are reported at fair value with unrealized gains and losses excluded from earnings and reported in other comprehensive income (loss), net of taxes.

At December 31, 2008, the Company's investment portfolio, which consisted solely of available for sale securities, totaled \$162.7 million and represented 19.1% of assets. The Company's securities consisted primarily of agency mortgage-backed securities issued by Fannie Mae, Freddie Mac and Ginnie Mae with stated final maturities of 30 years or less, AAA-rated private-label mortgage-backed securities with maturities of 30 years or less, government-sponsored enterprises with maturities of 20 years or less and corporate debt securities. At December 31, 2008, the amortized cost and fair value of non-agency mortgage-backed securities totaled \$39.4 million and \$33.3 million, respectively. Included in corporate debt securities at December 31, 2008, the amortized cost and fair value of pooled trust preferred securities totaled \$6.6 million and \$5.4 million, respectively.

The following table sets forth the amortized costs and fair values of the Company's securities portfolio at the dates indicated.

<i>(Dollars in Thousands)</i>	2008		December 31, 2007		2006	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value	Amortized Cost	Fair Value

<b>Total available for sale securities</b>	<b>\$ 167,223</b>	<b>\$ 162,699</b>	<b>\$ 141,150</b>	<b>\$ 141,914</b>	<b>\$ 121,040</b>	<b>\$ 119,508</b>

**Table of Contents**

The Company had no individual investments that had an aggregate book value in excess of 10% of its stockholders' equity at December 31, 2008.

The following table sets forth the amortized cost, weighted-average yields and contractual maturities of securities at December 31, 2008. Weighted-average yields on tax-exempt securities are not presented on a tax equivalent basis because the impact would be insignificant. Certain mortgage-backed securities have adjustable interest rates and will reprice periodically within the various maturity ranges. These repricing schedules are not reflected in the table below. At December 31, 2008, the amortized cost of mortgage-backed securities with adjustable rates totaled \$23.9 million.

<i>(Dollars in Thousands)</i>	One Year or Less		More than One Year		More than Five		More than Ten Years		Total

**Deposit Activities and Other Sources of Funds**

**General.** Deposits and loan repayments are the major sources of the Company's funds for lending and other investment purposes. Loan repayments are a relatively stable source of funds, while deposit inflows and outflows and loan prepayments are significantly influenced by general interest rates, competition and money market conditions.

**Deposit Accounts.** Substantially all of the Bank's depositors are residents of the State of Connecticut. Deposits are attracted from within the Bank's market area through the offering of a broad selection of deposit instruments, including NOW, money market accounts, regular savings accounts and certificates of deposit. The Bank also utilizes brokered certificates of deposits, which at December 31, 2008 amounted to \$4.5 million, as an alternate source of funds. Deposit account terms vary according to the minimum balance required, the time periods the funds must remain on deposit and the interest rates offered, among other factors. In determining the terms of the Bank's deposit accounts, the Bank considers the rates offered by its competition, liquidity needs, profitability, matching deposit and loan products and customer preferences and concerns. The Bank generally reviews its deposit mix and pricing weekly. The Bank's current strategy is to offer competitive rates, and even higher rates on longer-term deposits, but not be the market leader in every account type and maturity.

The Bank also offers a variety of deposit accounts designed for the businesses operating in its market area. Business banking deposit products include a commercial checking account that provides an earnings credit to offset monthly service charges and a checking account specifically designed for small business and nonprofit organizations. Additionally, sweep accounts and money market accounts are available for businesses. The Bank has sought to increase its commercial deposits through the offering of these products, particularly to its commercial borrowers and to

local municipalities.

**Table of Contents**

The following table sets forth the distribution of the Bank's deposit accounts for the dates indicated.

<i>(Dollars in Thousands)</i>	2008		December 31, 2007		2006	
	Balance	% of Total	Balance	% of Total	Balance	% of Total
Noninterest-bearing demand deposits	\$ 57,647	9.23%	\$ 56,762	10.29%	\$ 55,703	10.28%
NOW and money market accounts	187,699	30.07	151,237	27.41	126,567	23.36
Savings accounts <sup>(1)</sup>	64,119	10.27	69,876	12.66	81,020	14.94
Certificates of deposit <sup>(2)</sup>	314,811	50.43	273,897	49.64	278,632	51.42
<b>Total deposits</b>	<b>\$ 624,276</b>	<b>100.00%</b>	<b>\$ 551,772</b>	<b>100.00%</b>	<b>\$ 541,922</b>	<b>100.00%</b>

<sup>(1)</sup> Includes mortgagors' and investors' escrow accounts in the amount of \$3.6 million, \$3.4 million and \$3.2 million at December 31, 2008, 2007 and 2006, respectively.

<sup>(2)</sup> Includes brokered deposits of \$4.5 million, \$2.1 million and \$7.1 million at December 31, 2008, 2007 and 2006, respectively.

The Bank had \$97.8 million of certificates of deposit of \$100,000 or more outstanding as of December 31, 2008, maturing as follows:

<i>(Dollars in Thousands)</i>	Amount	Weighted Average Rate
<b>Maturity Period:</b>		
Three months or less	\$ 8,011	3.26%
Over three through six months	7,956	2.68
Over six through twelve months	37,020	3.57
Over twelve months	44,848	3.96
<b>Total</b>	<b>\$ 97,835</b>	<b>3.65%</b>

The following table presents the amount of certificates of deposit accounts outstanding by the various rate categories, years to maturity and percent of total certificate accounts at December 31, 2008.

<i>(Dollars in Thousands)</i>	Amount Due					Total	Percent of Total Certificate Accounts
	Less Than One Year	One to Two Years	Two to Three Years	Three to Four Years	More Than Four Years		
0.30 2.00%	\$ 25,741	\$ 80	\$	\$	\$	\$ 25,821	8.20%

**Table of Contents**

***Borrowings.*** The Bank utilizes advances from the FHLB to supplement its supply of lendable funds and to meet deposit withdrawal requirements. The FHLB functions as a central reserve bank providing credit for member financial institutions. As a member, the Bank is required to own capital stock in the FHLB and is authorized to apply for advances on the security of such stock and certain mortgage loans and other assets (principally securities which are obligations of, or guaranteed by, the United States), provided certain standards related to creditworthiness have been met. Advances are made under several different programs, each having its own interest rate and range of maturities. Depending on the program, limitations on the amount of advances are based either on a fixed percentage of an institution's net worth or on the FHLB's assessment of the institution's creditworthiness. The FHLB determines specific lines of credit for each member institution.

Advances from the FHLB decreased \$2.0 million, or 1.4%, for the year ended December 31, 2008 to \$139.6 million. For 2008, new advances tended to be shorter in duration to provide the Company flexibility to repay the advances in the future because of their higher interest rates. These borrowings were used to fund asset growth and increase liquidity.

***Junior Subordinated Debt Owed to Unconsolidated Trusts.*** In 2002, SI Capital Trust I (the Trust ), a business trust, issued \$7.0 million of preferred securities in a private placement and issued approximately 217 shares of common stock at \$1,000 par value to the Company. The Trust used the proceeds of these issuances to purchase \$7.2 million of the Company's floating rate junior subordinated deferrable interest debentures. The interest rate on the debentures and the trust preferred securities was variable based on 3.70% over the six-month LIBOR. The trust securities were redeemed at par on April 22, 2007 and the Trust was subsequently dissolved.

In 2006, the Company formed SI Capital Trust II ( Trust II ), which issued \$8.0 million of trust preferred securities through a pooled trust preferred securities offering. The Company owns all of the common securities of Trust II, which has no independent assets or operations. Trust II was formed to issue trust preferred securities and invest the proceeds in an equivalent amount of junior subordinated debentures issued by the Company. A portion of the proceeds from the offering were used to redeem trust preferred securities of the Trust. The trust preferred securities mature in 30 years and bear interest at three-month LIBOR plus 1.70%. The interest rate on these securities at December 31, 2008 was 3.70%. The Company may redeem the trust preferred securities, in whole or in part, on or after September 15, 2011, or earlier under certain conditions.

The debentures are the sole assets of Trust II and are subordinate to all of the Company's existing and future obligations for borrowed money, its obligations under letters of credit and certain derivative contracts and any guarantees by the Company of any such obligations. The trust preferred securities generally rank equal to the trust common securities in priority of payment, but rank before the trust common securities if and so long as the Company fails to make principal or interest payments on the debentures. Concurrently with the issuance of the debentures and the trust preferred and common securities, the Company issued a guarantee related to the trust securities for the benefit of the holders. The Company's obligations under the guarantee and the Company's obligations under the debentures, the related indentures and the trust agreement relating to the trust securities, constitute a full and unconditional guarantee by the Company of the obligations of Trust II under the trust preferred securities. If the Company defers interest payments on the junior subordinated debt, or otherwise is in default of the obligations, the Company would be prohibited from making dividend payments to its shareholders.

The debentures are also subject to redemption before September 15, 2011, at a specified price after the occurrence of certain events that would either have a negative tax effect on Trust II or the Company or would result in Trust II being treated as an investment company that is required to be registered under the Investment Company Act of 1940. Upon repayment of the debentures at their stated maturity or following their redemption, Trust II will use the proceeds of such repayment to redeem an equivalent amount of outstanding trust preferred securities and trust common securities.

**Table of Contents**

Additionally, the Company occasionally utilizes collateralized borrowings, which represent loans sold that do not meet the criteria for derecognition, due primarily to recourse and other provisions that could not be measured at the date of transfer. Such borrowings are derecognized when all recourse and other provisions that could not be measured at the time of transfer either expire or become measurable. The Company had no collateralized borrowings at December 31, 2008.

The following table sets forth information regarding the Company's borrowings at the dates or for the years indicated.

<i>(Dollars in Thousands)</i>	<b>At or For the Years Ended December 31,</b>		
	<b>2008</b>	<b>2007</b>	<b>2006</b>
<b>Maximum amount of advances outstanding at any month-end during the year:</b>			
FHLB advances	\$ 147,664	\$ 141,619	\$ 117,982
Subordinated debt	8,248	15,465	15,465
<b>Average balance outstanding during the year:</b>			
FHLB advances	\$ 143,697	\$ 114,960	\$ 101,902
Subordinated debt	8,248	10,463	9,522
<b>Weighted-average interest rate during the year:</b>			
FHLB advances	4.40%	4.59%	4.27%
Subordinated debt	4.81	7.42	8.21
<b>Balance outstanding at end of year:</b>			
FHLB advances	\$ 139,600	\$ 141,619	\$ 111,956
Subordinated debt	8,248	8,248	15,465
<b>Weighted-average interest rate at end of year:</b>			
FHLB advances	4.24%	4.53%	4.44%
Subordinated debt	3.70	6.69	8.01

**Trust Services**

The Bank's trust department provides fiduciary services, investment management and retirement services, to individuals, partnerships, corporations and institutions. Additionally, the Bank acts as guardian, conservator, executor or trustee under various trusts, wills and other agreements. The Bank has implemented comprehensive policies governing the practices and procedures of the trust department, including policies relating to investment of trust property, maintaining confidentiality of trust records, avoiding conflicts of interest and maintaining impartiality. Consistent with its operating strategy, the Bank will continue to emphasize the growth of its trust business in order to accumulate assets and increase fee-based income. At December 31, 2008, trust assets under administration were \$150.2 million, consisting of 349 accounts, the largest of which totaled \$11.1 million, or 7.4%, of the trust department's total assets. As of December 31, 2008, SI Trust Servicing provided trust outsourcing services to 13 clients, consisting of 6,090 accounts totaling \$4.9 billion in assets. For the years ended December 31, 2008 and 2007, total trust services revenue was \$2.7 million and \$3.6 million, respectively.

---

## **Table of Contents**

### **Subsidiary Activities**

The Company's subsidiaries include Savings Institute Bank and Trust Company and SI Capital Trust II.

The following are descriptions of the Bank's wholly-owned subsidiaries.

**803 Financial Corp.** 803 Financial Corp. was established in 1995 as a Connecticut corporation to maintain an ownership interest in a third-party registered broker-dealer, Infinex Investments, Inc. Infinex operates offices at the Bank and offers customers a complete range of nondeposit investment products, including mutual funds, debt, equity and government securities, retirement accounts, insurance products and fixed and variable annuities. The Bank receives a portion of the commissions generated by Infinex from sales to customers. Due to a regulatory restriction on federally-chartered thrifts, on December 31, 2004, 803 Financial Corp. sold its interest in Infinex to the Company. As a result, 803 Financial Corp. had no other holdings or business activities.

**SI Realty Company, Inc.** SI Realty Company, Inc., established in 1999 as a Connecticut corporation, holds real estate owned by the Bank, including foreclosure properties. At December 31, 2008, SI Realty Company, Inc. had \$192,000 in assets.

**SI Mortgage Company.** In January 1999, the Bank formed SI Mortgage Company to manage and hold loans secured by real property. SI Mortgage Company qualifies as a passive investment company, which exempts it from Connecticut income tax under current law. Income tax savings to the Bank from the use of a passive investment company was \$219,000 and \$89,000 for the years ended December 31, 2008 and 2007, respectively.

### **Personnel**

At December 31, 2008, the Company had 249 full-time employees and 37 part-time employees. None of the Company's employees are represented by a collective bargaining unit. The Company believes its relationship with its employees is good.

## **REGULATION AND SUPERVISION**

### **General**

The Bank is subject to extensive regulation, examination and supervision by the Office of Thrift Supervision (OTS), as its primary federal regulator, and the FDIC, as the insurer of its deposits. The Bank is a member of the Federal Home Loan Bank System and its deposit accounts are insured up to applicable limits by the Deposit Insurance Fund managed by the FDIC. The Bank must file reports with the OTS and the FDIC concerning its activities and financial condition in addition to obtaining regulatory approvals before entering into certain transactions such as mergers with, or acquisitions of, other financial institutions. There are periodic examinations by the OTS and, under certain circumstances, the FDIC, to evaluate the Bank's safety and soundness and compliance with various regulatory requirements. This regulatory structure is intended primarily for the protection of the insurance fund and depositors. The regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities and examination policies, including policies with respect to the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes. Any change in such policies, whether by the OTS, the FDIC or Congress, could have a material adverse impact on the Company, SI Bancorp, MHC and the Bank and their operations. The Company and SI Bancorp, MHC, as savings and loan holding companies, are required to file certain reports with, are subject to examination by, and otherwise must comply with the rules and regulations of the OTS. The Company is also subject to the rules and regulations of the Securities and Exchange Commission under the federal securities laws.

---

## **Table of Contents**

Certain of the regulatory requirements that are applicable to the Bank, the Company and SI Bancorp, MHC are described below. This description of statutes and regulations is not intended to be a complete explanation of such statutes and regulations and their effects on the Bank, the Company and SI Bancorp, MHC are qualified in their entirety by reference to the actual statutes and regulations.

### **Regulation of Federal Savings Associations**

**Business Activities.** Federal law and regulations, primarily the Home Owners Loan Act and the regulations of the OTS, govern the activities of federal savings banks, such as the Bank. These laws and regulations delineate the nature and extent of the activities in which federal savings banks may engage. In particular, certain lending authority for federal savings banks, *e.g.*, commercial, non-residential real property loans and consumer loans, is limited to a specified percentage of the institution's capital or assets.

**Capital Requirements.** The OTS's capital regulations require federal savings institutions to meet three minimum capital standards:

a tangible capital ratio requirement of 1.5% of adjusted total assets;

a leverage ratio of 4% of Tier 1 (core) capital to adjusted total assets (3% for institutions receiving the highest rating on the CAMELS examination rating system); and

a risk-based capital ratio requirement of 8% of total capital (core and supplementary capital) to total risk-weighted assets of which at least half must be core capital

In addition, the prompt corrective action standards discussed below also established, in effect, a minimum 2% tangible capital standard, a 4% leverage ratio standard (3% for institutions receiving the highest rating on the CAMELS examination rating system) and, together with the risk-based capital standard itself, a 4% Tier 1 risk-based capital standard. The OTS regulations also require that, in meeting the tangible, leverage and risk-based capital standards, institutions must generally deduct investments in and loans to subsidiaries engaged in activities as principal that are not permissible for a national bank.

In determining compliance with the risk-based capital requirement, savings institutions must compute its risk-weighted assets by multiplying its assets, including certain off-balance sheet assets, recourse obligations, residual interests and direct credit substitutes, by risk-weight factors ranging from 0% for cash and obligations of the United States Government or its agencies to 100% for consumer and commercial loans, as assigned by the OTS capital regulation based on the risks believed inherent in the type of asset.

Core (Tier 1) capital is defined as common stockholders' equity (including retained earnings), certain noncumulative perpetual preferred stock and related surplus and minority interests in equity accounts of consolidated subsidiaries, less intangibles (other than certain mortgage servicing rights) and credit card relationships. The components of supplementary capital currently include cumulative preferred stock, long-term perpetual preferred stock, mandatory convertible securities, subordinated debt and intermediate preferred stock, the allowance for loan and lease losses is limited to a maximum of 1.25% of risk-weighted assets and up to 45% of unrealized gains on available for sale equity securities with readily determinable fair market values. Overall, the amount of supplementary capital included as part of total capital cannot exceed 100% of core capital.

---

## **Table of Contents**

The OTS also has authority to establish individual minimum capital requirements in appropriate cases upon a determination that an institution's capital level is or may become inadequate in light of the particular circumstances. At December 31, 2008, the Bank exceeded each of these capital requirements.

**Prompt Corrective Regulatory Action.** The OTS is required to take certain supervisory actions against undercapitalized institutions, the severity of which depends upon the institution's degree of undercapitalization. Generally, a savings institution that has a ratio of total capital to risk-weighted assets of less than 8%, a ratio of Tier 1 (core) capital to risk-weighted assets of less than 4% or a ratio of core capital to total assets of less than 4% (3% or less for institutions with the highest examination rating) is considered to be undercapitalized. A savings institution that has a total risk-based capital ratio less than 6%, a Tier 1 capital ratio of less than 3% or a leverage ratio that is less than 3% is considered to be significantly undercapitalized and a savings institution that has a tangible capital to assets ratio equal to or less than 2% is deemed to be critically undercapitalized. Subject to a narrow exception, the OTS is required to appoint a receiver or conservator within specified time frames for an institution that is critically undercapitalized. An institution must file a capital restoration plan with the OTS within 45 days of the date it receives notice that it is undercapitalized, significantly undercapitalized or critically undercapitalized. Compliance with the plan must be guaranteed by any parent holding company. In addition, numerous mandatory supervisory actions become immediately applicable to an undercapitalized institution, including, but not limited to, increased monitoring by regulators and restrictions on growth, capital distributions and expansion. Significantly undercapitalized and critically undercapitalized institutions are subject to more extensive mandatory regulatory actions. The OTS could also take any one of a number of discretionary supervisory actions, including the issuance of a capital directive and the replacement of senior executive officers and directors.

**Loans to One Borrower.** Federal law provides that savings institutions are generally subject to the limits on loans to one borrower applicable to national banks. Generally, a savings institution may not make a loan or extend credit to a single or related group of borrowers in excess of 15% of its unimpaired capital and surplus. An additional amount may be lent, equal to 10% of unimpaired capital and surplus, if secured by specified readily-marketable collateral. *See Item 1. Business. Lending Activities. Loans to One Borrower.*

**Standards for Safety and Soundness.** The federal banking agencies have adopted Interagency Guidelines, which set forth the safety and soundness standards that the federal banking agencies use to identify and address problems at insured depository institutions before capital becomes impaired. If the OTS determines that a savings institution fails to meet any standard prescribed by the guidelines, the OTS may require the institution to submit an acceptable plan to achieve compliance with the standard. The Bank has not received any notice from the OTS that it has failed to meet any standard prescribed by the guidelines.

**Limitation on Capital Distributions.** OTS regulations impose limitations upon all capital distributions by a savings institution, including cash dividends, payments to repurchase its shares and payments to shareholders of another institution in a cash-out merger. Under the regulations, an application to and the prior approval of the OTS is required before any capital distribution if the institution does not meet the criteria for expedited treatment of applications under OTS regulations (*i.e.*, generally, examination and Community Reinvestment Act ratings in the two top categories), the total capital distributions for the calendar year exceed net income for that year plus the amount of retained net income for the preceding two years, the institution would be undercapitalized following the distribution or the distribution would otherwise be contrary to a statute, regulation or agreement with the OTS. If an application is not required, the institution must still provide prior notice to the OTS of the capital distribution if, like the Bank, it is a subsidiary of a holding company. If the Bank's capital were ever to fall below its regulatory requirements or the OTS notified it that it was in need of increased supervision, its ability to make capital distributions could be restricted. In addition, the OTS could prohibit a proposed capital distribution that would otherwise be permitted by the regulation, if the agency determines that such distribution would constitute an unsafe or unsound practice.

---

**Table of Contents**

**Qualified Thrift Lender Test.** Federal law requires savings institutions to meet a qualified thrift lender test. Under the test, a savings association is required to either qualify as a domestic building and loan association under the Internal Revenue Code or maintain at least 65% of its portfolio assets in certain qualified thrift investments (primarily residential mortgages and related investments, including certain mortgage-backed securities) in at least nine months out of each twelve-month period. Portfolio assets represent, in general, total assets less the sum of:

specified liquid assets up to 20% of total assets;

goodwill and other intangible assets; and

the value of property used to conduct business

A savings institution that fails the qualified thrift lender test is subject to certain operating restrictions and may be required to convert to a bank charter. Recent legislation has expanded the extent to which education loans, credit card loans and small business loans may be considered qualified thrift investments. As of December 31, 2008, the Bank maintained 76.91% of its portfolio assets in qualified thrift investments and, therefore, met the qualified thrift lender test.

**Transactions with Related Parties.** Federal law limits the Bank's authority to lend to, and engage in certain other transactions with (collectively, covered transactions), affiliates (e.g., any company that controls or is under common control with an institution, including the Company, SI Bancorp, MHC and their non-savings institution subsidiaries). The aggregate amount of covered transactions with any individual affiliate is limited to 10% of the capital and surplus of the savings institution. The aggregate amount of covered transactions with all affiliates is limited to 20% of the savings institution's capital and surplus. Loans and other specified transactions with affiliates are required to be secured by collateral in an amount and of a type described in federal law. The purchase of low quality assets from affiliates is generally prohibited. Transactions with affiliates must be on terms and under circumstances that are at least as favorable to the institution as those prevailing at the time for comparable transactions with non-affiliated companies. In addition, savings institutions are prohibited from lending to any affiliate that is engaged in activities that are not permissible for bank holding companies and no savings institution may purchase the securities of any affiliate other than a subsidiary.

The Sarbanes-Oxley Act of 2002 generally prohibits a company from making loans to its executive officers and directors. However, that act contains a specific exception for loans by a depository institution to its executive officers and directors in compliance with federal banking laws. Under such laws, the Bank's authority to extend credit to executive officers, directors and 10% shareholders (insiders), as well as entities in which such persons control, is limited. The law restricts both the individual and aggregate amount of loans the Bank may make to insiders based, in part, on the Bank's capital position and requires certain board approval procedures to be followed. Such loans must be made on terms substantially the same as those offered to unaffiliated individuals and not involve more than the normal risk of repayment. There is an exception for loans made pursuant to a benefit or compensation program that is widely available to all employees of the institution and does not give preference to insiders over other employees. In addition, loans made to a director or executive officer in an amount that, when aggregated with the amount of all other loans to the person and his or her related interest, are in excess of the greater of \$25,000, or 5% of the Bank's capital and surplus, and in any event any loans totaling \$500,000 or more, must be approved in advance by a majority of the disinterested members of the Board of Directors. Loans to executive officers are subject to additional restrictions as to type and amount.

**Enforcement.** The OTS has primary enforcement responsibility over federal savings institutions and has the authority to bring actions against the institution and all institution-affiliated parties, including

---

**Table of Contents**

stockholders, and any attorneys, appraisers and accountants who knowingly or recklessly participate in wrongful action likely to have an adverse effect on an insured institution. Formal enforcement action may range from the issuance of a capital directive or cease and desist order for removal of officers and/or directors to institution of receivership, conservatorship or termination of deposit insurance. Civil penalties cover a wide range of violations and can amount to \$25,000 per day, or even \$1.0 million per day in especially egregious cases. The FDIC has authority to recommend to the Director of the OTS that enforcement action be taken with respect to a particular savings institution. If action is not taken by the Director, the FDIC has authority to take such action under certain circumstances. Federal law also establishes criminal penalties for certain violations.

**Assessments.** Federal savings banks are required to pay assessments to the OTS to fund its operations. The general assessments, paid on a semi-annual basis, are based upon the savings institution's total assets, including consolidated subsidiaries, as reported in the institution's latest quarterly thrift financial report, financial condition and complexity of portfolio. The OTS assessments paid by the Bank for 2008 were \$207,000.

**Insurance of Deposit Accounts.** The Bank's deposits are insured up to applicable limits by the Deposit Insurance Fund of the FDIC. The Deposit Insurance Fund is the successor to the Bank Insurance Fund and the Savings Association Insurance Fund, which were merged in 2006. Under the FDIC's risk-based assessment system, insured institutions are assigned to one of four risk categories based on supervisory evaluations, regulatory capital levels and certain other factors. An institution's assessment rate depends upon the category to which it is assigned, with less risky institutions paying lower assessments.

For 2008, assessments ranged from five to forty-three basis points of assessable deposits. Due to losses incurred by the Deposit Insurance Fund from failed institutions in 2008, and anticipated future losses, the FDIC has adopted, pursuant to a Restoration Plan to replenish the fund, an across the board seven basis point increase in the assessment range for the first quarter of 2009. The FDIC adopted further refinements to its risk-based assessment system, effective April 1, 2009, that effectively make the range seven to seventy-seven and one-half basis points. The FDIC has also imposed on all insured institutions an emergency special assessment of twenty basis points of assessable deposits as of June 30, 2009 in order to cover losses to the Deposit Insurance Fund. The FDIC may adjust the scale uniformly from one quarter to the next, except that no adjustment can deviate more than three basis points from the base scale without notice and comment rulemaking. No institution may pay a dividend if in default of the federal deposit insurance assessment.

Due to the recent difficult economic conditions, deposit insurance per account owner has been raised to \$250,000 for all types of accounts until December 31, 2009. In addition, the FDIC adopted an optional Temporary Liquidity Guarantee Program by which, for a fee, noninterest-bearing transaction accounts would receive unlimited insurance coverage until December 31, 2009 and certain senior unsecured debt issued by institutions and their holding companies between October 13, 2008 and June 30, 2009 would be guaranteed by the FDIC through June 30, 2012. The Bank made the business decision to participate in the unlimited noninterest bearing transaction account coverage and the Bank, the Company and SI Bancorp, MHC opted to participate in the unsecured debt guarantee program.

The Federal Deposit Insurance Reform Act of 2005 ( Reform Act ) also provided for a one-time credit for eligible institutions based on their assessment base as of December 31, 1996. Subject to certain limitations with respect to institutions that are exhibiting weaknesses, credits can be used to offset assessments until exhausted. The Bank's one-time credit was \$344,000, of which none is remaining as of December 31, 2008. The Reform Act also provided for the possibility that the FDIC may pay dividends to insured institutions once the Deposit Insurance fund reserve ratio equals or exceeds 1.35% of estimated insured deposits.

## **Table of Contents**

In addition to the assessment for deposit insurance, institutions are required to make payments on bonds issued in the late 1980s by the Financing Corporation to recapitalize a predecessor deposit insurance fund. This payment is established quarterly and during the calendar year ending December 31, 2008 averaged 1.12 basis points of assessable deposits.

Insurance of deposits may be terminated by the FDIC upon a finding that the institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC or the OTS. The management of the Bank does not know of any practice, condition or violation that might lead to termination of deposit insurance.

***Federal Home Loan Bank System.*** The Bank is a member of the Federal Home Loan Bank System, which consists of twelve regional Federal Home Loan Banks. The FHLB provides a central credit facility primarily for member institutions. The Bank, as a member of the FHLB, is required to acquire and hold shares of capital stock in FHLB. The Bank was in compliance with this requirement with an investment in FHLB at December 31, 2008 of \$8.4 million.

The Federal Home Loan Banks are required to provide funds for the resolution of insolvent thrifts in the late 1980s and to contribute funds for affordable housing programs. These requirements could reduce the amount of dividends that the Federal Home Loan Banks pay to their members and could also result in the Federal Home Loan Banks imposing a higher rate of interest on advances to their members. If dividends were reduced, or interest on future FHLB advances increased, the Company's net interest income would be negatively impacted.

The regional banks within the Federal Home Loan Bank System have experienced higher levels of other-than-temporary impairment in their private label mortgage-backed securities and home equity loans, which has raised concerns about whether their capital levels could be reduced below regulatory requirements. In response to unprecedented market conditions and potential future losses, the FHLB has implemented an initiative to preserve capital by the adoption of a revised retained earnings target, declaration of a moratorium on excess stock repurchases and the suspension of cash dividend payments. The Company anticipates a decline in the dividend yield on its holdings in FHLB stock since the FHLB announced that dividend payments in 2009 are unlikely. There can be no assurance that the impact of recent market conditions on the financial condition of the Federal Home Loan Banks or future legislation on the Federal Home Loan Banks will not cause a decrease in the value of FHLB stock held by the Bank.

***Community Reinvestment Act.*** Under the Community Reinvestment Act, as implemented by OTS regulations, a savings association has a continuing and affirmative obligation consistent with its safe and sound operation to help meet the credit needs of its entire community, including low and moderate income neighborhoods. The Community Reinvestment Act does not establish specific lending requirements or programs for financial institutions nor does it limit an institution's discretion to develop the types of products and services that it believes are best suited to its particular community, consistent with the Community Reinvestment Act. The Community Reinvestment Act requires the OTS, in connection with its examination of a savings association, to assess the institution's record of meeting the credit needs of its community and to take such record into account in its evaluation of certain applications by such institution.

The Community Reinvestment Act requires public disclosure of an institution's rating and requires the OTS to provide a written evaluation of an association's Community Reinvestment Act performance utilizing a four-tiered descriptive rating system. The Bank received an outstanding rating, which is the highest possible rating, as a result of its most recent Community Reinvestment Act assessment.

---

**Table of Contents**

***Federal Reserve System.*** The Federal Reserve Board regulations require savings institutions to maintain noninterest earning reserves against their transaction accounts (primarily Negotiable Order of Withdrawal NOW and regular checking accounts). The regulations generally provide that reserves be maintained against aggregate transaction accounts as follows: a 3% reserve ratio is assessed on net transaction accounts up to and including \$44.4 million; a 10% reserve ratio is applied above \$44.4 million. The first \$10.3 million of otherwise reservable balances (subject to adjustments by the Federal Reserve Board) are exempted from the reserve requirements. The amounts are adjusted annually. The Bank complies with the foregoing requirements.

**Holding Company Regulation**

***General.*** The Company and SI Bancorp, MHC are savings and loan holding companies within the meaning of federal law. As such, they are registered with the OTS and are subject to OTS regulations, examinations, supervision, reporting requirements and regulations concerning corporate governance and activities. In addition, the OTS has enforcement authority over the Company, SI Bancorp, MHC and their non-savings institution subsidiaries. Among other things, this authority permits the OTS to restrict or prohibit activities that are determined to be a serious risk to the Bank.

***Restrictions Applicable to Mutual Holding Companies.*** According to federal law and OTS regulations, a mutual holding company, such as SI Bancorp, MHC, may generally engage in the following activities: (1) investing in the stock of a bank; (2) acquiring a mutual association through the merger of such association into a bank subsidiary of such holding company or an interim bank subsidiary of such holding company; (3) merging with or acquiring another holding company, one of whose subsidiaries is a bank; (4) investing in a corporation, the capital stock of which is available for purchase by a savings association under federal law or under the law of any state where the subsidiary savings association or associations share their home offices; (5) furnishing or performing management services for a savings association subsidiary of such company; (6) holding, managing or liquidating assets owned or acquired from a savings subsidiary of such company; (7) holding or managing properties used or occupied by a savings association subsidiary of such company; (8) acting as trustee under deeds of trust; (9) any other activity (A) that the Federal Reserve Board, by regulation, has determined to be permissible for bank holding companies under Section 4(c) of the Bank Holding Company Act, unless the OTS, by regulation, prohibits or limits any such activity for savings and loan holding companies; or (B) in which multiple savings and loan holding companies were authorized (by regulation) to directly engage on March 5, 1987; and (10) purchasing, holding or disposing of stock acquired in connection with a qualified stock issuance if the purchase of such stock by such savings and loan holding company is approved by the OTS.

The Gramm-Leach Bliley Act of 1999 was designed to modernize the regulation of the financial services industry by expanding the ability of bank holding companies to affiliate with other types of financial services companies such as insurance companies and investment banking companies. The legislation also expanded the activities permitted for mutual savings and loan holding companies to include any activity permitted a financial holding company under the legislation, including a broad array of insurance and securities activities.

Federal law prohibits a savings and loan holding company, including a federal mutual holding company, from directly or indirectly, or through one or more subsidiaries, acquiring more than 5% of the voting stock of another savings institution, or its holding company, without prior written approval of the OTS. Federal law also prohibits a savings and loan holding company from acquiring more than 5% of a company engaged in activities other than those authorized for savings and loan holding companies by federal law; or acquiring or retaining control of a depository institution that is not insured by the FDIC. In evaluating applications by holding companies to acquire savings institutions, the OTS must consider the financial and managerial resources and future prospects of the company and institution involved, the effect of the acquisition on the risk to the insurance funds, the convenience and needs of the community and competitive factors.

## **Table of Contents**

The OTS is prohibited from approving any acquisition that would result in a multiple savings and loan holding company controlling savings institutions in more than one state, except: (1) the approval of interstate supervisory acquisitions by savings and loan holding companies, and (2) the acquisition of a savings institution in another state if the laws of the state of the target savings institution specifically permits such acquisitions. The states vary in the extent to which they permit interstate savings and loan holding company acquisitions.

If the savings institution subsidiary of a savings and loan holding company fails to meet the qualified thrift lender test, the holding company must register with the Federal Reserve Board as a bank holding company within one year of the savings institution's failure to so qualify.

Although savings and loan holding companies are not currently subject to regulatory capital requirements or specific restrictions on the payment of dividends or other capital distributions, federal regulations do prescribe such restrictions on subsidiary savings institutions as described below. The Bank must notify the OTS 30 days before declaring any dividend. In addition, the financial impact of a holding company on its subsidiary institution is a matter that is evaluated by the OTS and the agency has authority to order cessation of activities or divestiture of subsidiaries deemed to pose a threat to the safety and soundness of the institution.

***Stock Holding Company Subsidiary Regulation.*** The OTS has adopted regulations governing the two-tier mutual holding company form of organization and subsidiary stock holding companies that are controlled by mutual holding companies. The Company has adopted this form of organization. The Company is the stock holding company subsidiary of SI Bancorp, MHC. The Company is permitted to engage in activities that are permitted for SI Bancorp, MHC subject to the same restrictions and conditions.

***Waivers of Dividends by SI Bancorp, MHC.*** OTS regulations require SI Bancorp, MHC to notify the OTS if it proposes to waive receipt of dividends from the Company. The OTS reviews dividend waiver notices on a case-by-case basis, and, in general, does not object to any such waiver if: (i) the waiver would not be detrimental to the safe and sound operating of the savings association subsidiary; and (ii) the mutual holding company's Board of Directors determines that such waiver is consistent with such directors' fiduciary duties to the mutual holding company's members.

***Acquisition of Control.*** Under the federal Change in Bank Control Act, a notice must be submitted to the OTS if any person (including a company), or group acting in concert, seeks to acquire control of a savings and loan holding company or savings association. An acquisition of control can occur upon the acquisition of 10% or more of the voting stock of a savings and loan holding company or savings institution or as otherwise defined by the OTS. Under the Change in Bank Control Act, the OTS has 60 days from the filing of a complete notice to act, taking into consideration certain factors, including the financial and managerial resources of the acquirer and the anti-trust effects of the acquisition. Any company that so acquires control would then be subject to regulation as a savings and loan holding company.

## **Table of Contents**

### **Other Regulations**

Interest and other charges collected or contracted for by the Bank are subject to state usury laws and federal laws concerning interest rates. The Bank's loan operations are also subject to federal laws applicable to credit transactions, such as the:

Truth-In-Lending Act, governing disclosures of credit terms to consumer borrowers;

Home Mortgage Disclosure Act of 1975, requiring financial institutions to provide information to enable the public and public officials to determine whether a financial institution is fulfilling its obligation to help meet the housing needs of the community it serves;

Equal Credit Opportunity Act, prohibiting discrimination on the basis of race, creed or other prohibited factors in extending credit;

Fair Credit Reporting Act of 1978, governing the use and provision of information to credit reporting agencies;

Fair Debt Collection Act, governing the manner in which consumer debts may be collected by collection agencies; and

Rules and regulations of the various federal agencies charged with the responsibility of implementing such federal laws. The deposit operations of the Bank also are subject to the:

Right to Financial Privacy Act, which imposes a duty to maintain confidentiality of consumers' financial records and prescribes procedures for complying with administrative subpoenas of financial records;

Electronic Funds Transfer Act and Regulation E promulgated thereunder, which governs automatic deposits to and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of automated teller machines and other electronic banking services; and

Check Clearing for the 21st Century Act (also known as Check 21), which gives substitute checks, such as digital check images and copies made from that image, the same legal standing as the original paper check.

### **Federal Income Taxation**

**General.** The Company reports its income on a calendar year basis using the accrual method of accounting. The federal income tax laws apply to the Company in the same manner as to other corporations with some exceptions, including particularly the Bank's reserve for bad debts discussed below. The following discussion of tax matters is intended only as a summary and does not purport to be a comprehensive description of the tax rules applicable to the Company and its subsidiaries. The Company's federal income tax returns have been either audited or closed under the statute of limitations through tax year 2004. The Company's maximum federal income tax rate was 34.0% for 2008.

**Bad Debt Reserves.** For fiscal years beginning before June 30, 1996, thrift institutions that qualified under certain definitional tests and other conditions of the Internal Revenue Code were permitted to use certain favorable provisions to calculate their deductions from taxable income for annual additions to their bad debt reserve. A reserve could be established for bad debts on qualifying real property loans, generally secured by interests in real property improved or to be improved, under the percentage of taxable income method or the experience method. The reserve for nonqualifying loans was computed using the experience method. Federal legislation enacted in 1996 repealed the reserve method of accounting

## Edgar Filing: SI Financial Group, Inc. - Form 10-K

for bad debts for institutions with assets in excess of \$500.0 million and the percentage of taxable income method for all institutions for tax years beginning after 1995 and required savings institutions to recapture or take into income certain portions of their accumulated bad debt reserves. However, those

## **Table of Contents**

tax-based bad debt reserves accumulated prior to 1988 ( Base Year Reserves ) were not required to be recaptured unless the institution failed certain tests. Approximately \$3.7 million of the Bank's accumulated tax-based bad debt reserves would not be recaptured into taxable income unless it makes a non-dividend distribution to the Company as described below.

**Distributions.** If the Bank makes non-dividend distributions to the Company, the distributions will be considered to have been made from the Bank's unrecaptured tax-based bad debt reserves, including the balance of its Base Year Reserves as of December 31, 1987, to the extent of the non-dividend distributions, and then from the Bank's supplemental reserve for losses on loans, to the extent of those reserves, and an amount based on the amount distributed, but not more than the amount of those reserves, will be included in the Bank's taxable income. Non-dividend distributions include distributions in excess of the Bank's current and accumulated earnings and profits as calculated for federal income tax purposes, distributions in redemption of stock and distributions in partial or complete liquidation. Dividends paid out of the Bank's current or accumulated earnings and profits will not be so included in the Bank's taxable income.

The amount of additional taxable income triggered by a non-dividend is an amount that, when reduced by the tax attributable to the income, is equal to the amount of the distribution. Therefore, if the Bank makes a non-dividend distribution to the Company, approximately one and one-half times the amount of the distribution not in excess of the amount of the reserves would be includable in income for federal income tax purposes, assuming a 34% federal corporate income tax rate. The Bank does not intend to pay non-dividend distributions that would result in a recapture of any portion of its bad debt reserves.

## **State Income Taxation**

The Company and its subsidiaries are subject to the Connecticut corporation business tax. The Company and its subsidiaries are eligible to file a combined Connecticut income tax return and pay the regular corporation business tax. The Connecticut corporation business tax is based on the federal taxable income before net operating loss and special deductions of the Company and its subsidiaries and makes certain modifications to federal taxable income to arrive at Connecticut taxable income. Connecticut taxable income is multiplied by the state tax rate (7.5% for fiscal year 2008) to arrive at Connecticut income tax.

In May 1998, the State of Connecticut enacted legislation permitting the formation of passive investment company subsidiaries by financial institutions. This legislation exempts qualifying passive investment companies from the Connecticut corporation business tax and excludes dividends paid from a passive investment company from the taxable income of the parent financial institution. The Bank's formation of a passive investment company in January 1999 substantially eliminates the state income tax expense of the Company and its subsidiaries under current law. See *Item 1. Business. Subsidiary Activities - SI Mortgage Company* for a discussion of the Bank's passive investment company.

**Table of Contents****Executive Officers of the Registrant**

Certain executive officers of the Bank also serve as executive officers of the Company. The day-to-day management duties of the executive officers of the Company and the Bank relate primarily to their duties as to the Bank. The executive officers of the Company currently are as follows:

<b>Name</b>	<b>Age <sup>(1)</sup></b>	<b>Position</b>
Rheo A. Brouillard	54	President and Chief Executive Officer of Savings Institute Bank and Trust Company, SI Financial Group and SI Bancorp, MHC
Brian J. Hull	48	Executive Vice President, Chief Financial Officer and Treasurer of Savings Institute Bank and Trust Company, SI Financial Group and SI Bancorp, MHC
David T. Weston	46	Senior Vice President and Senior Trust Officer of Savings Institute Bank and Trust Company
William E. Anderson, Jr.	39	Vice President and Retail Banking Officer of Savings Institute Bank and Trust Company
Laurie L. Gervais	44	Vice President and Director of Human Resources of Savings Institute Bank and Trust Company
Michael J. Moran	60	Senior Vice President and Senior Credit Officer of Savings Institute Bank and Trust Company

<sup>(1)</sup> Ages presented are as of December 31, 2008.

**Biographical Information:**

**Rheo A. Brouillard** has been the President and Chief Executive Officer of Savings Institute Bank and Trust Company, SI Financial Group and SI Bancorp, MHC since 1995, 2000 and 2004, respectively. Mr. Brouillard has been a director of the Company since 1995.

**Brian J. Hull** has been Executive Vice President since 2002 and Chief Financial Officer and Treasurer since he joined Savings Institute Bank and Trust Company in 1997. Mr. Hull has served as Chief Financial Officer and Treasurer of Savings Institute Bank and Trust Company, SI Financial Group and SI Bancorp, MHC since 2000 and 2004, respectively.

**David T. Weston** has been Senior Vice President and Senior Trust Officer since 2008. Mr. Weston oversees wealth management services, which includes trust, investment and insurance operations. Mr. Weston served as a Vice President within Savings Institute Bank and Trust Company's trust department since 2004.

**William E. Anderson, Jr.** has been Vice President and Retail Banking Officer since 2002 and 2004, respectively. Mr. Anderson joined Savings Institute Bank and Trust Company in 1995.

**Laurie L. Gervais** has been Vice President and Director of Human Resources since 2003 and 2001, respectively. Ms. Gervais joined Savings Institute Bank and Trust Company in 1983.

**Michael J. Moran** has been Senior Vice President and Senior Credit Officer since 2008 and previously held this position from 2001 through 2006. Mr. Moran served as Vice President and Senior Commercial Real Estate Officer during 2007. Mr. Moran joined Savings Institute Bank and Trust Company in 1995.

**Table of Contents****Item 1A. Risk Factors.**

Prospective investors in the Company's common stock should carefully consider the following factors.

***The Company's investment portfolio may suffer reduced returns, material losses or other-than-temporary impairment losses.***

During an economic downturn, the Company's investment portfolio could be subject to higher risk. The value of the Company's investment portfolio is subject to the risk that certain investments may default or become impaired due to a deterioration in the financial condition of one or more issuers of the securities held in the Company's portfolio, or due to a deterioration in the financial condition of an issuer that guarantees an issuer's payments of such investments. Such defaults and impairments could reduce the Company's net investment income and result in realized investment losses.

The Company's investment portfolio is also subject to increased risk as the valuation of investments is more subjective when markets are illiquid, thereby increasing the risk that the estimated fair value (i.e. the carrying amount) of the portion of the investment portfolio that is carried at fair value as reflected in the Company's financial statements is not reflective of prices at which actual transactions would occur.

Because of the risks set forth above, the value of the Company's investment portfolio could decrease, the Company could experience reduced net investment income, and the Company could incur realized investment losses, which could materially and adversely affect the Company's results of operations, financial position and liquidity.

Additionally, the Company reviews its securities portfolio at each quarter-end reporting period to determine whether the fair value is below the current carrying value. When the fair value of any of the Company's securities has declined below its carrying value, the Company is required to assess whether the decline is other-than-temporary. The Company is required to write-down the value of that security through a charge to earnings if it concludes that the decline is other-than-temporary. As of December 31, 2008, the amortized cost and the fair value of the Company's securities portfolio totaled \$167.2 million and \$162.7 million, respectively. Changes in the expected cash flows of these securities and/or prolonged price declines may result in the Company concluding in future periods that the impairment of these securities is other-than-temporary, which would require a charge to earnings to write-down these securities to their fair value. Any charges for other-than-temporary impairment would not impact cash flow, tangible capital or liquidity.

***The current economic environment poses significant challenges for the Company and could adversely affect the Company's financial condition and results of operations.***

The Company is currently operating in a challenging and uncertain economic environment, both nationally and in the local markets. Financial institutions continue to be affected by sharp declines in financial and real estate values. Continued declines in real estate values and home sales, and an increase in the financial stress on borrowers stemming from an uncertain economic environment, including rising unemployment, could have an adverse effect on the Bank's borrowers or their customers, which could adversely impact the repayment of its loan portfolio. The overall deterioration in economic conditions also ne; FONT-SIZE: 10pt; FONT-FAMILY: times new roman">\$

(26,453) \$ 4,683

The change in interest due to both volume and yield/rate has been allocated to change due to volume and change due to yield/rate in proportion to the absolute value of the change in each. Tax-exempt income has been adjusted to a tax equivalent basis using a tax rate of 35% for each of the three years presented. The balances of nonaccrual loans and related income recognized have been included for purposes of these computations.

Mortgage-backed securities	-	-	-	-	-	-	160,473	4.55%	160,473
Other securities	-	-	-	-	126	5.72%	-	-	126
Total securities held to maturity	\$ 16,925	4.98%	\$ 36,727	7.05%	\$ 51,609	7.50%	\$ 169,835	4.67%	\$ 275,096

Due to the nature of mortgage related securities, the actual maturities of these investments can be substantially shorter than their contractual maturity. Management believes the actual weighted average maturity of the entire mortgage related portfolio to be approximately 2.02 years.

As of December 31, 2007, Trustmark did not hold any securities of one issuer with a carrying value exceeding ten percent of total shareholders' equity.

TABLE 8 - NONPERFORMING ASSETS AND PAST DUE LOANS

The table below shows Trustmark's nonperforming assets and past due loans at the end of each of the last five years (\$ in thousands):

	December 31,				
	2007	2006	2005	2004	2003
<b>Nonperforming Assets</b>					
Loans accounted for on a nonaccrual basis	\$ 65,173	\$ 36,399	\$ 28,914	\$ 21,864	\$ 23,921
Other real estate (ORE)	8,348	2,509	4,107	5,615	5,929
<b>Total nonperforming assets</b>	<b>\$ 73,521</b>	<b>\$ 38,908</b>	<b>\$ 33,021</b>	<b>\$ 27,479</b>	<b>\$ 29,850</b>
<b>Past Due Loans</b>					
Loans past due over 90 days	\$ 4,853	\$ 2,957	\$ 2,719	\$ 5,284	\$ 2,606
Serviced GNMA loans eligible for repurchase	11,847	8,510	22,769	-	-
<b>Total loans past due over 90 days</b>	<b>\$ 16,700</b>	<b>\$ 11,467</b>	<b>\$ 25,488</b>	<b>\$ 5,284</b>	<b>\$ 2,606</b>
<b>Nonperforming assets/total loans and ORE</b>	<b>1.02%</b>	<b>0.59%</b>	<b>0.56%</b>	<b>0.51%</b>	<b>0.59%</b>

A loan is classified as nonaccrual, and the accrual of interest on such loan is discontinued, when the contractual payment of principal or interest becomes 90 days past due or if Management has serious doubts about further collectibility of principal or interest, even though the loan is currently performing. A loan may remain on accrual status if it is in the process of collection and well secured. When a loan is placed on nonaccrual status, unpaid interest is reversed against interest income. Interest received on nonaccrual loans is applied against principal. Loans are restored to accrual status when the obligation is brought current or has performed in accordance with the contractual terms for a reasonable period of time, and the ultimate collectibility of the total contractual principal and interest is no longer in doubt. A loan is considered impaired when, based on current information and events, it is probable that Trustmark will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. The policy for recognizing income on impaired loans is consistent with the nonaccrual policy.

Government National Mortgage Association (GNMA) optional repurchase programs allow financial institutions to buy back individual delinquent mortgage loans that meet certain criteria from the securitized loan pool for which the institution provides servicing. At the servicer's option and without GNMA's prior authorization, the servicer may repurchase such a delinquent loan for an amount equal to 100 percent of the remaining principal balance of the loan. Under Statement of Financial Accounting Standards (SFAS) No. 140, "Accounting for Transfers and Servicing of

Financial Assets and Extinguishments of Liabilities-a replacement of SFAS No. 125," this buy-back option is considered a conditional option until the delinquency criteria are met, at which time the option becomes unconditional. When Trustmark is deemed to have regained effective control over these loans under the unconditional buy-back option, the loans can no longer be reported as sold and must be brought back onto the balance sheet as loans held for sale, regardless of whether Trustmark intends to exercise the buy-back option. These loans are reported as held for sale in accordance with U. S. generally accepted accounting principles with the offsetting liability being reported as short-term borrowings. During the two years ended December 31, 2007, Trustmark has not exercised their buy-back option on any delinquent loans serviced for GNMA. GNMA loans eligible for repurchase totaled \$17.9 million at December 31, 2007 and \$13.5 million at December 31, 2006.

As of December 31, 2007, Management is not aware of any additional credits, other than those identified above, where serious doubts as to the repayment of principal and interest exist. There are no interest-earning assets which would be required to be disclosed above if those assets were loans. Trustmark had no loan concentrations greater than ten percent of total loans other than those loan categories shown in Table 6.

Explanation of the changes in 2007 can be found in the table captioned "Nonperforming Assets" and the related discussion included in Management's Discussion and Analysis found in the Registrant's 2007 Annual Report to Shareholders and is incorporated herein by reference.

TABLE 9 - ANALYSIS OF THE ALLOWANCE FOR LOAN LOSSES

The table below summarizes Trustmark's loan loss experience for each of the last five years (\$ in thousands):

	Years Ended December 31,				
	2007	2006	2005	2004	2003
Balance at beginning of period	\$ 72,098	\$ 76,691	\$ 64,757	\$ 74,276	\$ 74,771
Loans charged off:					
Real estate loans	(8,678)	(1,511)	(2,770)	(3,009)	(2,863)
Loans to finance agricultural production and other loans to farmers	(297)	(3)	(14)	(19)	(60)
Commercial and industrial	(2,136)	(1,670)	(2,978)	(1,178)	(3,688)
Consumer	(10,207)	(7,740)	(8,147)	(7,949)	(9,605)
All other loans	(5,472)	(4,014)	(2,913)	(3,247)	(2,992)
Total charge-offs	(26,790)	(14,938)	(16,822)	(15,402)	(19,208)
Recoveries on loans previously charged off:					
Real estate loans	57	152	135	30	79
Loans to finance agricultural production and other loans to farmers	-	-	-	-	-
Commercial and industrial	1,356	1,729	1,006	1,029	735
Consumer	5,944	6,130	5,300	5,324	5,612
All other loans	3,402	2,955	2,774	2,555	2,516
Total recoveries	10,759	10,966	9,215	8,938	8,942
Net charge-offs	(16,031)	(3,972)	(7,607)	(6,464)	(10,266)
Provision for loan losses	23,784	(5,938)	19,541	(3,055)	9,771
Allowance of acquired bank	-	5,317	-	-	-
Balance at end of period	\$ 79,851	\$ 72,098	\$ 76,691	\$ 64,757	\$ 74,276
Percentage of net charge-offs during period to average loans outstanding during the period	0.23%	0.06%	0.13%	0.12%	0.21%

The allowance for loan losses is established through provisions for estimated loan losses charged against net income. The allowance reflects Management's best estimate of the probable loan losses related to specifically identified loans, as well as, probable incurred loan losses in the remaining loan portfolio and requires considerable judgement. The allowance is based upon Management's current judgments and the credit quality of the loan portfolio, including all internal and external factors that impact loan collectibility. SFAS No. 5, "Accounting for Contingencies," and SFAS No. 114, "Accounting by Creditors for Impairment of a Loan," limit the amount of the loss allowance to the estimate of losses that have been incurred at the balance sheet reporting date. Accordingly, the allowance is based upon past events and current economic conditions.

Trustmark's allowance has been developed using different factors to estimate losses based upon specific evaluation of identified individual loans considered impaired, estimated identified losses on various pools of loans and/or groups of risk rated loans with common risk characteristics and other external and internal factors of estimated probable losses

based on other facts and circumstances.

The level of Trustmark's allowance reflects Management's continuing evaluation of industry concentrations, specific credit risks, loan loss experience, current loan portfolio growth, present economic, political and regulatory conditions and unidentified losses inherent in the current loan portfolio. This evaluation takes into account other qualitative factors including recent acquisitions, national, regional and local economic trends and conditions, changes in credit concentration, changes in levels and trends of delinquencies and nonperforming loans, changes in levels and trends of net charge-offs, changes in interest rates and collateral, financial and underwriting exceptions.

Following Hurricane Katrina, Trustmark identified customers specifically impacted by the storm in an effort to estimate the loss of collateral value and customer payment abilities. In accordance with SFAS No. 5, Trustmark determined, through reasonable estimates, that specific losses were probable and initially increased its allowance for loan losses by \$9.8 million, on a pretax basis, during the third quarter of 2005. Trustmark continually reevaluates its estimates for probable losses resulting from Katrina. As a result, Trustmark released allowance for loan losses of a pretax basis of \$7.8 million during 2006 and \$0.6 million during 2007. At December 31, 2007, the allowance for loan losses included specific Katrina accruals totaling \$594 thousand. Management's estimates, assumptions and judgments are based on information available as of the date of the consolidated financial statements; accordingly, as the information changes, actual results could differ from those estimates.

---

Table of Contents

TRUSTMARK CORPORATION  
STATISTICAL DISCLOSURES (CONTINUED)

TABLE 10 - ALLOCATION OF THE ALLOWANCE FOR LOAN LOSSES

Trustmark's allowance for loan losses has been developed using different factors to estimate: (i) specific valuation allowances determined in accordance with SFAS No. 114 based on probable losses on specific loans; (ii) portfolio based valuation allowances determined in accordance with SFAS No. 5 based on historical loan loss experience for similar loans with similar characteristics and trends; and (iii) qualitative risk valuation allowances determined in accordance with SFAS No. 5 based on general economic conditions and other qualitative risk factors, both internal and external, to Trustmark.

The allowances established for probable losses on specific commercial loans are based on an ongoing analysis and evaluation of classified loans. Loans are classified based on internal credit risk grading process that evaluates, among other things: (i) the obligor's ability to repay; (ii) the underlying collateral, if any; and (iii) the economic environment and industry in which the borrower operates. Specific valuation allowances are determined by analyzing the borrower's ability to repay amounts owed, collateral deficiencies, the relative risk grade of the loan and economic conditions affecting the borrower's industry, among other things. If after review, a specific valuation allowance is not assigned to the loan, and the loan is not considered to be impaired, the loan remains with a pool of similar risk rated loans that is assigned a valuation allowance calculated based on a Moody's probability study.

Historical valuation allowances are calculated based on the historical loss experience of specific types of loans and the Moody's probability study for internal commercial risk graded loans. Trustmark calculates historical loss ratios for pools of similar loans with similar characteristics based on the proportion of actual charge-offs experienced to the total population of loans in the pool. The historical loss ratios are periodically updated based on actual charge-off experience. A historical valuation allowance is established for each pool of similar loans based upon the product of the historical loss ratio and the total dollar amount of the loans in the pool. Trustmark's pools of similar loans include industry concentration by call report code, consumer loans and 1-4 family residential mortgages.

General valuation allowances are based on general economic conditions and other qualitative risk factors both internal and external to the bank. In general, such valuation allowances are determined by evaluating, among other things: (i) the experience, ability and effectiveness of the bank's lending management and staff; (ii) the effectiveness of Trustmark's loan policies, procedures and internal controls; (iii) the changes in asset quality; (iv) the impact of rising interest rates on portfolio risk; (v) the accuracy of assigned risk ratings; (vi) national economic trends and conditions; (vii) consumer bankruptcy trends; (viii) the concentration of consumer credits; (ix) commercial real estate vacancy trends by region; (x) regional and local economic trends and conditions; (xi) collateral, financial and underwriting exception trends by region; and (xii) the impact of recent acquisitions.

Management evaluates the degree of risk that each one of these components has on the quality of the loan portfolio on a quarterly basis. Each component is determined to have either a high, moderate or low degree of risk. For the period analyzed, Management assesses whether the degree of risk for each component has increased, declined or remains neutral. The results are then input into a "qualitative factor allocation matrix" to determine an appropriate qualitative risk allowance. Should any of the factors considered by Management in evaluating the adequacy of the allowance for loan losses change, Trustmark's estimate of probable loan losses could also change, which could affect the level of future provisions for possible loan losses.

The table below presents certain information concerning Trustmark's short-term borrowings for each of the last three years (\$ in thousands):

	2007	2006	2005
Federal funds purchased and securities sold under repurchase agreements:			
Amount outstanding at end of period	\$ 460,763	\$ 470,434	\$ 492,853
Weighted-average interest rate at end of period	3.30%	4.50%	3.31%
Maximum amount outstanding at any month end during each period	\$ 525,142	\$ 505,627	\$ 770,273
Average amount outstanding during each period	\$ 447,438	\$ 471,386	\$ 668,389
Weighted-average interest rate during each period	4.52%	4.29%	2.86%
Short-term borrowings:			
Amount outstanding at end of period	\$ 474,354	\$ 271,067	\$ 775,402
Weighted-average interest rate at end of period	4.30%	5.14%	4.24%
Maximum amount outstanding at any month end during each period	\$ 526,879	\$ 692,295	\$ 1,271,250
Average amount outstanding during each period	\$ 269,102	\$ 520,942	\$ 892,570
Weighted-average interest rate during each period	5.10%	4.98%	3.66%

Table of Contents

ITEM 1A. RISK FACTORS

Trustmark and its subsidiaries could be adversely impacted by various risks and uncertainties, which are difficult to predict. As a financial institution, Trustmark has significant exposure to market risk, including interest-rate risk, liquidity risk and credit risk, among others. This section includes a description of certain risks, uncertainties and assumptions identified by Management that are difficult to predict and that could materially affect Trustmark's financial condition and results of operations, as well as the value of Trustmark's financial instruments in general, and Trustmark common stock, in particular. Additional risks and uncertainties that Management currently deems immaterial or is unaware of may also impair Trustmark's business operations. This report is qualified in its entirety by these risk factors.

Trustmark is Subject to Interest Rate Risk

Trustmark is exposed to interest rate risk in its core banking activities of lending and deposit taking since assets and liabilities reprice at different times and by different amounts as interest rates change. As a result, net interest income, which represents the largest revenue source for Trustmark, is subject to the effects of changing interest rates. Trustmark closely monitors the sensitivity of net interest income to changes in interest rates and attempts to limit the variability of net interest income as interest rates change. Trustmark makes use of both on- and off-balance sheet financial instruments to mitigate exposure to interest rate risk. Possible actions to mitigate such risk include, but are not limited to, changes in the pricing of loan and deposit products, modifying the composition of earning assets and interest-bearing liabilities, and adding to, modifying or terminating interest rate swap agreements or other financial instruments used for interest rate risk management purposes. Trustmark has entered into derivative contracts to hedge our Mortgage Servicing Rights (MSR) in order to offset changes in fair value resulting from rapidly changing interest rate environments. In spite of Trustmark's due diligence in regards to these hedging strategies, significant risk are involved that, if realized, may prove our strategies to be ineffective and our results of operations adversely impacted. Risks associated with this strategy include the risk that our hedging strategies are susceptible to prepayment risk, basis risk, market volatility and changes in the shape of the yield curve; the risk that our hedging strategies rely on our assumptions and projections regarding these assets and general market factors and that assumptions may prove to be incorrect; the risk that our hedging strategies do not adequately mitigate the impact of changes in interest rates or prepayment speeds; the risk that the valuation of MSR based on certain circumstances and assumptions will not be realized due to differences in forecasted inputs within the model and the actual results and the risk that the models used to forecast hedge instruments may project expectations that differ from actual results.

Trustmark is Subject to Lending Risk

There are inherent risks associated with Trustmark's lending activities. The risks include, among other things, the impact of changes in the economic conditions in the markets where Trustmark operates as well as those across the United States. Weakening economic conditions could adversely impact the ability of borrowers to repay outstanding loans or the value of collateral securing these loans. As of December 31, 2007, approximately 53% of Trustmark's loan portfolio consisted of commercial and industrial: construction, land development and other land loans; and loans secured by nonfarm, nonresidential properties. These types of loans are also typically larger than residential real estate and consumer loans. Because Trustmark's loan portfolio contains a significant number of commercial and industrial, construction and commercial real estate loans with relatively large balances, the deterioration of one or a few of these loans could cause a significant increase in nonperforming loans. An increase in nonperforming loans could result in a net loss in earnings from these loans, an increase in the provision for possible loan losses and an increase in loan charge-offs, all of which could have a material adverse effect on Trustmark's financial condition and results of operations.

To help manage credit risk, Trustmark maintains a detailed credit policy and utilizes various committees that include members of senior management to approve significant extensions of credit. Trustmark also maintains a credit review department that regularly reviews Trustmark's loan portfolios to ensure compliance with established credit policy.

Trustmark maintains an allowance for credit losses that in Management's judgment is adequate to absorb losses inherent in the loan portfolio.

#### Trustmark's Allowance for Loan Losses May Not Be Adequate to Cover Credit Losses

The allowance for loan losses is established through provisions for estimated loan losses charged against earnings. The allowance for loan losses is maintained at a level believed adequate by management, based on estimated probable losses within the existing loan portfolio. This evaluation is inherently subjective, as it requires material estimates, including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change. Changes in economic conditions affecting borrowers, new information regarding existing loans, identification of additional problem loans and other factors, both within and outside of Trustmark's control, may require an increase in the allowance for loan losses. In addition, bank regulatory agencies periodically review Trustmark's allowance for loan losses and may require an increase in the provision for loan losses or the recognition of further charge-offs, based on judgments different than those of Management. In addition, if charge-offs in future periods exceed the allowance for loan losses, Trustmark will need additional provisions to increase the allowance for loan losses. Any increases in the allowance for loan losses will result in a decrease in net income and, possibly, stockholders' equity, and may have a material adverse affect on Trustmark's financial condition and results of operations.

---

Table of Contents

Trustmark is Subject to Liquidity Risk

Liquidity refers to Trustmark's ability to ensure that sufficient cash flow and liquid assets are available to satisfy current and future financial obligations, including demands for loans and deposit withdrawals, funding operating costs, and for other corporate purposes. Liquidity risk arises whenever the maturities of financial instruments included in assets and liabilities differ. Trustmark obtains funding through deposits and various short-term and long-term wholesale borrowings, including federal funds purchased and securities sold under agreements to repurchase, brokered certificates of deposit and borrowings from the Federal Home Loan Bank. Should Trustmark experience a substantial deterioration in its financial condition or its debt ratings, or should the availability of funding become restricted due to disruption in the financial markets, Trustmark's ability to obtain funding from these or other sources could be negatively impacted. Trustmark attempts to quantify such credit-event risk by modeling scenarios that estimate the liquidity impact resulting from a short-term ratings downgrade over various grading levels. Trustmark estimates such impact by attempting to measure the effect on available unsecured lines of credit, available capacity from secured borrowing sources and securitizable assets. To mitigate such risk, Trustmark maintains available lines of credit with the Federal Reserve Bank and the Federal Home Loan Bank that are secured by loans and investment securities. Management continuously monitors Trustmark's liquidity position for compliance with internal policies and believes that available sources of liquidity are adequate to meet funding needs in the normal course of business.

Trustmark Operates In A Highly Competitive Industry and Market Area

Trustmark faces substantial competition in all areas of its operations from a variety of different competitors, many of which are larger and may have more financial resources. Such competitors primarily include national, regional, and community banks within the various markets Trustmark operates. Additionally, various out-of-state banks have entered or have announced plans to enter the market areas in which Trustmark currently operates. Trustmark also faces competition from many other types of financial institutions, including, without limitation, savings and loans, credit unions, finance companies, brokerage firms, insurance companies, factoring companies and other financial intermediaries. The financial services industry could become even more competitive as a result of legislative, regulatory and technological changes and continued consolidation. Banks, securities firms and insurance companies can merge under the umbrella of a financial holding company, which can offer virtually any type of financial service, including banking, securities underwriting, insurance (both agency and underwriting) and merchant banking. Also, technology has lowered barriers to entry and made it possible for nonbanks to offer products and services traditionally provided by banks, such as automatic transfer and automatic payment systems. Many of Trustmark's competitors have fewer regulatory constraints and may have lower cost structures. Additionally, due to their size, many competitors may be able to achieve economies of scale and, as a result, may offer a broader range of products and services as well as better pricing for those products and services than Trustmark can. Trustmark's ability to compete successfully depends on a number of factors, including, among other things: the ability to develop, maintain and build upon long-term customer relationships based on top quality service, high ethical standards and safe, sound assets; the ability to expand Trustmark's market position; the scope, relevance and pricing of products and services offered to meet customer needs and demands; the rate at which Trustmark introduces new products and services relative to its competitors; customer satisfaction with Trustmark's level of service and industry and general economic trends. Failure to perform in any of these areas could significantly weaken Trustmark's competitive position, which could adversely affect Trustmark's growth and profitability, which, in turn, could have a material adverse effect on Trustmark's financial condition and results of operations.

Trustmark is Subject to Extensive Government Regulation and Supervision

Trustmark is subject to extensive state and federal laws and regulations governing the banking industry, in particular, and public companies, in general. Many of those laws and regulations are described in Part I, Item 1 "Business." Changes in those laws and regulations, or the degree of Trustmark's compliance with those laws and regulations as judged by any of several regulators that oversee Trustmark, could have a significant effect on Trustmark's financial condition and results of operations.

## Table of Contents

### Trustmark's Controls and Procedures May Fail or Be Circumvented

Management regularly reviews and updates Trustmark's internal controls, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the system are met. Any failure or circumvention of Trustmark's controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on Trustmark's financial condition and results of operations.

### Potential Acquisitions May Disrupt Trustmark's Business and Dilute Stockholder Value

Trustmark seeks merger or acquisition partners that are culturally similar and have experienced management and possess either significant market presence or have potential for improved profitability through financial management, economies of scale or expanded services. Acquiring other banks, businesses, or branches involves various risks commonly associated with acquisitions, including, among other things: potential exposure to unknown or contingent liabilities of the target company; exposure to potential asset quality issues of the target company; difficulty and expense of integrating the operations and personnel of the target company; potential disruption to Trustmark's business; potential diversion of Trustmark's Management's time and attention; the possible loss of key employees and customers of the target company; difficulty in estimating the value of the target company and potential changes in banking or tax laws or regulations that may affect the target company. Acquisitions typically involve the payment of a premium over book and market values, and, therefore, some dilution of Trustmark's tangible book value and net income per common share may occur in connection with any future transaction. Furthermore, failure to realize the expected revenue increases, cost savings, increases in geographic or product presence, and/or other projected benefits from an acquisition could have a material adverse effect on Trustmark's financial condition and results of operations.

### Trustmark Continually Encounters Technological Change

The financial services industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. Trustmark's future success depends, in part, upon its ability to address the needs of its customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in Trustmark's operations. Many of Trustmark's competitors have substantially greater resources to invest in technological improvements. Trustmark may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to its customers. Failure to successfully keep pace with technological change affecting the financial services industry could have a material adverse impact on Trustmark's financial condition and results of operations.

### Trustmark is Subject to Claims and Litigation

Trustmark and its subsidiaries are parties to lawsuits and other claims that arise in the ordinary course of business. Some of these lawsuits assert claims related to the lending, collection, servicing, investment, trust and other business activities, and some of the lawsuits allege substantial claims for damages. Whether these claims are founded or unfounded, if such claims are not resolved in a manner favorable to Trustmark they may result in significant financial liability and/or adversely affect the market perception of Trustmark and its banking, wealth management and insurance products and services as well as impact customer demand for these products and services. Any financial liability or reputation damage could have a material adverse effect on Trustmark's business, which in turn, could have a material adverse effect on Trustmark's financial condition and results of operations.

### Natural Disasters, Acts of War or Terrorism Could Significantly Impact Trustmark's Business

Natural disasters, acts of war or terrorism and other external events could have a significant impact on Trustmark's ability to conduct business. Such events could affect the stability of Trustmark's deposit base, impair of ability of borrowers to repay outstanding loans, impair the value of collateral securing loans, cause significant property damage, result in loss of revenue and/or cause Trustmark to incur additional expenses. For example, during 2005, Hurricane

Katrina made landfall and subsequently caused extensive flooding and destruction along the Mississippi Gulf Coast as well as central and eastern Mississippi. Operations in several of the communities where Trustmark does business were disrupted by damage and/or lack of access to Trustmark's banking facilities. Other natural disasters, acts of war or terrorism or other adverse external events may occur in the future. Although Management has established disaster recovery policies and procedures, the occurrence of any such event could have a material adverse effect on Trustmark's business, which in turn, could have a material adverse effect on Trustmark's financial condition and results of operations.

Table of Contents

Trustmark's Stock Price Can Be Volatile

Stock price volatility may make it more difficult for you to resell your common stock when you want and at prices you find attractive. Trustmark's stock price can fluctuate significantly in response to a variety of factors. These factors include: actual or anticipated variations in earnings; changes in analysts' recommendations or projections; operating and stock performance of other companies deemed to be peers; perception in the marketplace regarding Trustmark and/or its competitors; new technology used, or services offered, by competitors; significant acquisitions or business combinations involving Trustmark or its competitors, changes in government regulation and failure to integrate acquisitions or realize anticipated benefits from acquisitions. General market fluctuations, industry factors and general economic and political conditions could also cause Trustmark's stock price to decrease regardless of operating results.

An Investment In Trustmark's Common Stock Is Not An Insured Deposit

Trustmark's common stock is not a bank deposit and, therefore, is not insured against loss by the Federal Deposit Insurance Corporation (FDIC), any other deposit insurance fund or by any other public or private entity. Investment in Trustmark's common stock is inherently risky for the reasons described in this "Risk Factors" section and elsewhere in this report and is subject to the same market forces that affect the price of common stock in any company. As a result, if you acquire Trustmark's common stock, you could lose some or all of your investment.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None

ITEM 2. PROPERTIES

Trustmark's principal offices are housed in its complex located in downtown Jackson, Mississippi, and owned by TNB. Approximately 212,000 square feet, or 80%, of the available space in the main office building is allocated to bank use with the remainder occupied by tenants on a lease basis. Trustmark, through its two banking subsidiaries, also operates 137 full-service branches, 17 limited-service branches, one in-store branch, three retirement service branches and an ATM network which includes 125 ATMs at on-premise locations and 71 ATMs located at off-premise sites. In addition, Trustmark's Insurance Division utilizes six off-site locations while the Mortgage Banking Group has one additional off-site location. Trustmark leases 104 of its 236 locations with the remainder being owned.

ITEM 3. LEGAL PROCEEDINGS

The information required by this item can be found in "Management's Discussion and Analysis" included in Trustmark's 2007 Annual Report to Shareholders and is incorporated herein by reference.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to Trustmark's shareholders during the fourth quarter of 2007.

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Trustmark's common stock is listed for trading on the Nasdaq Stock Market. At February 5, 2008, there were approximately 4,100 registered shareholders of Trustmark's common stock. Other information required by this item can be found in Note 16, "Shareholders' Equity," and the table captioned "Principal Markets and Prices of Trustmark's

Stock” included Trustmark’s 2007 Annual Report to Shareholders and is incorporated herein by reference.

---

Table of Contents

The following table shows information relating to the repurchase of common shares by Trustmark Corporation during the three months ended December 31, 2007:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs
October 1, 2007 through October 31, 2007	-	\$ -	-	1,370,581
November 1, 2007 through November 30, 2007	-	\$ -	-	1,370,581
December 1, 2007 through December 31, 2007	-	\$ -	-	1,370,581
<b>Total</b>	-	-	-	-

The repurchase program is subject to Management's discretion and will continue to be implemented through open market purchases or privately negotiated transactions.

**ITEM 6. SELECTED FINANCIAL DATA**

There has been no change of accountants within the two-year period prior to December 31, 2007.

#### ITEM 9A. CONTROLS AND PROCEDURES

##### Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this Annual Report on Form 10-K, an evaluation was carried out by Trustmark's management, with the participation of its Chief Executive Officer and Treasurer and Principal Financial Officer (Principal Financial Officer), of the effectiveness of Trustmark's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Chief Executive Officer and Principal Financial Officer concluded that the disclosure controls and procedures were effective as of the end of the period covered by this report. No changes were made to Trustmark's internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during the last fiscal quarter that materially affected, or are reasonably likely to materially affect, Trustmark's internal control over financial reporting.

---

Table of Contents

The table below represents compensation plans under which equity securities of Trustmark are authorized as of December 31, 2007:

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensations plans (excluding (a))
Approved by security holders	1,954,360	\$ 25.42	5,553,832
Not approved by security holders	-	-	-
<b>Total</b>	<b>1,954,360</b>	<b>\$ 25.42</b>	<b>5,553,832</b>

The table above contains aggregate summary information for the number of securities to be issued upon exercise of outstanding options and their weighted average exercise price related to Trustmark's 2005 Stock Incentive Plan (the 2005 Plan) and 1997 Incentive Plan (the 1997 Plan). Information related to securities remaining available for future issuance comes exclusively from the 2005 Plan as it replaced the 1997 Plan, and from which no additional grants will be made.

#### ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this Item is incorporated herein by reference to Trustmark's Proxy Statement (Schedule 14A) for its 2008 Annual Meeting of Shareholders to be filed with the SEC within 120 days of Trustmark's fiscal year-end.

#### ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by this Item is incorporated herein by reference to Trustmark's Proxy Statement (Schedule 14A) for its 2008 Annual Meeting of Shareholders to be filed with the SEC within 120 days of Trustmark's fiscal year-end.

### PART IV

#### ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

##### A-1. Financial Statements

The reports of KPMG LLP, independent registered public accounting firm, and the following consolidated financial statements of Trustmark Corporation and subsidiaries are included in the Registrant's 2007 Annual Report to Shareholders and are incorporated into Part II, Item 8 herein by reference:

Consolidated Balance Sheets as of December 31, 2007 and 2006  
 Consolidated Statements of Income for the Years Ended December 31, 2007, 2006 and 2005  
 Consolidated Statements of Changes in Shareholders' Equity for the Years Ended December 31, 2007, 2006 and 2005  
 Consolidated Statements of Cash Flows for the Years Ended December 31, 2007, 2006 and 2005  
 Notes to Consolidated Financial Statements (Notes 1 through 20)

##### A-2. Financial Statement Schedules

The schedules to the consolidated financial statements set forth by Article 9 of Regulation S-X are not required under the related instructions or are inapplicable and therefore have been omitted.

A-3. Exhibits

The exhibits listed in the Exhibit Index are filed herewith or are incorporated herein by reference.
