**PRESENTATION OF FINANCIAL AND OTHER INFORMATION**

All references herein to *real*, *reais* or R\$ are to the Brazilian *real*, the official currency of Brazil. All references to U.S. dollars, dollars or U are to U.S. dollars.

On June 28, 2010, the exchange rate for *reais* into U.S. dollars was R\$1.783 to US\$1.00, based on the selling rate as reported by the Central Bank of Brazil (*Banco Central do Brasil*), or the Central Bank. The selling rate was R\$1.741 to US\$1.00 at December 31, 2009, R\$2.337 to US\$1.00 at December 31, 2008, and R\$1.771 to US\$1.00 at December 31, 2007, in each case, as reported by the Central Bank. The *real*/U.S. dollar exchange rate fluctuates widely, and the selling rate at June 28, 2010 may not be indicative of future exchange rates. See Item 3. Key Information Exchange Rates for information regarding exchange rates for the *real* since January 1, 2005.

Solely for the convenience of the reader, we have translated some amounts included in Item 3. Key Information Selected Financial Information and in this annual report from *reais* into U.S. dollars using the selling rate as reported by the Central Bank at December 31, 2009 of R\$1.741 to US\$1.00. These translations should not be considered representations that any such amounts have been, could have been or could be converted into U.S. dollars at that or at any other exchange rate.

Unless otherwise indicated or the context otherwise requires:

all references to Brasil Telecom are to Brasil Telecom S.A.;

all references to our company, we, our, ours, us or similar terms are to Brasil Telecom S.A. and its consolidated subsidiaries;

all references to our Common ADSs are to American Depositary Shares, or ADSs, each representing one common share of our company, all references to our Preferred ADSs are to ADSs, each representing three preferred shares of our company, and all references to our ADSs are to our Common ADSs and Preferred ADSs;

all references to Brazil are to the Federative Republic of Brazil; and

all references to the Brazilian government are to the federal government of the Federative Republic of Brazil.

**Financial Statements**

We maintain our books and records in *reais*.

Our consolidated financial statements at December 31, 2009 and 2008 and for the three years ended December 31, 2009 have been audited, as stated in the report appearing herein, and are included in this annual report.

We prepare our consolidated financial statements in accordance with accounting practices adopted in Brazil, or Brazilian GAAP, which are based on:

Brazilian Law No. 6,404/76, as amended by Brazilian Law No. 9,457/97, Brazilian Law No. 10,303/01, and Brazilian Law No. 11,638/07, which we refer to collectively as the Brazilian Corporation Law;

the rules and regulations of the Brazilian Securities Commission (*Comissão de Valores Mobiliários*), or the CVM; and

## Edgar Filing: BRASIL TELECOM SA - Form 20-F

the accounting standards issued by the Brazilian Institute of Independent Accountants (*Instituto dos Auditores Independentes do Brasil*), the Brazilian Federal Accounting Council (*Conselho Federal de Contabilidade*), and the Brazilian Accounting Standards Committee (*Comitê de Pronunciamentos Contábeis*), or the CPC.

## **Table of Contents**

On December 28, 2007, the Brazilian government enacted Law No. 11,638/07, which became effective on January 1, 2008, amended the Brazilian Corporation Law and changed certain accounting policies under Brazilian GAAP. In December 2008, the CVM issued *Deliberação* 565/08, or Deliberation 565/08, implementing these changes in accounting policies. For a discussion of the principal changes introduced by Law No. 11,638/07 and Deliberation 565/08 as they relate to our financial statements, see note 2 to our audited consolidated financial statements included in this annual report.

Brazilian GAAP differs in certain important respects from accounting principles generally accepted in the United States, or U.S. GAAP. For a discussion of certain differences relating to our financial statements, see note 32 to our audited consolidated financial statements included in this annual report.

## **Share Split**

On April 10, 2007, we authorized the reverse split of all of our issued common shares and preferred shares into one share for each 1,000 issued shares. This reverse share split became effective on May 14, 2007. In connection with this reverse share split, we authorized a change in the ratio of our Preferred ADS. Upon the effectiveness of our reverse share split and the ratio change, the ratio of our preferred shares to our Preferred ADSs, changed from 3,000 preferred shares per Preferred ADS to three preferred shares per Preferred ADS. All references to numbers of shares and dividend amounts in this annual report have been adjusted to give effect to the 1,000-for-one reverse share split.

## **Market Share and Other Information**

We make statements in this annual report about our market share and other information relating to the telecommunications industry in Brazil. We have made these statements on the basis of information obtained from third-party sources and publicly available information that we believe are reliable, such as information and reports from the Brazilian federal telecommunications regulator (*Agência Nacional de Telecomunicações*), or ANATEL, among others. Notwithstanding any investigation that we may have conducted with respect to the market share, market size or similar data provided by third parties or derived from industry or general publications, we assume no responsibility for the accuracy or completeness of any such information.

## **Rounding**

We have made rounding adjustments to reach some of the figures included in this annual report. As a result, numerical figures shown as totals in some tables may not be arithmetic aggregations of the figures that precede them.

**Table of Contents**

**CAUTIONARY STATEMENT WITH RESPECT TO FORWARD-LOOKING STATEMENTS**

This annual report contains forward-looking statements. Some of the matters discussed concerning our business operations and financial performance include forward-looking statements within the meaning of the U.S. Securities Act of 1933, as amended, which we refer to as the Securities Act, or the U.S. Securities Exchange Act of 1934, as amended, which we refer to as the Exchange Act.

Statements that are predictive in nature, that depend upon or refer to future events or conditions or that include words such as expects, anticipates, intends, plans, believes, estimates and similar expressions are forward-looking statements. Although we believe that these forward-looking statements are based upon reasonable assumptions, these statements are subject to several risks and uncertainties and are made in light of information currently available to us.

Our forward-looking statements may be influenced by factors, including the following:

competition in the Brazilian telecommunications sector;

our management's current expectations and estimates concerning our future financial performance, financing plans, and programs;

the Brazilian government's telecommunications policies that affect the telecommunications industry and our business in general, including issues relating to the remuneration for the use of our network, and changes in or developments of ANATEL regulations applicable to us;

the cost and availability of financing;

the general level of demand for, and changes in the market prices of, our services;

our ability to implement our corporate strategies in order to increase our average revenue per user;

political, regulatory and economic conditions in Brazil and the specific Brazilian states in which we operate;

inflation and fluctuations in exchange rates;

legal and administrative proceedings to which we are or become a party; and

other factors identified or discussed under Item 3. Key Information Risk Factors.

Our forward-looking statements are not guarantees of future performance, and our actual results or other developments may differ materially from the expectations expressed in the forward-looking statements. As for forward-looking statements that relate to future financial results and other projections, actual results will be different due to the inherent uncertainty of estimates, forecasts and projections. Because of these uncertainties, potential investors should not rely on these forward-looking statements.

We undertake no obligation to publicly update any forward-looking statement, whether as a result of new information, future events or otherwise.

**Selected Financial Information**

The following Brazilian GAAP selected financial data have been derived from our consolidated financial statements. The selected financial data at December 31, 2009 and 2008 and for the three years ended December 31, 2009 have been derived from our audited consolidated financial statements included in this annual report. The selected financial data at December 31, 2007, 2006 and 2005 and for the years ended December 31, 2006 and 2005 have been derived from our audited consolidated financial statements that are not included in this annual report, other than the U.S. GAAP reconciliation of this selected financial data at December 31, 2005 and for the year ended December 31, 2005 as described below.

The following U.S. GAAP selected financial data have been derived from our consolidated financial statements. The selected financial data at December 31, 2009 and 2008 and for the three years ended December 31, 2009 have been derived from our audited consolidated financial statements included in this annual report. The selected financial data at December 31, 2007 and for the year ended December 31, 2006 have been derived from our consolidated financial statements that are not included in this annual report. As described below, for periods prior to January 8, 2009, Brasil Telecom has determined that for U.S. GAAP purposes, Invitel S.A., or Invitel, is its predecessor entity. Invitel has not prepared a reconciliation to U.S. GAAP of its net income and shareholders' equity as of December 31, 2006 or 2005 or for the year ended December 31, 2005 and consequently, selected financial information under U.S. GAAP has not been presented for these dates or this period.

Our consolidated financial statements are prepared in accordance with Brazilian GAAP, which differs in certain important respects from U.S. GAAP. For a discussion of certain differences relating to our financial statements, see note 32 to our audited consolidated financial statements included in this annual report.

As described in Item 4. Information on the Company Our History and Development Acquisition by Telemar, on July 31, 2009, (1) Invitel merged with and into Solpart Participações S.A., or Solpart, with Solpart as the surviving company, (2) Solpart merged with and into Copart 1 Participações S.A., or Copart 1, with Copart 1 as the surviving company, (3) Copart 1 merged with and into Brasil Telecom Participações S.A., or Brasil Telecom Holding, with Brasil Telecom Holding as the surviving company, and (4) Copart 2 Participações S.A., or Copart 2, merged with and into Brasil Telecom, with Brasil Telecom as the surviving company. As described in Item 4. Information on the Company Our History and Development Acquisition by Telemar, on September 30, 2009, Brasil Telecom Holding merged with and into Brasil Telecom. Under U.S. GAAP, because Copart 1 controlled Invitel as from January 8, 2009 and Coari Participações S.A., or Coari, a wholly-owned subsidiary of Telemar Norte Leste S.A., or Telemar, controlled both Copart 1 and Copart 2, the mergers of Invitel into Solpart, Solpart into Copart 1, Copart 1 into Brasil Telecom Holding, Copart 2 into Brasil Telecom and Brasil Telecom holding into Brasil Telecom each represent reorganizations of entities under common control. As a result, these mergers were accounted for in a manner similar to a pooling-of-interests, whereby the financial statements of Brasil Telecom as the surviving entity are presented on a consolidated basis as from January 8, 2009, the period during which Copart 1, Copart 2 and Brasil Telecom were under common control, and include the assets and liabilities of Brasil Telecom at the historical carrying values recorded by Copart 1 and Copart 2. The historical carrying values of Copart 1 and Copart 2 reflect the purchase accounting recorded under U.S. GAAP in accordance with FASB Accounting Standard Codification ASC 805 Business Combinations, under which 100% of the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the subsidiaries of Invitel were recorded at their fair values on January 8, 2009. For periods prior to January 8, 2009, Brasil Telecom has determined that for U.S. GAAP purposes, Invitel is its predecessor entity.

**Table of Contents**

Under Brazilian GAAP, the concept of the predecessor entity is not applied. Consequently, the reconciliation to U.S. GAAP of our net income and shareholders equity as of December 31, 2008 and for the two years then ended included in our audited financial statements reconciles our Brazilian GAAP net income and shareholders equity to those of Invitel. The reconciliation to U.S. GAAP of our net income and shareholders equity as of and for the year ended December 31, 2009 included in our audited financial statements reconciles our Brazilian GAAP net income and shareholders equity to the combined balances of Copart 1 and Copart 2, since the accounting basis of our assets and liabilities changed as a result of the acquisition of control of our company by Copart 1 and the subsequent mergers.

We have included information with respect to the dividends and/or interest attributable to shareholders equity paid to holders of our common shares and preferred shares since January 1, 2005 in *reais* and in U.S. dollars translated from *reais* at the commercial market selling rate in effect as of the payment date under the caption Item 8. Financial Information Dividends and Dividend Policy Payment of Dividends.

This selected financial data should be read in conjunction with Item 5. Operating and Financial Review and Prospects and our audited consolidated financial statements included in this annual report.

- (1) Translated for convenience only using the selling rate as reported by the Central Bank at December 31, 2009 for *reais* into U.S. dollars of R\$1.741=US\$1.00.
- (2) We adopted the provisions of FASB ASC 810-10-65-1, related to non-controlling interest, as of January 1, 2009 and retrospectively adjusted the presentation for the years ended December 31, 2008 and 2007.

**Exchange Rates**

Prior to March 14, 2005, there were two principal foreign exchange markets in Brazil:

the commercial rate exchange market; and

**Table of Contents**

the floating rate exchange market.

Most trade and financial foreign-exchange transactions were carried out on the commercial rate exchange market. The floating rate exchange market generally applied to transactions to which the commercial market rate did not apply.

On March 4, 2005, the National Monetary Council (*Conselho Monetário Nacional*) enacted Resolution No. 3,265, as well as additional regulations, that consolidated the two foreign exchange markets into a single foreign exchange market, effective as of March 14, 2005, in order to make foreign exchange transactions more straight-forward and efficient. Consequently, all foreign exchange transactions in Brazil are now carried out in this single foreign exchange market through authorized financial institutions. We cannot predict the impact of the enactment of any new regulations on the foreign exchange market.

Foreign exchange rates continue to be freely negotiated, but may be influenced from time to time by Central Bank intervention. From March 1995 through January 1999, the Central Bank allowed the gradual depreciation of the *real* against the U.S. dollar. In January 1999, the Central Bank allowed the *real*/U.S. dollar exchange rate to float freely. Since then, the *real*/U.S. dollar exchange rate has been established mainly by the Brazilian interbank market and has fluctuated considerably. From December 31, 2000 through December 31, 2002, the *real* depreciated by 80.6% against the U.S. dollar. From December 31, 2002 through December 31, 2007, the *real* appreciated by 49.9% against the U.S. dollar. From December 31, 2007 through December 31, 2008, the *real* depreciated by 32.0% against the U.S. dollar and during 2009 the *real* appreciated by 25.5% against the U.S. Dollar. At June 28, 2010, the selling rate for U.S. dollars was R\$1.783 per US\$1.00. In the past, the Central Bank has intervened occasionally to control unstable movements in foreign exchange rates. We cannot predict whether the Central Bank or the Brazilian government will continue to allow the *real* to float freely or will intervene in the exchange rate market through a currency band system or otherwise, or that the exchange market will not be volatile as a result of political or economic instability or other factors. We also cannot predict whether the *real* will depreciate or appreciate in value in relation to the U.S. dollar in the future.

The following table shows the commercial selling rate or selling rate, as applicable, for U.S. dollars for the periods and dates indicated. The information in the Average column represents the average of the exchange rates on the last day of each month during the periods presented.

Year	Reais per U.S. Dollar			Period End
	High	Low	Average	
2005	R\$ 2.762	R\$ 2.163	R\$ 2.413	R\$ 2.341
2006	2.371	2.059	2.168	2.138
2007	2.156	1.733	1.930	1.771
2008	2.500	1.559	1.834	2.337
2009	2.422	1.702	1.994	1.741

Month	Reais per U.S. Dollar	
	High	Low
December 2009	R\$ 1.788	R\$ 1.710
January 2010	1.875	1.723
February 2010	1.877	1.805
March 2010	1.823	1.764
April 2010	1.781	1.731
May 2010	1.881	1.732
June 2010 (through June 28)	1.866	1.766

## **Table of Contents**

### **Risk Factors**

*You should consider the following risks as well as the other information set forth in this annual report when evaluating an investment in our company. In general, investing in the securities of issuers in emerging market countries, such as Brazil, involves a higher degree of risk than investing in the securities of issuers in the United States. Additional risks and uncertainties not currently known to us, or those that we currently deem to be immaterial, may also materially and adversely affect our business, results of operations, financial condition and prospects. Any of the following risks could materially affect us. In such case, you may lose all or part of your original investment.*

#### ***Risks Relating to the Brazilian Telecommunications Industry and Our Company***

*Our fixed-line telecommunications services face increased competition from mobile services providers, other fixed-line service providers and cable television service providers, which may adversely affect our revenues and margins.*

Our fixed-line telecommunications services in Region II (which consists of the Federal District of Brazil and nine states of Brazil located in the western, central and southern regions of Brazil) face increasing competition from mobile services as the prices for mobile services decline and approach those of fixed-line services. Based on information available from ANATEL, from December 2006 to December 2009, the number of fixed lines in service in Brazil increased from 38.8 million to 41.5 million. We expect (1) the number of fixed lines in service in Brazil to continue to stagnate or decline, as certain customers eliminate their fixed-line services in favor of mobile services, and (2) the use of existing fixed lines to decrease as customers substitute calls on mobile phones in place of fixed-line calls as a result of promotional mobile rates (such as free calls within a mobile provider's network). The rate at which the number of fixed lines in service in Brazil declines depends on many factors beyond our control, such as economic, social, technological and other developments in Brazil. In addition, new fixed lines that we install are expected to be less profitable than existing ones because new fixed-line customers generally have lower average incomes than our existing customers, subscribe to our lower cost service plans and generate fewer chargeable minutes of usage. Our traditional local fixed-line telecommunications services represented 36.5% of our gross operating revenue for the year ended December 31, 2009. Because we derive a significant portion of our operating revenue from our traditional local fixed-line telecommunications services, a reduction in the number of our fixed-lines in service would negatively affect our operating revenue and margins.

We also compete in the market for local fixed-line services with other fixed-line service providers, primarily with Empresa Brasileira de Telecomunicações - Embratel, or Embratel, and GVT S.A., or GVT. Embratel competes with us for residential customers through services that it provides using the cable infrastructure of its affiliate, Net Serviços de Comunicação S.A., or Net. Net is a cable television company that is our main competitor in the broadband services market. Embratel and Net are affiliates of Teléfonos de México S.A.B. de C.V., or Telmex, one of the leading telecommunications service providers in Latin America. Under an agreement entered into between Embratel and Net in November 2005, Net offers integrated voice, broadband and pay television services to the Brazilian residential market through a single network infrastructure. In addition, we compete with smaller companies that have been authorized by ANATEL to provide local fixed-line services in Region II. Embratel, GVT and Net are each controlled by multinational companies that may have more significant financial and marketing resources, and greater abilities to access capital on a timely basis and on more favorable terms, than our company.

Our loss of a significant number of fixed-line customers would adversely affect our gross operating revenue and may adversely affect our results of operations. In addition, because callers in Brazil placing long-distance calls from their fixed-line telephones generally tend to select the long-distance carrier affiliated with the provider of their fixed-line service, our loss of a significant number of fixed-line customers may adversely affect our revenues from long-distance services and our results of operations. For a detailed description of our competition in the local fixed-line services market, see Item 4. Information on the Company - Competition - Local Fixed-Line Services.

---

**Table of Contents**

*Our mobile services face strong competition from other mobile services providers, which may adversely affect our revenues.*

The mobile services market in Brazil is extremely competitive. We had an estimated 16.0% share of the mobile services market in Region II as of December 31, 2009, based on information available from ANATEL. We face competition in Region II from large competitors such as Vivo Participações S.A., or Vivo, Telecom Americas Group, which markets its services under the brand name Claro, and TIM Participações S.A., or TIM, which had estimated market shares of 31.5%, 28.3% and 23.9% in Region II, respectively, as of December 31, 2009, based on information available from ANATEL. Vivo, TIM and Telecom Americas Group are each controlled by multinational companies that may have more significant financial and marketing resources, and greater abilities to access capital on a timely basis and on more favorable terms, than our company.

Our ability to generate revenues from our mobile services business depends on our ability to increase and retain our customer base. Each additional customer subscribing to our service entails costs, including sales commissions and marketing costs. Recovering these costs depends on our ability to retain such customers. Therefore, high rates of customer churn could have a material adverse effect on the profitability of our mobile services business. During 2009, our average customer churn rate in the mobile services segment, representing the number of subscribers whose service was disconnected during each month, whether voluntarily or involuntarily, divided by the number of subscribers at the beginning of such month, was 4.6% per month.

We have experienced increased pressure to reduce our rates in response to pricing competition. This pricing competition often takes the form of special promotional packages, which may include, among other things, mobile handset subsidies, traffic usage promotions and incentives for calls made within a mobile services provider's own network. Competing with the service plans and promotions offered by our competitors may cause an increase in our marketing expenses and customer-acquisition costs, which could adversely affect our results of operations. Our inability to compete effectively with these packages could result in our loss of market share and adversely affect our operating revenue and profitability.

For a detailed description of our competition in the mobile services market, see Item 4. Information on the Company Competition Mobile Services.

*Our long-distance services face significant competition, which may adversely affect our revenues.*

In Brazil, unlike in the United States, a caller chooses its preferred long-distance carrier for each long-distance call, whether originated from a fixed-line telephone or a mobile handset, by dialing such carrier's long-distance carrier selection code (*Código de Seleção de Prestadora*). The long-distance services market in Brazil is highly competitive. Our principal competitors for long-distance services originating on fixed-line telephones in Region II are Embratel and GVT. We compete for long-distance services originating on mobile telephones in Region II with Embratel, Telecomunicações de São Paulo S.A., or Telesp, and TIM. Generally, callers placing long-distance calls in Brazil from their fixed-line telephones tend to select the long-distance carrier affiliated with the provider of their fixed-line service. Similarly, callers placing long-distance calls in Brazil from their mobile handsets tend to select the long-distance carrier affiliated with the provider of their mobile or fixed-line service. Embratel, as the incumbent long-distance service provider, is the most aggressive of these competitors, offering discounts and other promotions from time to time in an effort to increase its market share in the long-distance market. Competition in the long-distance market may require us to increase our marketing expenses or provide services at lower rates than those we currently expect to charge for such services. If competition in the domestic long-distance market increases, it could have a material adverse effect on our revenues and margins. See Item 4. Information on the Company Competition Long-Distance Services.

*Data transmission services are not subject to significant regulatory restrictions and, as a result, we face an increasing amount of competition in this business.*

Competition in data transmission services is not subject to significant regulatory restrictions and, therefore, the market is open to a large number of competitors. Some competitors, such as cable operators, offer telephone and broadband services, which do not require them to use our fixed-line network, thereby allowing them to reach our customers without paying interconnection fees to our company. Additionally, although these auctions have not yet

## Table of Contents

been scheduled, we anticipate that ANATEL will auction radio frequency licenses that will be used to establish Worldwide Interoperability for Microwave Access, or WiMax, networks in the second half of 2010 or in 2011. The implementation of WiMax networks may allow other internet service providers, or ISPs, to deploy wireless Internet Protocol, or IP, networks over a much greater area, for a much lower cost, than previously possible. This reduced deployment cost may give our competitors, or new entrants into the data transmission market, the ability to provide Voice over Internet Protocol, or VoIP, and other data services over WiMax networks at lower rates than we are able to offer.

Increasing competition in data transmission services may lead to rate reductions in this segment, adversely affecting the operating revenue we generate from this business. Additionally, increased competition for data transmission customers may require us to increase our marketing expenses and our capital expenditures and may lead to the loss of broadband customers, in each case leading to a decrease in our profitability. For a detailed description of our competition in the data transmission services market, see Item 4. Information on the Company Competition Data Transmission Services.

*The telecommunications industry is subject to frequent changes in technology. Our ability to remain competitive depends on our ability to implement new technology, and it is difficult to predict how new technology will affect our business.*

Companies in the telecommunications industry must adapt to rapid and significant technological changes that are usually difficult to anticipate. The mobile telecommunications industry in particular has experienced rapid and significant technological development and frequent improvements in capacity, quality and data-transmission speed. Technological changes may render our equipment, services and technology obsolete or inefficient, which may adversely affect our competitiveness or require us to increase our capital expenditures in order to maintain our competitive position. For example, we made significant investments in 2008 and 2009 in connection with the implementation of our Universal Mobile Telecommunications System services, which we refer to as 3G services, in Region II. While we have been upgrading our fixed-line networks with technologically advanced fiber optic cable with a microwave overlay for use in our long-distance services, it is possible that alternative technologies may be developed that are more advanced than those we currently provide. If ANATEL auctions radio frequency spectrum for use in the development of WiMax networks, we expect that we may be required to participate in these auctions and deploy a WiMax network to remain competitive in the broadband services market. Even if we adopt new technologies in a timely manner as they are developed, the cost of such technology may exceed the benefit to us, and we cannot assure you that we will be able to maintain our level of competitiveness.

*Our industry is highly regulated. Changes in laws and regulations may adversely impact our business.*

Our industry is highly regulated by ANATEL. ANATEL regulates, among other things, rates, quality of service and universal service goals, as well as competition among telecommunications service providers. Changes in laws and regulations, grants of new concessions, authorizations or licenses or the imposition of additional universal service obligations, among other factors, may adversely affect our business, financial condition and results of operations.

In October 2008, ANATEL published items that are on its regulatory agenda in the short-term (up to two years), medium-term (up to five years) and long-term (up to 10 years). In the short-term, ANATEL is expected to address the following items, among others: (1) review of and amendments to concession agreements to include additional obligations to expand existing networks; (2) assessment of the adequacy of fixed-line regulations in light of the convergence of telecommunications services; (3) regulation of service providers with significant market power; and (4) establishment of additional obligations to extend mobile networks, including broadband services, to rural areas.

In furtherance of ANATEL's short-term regulatory agenda:

ANATEL has proposed amendments to our concession agreements which are expected to become effective on January 1, 2011 as described in Item 4. Information on the Company Concessions, Authorizations and Licenses.

## Table of Contents

ANATEL has proposed new regulations under which it would grant licenses to use radio spectrum in the 450 Mhz band to telecommunications providers that agree to provide mobile services in rural areas. The public consultation period for these regulations has expired and we expect that ANATEL will adopt final regulations by the end of 2010.

ANATEL is developing criteria for the evaluation of telecommunications providers to determine which providers have significant market power. We expect that these criteria will be submitted for public comment by the end of 2010.

We expect that ANATEL will submit additional proposed regulations for public comment by the end of 2010 to address the remaining items on its announced short-term agenda.

We cannot predict when regulations regarding these matters will be proposed or adopted or whether these regulations will be adopted as proposed. Some of these regulations, if adopted, may have adverse effects on our revenues, costs and expenses, results of operations or financial position.

In May 2010, Executive Decree No. 7,175/10 was adopted which created the National Broadband Plan. The goal of the National Broadband Plan is to make broadband access available at low cost, regardless of technology, throughout Brazil. The Brazilian government is studying options to achieve this goal, including mandating Telecomunicações Brasileiras S.A., or Telebrás, to manage all of the broadband infrastructure owned by the Brazilian government and to build or otherwise acquire the use of the infrastructure necessary to implement this plan. Executive Decree No. 7,175/10 also instructed ANATEL to adopt new regulations relating to unbundling of telecommunications services and the pricing of backhaul services. As a result of the adoption of the National Broadband Plan, we expect that ANATEL will propose additional modifications to the General Plan on Universal Service (*Plano Geral de Metas de Universalização*) as part of the pending modifications of these concession agreements. We cannot predict when regulations regarding these matters will be proposed or adopted or whether these regulations will be adopted as proposed. Some of these regulations, if adopted, may have adverse effects on our revenues, costs and expenses, results of operations or financial position.

We cannot predict whether ANATEL, the Brazilian Ministry of Communications (*Ministério das Comunicações*) or the Brazilian government will adopt other telecommunications sector policies in the future or the consequences of such policies on our business and the business of our competitors.

*Proposed laws seeking the termination of monthly subscription fees for local fixed-line services may adversely affect our business and financial condition.*

Certain legislative bills seeking to terminate monthly subscription fees charged by local fixed-line service providers have been submitted to the Brazilian Congress and remain pending. In March 2008, a special committee was formed in the Brazilian House of Representatives to discuss the various proposed bills on this issue. As of the date of this annual report, no action had been taken by the committee.

In 2009, monthly subscription fees represented 21.9% of our gross operating revenue. The enactment of legislation terminating the monthly subscription fees would have a material adverse effect on our results of operations.

*Our local fixed-line and domestic long-distance concession agreements are subject to periodic modifications by ANATEL and expire on December 31, 2025. Our bids for new concessions upon the expiration of our existing concessions may not be successful.*

We provide fixed-line telecommunications services in Region II pursuant to concession agreements with the Brazilian government. Our concession agreements expire on December 31, 2025, and may be amended by the parties every five years prior to the expiration date. ANATEL will engage in public consultation in connection with each five-year amendment to discuss its proposals for new conditions and quality and universal service targets. The first amendment to each of the concession agreements is expected to become effective on January 1, 2011. In connection with each of these amendments, we are currently discussing modifications to our concession agreements with ANATEL.

---

**Table of Contents**

On March 30, 2009, ANATEL published a public notice of the proposed modifications to these concession agreements. In this public notice, ANATEL proposed an amendment to the General Plan on Universal Service that would require us to:

double the backhaul capacity to the 20 municipalities (*municípios*), which are analogous to counties in the U.S., affected by the April 2008 amendment to our concession agreements described under Item 4. Information on the Company Concessions, Authorizations and Licenses ;

provide high-speed transmission lines (2.5 gigabytes per second (Gbps)) to the 1,400 municipalities in our concession area in which we did provide internet service as of April 2008; and

provide service to a large number of additional areas, including indigenous villages, rural schools, health clinics, military bases, federal and state highway police stations, public aerodromes and environmental conservation organizations, which would require the fixed-line concessionaires to install an aggregate of up to approximately 110,000 additional public telephones (*Terminais de Uso Público*), mostly in rural areas.

In order to mitigate the costs related to the General Plan on Universal Service, ANATEL proposed a reduction in the number of public telephones required per inhabitant from 6.0 per 1,000 inhabitants to 4.5 per 1,000 inhabitants. The public consultation period in connection with the March 30, 2009 public notice ended on June 22, 2009, although the final amendments to our concession agreements have not yet been determined. The final modifications will become effective on January 1, 2011. As a result of the adoption of the National Broadband Plan, we expect that ANATEL will propose additional modifications to the General Plan on Universal Service as part of the pending modifications of these concession agreements.

Our obligations under the concession agreements may be subject to revision in connection with each amendment. We cannot assure you that any of these amendments will not impose requirements on our company that will require us to undertake significant capital expenditures or will not modify the rate-setting procedures applicable to us in a manner that will significantly reduce the gross operating revenue that we generate from our fixed-line businesses. If the amendments to our concession agreements have these effects, our business, financial condition and results of operations could be materially adversely affected.

Our concession agreements will expire on December 31, 2025. We expect the Brazilian government to offer new concessions in competitive auctions prior to the expiration of our existing concession agreements. We may participate in such auctions, but our existing fixed-line and domestic long-distance concession agreements will not entitle us to preferential treatment in these auctions. If we do not secure concessions for our existing service areas in any future auctions, or if such concessions are on less favorable terms than our current concessions, our business, financial condition and results of operations would be materially adversely affected.

*Our local fixed-line and domestic long-distance concession agreements, as well as our authorizations to provide personal mobile services, contain certain obligations, and our failure to comply with these obligations may result in various fines and penalties imposed on us by ANATEL.*

Our local fixed-line and domestic long-distance concession agreements contain terms reflecting the General Plan on Universal Service, the General Plan on Quality Goals (*Plano Geral de Metas de Qualidade*) and other regulations adopted by ANATEL and implemented in 2006, the terms of which could affect our financial condition and results of operations. Our local fixed-line concession agreements also require us to meet certain network expansion, quality of service and modernization obligations in each of the states in Region II. In the event of noncompliance with ANATEL targets in any one of these states, ANATEL can establish a deadline for achieving the targeted level of such service, impose penalties and, in extreme situations, terminate our concession agreements for noncompliance with its quality and universal service obligations. See Item 4. Information on the Company Regulation of the Brazilian Telecommunications Industry Regulation of Fixed-Line Services.

---

**Table of Contents**

On an almost weekly basis, we receive inquiries from ANATEL requiring information from us on our compliance with the various service obligations imposed on us by our concession agreements. If we are unable to respond satisfactorily to those inquiries or comply with our service obligations under our concession agreements, ANATEL may commence administrative proceedings in connection with such noncompliance. We have received numerous notices of the commencement of administrative proceedings from ANATEL, mostly due to our inability to achieve certain targets established in the General Plan on Quality Goals and the General Plan on Universal Service, among others. We have recorded provisions in the amount of R\$201 million as of December 31, 2009 in connection with fines sought to be imposed by ANATEL. Additional fines from ANATEL or fines in excess of the provisioned amount could adversely impact our financial condition and results of operations. See Item 4. Information on the Company Regulation of the Brazilian Telecommunications Industry and Item 8. Financial Information Legal Proceedings Civil Claims Administrative Proceedings.

In addition, our authorizations to provide personal mobile services contain certain obligations requiring us to meet network scope and quality of service targets. If we fail to meet these obligations, we may be fined by ANATEL until we are in full compliance with our obligations and, in extreme circumstances, our authorizations could be revoked by ANATEL. See Item 4. Information on the Company Regulation of the Brazilian Telecommunications Industry Regulation of Mobile Services Obligations of Personal Mobile Services Providers.

*We may be unable to implement our plans to expand and enhance our existing mobile networks in a timely manner or without unanticipated costs, which could hinder or prevent the successful implementation of our business plan and result in revenues and net income being less than expected.*

Our ability to achieve our strategic objectives relating to our mobile services depends in large part on the successful, timely and cost-effective implementation of our plans to expand and enhance our mobile networks. Factors that could affect this implementation include:

our ability to generate cash flow or to obtain future financing necessary the implementation of our projects;

delays in the delivery of telecommunications equipment by our vendors;

the failure of the telecommunications equipment supplied by our vendors to comply with the expected capabilities; and

delays resulting from the failure of third-party suppliers or contractors to meet their obligations in a timely and cost-effective manner.

Although we believe that our cost estimates and implementation schedule are reasonable, we cannot assure you that the actual costs or time required to complete the implementation of these projects will not substantially exceed our current estimates. Any significant cost overrun or delay could hinder or prevent the successful implementation of our business plan and result in revenues and net income being less than expected.

*We depend on key suppliers and vendors to provide equipment that we need to operate our business. If these suppliers or vendors fail to provide equipment or service to us on a timely basis, we could experience disruptions, which could have an adverse effect on our revenues and results of operations.*

We depend upon various key suppliers and vendors, including Alcatel-Lucent, Nokia and Huawei, to provide us with network equipment, which we need in order to expand and operate our business. These suppliers may, among other things, extend delivery times, raise prices or limit supply due to their own shortages and business requirements. If these suppliers or vendors fail to provide equipment or service to us on a timely basis, we could experience disruptions, which could have an adverse effect on our revenues and results of operations, and we might be unable to satisfy the requirements contained in our concession and authorization agreements.

---

**Table of Contents**

*Our controlling shareholder, TmarPart, has control over us and our controlled companies and TmarPart's interests may not be aligned with your interests.*

We are controlled indirectly by Telemar Participações S.A., or TmarPart, which, as of June 28, 2010 indirectly controlled 79.6% of our voting shares. TmarPart's shareholders are parties to two shareholders' agreements governing their equity interests in TmarPart. See Item 7. Major Shareholders and Related Party Transactions Major Shareholders' TmarPart Shareholders' Agreements. Our controlling shareholder and its controlling shareholders are entitled to appoint a majority of the members of our board of directors, and they have the power to determine the decisions to be taken at our shareholders' meetings on matters of our management that require the prior authorization of our shareholders, including in respect of the authorization of related party transactions, corporate restructurings and the date of payment of dividends and other capital distributions. The decisions of our controlling shareholder and its controlling shareholders on these matters may be contrary to the expectations or preferences of holders of our securities, including holders of our common shares, preferred shares and ADSs.

*We have a substantial amount of existing debt, which could restrict our financing and operating flexibility and have other adverse consequences.*

At December 31, 2009, we had total consolidated indebtedness, excluding swap adjustments, of R\$4,443 million and a ratio of debt to equity of 0.40:1.

We are subject to certain financial covenants that limit our ability to incur additional debt. Our existing level of indebtedness and the requirements and limitations imposed by our debt instruments could adversely affect our financial condition or results of operations. In particular, the terms of some of these debt instruments restrict our ability, and the ability of our subsidiaries, to:

incur additional debt;

grant liens;

pledge assets;

sell or dispose of assets; and

make certain acquisitions, mergers and consolidations.

If we are unable to incur additional debt, we may be unable to invest in our business and make necessary or advisable capital expenditures, which could reduce future operating revenue and adversely affect our profitability. In addition, cash required to serve our existing indebtedness reduces the amount available to us to make capital expenditures.

If our growth in net operating revenue slows or declines in a significant manner, for any reason, we may not be able to continue servicing our debt. If we are unable to meet our debt service obligations or comply with our debt covenants, we could be forced to renegotiate or refinance our indebtedness, seek additional equity capital or sell assets. We may be unable to obtain financing or sell assets on satisfactory terms, or at all. For more information regarding our debt instruments and our indebtedness at December 31, 2009, see Item 5. Operating and Financial Review and Prospects Liquidity and Capital Resources.

*We are subject to numerous legal and administrative proceedings, which could adversely affect our business, results of operations and financial condition.*

We are subject to numerous legal and administrative proceedings. It is difficult to quantify the potential impact of these legal and administrative proceedings. We classify our risk of loss from legal and administrative proceedings as probable, possible or remote. We make provisions for probable losses but do not make provisions for possible and remote losses. At December 31, 2009, we had provisioned R\$1,873 million for probable losses relating to various tax, labor and civil legal and administrative proceedings against us.

## Table of Contents

At December 31, 2009, we had claims against us of approximately R\$1,778 million in tax proceedings, R\$1,129 in labor proceedings and R\$1,257 million in civil proceedings with a risk of loss classified as possible and for which we had made no provisions. See note 25 to our audited consolidated financial statements included in this annual report.

If we are subject to unfavorable decisions in any legal or administrative proceedings and the losses in those proceedings significantly exceed the amount for which we have provisioned or involve proceedings for which we have made no provision, our results of operations and financial condition may be materially adversely affected. For a more detailed description of these proceedings, see Item 8. Financial Information Legal Proceedings.

*We are subject to potential liabilities relating to our third-party service providers, which could have a material adverse effect on our business, financial condition and results of operations.*

We are subject to potential liabilities relating to our third-party service providers. Such potential liabilities may involve claims by employees of third-party service providers directly against us as if we were the direct employer of such employees, as well as claims against us for secondary liability for, among other things, occupational hazards, wage parity or overtime pay, in the event that such third-party service providers fail to meet their obligations to their employees. We have not recorded any provisions for such claims, and significant judgments against us could have a material adverse effect on our business, financial condition and results of operations.

*We are subject to delinquencies of our accounts receivables. If we are unable to limit payment delinquencies by our customers, or if delinquent payments by our customers increase, our financial condition and results of operations could be adversely affected.*

Our business significantly depends on our customers' ability to pay their bills and comply with their obligations to us. In 2009, we recorded provisions for doubtful accounts in the amount of R\$550, primarily due to subscribers' delinquencies. As a percentage of our gross operating revenue, our provision for doubtful accounts was 3.1% at December 31, 2009.

ANATEL regulations prevent us from implementing certain policies that could have the effect of reducing delinquency, such as service restrictions or limitations on the types of services provided based on a subscriber's credit record. If we are unable to successfully implement policies to limit subscriber delinquencies or otherwise select our customers based on their credit records, persistent subscriber delinquencies and bad debt will continue to adversely affect our operating and financial results.

In addition, if the Brazilian economy declines due to, among other factors, a reduction in the level of economic activity, depreciation of the *real*, an increase in inflation or an increase in domestic interest rates, a greater portion of our customers may not be able to pay their bills on a timely basis, which would increase our provision for doubtful accounts and adversely affect our financial condition and results of operations.

*Our operations depend on our ability to maintain, upgrade and operate efficiently our accounting, billing, customer service, information technology and management information systems and to rely on the systems of other carriers under co-billing agreements.*

Sophisticated information and processing systems are vital to our growth and our ability to monitor costs, render monthly invoices for services, process customer orders, provide customer service and achieve operating efficiencies. We cannot assure you that we will be able to operate successfully and upgrade our accounting, information and processing systems or that these systems will continue to perform as expected. We have entered into co-billing agreements with each long-distance telecommunications service provider that is interconnected to our networks to include in our invoices the long-distance services rendered by these providers, and they have agreed to include charges owed to us in their invoices. Any failure in our accounting, information and processing systems, or any problems with the execution of invoicing and collection services by other carriers with whom we have co-billing agreements, could impair our ability to collect payments from customers and respond satisfactorily to customer needs, which could adversely affect our business, financial condition and results of operations.

---

**Table of Contents**

*Improper use of our network could adversely affect our costs and results of operations.*

We incur costs associated with the unauthorized and fraudulent use of our networks, including administrative and capital costs associated with detecting, monitoring and reducing the incidence of fraud. Fraud also affects interconnection costs and payments to other carriers for non-billable fraudulent roaming. Improper use of our network could also increase our selling expenses if we need to increase our provision for doubtful accounts to reflect amounts we do not believe we can collect for improperly made calls. Any increase in the improper use of our network in the future could materially adversely affect our costs and results of operations.

*Our operations are dependent upon our networks. A system failure could cause delays or interruptions of service, which could cause us to suffer losses.*

Damage to our networks and backup mechanisms may result in service delays or interruptions and limit our ability to provide customers with reliable service over our networks. Some of the risks to our networks and infrastructure include (1) physical damage to access lines; (2) power surges or outages; (3) software defects; (4) disruptions beyond our control; (5) breaches of security; and (6) natural disasters. The occurrence of any such event could cause interruptions in service or reduce capacity for customers, either of which could reduce our gross operating revenues or cause us to incur additional expenses. In addition, the occurrence of any such event may subject us to penalties and other sanctions imposed by ANATEL and may adversely affect our business and results of operations.

*The mobile telecommunications industry and participants in this industry, including us, may be harmed by reports suggesting that radio frequency emissions cause health problems and interfere with medical devices.*

Media and other entities frequently suggest that the electromagnetic emissions from mobile handsets and base stations may cause health problems. If consumers harbor health-related concerns, they may be discouraged from using mobile handsets. These concerns could have an adverse effect on the mobile telecommunications industry and, possibly, expose mobile services providers to litigation. We cannot assure you that further medical research and studies will refute a link between the electromagnetic emissions of mobile handsets and base stations, including on frequency ranges we use to provide mobile services, and these health concerns. Government authorities could increase regulation on electromagnetic emissions of mobile handsets and base stations, which could have an adverse effect on our business, financial condition and results of operations. The expansion of our network may be affected by these perceived risks if we experience problems in finding new sites, which in turn may delay the expansion and may affect the quality of our services. In July 2002, ANATEL enacted regulations that limit emission and exposure for fields with frequencies between 9 kHz and 300 GHz. Although these regulations did not have a material impact on our business, new laws or regulations regarding electromagnetic emissions and exposure may be adopted that could have an adverse effect on our business.

***Risks Relating to Brazil***

*The Brazilian government has exercised, and continues to exercise, significant influence over the Brazilian economy. This involvement, as well as Brazilian political and economic conditions, could adversely impact our business, results of operations and financial condition.*

Substantially all of our operations and customers are located in Brazil, except for minor services provided outside of Brazil. Accordingly, our financial condition and results of operations are substantially dependent on Brazil's economy. The Brazilian government frequently intervenes in the Brazilian economy and occasionally makes significant changes in policy and regulations. The Brazilian government's actions to control inflation and implement macroeconomic policies have often involved increases in interest rates, wage and price controls, currency devaluations, blocking access to bank accounts, imposing capital controls and limits on imports, among other things. We do not have any control over, and are unable to predict, which measures or policies the Brazilian government may adopt in the future. Our business, results of operations and financial condition may be adversely affected by changes in policies or regulations, or by other factors such as:

political instability;

**Table of Contents**

devaluations and other currency fluctuations;

inflation;

price instability;

interest rates;

liquidity of domestic capital and lending markets;

energy shortages;

exchange controls;

changes to the regulatory framework governing our industry;

monetary policy;

tax policy; and

other political, diplomatic, social and economic developments in or affecting Brazil.

Uncertainty over whether possible changes in policies or rules affecting these or other factors may contribute to economic uncertainties in Brazil and to heightened volatility in the Brazilian securities markets of and securities issued abroad by Brazilian issuers. The President of Brazil has considerable power to determine governmental policies and actions that relate to the Brazilian economy and, consequently, affect the operating and financial results of businesses such as our company. The term of Brazil's current President, Luiz Inácio Lula da Silva, expires in January 2011, and under Brazilian law he is not permitted to run for another four-year term in the October 2010 elections. Uncertainty regarding the election of President Lula's successor and speculation about the policies that may be implemented by the Brazilian federal or state governments could adversely affect our business, results of operations and financial condition.

*The global economic downturn may adversely affect economic growth in Brazil or limit our access to the financial markets and, therefore, negatively impact our business and financial condition.*

The global economic downturn and related instability in the international financial system have had, and may continue to have, a negative effect on economic growth in Brazil. The ongoing economic downturn has reduced the availability of liquidity and credit to fund the continuation and expansion of industrial business operations worldwide. The recent substantial losses in worldwide equity markets, including in Brazil, could lead to an extended worldwide economic recession or depression. A prolonged slowdown in economic activity in Brazil could reduce demand for some of our services, particularly broadband services, in the event that the rate of computer sales in Brazil declines, which would adversely affect our results of operations.

As a result of the global economic downturn, our ability to access the capital markets or the commercial bank lending markets may be severely restricted at a time when we would like, or need, to access such markets, which could have an impact on our flexibility to react to changing economic and business conditions. The global economic downturn could have an impact on the lenders under our existing credit facilities, on our customers or on the ability of our suppliers to meet scheduled deliveries, causing them to fail to meet their obligations to us. If the global

economic downturn deepens further, it could have an adverse effect on the demand for our services and our ability to fund our planned growth.

**Table of Contents**

*Depreciation of the real may lead to substantial losses on our liabilities denominated in or indexed to foreign currencies.*

During the four decades prior to 1999, the Central Bank periodically devalued the Brazilian currency. Throughout this period, the Brazilian government implemented various economic plans and used various exchange rate policies, including sudden devaluations (such as daily and monthly adjustments), exchange controls, dual exchange rate markets and a floating exchange rate system. Since 1999, exchange rates have been set by the market. The exchange rate between the *real* and the U.S. dollar has varied significantly in recent years. For example, the *real*/U.S. dollar exchange rate increased from R\$1.955 per U.S. dollar on December 31, 2000 to R\$3.533 on December 31, 2002. The *real* appreciated against the U.S. dollar by 11.8% in 2005, 8.7% in 2006 and 17.1% in 2007. In 2008, primarily as a result of the international financial crisis, the *real* depreciated by 31.9% against the U.S. dollar and prompted foreign investors to remove billions of *reais* from the Brazilian Securities, Commodities and Futures Exchange (*BM&FBOVESPA S.A. - Bolsa de Valores Mercadorias e Futuros*), which we refer to as the BM&FBOVESPA. During 2009, the *real* appreciated by 25.5% against the U.S. dollar.

A significant amount of our financial liabilities are denominated in or indexed to foreign currencies, primarily U.S. dollars and Japanese Yen. As of December 31, 2009, R\$532 million, or 12.0% of our financial indebtedness, was denominated in a foreign currency, excluding swap adjustments. When the *real* depreciates against foreign currencies, we incur losses on our liabilities denominated in or indexed to foreign currencies, such as our U.S. dollar-denominated long-term debt and foreign currency loans, and we incur gains on our monetary assets denominated in or indexed to foreign currencies, as the liabilities and assets are translated into *reais*. If significant depreciation of the *real* were to occur when the value of such liabilities significantly exceeds the value of such assets, including any financial instruments entered into for hedging purposes, we could incur significant losses, even if the value of those assets and liabilities has not changed in their original currency. In addition, a significant depreciation in the *real* could adversely affect our ability to meet certain of our payment obligations. A failure to meet certain of our payment obligations could trigger a default under certain financial covenants in our debt instruments, which could have a material adverse effect on our business and results of operations. Additionally, we currently have currency swaps in place for a portion of our foreign currency debt. If the cost of currency swap instruments increases substantially, we may be unable to maintain our hedge policy, resulting in an increased foreign currency exposure which could in turn lead to substantial foreign exchange losses.

In addition, a portion of our capital expenditures requires us to acquire assets at prices denominated in or linked to foreign currencies, some of which are financed by liabilities denominated in foreign currencies, principally the U.S. dollar. We generally do not hedge against these risks. To the extent that the value of the *real* decreases relative to the U.S. dollar, it becomes more costly for us to purchase these assets, which could adversely affect our business and financial performance.

Depreciation of the *real* relative to the U.S. dollar could create additional inflationary pressures in Brazil by increasing the price of imported products and requiring recessionary government policies, including tighter monetary policy. On the other hand, appreciation of the *real* against the U.S. dollar may lead to a deterioration of the country's current account and balance of payments, as well as to a dampening of export-driven growth.

*If Brazil experiences substantial inflation in the future, our margins and our ability to access foreign financial markets may be reduced. Government measures to curb inflation may have adverse effects on the Brazilian economy, the Brazilian securities market and our business and results of operations.*

Brazil has, in the past, experienced extremely high rates of inflation, with annual rates of inflation reaching as high as 2,708% in 1993 and 1,093% in 1994. Inflation and some of the Brazilian government's measures taken in an attempt to curb inflation have had significant negative effects on the Brazilian economy.

Since the introduction of the *real* in 1994, Brazil's inflation rate has been substantially lower than in previous periods. However, actions taken in an effort to control inflation, coupled with speculation about possible future governmental actions, have contributed to economic uncertainty in Brazil and heightened volatility in the Brazilian securities market. More recently, Brazil's rates of inflation, as measured by the General Market Price Index - Internal Availability (*Índice Geral de Preços - Disponibilidade Interna*), or IGP-DI, published by Fundação Getúlio Vargas, or FGV, were 1.2% in 2005, 3.8% in 2006, 7.9% in 2007, 9.1% in 2008 and (1.4)% in 2009.

---

## **Table of Contents**

According to the Broad Consumer Price Index (*Índice Nacional de Preços ao Consumidor Ampliado*), or IPCA, published by the Brazilian Institute for Geography and Statistics (*Instituto Brasileiro de Geografia e Estatística*), or IBGE, the Brazilian consumer price inflation rates were 5.7% in 2005, 3.1% in 2006, 4.5% in 2007, 9.1% in 2008 and 4.3% in 2009.

If Brazil experiences substantial inflation in the future, our costs may increase and our operating and net margins may decrease. Although ANATEL regulations provide for annual price increases for most of our services, such increases are linked to inflation indices, discounted by increases in our productivity. During periods of rapid increases in inflation, the price increases for our services may not be sufficient to cover our additional costs and we may be adversely affected by the lag in time between the incurrence of increased costs and the receipt of revenues resulting from the annual price increases. Inflationary pressures may also curtail our ability to access foreign financial markets and may lead to further government intervention in the economy, including the introduction of government policies that may adversely affect the overall performance of the Brazilian economy.

*Fluctuations in interest rates could increase the cost of servicing our debt and negatively affect our overall financial performance.*

Our financial expenses are affected by changes in the interest rates that apply to our floating rate debt. At December 31, 2009, we had, among other debt obligations, R\$2,675 million of loans and financing that were subject to the *Taxa de Juros de Longo Prazo*, or TJLP, a long-term interest rate, R\$1,095 million of local commercial paper and debentures that were subject to the Interbank Certificate of Deposit (*Certificado Depositário Interbancário*), or CDI, rate, an interbank rate, and R\$123 million of loans and financing that were subject to Japanese Yen LIBOR.

The TJLP includes an inflation factor and is determined quarterly by the Central Bank. In particular, the TJLP and the CDI rate have fluctuated significantly in the past in response to the expansion or contraction of the Brazilian economy, inflation, Brazilian government policies and other factors. For example, in 2008, the CDI rate increased from 11.18% per annum at December 31, 2007 to 12.38% per annum at December 31, 2008. A significant increase in any of these interest rates, particularly the CDI rate, could adversely affect our financial expenses and negatively affect our overall financial performance.

*Changes in Brazilian GAAP in connection with the process of convergence to International Financial Reporting Standards (IFRS) may adversely impact our results of operations.*

The enactment of Law No. 11,638/07 and Law No. 11,941/09, which amended the Brazilian Corporation Law and changed certain accounting policies under Brazilian GAAP, created conditions for the alignment between Brazilian GAAP and International Financial Reporting Standards, or IFRS, issued by the International Accounting Standards Board. For more information about the principal changes introduced by Law No. 11,638/07 and Law No. 11,941/09 as they relate to our financial statements, see note 2 to our audited consolidated financial statements, which are included in this annual report.

The changes in Brazilian GAAP could have a significant effect on our reported results of operations, including effects on our net income and the measures that our creditors use to monitor our performance under our debt instruments. Any reduction in our net income, as measured under the revision introduced to Brazilian GAAP under these laws, would have an adverse effect on our net income, and potentially, our ability to distribute dividends on our preferred and common shares. In addition, an adverse effect under the ratios contained in the covenants in our debt instruments as a result of the change in the way that our operating results are measured under the revision introduced to Brazilian GAAP could adversely affect our ability to comply with these covenants, to obtain financing to fund our growth plans or to refinance our indebtedness on terms satisfactory to us.

*The market value of securities issued by Brazilian companies is influenced by the perception of risk in Brazil and other emerging market countries, which may have a negative effect on the trading price of our common shares, preferred shares and ADSs and may restrict our access to international capital markets.*

Economic and market conditions in other emerging market countries, especially those in Latin America, may influence the market for securities issued by Brazilian companies. Investors' reactions to developments in these

**Table of Contents**

other countries may have an adverse effect on the market value of securities of Brazilian issuers. Adverse economic conditions in other emerging market countries have at times resulted in significant outflows of funds from Brazil. In 2008, certain Brazilian and Mexican companies announced significant losses in connection with currency derivatives as a result of the depreciation of the Mexican peso and the *real* against the U.S. dollar, respectively. As a result, a number of these companies have suffered financial distress and have sought protection under various bankruptcy regimes. In addition, in October 2008, the Argentine government nationalized the Argentine private pension funds. Crises in other emerging countries or the economic policies of other countries, in particular the United States, may adversely affect investors' demand for securities issued by Brazilian companies, including our common shares, preferred shares and ADSs. Any of these factors could adversely affect the market price of our common shares, preferred shares and ADSs and impede our ability to access the international capital markets and finance our operations in the future on terms acceptable to us or at all.

*Restrictions on the movement of capital out of Brazil may impair our ability to service certain debt obligations.*

Brazilian law provides that whenever there exists, or there is a serious risk of, a material imbalance in Brazil's balance of payments, the Brazilian government may impose restrictions for a limited period of time on the remittance to foreign investors of the proceeds of their investments in Brazil as well as on the conversion of the *real* into foreign currencies. The Brazilian government imposed such a restriction on remittances for approximately six months in 1989 and early 1990. The Brazilian government may in the future restrict companies from paying amounts denominated in foreign currency or require that any such payment be made in *reais*. Many factors could affect the likelihood of the Brazilian government imposing such exchange control restrictions, including the extent of Brazil's foreign currency reserves, the availability of sufficient foreign exchange on the date a payment is due, the size of Brazil's debt service burden relative to the economy as a whole, and political constraints to which Brazil may be subject. There can be no certainty that the Brazilian government will not take such measures in the future.

A more restrictive policy could increase the cost of servicing, and thereby reduce our ability to pay, our foreign currency-denominated debt obligations and other liabilities. Our foreign-currency denominated debt represented 12.0% of our indebtedness, excluding swap adjustments, on a consolidated basis at December 31, 2009. If we fail to make payments under any of these obligations, we will be in default under those obligations, which could reduce our liquidity as well as the market price of our common shares, preferred shares and ADSs.

In addition, a more restrictive policy could hinder or prevent the Brazilian custodian of the common shares and preferred shares underlying our ADSs or holders who have exchanged our ADSs for the underlying common shares or preferred shares from converting dividends, distributions or the proceeds from any sale of such shares into U.S. dollars and remitting such U.S. dollars abroad. In such an event, the Brazilian custodian for our common shares and preferred shares will hold the *reais* that it cannot convert for the account of holders of our ADSs who have not been paid. Neither the custodian nor The Bank of New York Mellon, as depository of our ADS programs, or the depository, will be required to invest the *reais* or be liable for any interest.

***Risks Relating to Our Common Shares, Preferred Shares and ADSs***

*Holders of our common shares, preferred shares or ADSs may not receive any dividends or interest on shareholders' equity.*

According to our bylaws, we must generally pay our shareholders at least 25% of our annual net profit as dividends or interest on shareholders' equity, as calculated and adjusted under Brazilian GAAP. This adjusted net profit may be capitalized, used to absorb losses or otherwise retained as allowed under Brazilian GAAP and may not be available to be paid as dividends or interest on shareholders' equity. Holders of our common shares or Common ADSs, may not receive any dividends or interest on shareholders' equity in any given year due to the dividend preference of our preferred shares. Additionally, the Brazilian Corporation Law allows a publicly traded company like ours to suspend the mandatory distribution of dividends in any particular year if our board of directors informs our shareholders that such distributions would be inadvisable in view of our financial condition or cash availability. Holders of our preferred shares or Preferred ADSs may not receive any dividends or interest on shareholders' equity in any given year if our board of directors makes such a determination or if our operations fail to generate net income.

---

**Table of Contents**

*Our preferred shares and Preferred ADSs have limited voting rights and are not entitled to vote to approve corporate transactions, including mergers or consolidations of our company with other companies, or the declaration of dividends.*

Under the Brazilian Corporation Law and our bylaws, holders of our preferred shares and, consequently, our Preferred ADSs, are not entitled to vote at meetings of our shareholders, except in very limited circumstances. These limited circumstances directly relate to key rights of the holders of preferred shares, such as modifying basic terms of our preferred shares or creating a new class of preferred shares with superior rights. Holders of preferred shares without voting rights are entitled to elect one member and his or her respective alternate to our board of directors and our fiscal council. Holders of our preferred shares and Preferred ADSs are not entitled to vote to approve corporate transactions, including mergers or consolidations of our company with other companies, or the declaration of dividends. See Item 10. Additional Information Description of Our Company's Bylaws Voting Rights.

*Holders of our ADSs may find it difficult to exercise their voting rights at our shareholders' meetings.*

Under Brazilian law, only shareholders registered as such in our corporate books may attend our shareholders' meetings. All common shares and preferred shares underlying our ADSs are registered in the name of the depositary. ADS holders may exercise the voting rights with respect to our common shares and the limited voting rights with respect to our preferred shares represented by the ADSs only in accordance with the deposit agreements relating to ADSs. There are practical limitations upon the ability of the ADS holders to exercise their voting rights due to the additional steps involved in communicating with ADS holders. For example, we are required to publish a notice of our shareholders' meetings in certain newspapers in Brazil. To the extent that holders of our common shares or preferred shares are entitled to vote at a shareholders' meeting, they will be able to exercise their voting rights by attending the meeting in person or voting by proxy. By contrast, holders of the ADSs will receive notice of a shareholders' meeting by mail from the depositary following our notice to the depositary requesting the depositary to inform ADS holders of the shareholders' meeting. To exercise their voting rights, ADS holders must instruct the depositary on a timely basis. This noticed voting process will take longer for ADS holders than for holders of our common shares or preferred shares. If the depositary fails to receive timely voting instructions for all or part of the ADSs, the depositary will assume that the holders of those ADSs are instructing it to give a discretionary proxy to a person designated by us to vote their ADSs, except in limited circumstances.

In the circumstances in which holders of our ADSs have voting rights, they may not receive the voting materials in time to instruct the depositary to vote our common shares or preferred shares underlying their ADSs. In addition, the depositary and its agents are not responsible for failing to carry out voting instructions of the holders of our ADSs or for the manner of carrying out those voting instructions. Accordingly, holders of our ADSs may not be able to exercise voting rights, and they will have no recourse if the common shares or preferred shares underlying their ADSs are not voted as requested.

*Holders of our common shares, preferred shares or ADSs in the United States may not be entitled to the same preemptive rights as Brazilian shareholders have, pursuant to Brazilian legislation, in the subscription of shares resulting from capital increases made by us.*

Under Brazilian law, if we issue new shares in exchange for cash or assets as part of a capital increase, subject to certain exceptions, we must grant our shareholders preemptive rights at the time of the subscription of shares, corresponding to their respective interest in our share capital, allowing them to maintain their existing shareholding percentage. We may not legally be permitted to allow holders of our common shares, preferred shares or ADSs in the United States to exercise any preemptive rights in any future capital increase unless (1) we file a registration statement for an offering of shares resulting from the capital increase with the U.S. Securities and Exchange Commission, or SEC, or (2) the offering of shares resulting from the capital increase qualifies for an exemption from the registration requirements of the Securities Act. At the time of any future capital increase, we will evaluate the costs and potential liabilities associated with filing a registration statement for an offering of shares with the SEC and any other factors that we consider important in determining whether to file such a registration statement. We cannot assure the holders of our common shares, preferred shares or ADSs in the United States that we will file a registration statement with the SEC to allow them to participate in any of our capital increases. As a result, the equity interest of such holders in our company may be diluted.

---

**Table of Contents**

*If holders of our ADSs exchange them for common shares or preferred shares, they may risk temporarily losing, or being limited in, the ability to remit foreign currency abroad and certain Brazilian tax advantages.*

The Brazilian custodian for the common shares and preferred shares underlying our ADSs must obtain an electronic registration number with the Central Bank to allow the depository to remit U.S. dollars abroad. ADS holders benefit from the electronic certificate of foreign capital registration from the Central Bank obtained by the custodian for the depository, which permits it to convert dividends and other distributions with respect to the common shares or preferred shares into U.S. dollars and remit the proceeds of such conversion abroad. If holders of our ADSs decide to exchange them for the underlying common shares or preferred shares, they will only be entitled to rely on the custodian's certificate of registration with the Central Bank for five business days after the date of the exchange. Thereafter, they will be unable to remit U.S. dollars abroad unless they obtain a new electronic certificate of foreign capital registration in connection with the common shares or preferred shares, which may result in expenses and may cause delays in receiving distributions. See Item 10. Additional Information Exchange Controls.

Also, if holders of our ADSs that exchange those ADSs for our common shares or preferred shares do not qualify under the foreign investment regulations, they will generally be subject to less favorable tax treatment of dividends and distribution on, and the proceeds from any sale of, our common shares or preferred shares. See Item 10. Additional information Exchange Controls and Item 10. Additional Information Taxation Brazilian Tax Considerations.

*Holders of our ADSs may face difficulties in protecting their interests because, as a Brazilian company, we are subject to different corporate rules and regulations and our shareholders may have fewer and less well-defined rights.*

Holders of our ADSs are not direct shareholders of our company and are unable to enforce the rights of shareholders under our bylaws and the Brazilian Corporation Law.

Our corporate affairs are governed by our bylaws and the Brazilian Corporation Law, which differ from the legal principles that would apply if we were incorporated in a jurisdiction in the United States, such as the State of Delaware or New York, or elsewhere outside Brazil. Even if a holder of our ADSs surrenders its ADSs and becomes a direct shareholder, its rights as a holder of our common shares or preferred shares under the Brazilian Corporation Law to protect its interests relative to actions by our board of directors may be fewer and less well-defined than under the laws of those other jurisdictions.

Although insider trading and price manipulation are crimes under Brazilian law, the Brazilian securities markets are not as highly regulated and supervised as the U.S. securities markets or the markets in some other jurisdictions. In addition, rules and policies against self-dealing or for preserving shareholder interests may be less well-defined and enforced in Brazil than in the United States and certain other countries, which may put holders of our common shares, preferred shares and ADSs at a potential disadvantage. Corporate disclosures also may be less complete or informative than those of a public company in the United States or in certain other countries.

*We are exempt from some of the corporate governance requirements of the New York Stock Exchange.*

We are a foreign private issuer, as defined by the SEC for purposes of the Exchange Act. As a result, for so long as we remain a foreign private issuer, we will be exempt from, and you will not be provided with the benefits of, some of the corporate governance requirements of the New York Stock Exchange, or the NYSE. We are permitted to follow practice in Brazil in lieu of the provisions of the NYSE's corporate governance rules, except that:

we are required to have an audit committee that satisfies the requirements of Rule 10A-3 under the Exchange Act;

we are required to disclose any significant ways in which our corporate governance practices differ from those followed by domestic companies under NYSE listing standards;

---

**Table of Contents**

our chief executive officer is obligated to promptly notify the NYSE in writing after any of our executive officers becomes aware of any non-compliance with any applicable provisions of the NYSE corporate governance rules; and

we must submit an executed written affirmation annually to the NYSE. In addition, we must submit an interim written affirmation as and when required by the interim written affirmation form specified by the NYSE.

The standards applicable to us are considerably different than the standards applied to U.S. domestic issuers. Although Rule 10A-3 under the Exchange Act generally requires that a listed company have an audit committee of its board of directors composed solely of independent directors, as a foreign private issuer, we are relying on a general exemption from this requirement that is available to us as a result of the features of Brazilian law applicable to our fiscal council. In addition, we are not required to, among other things:

have a majority of the board be independent;

have a compensation committee or a nominating or corporate governance committee of our board of directors;

have regularly scheduled executive sessions with only non-management directors; or

have at least one executive session of solely independent directors each year.

We intend to rely on some or all of these exemptions. As a result, you will not be provided with the benefits of certain corporate governance requirements of the NYSE.

*Holders of the ADSs may face difficulties in serving process on or enforcing judgments against us and other persons.*

We are organized under the laws of Brazil, and all of the members of our board of directors, our executive officers and our independent registered public accountants reside or are based in Brazil. The vast majority of our assets and those of these other persons are located in Brazil. As a result, it may not be possible for holders of our ADSs to effect service of process upon us or these other persons within the United States or other jurisdictions outside Brazil or to enforce against us or these other persons judgments obtained in the United States or other jurisdictions outside Brazil. In addition, because substantially all of our assets and all of our directors and officers reside outside the United States, any judgment obtained in the United States against us or any of our directors or officers may not be collectible within the United States. Because judgments of U.S. courts for civil liabilities based upon the U.S. federal securities laws may only be enforced in Brazil if certain conditions are met, holders may face greater difficulties in protecting their interests in the case of actions by us or our board of directors or executive officers than would shareholders of a U.S. corporation.

*Brazilian tax laws may have an adverse impact on the taxes applicable to the disposition of our common shares, preferred shares and ADSs.*

According to Law No. 10,833, enacted on December 29, 2003, if a nonresident of Brazil disposes of assets located in Brazil, the transaction will be subject to taxation in Brazil, even if such disposition occurs outside Brazil or if such disposition is made to another nonresident. Dispositions of our ADSs between nonresidents, however, are currently not subject to taxation in Brazil. Nevertheless, in the event that the concept of disposition of assets is interpreted to include the disposition between nonresidents of assets located outside Brazil, this tax law could result in the imposition of withholding taxes in the event of a disposition of our ADSs made between nonresidents of Brazil. Due to the fact that as of the date of this annual report Law No. 10,833/2003 has no judicial guidance as to its application, we are unable to predict whether an interpretation applying such tax laws to dispositions of our ADSs between nonresidents could ultimately prevail in Brazilian courts. See Item 10. Additional Information Taxation Brazilian Tax Considerations.

**Table of Contents**

*The relative volatility and illiquidity of the Brazilian securities markets may adversely affect holders of our common shares, preferred shares and ADSs.*

The Brazilian securities markets are substantially smaller, less liquid and more volatile than major securities markets in the United States. The BM&FBOVESPA, which is the principal Brazilian stock exchange, had a market capitalization of R\$2,335 billion (US\$1,341 billion) at December 31, 2009 and an average daily trading volume of R\$4.6 billion (US\$2.7 billion) in 2009. In comparison, aggregate market capitalization of the companies (including U.S. and non-U.S. companies) listed on the NYSE was US\$18.9 trillion at December 31, 2009 and the NYSE recorded an average daily trading volume of US\$46 billion for 2009. There is also significantly greater concentration in the Brazilian securities markets. The ten largest companies in terms of market capitalization represented approximately 55% of the aggregate market capitalization of the BM&FBOVESPA at December 31, 2009. The ten most widely traded stocks in terms of trading volume accounted for approximately 51% of all shares traded on the BM&FBOVESPA in 2009. These market characteristics may substantially limit the ability of holders of our ADSs to sell the preferred shares underlying our ADSs at a price and at a time when they wish to do so and, as a result, could negatively impact the market price of our ADSs themselves.

*The recent imposition of IOF taxes may indirectly influence the price and volatility of our ADSs, common shares and preferred shares.*

Brazilian law imposes the Tax on Foreign Exchange Transactions, or the IOF/Exchange Tax, on the conversion of *reais* into foreign currency and on the conversion of foreign currency into *reais*. Brazilian law also imposes the Tax on Transactions Involving Bonds and Securities, or the IOF/Bonds Tax, due on transactions involving bonds and securities, including those carried out on a Brazilian stock exchange.

In October 2009, the Brazilian government imposed the IOF/Exchange Tax at a rate of 2.0% in connection with inflows of funds related to investments carried out by non-Brazilian investors in the Brazilian financial and capital markets with the objective of slowing the pace of speculative inflows of foreign capital into the Brazilian market and the appreciation of the *real* against the U.S. dollar. In November 2009, the Brazilian government also established that the rate of the IOF/Bonds Tax applicable to the transfer of shares with the specific purpose of enabling the issuance of ADSs would be 1.5% with the objective of correcting an asymmetry created by the imposition of the IOF/Exchange Tax.

The imposition of these taxes may discourage foreign investment in shares of Brazilian companies, including our company, due to higher transaction costs, and may negatively impact the price and volatility of our ADSs, common shares and preferred shares on the NYSE and the BM&FBOVESPA.

**ITEM 4. INFORMATION ON THE COMPANY**

**Overview**

We are the largest telecommunications service provider in Region II in Brazil, based on our aggregate number of fixedlines in service and mobile subscribers as of December 31, 2009, based on information available from ANATEL and other publicly available information. We offer a range of integrated telecommunications services that includes fixed-line and mobile telecommunications services, data transmission services (including broadband access services), internet service provider services and other services, for residential customers, small, medium and large companies, and governmental agencies.

Following the acquisition of our company by Telemar, we have used the *Oi* brand name with the permission of Telemar and we integrated our marketing programs with those of Telemar. We began offering *Oi* pre-paid mobile plans in Region II in May 2009, *Oi* post-paid mobile plans in June 2009, and *Oi* fixed-line and broadband plans in the fourth quarter of 2009. We expect to commence offering *Oi Conta Total* plans in Region II by the end of 2010.

According to the IBGE, Region II (which consists of the Federal District of Brazil and nine states of Brazil located in the western, central and southern regions of Brazil) had a population of approximately 43.5 million as of April 1, 2007, representing 23.6% of the total Brazilian population, and represented approximately 26.8% of Brazil's total gross domestic product, or GDP, for 2007 (the most recent period for which such information is currently available).

***Fixed-Line Telecommunications and Data Transmission Services***

Our traditional fixed-line telecommunications business in Region II includes local and long-distance services, network usage services (interconnection) and public telephones, in accordance with the concessions and authorizations granted to us by ANATEL. We believe we were one of the largest fixed-line telecommunications companies in South America in terms of total number of lines in service as of December 31, 2009. Based on our 7.7 million fixed lines in service as of December 31, 2009, we were the principal fixed-line telecommunications service provider in Region II, with an estimated market share of 68.5% of the total fixed lines in service in this region as of December 31, 2009, based on information available from ANATEL.

We offer a variety of high-speed data transmission services, including services offered by our subsidiaries BrT Serviços de Internet S.A. and Brasil Telecom Comunicação Multimídia Ltda. We also operate a fiber optic cable system that connects the United States, Bermuda, Brazil and Venezuela through our subsidiaries Brasil Telecom Cabos Submarinos Ltda., Brasil Telecom Subsea Cable System (Bermuda) Ltd., Brasil Telecom of America Inc. and Brasil Telecom de Venezuela S.A. Our broadband services, primarily utilizing Asymmetric Digital Subscriber Line, or ADSL, technology, are marketed in Region II under the brand name *Oi Velox*. As of December 31, 2009, we had 1.9 million ADSL subscribers, representing 24.7% of our fixed lines in service at that date. For the year ended December 31, 2009, our fixed-line and data transmission services segment generated R\$15,669 million in gross operating revenue and recorded operating loss of R\$1,087 million.

***Mobile Telecommunications Services***

We offer mobile telecommunications services in Region II through our subsidiary 14 Brasil Telecom Celular S.A., which we refer to as Brasil Telecom Mobile. We believe that we are one of the principal mobile telecommunications service providers in Region II, with 7.2 million mobile subscribers as of December 31, 2009 and an estimated market share of 16.0% of the total number of mobile subscribers in this region as of December 31, 2009, based on information available from ANATEL. For the year ended December 31, 2009, our mobile services segment generated R\$2,555 million in gross operating revenue and recorded an operating loss of R\$287 million.

---

## **Table of Contents**

### ***Other Services***

We operate an internet portal through our subsidiary Internet Group do Brasil S.A. under the brand name *iG* that was one of the largest internet portals in Brazil in terms of the number of unique visitors in 2009, based on information available from Ibope/NetRatings. We also started a call center business for the sole purpose of providing services to our company and our subsidiaries. For the year ended December 31, 2009, our internet services segment generated R\$406 million in gross operating revenue and recorded operating income of R\$105 million, and our call center services segment generated R\$342 million in gross operating revenue and recorded an operating loss of R\$2 million.

Our principal executive office is located at SIA/Sul, ASP, Lote D, Bloco B 71215-000 Setor de Indústria, Brasília, DF, Brazil, and our telephone number at this address is (55-61) 3415-1414. At the extraordinary shareholders meeting held on June 16, 2010, approval was given for the transfer of our principal executive office, and we are in the process of registering the minutes that approved such transfer with the Boards of Trade of Rio de Janeiro and the Federal District. After we complete this registration, our principal executive office will be located at Rua General Polidoro, No. 99, 5th floor/part Botafogo, 22280-001 Rio de Janeiro, RJ, Brazil, and our telephone number at this address will be (55-21) 3131-1211.

### **Our History and Development**

Prior to the formation in 1972 of Telebrás, the Brazilian state-owned telecommunications monopoly, there were more than 900 telecommunications companies operating throughout Brazil. Between 1972 and 1975, Telebrás and its operating subsidiaries acquired almost all of the other telecommunications companies in Brazil and thus achieved a monopoly in providing public telecommunications services in almost all areas of the country.

Beginning in 1995, the Brazilian government undertook a comprehensive reform of Brazil's telecommunications regulations. In July 1997, Brazil's Congress adopted the Brazilian General Telecommunications Law (*Lei Geral das Telecomunicações*), which, together with the regulations, decrees, orders and plans on telecommunications issued by Brazil's executive branch, provided for the establishment of a comprehensive regulatory framework introducing competition into the Brazilian telecommunications industry and promoting the privatization of Telebrás and its subsidiaries.

### ***Privatization of Telebrás***

In January 1998, in preparation for its restructuring and privatization, Telebrás spun-off its previously integrated mobile telecommunications operations from its fixed-line operations into separate companies. In May 1998, Telebrás was restructured to form 12 new holding companies, or the New Holding Companies, by means of a procedure under Brazilian Corporation Law called *cisão*, or spin-off. Virtually all of the assets and liabilities of Telebrás were allocated to the New Holding Companies, including Telebrás's interest in its operating subsidiaries. The New Holding Companies consisted of:

eight holding companies each of which controlled one or more mobile services providers, each operating in one of the ten service regions into which Brazil had been divided for mobile telecommunications services and using the frequency range called Band A (other than one mobile services provider that operated in two regions and one region in which the mobile services provider was not part of the Telebrás system);

three regional holding companies, each of which controlled the fixed-line service providers that provided local and intraregional long-distance service in one of the three service regions into which Brazil has been divided for fixed-line telecommunications; and

a holding company, which controlled Embratel, a provider of domestic (including interstate and interregional) and international long-distance service throughout Brazil.

Brasil Telecom Holding, was one of the New Holding Companies in the fixed-line telecommunications business. In the restructuring and privatization of Telebrás, Brasil Telecom Holding was allocated all of the share capital held by Telebrás in the operating subsidiaries that provided fixed-line telecommunications service in Region II, including our company.

## **Table of Contents**

In August 1998, the Brazilian government privatized Telebrás by selling all of the voting shares that it held in the New Holding Companies, including Brasil Telecom Holding, to private-sector buyers. The Brazilian government's shares in the corporate capital of Brasil Telecom Holding were purchased by Solpart.

### ***Expansion of Fixed-Line Network in Rio Grande do Sul***

In July 2000, we acquired the control of Companhia Riograndense de Telecomunicações, or CRT. CRT was the leading fixed-line telecommunications service company in the State of Rio Grande do Sul. In December 2000, CRT was merged with and into us.

### ***Corporate Reorganization of Brasil Telecom***

Following the formation of Brasil Telecom Holding, it provided fixed-line telecommunications services through nine separate operating subsidiaries, including our company, each of which provided telecommunications services in one of the nine states of Region II or the Federal District of Brazil. In February 2000, Brasil Telecom Holding implemented a corporate reorganization, which resulted in each of its other fixed-line operating companies being merged into our company.

### ***Entry into the Internet Service Provider Business***

In October 2001, we formed BrT Serviços de Internet S.A. to provide broadband internet services under the brand name *Turbo*.

### ***Entry into the Personal Mobile Services Business***

In December 2002, we established our wholly-owned subsidiary, Brasil Telecom Mobile, to provide personal mobile services (*Serviço Móvel Pessoal*) in Region II. In December 2002, Brasil Telecom Mobile was granted an authorization by ANATEL to provide personal mobile services in Region II following its successful bid of R\$192 million in an auction held for the authorization and the related radio frequency license. Brasil Telecom Mobile commenced operations in September 2004.

### ***Expansion of Our Internet Service Provider Business***

In June 2003, we acquired all of the share capital of iBest Holding Corporation that we did not own. Prior to this acquisition, we owned 12.8% of the share capital of iBest Holding Corporation. iBest Holding Corporation controlled (1) iBest S.A., or iBest, a free ISP and the then-largest ISP in Region II, (2) Freelance S.A., and (3) Febraio S.A. In May 2004, iBest and Febraio S.A. merged with and into Freelance S.A.

### ***Acquisition of Submarine Fiber-Optic Cable System***

In June 2003, we acquired the submarine fiber-optic cable system of 360 Networks Americas do Brasil Ltda. We refer to this system as GlobeNet. GlobeNet consists of a fiber optic cable system that connects the United States, Bermudas, Brazil and Venezuela.

### ***Entry into the Internet Protocol Business***

In May 2004, we acquired substantially all of the share capital of Vant Telecomunicações S.A., or Vant, that we did not own. Prior to this acquisition, we owned 19.9% of the share capital of Vant. Vant offered IP services as well as other services to the corporate market throughout Brazil.

---

## **Table of Contents**

### ***Expansion of Data Transmission Network***

In May 2004, we acquired substantially all of the share capital of MetroRED Telecomunicações Ltda., or MetroRED, that we did not own. Prior to this acquisition, we owned 19.9% of the share capital of MetroRED. We have changed the corporate name of MetroRED to Brasil Telecom Comunicação Multimídia Ltda., or Brasil Telecom Multimídia. Brasil Telecom Multimídia is a leading local fiber optic network provider, with 263 kilometers of local area network in São Paulo, Rio de Janeiro and Belo Horizonte, and a 1,643 kilometer long-distance network linking these three metropolitan areas. Brasil Telecom Multimídia also has an internet solutions data center in São Paulo which provides internet support to our customers.

### ***Acquisition of iG***

In November 2004, we acquired 63.0% of the capital stock of Internet Group (Cayman) Ltd., the parent company of Internet Group do Brasil Ltda., or iG. Prior to this acquisition, Brasil Telecom Holding owned 10.0% of the capital stock of Internet Group (Cayman) Ltd. In July 2005, we acquired an additional 25.6% of the capital stock of Internet Group (Cayman) Ltd. iG is a free internet services provider. iG is the leading dial-up ISP in Brazil and operates in the dial-up and broadband access markets. In addition, iG operates an internet portal under the brand name *iG* and offers value-added internet services to customers in the residential and corporate markets.

### ***Consolidation of Call Centers***

In December 2007, our subsidiary Brasil Telecom Call Center S.A. commenced operations, rendering call center services to us and our subsidiaries that demand this type of service. We invested approximately R\$50 million in infrastructure and customer service technologies to create call centers in Goiânia, Campo Grande, Florianópolis, Brasília and Curitiba to replace our 30 pre-existing sites.

### ***Acquisition by Telemar***

On January 8, 2009, Copart 1, a wholly-owned subsidiary of Coari, itself a wholly owned subsidiary of Telemar, acquired indirectly all of the outstanding shares of Invitel, and 12,185,836 common shares of Brasil Telecom Holding owned by the shareholders of Invitel. At that time, Invitel owned 100% of the outstanding shares of Solpart, which owned 52.0% of the outstanding voting share capital, representing 19.0% of the outstanding share capital, of Brasil Telecom Holding, which, in turn, owned 67.2% of the outstanding share capital, including 99.1% of the outstanding voting share capital, of our company.

During 2008, Copart 1 had acquired 76,645,842 preferred shares of Brasil Telecom Holding, representing 33.3% of the outstanding preferred shares of Brasil Telecom Holding, and Copart 2, a wholly owned subsidiary of Coari, had acquired 58,956,565 preferred shares of our company, representing 18.9% of our outstanding preferred shares.

As a result of the acquisition of Invitel, Telemar acquired indirect control of Brasil Telecom Holding and Brasil Telecom.

### ***Mandatory Tender Offers by Copart 1 and Copart 2***

As a result of the acquisition of control of Brasil Telecom and Brasil Telecom Holding by Telemar on January 8, 2009, under Article 254-A of the Brazilian Corporation Law and CVM Instruction No. 361, of March 5, 2002, as amended, Telemar was required to offer to purchase any and all common shares of Brasil Telecom Holding and Brasil Telecom held by public shareholders.

As a result of these auctions, in June 2009, (1) Copart 1 acquired 40,452,227 common shares of Brasil Telecom Holding, representing 30.5% of the outstanding common shares of Brasil Telecom Holding and 11.2% of the outstanding share capital of Brasil Telecom Holding, and (2) Copart 2 acquired 630,872 common shares of Brasil Telecom, representing 0.3% of the outstanding common shares of Brasil Telecom and 0.1% of the outstanding share capital of Brasil Telecom.

**Table of Contents**

*Merger of Copart 1 into Brasil Telecom Holding*

On July 31, 2009, (1) Invitel merged with and into Solpart, with Solpart as the surviving company, (2) Solpart merged with and into Copart 1, with Copart 1 as the surviving company, and (3) Copart 1 merged with and into Brasil Telecom Holding, with Brasil Telecom Holding as the surviving company. As a result of these mergers, Coari owned 54.7% of the outstanding share capital, including 91.7% of the outstanding voting share capital, of Brasil Telecom Holding.

*Merger of Copart 2 into Brasil Telecom*

On July 31, 2009, Copart 2 merged with and into Brasil Telecom, with Brasil Telecom as the surviving company. As a result of this transaction, Coari owned 10.9% of the outstanding share capital, including 0.3% of the outstanding voting share capital, of Brasil Telecom.

*Merger of Brasil Telecom Holding into Brasil Telecom*

On September 30, 2009, the shareholders of Brasil Telecom and Brasil Telecom Holding approved a merger (*incorporação*) under Brazilian law of Brasil Telecom Holding with and into Brasil Telecom, with Brasil Telecom as the surviving company. In the Brasil Telecom merger:

each issued and then outstanding common share of Brasil Telecom Holding (other than any common shares held by shareholders seeking withdrawal of their common shares) was converted automatically into 1.2190981 common shares of Brasil Telecom;

each issued and then outstanding preferred share of Brasil Telecom Holding (including preferred shares of Brasil Telecom Holding represented by the Brasil Telecom Holding ADSs) was converted automatically into 0.1720066 common shares of Brasil Telecom and 0.9096173 preferred shares of Brasil Telecom;

holders of Brasil Telecom Holding ADSs (each representing five preferred shares of Brasil Telecom), were entitled to receive 0.860033 Common ADSs of Brasil Telecom and 1.516028 Preferred ADSs of Brasil Telecom for each Brasil Telecom Holding ADS they held; and

all issued and then outstanding shares of Brasil Telecom held by Brasil Telecom Holding were cancelled.

As a result of the Brasil Telecom merger, Brasil Telecom Holding ceased to exist and, as of June 28, 2010, Coari owns 49.3% of the total outstanding share capital of Brasil Telecom, including 79.6% of its outstanding voting share capital. For additional information about our controlling shareholders, see Item 7. Major Shareholders and Related Party Transactions Major Shareholders.

**Table of Contents****Corporate Structure**

The following chart presents our corporate structure and principal subsidiaries as of June 28, 2010. The percentages in bold italics represent the percentage of the voting capital owned directly and indirectly by the parent company of each entity, and the percentages not in bold italics represent the percentage of the total share capital owned directly and indirectly by the parent company of each entity.

- (1) Ownership represents 53.8% of the share capital of Internet Group do Brasil S.A. owned directly by BrT Serviços de Internet S.A. and 13.6% owned by Brasil Telecom S.A.

**Our Service Area**

Our concessions and authorizations from the Brazilian government allow us to provide:

fixed-line telecommunications services in Region II;

long-distance telecommunications services originating from Region II;

mobile telecommunications services in Region II; and

data transmission services throughout Brazil.

Region II covers an area of approximately 2.9 million square kilometers, which represents approximately 33.5% of the country's total land area and accounted for approximately 26.8% of Brazil's GDP in 2007. The population of Region II was 43.5 million as of April 1, 2007, which represented 23.6% of the total population of Brazil as of that date. In 2007, per capita income in Region II was approximately R\$15,787, varying from R\$8,789 in the State of Acre to R\$40,696 in the Federal District of Brazil.

The following table sets forth key economic data, compiled by IBGE, for the Federal District of Brazil and each of the Brazilian states in Region II.

State	Population (in millions) (2007)	Population per Square Kilometer (2007)	% of GDP (2007)	GDP Per Capita (in reais) (2007)
Rio Grande do Sul	10.6	37.6	6.6	16,689
Paraná	10.3	51.6	6.1	15,711
Santa Catarina	5.9	61.5	3.9	17,834
Goiás	5.6	16.6	2.5	11,547
Mato Grosso	2.9	3.2	1.6	14,954
Federal District	2.5	423.3	3.8	40,696

**Table of Contents**

<b>State</b>	<b>Population (in millions) (2007)</b>	<b>Population per Square Kilometer (2007)</b>	<b>% of GDP (2007)</b>	<b>GDP Per Capita (in reais) (2007)</b>

Set forth below is a map of Brazil showing the location of Region II.

Our business, financial condition, results of operations and prospects depend in part on the performance of the Brazilian economy and the economy of Region II in particular. See Item 3. Key information Risk Factors Risks Relating to Brazil.

**Our Services**

Our telecommunications services consist of:

local fixed-line services in Region II, including installation, monthly subscription, metered services, collect calls and supplemental local services;

domestic long-distance services and international long-distance services primarily from Region II, placed through fixed-line and mobile telephones using our long-distance carrier selection code, which is represented by the number 14;

mobile telecommunications services utilizing 2G and 3G technology;

**Table of Contents**

data transmission services, comprised of (1) ADSL services, (2) the lease of dedicated digital and analog lines to other telecommunications services providers, ISPs and corporate customers, (3) IP solutions, and (4) other data transmission services;

usage of our network (1) to complete calls initiated by customers of other telecommunications services providers (interconnection services) or (2) by service providers that do not have the necessary network;

traffic transportation services;

public telephone services;

value-added services which include voicemail, caller ID, directory assistance and other services;

advanced voice services to corporate customers, such as 0800 (toll free) services; and

the operation of the iG internet portal.

***Local Fixed-Line Services***

As of December 31, 2009, we had approximately 7.7 million local fixed-line customers in Region II. Local fixed-line services include installation, monthly subscription, metered services, collect calls and supplemental local services. Metered services include local calls that originate and terminate within a single local area. ANATEL has divided Region II into 1,772 local areas.

Under our concession agreements, we are required to offer two local fixed-line plans to users: the Basic Plan per Minute (*Plano Básico de Minutos*) and the Mandatory Alternative Service Plan (*Plano Alternativo de Serviços de Oferta Obrigatória*), each of which includes installation charges, monthly subscription charges, and charges for local minutes. As of December 31, 2009, 23.0% of our fixed-line customers subscribed to the Basic Plan per Minute or the Mandatory Alternative Service Plan.

In addition to the Basic Plan per Minute and the Mandatory Alternative Service Plan, we offer a variety of alternative fixed-line plans that are designed to meet our customers' usage profiles. As of December 31, 2009, 77.0% of our fixed-line customers subscribed to alternative plans.

In 2009, we launched a new portfolio of alternative fixed-line plans under the *Oi* brand and discontinued offers of our old portfolio of alternative fixed-line plans. We offer (1) voice and internet plans which permit subscribers to purchase a fixed number of local minutes per month for calls to fixed-line telephones and for use to establish dial-up internet connections, (2) voice-only plans which permit subscribers to purchase a fixed number of local minutes per month for calls to fixed-line telephones, and (3) budget plans which permit subscribers to purchase a fixed number of local minutes, either on a pre-paid basis or a monthly basis, but restrict local calls after the purchased minutes have been consumed and require the purchase of a pre-paid card to make long-distance calls or calls to mobile handsets, such as our *Oi Fixo Controle* and *Oi Fixo Economia* plans. By the end of 2010, we expect to offer bundled plans which permit subscribers to purchase unlimited local calls to other fixed-line customers, a fixed number of minutes per month that may be used for long-distance calls or local calls to mobile subscribers, and broadband services or minutes for use to establish dial-up internet connections, which we expect to market under the brand name *Oi Conta Total*.

Local fixed-line services also include in-dialing services (direct transmission of external calls to extensions) for corporate clients. For corporate clients in need of a large quantity of lines, we offer digital trunk services, which optimize and increase the speed of the customer's telephone system.

## **Table of Contents**

### ***Long-Distance Services***

For each long-distance call, whether originating from a fixed-line telephone or a mobile handset, a caller chooses its preferred long-distance carrier by dialing such carrier's long-distance carrier selection code. The caller pays the long-distance service provider for the call and the long-distance service provider pays interconnection fees to the service providers on whose fixed-line or mobile networks the call originated and terminated.

Our domestic and international long-distance services have historically consisted primarily of calls originated in Region II.

### ***Fixed Line-to-Fixed Line***

Calls from one local area to another local area are domestic long-distance calls, other than calls between separate local areas within specified metropolitan regions which, under ANATEL regulations, are charged as local calls. Calls between locations in Brazil and locations outside Brazil are international long-distance calls.

We provide domestic long-distance services for calls originating from Region II through interconnection agreements, mainly with Telemar in Region I (which consists of 16 states of Brazil located in the northeastern and part of the northern and southeastern regions of Brazil) and Telesp in Region III (which consists of the State of São Paulo), that permit us to interconnect directly with their local fixed-line networks, and through our network facilities in São Paulo, Rio de Janeiro and Belo Horizonte. We provide international long-distance services originating from Region II through agreements to interconnect our network with those of the main telecommunications service providers worldwide.

### ***Mobile Long-Distance***

Each mobile subscriber in Brazil is registered in a geographic area (identified by the corresponding area codes, such as 11 (São Paulo) and 61 (Brasília)), which we refer to as the subscriber's home registration area, and Brazil is divided into sectors based on the first digit of the area code of a caller's home registration area. A call originated by a mobile subscriber registered in one home registration area to a mobile subscriber registered in another home registration area sharing the same first digit (for example, Brasília (area code 61) and Goiânia (area code 62)), is referred to as an intrasectoral mobile call. A call originated by a mobile subscriber registered in one home registration area to a mobile subscriber registered in another home registration area that does not share the same first digit (for example, Brasília (area code 61) and São Paulo (area code (11))), is referred to as an intersectoral mobile call. Different rates apply to intrasectoral and intersectoral mobile calls.

We provide mobile long-distance services originating from Region II through interconnection agreements with Telemar in Region I, Telesp in Region III, and each of the principal mobile services providers operating in Brazil that permit us to interconnect directly with their local fixed-line and mobile networks. We provide international long-distance services originating or terminating on our customers' mobile handsets through agreements to interconnect our network with those of the main telecommunications service providers worldwide. We also use our submarine fiber optic network to transport international long-distance calls.

### ***Mobile Telecommunications Services***

As of December 31, 2009, we had approximately 7.2 million subscribers located in 1,120 municipalities in Region II. As of December 31, 2009, we had a 16.0% share of the mobile services market in Region II based on the total number of subscribers as of that date. As of December 31, 2009, 85.5% of our customers subscribed to pre-paid plans and 14.5% subscribed to post-paid plans.

### ***Pre-Paid Customers***

Pre-paid customers activate their Brasil Telecom Mobile cellular numbers through the purchase and installation of a SIM card in their mobile handsets. Our pre-paid customers are able to add credits to their accounts through the purchase of pre-paid cards at prices that vary based on the number of minutes available, or through the purchase of additional credits over the phone that can be charged to the customer's credit card or included on their bill for fixed-line services. These credits are valid for a fixed period of time following activation. Prior to 2009, we also sold mobile handsets with preinstalled SIM cards at subsidized prices to attract pre-paid customers. In 2009, we adopted a strategy under which we do not subsidize the purchase of mobile handsets in connection with our acquisition and retention of pre-paid customers in the retail consumer segment.

## Table of Contents

As part of our program to integrate our offers with those of Telemar, in May 2009 we began offering *Oi Ligadores* and *Oi Cartão Total* to our pre-paid customers in Region II. *Oi Ligadores* subscriptions allow customers that subscribe to this program to receive bonus minutes with each purchase of additional credits. We charge a nominal subscription fee to enroll a customer in the *Oi Ligadores* program and provide bonus minutes to these customers that may be used for local calls to our fixed-line or mobile subscribers or long-distance calls to our fixed-line subscribers.

*Oi Cartão Total* is a service that integrates mobile, fixed-line and public telephone services through a single card. Particularly focused on our pre-paid customers and on public telephone users, the *Oi Cartão Total* allows these customers to use their available credits to make any type of call from mobile, fixed-line or public telephones. We believe that *Oi Cartão Total* represents a significant step towards the convergence of our telecommunications services and satisfies the needs of a common profile of our pre-paid customers who use a mobile phone to receive calls and public telephones to make calls. We have made aggressive service offerings in order to promote and stimulate the use of the *Oi Cartão Total*, including bonus minutes for calls made by our pre-paid customers.

### *Post-Paid Customers*

Post-paid customers pay a monthly subscription fee and are billed on a monthly basis for services provided during the previous month. Post-paid plans include mailbox, caller ID, conference, call forwarding, calls on hold and special services, including Wireless Application Protocol (a protocol which simplifies standard internet codes for the more limited transmission features of a mobile handset), or WAP, General Packet Radio Service, or GPRS, which allows speeds in the range of 115 kilobytes per second (Kbps), and Enhanced Data Rates for Global Evolution, or EDGE, which allows speeds in the range of 230 Kbps.

The GPRS and EDGE services we include in our post-paid plans are available to customers with advanced mobile handset models. These services allow for mobile access to the internet through mobile telephones, laptops or personal digital assistants. They also enable customers simultaneously to use voice and data services, because the connection to the internet remains active even when the customer is speaking on the phone. This means that the customer can remain continuously online and, at the same time, place or receive calls.

The WAP portal is another service and content channel available to our post-paid plan customers. Some of its features include sending and receiving e-mails, forming contact groups, accessing banks and buying tickets. The WAP portal can also be used on the internet, for instance, to schedule personal activities and join or initiate contact groups.

Under our authorizations to provide personal mobile services, we are required to offer a basic post-paid mobile plan that includes activation charges, monthly subscription rates and charges for local calls. As of December 31, 2009, 2.3% of our mobile customers subscribed to our basic post-paid plan. In addition to the basic plan, we offer a variety of alternative post-paid plans that are designed to meet our customers usage profiles.

Under Telemar's authorization from ANATEL to acquire control of our company, we were required to offer to our customers the same plans that Telemar offers to its customers by December 31, 2009. As part of our program to integrate our offers with those of Telemar, in June 2009, we commenced offering *Oi Controle* and *Oi Conta* plans to our post-paid customers. *Oi Controle* is a post-paid plan available to our mobile customers that seek a fixed monthly rate for a fixed number of minutes in order to limit their expenditures on mobile calls. We launched our *Oi Conta* post-paid plan as a promotional offer which provides customers subscribing to this plan a bonus of 1,000 free mobile minutes every month for 31 months to make local calls to any of our mobile or fixed-line subscribers.

We offer (1) plans which permit a subscriber to purchase a fixed number of minutes per month for local calls to other fixed-line or mobile subscribers, (2) family plans which permit a subscriber to purchase a fixed number of minutes per month for local calls that may be shared by up to four individuals, (3) budget plans which permit a

---

## **Table of Contents**

subscriber to purchase a fixed number of local and long-distance minutes per month, but restrict outgoing calls, other than calls made using a pre-paid card, after the purchased minutes have been consumed; and (4) 3G plans providing data transmission at speeds from 300 Kbps to 1 megabytes per second (Mbps).

### *Roaming*

We have roaming agreements with TNL PCS S.A., a wholly-owned subsidiary of Telemar which provides mobile services and which we refer to as Oi, Companhia de Telecomunicações do Brasil Central, or CTBC, and Sercomtel S.A. Telecomunicações, or Sercomtel, providing our customers with automatic access to roaming services when traveling outside of Region II in areas of Brazil where mobile telecommunications services are available on the GSM standard.

We generate revenues from roaming when one of our mobile subscribers receives a call while at a location outside the sector that includes their home registration area. In addition, we generate revenues when a subscriber of another mobile services provider places a call from a location that is outside the coverage area of its mobile services provider and the call is originated on our mobile networks. Conversely, when one of our mobile subscribers places a call from outside of Brazil, we pay the applicable roaming rate to the mobile services provider on whose network the call originated.

### *3G Broadband Services*

In 2007, we were granted an authorization and the related frequency licenses by ANATEL to offer 3G mobile services in Region II. The deployment of our 3G network allows us to offer data communication services to our personal mobile services customers at greater speeds than those made available by our previously existing 2G networks. As of December 31, 2009, we had launched 3G services in the Federal District and the nine state capitals in Region II, as well as numerous other municipalities in Region II, and had approximately 139,000 3G mobile broadband users.

### *Data Transmission Services*

#### *Broadband Services*

We provide high-speed internet access services using ADSL technology, which we refer to as broadband services, to residential customers and businesses in the primary cities in Region II under the brand name *Oi Velox*, which we adopted to replace our former brand name in late 2009. As of December 31, 2009, we offered broadband services in 1,585 municipalities in Region II and we had 1.9 million ADSL customers.

ADSL technology allows high-speed transmission of voice and data signals on a single copper wire pair for access to the network. Since voice transmission through telephone lines uses only one of many available frequency bands, the remaining frequency bands are available for data transmission. An ADSL modem is installed using the customer's conventional line, which, in turn, is connected to Digital Subscriber Line Access Multiplexer, or DSLAM, equipment at the switching station. As a result, customers can use the telephone line simultaneously with the internet. Customers pay a fixed monthly subscription fee, irrespective of their actual connection time to the internet.

Our fixed-line network supports ADSL2+. ADSL2+ is a data communications technology that allows data transmission at speeds of up to 24 Mbps downstream and 1 Mbps upstream, which is much faster than data transmission through conventional ADSL. ADSL2+ permits us to offer a wider range of services, including Internet Protocol Television, which we refer to as IP TV, a television service that is based on broadband internet access.

We charge monthly fees to our broadband users that choose iBest or iG as their ISP. We do not charge fees to our fixed-line customers that choose iBest or iG as their ISP for dial-up internet access. As of December 31, 2009, iBest and iG had an aggregate of approximately 1.4 million registered dial-up users. In the beginning of 2007, we launched a flat-fee dial-up service, called *Internet Toda Hora* ( Internet all the time ) under which our fixed-line subscribers can access the internet through dial-up connections during evening and weekend hours for a flat fee without using the local minutes that they purchase under their fixed-line plans.

## **Table of Contents**

### *Commercial Data Transmission Services*

We provide a variety of customized, high-speed data transmission services through various technologies and means of access to other telecommunications services providers, ISPs and corporate customers. Our data transmission services include interconnection between local area networks at data transmission speeds of 34 Mbps, 155 Mbps and 1 Gbps, videoconferencing, video/image transmission and multimedia applications. Our principal commercial data transmission services are:

Industrial Exploitation of Dedicated Lines (*Exploração Industrial de Linha Dedicada*), or EILD, under which we lease trunk lines to other telecommunications services providers, primarily mobile services providers, which use these trunk lines to link their radio base stations to their switching centers;

Dedicated Line Services (*Serviços de Linhas Dedicadas*), or SLD, under which we lease dedicated lines to other telecommunications services providers, ISPs and corporate customers for use in private networks that link different corporate websites;

IP services which consist of dedicated private lines and dial-up internet access which we provide to most of the leading ISPs in Brazil, as well as Virtual Private Network, or VPN, services that enable our customers to operate private intranet and extranet networks; and

frame relay services which we provide to our corporate customers to allow them to transmit data using protocols based on direct use of our transmission lines, enabling the creation of VPNs.

We provide these data transmission services using our service network platform in Region II and our nationwide fiber optic cable network and microwave links.

In order to provide complete solutions to our corporate clients, we have entered into service agreements for the joint supply of international data services with a number of important international data services providers. These commercial relationships with international data services providers are part of our strategy of offering telecommunications services packages to our customers.

In addition, we provide services at our six cyber data centers located in Brasília, São Paulo, Curitiba, Porto Alegre and Fortaleza. We provide hosting, collocation and IT outsourcing at these centers, permitting our customers to outsource their IT structures to us or to use these centers to provide backup for their IT systems.

We also operate a submarine fiber optic network, which connects Brazil with the United States, Bermuda and Venezuela. Through this network, we offer international data transportation services, primarily leased lines to other telecommunications services providers.

### ***Network Usage Services (Interconnection Service)***

All telecommunications services providers in Brazil are required, if technically feasible, to make their networks available for interconnection on a non-discriminatory basis whenever a request is made by another telecommunications services provider. Interconnection permits a call originated on the network of a requesting local fixed-line, mobile or long-distance service provider's network to be terminated on the local fixed-line or mobile services network of the other provider.

#### *Use of Our Local Fixed-Line Network*

We are authorized to charge for the use of our local fixed-line network on a per-minute basis for (1) all calls terminated on our local fixed-line network in Region II that originate on the networks of other local fixed-line, mobile and long-distance service providers, and (2) all long-distance calls originated on our local fixed-line network in Region II that are carried by other long-distance service providers.

## **Table of Contents**

Conversely, other local fixed-line service providers charge us interconnection fees (1) to terminate calls on their local fixed-line networks that are originated on our local fixed-line, mobile or long-distance networks, and (2) for long-distance calls originated on their local fixed-line networks that are carried by our long-distance network.

In addition, we charge network usage fees to long-distance service providers and operators of trunking services that connect switching stations to our local fixed-line networks.

### *Use of Our Long-Distance Network*

We are authorized to charge for the use of our long-distance network on a per-minute basis for all calls that travel through a portion of our long-distance networks for which the caller has not selected us as the long-distance provider. Conversely, other long-distance service providers charge us interconnection fees on a per-minute basis for all calls that travel through a portion of their long-distance networks for which the caller has selected us as the long-distance provider.

### *Use of Our Mobile Network*

We are authorized to charge for the use of our mobile network on a per-minute basis for all calls terminated on our mobile network that originate on the networks of other local fixed-line, mobile and long-distance service providers. Conversely, other mobile services providers charge us interconnection fees to terminate calls on their mobile networks that are originated on our local fixed-line, mobile or long-distance networks.

### *Traffic Transportation Services*

Long-distance and mobile services providers may avoid paying long-distance network usage charges to us by establishing an interconnection to our local fixed-line networks. In order to retain these customers of our long-distance services, we offer a long-distance usage service, called national transportation, under which we provide discounts to our long-distance network usage fees based on the volume of traffic and geographic distribution of calls generated by a long-distance or mobile services provider.

We also offer international telecommunications service providers the option to terminate their Brazilian inbound traffic through our network, as an alternative to Embratel and Intelig Telecomunicações Ltda., or Intelig. We charge international telecommunications service providers a per-minute rate, based on whether a call terminates on a fixed-line or mobile telephone and the location of the local area in which the call terminates.

### *Public Telephone Services*

We own and operate public telephones throughout Region II. As of December 31, 2009, we had approximately 277,900 public telephones in service, all of which are operated by pre-paid cards. For a discussion of how we account for the sale of the pre-paid cards, see Item 5. Operating and Financial Review and Prospects Financial Presentation and Accounting Policies Critical Accounting Policies and Estimates Revenue Recognition.

### *Value-Added Services*

Value-added services include voice, text and data applications, including voicemail, caller ID, and other services, such as personalization (video downloads, games, ring tones and wallpaper), SMS subscription services (horoscope, soccer teams and love match), chat, mobile television, location-based services and applications (mobile banking, mobile search, email and instant messaging).

---

## **Table of Contents**

### ***Advanced Voice Services***

We provide advanced voice services to our corporate customers, mainly 0800 (toll free) services, as well as voice portals where customers can participate in real-time chats and other interactive voice services.

### ***iG Internet Portal***

We operate an internet portal under the brand name *iG* that was one of the largest internet portals in Brazil in terms of the number of unique visitors in 2009 according to Ibope/NetRatings. In 2009, iG was visited by 22.2 million users on a monthly basis, and as of December 31, 2009, iG had approximately 2.0 million registered subscribers and hosted 5.2 million e-mail accounts. iG offers high quality content to the internet users that visit iG's website, as well as a large and diversified portfolio of products and services. We are in the process of repositioning the iG brand to promote the launch of content channels covering the economy, women's topics, entertainment, education, news, celebrities and sports, among others. We generate revenue through the iG portal from (1) monthly subscription fees that we charge to registered users of this portal, (2) fees charged to place advertisements on this portal, and (3) fees that we receive from fixed-line service providers based on the number of minutes that their subscribers are connected to this portal.

### **Rates**

Our rates for local fixed-line services, domestic long-distance services, mobile services, interconnection, EILD and SLD services are subject to regulation by ANATEL, subject to certain exceptions relating to the rates we charge under alternative fixed-line and mobile plans that we are authorized to offer to our customers. For information on ANATEL regulation of our rates, see Regulation of the Brazilian Telecommunications Industry Regulation of Fixed-Line Services Rate Regulation, Regulation of Mobile Services Personal Mobile Services Rate Regulation, Interconnection Regulations, and Regulation of Data Transmission and Internet Services.

Many of the services we provide charge on a per-minute basis. For these services, we charge for calls based on the period of use. The charge unit is a tenth of a minute (six seconds), and rounding is permitted to the next succeeding tenth of a minute. There is a minimum charge period of 30 seconds for every call.

### ***Local Fixed-Line Rates***

#### ***Local Rates***

Our revenues from local fixed-line services consist mainly of monthly subscription charges, charges for local calls and charges for the activation of lines for new subscribers or subscribers that have changed addresses. Monthly subscription charges are based on the plan to which the customer subscribes and whether the customer is a residential, commercial or trunk line customer.

Under our concession agreements, we are required to offer two local fixed-line plans to users: the Basic Plan per Minute and the Mandatory Alternative Service Plan, each of which includes installation charges, monthly subscription charges, and charges for local minutes. As of December 31, 2009, 23.0% of our local fixed-line customers subscribed to the basic fixed-line plan or the mandatory alternative fixed-line plan.

The monthly subscription fees under the Basic Plan per Minute and the Mandatory Alternative Service Plan vary in accordance with the subscribers' profiles, as defined in the applicable ANATEL regulations. The monthly subscription fee for the Basic Plan per Minute includes the use of 200 local minutes per month by residential customers and 150 local minutes per month by commercial customers and trunk line customers. The monthly subscription fee for the Mandatory Alternative Service Plan includes the use of 400 local minutes per month by residential customers and 360 local minutes per month by commercial customers and trunk line customers. We deduct only two local minutes from a Basic Plan per Minute customer's monthly allotment and four minutes from a Mandatory Alternative Service Plan customer's monthly allotment for each local call made, regardless of the duration of the call, during off-peak hours. If the minute limits are exceeded, customers will incur additional metered-minute charges, the prices of which vary depending on whether the customer is a Basic Plan per Minute

**Table of Contents**

subscriber or a Mandatory Alternative Service Plan subscriber. If a customer does not use all of the minutes covered by the monthly subscription fee, the minutes cannot be carried over to the next month.

In addition to the Basic Plan per Minute and the Mandatory Alternative Service Plan, we are permitted to offer non-discriminatory alternative plans to the basic service plans. The rates for applicable services under these plans (e.g., monthly subscription rates and charges for local and long-distance calls) must be submitted for ANATEL approval prior to the offering of those plans to our customers. In general, ANATEL does not raise objections to the terms of these plans. As of December 31, 2009, 77.0% of our fixed-line customers subscribed to alternative plans.

Under our fixed-line rate plans, we charge for calls on a per-minute basis. There is a minimum charge period of 30 seconds for every call. However, calls of three seconds or less are not charged, except in certain specific instances as provided for in ANATEL regulations.

Prior to January 2006, calls were measured and charged in terms of pulses, consisting of a single charge per call and an additional charge for each four-minute interval of usage. In January 2006, our new concession agreements established a per-minute billing system for local fixed-line telecommunications services, which we implemented by July 2007. In localities (*localidades*), which are governmental administrative units into which municipalities are divided, where we have not implemented the minute-based rates due to technical or economic infeasibility, we do not charge fees for additional minutes on local calls made to another fixed-line telephone. In these localities we charge only basic monthly subscription fees.

On an annual basis, ANATEL increases or decreases the maximum rates we are authorized to charge for our basic service plans. ANATEL increased these rates by an average of 2.14% as of July 20, 2007, 3.01% as of July 24, 2008 and 0.98% as of September 14, 2009. In addition, we are authorized to adjust the rates applicable to our alternative plans annually by no more than the rate of inflation, as measured by the Telecommunications Services Index (*Índice de Serviços de Telecomunicações*), or IST. Discounts from the rates set in basic service plans and alternative service plans may be granted to customers without ANATEL approval.

The following table sets forth selected information regarding service rates under our Basic Plan per Minute during the periods indicated.

Monthly subscription rates for Basic Plan per Minute (1)	Year Ended December 31,		
	2007	2008	2009
	(in reais)		
Basic Plan per Minute (residential)	27.86	28.69	28.97
Basic Plan per Minute (commercial)	41.23	42.48	42.89
Basic Plan per Minute (trunk lines)	40.85	42.09	42.50

(1) The amounts represent the weighted average of monthly rates, net of taxes.

*Local Fixed Line-to-Mobile Rates*

When one of our fixed-line customers makes a call to a mobile subscriber of our company or another mobile services provider that terminates in the mobile registration area in which the call was originated, we charge our fixed-line customer per-minute charges for the duration of the call based on rates designated by ANATEL as VC1 rates. In turn, we pay the mobile services provider a per-minute charge based on rates designated by ANATEL as VU-M rates for the use of its mobile network in completing the call. VC1 rates vary depending on the time of the day and day of the week, and are applied on a per-minute basis.

On an annual basis, ANATEL may increase or decrease the maximum VC1 rates we are authorized to charge. ANATEL authorized us to increase our VC1 rates by an average of 3.34% as of July 20, 2007, 3.03% as of July 24, 2008 and 0.98% as of February 9, 2010. Discounts from the VC1 rates approved by ANATEL may be granted to customers without ANATEL approval.

**Table of Contents**

The following table sets forth the average per-minute VC1 rates that we were permitted to charge during the periods indicated.

	Year Ended December 31,		
	2007	2008	2009
	(in reais)		
Per-minute charges for local fixed-line calls made to mobile telephones (1)	0.50	0.51	0.51

(1) The amounts represent the weighted average of monthly rates, net of taxes.

**Domestic Long-Distance Rates****Fixed Line-to-Fixed-Line**

If a caller selects our carrier selection code for a long-distance call that originates and terminates on fixed-line telephones, we receive the revenues from the call and must pay interconnection fees to the service providers that operate the networks on which the call originates and terminates. Rates for these long-distance calls are based on the physical distance separating callers (which are categorized by four distance ranges), time of the day and day of the week, and are applied per minute for the duration of the call. Rates on these calls are applied on a per-minute basis.

On an annual basis, ANATEL increases or decreases the maximum domestic fixed line-to-fixed line long-distance rates we are authorized to charge. ANATEL increased these rates by an average of 2.14% as of July 20, 2007, 3.01% as of July 24, 2008 and 0.98% as of September 14, 2009. Discounts from the domestic fixed line-to-fixed line long-distance rates approved by ANATEL may be granted to customers without ANATEL approval.

The following table sets forth selected information on domestic fixed line-to-fixed line long-distance rates our company was permitted to charge per minute during peak hours (i.e., between the hours of 9 a.m. and noon and 2 p.m. and 6 p.m. on weekdays) during the periods indicated.

Domestic long-distance rates per minute (1)	Year Ended December 31,		
	2007	2008	2009
	(in reais)		
0 to 50 km	0.24	0.24	0.24
50 to 100 km	0.33	0.35	0.35
100 to 300 km	0.35	0.36	0.36
Over 300 km	0.36	0.37	0.37

(1) The amounts represent the weighted average of monthly rates, net of taxes.

**Mobile Long-Distance**

Rates for long-distance calls that originate or terminate on mobile telephones are based on whether the call is an intrasectoral long-distance call, which is charged at rates designated by ANATEL as VC2 rates, or an intersectoral long-distance call, which is charged at rates designated by ANATEL as VC3 rates. If the caller selects our carrier selection code for the call, we receive the revenues from the call and must pay interconnection fees to the service providers that operate the networks on which the call originates and terminates. The applicable VC2 and VC3 rates vary depending on the time of the day and day of the week, and are applied on a per-minute basis.

On an annual basis, ANATEL may increase or decrease the maximum VC2 and VC3 rates we are authorized to charge. ANATEL authorized us to increase our VC2 and VC3 rates by an average of 3.29% as of July 18, 2007, 3.01% as of July 23, 2008 and 0.98% as of February 9, 2010.

**Table of Contents**

The following table sets forth the average per-minute rates we were permitted to charge for mobile long-distance calls during peak hours (i.e., between the hours of 9 a.m. and noon and 2 p.m. and 6 p.m. on weekdays) during the periods indicated.

Per-minute charges for mobile long-distance calls (1)	Year Ended December 31,		
	2007	2008	2009
	(in reais)		
VC2	1.08	1.11	1.11
VC3	1.23	1.26	1.26

(1) The amounts represent the weighted average of monthly rates, net of taxes.

**Mobile Rates**

Mobile telecommunications service in Brazil, unlike in the United States, is offered on a calling-party-pays basis under which a mobile subscriber pays only for calls that he or she originates (in addition to roaming charges paid on calls made or received outside the subscriber's home registration area). A mobile subscriber receiving a collect call is also required to pay mobile usage charges.

Our revenues from mobile services consist mainly of charges for local and long-distance calls paid by our pre-paid and post-paid mobile subscribers and monthly subscription charges paid by our post-paid plan subscribers. Monthly subscription charges are based on a post-paid subscriber's service plan. If one of our mobile subscribers places or receives a call from a location outside of his or her home registration area, we are permitted to charge that customer the applicable roaming rate.

Under ANATEL regulations, we were required to submit a basic post-paid service plan and a basic pre-paid service plan to ANATEL for its approval. As of December 31, 2009, 2.3% of our mobile customers subscribed to our basic post-paid plan and less than 1% of our mobile customers subscribed to our basic pre-paid plan.

Under the basic post-paid service plan, customers pay monthly subscription charges (which include a specified number of usage minutes) and pay fees based on usage of excess minutes that were not included in the monthly subscription charge. Under the basic pre-paid service plan, customers pay one-time activation charges as well as charges for the minutes that they use. The rates for the applicable services under these plans (e.g., activation charges, monthly subscription charges, charges for local and long-distance calls and roaming charges) were approved by ANATEL at the time that the plans were authorized.

We charge for all mobile calls made by our pre-paid customers, and for mobile calls made by our post-paid customers in excess of their allocated monthly number of minutes, on a per-minute basis.

In addition to the basic service plans, we are permitted to offer non-discriminatory alternative plans to the basic service plans. The rates for applicable services under these plans (e.g., monthly subscription rates, charges for local and long-distance calls and roaming charges) must be submitted for ANATEL approval prior to the offering of those plans to our customers. In general, ANATEL does not raise objections to the terms of these plans. As of December 31, 2009, substantially all of our mobile customers subscribed to these alternative plans.

Although subscribers of a plan cannot be forced to migrate to new plans, existing plans may be discontinued as long as all subscribers of the discontinued plan receive a notice to that effect and are allowed to migrate to new plans within six months of such notice.

Rates under our basic and alternative mobile plans may be adjusted annually by no more than the rate of inflation, as measured by the IST. These rate adjustments occur on the anniversary dates of the approval of the specific plans. Discounts from the rates set in basic service plans and alternative service plans may be granted to customers without ANATEL approval. The rate of inflation as measured by the IST was 3.17% in 2007, 6.56% in 2008 and 2.06% in 2009.

**Table of Contents****Network Usage (Interconnection) Rates***Fixed-Line Networks*

Our revenues from the use of our local fixed-line networks consist primarily of payments on a per-minute basis, which are charged at rates designated by ANATEL as TU-RL rates, from:

long-distance service providers to complete calls terminating on our local fixed-line network;

long-distance service providers for the transfer to their networks of calls originating on our local fixed-line network;

mobile services providers to complete calls terminating on our local fixed-line network; and

other fixed-line service providers for local fixed-line calls that originate on their local fixed-line networks and terminate on our local fixed-line network.

TU-RL rates vary depending on the time of the day and day of the week, and are applied on a per-minute basis. Charges for the use of our local fixed-line network to terminate local calls originating on the network of another local fixed-line service provider are only billed and due when usage of our network exceeds 55% of the total traffic registered between our network and the network of the other telecommunications service provider.

Since January 1, 2007, our TU-RL rate has been equal to 40% of the rate included in our Basic Plan per Minute for a local fixed-line call, which is adjusted on an annual basis by ANATEL. See Local Fixed-Line Rates Local Rates. As of the date of this annual report, our TU-RL rate during peak hours (i.e., between the hours of 9 a.m. and noon and 2 p.m. and 6 p.m. on weekdays) is R\$0.031 per minute. ANATEL announced that beginning in 2008, the method used to determine the TU-RL rates would be based on a cost methodology, known as long-run incremental costs. However, in October 2007, ANATEL published an official letter delaying this change until the end of 2010.

Our revenues from the use of our long-distance network consist primarily of payments on a per-minute basis, which are charged at rates designated by ANATEL as TU-RIU rates, from other long-distance carriers that use a portion of our long-distance networks to complete calls initiated by callers that have not selected us as the long-distance provider.

TU-RIU rates vary depending on the time of the day and day of the week, and are applied on a per-minute basis. Since January 1, 2007, our TU-RIU rate has been equal to 30% of our domestic fixed line-to-fixed line long-distance rates for calls of more than 300 km, which are adjusted on an annual basis by ANATEL. See Local Fixed-Line Rates Domestic Long-Distance Rates Fixed Line-to-Fixed Line. As of the date of this annual report, our TU-RIU rate during peak hours is R\$0.12 per minute.

The following table sets forth the average per-minute rates we charged for the use of our fixed-line networks during the periods indicated.

Fixed-Line Network Usage Rates (1)	Year Ended December 31,		
	2007	2008	2009
	(in reais)		
TU-RL	0.030	0.031	0.031
TU-RIU	0.083	0.087	0.088

(1) The amounts represent the weighted average of monthly rates, net of taxes.

---

**Table of Contents**

*Mobile Networks*

Our revenues from the use of our mobile networks consist primarily of payments on a per-minute basis from (1) local fixed-line, long-distance and mobile services providers to complete calls terminating on our mobile network, and (2) long-distance service providers for the transfer to their networks of calls originating on our mobile network.

The terms and conditions of interconnection to our mobile network, including the rates charged to terminate calls on our mobile network (which are designated by ANATEL as VU-M rates), commercial conditions and technical issues, are freely negotiated between us and other mobile and fixed-line telecommunications service providers, subject to compliance with regulations established by ANATEL relating to traffic capacity and interconnection infrastructure that must be made available to requesting providers, among other things. We must offer the same VU-M rates to all requesting service providers on a nondiscriminatory basis. We apply VU-M charges on a per-minute basis.

If we are not able to establish interconnection rates for use of our mobile network with other mobile and fixed-line telecommunications service providers, ANATEL is empowered to arbitrate, at its discretion, the interconnection rates that we may charge. In 2005, mobile service providers and fixed-line service providers in Brazil were unsuccessful in negotiating an agreement for new VU-M rates. All mobile service providers and fixed-line service providers in Brazil commenced arbitration proceedings before ANATEL to establish the applicable VU-M rates. The mobile service providers and fixed-line service providers entered into a provisional agreement establishing provisional rates applicable to each mobile service provider, and after the providers entered into this agreement, ANATEL approved adjusted VC1 rates that the fixed-line service providers were permitted to charge at that time based on the provisional VU-M rates.

We and the other mobile services providers generally negotiate provisional agreements each year to establish rate increases for the VU-M charged by the mobile services providers.

In March 2006, a provisional agreement among the incumbent fixed-line service providers (i.e., Telemar, Brasil Telecom and Telesp) and the mobile services providers, including Brasil Telecom Mobile, was submitted to ANATEL that increased the VU-M rate for calls terminated on a mobile services provider's network by 4.5% over the previously existing VU-M rate.

In July 2007, a provisional agreement among the incumbent fixed-line service providers, as well as CTBC Telecom and Sercomtel, and the mobile services providers, including Brasil Telecom Mobile, was submitted to ANATEL that provided for an annual increase of the VU-M rates of 1.97143% for calls terminated in Region I, and an annual increase of the VU-M rates of 2.25356% for calls terminated in Region II or Region III.

In July 2008, a provisional agreement among the incumbent fixed-line service providers, as well as CTBC Telecom and Sercomtel, and the mobile services providers, including Brasil Telecom Mobile, was submitted to ANATEL that established an average increase in the VU-M rates of 2%, and provided that the VU-M rates would be increased by an amount equal to 68.5% multiplied by the percentage increase in VC1 approved by ANATEL in 2008. No provisional agreement with respect to the VU-M rates was entered into in 2009.

Under the rules established for the auctions of 3G spectrum in December 2007, all mobile services providers were required to establish uniform VU-M rate schedules that would apply in all states of each service region no later than October 30, 2009. This requirement did not affect Oi or Brasil Telecom Mobile because these companies had already established uniform VU-M rates in each of their service regions. As of October 30, 2009, none of the other mobile services providers had established uniform VU-M rate schedules and we and Oi commenced arbitration proceedings before ANATEL with respect to the VU-M rates charged by our competitors. In January 2010, ANATEL set provisional reference rates for each mobile services provider for each region based on the mean V-UM previously charged by that mobile services provider in the applicable service region.

**Table of Contents**

The following table sets forth the average per-minute VU-M rates that we charged during the periods indicated.

	Year Ended December 31,		
	2007	2008	2009
	(in reais)		
Per-minute charges for local fixed-line calls made to mobile telephones (1)	0.41	0.42	0.41

(1) The amounts represent the weighted average of monthly rates, net of taxes.

**Data Transmission Rates**

Broadband services, IP services and frame relay services are deemed to be value-added services under ANATEL regulations and, therefore, the rates and prices for these services are not subject to regulation and are market-driven. We offer broadband services subscriptions at prices that vary depending on the download speeds available under the purchased subscription.

A significant portion of our revenues from commercial data transmission services are generated by monthly charges for EILD and SLD services, which are based on contractual arrangements for the use of part of our network. Under ANATEL regulations, because we are deemed to have significant market power in the fixed-line services business, we are required to make publicly available the forms of agreements that we use for EILD and SLD services, including the applicable rates, and are only permitted to offer these services under these forms of agreements. We are allowed to increase these rates on an annual basis by no more than the rate of inflation, as measured by the IST. ANATEL also publishes reference rates for these services and if one of our customers objects to the rates that we charge for these services, that customer is entitled to seek to reduce the applicable rate through arbitration before ANATEL.

Our revenue from IP services is based on the number of data ports to which the customer is granted access. Our revenue from frame relay services consists mainly of charges for access to the data transmission network and metered service charges based on the amount of data transmitted. Such services are offered as pay-per-use or volume-based packages. Our revenue from cyber data center services is generally based on contractual arrangements that are tailored to the specific services provided.

**Marketing**

In 2009, we incurred R\$158 million in marketing expenses, primarily to promote the cost savings available through our bundled service plans and diversify our sales efforts. Throughout 2009, our principal marketing effort was to continue to offer integrated promotions by bundling our various services, such as mobile communications, ADSL services, fixed-line services and public telephone services. Beginning in February 2008, ANATEL regulations have required mobile services providers to unblock the mobile handsets of their customers, permitting mobile users to choose a different service provider than the handset supplier. As a result and in line with our integration of our marketing efforts with Telemar, we have adopted a strategy of selling SIM cards on a stand-alone basis to acquire new pre-paid customers and retain existing ones.

We use a broad range of marketing channels, including television, radio, billboards, exterior signage, telemarketing, direct mail and internet advertising to market our fixed-line, mobile, long-distance and broadband services. We also sponsor sporting events and individual athletes, as well as cultural events, such as fashion shows, theatrical performances and popular music concerts. The goal of our marketing initiatives is to increase brand awareness in our targeted customer base and expand the use of our distribution channels.

Following Telemar's acquisition of control of our company in January 2009, we have integrated our marketing and distribution programs with those of Telemar. We target our marketing efforts to three separate segments of the telecommunications services market: (1) retail customers; (2) high-value residential customers and medium and small commercial customers; and (3) large commercial customers.

**Retail Customers**

We market our local fixed-line services, pre-paid and post-paid mobile services, long-distance services and dial-up internet access to retail customers. The retail marketing segment generated approximately 21% of our net operating revenues in 2009. Our principal distribution channels in the retail segment in 2009 were:

## Edgar Filing: BRASIL TELECOM SA - Form 20-F

telemarketing, which accounted for approximately 64% of our sales of fixed-line plans and 61% of our sales of broadband service subscriptions and approximately 61% of our sales of post-paid mobile plans in 2009. Our telemarketing sales channel consists of approximately 1,100 sales representatives that answer more than 500,000 calls per month. This channel provides us with the ability to pro-actively reach new customers, thereby increasing our client base and revenues, and also receive calls prompted by offers in numerous types of media.

## **Table of Contents**

34 exclusive agents with 787 salespeople trained to sell our services door-to-door in Region II in places where customers generally are not reachable by telemarketing. This channel accounted for approximately 14% of our sales of fixed-line plans and approximately 3% of our sales of broadband services in 2009.

approximately 40,000 drug stores, supermarkets, newsstands and similar outlets through which we primarily sell SIM cards and pre-paid mobile cards. This channel accounted for approximately 67% of our sales of SIM cards in 2009.

### ***High-Value Residential Customers and Medium and Small Commercial Customers***

We market our local fixed-line services, broadband services, post-paid mobile services and long-distance services to high-value residential customers and medium and small commercial customers. This marketing segment generated approximately 19% of our net operating revenues in 2009. Our principal distribution channels in this marketing segment in 2009 were:

our telemarketing channel described above, which accounted for approximately 59% of our sales of fixed-line plans and 55% of our sales of broadband service subscriptions in 2009.

49 *Oi* franchised service stores and kiosks located in the largest shopping malls and other high density areas in Region II that are focused on sales of higher value-added services (post-paid mobile plans and broadband services). This channel accounted for approximately 1% of our sales broadband services subscriptions, 12% of our sales of post-paid mobile plans and 7% of our sales of pre-paid mobile cards in 2009.

503 *Oi* mobile services stores through which we primarily sell post-paid mobile plans and broadband services. This channel accounted for approximately 29% of our sales of broadband services subscriptions and 14% of our sales of post-paid mobile plans in 2009.

a network comprised of approximately 115 non-exclusive commissioned sales agents dedicated mainly to marketing to small- and medium-sized commercial customers.

### ***Large Commercial Customers***

We market our local fixed-line services, broadband services, post-paid mobile services, long-distance services and commercial data transmission services to large commercial customers. This marketing segment generated approximately 15% of our net operating revenues in 2009. Our principal distribution channel in this marketing segment in 2009 was our direct sales force.

## **Billing and Collection**

### ***Fixed-Line Telephone Services***

We send each of our fixed-line customers a monthly bill covering all the services provided during the prior monthly period. Customers are grouped in billing cycles based on the date their bills are issued. Each bill separately itemizes local calls, long-distance calls, calls terminating on a mobile network, toll-free services and other services such as call waiting, voicemail and call forwarding. We have agreements with several banks and other vendors, such as drugstores, lottery houses and government agencies, for the receipt and processing of payments from our customers.

---

## **Table of Contents**

We are required to include in our monthly bills charges incurred by our customers for long-distance services provided by other long-distance service providers upon the request of these providers. We have billing agreements with each long-distance telecommunications service provider that interconnects with our networks under which we bill our customers for any long-distance calls originated on our network that are carried by another long-distance service provider and transfer the balance to the relevant provider after deducting any access fees due for the use of our network.

Payments are due within an average of 13 days after the billing date. We charge late-payment interest at a rate of 1% per month plus a one-time late charge of 2% of the amount outstanding. At December 31, 2009, 53.2% of all accounts receivable due from our fixed-line customers were outstanding for more than 30 days and 28.6% were outstanding for more than 90 days, as compared to 46.6% and 22.5%, respectively, at December 31, 2008.

ANATEL regulations permit us to restrict outgoing calls made by a fixed-line customer when the customer's account is more than 31 days past due, restrict incoming calls received by a fixed-line customer when the customer's account is more than 61 days past due, and disconnect a fixed-line customer when the customer's account is more than 91 days past due, provided in each case that 15-days' prior notice has been given to that customer prior to the imposition of each restriction. The disconnection process thus comprises several stages, including customer notification regarding the referral of their delinquency to credit bureaus, before the fixed-line customer may be ultimately disconnected due to non-payment. Notices range from voice messages to active calls for negotiation with the customer. Our collection system enables us to access delinquent subscribers' accounts according to their payment profile. This profile takes into consideration, among other things, the length of subscription, the outstanding balance of the account and the longest payment delays.

### ***Mobile Telecommunications Services***

We bill our mobile post-paid customers on a monthly basis and itemize charges in the same manner as we bill our fixed-line customers. See Fixed-Line Telephone Services. In addition, the monthly bills also provide details regarding minutes used and roaming charges. Payments are due within an average of 13 days after the billing date. We charge late-payment interest at a rate of 1% per month plus a one-time late charge of 2% of the amount outstanding. At December 31, 2009, 66.9% of all accounts receivable due from our mobile customers were outstanding for more than 30 days and 37.5% were outstanding for more than 90 days, as compared to 59.3% and 27.9%, respectively, at December 31, 2008.

ANATEL regulations permit us to partially suspend services to a mobile customer when the customer's account is more than 15 days past due, restrict all incoming calls received and outgoing calls made by a mobile customer when the customer's account is more than 45 days past due, and cancel services to a mobile customer when the customer's account is more than 75 days past due, provided in each case that 15-days' prior notice has been given to that customer prior to the imposition of each restriction. The cancellation process thus comprises several stages, including customer notification regarding the referral of their delinquency to credit bureaus, before services to the mobile customer may be ultimately cancelled due to non-payment. Notices range from text messages to active calls for negotiation with the customer. Our collection system enables us to access delinquent subscribers' accounts according to their payment profile. This profile takes into consideration, among other things, the length of subscription, the outstanding balance of the account and the longest payment delays. We have also implemented an information tool to assist with account management that is designed to warn subscribers of high outstanding amounts due and unpaid.

### **Network and Facilities**

Our network is comprised of a physical and logical infrastructure through which we provide fully-integrated services, whether fixed-line or mobile, voice, data or image, thereby optimizing available resources.

As part of the integration of our operations into the operations of Telemar, we consolidated our network operations center with Telemar's network operations center in Rio de Janeiro in July 2009 and now monitor our networks remotely from this network operations center.

**Table of Contents**

Network operating and configuration platforms, located at the network operations center, perform failure monitoring, database and configuration management, security management and performance analysis for the entire network.

**Fixed-Line Network**

Our fixed-line network includes (1) a network of access lines connecting customers to digital exchanges, (2) digital exchanges, (3) trunk lines connecting digital exchanges, and (4) long-distance transmission equipment. As of December 31, 2009, our access network served approximately 7.7 million fixed-line subscribers and approximately 1.9 million ADSL subscribers. As of December 31, 2009, we provided ADSL services in 1,585 municipalities.

In 2009, we provided fixed-line services at 82 new localities, 36 of which were provided with group access and 46 of which were provided with individual access, and we visited approximately 1,580 localities to confirm data on our record of localities. As of December 31, 2009, we offered fixed-line services in approximately 8,900 localities, either with individual or group access.

The following table sets forth selected information about our fixed-line network as of the dates and for the periods indicated.

	As of and For Year Ended		
	December 31,		
	2007	2008	2009
Installed access lines (in millions)	10.8	10.4	10.4
Access lines in service (in millions)	8.0	8.1	7.7
Public telephones in service (in thousands)	281.8	277.9	277.9
Broadband access lines in service (in millions)	1.6	1.8	1.9

Our fixed-line network is fully digitalized. Our transmission infrastructure connects these digital switches to two international gateway switches. Additionally, our network supports advanced services, including pre-paid and toll-free services.

Our long-distance network consists of fiber-optic cable networks and microwave links that we use to provide long-distance services within Region II. We have extended long-distance fiber optic networks that connect the state capitals in Region II and the Federal District. Most of the large urban areas of Region II are also connected by our fiber optic networks.

Our long-distance network is modern, has an infrastructure prepared to support a capacity of 400 Gbps and is equipped with an automatic control system that provides for a high level of availability and flexibility for configuration and provisioning. Our transmission infrastructure has the capacity to accommodate our customers' demand for long-distance, internet and data transmission services and other telecommunications service providers' demand for transmission facilities.

**Mobile Network**

Our mobile network is a GPRS based network. We offer GPRS/EDGE technology for data and 1,800/900 MHz for voice. We have GPRS coverage in 100% of the localities covered and EDGE in all capitals of the states in our service areas. Our mobile networks have unique data cores that are fully integrated with our fixed-line data networks.

As of December 31, 2009, our mobile network, consisting of 3,499 active radio base stations, covered 1,120 municipalities, or 93.0% of the urban population in Region II.

With the acquisition of new radio frequencies and the authorization to provide 3G services in Region II, we started the implementation process for our new 3G network. Our 3G projects are designed to provide the necessary capacity for up to 120,000 customers and include the installation of 1,435 active radio base stations, Node-Bs and systems provided by Ericsson and Nokia. These projects also involve the connection of 19 3G control units and the expansion of our data and network transmission.

## **Table of Contents**

Our mobile networks are directly interconnected to the national and international long-distance networks of all long-distance service providers operating in Regions I, II and III and all mobile services providers in Regions I, II and III.

### ***Data Transmission Network***

#### ***Broadband Services***

Our broadband network uses ADSL as a broadband access technology using our existing fixed-line networks with speeds of up to 8 Mbps (download) and 1 Mbps (upload). We have updated our DSLAMs/Ethernet technology to support ADSL 2+ technologies, allowing us to offer higher-speed services. We have implemented an address control and name resolution system for our IP networks with the objective of optimizing resources and improving the availability of internet access services.

We have deployed a Metro Ethernet network, which is a network that covers a metropolitan area to connect our subscribers to the internet, in several major metropolitan areas. We are currently expanding our Metro Ethernet network to other cities due to new customer demand. As a result of the implementation of this technology, we are able to provide IP TV, a television service that is based on broadband internet access. We have also deployed optical fiber networks based on GPON technology together with VDSL2 to provide fiber to the building.

Our dial-up IP platform supports dial-up access from the fixed-line networks. We operate an internet backbone network and a fully IP-routed network, which provides a backbone for all internet dedicated and dial-up services and VPN offerings. Our internet backbone connects to the public internet via international links that we maintain abroad. With these international links, we do not need to rely on other companies to connect our outbound internet traffic with the internet backbones of international ISPs.

#### ***Commercial Data Transmission Services***

Our Asynchronous Transfer Mode, or ATM, network, with its fully-integrated management system, provides:

frame relay data services (a data transmission service using fast protocols based on direct use of transmission lines) from 64 Kbps to 34 Mbps;

ATM data services supporting access rates from 2 Mbps to 622 Mbps; and

aggregation network services for ADSL platforms.

These features allow our integrated ATM network to service each of the different types of data applications used by our customers. ATM is a technology that converts existing twisted-pair telephone lines into access paths for high-speed communications.

### ***Call Center***

In 2007, we consolidated our call center structure by merging our 30 pre-existing sites into five sites (Goiânia, Campo Grande, Florianópolis, Brasília and Curitiba). We improved our customer relationship management system which integrates our systems and provides a database of information for each customer in order to provide better service and identify sales opportunities during each contact we have with our customers.

---

## **Table of Contents**

### **Competition**

Our industry is highly competitive. The competitive environment is significantly affected by key trends, including technological and service convergence, market consolidation and combined service offerings by service providers. See Item 5. Operating and Financial Review and Prospects Principal Factors Affecting Our Financial Condition and Results of Operations Effects of Competition on the Rates that We Realize and the Discounts We Record.

#### ***Local Fixed-Line Services***

In the local fixed-line telecommunications services market, competition is focused on corporate customers. In addition, competition from other telecommunications services has been increasing, particularly from mobile telecommunications services, which has led to traffic migration from fixed-line traffic to mobile traffic and the substitution of mobile services in place of fixed-line services, encouraged by offers of aggressively-priced packages from some mobile telecommunications service providers. Finally, the decrease in interconnection rates has discouraged the construction of new fixed-line networks and has led to decreases in market prices for telecommunications services by enabling telecommunications service providers that use the local fixed-line networks of incumbent fixed-line providers to offer lower prices to their customers.

We are the leading provider of local fixed-line services in Region II with 7.7 million fixed lines in service as of December 31, 2009 and an estimated market share of 68.5% of the total fixed lines in service in this region as of December 31, 2009, based on information available from ANATEL. Our principal competitors in Region II for fixed-line services are (1) GVT (an affiliate of Vivendi S.A.), which had an estimated market share of 11.5% of the total fixed lines in service in this region as of December 31, 2009, based on information available from ANATEL, and (2) Embratel (an affiliate of Telecom Americas Group, which is a subsidiary of América Móvil S.A.B. de C.V., an affiliate of Telmex), which has an estimated market share of 9.3% of the total fixed lines in service in this region as of December 31, 2009, based on information available from ANATEL.

Embratel provides local fixed-line services to residential customers through the cable network owned by its affiliate Net in the portions of Region II where Net provides cable television service. As a result, Net is able to offer cable television, broadband and telephone services as a bundle at a very competitive price. Net has engaged in efforts to promote Embratel's fixed-line service by offering free local fixed-line service to its customers for a period of one year. We expect competition from Embratel to increase as the cable network of Net expands through internal growth and as a result of acquisitions.

TIM has entered the local fixed-line services market by offering fixed-line wireless services which, unlike traditional mobile services, only permit a subscriber to place and receive calls when in proximity to a single specified radio base station. These services allow TIM to offer fixed-line service without installing a network of fixed lines directly to the homes or businesses of their fixed-line customers.

We expect to continue to face competition from mobile services providers, which represent the main source of competition in the local fixed-line service market. As of December 31, 2009, there were approximately 45 million mobile subscribers (including our mobile customers) in Region II, a 14.8% increase over December 31, 2008. The increase in the number of mobile users, in addition to reduced mobile services rates, is expected to continue to adversely affect the number of fixed-line subscribers and the volume of local fixed-line traffic. In addition, because mobile providers offer promotions and service plans that permit subscribers to make calls within the mobile provider's network at rates that are less than those charged for calls from a fixed-line telephone to a mobile telephone, we believe that we may be vulnerable to traffic migration as customers with both fixed-line and mobile telephones use their mobile devices to make calls to other mobile subscribers.

We believe that major technological innovations, such as instant messaging services and VoIP, may impact local fixed-line traffic in the future. In Brazil, those services have been increasing in popularity, which could put further pressure on the local fixed-line telecommunications market.

#### ***Long-Distance Services***

The long-distance services market is highly competitive. For the year ended December 31, 2009, based on internal data and publicly available information, we were the leader in long-distance services provided to customers in Region II in terms of volume of traffic from calls originated in this region.

## **Table of Contents**

Our principal competitors for long-distance services originating on fixed-line telephones in Region II are Embratel and GVT. We compete for long-distance services originating on mobile telephones in Region II with Embratel, Telesp (an affiliate of Vivo), TIM and GVT.

Generally, callers placing fixed-line long-distance calls in Brazil tend to select the long-distance carrier affiliated with the provider of their fixed-line service. Similarly, callers placing mobile long-distance calls in Brazil tend to select the long-distance carrier affiliated with the provider of their mobile or fixed-line service. However, increased competition from long-distance service providers has resulted in pressure on our long-distance rates and adversely affected our revenue from these services.

In addition, the offering of plans by other mobile services providers that include free minutes for calls to other subscribers of those mobile services providers may adversely impact our revenues from mobile long-distance calls if our mobile customers migrate to our competitors to remain within the network of the people to whom they plan to place long-distance calls.

New technologies that serve as an alternative to traditional long-distance telephone calls, such as VoIP, may start to capture part of Brazil's long-distance traffic. However, in contrast to what has occurred in other countries, such as the United States, we do not expect intense competition from VoIP providers in the near term due to (1) the low level of broadband penetration in Brazil due to the population's relatively low per capita income, and (2) the expected adverse effect of the success of this technology on the long-distance call margins of Embratel, which is an affiliate of Net, the main service provider with the ability to offer alternatives through VoIP.

### ***Mobile Services***

The mobile telecommunications services market in Brazil is characterized by intense competition among providers of mobile telecommunications services. We compete primarily with the following mobile services providers, each of which provides services throughout Brazil:

Vivo, which is a joint venture between Telefónica S.A. and Portugal Telecom S.A. and markets its services under the brand name Vivo ;

TIM, which is a subsidiary of Telecom Italia S.p.A. and markets its services under the brand name TIM ; and

Telecom Americas Group, which is a subsidiary of América Móvil S.A.B. de C.V., an affiliate of Telmex, and markets its services under the brand name Claro.

Competitive efforts in the Brazilian mobile telecommunications services market generally take the form of handset subsidies in the post-paid market and traffic subsidies in both the pre-paid and post-paid markets. For example, TIM has recently initiated a promotion under which its mobile subscribers may originate long-distance calls for a fixed fee, regardless of the duration of the call. The aggressiveness of promotions is generally driven by the desire of the provider offering the promotion to increase market share; however, these promotions generally are for a short duration as the pricing terms offered are not sustainable over the long term.

As of December 31, 2009, based on information available from ANATEL, we had a market share of 16.0% of the total number of subscribers in Region II, ranking behind Vivo with 31.5%, Claro with 28.3% and TIM with 23.9%, and we captured 26.9% of all net additions of mobile subscribers in Region II (calculated based on the number of mobile subscribers at the end of a period less the number of mobile subscribers at the beginning of that period) during 2009.

## **Table of Contents**

### ***Data Transmission Services***

Cable television providers that offer broadband services, particularly Net, represent our principal competition in the broadband market. We face competition from these providers that offer integrated packages, consisting of subscription television, broadband and voice telephone services to cable television subscribers who, in general, have more purchasing power than other consumers.

Our principal competitors in the commercial data transmission services market are Embratel, GVT and Intelig. Because the commercial data transmission services market is significantly less regulated than the fixed-line, long-distance and mobile services markets and, therefore, presents fewer barriers to entry, this market is subject to competition from a large number of competitors, including fixed-line telecommunications service providers and specialized services companies competing in this high-growth market and focused on large- and medium-sized business customers. Along with growth in traffic volume and increasing demand for broadband capacity, we expect significant price reductions in data transmission services as competitors expand their networks. We also anticipate a shift in competition towards value-added services provided over IP platforms.

### **Concessions, Authorizations and Licenses**

Under the General Telecommunications Law and ANATEL regulations, the right to provide telecommunications services is granted either through a concession under the public regime or an authorization under the private regime. For additional details regarding the rights and obligations of service providers operating under the public regime and the private regime, see Regulation of the Brazilian Telecommunications Industry Concessions and Authorizations. We operate under:

10 concessions to provide local fixed-line services in Region II (except for excluded areas in the States of Goiás, Mato Grosso do Sul and Paraná);

10 concessions to provide domestic long-distance services in Region II (except for excluded areas in the States of Goiás, Mato Grosso do Sul and Paraná);

authorizations to provide personal mobile services in Region II;

radio frequency licenses to provide 3G mobile services in Region II;

authorizations to provide local fixed-line services and domestic long-distance services in the areas of the States of Goiás, Mato Grosso do Sul and Paraná that are excluded from the concession area of Region II;

an authorization to provide international long-distance services originating from any location in Brazil; and

authorizations to provide Multimedia Communication Services (*Serviço de Comunicação Multimídia*) throughout Brazil.

These concessions and authorizations allow us to provide specific services in designated geographic areas and set forth certain obligations with which we must comply.

### ***Fixed-Line Services Concession Agreements***

We have entered into concession agreements with ANATEL that govern our concessions to provide fixed-line services in the Federal District and each of the states of Region II. Each of our concession agreements:

expires on December 31, 2025;

sets forth the parameters that govern adjustments to our rates for fixed-line services;

requires us to comply with the network expansion obligations set forth in the General Plan on Universal Service;

---

**Table of Contents**

requires us to comply with certain quality of service obligations set forth in these concession agreements as well as the quality of service obligations set forth in the General Plan on Quality Goals; and

requires payment of biannual fees equal to 2.0% of our net operating revenues that are derived from the provision of local fixed-line services (excluding taxes and social contributions) during the immediately preceding year.

For more information regarding the adjustment of our rates for fixed-line services, the General Plan on Universal Service and the General Plan on Quality Goals, see Regulation of the Brazilian Telecommunications Industry Regulation of Fixed-Line Services.

These concession agreements required us to render services in public telecommunications offices that serve as business centers for low-income populations. In April 2008, these concession agreements were amended to remove the obligation to construct new public telecommunications offices and replace this obligation with obligations to provide transmission lines connecting our fiber-optic internet backbones to municipalities in our concession area in which we did not provide internet service, which we refer to as backhaul. Under these amendments, we are obligated to set up backhaul in 452 municipalities in Region II. The facilities that we construct to meet this obligation will be considered to be property that is part of our concession and will therefore revert to the Brazilian government on January 1, 2026. Under the amendments, we were required to provide backhaul to 40% of these municipalities by December 12, 2008 and 80% of these municipalities by December 31, 2009. The amendments require us to provide backhaul to all of these municipalities by December 31, 2010.

These concession agreements provide that ANATEL may modify their terms in 2010, 2015 and 2020 and may revoke them prior to expiration under the circumstances described under Regulation of the Brazilian Telecommunications Industry Regulation of Fixed-Line Services Termination of a Concession. The modification right permits ANATEL to impose new terms and conditions in response to changes in technology, competition in the marketplace and domestic and international economic conditions. ANATEL is obligated to engage in public consultation in connection with each of these potential modifications.

We are currently discussing modifications to these concession agreements with ANATEL. On March 30, 2009, ANATEL published a public notice of the proposed modifications to these concession agreements. In this public notice, ANATEL proposed an amendment to the General Plan on Universal Service that would require us to:

double the backhaul capacity to the 20 municipalities affected by the April 2008 amendment to our concession agreements;

provide high-speed transmission lines (2.5 Gbps) to the 1,400 municipalities in our concession area in which we did provide internet service as of April 2008; and

provide service to a large number of additional areas, including indigenous villages, rural schools, health clinics, military bases, federal and state highway police stations, public aerodromes and environmental conservation organizations, which would require the fixed-line concessionaires to install an aggregate of up to approximately 110,000 additional public telephones, mostly in rural areas.

In order to mitigate the costs related to the General Plan on Universal Service, ANATEL proposed a reduction in the number of public telephones required per inhabitant from 6.0 per 1,000 inhabitants to 4.5 per 1,000 inhabitants. The public consultation period in connection with the March 30, 2009 public notice ended on June 22, 2009, although the final amendments to our concession agreements have not yet been determined. The final modifications will become effective on January 1, 2011. As a result of the adoption of the National Broadband Plan, we expect that ANATEL will propose additional modifications to the General Plan on Universal Service as part of the pending modifications of these concession agreements.

---

## **Table of Contents**

### ***Domestic Long-Distance Services Concession Agreements***

We have entered into concession agreements with ANATEL that govern our concessions to provide domestic long-distance services originating from the Federal District and each of the states of Region II. Each of our concession agreements:

expires on December 31, 2025;

sets forth the parameters that govern adjustments to our rates for domestic long-distance services;

requires us to comply with certain quality of service obligations set forth in these concession agreements as well as the quality of service obligations set forth in the General Plan on Quality Goals; and

requires payment of biannual fees equal to 2.0% of our net operating revenues that are derived from the provision of domestic long-distance services (excluding taxes and social contributions) during the immediately preceding year.

For more information regarding the adjustment of our rates for fixed-line services, the General Plan on Universal Service and the General Plan on Quality Goals, see Regulation of the Brazilian Telecommunications Industry Regulation of Fixed-Line Services.

These concession agreements provide that ANATEL may modify their terms in 2010, 2015 and 2020 and may revoke them prior to expiration under the circumstances described under Regulation of the Brazilian Telecommunications Industry Regulation of Fixed-Line Services Termination of a Concession. The modification right permits ANATEL to impose new terms and conditions in response to changes in technology, competition in the marketplace and domestic and international economic conditions. ANATEL is obligated to engage in public consultation in connection with each of these potential modifications.

We are currently discussing modifications to these concession agreements with ANATEL. On March 30, 2009, ANATEL published a public notice proposing new conditions and quality and universal service targets related to these concession agreements. The public consultation period in connection with the March 30, 2009 public notice ended on June 22, 2009, although the final amendments to our concession agreements have not yet been determined. The final modifications will become effective on January 1, 2011.

### ***Personal Mobile Services Authorization Agreements and Radio Frequency Spectrum Licenses***

We have entered into authorization agreements with ANATEL that govern our authorizations to provide personal mobile services in Region II. These authorizations permit us to provide personal mobile services for an indeterminate period of time, but do not provide us with the right to use specific radio frequency spectrum.

We hold nine licenses to use radio frequency spectrum in specific geographic regions. These licenses grant us permission to use the applicable radio spectrum for 15 years from the date of grant and are renewable for additional 15-year terms. We will be required to pay an amount equal to 2.0% of the prior year's net operating revenue from personal mobile services upon renewal of the license and on every second anniversary of the renewal. The initial terms of our radio frequency spectrum licenses expire between 2017 and 2022.

Our authorization agreements are subject to network scope and service performance obligations set forth in these authorization agreements. Under these obligations, we are required to service all municipalities in Region II with a population in excess of 100,000. A municipality is considered serviced when the covered service area contains at least 80% of the urban area in the municipality. As of the date of this annual report, we have satisfied the network scope and service performance obligations set forth in these authorization agreements.

In August 2007, ANATEL adopted a revision of the personal mobile services regulations that became effective in February 2008. These revised regulations imposed additional obligations on personal mobile services providers, in particular in connection with customers' rights. For a discussion of these additional obligations, see Regulation of the Brazilian Telecommunications Industry Regulation of Mobile Services Obligations of Personal Mobile Services Providers.

---

**Table of Contents**

***3G Radio Frequency Licenses***

We have been granted radio frequency licenses by ANATEL that govern our use of the frequencies necessary to provide 3G services in Region II. Each of these licenses grants us permission to use the applicable radio spectrum for 15 years from the date of grant and is renewable for additional 15-year terms. We will be required to pay an amount equal to 2.0% of the prior year's net operating revenue from personal mobile services upon renewal of the license and on every second anniversary of the renewal. The initial terms of these licenses expire in 2023.

These radio frequency licenses include network scope obligations. Under these obligations, as of the date of this annual report, we are required to (1) service 168 municipalities in Region II that did not have mobile services at the time these licenses were granted with either 2G or 3G mobile telecommunications services, and (2) provide 3G service to all state capitals in Region II, the Federal District and all municipalities with a population in excess of 500,000. In addition, we are required to provide the following services in Region II:

3G service to all municipalities with a population in excess of 200,000 by April 30, 2012;

3G service to all municipalities with a population in excess of 100,000 and to 50% of the municipalities with a population in excess of 30,000 and less than 100,000 by April 30, 2013;

3G service to 60% of the municipalities with a population in excess of 30,000 by April 30, 2016; and

3G service to 242 municipalities with a population of less than 30,000 by April 30, 2016.

A municipality is considered "served" when the covered service area contains at least 80% of the urban area in the municipality. Our failure to meet these targets may result in the imposition of penalties established in ANATEL regulations and, in extreme circumstances, in termination of our 3G frequency licenses by ANATEL. As of the date of this annual report, we have satisfied the network scope and service performance obligations set forth in these licenses.

***Fixed-Line Services Authorization Agreements***

We have entered into authorization agreements with ANATEL that govern our authorizations to provide local fixed-line services in the areas in the States of Goiás, Mato Grosso do Sul and Paraná that are excluded from the concession area of Region II. These authorizations do not have termination dates and require us to comply with certain quality of service obligations set forth in the General Plan on Quality Goals. We have surrendered our fixed-line services authorizations in Regions I and III to comply with ANATEL conditions to the approval the acquisition of our company by Telemar.

We have entered into authorization agreements with ANATEL that govern our authorizations to provide domestic long-distance services originating from the areas in the States of Goiás, Mato Grosso do Sul and Paraná that are excluded from the concession area of Region II. These authorizations do not have termination dates and require us to comply with certain quality of service obligations set forth in the General Plan on Quality Goals. We have surrendered our authorization to provide domestic long-distance services originating from Regions I and III to comply with ANATEL conditions to the approval of the acquisition of our company by Telemar.

We have entered into authorization agreements with ANATEL that govern our authorizations to provide international long-distance services originating from anywhere in Brazil. These authorizations do not have termination dates and require us to comply with quality of service obligations set forth in the General Plan on Quality Goals.

**Table of Contents****Multimedia Services Authorization Agreement**

ANATEL granted us a Multimedia Communication Services authorization, which superseded our prior Telecommunications Network Transportation Services (*Serviço de Rede de Transporte de Telecomunicações*) authorization, permitting us to provide high speed data service in Region II.

The Multimedia Communication Services authorization became effective in May 2003 and covers the same geographical area as our concession agreements. In April 2008, in connection with the amendments to our fixed-line services concessions, we agreed to provide internet service free of charge until December 31, 2025 to all urban schools in Region II. Under this agreement, we were required to provide internet services to 40% of these schools by December 12, 2008 and 80% of these schools by December 31, 2009. This agreement requires us to provide internet services to all of these schools by December 31, 2010.

**Capital Expenditures**

Our capital expenditures on property, plant and equipment and intangible assets were R\$1,111 million in 2009, R\$2,678 million in 2008 and R\$1,398 million in 2007.

The following table sets forth our capital expenditures on plant expansion and modernization for the periods indicated.

	Year Ended December 31,		
	2007	2008	2009
	(in millions of reais)		
Mobile network and systems	R\$ 279	R\$ 1,145	R\$ 444
Data transmission equipment	240	275	170
Voice transmission	146	389	174
Telecommunications services infrastructure	226	236	15
Information technology services	127	143	63
Backbone transmission	74	137	66
Network management system equipment	34	52	3
Network expansion parts		29	
Buildings, improvements and furniture	22	36	9
Submarine cables	22	19	69
Internet services equipment	92	90	17
Other	136	127	81
<b>Total capital expenditures</b>	<b>R\$ 1,398</b>	<b>R\$ 2,678</b>	<b>R\$ 1,111</b>

**Number Portability**

We implemented the systems necessary for us to comply with ANATEL's number portability requirements. This project was commenced in September 2008 and was completed in March 2009. The total cost of this was R\$163 million.

**Commencement of 3G Services in Region II**

In December 2007, we acquired radio frequency licenses in an auction conducted by ANATEL to provide 3G mobile services in two of the nine regions into which Brazil has been divided by ANATEL for purposes of providing 3G services. These licenses have allowed us to commence providing 3G services throughout Region II. The total cost of these licenses was R\$488 million. In December 2008 we completed a project to develop our 3G network in Region II. This project was designed to provide the necessary capacity for up to 120,000 customers and included the installation of 1,453 active radio base stations, Node-Bs and systems provided by Ericsson and Nokia, the connection of 19 3G control units and the expansion of our data and network transmission. By providing 3G services, we believe that we will strengthen our bundling strategy in Region II. The total cost of this project was R\$472.2 million.

## **Table of Contents**

### ***Upgrade of Our Core Mobile Network***

In February 2010, we completed a project to upgrade our core mobile network, with the primary goal of fully integrating our mobile network into the mobile network of Telemar. We engaged Nokia to replace our existing core mobile network, which relied on technology from Ericsson, with a new core mobile network that uses the same Nokia technology employed in Telemar's existing core mobile network to facilitate the integration of our networks. The total cost of this project was R\$131 million.

### ***Enhancement of Our Mobile Network***

We have undertaken a project to upgrade a portion of our mobile networks to enable us to increase the capacity of these networks. We plan to replace 3,060 of our radio base stations, all of which previously employed Alcatel technology, with Huawei base stations. We expect the replacement of these radio base stations to be completed by September 2010 at a total cost of R\$202.5 million.

### ***2010 Capital Expenditure Budget***

Our 2010 capital expenditure budget, including our budget for expenditures in 2010 on the projects described above, totals approximately R\$905 million. We plan to finance such expenditures through operating cash flows and long-term financings. From this total, we have budgeted 33% of our 2010 capital expenditure budget to the mobile telephone services business, and 62% to the fixed-line business, which includes the capital expenditures that will be necessary in order for us to meet our regulatory targets.

### **Research and Development**

We conduct independent research and development in areas of telecommunications services but historically have not independently developed new telecommunications technology. We depend primarily on suppliers of telecommunications equipment for the development of new technology.

As part of the privatization process of Telebrás, the newly formed telecommunications service providers, including our company, contributed to the Foundation for Research and Development of Telecommunications (*Fundação Centro de Pesquisa e Desenvolvimento em Telecomunicações*), or the Foundation, which is a research and development center formerly operated by Telebrás that develops telecommunications technology to be applied in Brazil. We made disbursements to the Foundation of R\$12 million in 2007, R\$14 million in 2008 relating to specific programs that we had undertaken with the Foundation.

As part of our integration with Telemar, Telemar has created a division to manage innovation and research and development projects with the mission of coordinating and promoting efforts and projects that we develop. In addition, our technology laboratory has been integrated with Telemar's technology laboratory, which performs equipment testing and assembly. This laboratory performs a variety of functions, such as operation support systems, business support systems and information security. We conduct trials of technologies from different vendors in this laboratory to evaluate these technologies for deployment.

Since 2006, we have performed research in cooperation with equipment and systems suppliers designed to develop new technologies and services. In 2007, we modified our *Único* service (a service enabling subscribers to use their mobile device on our fixed-line network through a wireless local area network, or Wi-Fi, connection) to include Wi-Fi access and GSM seamless integration. As a result, we believe that we were the first Brazilian carrier to launch services that use next generation network architecture.

We participate in telecommunications standards bodies, technical associations and committee forums such as the European Telecommunication Standards Institute (ETSI), the Telecommunication and Internet Services and Protocols for Advanced Networking (TISPAN), the Third Generation Partnership Project (3GPP), and the Fixed Mobile Convergence Alliance (FMCA) in order to contribute and gather expertise in globally applicable technical specifications, technical reports and telecommunications standards.

## **Table of Contents**

### **Property, Plant and Equipment**

Our principal properties, owned and leased, are located in Region II. At December 31, 2009, the net book value of our property, plant and equipment was R\$6,993 million. Our main equipment consists of transmission equipment, trunking and switching stations (including local, tandem and transit telephone exchanges), metallic and fiber-optic cable networks and lines, underground ducts, posts and towers, data communication equipment, network systems and infrastructure (including alternating and direct current supply equipment) and motor-generator groups.

At December 31, 2009, buildings represented 9.9% of the net book value of our property, plant and equipment; underground ducts, post and towers represented 17.3% of the net book value; plant and equipment related to switching stations represented 8.2%; transmission equipment represented 51.3%; construction in progress represented 7.8%; and other fixed assets represented 5.5%.

All property, plant and equipment that are essential in providing the services described in our concession agreements are considered reversible assets, which means that, should our concession agreements expire or terminate without being renewed, these assets will automatically revert to ANATEL. There are no other encumbrances that may affect the utilization of our property, plant and equipment.

### **Intellectual Property**

We believe the trademarks that identify us and our business are important for us, and as a result, we have taken steps to protect them. At December 31, 2009, we had 237 trademarks registered with the National Institute of Industrial Property (*Instituto Nacional de Propriedade Industrial*), or INPI, and 392 pending trademark applications. Among the various trademarks we have registered with the INPI, three are being contested by third parties. Additionally, of the 392 pending trademark applications, 18 have been challenged by third parties.

At December 31, 2009, we had 233 domain names registered with the Center of Information and Coordination of Dot Br - NIC. Br, an agency responsible for registering domain names in Brazil. The information included on our websites or that might be accessed through our websites is not included in this annual report and is not incorporated into this annual report by reference.

At December 31, 2009, we had filed seven patent applications with the INPI. Requests for technical examination have been submitted to the INPI for all of these patent applications. Once examination is concluded, a decision accepting or rejecting the application will be issued. If granted, the patent will have a term of 20 years from the date of filing and no less than ten years from the date the application is granted.

We use the *Oi* brand name with the permission of Telemar.

### **Insurance**

Pursuant to requirements in our concession agreements, we maintain the following insurance policies: (1) all risk property insurance covering all insurable assets pertaining to the concessions; (2) loss of profit insurance covering lost profits deriving from property damage and business interruption; and (3) performance bond insurance to assure compliance with our obligations related to quality of service and universal service targets set forth in our concession agreements.

In addition to the above policies, we maintain civil liability insurance. Our assets that are of material value and/or exposed to high degrees of risks are also insured. All of our insurance coverage was purchased from established insurance companies in Brazil, such as Bradesco and Itaú Seguros.

We believe that our current insurance coverage is suitable to our operations.

---

## **Table of Contents**

### **Regulation of the Brazilian Telecommunications Industry**

#### ***Overview***

Our business, including the nature of the services we provide and the rates we charge, is subject to comprehensive regulation under the General Telecommunications Law and a comprehensive regulatory framework for the provision of telecommunications services promulgated by ANATEL. We provide fixed-line, domestic and international long-distance and mobile telecommunications services under concessions, authorizations and licenses that were granted by ANATEL and allow us to provide specified services in designated geographic areas, as well as set forth certain obligations with which we must comply. See Concessions, Authorizations and Licenses.

ANATEL is a regulatory agency that was established in July 1997 pursuant to the *Regulamento da Agência Nacional de Telecomunicações*. ANATEL oversees our activities and enforces the General Telecommunications Law and the regulations promulgated thereunder. ANATEL is administratively independent and is financially autonomous. ANATEL is required to report on its activities to the Brazilian Ministry of Communications. ANATEL has authority to propose and to issue regulations that are legally binding on telecommunications service providers. ANATEL also has the authority to grant concessions and licenses for all telecommunications services, other than broadcasting services. Any regulation or action proposed by ANATEL is subject to a period of public comment, which may include public hearings, and ANATEL's decisions may be challenged administratively before the agency itself or through the Brazilian judicial system.

#### ***Concessions and Authorizations***

Under the General Telecommunications Law and ANATEL regulations, the right to provide telecommunications services is granted either through a concession under the public regime or an authorization under the private regime. A concession is granted for a fixed period of time following a public auction, and is generally renewable only once. An authorization is granted for an indeterminate period of time and public auctions are held for some authorizations. These concessions and authorizations allow service providers to provide specific services in designated geographic areas, set forth certain obligations with which the service providers must comply and require equal treatment of customers by the service providers.

Telemar, Brasil Telecom, Telesp and Embratel, the four principal providers of fixed-line telecommunications services in Brazil, provide these services under the public regime. In addition, CTBC and Sercomtel, which are secondary local fixed-line telecommunications service providers, operate under the public regime. All of the other providers of fixed-line telecommunications services and all providers of personal mobile services and data transmission services in Brazil operate under the private regime.

Providers of public regime services are subject to more obligations and restrictions than providers of private regime services. Under Brazilian law, providers of public regime services are subject to certain requirements with respect to services such as quality of service, continuity and universality of service, network expansion and network modernization. Additionally, the rates that public regime service providers may charge customers are subject to ANATEL supervision.

Providers of private regime services, although not generally subject to the requirements concerning continuity and universality of service and network modernization, are subject to certain network expansion and quality of service obligations set forth in their respective authorizations.

#### ***Regulation of Fixed-Line Services***

##### ***General Policies for the Regulation of the Fixed-Line Telecommunications Sector***

In June 2003, Brazil's president issued Decree No. 4,733, outlining a number of new rules and guidelines which were intended to consolidate several changes in the regulation of Brazil's fixed-line telecommunications sector. This decree sets forth general declarations of policy regarding, among other things:

universal access to telecommunications services;

---

**Table of Contents**

stimulation of employment and development of the Brazilian telecommunications sector;

promotion of competition and adoption of rate readjustment policies that take into account Brazilian socioeconomic considerations;  
and

the financial equilibrium of existing concession agreements.

This decree also defined certain changes that are reflected in the concession agreements entered into by providers of public regime services that became effective on January 1, 2006.

A number of bills affecting telecommunications policy have been submitted to the Brazilian Congress with an aim to make telecommunications services more accessible to Brazil's low-income population. These bills have proposed to (1) eliminate the monthly subscription fee (*assinatura mensal*) that compensates telecommunications companies for extending and maintaining fixed-line telecommunications services for their customers, and (2) impose inexpensive fixed-line telephone plans (*telefone social*) that telecommunications companies would be required to provide to certain eligible low-income residential customers. If approved, we expect that these types of proposals will adversely affect the overall margin of telecommunications providers, including us. For a discussion of the legal and regulatory risks associated with our business, see

Item 3. Key Information Risk Factors Risks Relating to Our Company and the Brazilian Telecommunications Industry Our industry is highly regulated. Changes in laws and regulations may adversely impact our business.

*Private Regime Authorizations*

With the goal of introducing competition in fixed-line telephone services in Brazil, the federal government granted four private-regime authorizations in 1999 to permit fixed-line service providers to compete with the incumbent fixed-line concessionaires. Three of these authorizations were granted to providers of local and intraregional long-distance services in the three fixed-line service regions. Embratel currently holds two of these authorizations, which allow it to provide local fixed-line services in Regions I and III, and GVT holds the other authorization, which allows it to provide local fixed-line services in Region II. The fourth fixed-line authorization, to provide domestic and international long-distance services throughout Brazil, is currently held by Intelig. Since 2002, the number of authorizations to provide fixed-line services that the federal government may issue is unlimited.

*Public Regime Concessions*

Each of the public regime service providers operated under a concession agreement that expired at the end of 2005. Each of these providers entered into new concession agreements in December 2005 that extended its concessions for an additional 20-year period expiring in December 2025. Under these new concession agreements, each of the public regime service providers is required to comply with the provisions of (1) the General Plan on Universal Service that was adopted by ANATEL in June 2003, (2) the General Plan on Quality Goals that was adopted by ANATEL in June 2003, and (3) the General Plan on Competition Targets (*Plano Geral de Metas de Competição*), which has not yet been adopted by ANATEL.

The concession agreements provide that ANATEL may modify their terms in 2010, 2015 and 2020 and may revoke them prior to expiration under the circumstances described below under Termination of a Concession. The modification right permits ANATEL to impose new terms and conditions in response to changes in technology, competition in the marketplace and domestic and international economic conditions. ANATEL is obligated to engage in public consultation in connection with each of these potential modifications.

*Rate Regulation*

Public regime service providers must offer a basic service plan comprised of the following basic services: (1) installation; (2) monthly subscription; and (3) switched local minutes. Modifications of the rates charged for these basic services are determined by reference to a local rate basket that represents the weighted average of the rates for

---

**Table of Contents**

installation, monthly subscriptions and switched local minutes. Rates for long-distance services originated and terminated on fixed lines vary in accordance with three basic criteria: (1) physical distance separating callers; (2) time of the day; and (3) day of the week on which the call is placed. Modifications of the rates charged for these long-distance services are determined by reference to a long-distance rate basket that represents the weighted average of the rates for long-distance calls. The rates for the provision of services through payphones and installation rates are treated separately. The rates for international long-distance services provided by Embratel, the incumbent international long-distance concessionaire, are regulated by ANATEL. However, the rates for international long-distance services charged by other long-distance service providers, all of whom provide these services under authorizations rather than concessions, are not subject to ANATEL regulation.

The concession agreements establish a price-cap mechanism for annual rate adjustments for basic service plans and domestic long-distance rates based on formulas set forth in each provider's concession agreement. The formula provides for two adjustments to the price cap based on the local rate basket, the long-distance rate basket and the use of a price index. The price cap is first revised upward to reflect increases in inflation, as measured by an index, then ANATEL applies a productivity discount factor, or Factor X, which reduces the impact of the rate readjustment provided by the index.

Under the concession agreements entered into in 2005, a new calculation method for Factor X was adopted. In 2006 and 2007, Factor X, which was discounted from the IST, was equal to 50% of the increase in a public regime provider's productivity. Beginning in 2008, ANATEL has calculated the sector's weighted average productivity rate. Currently, Factor X is equal to (1) 50% of the increase in the weighted average productivity rate of public regime providers, plus (2) a factor calculated by ANATEL that is designed to reflect cost optimization targets for the telecommunications industry as a whole. If the weighted average productivity rate is negative, ANATEL will not allow the annual adjustment to be increased by more than the IST.

A provider may increase rates for individual services within the local rate basket or the long-distance rate basket by up to 5% more than the IST so long as the rates for other services in that rate basket are reduced to the extent necessary to ensure that the weighted average increase for the entire rate basket does not exceed the permitted annual rate adjustment.

A provider may also offer alternative plans in addition to the basic service plan. Alternative plans must be submitted for ANATEL's approval. The rates offered under the alternative plans may be adjusted annually based on the IST.

Prior to January 2006, calls were measured and charged in terms of pulses, consisting of a single charge per call and an additional charge for each four-minute interval of usage. The concession agreements entered into in 2005 established a per-minute billing system for local fixed-line telecommunications services to meet ANATEL's objective to establish a more objective and transparent billing criteria for customers.

For information on our rates and service plans, see Rates.

***General Plan on Universal Service***

The General Plan on Universal Service was approved by ANATEL in June 2003 and became effective in January 2006. The General Plan on Universal Service sets forth the principal network expansion and modernization obligations of the public regime providers, such as providing public telephones in localities with a population in excess of 100, and installing residential fixed lines within seven days of a request in localities with a population in excess of 300. In addition, public regime providers must comply with the Special Individual Access Class (*Acesso Individual Classe Especial*) rules, which are designed to require service for economically disadvantaged people. Under the Special Individual Access Class rules, a qualifying customer may subscribe to a service plan, limited to one fixed-line per household, and pay a lower monthly fee for service than under the basic service plans.

Public regime providers are also subject to network expansion requirements under the General Plan on Universal Service, which are revised by ANATEL from time to time. No subsidies or other supplemental financings are anticipated to finance our network expansion obligations. Our failure to meet the network expansion and

## **Table of Contents**

modernization obligations established by the General Plan on Universal Service or in our concession agreements may result in fines and penalties of up to R\$50 million, as well as potential revocation of our concessions.

### ***Unbundling of Local Fixed-Line Networks***

On May 2004, ANATEL issued an order establishing rules for partial unbundling of the local fixed-line networks of the public regime service providers, which we refer to as line sharing, and requiring the eventual full unbundling of local fixed-line networks, which will entail these providers making their entire networks available to other telecommunications service providers. This order (1) establishes a time by which service providers must comply with the order to provide such access, (2) limits the rates service providers can charge for line sharing and full unbundling of services, and (3) addresses related matters such as co-location space requirements. Co-location means that a service provider requesting interconnection may place its switching equipment in or near the local exchange of the service provider whose network the requesting service provider wishes to use and may connect to the network at this local exchange.

This regulation was designed to increase competition in the local fixed-line and broadband internet access markets by making it easier for new telecommunications service providers operating under either the public or private regime to enter these markets and for existing service providers to provide new services or enter new regions.

ANATEL has not yet adopted final unbundling rules or rates for full unbundling, although we expect that the rates that we would receive from other telecommunications services providers accessing our fixed-line networks will be lower than the rates we currently charge our customers for providing fixed-line and broadband internet services. As of December 31, 2009, no unbundled lines had been used by competitors in our region.

### ***Service Restrictions***

Pursuant to regulations in effect as of the date of this annual report, public regime providers are subject to certain restrictions on alliances, joint ventures and mergers and acquisitions with other public regime providers, including:

a prohibition on holding more than 20% of the voting shares of more than one other provider of public regime services;

a restriction on mergers between regional fixed-line service providers and mobile services providers (a prohibition that also applies to private regime companies); and

a restriction on offering cable television services, unless the company offering public regime services has won a public auction to provide cable television services in the relevant region and no other bidders participated.

On November 20, 2008, Brazil's president issued Decree No. 6,654, which modified the General Plan of Grants (*Plano Geral de Outorgas*) applicable to the fixed-line telecommunications industry. This decree eliminated a provision of ANATEL's regulations that prohibited one public regime provider from holding more than 20% of the voting shares of any other public regime provider. As a result of the elimination of this provision, Telemar was no longer prohibited from acquiring indirect control of Brasil Telecom.

### ***Termination of a Concession***

ANATEL may terminate the concession of any public regime telecommunications service provider upon the occurrence of any of the following:

an extraordinary situation jeopardizing the public interest, in which case the Brazilian government is authorized to start rendering the services set forth under the concession in lieu of the concessionaire, subject to congressional authorization and payment of adequate indemnification to the owner of the terminated concession;

**Table of Contents**

termination by the provider (through an agreement with ANATEL or pursuant to legal proceedings) as a consequence of an act or omission of the Brazilian government that makes the rendering of the services excessively burdensome to the provider;

annulment of the concession due to a contractual term, which is deemed by subsequent law to be illegal;

material failure to comply with the provider's universalization targets;

failure to meet insurance requirements set forth in the concession agreement;

a split-up, spin-off, amalgamation, merger, capital reduction or transfer of the provider's control without ANATEL's authorization;

the transfer of the concession without ANATEL's authorization;

the dissolution or bankruptcy of the provider; or

an extraordinary situation in which Brazilian government intervention, although legally permissible, is not undertaken, as such intervention would prove to be inconvenient, unnecessary or would result in an unfair benefit to the provider.

In the event a concession is terminated, ANATEL is authorized to administer the provider's properties and its employees in order to continue rendering services.

*General Plan on Quality Goals*

The General Plan on Quality Goals was approved by ANATEL in June 2003 and became effective in January 2006. Each fixed-line service provider operating under the public regime or the private regime must comply with the provisions of the General Plan on Quality Goals. All costs related to compliance with the quality goals established by the General Plan on Quality Goals must be borne exclusively by the service provider. The General Plan on Quality Goals establishes minimum quality standards with regard to:

modernization of the network;

responses to repair requests;

responses to change of address requests;

rate of call completion;

operator availability;

availability of services to customers;

personal services to customers;

issuance of bills;

responses to mail received from customers; and

quality of public telephones.

These quality standards are measured according to the definitions and quality indicators established by ANATEL. Every month, fixed-line service providers are required to report their compliance with quality goals to ANATEL. Additionally, they are obligated to provide ANATEL with an in-depth report and analysis on each quality goal that is not satisfied. ANATEL may also collect such data from fixed-line service providers at any time without prior notice. Fixed-line service providers that fail to meet quality goals established by ANATEL may be subject to warnings, fines, intervention by ANATEL, temporary suspensions of service or cancellation of their concessions and authorizations.

ANATEL measures the performance of fixed-line service providers in each individual state in which they operate. As a result, the performance of fixed-line service providers in any particular state may not meet one or more quality performance targets even if such service provider's overall performance is satisfactory. Therefore, fixed-line service providers, including us, could be subject to fines or penalties as a result of the failure to meet the quality performance targets in one or more particular states.

The failure by fixed-line service providers to meet the quality of service obligations established by the General Plan on Quality Goals or in our concession agreements may result in fines and penalties of up to R\$40 million.

## **Table of Contents**

### ***Regulation of Mobile Services***

In September 2000, ANATEL adopted regulations that established operating rules for providers under the personal mobile service regime. The regulations permitted ANATEL to grant authorizations to provide mobile telecommunications services under the personal mobile service regime. For purposes of the personal mobile service regulations, Brazil is divided into three service regions covering the same geographic areas as the concessions for fixed-line telecommunications services.

Under the personal mobile service regulations:

Band A and Band B service providers can apply for an additional frequency range;

each service provider may apply to provide domestic and international long-distance services originating from its service region;

existing service providers, as well as new entrants into the Brazilian telecommunications market, may bid for new licenses in all frequency bands, other than Band A and Band B;

personal mobile services providers are required to offer a basic service plan to their customers containing certain prescribed features;

personal mobile services providers are required to establish interconnection rates for the use of one provider's network by another provider;

the number of regions in which a personal mobile services provider may offer services is not limited; and

a personal mobile services provider, or its controlling shareholders, may not hold more than one personal mobile services authorization covering any specific region.

### ***Auction of Personal Mobile Services Spectrum***

Prior to the establishment of the personal mobile services regime, ANATEL had granted licenses to mobile services providers to operate in each region of Brazil using Bands A and B. In 2001 and 2002, ANATEL successfully auctioned authorizations and licenses to operators in Band D and Band E in each region. Brasil Telecom Mobile was granted its initial authorization to provide personal mobile services in Region II and a license to operate in Band E in December 2002.

ANATEL conducted additional auctions of radio frequency licenses in 2004 and 2006. In April 2004, Brasil Telecom Mobile acquired an additional license to operate in Region II.

### ***Auction of 3G Spectrum***

In preparation for auctions of spectrum in Bands F, G, I and J (2.1 GHz), ANATEL issued regulations that divide the Brazilian territory into nine regions for purposes of operations using these frequency bands. In December 2007, ANATEL auctioned radio frequency licenses to operate on each of these frequency bands in each of the nine regions and the related licenses to use these frequency bands. In this auction, we acquired the radio frequency licenses necessary to offer 3G services in two of the nine regions delineated by ANATEL for 3G services (corresponding to Region II under the personal mobile services regime). The use of these frequency bands will allow personal mobile services providers to offer 3G services to their customers.

### ***Personal Mobile Services Rate Regulation***

## Edgar Filing: BRASIL TELECOM SA - Form 20-F

Rates for personal mobile services are regulated by ANATEL. Personal mobile services providers are required to offer a basic service plan that consists of a monthly subscription, local calls and roaming. Basic service plans were approved by ANATEL for each of the personal mobile services providers following the grant of personal mobile services authorizations to each of these providers.

---

**Table of Contents**

Following the effectiveness of the basic service plans, annual adjustments of the rates under these plans have been subject to a price cap mechanism. Through 2005, rates were adjusted annually by no more than the rate of inflation, as measured by the IGP-DI. In 2006, ANATEL replaced the IGP-DI with the IST to calculate annual rate adjustments.

Personal mobile services providers are permitted to offer non-discriminatory alternative plans to the basic service plan. The rates charged under these plans (e.g., monthly subscription rates, charges for local calls and roaming charges) are subject to ANATEL approval prior to the time that these plans are first offered to mobile customers. Following the approval of these plans, the rates under these plans may be increased up to an annual adjustment that is approved by ANATEL and is no more than the rate of inflation, as measured by the IST.

Although subscribers of a plan cannot be forced to migrate to new plans, existing plans may be discontinued as long as all subscribers receive a notice to that effect and are allowed to migrate to new plans within six months of such notice. Discounts from the rates set in basic service plans and alternative service plans may be granted to customers without ANATEL approval.

*Obligations of Personal Mobile Services Providers*

As a telecommunications service provider, we are subject to requirements concerning network expansion and quality of service, as established in applicable regulations and in our personal mobile services authorizations. If we fail to meet these obligations, we may be fined, subject to a maximum penalty of R\$50 million, until we are in full compliance with our obligations. While it is possible for an authorization to be revoked for non-compliance with these obligations, there are no precedents for such a revocation.

*Network Expansion Obligations*

The personal mobile services authorizations set forth certain obligations and targets that must be met by a personal mobile services provider. For a description of the obligations and targets that must be met by our company, see [Concessions, Authorizations and Licenses Personal Mobile Services Authorization Agreements and Radio Frequency Spectrum Licenses](#) and [Concessions, Authorizations and Licenses 3G Radio Frequency Licenses](#).

*Quality of Service Obligations*

Our personal mobile services authorizations impose obligations on us to meet quality of service standards relating to our network's ability to make and receive calls, call failure rates, capacity to handle peak periods, failed interconnection of calls and customer complaints. ANATEL defines these quality of service standards and we must report information in connection with such standards to ANATEL.

*Additional Obligations*

In August 2007, ANATEL adopted revisions to the personal mobile services regulations that became effective in February 2008. These revised regulations imposed additional obligations on personal mobile services providers, particularly in connection with customers' rights. These obligations require personal mobile services providers to:

establish at least one customer service center in each registration area served that has more than 100,000 inhabitants;

upgrade customer service centers to improve access by people with hearing disabilities;

increase the term applicable to pre-paid cards from 90 to 180 days or more;

deliver to pre-paid customers a detailed report of service use upon request;

## **Table of Contents**

reimburse unused pre-paid credits;

limit the duration of contracts with pre-paid customers to 12 months;

permit customers to change service plans without penalties; and

unlock mobile handsets, allowing a customer who purchased a mobile handset from any personal mobile services provider to use it on the network of another personal mobile services provider.

### ***Interconnection Regulations***

Under the General Telecommunications Law, all telecommunications service providers are required, if technically feasible, to make their networks available for interconnection on a non-discriminatory basis whenever a request is made by another telecommunications service provider. Interconnection permits a call originated on the network of a requesting fixed-line or personal mobile services provider's network to be terminated on the fixed-line or personal mobile services network of the other provider. ANATEL initially adopted General Rules on Interconnection (*Regulamento Geral de Interconexão*) in 1998, which were amended and restated in July 2005.

#### ***Interconnection Regulations Applicable to Fixed-Line Providers***

Interconnection fees are charged at a flat rate per minute of use of a fixed-line provider's network. Interconnection rates charged by a fixed-line provider to terminate a call on its local network (the TU-RL rate) or intercity network (the TU-RIU rate) are subject to a price cap established by ANATEL. The price cap for interconnection rates varies from service provider to service provider based on the underlying cost characteristics of such service provider's network.

Fixed-line service providers must offer the same TU-RL and TU-RIU rates to all requesting providers on a nondiscriminatory basis. The price caps on interconnection rates are adjusted annually by ANATEL at the same time that rates for local and long-distance rates are adjusted.

Fixed-line service providers are only required to pay interconnection fees to another fixed-line service provider for traffic in the same local area in the event that the ratio of the outbound traffic generated by that provider (measured in minutes) to the inbound traffic terminated by that provider (measured in minutes) exceeded 55% or was less than 45%. This system is designated the "bill and keep" system.

In 2007, the TU-RL rates of the fixed-line service providers were reduced to 40% of the rate included in their Basic Plan per Minute for a local fixed-line call. ANATEL announced that beginning in 2008, the method used to determine the TU-RL rates would be based on a cost methodology, known as long-run incremental costs. However, in October 2007, ANATEL published an official letter delaying this change until the end of 2010.

In 2006, the TU-RIU rates that fixed-line service providers could charge each other to use a portion of their long-distance networks to complete long-distance calls were reduced to 30% of the applicable domestic fixed line-to-fixed line long-distance rates for calls of more than 300 km.

#### ***Interconnection Regulations Applicable to Personal Mobile Services Providers***

Interconnection fees are charged at a flat rate per minute of use of a personal mobile services provider's network. The terms and conditions of interconnection agreements of all personal mobile services providers, including the rates charged by the operator of the network to terminate a call on its mobile network (the VU-M rate), commercial conditions and technical issues, are freely negotiated between mobile and fixed-line telecommunications service providers, subject to compliance with regulations established by ANATEL relating to traffic capacity and interconnection infrastructure that must be made available to requesting providers, among other things.

---

**Table of Contents**

Personal mobile services providers must offer the same VU-M rate to all requesting providers on a nondiscriminatory basis. Interconnection agreements must be approved by ANATEL before they become effective and they may be rejected if they are contrary to the principles of free competition and the applicable regulations. If the providers cannot agree upon the terms and conditions of interconnection agreements, ANATEL may determine terms and conditions by arbitration. Since no agreement with fixed-line service providers could be reached regarding VU-M rates when Brasil Telecom Mobile began offering personal mobile services, ANATEL set the initial VU-M rates for Brasil Telecom Mobile.

Personal mobile services providers negotiate annual rate increases for their VU-M charges with the fixed-line telecommunications providers. If the providers cannot agree upon the terms and conditions of annual rate increases, ANATEL may determine the annual rate increases by arbitration.

***Transition from Bill and Keep System to Full Billing System***

Prior to July 2006, a personal mobile services provider was only required to pay interconnection fees to another personal mobile services provider for traffic in the same registration area in the event that the ratio of the outbound traffic generated by that provider (measured in minutes) to the inbound traffic terminated by that provider (measured in minutes) exceeded 55% or was less than 45%.

In July 2006, ANATEL adopted new regulations under which personal mobile services providers recognize interconnection revenues (and costs) for traffic in the same registration area on a gross basis based on the total traffic between personal mobile services providers' networks. This system is designated the full billing system. These regulations also:

- require that personal mobile services providers adopt discounts to the VU-M rates for off-peak calls that correspond to the discounts required to be offered by fixed-line service providers; and

- provide that more stringent regulations applicable to interconnection between personal mobile services providers that are members of economic groups with significant market power will be adopted in order to ensure market competition.

***Regulation of Interconnection Rates Charged by Providers with Significant Market Power***

In 2005, ANATEL issued regulations defining a series of cost-based methods, including the fully allocated cost methodology, for determining interconnection fees charged by telecommunications service providers belonging to economic groups with significant market power based on their fixed-line or personal mobile services interconnection networks. All incumbent fixed-line service providers and all personal mobile services providers are deemed by ANATEL to belong to economic groups with significant market power in their respective service areas until ANATEL finalizes its evaluation of each provider under published criteria to determine significant market power. The criteria for those evaluations are still being discussed and are scheduled to be submitted for public comment by the end of 2010.

In July 2006, ANATEL issued regulations regarding the fees that may be charged for the use of mobile networks by personal mobile services providers with significant market power in the mobile interconnection market. The date on which these regulations will become effective has not yet been established by ANATEL. Under these regulations, ANATEL will determine, based on a fully allocated cost model, a reference value for VU-M rates of providers that are deemed to hold significant market power. This reference value will be reassessed every three years. In order to determine whether a provider has significant market power, ANATEL will establish criteria that consider:

- that provider's market share in the mobile interconnection market and in the personal mobile services market;

- the economies of scope and scale available to that provider;

- that provider's dominance over infrastructure that is not economically viable to duplicate;

## **Table of Contents**

the existence of that provider's power to negotiate the acquisition of equipment and services;

the existence of vertical integration in that provider's operations;

the existence of barriers to entry in the mobile interconnection market and the personal mobile services market served by that provider; and

that provider's access to financing sources.

In 2007, ANATEL developed a cost-based methodology that is expected to take effect in 2010 to determine reference values for the VU-M of mobile services providers having significant market power, which will be used in the case of arbitration by ANATEL of the value of VU-M. In 2008, mobile services providers began providing ANATEL with annual operating data, which is intended to support ANATEL's cost-based methods for determining interconnection fees.

### ***Number Portability Regulations***

Number portability is the ability of a customer to move to a new home or office or switch service providers while retaining the same fixed-line or mobile telephone number. In March 2007, ANATEL adopted the General Regulation of Portability (*Regulamento Geral de Portabilidade*), establishing the deadlines and general rules regarding portability of fixed-line and mobile telephone numbers. These regulations permit fixed-line customers to retain their telephone numbers if they become customers of a different fixed-line service provider in the same municipality or if they move to a new home or office in the same municipality. Personal mobile services customers are permitted to retain their telephone numbers if they change their service plan or if they become customers of a different personal mobile services provider within the same registration area. Implementation of number portability commenced in August 2008 and was completed in March 2009.

Each telecommunications provider has been required to contract a third-party management entity to manage all procedures relating to number portability. Service providers are permitted to charge a migrating customer that elects to retain its telephone number a one-time fee of no more than R\$4.00. This amount is intended to compensate the customer's current provider for the costs associated with managing the portability process. The new provider may elect to absorb this fee on behalf of the customer.

### ***Regulation of Data Transmission and Internet Services***

Under Brazilian regulation, ISPs are deemed to be suppliers of value-added services and not telecommunications service providers. Value-added services are considered an activity that adds features to a telecommunications service supported by such value-added services. Telecommunications service providers are permitted to render value-added services through their own networks. In addition, ANATEL regulations require all telecommunications service providers and cable television operators to grant network access to any party interested in providing value-added services, including internet access, on a non-discriminatory basis, unless not technically feasible.

ANATEL has adopted regulations applicable to fixed-line service providers with significant market power. Under these regulations, these providers are required to make the forms of agreements that they use for EILD and SLD services publicly available, including the applicable rates, and are only permitted to offer these services under these forms of agreement. Following publication of these forms of agreement, the rates under these agreements may be increased on an annual basis by no more than the rate of inflation, as measured by the IST. ANATEL also publishes reference rates for these services, and if a customer of one of these providers objects to the rates which that provider charges for these services, the customer is entitled to seek to reduce the applicable rate through arbitration before ANATEL.

**Table of Contents**

**Environmental and Other Regulatory Matters**

As part of our day-to-day operations, we regularly install ducts for wires and cables and erect towers for transmission antennae. We may be subject to federal, state and/or municipal environmental licensing requirements due to the installation of cables along highways and railroads, over bridges, rivers and marshes and through farms, conservation units and environmental preservation areas, among other places. As of the date of this annual report, we have been required to obtain environmental licenses for the installation of transmission towers and antennae in several municipalities with no material impact on our operations. However, there can be no assurances that other state and municipal environmental agencies will not require us to obtain environmental licenses for the installation of transmission towers and antennae in the future and that such a requirement would not have a material adverse effect on the installation costs of our network or on the speed with which we can expand and modernize our network.

We must also comply with environmental legislation regarding the management of solid waste. According to resolutions adopted by the National Environmental Council (*Conselho Nacional do Meio Ambiente*), companies responsible for the treatment and final disposal of solid industrial waste, special waste and solid urban waste are subject to environmental licensing. Should the waste not be disposed of in accordance with standards established by environmental legislation, the company generating such waste may be held jointly and severally liable with the company responsible for waste treatment for any damage caused. Also, in all states where we operate, we have implemented management procedures promoting the recycling of batteries, transformers and fluorescent lamps.

In addition, we are subject to ANATEL regulations that impose limits on the levels and frequency of the electromagnetic fields originating from our telecommunications transmissions stations.

We believe that we are in compliance with ANATEL standards as well as with all applicable environmental legislation and regulations. We are currently not involved in any administrative or judicial proceeding involving material liability for environmental damage.

**ITEM 4A. UNRESOLVED STAFF COMMENTS**

Not applicable.

**ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS**

*The following discussion of our financial condition and results of operations should be read in conjunction with our audited consolidated financial statements as of December 31, 2009 and 2008 and for the three years ended December 31, 2009, which are included in this annual report, as well as with the information presented under the sections entitled Presentation of Financial and Other Information and Item 3. Key Information Selected Financial Information.*

*The following discussion contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those discussed in the forward-looking statements as a result of various factors, including those set forth in Cautionary Statement with Respect to Forward-Looking Statements and Item 3. Key information Risk Factors.*

The following discussion and analysis of our financial condition and results of operations presents the following:

a brief overview of our company and the principal factors that influence its results of operations, financial condition and liquidity;

a review of our financial presentation and accounting policies, including our critical accounting policies;

a discussion of the principal factors that influence our results of operations;

a discussion of our results of operations for the years ended December 31, 2009, 2008 and 2007;

a discussion of our liquidity and capital resources, including our working capital at December 31, 2009, our cash flows for the years ended December 31, 2009, 2008 and 2007, and our material short-term and long-term indebtedness at December 31, 2009;

a discussion of our contractual commitments; and

a brief overview of the differences between Brazilian GAAP and U.S. GAAP as they relate to our financial statements.

**Overview**

We are the largest telecommunications service provider in Region II in Brazil, based on our aggregate number of fixed-lines in service and mobile subscribers as of December 31, 2009 and information available from ANATEL. We offer a range of integrated telecommunication services that includes fixed-line and mobile telecommunications services, data transmission services (including broadband access services), ISP services and other services, for residential customers, small, medium and large companies, and governmental agencies. In 2009, we recorded net operating revenue of R\$10,879 million and a net loss of R\$1,143 million.

Our results of operations for the years ended December 31, 2009, 2008 and 2007 have been influenced, and our future results of operations will continue to be influenced, by a variety of factors, including:

the acquisition of our company and Brasil Telecom Holding by Telemar and the subsequent corporate reorganization of the entities in that directly and indirectly controlled our company, which have resulted in (1) our incurring increased selling, general and administrative expenses relating to the integration of our operations into those of Telemar and the implementation of new mobile services plans as required by ANATEL, and (2) our incurring increased capital expenditures and the corresponding depreciation and amortization expenses as a result of the upgrading and integration of our infrastructure with that of Telemar;

**Table of Contents**

our recording significant provisions for contingencies during 2009, based on two court decisions that significantly changed the assumptions underlying our estimate of the potential losses in lawsuits relating to financial interest agreements;

the rate of growth of Brazilian GDP, which declined by 0.2% in 2009 and grew by 5.1% in 2008 and by 5.4% in 2007, which we believe affects demand for our services and, consequently, our operating revenues;

the number of our fixed lines in service, which declined to 7.7 million at December 31, 2009 from 8.1 million at December 31, 2008, and the percentage of our fixed-line customers that subscribe to our alternative plans, which increased by 33.3% to 5.6 million at December 31, 2009 from 4.2 million at December 31, 2008;

the number of our fixed-line customers that subscribe to our broadband services, which increased by 5.6% to 1.9 million at December 31, 2009 from 1.8 million at December 31, 2008;

the number of our mobile customers, which increased by 28.6% to 7.2 million at December 31, 2009 from 5.6 million at December 31, 2008;

the increased competition in the Brazilian market for telecommunications services, which affects the amount of the discounts that we offer on our service rates and the quantity of services that we offer at promotional rates, and resulted in a 123.9% increase in the amount that we recorded as discounts and returns against our gross operating revenues to R\$2,958 million in 2009 from R\$1,321 million in 2008;

the commencement of our offering of 3G services in Region II in April 2008, which we anticipate will result in a significant increase in our operating revenues, and has resulted in an increase our depreciation expenses relating to our investment in the network and other equipment required to offer these services;

inflation rates in Brazil, which were (0.31)% in 2009, 6.56% in 2008 and 3.17% in 2007, as measured by the IST, and the resulting adjustments to our regulated rates, as well as the effects of inflation on our *real*-denominated debt that is indexed to take into account the effects of inflation or bears interest at rates that are partially adjusted for inflation;

changes in regulatory requirements that result in our incurrence of additional capital expenditures, changes in the revenues we generate, or changes in the costs that we incur;

our compliance with our quality of service obligations under the General Plan on Quality Goals and our network expansion and modernization obligations under the General Plan on Universal Service and our concession agreements, the amount of the fines assessed against us by ANATEL for alleged failures to meet these obligations and our success in challenging fines that we believe are assessed in error;

changes in the *real*/U.S. dollar exchange rate, including the 22.5% appreciation of the Brazilian *real* against the U.S. dollar in 2009, the 31.9% depreciation of the Brazilian *real* against the U.S. dollar in 2008 and the 17.1% appreciation of the Brazilian *real* against the U.S. dollar in 2007, which has affected (1) our net financial expenses as a result of our U.S. dollar-denominated liabilities that require us to make principal and interest payments in U.S. dollars, and (2) the cost in *reais* of a substantial portion of the network equipment that we purchase for our capital expenditure projects, the prices of which are denominated in U.S. dollars or are U.S. dollar-linked; and

the level of our outstanding indebtedness and fluctuations in benchmark interest rates in Brazil, principally the CDI rate and the TJLP rate, which affects our interest expenses on our *real*-denominated floating rate debt.

## **Table of Contents**

Our financial condition and liquidity is influenced by a variety of factors, including:

our ability to generate cash flows from our operations;

prevailing Brazilian and international interest rates and movements in exchange rates, which affect our debt service requirements;

our ability to borrow funds from Brazilian and international financial institutions and to sell our debt securities in the Brazilian and international securities markets, which is influenced by a number of factors discussed below; and

our capital expenditure requirements, primarily consisting of (1) investments in infrastructure to expand our mobile telecommunications services, including the implementation of 3G technology, and (2) investments in fixed-line telecommunications network equipment, primarily to enhance the technical capabilities of our network in order to enable us to provide value-added services, such as broadband and IP TV services, and to comply with our universal service obligations.

### **Financial Presentation and Accounting Policies**

#### ***Presentation of Financial Statements***

We have prepared our consolidated financial statements at December 31, 2009 and 2008 and for the three years ended December 31, 2009 in accordance with Brazilian GAAP, which includes the changes introduced by Law No. 11,638/07 and Deliberation 565/08 and which differs in certain important respects from U.S. GAAP. For a discussion of certain differences between Brazilian GAAP and U.S. GAAP relating to our financial statements, see note 32 to our audited consolidated financial statements included in this annual report.

#### ***Effects of the Acquisition of our Company and Brasil Telecom Holding by Telemar and the Subsequent Corporate Reorganization***

On January 8, 2009, Copart 1, an indirect wholly-owned subsidiary of Telemar, acquired all of the outstanding shares of Invitel and 12,185,836 common shares of Brasil Telecom Holding owned by the shareholders of Invitel. As of January 8, 2009, Invitel owned all of the outstanding shares of Solpart, Solpart owned 19.0% of the outstanding share capital, including 52.0% of the voting share capital, of Brasil Telecom Holding, which, in turn, owned 67.2% of the outstanding share capital, including 99.1% of the voting share capital, of Brasil Telecom.

Prior to this acquisition Copart 1 owned 21.1% of the outstanding share capital of Brasil Telecom Holding and Copart 2, an indirect wholly-owned subsidiary of Telemar, owned 10.7% of the outstanding share capital of our company. In connection with this acquisition, on June 23, 2009:

Copart 1 acquired 40,452,227 common shares of Brasil Telecom Holding, representing 30.5% of the outstanding common shares of Brasil Telecom Holding and 11.2% of the outstanding share capital of Brasil Telecom Holding, through a public tender offer; and

Copart 2 acquired 630,872 of our common shares, representing 0.3% of our outstanding common shares and 0.1% of our outstanding share capital, through a public tender offer.

In anticipation of its corporate reorganization, on July 31, 2009, Telemar undertook the transactions described below, which we refer to collectively as the Intermediate Mergers, to eliminate the intermediate holding companies in the structure of its ownership of Brasil Telecom Holding and our company:

Invitel merged with and into Solpart, with Solpart as the surviving company;

Solpart merged with and into Copart 1, with Copart 1 as the surviving company;

Copart 1 merged with and into Brasil Telecom Holding, with Brasil Telecom Holding as the surviving company; and

---

**Table of Contents**

Copart 2 merged with and into Brasil Telecom, with Brasil Telecom as the surviving company.

As a result of these transactions, Coari directly owned (1) 54.7% of the outstanding share capital, including 91.7% of the outstanding voting share capital, of Brasil Telecom Holding, and (2) 10.9% of the outstanding share capital, including 0.3% of the outstanding voting share capital, of our company.

On September 30, 2009, Brasil Telecom Holding merged with and into Brasil Telecom. As a result of these transactions, at December 31, 2009, Coari owned 49.3% of the outstanding share capital, including 79.6% of the voting share capital, of Brasil Telecom.

Under Brazilian GAAP, Copart 1 and Copart 2 accounted for the Brasil Telecom Acquisition based on the proportional fair values of identifiable assets and liabilities acquired, including intangible assets and contingent liabilities, based on the participation acquired. Under Brazilian tax law, goodwill and the subsequent allocation of goodwill that is recorded by a holding company in connection with an acquisition is not tax deductible until the holding company is merged into the operating company that was acquired. Accordingly, at the date of the Brasil Telecom Acquisition, Copart 1 was not able to recognize a tax benefit for the deductible goodwill as part of purchase accounting. This tax benefit was only recognized after completion of the merger of Brasil Telecom Holding into Brasil Telecom.

Under Brazilian GAAP and pursuant to CVM regulations, because Copart 1 was used solely for the purpose of effecting the Brasil Telecom Acquisition, in connection with the Intermediate Mergers, Brasil Telecom Holding was only permitted to record (1) the property, plant and equipment of Copart 1 at the carrying values of Copart 1, reflecting the accounting for the Brasil Telecom Acquisition, and (2) the tax benefit of the intangible assets recognized in connection with the Brasil Telecom Acquisition that was attributable to Copart 1 based on the amount of expected tax benefit to be realized. These amounts were recorded as from the date of the Intermediate Mergers.

Under Brazilian GAAP and pursuant to CVM regulations, because Copart 2 was used solely for the purpose of effecting the Brasil Telecom Acquisition, in connection with the Intermediate Mergers, we were only permitted to record (1) the property, plant and equipment of Copart 2 at the carrying values of Copart 2, reflecting the accounting for the Brasil Telecom Acquisition, and (2) the tax benefit of the intangible assets recognized in connection with the Brasil Telecom Acquisition that was attributable to Copart 2 based on the amount of expected tax benefit to be realized. These amounts were recorded as from the date of the Intermediate Mergers. The tax benefit became realizable after the completion of the merger of Brasil Telecom Holding into our company, at which time we recorded the tax benefit.

Under Brazilian GAAP, we accounted for the merger of Brasil Telecom Holding into our company by (1) recording the property, plant and equipment of Brasil Telecom Holding at the carrying values recorded by Brasil Telecom Holding, reflecting the merger of Copart 1 into Brasil Telecom Holding, and (2) recording the tax benefit of the intangible assets recorded in connection with the Brasil Telecom Acquisition based on the amount of tax benefit realizable on the date of the merger of Brasil Telecom Holding into our company in accordance with specific CVM requirements.

Under U.S. GAAP, because Copart 1 controlled Invitel as from January 8, 2009 and was under common control with Copart 2, the mergers of Invitel into Solpart, Solpart into Copart 1, Copart 1 into Brasil Telecom Holding, Copart 2 into Brasil Telecom, each on July 31, 2009, and Brasil Telecom holding into Brasil Telecom on September 30, 2009 each represent reorganizations of entities under common control. As a result, these mergers were accounted for in a manner similar to a pooling-of-interests, whereby the financial statements of Brasil Telecom as the surviving entity are presented on a consolidated basis as from January 8, 2009, the period during which Copart 1, Copart 2 and Brasil Telecom were under common control, and include the assets and liabilities of Brasil Telecom at the historical carrying values recorded by Copart 1 and Copart 2. The historical carrying values of Copart 1 and Copart 2 reflect the purchase accounting recorded under U.S. GAAP in accordance with FASB Accounting Standard Codification ASC 805 Business Combinations, under which 100% of the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the subsidiaries of Invitel were recorded at their fair values on January 8, 2009. For periods prior to January 8, 2009, Brasil Telecom has determined that for U.S. GAAP purposes, Invitel is its predecessor entity.

## **Table of Contents**

Under Brazilian GAAP, the concept of the predecessor entity is not applied. Consequently, the reconciliation to U.S. GAAP of our net income and shareholders equity as of December 31, 2008 and for the two years then ended included in our audited financial statements reconciles our Brazilian GAAP net income and shareholders equity to those of Invitel. The reconciliation to U.S. GAAP of our net income and shareholders equity as of and for the year ended December 31, 2009 included in our audited financial statements reconciles our Brazilian GAAP net income and shareholders equity to the combined balances of Copart 1 and Copart 2, since the accounting basis of our assets and liabilities changed as a result of the acquisition of control of our company by Copart 1 and the subsequent mergers.

### ***Business Segments and Presentation of Segment Financial Data***

We have implemented an organizational structure that we believe reflects our business activities and corresponds to the principal services that we provide. We report our results in four segments to reflect this organizational structure:

*Fixed-Line and Data Transmission Services* This segment includes our local fixed-line services (including public telephones), our long-distance services, our data transmission services and interconnections to our fixed-line network.

*Mobile Services* This segment includes our mobile services and interconnections to our mobile network.

*Internet services* This segment includes the operations of our internet portal and ISP.

*Call center* This segment includes the operations of our call center.

We evaluate and manage business segment performance based on information generated from our statutory accounting records, which are maintained in accordance with Brazilian GAAP, and, accordingly, the segment data included in this annual report is presented under Brazilian GAAP. We have included a reconciliation of the operating results of our segments to our consolidated results under Results of Operations below.

### ***Critical Accounting Policies and Estimates***

In preparing our consolidated financial statements, we have relied on estimates and assumptions derived from historical experience and various other factors that we deemed reasonable and relevant. Critical Accounting Policies are those that are important to the portrayal of our financial condition and results of operations and utilize management's most difficult, subjective or complex judgments, estimates and assumptions. The application of these critical accounting policies often requires judgments made by our management regarding the effects of matters that are inherently uncertain on the carrying value of our assets and liabilities and the results of our operations. Our results of operations and financial condition may differ from those set forth in our consolidated financial statements, if our actual experience differs from management's assumptions and estimates. The following is a discussion of our critical accounting policies, including some of the variables, assumptions and sensitivities underlying the estimates relating to:

goodwill impairment;

revenue recognition;

allowance for doubtful accounts;

depreciation of property, plant and equipment;

valuation of property, plant and equipment;

provisions for contingencies;

**Table of Contents**

deferred income taxes;

provision for post-retirement benefits;

derivative transactions; and

amortization of intangible assets.

*Goodwill Impairment*

Under Brazilian GAAP, at each balance sheet date, we are required to review the carrying amounts of our tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, we estimate the recoverable amount of the cash-generating unit to which the asset belongs. Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss.

Under the terms of our operating concessions granted by the Brazilian government, we are obliged to provide a certain minimum level of services over the entire area covered by our fixed-line operating licenses. Also, we do not possess discrete financial information that could allow a determination of assets and liabilities (and goodwill) allocation at a level below the entire fixed-line business segment, nor do we manage different areas of the concession as if they were separate businesses. Thus the entire fixed-line business is considered to be one cash-generating unit. In viewing all of our fixed-line assets and liabilities as one cash-generating unit and performing an initial assessment on this cash-generating unit including such assumptions and estimates as we considered appropriate. For the mobile services, internet services and call center segments, we apply separate assessments for each cash-generating unit. We were not required to recognize an impairment loss under Brazilian GAAP for any of the periods presented.

Determination of the recoverable amount and the value in use of our cash-generating units (fixed-telephone, data transmission and internet) requires management to make certain assumptions and estimates with respect to projected cash inflows and outflows related to future revenues and expenditures and expenses. These assumptions and estimates can be influenced by different external and internal factors, such as economic tendencies, industry trends, and interest rates, changes in our business strategies and changes in the type of services we offer to the market. The use of different assumptions and estimates could significantly change our financial statements. For example, if we had used more conservative assumptions and estimates, the expected future net cash flow could have led us to recognize impairment charges on goodwill, which would have decreased our results of operations and shareholders' equity.

*Revenue Recognition*

Under Brazilian GAAP, revenues are generally recognized on an accrual basis. Revenues from customer calls are based on time used, according to Brazilian law, and are recognized when services are provided (fixed and mobile telephony). Services provided and not billed at the end of each month are estimated and recorded on an accrual basis. Revenues from pre-paid mobile services are recognized based on the use of the respective credits. Revenues from sales of mobile phones and accessories are recorded when the goods are delivered and accepted by the subscriber.

Under Brazilian GAAP, revenues from activation and installation fees are recognized upon activation of customer services. Revenue is not accounted for if there is an uncertainty as to its realization. Under Brazilian GAAP, revenues from public telephone phone cards are recognized when the cards are sold, considering their high

**Table of Contents**

turnover and short average life. We consider revenue recognition to be a critical accounting policy, because of the uncertainties caused by different factors such as the complex information technology required, high volume of transactions, fraud and piracy, accounting regulations, management's determination of collectability and uncertainties regarding our right to receive certain revenues (mainly revenues for use of our network). Significant changes in these factors could cause us to fail to recognize revenues or to recognize revenues that we may not be able to realize in the future, despite our internal controls and procedures. We have not identified any significant need to change our revenue recognition policy.

*Allowance for Doubtful Accounts*

Under Brazilian GAAP, prior to January 1, 2009, we provided an allowance for doubtful accounts for accounts receivables for which recoverability is considered doubtful. We base our estimates on our historical collection experience and a review of the current status of all trade accounts receivable. This estimate considers the ratio of historical losses applied to the different categories of all outstanding amounts receivable from our customers. Additional allowance may be required in case the value of our estimated allowance for doubtful accounts differs from the amounts not actually collected due to deterioration in the financial condition of our customers or otherwise.

Following Telemar's acquisition of control of our company on January 8, 2009, we have adopted the same accounting estimate method with respect to this provision as Telemar has adopted. Under this accounting estimate method, we establish a provision in order to recognize probable losses on accounts receivable and take into account limitations we impose on services to customers with past-due accounts and actions we take to collect delinquent accounts, beginning when the account is either 60 days past due for the fixed-line segment or 15 days past due for the mobile services segment, as follows:

		%
		<b>Provisioned</b>
		<b>Loss</b>
<b>Fixed-Line Segment Outstanding Bills</b>	<b>Service Restriction/Collection Process</b>	
Over 30 and up to 60 days	Restriction on making calls/collection	Zero
Over 61 and up to 90 days	Restriction on making and receiving calls/collection	40
Over 91 and up to 120 days	Shut-off after 15-day warning/collection	60
Over 121 and up to 150 days	Outsourced collection	80
Over 151 days	Outsourced collection	100
		%
		<b>Provisioned</b>
		<b>Loss</b>
<b>Mobile Services Segment Outstanding Bills</b>	<b>Service Restriction/Collection Process</b>	
Over 15 and up to 30 days	Partial service restriction/collection	Zero
Over 31 and up to 60 days	Restriction on making and receiving calls/collection	Zero
Over 61 and up to 90 days	Shut-off after 15-day warning/collection	40
Over 91 and up to 120 days	Outsourced collection	60
Over 121 and up to 150 days	Outsourced collection	80
Over 151 days	Outsourced collection	100

As a result of this change in accounting estimate method, we recorded a change in accounting estimate in the amount of R\$38 million, net of income taxes, during the year ending December 31, 2009.

*Depreciation of Property, Plant and Equipment*

Under Brazilian GAAP, depreciation of property, plant and equipment is calculated using the straight-line method based on the estimated useful lives of the underlying assets. The principal depreciation rates are shown in note 18 to our audited consolidated financial statements included in this annual report. Given the complex nature of our property, plant and equipment, the estimates of useful lives require considerable judgment and are inherently

---

## **Table of Contents**

uncertain, due to rapidly changing technology and industry practices, which could cause early obsolescence of our property, plant and equipment. If we materially change our assumptions of useful lives and if external market conditions require us to determine the possible obsolescence of our property, plant and equipment, our depreciation expense, obsolescence write-off and consequently net book value of our property, plant and equipment could be materially different.

As a result of the merger of Brasil Telecom Holding into our company, we modified our estimate of the useful life of our property, plant and equipment as from September 30, 2009 based on a valuation report prepared by an independent expert company. See note 18 to our audited consolidated financial statements included in this annual report.

### *Valuation of Property, Plant and Equipment*

The preparation of our financial statements in accordance with Brazilian GAAP involves certain assumptions and estimates, which are based upon historical experience and various other factors that we deem reasonable and relevant. A determination of the fair value of an asset requires management to make certain assumptions and estimates with respect to projected cash inflows and outflows related to future revenues and expenditures and expenses. These assumptions and estimates can be influenced by different external and internal factors, such as economic tendencies, industry trends, interest rates and changes in the marketplace. The use of different assumptions and estimates could significantly change our financial statements. For example if we had used more conservative assumptions and estimates the expected future net cash flow may have led us to recognize impairment charges on our property, plant and equipment, which would have decreased our results of operations and shareholders' equity. No impairment losses have been recognized for any of the periods presented.

### *Provisions for Contingencies*

Under Brazilian GAAP, provisions for contingencies are recognized for the amounts of probable losses based on legal advice from our in-house and external legal counsel and management's opinion of the outstanding contingent matters at the balance sheet date. We continually evaluate the provisions for contingencies based on changes in relevant facts, circumstances and events, such as judicial decisions, that may impact the estimates, which could have a material impact on our results of operations and shareholders' equity. While management believes that the current provision for contingencies is adequate, there can be no assurance that these factors will not change in the future.

As the result of Telemar's acquisition of control of our company in January 2009, we have changed our criteria for estimating probable losses in connection with labor proceedings and the recognition of Tax on the Circulation of Merchandise and Services (*Imposto Sobre a Circulação de Mercadorias e Serviços*), or ICMS (a state value-added tax on sales and services), tax credits in order to align our policies with those of Telemar. As a result, we have recorded additional provisions for labor proceedings and tax proceedings in 2009 in the amount of R\$334 million and R\$387 million, respectively.

### *Deferred Income Taxes*

We compute and pay income taxes based on results of operations under Brazilian GAAP. Under Brazilian GAAP, we recognize deferred tax assets and liabilities based on the differences between the financial statement carrying amounts and the tax bases of assets and liabilities. We regularly review the deferred tax assets for recoverability and establish a valuation allowance if it is more likely than not that the deferred tax assets will not be realized, based on historical taxable income, projected future taxable income, and the expected timing of the reversals of existing temporary differences. When performing such reviews, we are required to make significant estimates and assumptions about future taxable income. In order to determine future taxable income, we need to estimate future taxable revenues and deductible expenses, which are subject to a variety of external and internal factors, such as economic tendencies, industry trends, interest rates, changes in our business strategies and changes in the type of services we offer to the market. The use of different assumptions and estimates could significantly change our financial statements. For example, if we had used more conservative assumptions and estimates with respect to our expected future taxable income, we would be required to recognize valuation allowance charges on deferred income tax assets, which would decrease our results of operations and shareholders' equity. If we operate at

---

## **Table of Contents**

a loss or are unable to generate sufficient future taxable income, or if there is a material change in the actual effective tax rates, the time period within which the underlying temporary differences become taxable or deductible, or our future projections, we could be required to establish a valuation allowance against all or a significant portion of our deferred tax assets resulting in a substantial increase of our effective tax rate and a material adverse impact on our operating results.

### *Provision for Post-Retirement Benefits*

We are required to make assumptions and estimates regarding interest rates, investment returns, levels of inflation for future periods, mortality rates and projected employment levels relating to post-retirement benefit liabilities. The accuracy of these assumptions and estimates will determine whether we have created sufficient reserves for accrued pension and medical health care costs and the amount we are required to provide each year as our post-retirement benefit costs. These assumptions and estimates are subject to significant fluctuations due to a variety of external and internal factors, such as economic trends, social indicators, our capacity to create new jobs and our ability to retain our employees. If these assumptions and estimates are not accurate, we may be required to review our provisions for post-retirement benefits, which could materially reduce our operating income, net income and shareholders' equity.

Following Telemar's acquisition of control of our company on January 8, 2009, we adopted an accounting policy in the last quarter of 2009 with respect to our provisions for post-retirement benefits that conforms to Telemar's accounting policy. Under this accounting policy, we now use the corridor method to defer actuarial gains and losses on pension plan assets and obligations. As a result, based on future actuarial reports, we recognize actuarial gains or losses based on the corridor method in the end of fiscal year 2009.

### *Derivative Transactions*

As of December 31, 2009, we had loans and financing (including debentures and swap adjustments) subject to floating interest rates, which totaled 92.1% of our total indebtedness, based on (1) TJLP, the CDI rate and IPCA in the case of *real*-denominated indebtedness, (2) LIBOR in the case of U.S. dollar- and Japanese Yen-denominated indebtedness, and (3) a foreign currency basket in the case of the foreign currency portion of our credit facilities with the Brazilian National Bank for Economic and Social Development (*Banco Nacional de Desenvolvimento Econômico e Social*), or BNDES.

As of December 31, 2009, 12.0% of our total indebtedness bore interest based on U.S. dollar or Japanese Yen LIBOR. Giving effect to our hedging transactions (including interest rate swaps and currency swaps) in respect of this indebtedness, 7.5% of our total indebtedness as of December 31, 2009 was exposed to variations in those rates.

Gains or losses from cross-currency interest rate swap operations are determined and recorded on a monthly basis by comparing contractual exchange rates to month-end exchange rates, when applicable, regardless of the terms of settlement in the applicable derivatives contract.

Our foreign currency loans and financings, including gains or losses on swap agreements, totaled R\$729 million and R\$1,103 million at December 31, 2009 and 2008, respectively.

In the past, we have used derivative contracts (swaps, options and forwards) to swap our foreign currency risks. Currently, most of our derivative contracts are cross-currency interest rate swaps under which an obligation denominated in foreign currency is exchanged for a *real*-denominated obligation bearing interest at the CDI rate. Gains or losses on swap transactions have the effect of reducing or increasing foreign currency indebtedness and will be deemed as effective for purposes of Brazilian GAAP if we maintain these agreements until their maturity.

While the exchange rate variations affect our indebtedness and our financial results, gains and losses on these derivative contracts are recognized in our statement of income under interest expense. Gains and losses due to changes in fair value of our derivative contracts also recognized.

---

## **Table of Contents**

As a result of the adoption of Law No. 11,638/07 and Deliberation 565/08, for periods beginning on or after January 1, 2009, we are required to record investments in financial instruments, including derivatives, at (1) fair value or the equivalent value for securities held for trading or securities available-for-sale, or (2) the lower of historical cost, adjusted for contractual interest and other contractual provisions, and realizable value for other investments.

### *Amortization of Intangible Assets*

Intangible assets consist primarily of authorizations to provide personal mobile services and radio frequency licences, licenses to use software and goodwill on the acquisition of investments, which is calculated based on expected future economic benefits.

Amortization of intangible assets, other than goodwill, is calculated under the straight-line method over (1) the effective term of the authorization to provide personal mobile services or of the radio frequency licence, or (2) over a maximum period of five years in the case of software licenses.

As a result of the adoption of Law No. 11,638/07 and Deliberation 565/08, for periods beginning on or after January 1, 2009, we do not amortize goodwill in our consolidated statements of income and we are required to test goodwill for impairment on an annual basis.

## **Principal Factors Affecting our Financial Condition and Results of Operations**

### *Effects of the Acquisition of Our Company and Brasil Telecom Holding by Telemar*

As the result of Telemar's acquisition of control of our company in January 2009, we changed our criteria for estimating probable losses in connection with labor proceedings and the recognition of ICMS tax credits, in order to align our policies with those of Telemar. These changes resulted in our recording additional provisions for labor proceedings and tax proceedings in 2009 in the amount of R\$334 million and R\$387 million, respectively.

In addition, as the result of certain judicial decisions in 2009, we have reclassified the probability of loss in certain civil proceedings involving Companhia Riograndense de Telecomunicações, or CRT, the leading fixed-line telecommunications service company in the State of Rio Grande do Sul that we acquired in July 2000, from possible to probable. With the assistance of our internal and external legal advisors, we revised our estimate of the amount of provisions for civil contingencies in connection with the financial participation agreements entered into in connection to the expansion plans of CRT, considering aspects of the process we use to estimate the amount of provisions for civil contingencies related to the dates and discussions that guided the final decisions of the proceedings, as well as the use of statistical criteria to estimate the amount of the provisions for contingencies. As a result, the provision for civil contingencies in connection with the financial participation agreements entered into in connection to the expansion plans of CRT was increased by R\$2,325 million. For additional information regarding these suits, see Item 8. Financial Information - Legal Proceedings - Civil Claims.

### *Rate of Growth of Brazil's Gross Domestic Product and Demand for Telecommunications Services*

As a Brazilian company with substantially all of our operations in Brazil, we are affected by economic conditions in Brazil. GDP in Brazil contracted by 0.2% in 2009, and grew by 5.1% in 2008 and 5.4 in 2007. While we believe that growth in Brazil's GDP stimulates demand for telecommunications services, we believe that demand for telecommunications services is relatively inelastic in periods of economic stagnation and that the effect on our revenues of low growth or a recession in Brazil would not be material under foreseeable scenarios. However, a substantial and prolonged deterioration of economic conditions in Brazil could have a material adverse effect on the number of subscribers to our services and the volume of usage of our services by our subscribers and, as a result, our operating revenues.

Based on information available from ANATEL, the number of fixed lines in service in Brazil increased from 25.0 million as of December 31, 1999 to 41.5 million as of December 31, 2009, and the number of mobile subscribers in Brazil increased from 15.0 million as of December 31, 1999 to 174.0 million as of December 31, 2009.

---

**Table of Contents**

Although the demand for telecommunications services has increased substantially during the past ten years, the tastes and preferences of Brazilian consumers of these services have shifted. During the three years ended December 31, 2009, the number of mobile subscribers in Brazil has grown at an average rate of 20.0% per year while the number of fixed lines in service in Brazil has increased by an average rate of 2.7% per year. As the incumbent provider of fixed-line services and a provider of mobile services in Region II, we are both a principal target and a beneficiary of this trend. During the three years ended December 31, 2009, the number of our mobile subscribers has grown at an average rate of 108.8% per year from 3.4 million at December 31, 2006 to 7.1 million at December 31, 2009, while the number of our fixed-lines in service has declined by an average rate of 8.3% per year from 8.4 million at December 31, 2006 to 7.7 million at December 31, 2009.

***Demand for Our Telecommunications Services******Demand for Our Local Fixed-Line Services***

Brazil's fixed-line penetration level is now similar to that of other countries with similar per capita income, and, as has happened in such other countries, the fixed-line telecommunications customer base has remained stable. Demand for our local fixed-line services has reached a plateau in recent years. The new fixed lines that we have activated between December 31, 2006 and December 31, 2009 generally represent customers that have changed addresses or low-income customers from whom we generate revenues at a rate below our average revenue per customer. Because the number of our customers terminating their fixed-line services has exceeded new activations during this period, the number of our fixed lines in service declined by 0.7 million since December 31, 2006.

We have sought to combat the general trend in the Brazilian telecommunications industry of substitution of mobile services in place of local fixed-line services by offering value-added services to our fixed-line customers, primarily subscriptions for broadband services. As a result of these service offerings, we expect that the number of our fixed lines in service will remain stable or decrease slightly in the near future. As of December 31, 2009, 24.7% of our fixed lines in service also subscribed for ADSL service and 1.0% of our local fixed-line customers subscribed for bundled service packages.

We are required under ANATEL regulations and our concession contracts to offer a basic service plan to our fixed-line residential customers that permits 200 minutes of usage of our fixed-line network to make local calls. A basic plan customer pays a monthly fee for this service, and when the customer makes local calls in excess of this limit, we charge the customer for the excess minutes on a per-minute basis. We offer alternative local fixed-line plans that include significantly larger numbers of minutes and charge higher monthly fees for these plans, although these monthly fees represent a discount from the amount that the customer would be charged under our basic plan if the customer used the number of minutes included in the alternative plan. As the number of our customers selecting these alternative plans has grown in response to our marketing and promotional efforts, we have recorded increased revenues for monthly subscription fees, offset by declines in revenues for the use of excess minutes. Subscribers to our alternative fixed-line plans, which we began offering in the second quarter of 2006, represented 77.0% of our fixed lines in service at December 31, 2009. We believe that our alternative local fixed-line plans contribute to a net increase in our local fixed-line revenue as many subscribers of our alternative fixed-line plans do not use their full monthly allocations of local minutes.

The substantial increase in the number of mobile service users in Brazil has also negatively impacted the use of our public telephones. As the incumbent local fixed-line service provider in Region II, we are required under ANATEL regulations and our concession contracts to meet specified targets with respect to the availability of public telephones throughout our concession area. However, as a larger portion of the population of Region II uses mobile handsets to make calls when not in proximity to a fixed-line telephone, use of our public telephones has declined by 34.9% from 2006 to 2009.

***Demand for Our Mobile Services***

We believe that the primary reason that our customer base for mobile services in Region II has grown from 3.4 million at December 31, 2006 to 7.1 million at December 31, 2009 has been the success of our marketing and promotion campaigns. In addition, we believe that the rebranding of our mobile services and the launch of new services as part of our effort to align our service offerings with those of Telemar has been a principal factor in the increase in the number of our mobile customers in Region II from 5.6 million as of December 31, 2008 to 7.2 million as of December 31, 2009.

## **Table of Contents**

The market for mobile services is extremely competitive in each of the regions that we serve. During 2009, our average monthly churn rate in the mobile services segment, representing the number of subscribers whose service is disconnected during each month, whether voluntarily or involuntarily, divided by the number of subscribers at the beginning of such month, was 4.5% per month. As a result, (1) we incur selling expenses in connection with marketing and sales efforts designed to retain existing mobile customers and attract new mobile customers, and (2) from time to time the discounts that we offer in connection with our promotional activities lead to charges against our gross operating revenues from mobile services. In addition, competitive pressures have in the past required us to introduce service plans under which the monthly and per-minute rates that we charge our mobile customers are lowered, reducing our average revenue per customer.

We expect our overall mobile services business to continue to grow in terms of its customer base, traffic volumes and revenues from value-added services. However, due to market saturation, we expect future growth in our mobile services business in Region II to occur at lower rates than we have historically achieved.

### *Demand for Our Data Transmission Services*

Our broadband services customer base in Region II has grown from 1.3 million at December 31, 2006 to 1.9 million at December 31, 2009. We believe that this growth has resulted from (1) our marketing and promotional campaigns, (2) the growth in the number of households in Region II that own personal computers, and (3) a shift in consumer preferences that has led an increasing number of our fixed-line customers to value the data transmission speeds available through our broadband services. We expect the number of our fixed-line customers that subscribe to our broadband services to continue to increase in the near term. However, if the current international economic downturn leads to low growth or a recession in Brazil, the rate of growth of computer ownership in Brazil may decline and, consequently, the rate of growth of our broadband services customer base may be adversely affected.

### *Effects of Competition on the Rates that We Realize and the Discounts We Record*

The Brazilian telecommunications industry is highly competitive. The competitive environment is significantly affected by key trends, including the following:

*Technological and service convergence:* The convergence of technology and services enables telecommunications service providers that were previously limited to providing a single service to provide services in other industry segments, such as in the case of broadband services provided by cable television service providers and by mobile service providers (using 3G technology) and in the case of traditional fixed-voice services transmitted by mobile telecommunications service providers.

*Consolidation:* Consolidation has taken place in the telecommunications industry throughout Latin America, including Brazil. This consolidation has led to the formation of large conglomerates that benefit both from economies of scale and the ability to undertake coordinated action across different industry segments, which provide them with competitive advantages in an environment that is also characterized by the convergence of media and telecommunications services.

*Bundled service offerings:* Telecommunications service providers have begun to offer bundled service packages that they are unable to offer independently. For example, in 2005 Embratel, our principal competitor in fixed-line services, and Net, our principal competitor in broadband services, each of which is controlled by Telmex, entered into an agreement pursuant to which they began to offer jointly to the Brazilian residential market an integrated voice, broadband and subscription television service package.

In response to these competitive pressures, (1) we may offer our services at rates below the rate caps established by ANATEL, and (2) from time to time we offer our services with promotional discounts or offer additional complimentary services with the purchase of some of our services. We record the services sold at the rates established under our service plans or at rates approved by ANATEL and record the amount of these services represented by the promotional discounts or delivered on a complimentary basis as discounts and returns in our income statement.

## **Table of Contents**

### ***Launch of 3G services***

In December 2007, we acquired the authorizations and radio frequency licenses necessary for us to commence the offering of 3G services throughout Region II. During 2008, we commenced capital expenditure projects to acquire and install the network equipment necessary to offer these services. In addition, we engaged in marketing and promotional campaigns in connection with the launch of these services in April 2008.

During the fourth quarter of 2008 and the year ended December 31, 2009, we activated approximately 85,000 and approximately 54,000 accounts for 3G services in Region II, respectively. We expect that these services will generate significant additions to our mobile customer base and lead to long-term increases in our revenues and operating income.

The cost of these authorizations and radio frequency licenses was R\$448 million, which we will pay to ANATEL in installments through 2015. During 2008 and 2009, we made investments in the network equipment necessary to offer these services, which contributed to an increase in our depreciation expenses for 2008 and 2009 and will continue to do so during the next several years. We financed the purchase and installation of this network equipment through vendor financing, which has contributed to the increase of our net financial expenses during 2008 and 2009.

Under our 3G radio frequency licenses, we are required to meet certain service expansion obligations that will require capital expenditures through 2015. If we are unable to fund these capital expenditures through our operating cash flows, we may incur additional indebtedness or vendor financing obligations, which would increase our outstanding indebtedness and net financial expenses.

### ***Effects of Adjustments to Our Regulated Rates and Inflation***

Brazilian telecommunications services rates are subject to comprehensive regulation by ANATEL. Our rates for local fixed-line services, domestic long-distance services, mobile services, interconnection to our fixed-line network, and EILD and SLD services are subject to regulation by ANATEL. We are required to obtain ANATEL approval prior to offering new alternative fixed-line or mobile plans. The rates established or approved by ANATEL for our services act as caps on the prices that we charge for these services, and we are permitted to offer these services at a discount from the rates approved by ANATEL. After ANATEL establishes or approves rate caps for these services, these rate caps are subject to annual adjustment based on the rate of inflation, as measured by the IST. Rate caps for local fixed-line plans are adjusted by inflation, as measured by the IST, less an amount that serves as a proxy for productivity gains achieved by our company and the local fixed-line services industry as a whole.

Because substantially all of our cost of services and operating expenses are incurred in *reais* in Brazil, these rate increases act as a natural hedge against inflation and, as a result, our operating margins have not been materially affected by inflation. However, because these rate adjustments are only made on an annual basis, in periods of severe inflation, we may not be able to pass our increased costs through to our customers as incurred.

A significant portion of our *real*-denominated debt bears interest at the TJLP or the CDI rate, which are partially adjusted for inflation, and, as a result, inflation results in increases in our financial expenses and debt service obligations.

---

**Table of Contents**

***Effects of Changes in Regulatory Requirements***

Compliance with new regulations applicable to the telecommunications industry that are adopted by ANATEL from time to time and compliance with the obligations included in our concession contracts that were entered into in 2006 have required us to make capital expenditures, affected the revenues that we generate and imposed additional costs of service on our company. For example:

Our concession agreements that became effective at the beginning of 2006 required us to convert our system of billing local fixed-line usage from a system based on the usage of pulses to a system based on the usage of minutes by July 2007. As a result of the conversion of local fixed-line traffic from pulses to minutes, we are not able to accurately compare the volume of local fixed-line traffic between the years ended December 31, 2008 and 2007.

In March 2007, ANATEL adopted number portability regulations requiring us to permit our mobile and fixed-line customers to maintain their telephone numbers if they change service providers. Implementation of the systems necessary to comply with this regulation required us to make capital expenditures in the aggregate amount of R\$221 million. Implementation of these systems was completed in March 2009. We have not observed any material effects on our revenues directly related to the implementation of number portability.

ANATEL delayed its approval of the annual increases of our VC1, VC2 and VC3 rates, which are usually approved in July of each year, from July 2009 to February 2010. As a result, we were delayed in the implementation of these rate increases, which had an adverse effect on our revenue during this period.

***Effects of Claims by ANATEL that Our Company Has Not Fully Complied with Our Quality of Service and Other Obligations***

As a fixed-line service provider, we must comply with the provisions of the General Plan on Quality Goals. As a public regime service provider, we must comply with the network expansion and modernization obligations under the General Plan on Universal Service and our concession agreements. Our personal mobile services authorizations set forth certain network expansion obligations and targets and impose obligations on us to meet quality of service standards. In addition, we must comply with regulations of general applicability promulgated by ANATEL, which generally relate to quality of service measures.

If we fail to meet quality goals established by ANATEL under the General Plan on Quality Goals, fail to meet the network expansion and modernization targets established by ANATEL under the General Plan on Universal Service and our concession agreements, fail to comply with our obligations under our personal mobile services authorizations or fail to comply with our obligations under other ANATEL regulations, we may be subject to warnings, fines, intervention by ANATEL, temporary suspensions of service or cancellation of our concessions and authorizations.

On an almost weekly basis, we receive inquiries from ANATEL requiring information from us on our compliance with the various service obligations imposed on us by our concession agreements. If we are unable to respond satisfactorily to those inquiries or comply with our service obligations under our concession agreements, ANATEL may commence administrative proceedings in connection with such noncompliance. We have received numerous notices of commencement of administrative proceedings from ANATEL, mostly due to our inability to achieve certain targets established in the General Plan on Quality Goals and the General Plan on Universal Service.

At the time that ANATEL notifies us it believes that we have failed to comply with our obligations, we evaluate the claim and, based on our assessment of the probability of loss relating to that claim, may establish a provision. We vigorously contest a substantial number of the assessments made against us. As of December 31, 2009, the total estimated contingency in connection with all pending administrative proceedings brought by ANATEL against us in which we deemed the risk of loss as probable totaled R\$201 million and we had recorded an aggregate provision related to these proceedings in the same amount.

During the year ended December 31, 2009, we recorded provisions related to administrative proceedings brought by ANATEL in the amount of R\$201 million. Our provisions related to administrative proceedings brought by ANATEL generally have been sufficient to pay all amounts that we were ultimately required to pay with respect to claims brought by ANATEL.

## **Table of Contents**

### ***Effects of Fluctuations in Exchange Rates between the Real and the U.S. Dollar or Japanese Yen***

Substantially all of our cost of services and operating expenses are incurred in *reais* in Brazil. As a result, the appreciation or depreciation of the *real* against the U.S. dollar does not have a material effect on our operating margins. However, the costs of a substantial portion of the network equipment that we purchase for our capital expenditure projects are denominated in U.S. dollars or are U.S. dollar-linked. This network equipment is recorded on our balance sheet at its cost in *reais* based on the applicable exchange rate on the date the transfer of ownership, risks and rewards related to the purchased equipment occurs. As a result, depreciation of the *real* against the U.S. dollar results in this network equipment being more costly in *reais* and leads to increased depreciation expenses. Conversely, appreciation of the *real* against the U.S. dollar results in this network equipment being less costly in *reais* and leads to lower depreciation expenses.

Our consolidated U.S. dollar-denominated and Japanese Yen-denominated indebtedness represented 8.0% and 2.7%, respectively, of our outstanding indebtedness at December 31, 2009. As a result, when the *real* depreciates against the U.S. dollar or the Japanese Yen:

the interest costs on our U.S. dollar- or Japanese Yen-denominated indebtedness increase in *reais*, which negatively affects our results of operations in *reais*;

the amount of our U.S. dollar- or Japanese Yen-denominated indebtedness increases in *reais*, and our total liabilities and debt service obligations in *reais* increase; and

our net financial expenses tend to increase as a result of foreign exchange losses that we must record.

An appreciation of the *real* against the U.S. dollar has the converse effects.

In order to mitigate the effects of foreign exchange variations, we have established a hedging policy. At December 31, 2009, we had entered into hedging transactions in respect of 39.4% of our indebtedness affected by exchange rate variations. The purpose of these hedging transactions is to seek to match the currency of our debt with that of our revenues to mitigate foreign exchange risk.

### ***Effect of Level of Indebtedness and Interest Rates***

At December 31, 2009, our total outstanding indebtedness on a consolidated basis, excluding swap adjustments, was R\$4,443 million. The level of our indebtedness results in significant financial expenses that are reflected in our statement of operations. Financial expenses consist of interest expense, exchange variations of U.S. dollar- and other foreign currency-denominated debt, foreign exchange losses or gains, and other items as set forth in note 3(s) to our audited consolidated financial statements included in this annual report. In 2009, we recorded total financial expenses of R\$857 million, of which R\$346 million consisted of interest expenses on our debentures, loans and financings and R\$99 million consisted of losses on derivative transactions that we had entered into to reduce our exposure to exchange rate and interest rate movements, the effects of which were partially offset by a R\$186 million gain from monetary and exchange rate variations on loans and financings. The interest rates that we pay depend on a variety of factors, including prevailing Brazilian and international interest rates and risk assessments of our company, our industry and the Brazilian economy made by potential lenders to our company, potential purchasers of our debt securities and the rating agencies that assess our company and its debt securities.

Standard & Poor's and Fitch maintain ratings of our company and our debt securities and Moody's maintains ratings of our company. Any ratings downgrades in the future would likely result in increased interest and other financial expenses relating to borrowings and debt securities and could adversely affect our ability to obtain such financing on satisfactory terms or in amounts required by us.

### ***Seasonality***

Our telecommunications services are generally not affected by major seasonal variations of the market, except for the first quarter of the year, when economic activity is generally reduced in Brazil.

**Table of Contents****Results of Operations**

The following discussion of our results of operations is based on our consolidated financial statements prepared in accordance with Brazilian GAAP.

The following tables set forth the operating results of each of our segments and the reconciliation of these results of our segments to our consolidated results of operations. This segment information was prepared on the same basis as the information that our senior management uses to allocate resources among segments and evaluate their performance. We evaluate and manage the performance of our segments based on information generated from our statutory accounting records maintained in accordance with Brazilian GAAP and reflected in our consolidated financial statements.

(1) Excludes the effect of interest on shareholders' equity of R\$324 million in 2008.

**Operating Revenues**

The composition of gross operating revenues by category of service before deduction of value-added and other indirect taxes and discounts is presented in our financial statements and discussed below. We do not determine net operating revenues for each category of service as we do not believe such information to be useful to investors.

Gross operating revenues increased by 4.5% in 2009, principally due to a 5.6% increase in gross operating revenues of our fixed-line and data transmission services segment and a 39.0% increase in gross operating revenues of our call center segment. The effects of these increases were partially offset by a 10.6% decline in gross operating revenues of our internet segment. Gross operating revenues generated by intersegment sales, which are eliminated in the consolidation of our financial statements, increased by 9.2% in 2009.

Net operating revenues declined by 6.1% in 2009, principally due to a 7.7% decline in net operating revenues of our fixed-line and data transmission services segment, the effects of which were partially offset by a 40.0% increase in net operating revenues of our call center services segment. Net operating revenues generated by intersegment sales, which are eliminated in the consolidation of our financial statements, declined by 1.2% in 2009.

**Table of Contents****Operating Revenue of Our Fixed-Line and Data Transmission Services Segment**

The following table sets forth the components of the gross and net operating revenues of our fixed-line and data transmission services segment, as well as the percentage change from the prior year, for the years ended December 31, 2008 and 2009.

	Year Ended December 31,		
	2008	2009	% Change
	(in millions of reais, except percentages)		
<b>Local services:</b>

<b>Net operating revenue</b>	<b>R\$ 10,171</b>	<b>R\$ 9,389</b>	(7.7)

Gross operating revenues of our fixed-line and data transmission services segment increased by 5.6% in 2009, principally due to:

a 27.3% increase in gross operating revenues from data transmission services; and

to a lesser extent, a 7.2% increase in gross operating revenue from other fixed-line services and a 7.1% increase in gross operating revenue from remuneration for the use of our fixed-line network.

The effects of these increases were partially offset by:

a 10.9% decline in gross operating revenue from long-distance services; and

---

**Table of Contents**

a 1.1% decline in gross operating revenues from local services.

*Gross Operating Revenues from Local Services*

Gross operating revenues from local fixed-line services declined by 1.1% in 2009, primarily due to a 19.4% decline in gross operating revenues from metered services and a 5.6% decline in gross operating revenue from local fixed-to-mobile traffic, the effects of which were partially offset by a 5.8% increase in gross operating revenues from monthly subscription fees.

*Monthly Subscription Fees*

Gross operating revenues from monthly subscription fees increased by 5.8% in 2009, primarily as a result of (1) a 33.3% increase in the number of subscriptions to our alternative plans to 5.6 million at December 31, 2009 from 4.2 million at December 31, 2008, and (2) rate increases for our basic service plans of 3.01% in July 2008 and 0.98% in October 2009, and (3) rate increases for our alternative plans that reflected increases in inflation of 3.01% in 2008 and 0.98% in 2009, as measured by the IST. The effects of these increases were partially offset by a 4.9% decline in the number of lines in service to 7.7 million at December 31, 2009 from 8.1 million at December 31, 2008.

*Metered Services*

Gross operating revenues from metered services charges declined by 19.4% in 2009, principally due to the 23.6% decline in total billed minutes, which are the number of local minutes that exceed the monthly allowance under a customer's service plan, primarily as a result of (1) the migration of our fixed-line customers from our basic service plans to our alternative plans that have higher monthly allowances of minutes, and (2) the migration of local traffic origination to mobile handsets as callers take advantage of mobile plans and promotions under which mobile service providers offer mobile-to-mobile minutes within their networks at rates that are lower than fixed-to-mobile minutes. The effects of this decline were partially offset by rate increases for metered services of 3.01% in July 2008 and 0.98% in October 2009.

*Local Fixed-to-Mobile Calls*

Gross operating revenues from local fixed-to-mobile calls, which are charged at the VC1 rate, declined by 5.6% in 2009, principally as a result of a 6.7% decline in the total number of local fixed-to-mobile minutes in 2009 as our fixed-line customers opted to take advantage of mobile service plans under which the charge for a mobile-to mobile minute is less than the charge for a fixed-to-mobile minute. This decline was partially offset by increases in the VC1 rate of 3.01% in July 2008. The average number of monthly local fixed-to-mobile minutes for our fixed lines in services declined by 6.7% in 2009.

*Gross Operating Revenues from Long-Distance Services*

Gross operating revenues from long-distance services declined by 10.9% in 2009, primarily due to (1) a 10.5% decline in gross operating revenues from long-distance calls originating or terminating on mobile devices, and (2) a 9.9% decline in gross operating revenue from fixed-to-fixed intrasectorial long-distance calls. Intrasectorial calls are those in which callers are located in the same sector, but in different local areas. A sector is a set of local areas, as established by ANATEL, which generally corresponds to a Brazilian state.

*Long-Distance Calls Originating or Terminating on Mobile Devices*

Gross operating revenues from long-distance calls originating or terminating on mobile devices, which are charged at the VC2 or VC3 rate, declined by 10.5% in 2009, principally as a result of:

a 7.5% decline in the total number of long-distance minutes that were charged at the VC2 rate, principally due to lower use of value-added services, which historically has contributed to this traffic; and

---

**Table of Contents**

a 1.3% decline in the total number of long-distance minutes that were charged at the VC3 rate, principally due to lower use of value-added services.

The effects of these declines were partially offset by increases in the VC2 and VC3 rates of 3.01% that were implemented in July 2008.

***Fixed-to-Fixed Long-Distance***

Gross operating revenues from intrasectorial long-distance calls originated and terminated on a fixed-line terminal, which are charged at long-distance rates regulated in accordance with the distance separating callers, declined by 9.9% in 2009, principally as a result of an 11.4% decline in the total number of intrasectorial long-distance minutes. This reduction in traffic is mainly due to the migration of our fixed-line customers to our alternative long-distance plans that have include higher monthly allowances of long-distance minutes. The effects of these declines were partially offset by increases in our regulated long-distance rates of 3.01% in July 2008 and 0.98% in October 2009.

***Gross Operating Revenue from Other Fixed-Lines Services***

Gross operating revenues from other fixed-line services increased by 7.2% in 2009, primarily as a result of the 30.2% increase in gross operating revenues from additional services, intelligent network service and advanced voice services, the effects of which were partially offset by a 25.9% decline in gross operating revenue from the sale of pre-paid calling cards for use in public telephones.

Gross operating revenue from the sale of pre-paid calling cards for use in public telephones declined principally due to the 25.6% decline in the number of public phone credits sold to 3.2 billion in 2009 from 4.3 billion in 2008, primarily due to customers substituting usage of mobile handsets in place of usage of public phones as a result of promotions by mobile service providers to the pre-paid segment, including bonus calls and pre-paid card recharges at promotional reduced rates. This decline was partially offset by rate increases for public phone usage of 2.53% in July 2008 and 0.98% in October 2009.

Gross operating revenue from additional services, intelligent network service and advanced voice services increased principally as a result of our promotional offers and customer retention programs.

***Gross Operating Revenues from Remuneration for the Use of the Fixed-Line Network***

Gross operating revenues from remuneration for the use of the fixed-line network increased by 7.1% in 2009, principally as a result of a 17.3% increase in gross operating revenues from interconnection fees paid to us for completing calls on our fixed-line network that were originated on the networks of mobile service providers, primarily due to (1) an increase in traffic as a result of callers taking advantage of mobile plans and promotions under which mobile service providers offer discounts on mobile-to-fixed minutes, and (2) to a lesser extent, increases in the TU-RL and TU-RIU rates of 3.01% and 4.9%, respectively, that were implemented in July 2008 and increases of 0.98% in these rates that were implemented in October 2009.

The effects of this increase were partially offset by a 3.8% decline in interconnection fees paid to us for completing calls on our fixed-line network that were originated on the networks of other fixed-line service providers, primarily as a result of the increased penetration of the local services market by our competitors which has reduced the volume of calls terminated on our fixed-line network, the effects of which were partially offset by the increases in the TU-RL and TU-RIU rates.

Of our gross operating revenues from remuneration for the use of the fixed-line network, 20.6% in 2009 and 14.3% in 2008 represented interconnection fees paid by Brasil Telecom Mobile for the use of our fixed-line network to complete mobile-to-fixed calls and was eliminated in the consolidation of our financial statements.

---

## **Table of Contents**

### *Gross Operating Revenues from Data Transmission Services*

Gross operating revenues from data transmission services increased by 27.3% in 2009, principally due to a 54.1% increase in gross operating revenue from ADSL subscriptions, and a 20.0% increase in gross operating revenues from IP services.

Gross operating revenues from ADSL subscriptions increased in 2009, primarily due to the impact that resulted from a change in the method that we use to present gross operating revenues from ADSL subscriptions and the related discounts that was implemented in the second quarter of 2008. Prior to this change, we presented gross operating revenues from ADSL subscriptions giving effect to a portion of the discounts granted. As a result of this change in presentation, we record gross operating revenues from ADSL subscriptions without giving effect to discounts granted and record the full amount of the discounts granted as discounts and returns. In addition, gross operating revenues from ADSL subscriptions increased due to the 5.6% increase in the number of ADSL subscriptions in 2009 to 1.9 million at December 31, 2009 from 1.8 million at December 31, 2008 as a result of our continued focus on increasing the penetration of our ADSL services in our local fixed-line subscriber base. The effects of these factors were partially offset by a 7.4% decline in average monthly net revenues per line generated by ADSL subscriptions to R\$45.2 in 2009 from R\$48.8 in 2008. As of December 31, 2009, our ADSL customer base represented 24.7% of our total fixed lines in service as compared to 22.2% as of December 31, 2008.

Gross operating revenue from IP services increased in 2009, principally due to the increased demand for data ports from our existing and new customers and increases in the prices for these services.

### *Charges Against Gross Operating Revenues*

#### ***Value-Added and Other Indirect Taxes***

Value-added and other taxes on our fixed-line and data transmission services declined by 1.4% in 2009, primarily reflecting the decline in the gross operating revenue of our fixed-line and data transmission services segment in 2009 and the change in revenue mix, as fewer taxes or lower tax rates apply to some of our services, such as interconnection services.

We are required to contribute to the Universal Telecommunications Service Fund (*Fundo de Universalização dos Serviços de Telecomunicações*), which we refer to as the FUST, and the Fund for the Technological Development of Telecommunications (*Fundo para o Desenvolvimento Tecnológico das Telecomunicações Brasileiras*), which we refer to as the FUNTTEL. We are required to contribute 1.0% of our gross operating revenue from the rendering of telecommunications services, net of (1) the Social Integration Program (*Programa de Integração Social*), or PIS, taxes, (2) the federal Contribution for Social Security Financing (*Contribuição para Financiamento da Seguridade Social - COFINS*), or COFINS, and (3) ICMS, to the FUST. We are required to contribute 0.5% of our gross operating revenue from the rendering of telecommunications services, net of PIS, COFINS and ICMS taxes, to the FUNTTEL.

#### ***Discounts***

Discounts offered on our fixed-line services generally consist of local fixed-line calls, long-distance calls, and intelligent network services (such as caller ID, call forwarding and conference calling). Discounts on our fixed-line and data transmission services increased by 154.9% in 2009, primarily due to the impact that resulted from a change in the method we used to present gross operating revenues and discounts that was implemented in the second quarter of 2008, which primarily affected the way that we present gross operating revenues and discounts for our ADSL and local fixed-line services. Prior to this change, we presented gross operating revenues for these services giving effect to a portion of the discounts granted. As a result in this change in presentation, we present gross revenue for these services without giving effect to discounts granted and present the full amount of the discounts granted as discounts and returns.

**Table of Contents***Net Operating Revenues*

As a result of the foregoing, net operating revenues of our fixed-line and data transmission services segment declined by 7.7% to R\$9,398 million in 2009 from R\$10,171 million in 2008.

*Operating Revenue of Our Mobile Services Segment*

The following table sets forth the components of the gross and net operating revenues of our mobile services segment, as well as the percentage change from the prior year, for the years ended December 31, 2008 and 2009.

	Year Ended December 31,

Value-added and other indirect taxes	(429)	(428)	(0.2)
Discounts and returns	(250)	(233)	(6.8)
<b>Net operating revenue</b>	<b>R\$ 1,882</b>	<b>1,894</b>	0.6

Gross operating revenues of our mobile services segment declined by 0.2% in 2009, due to a 1.5% decline in remuneration for the use of our mobile network, the effects of which were partially offset by a 0.7% increase in gross operating revenues from mobile telephone services.

*Gross Operating Revenues from Mobile Services*

Gross operating revenues from mobile services decreased by 0.2% in 2009, principally due to a 49.6% decline in gross operating revenue from the sale of mobile handsets and accessories due to the decline in demand for our mobile handsets as a result of the increase in the sales price of these handsets following our decision to reduce the subsidies offered on the sale of these handsets.

The effects of this decline were partially offset by:

a 46.8% increase in gross operating revenues from value-added services, primarily as a result of the increase in the size of our mobile services customer base and an increase in the volume of SMS and GPRS services provided; and

a 9.5% increase in gross operating revenue from monthly subscription fees, primarily as a result of (1) the 5.1% increase in the number of post-paid customers to approximately 1,029,000 million at December 31, 2009 from approximately 979,000 million at December 31, 2008, (2) the migration of our customer base to plans offering a greater number of minutes and with higher subscription fees, and (3) rate increases for our post-paid plans that reflected an increase in inflation of 6.56% in 2008.

The number of our pre-paid mobile customers increased by 32.6% in 2009 to 6.1 million at December 31, 2009 from 4.6 million at December 31, 2008, primarily as a result of (1) the launch beginning in May 2009 of the entire portfolio of Oi's service plans in Region II,

including the *Oi Ligadores* prepaid service plan, (2) the strategy of

**Table of Contents**

reinforcing our retail promotion efforts and intensifying our advertising campaigns, and (3) the development of a marketing channel focused on SIM card sales and the unblocking of handsets. As of December 31, 2009, pre-paid customers represented 85.5% of our mobile customer base. The number of subscribers to our post-paid mobile plans increased by 5.1% in 2009 to approximately 1,029,000 at December 31, 2009 from approximately 979,000 at December 31, 2008, primarily as a result of subscriptions to our 3G plans, especially the *3GMais* broadband service. As of December 31, 2009, post-paid customers represented 14.5% of our mobile customer base. Our monthly average net revenue per user (calculated based on the total revenue for the year divided by the monthly average customer base for the year divided by 12) declined by 20.3% to R\$22.80 in 2009 from R\$28.60 in 2008.

*Gross Operating Revenues from Remuneration for the Use of the Mobile Network*

Gross operating revenues from remuneration for the use of the mobile network declined by 1.5% in 2009 as a result of the 26.8% increase in the number of our mobile customers during 2009, a large portion of which migrated from the mobile networks of other mobile service providers, resulting in a decline in the number of minutes terminated on our mobile network that originated on the networks of other service providers. The effects of this decline were partially offset by increases in our VU-M rates of 2.06% in July 2008 and 0.98% in October 2009.

Of the gross operating revenues from remuneration for the use of the mobile network, 30.1% in 2009 and 39.7% in 2008 represented interconnection fees paid by Brasil Telecom for the use of Brasil Telecom Mobile's network to complete fixed-to-mobile calls and was eliminated in the consolidation of our financial statements.

*Charges Against Gross Operating Revenues**Value-Added and Other Indirect Taxes*

Value-added and other taxes on our mobile services declined by 0.2% in 2009, primarily reflecting the decline in the gross operating revenue of our mobile services segment in 2009.

*Discounts*

Discounts offered on our mobile services generally consist of rebates on pre-paid telephone cards (typically having commissions of approximately 10.0% over the face amount sold), local fixed-line calls, long-distance calls, and intelligent network services (such as caller ID, call forwarding and conference calling). Discounts on our mobile services declined by 6.8% in 2009, primarily as a result of (1) a decrease in the size of the discounts that we offered to post-paid mobile customers following our reduction of the monthly subscription fees that we charge these customers, and (2) a decrease in subsidies to pre-paid customers.

*Net Operating Revenues*

As a result of the foregoing, net operating revenues of the mobile services segment increased by 0.6% to R\$1,894 million in 2009 from R\$1,882 million in 2008.

*Operating Revenue of Our Internet Services Segment*

The following table sets forth the components of the gross and net operating revenues of our internet services segment, as well as the percentage change from the prior year, for the years ended December 31, 2008 and 2009.

	Year Ended December 31,		
	2008	2009	% Change
	(in millions of reais, except percentages)		
Gross operating revenues	R\$ 454	R\$ 406	(10.6)
Value-added and other indirect taxes	(56)	(45)	(19.6)
Discounts and returns	(6)	(6)	
<b>Net operating revenue</b>	<b>R\$ 392</b>	<b>R\$ 355</b>	<b>(9.4)</b>

**Table of Contents**

Gross operating revenues of our internet services segment declined by 10.6% in 2009, primarily due to a decrease in the internet access revenues and a decrease in marketing and advertising revenues, the effects of which were partially offset by an increase in value-added services revenues. Value-added and other taxes on our internet services declined by 19.6% in 2009. As a result of the foregoing, net operating revenues of the internet services segment declined by 9.4% to R\$355 million in 2009 from R\$392 million in 2008.

**Operating Revenue of Our Call Center Segment**

The following table sets forth the components of the gross and net operating revenues of our call center segment, as well as the percentage change from the prior year, for the years ended December 31, 2008 and 2009.

	Year Ended December 31,		
	2008	2009	% Change
	(in millions of reais, except percentages)		
Gross operating revenues	R\$ 246	R\$ 342	39.0
Value-added and other indirect taxes	(16)	(20)	25.0
<b>Net operating revenue</b>	<b>R\$ 230</b>	<b>R\$ 322</b>	<b>40.0</b>

Gross operating revenues of our call center segment increased by 39.0% in 2009, primarily as a result of an increase in the number of workstations in order to comply with new Brazilian legal requirements that became effective at the end of 2008. Value-added and other taxes on our call center segment increased by 25.0% in 2009. As all of our call center services are for internal use, we do not offer discounts on these services. As a result of the foregoing, net operating revenues of our call center segment increased by 40.0% to R\$322 in 2009 from R\$230 million in 2008.

**Cost of Goods Sold and Services Rendered**

Cost of goods sold and services rendered declined by 4.4% in 2009, principally due to a 4.7% decline in cost of goods sold and services rendered of our fixed-line and data transmission services segment and, to a lesser extent, a 1.8% decline in cost of goods sold and services rendered of our mobile services segment, the effects of which were partially offset by a 28.8% increase in cost of goods sold and services rendered of our call center segment.

Of the costs of goods sold and services rendered of our fixed-line and data transmission services segment, 11.9% in 2009 and 10.9% in 2008 represented interconnection fees paid by Brasil Telecom for the use of Brasil Telecom Mobile's mobile network to complete fixed-to-mobile calls. These fees were eliminated in the consolidation of our financial statements.

Of the costs of goods sold and services rendered of our mobile services segment, 14.2% in 2009 and 12.0% in 2008 represented (1) interconnection fees paid by Brasil Telecom Mobile for the use of Brasil Telecom's fixed-line network to complete mobile-to-fixed calls, and (2) fees paid by Brasil Telecom Mobile for EILD services. These fees were eliminated in the consolidation of our financial statements.

**Table of Contents**

The following table sets forth the components of our cost of goods sold and services rendered, as well as the percentage change from the prior year, for the years ended December 31, 2008 and 2009.

	Year Ended December 31,		
	2008	2009	% Change
	(in millions of reais, except percentages)		
Interconnection	R\$ 2,203	R\$ 2,026	(8.0)
Depreciation	1,683	1,529	(9.2)
Connection means	143	129	(9.8)
Rental, leases and insurance	395	386	(2.2)
Third-party services	971	1,101	13.5
Personnel	338	397	17.3
Materials	64	76	18.8
Costs of handsets and accessories	237	87	(63.3)
Concession contract renewal fee	66	71	7.6
Other costs of services rendered	80	104	30.0
Total cost of goods sold and services rendered	R\$ 6,180	R\$ 5,906	(4.4)

*Cost of Goods Sold and Services Rendered of Our Fixed-Line and Data Transmission Services Segment*

Cost of goods sold and services rendered of our fixed-line and data transmission services segment declined by 4.7% in 2009, principally due to:

a 18.5% decline in depreciation costs to R\$1,073 million in 2009 from R\$1,316 million in 2008, primarily as a result of the review of the useful life of the property, plant and equipment of this segment due to the incorporation of goodwill as a result of the acquisition of our company by Telemar and the merger of our company with Brasil Telecom Holding; and

a 6.5% decline in interconnection costs to R\$2,013 million in 2009 from R\$2,152 million in 2008, primarily as a result of a decrease in the total number of minutes used by our fixed-line customers to make calls to customers of other fixed or mobile providers for which we pay interconnection fees, the effects of which were partially offset by increases in the VU-M, TU-RL and TU-RIU rates of these service providers that were implemented in July 2008 and October 2009.

The effects of these declines were partially offset by a 16.6% increase in network maintenance costs to R\$758 million in 2009 from R\$650 million in 2008, primarily as a result of the growth of our ADSL services, which resulted in increased costs to set up ADSL in our customers homes, as well as maintenance costs relating to the expansion of our network.

The gross profit of our fixed-line and data transmission services segment declined by 10.8% to R\$4,472 million in 2009 from R\$5,013 million in 2008. As a percentage of net operating revenue of this segment, gross profit declined to 47.6% in 2009 from 49.3% in 2008.

*Cost of Goods Sold and Services Rendered of Our Mobile Services Segment*

Cost of goods sold and services rendered of our mobile services segment declined by 1.8% in 2009, principally due to a 63.3% decline in the cost of mobile handsets and accessories to R\$87 million in 2009 from R\$237 million in 2008, primarily due to the decline in the number of mobile handsets sold as a result of the change in our distribution strategy following the acquisition of control of our company by Telemar. Under our new distribution strategy, a large number of the distributors of our services purchase handsets directly from handset distributors appointed by Oi, reducing our handset acquisition costs and handset inventory. The effects of these declines were partially offset by:

a 24.7% increase in depreciation and amortization costs to R\$454 million in 2009 from R\$364 million in 2008, primarily as a result of (1) the growth in our property, plant and equipment as a result of the expansion of our mobile network, and (2) increased amortization costs related to our acquisition of 3G radio frequency licenses during 2008.

## Edgar Filing: BRASIL TELECOM SA - Form 20-F

The gross profit of our mobile services segment increased by 10.7% to R\$409 million in 2009 from R\$370 million in 2008. As a percentage of net operating revenue of this segment, gross profit increased to 21.6% in 2009 from 19.7% in 2008.

## **Table of Contents**

### *Cost of Goods Sold and Services Rendered of Our Internet Segment*

Cost of goods sold and services rendered of our internet segment declined by 23.6% in 2009. The gross profit of our internet segment declined by 7.1% to R\$313 million in 2009 from R\$337 million in 2008. As a percentage of net operating revenue of this segment, gross profit increased to 77.1% in 2009 from 74.2% in 2008.

### *Cost of Goods Sold and Services Rendered of Our Call Center Segment*

Cost of goods sold and services rendered of our call center segment increased by 28.8% in 2009, principally due to the cost of implementation of more call center positions and the cost of training of call center operators and field technicians. The gross profit of our call center segment increased to R\$49 million in 2009 from R\$18 million in 2008. As a percentage of net operating revenue of this segment, gross profit increased to 15.2% in 2009 from 7.8% in 2008.

### **Gross Profit**

As a result of the foregoing, our consolidated gross profit declined by 7.9% to R\$4,973 million in 2009 from R\$5,401 million in 2008. As a percentage of net operating revenue, gross profit declined to 45.7% in 2009 from 46.6% in 2008.

### **Operating Expenses**

#### *Selling Expenses*

#### **Fixed-Line and Data Transmission Services Segment**

Selling expenses of our fixed-line and data transmission services segment increased by 18.2% in 2009, principally due to:

a 57.0% increase in provision for doubtful accounts to R\$485 million in 2009 from R\$309 million in 2008, primarily as a result of the increase in the percentage of our accounts receivable that we record as a provision based on an increase in the rate of delinquency of our fixed-line customers in the second half of 2008, which resulted in an increase in our provision for doubtful accounts as a percentage of gross operating revenue of this segment to 3.1% in 2009 from 2.1% in 2008; and

a 51.7% increase in call center expenses to R\$273 million in 2009 from R\$180 million in 2008, primarily as a result of an increase in the number of workstations in order to comply with new Brazilian legal requirements that became effective at the end of 2008.

The effects of these increases were partially offset by a 31.6% decrease in personnel expenses to R\$128 million in 2009 from R\$187 million in 2008, primarily as a result of the synergies obtained in the process of integrating our company with Telemar.

As a percentage of net operating revenues of this segment, selling expenses increased to 11.6% in 2009 from 9.1% in 2008.

#### **Mobile Services Segment**

Selling expenses of our mobile services segment declined by 0.8% in 2009, principally due to:

a 51.0% decline in personnel expenses to R\$25 million in 2009 from R\$51 million in 2008, primarily as a result of the synergies obtained in the process of integrating our company with Telemar.

a 23.2% decline in materials expenses to R\$86 million in 2009 from R\$112 million in 2008, primarily due to the synergies obtained in the process of integrating our company with Telemar.

---

**Table of Contents**

a 78.8% decline in other selling expenses to R\$7 million in 2009 from R\$33 million in 2008. The effects of these declines were partially offset by a 27.9% increase in third party services, to R\$348 million in 2009 from R\$272 million in 2008, including:

a 21.4% increase in sales commission to R\$125 million in 2009 from R\$103 million in 2008, primarily to incentivize retailers to promote sales of our SIM cards following our adoption of a strategy to reduce subsidies offered on the sale of our mobile handsets and focus on selling SIM cards independently of mobile handsets.

a 15.8% increase in marketing expenses to R\$88 million in 2009 from R\$76 million in 2008, primarily due to expenses relating to television advertising campaigns featuring or mobile portfolios and promotions; and  
As a percentage of net operating revenues of this segment, selling expenses decreased to 27.5% in 2009 from 27.9% in 2008.

***Internet Services Segment***

Selling expenses of our internet services segment declined by 35.1% in 2009, principally due to a 52.9% decrease in marketing costs to R\$16 million in 2009 from R\$34 million in 2008 as a result of a reduction of the promotional campaigns and advertising conducted by this segment. As a percentage of net operating revenues of this segment, selling expenses declined to 48.6% in 2009 from 67.5% in 2008.

***Call Center Segment***

Selling expenses of our call center segment increased by 100.0% in 2009, primarily as a result of the increase in the number of workstations in order to comply with new Brazilian legal requirements that became effective at the end of 2008. As a percentage of net operating revenues of this segment, selling expenses increased to 5.0% in 2009 from 3.5% in 2008.

***General and Administrative Expenses***

***Fixed-Line and Data Transmission Services Segment***

General and administrative expenses of our fixed-line and data transmission services segment increased by 4.9% in 2009, principally due to:

a 20.2% increase in personnel expenses to R\$214 million in 2009 from R\$178 million in 2008, primarily due to non-recurring expenses as a result of the restructuring of our workforce following the acquisition of control of our company by Telemar as well as the implementation of a program to encourage employees with over twenty years of service with the company to retire.

a 65.6% increase depreciation and amortization expenses to R\$366 million in 2009 from R\$221 million in 2008, principally as a result of the amortization of goodwill we recorded as a result of the acquisition of our company by Copart 1 and Copart 2 and the subsequent mergers, primarily relating to the step-up in basis of our property, plant and equipment and of fixed-line concessions. The effects of these increases were partially offset by a 47.9% decline in consulting and legal expenses to R\$114 million in 2009 from R\$219 million in 2008, primarily as a result of the settlement in 2008 of several legal disputes related to the acquisition of our control by Telemar.

As a percentage of net operating revenues of this segment, general and administrative expenses increased to 12.8% in 2009 from 11.3% in 2008.

---

## **Table of Contents**

### ***Mobile Services Segment***

General and administrative expenses of our mobile services segment increased by 18.4% in 2009, primarily due to (1) a 50.0% increase in personnel expenses to R\$30 million in 2009 from R\$20 million in 2008, principally due to non-recurring expenses as a result of the restructuring of our workforce following the acquisition of control of our company by Telemar as well as the implementation of a program to encourage employees with over twenty years of service with the company to retire, and (2) an increase in depreciation expenses to R\$62 million in 2009 from R\$58 million in 2008, principally due to the increase in the property, plant and equipment of this segment as a result of the expansion of our mobile network and the launch of our 3G services.

As a percentage of net operating revenues of this segment, general and administrative expenses increased to 8.5% in 2009 from 7.2% in 2008.

### ***Internet Services Segment***

General and administrative expenses of our internet services segment increased by 60.5% in 2009, principally due to an increase in third-party services costs to R\$62 million in 2009 from R\$18 million in 2008 as a result of the acquisition of new services from our content providers. As a percentage of net operating revenues of this segment, general and administrative expenses increased to 34.4% in 2009 from 19.4% in 2008.

### ***Call Center Segment***

General and administrative expenses of our call center segment increased by 33.3% in 2009, principally as a result of a 66.7% increase in personnel costs, to R\$15 million in 2009 from R\$9 million in 2008, as a result of the increase in the number of workstations in order to comply with new Brazilian legal requirements that became effective at the end of 2008. As a percentage of net operating revenues of this segment, general and administrative expenses declined to 7.5% in 2009 from 7.9% in 2008.

### ***Other Operating Expenses, Net***

### ***Other Operating Income***

Other operating income declined by 37.3% to R\$416 million in 2009 from R\$664 million in 2008, primarily as a result of the effects of R\$170 million that we recorded in 2008 as receivables from settlement of litigation relating to payments made to us in connection with the settlement of outstanding litigation with our former controlling shareholders.

### ***Other Operating Expense***

Other operating expenses increased by 174.8% to R\$3,834 million in 2009 from R\$1,395 million in 2008, primarily due to a 482.9% increase provision for contingencies to R\$3,340 million during 2009 from R\$573 million during 2008, primarily as a result of (1) our reclassification of the probability of loss in, and our review of the process we use to estimate provisions for, certain civil proceedings involving CRT, and (2) the change in our criteria for estimating probable losses in certain legal proceedings in order to align our policies with those of Telemar.

As a result of Telemar's acquisition of control of our company in January 2009, we have changed our criteria for estimating probable losses in connection with labor proceedings and the recognition of ICMS tax credits in order to align our policies with those of Telemar. As a result, we have recorded additional provisions for labor proceedings and tax proceedings during 2009 in the amount of R\$334 million and R\$387 million, respectively.

Additionally, as a result of certain judicial decisions in 2009, we reclassified the probability of loss in certain civil proceedings involving CRT, the leading fixed-line telecommunications service company in the State of Rio Grande do Sul that we acquired in July 2000, from possible to probable. With the assistance of our internal and external legal advisors, we have reviewed the process we use to estimate provisions for civil contingencies in connection with the financial participation agreements entered into in connection to the expansion plans of CRT. As a result, we recorded an additional provision of R\$2,325 million in 2009. For a more detailed description of these proceedings, see Item 8. Financial Information Legal Proceedings Civil Proceedings.

---

**Table of Contents**
***Operating Income***

As a result of the foregoing, our consolidated operating income declined by 163.8% to R\$1,271 million loss in 2009 from R\$1,991 million income in 2008. As a percentage of net operating revenue, operating income decreased to 11.7% in 2009 from 17.2% in 2008.

***Fixed-Line and Data Transmission Services Segment***

The operating loss of our fixed-line and data transmission services segment was R\$1,087 million loss in 2009 compared to operating income of R\$2,293 million income in 2008. As a percentage of the net operating revenues of this segment, operating loss was 11.6% in 2009 compared to operating income of 22.5% in 2008.

***Mobile Services Segment***

The operating loss of our mobile services segment increased by 15.4% to R\$287 million in 2009 from R\$248 million in 2008. As a percentage of the net operating revenues of this segment, operating loss increased to 15.2% in 2009 from 13.2% in 2008.

***Internet Services Segment***

The operating income of our internet services segment was R\$105 million in 2009 compared to operating loss R\$44 million in 2008. As a percentage of the net operating revenues of this segment, operating income was 29.6% in 2009 compared to operating loss from 11.5% in 2008.

***Call Center Segment***

The operating loss of our call center segment declined by 77.8% to R\$2 million in 2009 from R\$9 million in 2008. As a percentage of the net operating revenues of this segment, operating loss declined to 0.6% in 2009 from 3.7% in 2008.

***Financial Expenses, Net******Financial Income***

Financial income declined by 17.4% to R\$576 million in 2009 from R\$697 million in 2008, primarily due to (1) a 63.7% decline in interest on taxes and contributions as a result of monetary adjustment of tax contingencies related to the 69/1998 agreement, which had success in court in 2008, and (2) a 29.4% decline in yield on marketable securities as a result of the reduction in the average amount of our financial investments in 2009. The effects of these declines were partially offset by a 24.9% increase in inflation adjustment of escrow deposits that bear interest indexed to the Reference Rate (*Taxa Referencial*), or TR rate.

***Financial Expenses***

Financial expenses, without giving effect to interest on shareholders' equity, declined by 22.7% to R\$858 million in 2009 from R\$1,109 million in 2008, primarily due to (1) the R\$186 million gain recorded in 2009 as monetary and exchange rate variation on loans to be paid to third parties compared to the R\$232 million expense in 2008, mainly due to the effects of exchange rate variations on our indebtedness, and (2) a 23.2% decline in interest on loans payable to third parties to R\$205 million in 2009 from R\$267 million in 2008 as a result of the decline in the aggregate amount of our indebtedness and the decline in the UMBNDES rate (basket of currencies) in 2009. The effects of this change were partially offset by (1) R\$99 million of expenses on derivative transactions in 2009 compared to R\$54 million of income on derivative transactions in 2008 as a result of the fluctuations of the exchange rate of the Japanese Yen (in 2009, the *real* appreciated by 27.1% against the Japanese Yen, and in 2008,

**Table of Contents**

the *real* depreciated against the Japanese Yen) and (2) a 52.9% increase in inflation adjustment of reserves for contingencies to R\$211 million in 2009 from R\$138 million in 2008 as a result of the increase of the provision for contingencies in 2009.

**Income Tax and Social Contribution**

The composite corporate statutory income tax and social contribution rate was 34% in each of 2008 and 2009. Income tax and social contribution was a benefit of R\$412 million in 2009 compared to an expense of R\$551 million in 2008. Our effective tax rate was 26.5% in 2009 as compared to 34.9% in 2008. The lower effective tax rate in 2009 was principally the result of the decline of permanent additions to R\$32 million in 2009 from R\$164 million in 2008 and the decline in unrecognized tax loss to R\$(88) million in 2009 from R\$12 million, the effects of which were partially offset by an increase in non-taxable income from R\$95 million in 2009 from R\$44 million in 2008.

**Non-Controlling Interest**

Non-controlling interest was an expense of R\$2 million in 2009 compared to income of R\$2 million in 2008, primarily as a result of minority shareholders' interest in the improved results of operations of our subsidiary Internet Group (Cayman) Ltd. in 2009.

**Net Income (Loss)**

Our consolidated net loss was R\$1,143 million in 2009 compared to net income of R\$1,030 million in 2008. As a percentage of net operating revenue, net loss was 10.5% in 2009 compared to net income of 8.9% in 2008.

**Year Ended December 31, 2008 Compared with Year Ended December 31, 2007**

The following table sets forth the components of our net income, as well as the percentage change from the prior year, for the years ended December 31, 2007 and 2008.

	Year ended December 31,		
	2007	2008	% Change
	(in millions of <i>reais</i> , except percentages)		
Gross operating revenues	R\$ 15,997	R\$ 17,007	6.3
Taxes and deductions	(4,781)	(5,426)	13.5
Net operating revenues	11,216	11,581	3.3
Cost of goods sold and services rendered	(6,362)	(6,180)	(2.9)
Gross profit	4,854	5,401	11.3
Operating expenses:			
Selling expenses	(1,464)	(1,338)	(8.6)
General and administrative expenses	(1,267)	(1,340)	5.8
Other operating income (expenses), net	(662)	(732)	10.6

**Table of Contents****Operating Revenues**

The composition of gross operating revenues by category of service before deduction of value-added and other indirect taxes and discounts is presented in our financial statements and discussed below. We do not determine net operating revenues for each category of service as we do not believe such information to be useful to investors.

Gross operating revenues increased by 6.3% in 2008, principally due to a 6.7% increase in gross operating revenues of our fixed-line and data transmission services segment, a 1,018.2% increase in gross operating revenues of our call center segment and a 4.7% increase in gross operating revenues of our mobile services segment. Gross operating revenues generated by intersegment sales, which are eliminated in the consolidation of our financial statements, increased by 32.7% in 2008.

Net operating revenues increased by 3.3% in 2008, principally due to a 2.8% increase in net operating revenues of our fixed-line and data transmission services segment, a 995.2% increase in net operating revenues of our call center segment and a 7.8% increase in net operating revenues of our mobile services segment. Net operating revenues generated by intersegment sales, which are eliminated in the consolidation of our financial statements, increased by 33.3% in 2008.

**Operating Revenue of Our Fixed-Line and Data Transmission Services Segment**

The following table sets forth the components of the gross and net operating revenues of our fixed-line and data transmission services segment, as well as the percentage change from the prior year, for the years ended December 31, 2007 and 2008.

	Year Ended December 31,		
	2007	2008	% Change
	(in millions of reais, except percentages)		
<b>Local services:</b>			
Monthly subscription fees	R\$ 3,536	R\$ 3,676	4.0
Metered services	1,106	922	(16.6)
Fixed-line to mobile calls (VC1)	1,882	1,926	2.3
Other revenues	47	29	(38.3)
	<b>6,571</b>	<b>6,555</b>	(0.2)
<b>Long-distance services:</b>			
Mobile long distance (VC2 and VC3)	1,544	1,502	(2.7)
Fixed-to-fixed long distance:

**Table of Contents**

Gross operating revenues of our fixed-line and data transmission services segment increased by 6.7% in 2008, principally due to:

a 36.5% increase in gross operating revenues from data transmission services; and

to a lesser extent, a 3.3% increase in gross operating revenue from remuneration for the use of our fixed-line network. The effects of these increases were partially offset by:

a 3.3% decline in gross operating revenue from long-distance services;

a 5.4% decline in gross operating revenues from other fixed-line services, principally sales of pre-paid calling cards for use in public telephones; and

a 0.2% decline in gross operating revenues from local services.

*Gross Operating Revenues from Local Services*

Gross operating revenues from local fixed-line services declined by 0.2% in 2008, primarily due to a 16.6% decline in gross operating revenues from metered services, the effects of which were partially offset by a 4.0% increase in gross operating revenues from monthly subscription fees and a 2.3% increase in gross operating revenue from local fixed-to-mobile traffic.

*Monthly Subscription Fees*

Gross operating revenues from monthly subscription fees increased by 4.0% in 2008, primarily as a result of (1) rate increases for our basic service plans of 2.14% and 3.01% that were implemented in July 2007 and July 2008, respectively, and rate increases for our alternative plans that reflected increases in inflation of 2.14% in 2007 and 3.01% in 2008, as measured by the IST, (2) a 1.2% increase in the number of lines in service to 8.1 million at December 31, 2008 from 8.0 million at December 31, 2007, and (3) a 17.6% increase in the number of subscriptions to our alternative plans to 4.2 million at December 31, 2008 from 3.5 million at December 31, 2007.

*Metered Services*

Gross operating revenues from metered services charges declined by 16.6% in 2008, principally as a result of (1) the migration of our fixed-line customers from our basic service plans to our alternative plans that have higher monthly allowances of minutes, and (2) the migration of local traffic origination to mobile handsets as callers take advantage of mobile plans and promotions under which mobile service providers offer mobile-to-mobile minutes within their networks at rates that are lower than a fixed-to-mobile minute.

---

**Table of Contents**

As a result of the conversion from pulses to minutes in July 2007, the volume of metered services is not comparable between 2008 and 2007. Total billed minutes, which are the number of local minutes that exceed the monthly allowance under a customer's service plan, were 11.2 billion in 2008. Total billed minutes were 5.4 billion during the last five months of 2007 and total billed pulses were 3.0 billion during the first seven months of 2007. Based on our usage profile, pulses under our basic residential, non-residential and alternative plans represented approximately 1.7, 1.5 and 4.0 minutes of call time, respectively. We implemented rate increases for metered services of 2.14% and 3.01% in July 2007 and July 2008, respectively.

***Local Fixed-to-Mobile Calls***

Gross operating revenues from local fixed-to-mobile calls, which are charged at the VC1 rate, increased by 2.3% in 2008, principally as a result of increases in the VC1 rate of 3.29% and 3.01% that were implemented in July 2007 and July 2008, respectively. The effects of these increases were partially offset by a 0.2% decline in the total number of local fixed-to-mobile minutes in 2008 as our fixed-line customers opted to take advantage of mobile service plans under which the charge for a mobile-to mobile minute is less than the charge for a fixed-to-mobile minute. The average number of monthly local fixed-to-mobile minutes for our fixed lines in services increased by 0.6% in 2008.

***Gross Operating Revenues from Long-Distance Services***

Gross operating revenues from long-distance services declined by 3.3% in 2008, primarily due to (1) a 2.7% decline in gross operating revenues from long-distance calls originating or terminating on mobile devices, (2) a 3.4% decline in gross operating revenue from fixed-to-fixed intrasectorial long-distance calls, and (3) a 6.4% decline in gross operating revenue from fixed-to-fixed intersectorial long-distance calls. Intersectorial calls involve callers in different sectors within the same service region.

***Long-Distance Calls Originating or Terminating on Mobile Devices***

Gross operating revenues from long-distance calls originating or terminating on mobile devices, which are charged at the VC2 or VC3 rate, declined by 2.7% in 2008, principally as a result of:

a 2.3% decline in the total number of long-distance minutes that were charged at the VC2 rate, principally due to lower use of value-added services, which historically has contributed to this traffic; and

a 9.0% decline in the total number of long-distance minutes that were charged at the VC3 rate, principally due to lower use of value-added services.

The effects of these declines were partially offset by increases in the VC2 and VC3 rates of 3.29% and 3.01% that were implemented in July 2007 and July 2008, respectively.

***Fixed-to-Fixed Long-Distance***

Gross operating revenues from intrasectorial and intersectorial long-distance calls originated and terminated on a fixed-line terminal, which are charged at long-distance rates regulated in accordance with the distance separating callers, declined by 3.4% and 6.4%, respectively, in 2008, principally as a result of a 4.3% decline in the total number of intrasectorial long-distance minutes and a 4.3% decline in the total number of intersectorial long-distance minutes. These reductions in traffic are mainly due to the migration of our fixed-line customers to our alternative long-distance plans that have include higher monthly allowances of long-distance minutes. The effects of these declines were partially offset by increases in our regulated long-distance rates of 2.14% and 3.01% that were implemented in July 2007 and July 2008, respectively.

**Table of Contents**

*Gross Operating Revenue from Other Fixed-Lines Services*

Gross operating revenues from other fixed-line services declined by 5.4% in 2008, primarily as a result of the 13.1% decline in gross operating revenue from the sale of pre-paid calling cards for use in public telephones, the effects of which were partially offset by a 6.1% increase in gross operating revenues from additional services, intelligent network service and advanced voice services.

Gross operating revenue from the sale of pre-paid calling cards for use in public telephones declined principally due to the 15.7% decline in the number of public phone credits sold to 4.3 billion in 2008 from 5.1 billion in 2007, primarily due to customers substituting usage of mobile handsets in place of usage of public phones as a result of promotions by mobile service providers to the pre-paid segment, including bonus calls and pre-paid card recharges at promotional reduced rates. This decline was partially offset by rate increases for public phone usage of 2.14% and 2.53% that were implemented in July 2007 and July 2008, respectively.

Gross operating revenue from additional services, intelligent network service and advanced voice services increased principally as a result of our promotional offers and customer retention programs.

*Gross Operating Revenues from Remuneration for the Use of the Fixed-Line Network*

Gross operating revenues from remuneration for the use of the fixed-line network increased by 3.3% in 2008, principally as a result of a 26.8% increase in gross operating revenues from interconnection fees paid to us for completing calls on our fixed-line network that were originated on the networks of mobile service providers, primarily due to (1) an increase in traffic as a result of callers taking advantage of mobile plans and promotions under which mobile service providers offer discounts on mobile-to-fixed minutes, and (2) to a lesser extent, increases in the TU-RL and TU-RIU rates of 3.01% and 4.9%, respectively, that were implemented in July 2008.

The effects of this increase were partially offset by a 13.6% decline in interconnection fees paid to us for completing calls on our fixed-line network that were originated on the networks of other fixed-line service providers, primarily as a result of the increased penetration of the local services market by our competitors which has reduced the volume of calls terminated on our fixed-line network, the effects of which were partially offset by the increases in the TU-RL and TU-RIU rates.

Of our gross operating revenues from remuneration for the use of the fixed-line network, 14.3% in 2008 and 15.2% in 2007 represented interconnection fees paid by Brasil Telecom Mobile for the use of our fixed-line network to complete mobile-to-fixed calls and was eliminated in the consolidation of our financial statements.

*Gross Operating Revenues from Data Transmission Services*

Gross operating revenues from data transmission services increased by 36.5% in 2008, principally due to a 66.4% increase in gross operating revenue from ADSL subscriptions, and a 16.5% increase in gross operating revenues from EILD services.

Gross operating revenues from ADSL subscriptions increased in 2008, primarily due to the impact that resulted from a change in the method that we use to present gross operating revenues from ADSL subscriptions and the related discounts that was implemented in the second quarter of 2008. Prior to this change, we presented gross operating revenues from ADSL subscriptions giving effect to a portion of the discounts granted. As a result of this change in presentation, we present gross operating revenues from ADSL subscriptions without giving effect to discounts granted and present the full amount of the discounts granted as discounts and returns. In addition, gross operating revenues from ADSL subscriptions increased due to the 15.2% increase in the number of ADSL subscriptions in 2008 to 1.8 million at December 31, 2008 from 1.6 million at December 31, 2007, as a result of our continued focus on increasing the penetration of our ADSL services in our local fixed-line subscriber base. The effects of this increase were partially offset by a 2.4% decline in average monthly net revenues per line generated by ADSL subscriptions to R\$48.8 in 2008 from R\$50.0 in 2007. As of December 31, 2008, our ADSL customer base represented 22.2% of our total fixed lines in service as compared to 19.5% as of December 31, 2007.

**Table of Contents**

Gross operating revenue from EILD services increased in 2008, principally due to the increased number of rented circuits as a result of the increase in the demand by other service providers that require additional backbone to increase their penetration of the relevant market. Of our gross operating revenues from EILD services, 2.1% in 2008 and 3.5% in 2007 represented fees paid by Brasil Telecom Mobile for EILD services and was eliminated in the consolidation of our financial statements.

*Charges Against Gross Operating Revenues**Value-Added and Other Indirect Taxes*

Value-added and other taxes on our fixed-line and data transmission services declined by 7.5% in 2008, primarily reflecting the decline in the gross operating revenue of our fixed-line and data transmission services segment in 2008 and the change in revenue mix, as fewer taxes or lower tax rates apply to some of our services, such as interconnection services.

*Discounts*

Discounts offered on our fixed-line services generally consist of local fixed-line calls, long-distance calls, and intelligent network services (such as caller ID, call forwarding and conference calling). Discounts on our fixed-line and data transmission services increased by 769.1% in 2008, primarily due to (1) the impact that resulted from a change in the method we used to present gross operating revenues and discounts that was implemented in the second quarter of 2008, which primarily affected the way that we present gross operating revenues and discounts for our ADSL and local fixed-line services, and (2) to a lesser extent, an increase in the discounts that we offered on our ADSL services.

*Net Operating Revenues*

As a result of the foregoing, net operating revenues of our fixed-line and data transmission services segment increased by 2.8% to R\$10,171 million in 2008 from R\$9,890 million in 2007.

*Operating Revenue of Our Mobile Services Segment*

The following table sets forth the components of the gross and net operating revenues of our mobile services segment, as well as the percentage change from the prior year, for the years ended December 31, 2007 and 2008.

	Year Ended December 31,		
	2007	2008	% Change
	(in millions of reais, except percentages)		
<b>Mobile telephone services:</b>			
Monthly subscription fees	R\$ 434	R\$ 402	(7.4)
Utilization	562	646	14.9
Value-added services	104	154	48.1
Sale of handsets and accessories	271	226	(16.6)
Roaming	16	16	
Other	27	17	(37.0)
	<b>1,414</b>	<b>1,462</b>	3.4
<b>Remuneration for the use of the mobile network</b>	<b>1,032</b>	<b>1,099</b>	6.5
<b>Total gross operating revenue</b>	<b>2,446</b>	<b>2,561</b>	4.7
Value-added and other indirect taxes	(392)	(429)	9.4
Discounts and returns	(308)	(250)	(18.8)
<b>Net operating revenue</b>	<b>R\$ 1,746</b>	<b>R\$ 1,882</b>	7.8

**Table of Contents**

Gross operating revenues of our mobile services segment increased by 4.7% in 2008, due to a 6.5% increase in remuneration for the use of our mobile network and a 3.4% increase in gross operating revenues from mobile telephone services.

*Gross Operating Revenues from Mobile Services*

Gross operating revenues from mobile services increased by 3.4% in 2008, principally due to:

a 14.9% increase in gross operating revenue from billed minutes, primarily as a result of (1) the 31.5% increase in the number of our mobile customers to 5.6 million at December 31, 2008 from 4.3 million at December 31, 2007, and (2) rate increases for our billed minutes that reflected increases in inflation of 3.17% in 2007 and 6.56% in 2008, as measured by the IST; and

a 48.1% increase in gross operating revenues from value-added services, primarily as a result of the increase in the size of our mobile services customer base and an increase in the volume of SMS and GPRS services provided.

The effects of these increases were partially offset by (1) a 16.6% decline in gross operating revenue from the sale of mobile handsets and accessories, due to the decline in demand for our mobile handsets as a result of the increase in the sales price of these handsets following our decision to reduce the subsidies offered on the sale of these handsets, and (2) a 7.4% decline in gross operating revenue from monthly subscription fees, primarily as a result of the migration of our post-paid mobile customers to plans with lower prices, the effects of which were partially offset by rate increases for our post-paid plans that reflected increases in inflation of 3.17% in 2007 and 6.56% in 2008, as measured by the IST.

The number of our pre-paid mobile customers increased by 35.3% in 2009 to 4.6 million at December 31, 2008 from 3.4 million at December 31, 2007, primarily as a result of (1) the success of our *Volta do Pula-Pula* campaign in April 2008, (2) the strategy of reinforcing our retail promotion efforts and intensifying our advertising campaigns, and (3) the development of a marketing channel focused on SIM card sales and the unblocking of handsets. As of December 31, 2008, pre-paid customers represented 83% of our mobile customer base. The number of subscribers to our post-paid mobile plans increased by 14.4% in 2008 to approximately 978,900 at December 31, 2008 from approximately 855,800 at December 31, 2007, primarily as a result of (1) subscriptions to our 3G plans, especially the *3GMais* broadband service, (2) subscriptions to our *Pluri* bundled plans, and (3) the reduction of the migration from our hybrid plans to our pre-paid plan. Under our hybrid plans, a post-paid customer purchases a fixed number of minutes per month and, following the use of these minutes, may purchase additional minutes in the same manner as our pre-paid customers. As of December 31, 2008, post-paid customers represented 17% of our mobile customer base. Our monthly average net revenue per user (calculated based on the total revenue for the year divided by the monthly average customer base for the year divided by 12) increased by 17.3% to R\$28.60 in 2008 from R\$34.60 in 2007.

*Gross Operating Revenues from Remuneration for the Use of the Mobile Network*

Gross operating revenues from remuneration for the use of the mobile network increased by 6.5% in 2008 as a result of (1) the 31.5% increase in the number of our mobile customers during 2008, resulting in an increase in the number of minutes terminated on our mobile network, and (2) increases in our VU-M rates of 2.25% and 2.06% that were implemented in July 2007 and July 2008, respectively.

Of the gross operating revenues from remuneration for the use of the mobile network, 39.7% in 2008 and 39.5% in 2007 represented interconnection fees paid by Brasil Telecom for the use of Brasil Telecom Mobile's network to complete fixed-to-mobile calls and was eliminated in the consolidation of our financial statements.

**Table of Contents***Charges Against Gross Operating Revenues**Value-Added and Other Indirect Taxes*

Value-added and other taxes on our mobile services increased by 9.4% in 2008, primarily reflecting the growth in the gross operating revenue of our mobile services segment in 2008.

*Discounts*

Discounts offered on our mobile services generally consist of rebates on pre-paid telephone cards (typically having commissions of approximately 10.0% over the face amount sold), local fixed-line calls, long-distance calls, and intelligent network services (such as caller ID, call forwarding and conference calling). Discounts on our mobile services declined by 18.8% in 2008, primarily as a result of (1) a decrease in monthly subscription fees for post-paid mobile customers, resulting in a decrease in the discounts offered to these customers, and (2) a decrease in subsidies to pre-paid customers.

*Net Operating Revenues*

As a result of the foregoing, net operating revenues of the mobile services segment increased by 7.8% to R\$1,882 million in 2008 from R\$1,746 million in 2007.

*Operating Revenue of Our Internet Services Segment*

The following table sets forth the components of the gross and net operating revenues of our internet services segment, as well as the percentage change from the prior year, for the years ended December 31, 2007 and 2008.

	Year Ended December 31,		
	2007	2008	% Change
	(in millions of reais, except percentages)		
Gross operating revenues	R\$ 446	R\$ 454	1.8
Value-added and other indirect taxes	(62)	(56)	(9.7)
Discounts and returns	(4)	(6)	50.0
<b>Net operating revenue</b>	<b>R\$ 380</b>	<b>R\$ 392</b>	<b>3.2</b>

Gross operating revenues of our internet services segment increased by 1.8% in 2008, primarily due to (1) an increase in the number of monthly subscriptions for content, and (2) an increase in marketing and advertising revenues. Value-added and other taxes on our internet services declined by 9.7% in 2008. Discounts offered on our internet services increased by 50.0% in 2008, primarily as a result of promotions designed to attract new subscribers. As a result of the foregoing, net operating revenues of the internet services segment increased by 3.2% to R\$392 million in 2008 from R\$380 million in 2007.

*Operating Revenue of Our Call Center Segment*

The following table sets forth the components of the gross and net operating revenues of our call center segment, as well as the percentage change from the prior year, for the years ended December 31, 2007 and 2008.

	Year Ended December 31,		
	2007	2008	% Change
	(in millions of reais, except percentages)		
Gross operating revenues	R\$ 22	R\$ 246	1,018.2
Value-added and other indirect taxes	(1)	(16)	1,500.0

<b>Net operating revenue</b>	<b>R\$ 21</b>	<b>R\$ 230</b>	995.2
------------------------------	---------------	----------------	-------

**Table of Contents**

Gross operating revenues of our call center segment increased by 1,018.2% in 2008 as a result of our recording the gross operating revenue of this segment for the full year of 2008 as compared to approximately one month in 2007. Value-added and other taxes on our call center segment increased by 1,500.0% in 2008. As all of our call center services are for internal use, we do not offer discounts on these services. As a result of the foregoing, net operating revenues of our call center segment increased by 995.2% to R\$230 million in 2008 from R\$21 million in 2007.

**Cost of Goods Sold and Services Rendered**

Cost of goods sold and services rendered declined by 2.9% in 2008, principally due to a 5.7% decline in cost of goods sold and services rendered of our fixed-line and data transmission services segment and, to a lesser extent, a 1.3% decline in cost of goods sold and services rendered of our mobile services segment, the effects of which were partially offset by a 909.5% increase in cost of goods sold and services rendered of our call center segment, as discussed below.

Of the costs of goods sold and services rendered of our fixed-line and data transmission services segment, 10.9% in 2008 and 9.1% in 2007 represented interconnection fees paid by Brasil Telecom for the use of Brasil Telecom Mobile's mobile network to complete fixed-to-mobile calls. These fees were eliminated in the consolidation of our financial statements.

Of the costs of goods sold and services rendered of our mobile services segment, 12.0% in 2008 and 13.6% in 2007 represented (1) interconnection fees paid by Brasil Telecom Mobile for the use of Brasil Telecom's fixed-line network to complete mobile-to-fixed calls, and (2) fees paid by Brasil Telecom Mobile for EILD services. These fees were eliminated in the consolidation of our financial statements.

The following table sets forth the components of our cost of goods sold and services rendered, as well as the percentage change from the prior year, for the years ended December 31, 2007 and 2008.

	Year Ended December 31,		
	2007	2008	% Change
	(in millions of reais, except percentages)		
Interconnection	R\$ 2,319	R\$ 2,203	(5.0)
Depreciation	2,034	1,683	(17.3)
Connection means	677	143	(78.9)
Rental, leases and insurance	314	395	25.8
Third-party services	257	971	277.8
Personnel	163	338	107.4
Materials	70	64	(8.6)
Costs of handsets and accessories	255	237	(7.1)
Concession contract renewal fee	69	66	(4.3)
Other costs of services rendered	204	80	(60.8)
<b>Total cost of goods sold and services rendered</b>	<b>R\$ 6,362</b>	<b>R\$ 6,180</b>	<b>(2.9)</b>

**Cost of Goods Sold and Services Rendered of Our Fixed-Line and Data Transmission Services Segment**

Cost of goods sold and services rendered of our fixed-line and data transmission services segment declined by 5.7% in 2008, principally due to:

a 22.7% decline in depreciation costs to R\$1,316 million in 2008 from R\$1,702 million in 2007, primarily as a result of the increase in the amount of the property, plant and equipment of this segment that has been fully depreciated; and

a 2.1% decline in interconnection costs to R\$2,152 million in 2008 from R\$2,199 million in 2007, primarily as a result of a decrease in the total number of minutes used by our fixed-line customers to make calls to customers of other fixed or mobile providers for which we pay interconnection fees, the effects of which were partially offset by increases in the VU-M, TU-RL and TU-RIU rates of these service providers that were implemented in July 2007 and July 2008.

## Table of Contents

The effects of these declines were partially offset by:

a 6.7% increase in network maintenance costs to R\$650 million in 2008 from R\$609 million in 2007, primarily as a result of the growth of our ADSL services, which resulted in increased costs to set up ADSL in our customers' homes, as well as maintenance costs relating to the expansion of our network;

a 27.0% increase in rental and insurance costs to R\$320 million in 2008 from R\$252 million in 2007, primarily as a result of the expansion of our broadband subscriber base and our internet network, which involved increased circuit rentals from third parties; and

an 18.8% increase in connection means costs, which are costs that we incur to rent or lease network infrastructure from third parties, to R\$265 million in 2008 from R\$223 million in 2007, primarily as a result of increased costs for EILD services.

The gross profit of our fixed-line and data transmission services segment increased by 13.3% to R\$5,013 million in 2008 from R\$4,423 million in 2007. As a percentage of net operating revenue of this segment, gross profit increased to 49.3% in 2008 from 44.7% in 2007.

### *Cost of Goods Sold and Services Rendered of Our Mobile Services Segment*

Cost of goods sold and services rendered of our mobile services segment declined by 1.3% in 2008, principally due to:

a 6.9% decline in interconnection costs to R\$550 million in 2008 from R\$591 million in 2007, primarily due to the decline in the volume of traffic originated by our mobile customers that terminated on the networks of other service providers as a result of the increase in the size of our mobile customer base;

a 7.1% decline in the cost of mobile handsets and accessories to R\$237 million in 2008 from R\$255 million in 2007, primarily due to the decline in the number of mobile handsets sold as a result of our strategy of reducing subsidies offered on the sale of mobile handsets and focusing on selling SIM cards independently of mobile handsets to the pre-paid segment in an effort to reduce customer-acquisition costs; and

a 15.9% decline in connection means costs to R\$90 million in 2008 from R\$107 million in 2007, primarily due to the decline in our use of third-party network infrastructure as a result of the expansion of our own network.

The effects of these increases were partially offset by:

a 13.4% increase in depreciation and amortization costs to R\$364 million in 2008 from R\$321 million in 2007, primarily as a result of (1) the growth in our property, plant and equipment as a result of the expansion of our mobile network, and (2) increased amortization costs related to our acquisition of 3G radio frequency licenses during 2008; and

a 25.5% increase in *Taxa de Fiscalização de Telecomunicações*, or FISTEL, fees, which are imposed by ANATEL on providers of telecommunications services for the inspection of switching stations and mobile terminals, to R\$59 million in 2008 from R\$47 million in 2007, primarily as a result of the increase in the size of our mobile customer base and the number of switching stations in our network in 2008.

The gross profit of our mobile services segment increased by 72.9% to R\$370 million in 2008 from R\$214 million in 2007. As a percentage of net operating revenue of this segment, gross profit increased to 19.7% in 2008 from 12.3% in 2007.

## **Table of Contents**

### *Cost of Goods Sold and Services Rendered of Our Internet Segment*

Cost of goods sold and services rendered of our internet segment remained stable in 2008. The gross profit of our internet segment increased by 3.7% to R\$337 million in 2008 from R\$325 million in 2007. As a percentage of net operating revenue of this segment, gross profit increased to 86.0% in 2008 from 85.5% in 2007.

### *Cost of Goods Sold and Services Rendered of Our Call Center Segment*

Cost of goods sold and services rendered of our call center segment increased by 909.5% in 2008, principally due to our recording the cost of goods sold and services rendered of this segment for the full year of 2008 as compared to approximately one month in 2007. The gross profit of our call center segment increased to R\$18 million in 2008 from R\$382,000 in 2007. As a percentage of net operating revenue of this segment, gross profit increased to 7.8% in 2008 from 1.8% in 2007.

### **Gross Profit**

As a result of the foregoing, our consolidated gross profit increased by 11.3% to R\$5,401 million in 2008 from R\$4,854 million in 2007. As a percentage of net operating revenue, gross profit increased to 46.6% in 2008 from 43.3% in 2007.

### **Operating Expenses**

#### *Selling Expenses*

#### **Fixed-Line and Data Transmission Services Segment**

Selling expenses of our fixed-line and data transmission services segment increased by 5.5% in 2008, principally due to:

a 14.9% increase in provision for doubtful accounts to R\$309 million in 2008 from R\$269 million in 2007, primarily as a result of (1) the increase in the percentage of our accounts receivable that we record as a provision based on an increase in the rate of delinquency of our fixed-line customers in the second half of 2008, and (2) the decrease in the recovery of written-off accounts receivable during our end of year collection campaign in 2008 as compared to 2007, which resulted in an increase in our provision for doubtful accounts as a percentage of gross operating revenue of this segment to 2.1% in 2008 from 1.9% in 2007;

a 8.7% increase in personnel expenses to R\$187 million in 2008 from R\$172 million in 2007, primarily as a result of an increase in employee profit sharing expenses as a result of our improved results and increases in wages and benefits payable under our collective bargaining agreements; and

a 13.2% increase in call center expenses to R\$180 million in 2008 from R\$159 million in 2007, primarily as a result of an increase in the number of workstations in order to comply with new Brazilian legal requirements that became effective at the end of 2008.

As a percentage of net operating revenues of this segment, selling expenses increased to 9.1% in 2008 from 8.9% in 2007.

#### **Mobile Services Segment**

Selling expenses of our mobile services segment increased by 15.6% in 2008, principally due to:

a 163.6% increase in materials expenses to R\$87 million in 2008 from R\$33 million in 2007, primarily as a result of an increase in materials expenses related to the launch of our 3G services;

---

**Table of Contents**

a 46.2% increase in marketing expenses to R\$76 million in 2008 from R\$52 million in 2007, primarily due to expenses relating to advertising campaigns featuring our *3GMais* and *Pluri* services; and

a 19.8% increase in sales commission to R\$103 million in 2008 from R\$86 million in 2007, primarily to incentivize retailers to promote sales of our SIM cards following our adoption of a strategy to reduce subsidies offered on the sale of our mobile handsets and focus on selling SIM cards independently of mobile handsets.

The effects of these increases were partially offset by a 27.7% decline in provision for doubtful accounts to R\$47 million in 2008 from R\$65 million in 2007, primarily as a result of the decline in the percentage of our accounts receivable that we record as a provision based on the improved payment history of our post-paid mobile customer base.

As a percentage of net operating revenues of this segment, selling expenses increased to 27.9% in 2008 from 26.0% in 2007.

***Internet Services Segment***

Selling expenses of our internet services segment declined by 3.3% in 2008, principally due to a 24.4% decline in marketing costs to R\$34 million in 2008 from R\$45 million in 2007 as a result of a reduction of the promotional campaigns and advertising conducted by this segment. As a percentage of net operating revenues of this segment, selling expenses declined to 67.6% in 2008 from 72.1% in 2007.

***Call Center Segment***

Selling expenses of our call center segment were R\$8 million in 2008. This segment did not incur selling expenses in 2007. As a percentage of net operating revenues of this segment, selling expenses represented 3.5% in 2008.

***General and Administrative Expenses***

***Fixed-Line and Data Transmission Services Segment***

General and administrative expenses of our fixed-line and data transmission services segment increased by 2.4% in 2008, principally due to:

a 4.8% increase in expenses for third-party services to R\$514 million in 2008 from R\$490 million in 2007, principally due to (1) a R\$19 million increase in collection services expenses; (2) a R\$15 million increase in printing expenses, and (3) a R\$9 million increase in expenses for co-billing of our customers, the effects of which were partially offset by a R\$30 million decline in call center expenses.

a 14.3% increase in consulting and legal expenses to R\$219 million in 2008 from R\$192 million in 2007, primarily as a result of expenses incurred in relation to the settlement of several legal disputes related to the acquisition of our control by Telemar; and

a 19.4% increase in personnel expenses to R\$229 million in 2008 from R\$192 million in 2007, primarily due to an increase in employee profit sharing expenses as a result of our improved results and increases in wages and benefits payable under our collective bargaining agreements.

The effects of these increases were partially offset by a 15.6% decline in depreciation expenses to R\$221 million in 2008 from R\$261 million in 2007, primarily due to the increase in the amount of the property, plant and equipment of this segment that has been fully depreciated.

As a percentage of net operating revenues of this segment, general and administrative expenses remained stable at 11.3% in 2008 and 2007.

---

**Table of Contents**

***Mobile Services Segment***

General and administrative expenses of our mobile services segment increased by 51.1% in 2008, primarily due to (1) a 237.0% increase in depreciation expenses to R\$58 million in 2008 from R\$17 million in 2007, principally due to the increase in the property, plant and equipment of this segment as a result of the expansion of our mobile network and the launch of our 3G services, and (2) a 156.0% increase in personnel expenses to R\$22 million in 2008 from R\$8 million in 2007, principally due to an increase in employee profit sharing expenses as a result of our improved results and increases in wages and benefits payable under our collective bargaining agreements.

As a percentage of net operating revenues of this segment, general and administrative expenses increased to 7.2% in 2008 from 5.2% in 2007.

***Internet Services Segment***

General and administrative expenses of our internet services segment increased by 10.1% in 2008, principally due to a 33.6% increase in third-party services costs to R\$30 million in 2008 from R\$23 million in 2007 as a result of the acquisition of new services from our content providers. As a percentage of net operating revenues of this segment, general and administrative expenses increased to 19.4% in 2008 from 18.2% in 2007.

***Call Center Segment***

General and administrative expenses of our call center segment increased by 80.0% in 2008, principally as a result of our recording of general and administrative expenses of this segment for the full year of 2008 as compared to approximately one month in 2007. As a percentage of net operating revenues of this segment, general and administrative expenses declined to 7.8% in 2008 from 47.6% in 2007.

***Other Operating Expenses, Net***

***Other Operating Income***

Other operating income increased by 42.6% to R\$664 million in 2008 from R\$466 million in 2007, primarily due to the effects of R\$170 million that we recorded in 2008 as receivables from settlement of litigation relating to payments made to us in connection with the settlement of outstanding litigation with our former controlling shareholders.

***Other Operating Expense***

Other operating expenses, net increased by 23.8% to R\$1,395 million in 2008 from R\$1,127 million in 2007, primarily due to:

a 76.2% increase in taxes other than income taxes and VAT taxes to R\$430 million in 2008 from R\$244 million in 2007, principally due to (1) an 80.9% increase in FISTEL fees to R\$284 million in 2008 from R\$157 million in 2007, and (2) a 67.8% increase in taxes (other than taxes on gross revenues, Corporate Income Tax (*Imposto de Renda de Pessoa Jurídica*), or IRPJ, and Social Contribution on Net Profits (*Contribuição Social sobre Lucro Líquido*), or CSLL) and value-added taxes to R\$146 million in 2008 from R\$87 million in 2007, primarily due to our recording R\$38 million of non-recoverable ICMS taxes in 2008, and our recording PIS and COFINS taxes of R\$16 million on the amount of our settlement of outstanding litigation with our former controlling shareholders; and

a R\$57 million of loss on write-off of property, plant and equipment and intangible assets in 2008 compared to a R\$3 million loss in 2007.

---

## **Table of Contents**

### ***Operating Income***

As a result of the foregoing, our consolidated operating income increased by 36.3% to R\$1,991 million in 2008 from R\$1,461 million in 2007. As a percentage of net operating revenue, operating income increased to 17.2% in 2008 from 13.0% in 2007.

### ***Fixed-Line and Data Transmission Services Segment***

The operating income of our fixed-line and data transmission services segment increased by 24.6% to R\$2,293 million in 2008 from R\$1,840 million in 2007. As a percentage of the net operating revenues of this segment, operating income increased to 22.5% in 2008 from 18.6% in 2007.

### ***Mobile Services Segment***

The operating loss of our mobile services segment declined by 16.2% to R\$248 million in 2008 from R\$296 million in 2007. As a percentage of the net operating revenues of this segment, operating loss declined to 13.2% in 2008 from 17.0% in 2007.

### ***Internet Services Segment***

The operating loss of our internet services segment declined by 38.4% to R\$44 million in 2008 from R\$73 million in 2007. As a percentage of the net operating revenues of this segment, operating loss declined to 11.5% in 2008 from 19.2% in 2007.

### ***Call Center Segment***

The operating loss of our call center segment declined by 10.0% to R\$9 million in 2008 from R\$10 million in 2007. As a percentage of the net operating revenues of this segment, operating loss declined to 3.9% in 2008 from 47.6% in 2007.

### ***Financial Expenses, Net***

#### ***Financial Income***

Financial income increased by 59.9% to R\$697 million in 2008 from R\$436 million in 2007, primarily due to an increase of R\$111 million as a result of the increase in inflation adjustment of judicial deposits that bear interest indexed to the TR rate.

#### ***Financial Expenses***

Financial expenses, without giving effect to interest on shareholders' equity, increased by 37.9% to R\$1,109 million in 2008 from R\$804 million in 2007, primarily due to the effects of exchange rate variations on our indebtedness. In 2008, the *real* depreciated by 31.9% against the U.S. dollar and by 63.0% against the Japanese Yen, which resulted in a R\$168 million increase in our interest expenses.

#### ***Income Tax and Social Contribution***

The composite corporate statutory income tax and social contribution rate was 34% in each of 2007 and 2008. Income tax and social contribution expense increased by 86.8% in 2008, principally as a result of a 44.5% increase in income before taxes and non-controlling interest to R\$1,579 million in 2008 from R\$1,093 million in 2007. Our effective tax rate was 34.9% in 2008 as compared to 26.6% in 2007. The higher effective tax rate in 2008 was principally the result of permanent additions, including (1) an increase in non-deductible fines and donations to R\$70 million in 2008 from R\$6 million in 2007, (2) losses on investments of R\$14 million recorded in 2008 and (3) an increase in other non-deductible expenses to R\$28 million in 2008 from R\$12 million in 2007.

## **Table of Contents**

### ***Non-Controlling Interest***

Non-Controlling interest increased by 1.1% in 2008, primarily as a result of minority shareholders' interest in the improved results of operations of our subsidiary Internet Group (Cayman) Ltd. in 2008.

### ***Net Income***

Our consolidated net income increased by 28.8% to R\$1,030 million in 2008 from R\$800 million in 2007. As a percentage of net operating revenue, net income increased to 8.9% in 2008 from 7.1% in 2007.

### **Liquidity and Capital Resources**

Our principal cash requirements consist of the following:

working capital requirements;

the servicing of our indebtedness;

capital expenditures related to investments in operations, expansion of our networks and enhancements of the technical capabilities and capacity of our networks;

dividends on our shares, including in the form of interest attributable to shareholders' equity.

Unless our board of directors deems it inconsistent with our financial position, payment of dividends is mandatory under our bylaws and, consequently, may give rise to significant cash requirements in future periods.

Our principal sources of liquidity have traditionally consisted of the following:

cash flows from operating activities;

short-term and long-term borrowings; and

sales of debt securities in domestic and international capital markets.

During 2009, cash flow generated by operations was used primarily for investing activities, for working capital requirements and to service our outstanding debt obligations. At December 31, 2009, our consolidated cash and cash equivalents and other investments amounted to R\$2,099 million. At December 31, 2009, we had working capital of R\$1,168 million. We believe that our working capital is sufficient for our present requirements.

### ***Projected Sources and Uses of Cash***

We anticipate that we will be required to spend approximately R\$2,115 million to meet our short-term contractual obligations and commitments and budgeted capital expenditures in 2010, and approximately R\$5,372 million to meet our long-term contractual obligations and commitments and budgeted capital expenditures in 2011 and 2012. We expect that we will meet these cash requirements through a combination of cash generated from operating activities and cash generated by financing activities, including new debt financings and the refinancing of our existing indebtedness as it becomes due.

**Cash Flow**

*Cash Flows from Operating Activities*

Our primary source of operating funds is cash flow generated from our operations. Net cash provided by operating activities was R\$3,237 million in 2009, R\$3,055 million in 2008 and R\$3,135 million in 2007. We consider cash flows provided by our operating activities to be sufficient for our expected cash requirements related to operations. However, we generally finance our investments in property, plant and equipment through the use of bank loans, vendor financing, capital markets and other forms of financing.

## **Table of Contents**

### ***Cash Flows Used in Investing Activities***

Investing activities used net cash of R\$2,988 million in 2009, R\$1,854 million in 2008 and R\$1,759 million in 2007.

During 2009, investing activities for which we used cash primarily consisted of (1) escrow deposits of R\$1,476 million, primarily related to provisions for labor, taxes and civil contingencies, and (2) investments of R\$1,398 million in additions to property, plant and equipment, primarily related to the expansion of our data communications network and the implementation of regulatory projects to meet ANATEL's requirements, and (3) investments in private debentures issued by Telemar in the amount of R\$300 million.

During 2008, investing activities for which we used cash primarily consisted of (1) escrow deposits of R\$1,723 million, primarily related to provisions for labor, taxes and civil contingencies, and (2) investments of R\$1,438 million in additions to property, plant and equipment, primarily related to the expansion of our data communications network and the implementation of regulatory projects to meet ANATEL's requirements. In 2008, cash from investing activities reflected the reclassification of R\$1,041 million of financial investments to cash and cash equivalents according to Brazilian Law 11,638/07.

During 2007, investing activities for which we used cash primarily consisted of (1) investments of R\$1,318 million in additions to property, plant and equipment, primarily related to the expansion of our data communications network and the implementation of regulatory projects to meet ANATEL's requirements, and (2) escrow deposits of R\$871 million, primarily related to provisions for labor, taxes and civil contingencies. In 2007, cash from investing activities reflected the reclassification of R\$4 million of financial investments according to Brazilian Law 11,638/07.

### ***Cash Flows from Financing Activities***

Financing activities used net cash of R\$289 million in 2009, R\$307 million in 2008 and R\$1,194 million in 2007.

During 2009, our principal sources of borrowed funds consisted of:

R\$300 million aggregate principal amount borrowed under a credit facility with BNDES that we entered into in December 2009;

R\$313 million aggregate principal amount borrowed under a credit facility with BNDES that we entered into in November 2006. During 2009, we used cash (1) to pay dividends and interest on shareholders' equity in the aggregate amount of R\$275 million, and (2) to repay R\$771 million of our outstanding long-term indebtedness.

During 2008, our principal sources of borrowed funds consisted of:

R\$400 million aggregate principal amount borrowed under a credit facility with BNDES that we entered into in November 2006;

R\$259 million aggregate principal amount borrowed under a credit facility with BNDES that we entered into in February 2008; and

R\$75 million aggregate principal amount borrowed under a financing agreement that we entered into in July 2008.

**Table of Contents**

During 2008, we used cash (1) to pay dividends and interest on shareholders' equity in the aggregate amount of R\$685 million, and (2) to repay R\$336 million of our outstanding long-term indebtedness.

During 2007, our principal sources of borrowed funds consisted of R\$600 million aggregate principal amount borrowed under a credit facility with BNDES that we entered into in November 2006. During 2007, we used cash (1) to repay R\$1,417 million of our outstanding long-term indebtedness, including R\$500 million aggregate principal amount of our third issue of debentures, and (2) to pay dividends and interest on shareholders' equity in the aggregate amount of R\$352 million.

**Indebtedness and Financing Strategy**

At December 31, 2009, our total outstanding indebtedness on a consolidated basis, excluding swap adjustments, was R\$4,443 million, consisting of R\$870 million of short-term indebtedness, all of which represented current portion of long-term indebtedness (or 19.6% of our total indebtedness), and R\$3,573 long-term indebtedness (or 80.4% of our total indebtedness).

On a consolidated basis, excluding swap adjustments, our *real*-denominated indebtedness at December 31, 2009 was R\$3,911 million (88.0% of our total indebtedness), and our foreign currency-denominated indebtedness was R\$532 million (12.0% of our total indebtedness). At December 31, 2009, our *real*-denominated indebtedness bore interest at an average rate of 11.67% per annum, and our foreign currency denominated indebtedness bore interest at an average rate of 10.47% per annum for loans denominated in U.S. dollars, 2.48% per annum for loans denominated in Japanese Yen, and 9.75% for loans bearing interest at rates linked to the *Cesta de Moedas*. At December 31, 2009, 92.1% of our debt bore interest at floating rates, including the effect of swap operations.

Our financing strategy has been to continue to extend the average maturity of our outstanding indebtedness, including by repaying short-term debt with the proceeds of long-term loans and long-term debt securities, to increase our liquidity levels, and improve our strategic, financial and operational flexibility. Our financing strategy over the next several years involves reducing our leverage and maintaining adequate liquidity and a debt maturity profile that is compatible with our anticipated cash flow generation and anticipated capital expenditures. In addition, we do not expect our capital expenditures to affect adversely our debt leverage ratios or our disciplined approach to capital allocation.

**Short-Term Indebtedness**

Our consolidated short-term debt, consisting of the current portion of long-term loans and financings and debentures, was R\$870 million at December 31, 2009. Under our financing policy, we generally do not incur short-term indebtedness, as we believe that our cash flows from operations generally will be sufficient to service our current liabilities.

**Long-Term Indebtedness**

The following table sets forth selected information with respect to our principal outstanding long-term debt instruments at December 31, 2009.

<b>Instrument</b>	<b>Outstanding Principal Amount</b>	<b>Final Maturity</b>
Debentures	R\$ 1,080 million	June 2013
9.375% notes due 2014	US\$ 200 million	February 2014
BNDES credit facilities:		
2004 credit facility:		
TJLP loans	R\$ 255 million	February 2011
<i>Cesta de Moedas</i> loans	R\$ 38 million	April 2011
2006 credit facilities:		
A loans	R\$ 1,826 million	May 2014
B loans	R\$ 49 million	May 2014
2008 loan agreement	R\$ 260 million	September 2017
2009 credit facility:		
Floating-rate loans	R\$ 275 million	December 2018
Fixed-rate loans	R\$ 25 million	December 2018
Syndicated loan	¥ 6,472 million	March 2011
Financing agreement	R\$ 80 million	August 2014

---

**Table of Contents**

Some of our debt instruments require that we comply with financial covenants, the most restrictive of which are as follows:

Consolidated debt to consolidated EBITDA for the prior 12-month period less than or equal to 3.50 to 1.0 at the end of each fiscal quarter until maturity;

Consolidated EBITDA for the prior 12-month period to consolidated interest expense for the prior 12-month period greater than or equal to 2.25 to 1.0 at the end of each fiscal quarter until maturity; and

Consolidated debt to consolidated debt plus shareholders' equity less than or equal to 0.60 to 1.0 at the end of each fiscal quarter until maturity.

As the result of Telemar's acquisition of control of our company in January 2009, we changed our criteria for estimating probable losses in connection with labor proceedings and the recognition of tax credits for the Tax on the Circulation of Merchandise and Services (*Imposto Sobre a Circulação de Mercadorias e Serviços*), or ICMS (a state value-added tax on sales and services), in order to align our policies with those of Telemar. These changes resulted in our recording additional provisions for labor proceedings and tax proceedings in 2009 in the amount of R\$334 million and R\$387 million, respectively, in the second quarter of 2009.

In addition, as the result of certain judicial decisions in 2009, we have reclassified the probability of loss in certain civil proceedings involving Companhia Riograndense de Telecomunicações, or CRT, the leading fixed-line telecommunications service company in the State of Rio Grande do Sul that we acquired in July 2000, from possible to probable. With the assistance of our internal and external legal advisors, we revised our estimate of the amount of provisions for civil contingencies in connection with the financial participation agreements entered into in connection to the expansion plans of CRT, considering aspects of the process we use to estimate the amount of provisions for civil contingencies related to the dates and discussions that guided the final decisions of the proceedings, as well as the use of statistical criteria to estimate the amount of the provisions for contingencies. As a result, the provision for civil contingencies in connection with the financial participation agreements entered into in connection to the expansion plans of CRT was increased by R\$2,325 million. For additional information regarding these suits, see Item 8. Financial Information - Legal Proceedings - Civil Claims.

As a result of these adjustments in our provision for contingencies, we did not comply with certain covenants set forth in (1) our debentures as of June 30, 2009, and (2) our debt instrument guaranteed by The Japan Bank of International Cooperation, or JBIC, as of June 30, 2009, September 30, 2009, December 31, 2009 and March 31, 2010. Under each of these debt instruments the creditor has the right to accelerate the debt if, at the end of any fiscal quarter, we are not in compliance with the covenants containing these ratios.

In anticipation of our failure to achieve the EBITDA to financial expenses ratio set forth in our debentures, in July 2009 we sought and obtained from the holders of our debentures modifications of the covenants contained in our debentures to reduce the EBITDA to financial expenses ratio from 1.95 to 0.95 effective June 30, 2009 and for subsequent fiscal quarters to and including the fiscal quarter ending on June 30, 2010. Following our subsequent review of the process we use to estimate the amount of provisions for civil contingencies in connection with the financial participation agreements entered into in connection to the expansion plans of CRT and because we believed that the additional provision to be recorded in the second quarter of 2009 as a result of this review would

## **Table of Contents**

result in our failure to achieve the EBITDA to financial expenses ratio set forth in the amended covenants set forth in our debentures, in March 2010 we sought and obtained from the holders of our debentures modifications of the covenants contained in our debentures to eliminate our obligation to comply with the reduced EBITDA to financial expenses ratio for the fiscal quarter ended on June 30, 2009 and for subsequent fiscal quarters to and including the fiscal quarter ending on June 30, 2010. Because we believe that the additional provisions that we have recorded are not recurring events therefore will not affect our EBITDA as calculated under our debentures for periods after March 31, 2010, we believe that we will comply with the covenants under our debentures for foreseeable future periods.

In anticipation of our failure to achieve the consolidated EBITDA to consolidated interest expense ratio set forth in our debt instrument guaranteed by JBIC, we sought and obtained waivers of our non-compliance with this ratio as of June 30, 2009, September 30, 2009, December 31, 2009 and March 31, 2010. Because we believe that the additional provisions that we have recorded are not recurring events therefore will not affect our EBITDA as calculated under our debt instrument guaranteed by JBIC for periods after March 31, 2010, we believe that we will comply with the covenants contained in our debt instrument guaranteed by JBIC for foreseeable future periods.

Our debt instruments with BNDES also include financial covenants. Prior to November 2009, these covenants required our company to maintain certain financial ratios, which were measured on a semiannual basis in June and December. Noncompliance with these covenants for two consecutive semiannual periods would have constituted a default under these agreements. As of June 30, 2009, we were not in compliance with the EBITDA to Financial Expenses ratio contained in these agreements as a result of the recognition of additional provisions for contingencies described above. Because it was probable that we would not comply with this covenant on December 31, 2009, we sought and obtained a waiver from BNDES relating to the June 30 and December 31, 2009 non-compliance. As a result of amendments to these debt instruments in November 2009, the financial ratios contained in those covenants are measured based on the financial statements of Tele Norte Leste Participações S.A., or TNL, our parent company. These covenants require TNL to maintain certain financial ratios, which are measured on a semiannual basis in June and December. Noncompliance with these covenants for two consecutive semiannual periods will constitute a default under these agreements. As of December 31, 2009, based on the financial statements of TNL, we were in compliance with all financial covenants included in our debt instruments with BNDES and we believe that we will comply with all financial covenants contained in our debt instruments with BNDES for foreseeable future periods.

The instruments governing a substantial portion of our indebtedness contain cross-default or cross-acceleration clauses and the occurrence of an event of default under one of these instruments could trigger an event of default under other indebtedness or enable the creditors under other indebtedness to accelerate that indebtedness.

At December 31, 2009, all of our indebtedness to BNDES was secured by pledges of certain of our accounts receivable.

The following discussion briefly describes certain of our significant financing transactions.

### *Debentures*

In June 2006, we issued non-convertible debentures in the aggregate principal amount of R\$1,080 million. The outstanding principal amount of these debentures is payable in three equal annual installments commencing in June 2011. These debentures bear interest at 104% of the CDI rate per annum, payable semi-annually in arrears in June and December of each year.

In December 2008, a general meeting of the holders of the non-convertible debentures approved an amendment to the indenture governing the debentures to change our mandatory purchase terms and conditions and increase the rate of interest on these debentures to the capitalized DI rate plus 3.5% per annum. In January 2009, we notified the debenture holders that we accepted the terms of this amendment.

## **Table of Contents**

### *Indenture*

In February 2004, we issued and sold US\$200 million aggregate principal amount of our 9.375% notes due 2014. Interest on these notes is payable semiannually in arrears in February and August of each year. We may, at our option, redeem these bonds, in whole but not in part, at a premium over their principal amount plus accrued interest and additional amounts, if any.

### *BNDES Facilities*

#### ***2004 Credit Facility***

In August 2004, we entered into a credit facility with BNDES under which BNDES agreed to disburse loans in multiple tranches in an aggregate principal amount of up to R\$1,268 million. The proceeds of these loans were used to fund investments in our fixed-line network and in operational improvements to meet the targets established in the General Plan on Universal Service and in the General Plan on Quality Goals during the period of July 2003 to December 2006.

Each tranche disbursed under this credit facility consists of (1) a loan that matures in February 2011 and bears interest at the TJLP rate plus 5.5% per annum, which is currently payable monthly in arrears, and (2) a loan that matures in April 2011 and bears interest at the *Cesta de Moedas* rate plus 5.5% per annum, which is currently payable monthly in arrears. The outstanding principal amount of each of these loans is payable in 60 equal monthly installments ending on their respective maturity dates.

As of December 31, 2009, the aggregate principal amount outstanding under the loans bearing interest based on the TJLP rate was R\$255 million and the aggregate principal amount outstanding under the loans bearing interest based on the *Cesta de Moedas* rate was R\$38 million.

#### ***2006 Credit Facility***

In November 2006, we entered into a credit facility with BNDES under which BNDES and several financial institutions agreed to disburse loans in multiple tranches in an aggregate principal amount of up to R\$2,104 million. The proceeds of these loans were used to fund investments in our fixed-line network and in operational improvements to meet the targets established in the General Plan on Universal Service and in the General Plan on Quality Goals.

Each tranche disbursed under this credit facility consists of (1) a loan that bears interest at the TJLP rate plus 4.3% per annum, which is currently payable monthly in arrears, and (2) a loan that bears interest at the TJLP rate plus 2.3% per annum, which is currently payable monthly in arrears. The outstanding principal amount of each of these loans is payable in 60 equal monthly installments commencing in June 2009.

As of December 31, 2009, the aggregate principal amount outstanding under the loans bearing interest at the TJLP rate plus 4.3% was R\$1,826 million and the aggregate principal amount outstanding under the loans bearing interest at the TJLP rate plus 2.3% was R\$49 million.

#### ***2008 Loan Agreement***

In February 2008, Brasil Telecom Mobile entered into a loan agreement with BNDES under which BNDES disbursed a loan in the principal amount of R\$260 million. The proceeds of this loan agreement were used to fund our investment in the expansion and modernization of our wireless network. This loan bears interest at the TJLP rate plus 3.52% per annum, payable quarterly in arrears through September 2010 and monthly in arrears thereafter. The principal amount of this loan is payable in 84 equal monthly installments commencing in October 2010. At December 31, 2009, the outstanding principal amount under this loan was R\$260 million.

## **Table of Contents**

### ***2009 Credit Facility***

In December 2009, Brasil Telecom and Brasil Telecom Mobile entered into credit facilities with BNDES under which BNDES agreed to disburse loans in two tranches in an aggregate principal amount of up to R\$1,389 million. The proceeds of the loans under this credit facility are to be used to fund investments in expansion and improvement of our fixed-line and mobile networks and in operational improvements to meet the targets established by ANATEL during the period from 2009 through 2011.

Each tranche disbursed under this credit facility consists of (1) a loan that bears interest at the TJLP rate plus 3.95% per annum, payable quarterly in arrears through December 2011 and monthly in arrears thereafter, and (2) a loan that bears interest at a fixed rate of 4.5% per annum, payable quarterly in arrears through December 2011 and monthly in arrears thereafter. The outstanding principal amount of each of these loans is payable in 84 equal monthly installments commencing in January 2012.

As of December 31, 2009, the aggregate principal amount outstanding under the loans bearing interest at the TJLP rate plus 3.95% was R\$275 million and the aggregate principal amount outstanding under the loans bearing interest at 4.5% was R\$25 million.

As of December 31, 2009, the aggregate principal amount outstanding under this credit facility was R\$300 million.

### ***Syndicated Credit Facility***

In March 2004, we entered into a syndicated credit facility under which we were permitted to borrow up to ¥27.5 billion. We borrowed an aggregate amount of ¥21.6 billion under this facility in April 2004. The proceeds of this loan were used to fund our capital expenditure program for 2003.

The Japan Bank of International Cooperation, or JBIC, has guaranteed the repayment of 97.5% of the principal amount of and interest due on this loan. JBIC receives a fee in the amount of 1.25% per annum of 97.5% of the aggregate principal amount of the loan outstanding from time to time for this guarantee.

The loan under this credit facility bears interest at a rate equal to LIBOR Yen plus 1.92% per annum, payable semiannually in arrears in March and September of each year. The principal amount of this loan is payable in ten equal semi-annual installments commencing in March 2011. At December 31, 2009, the outstanding principal amount under this loan was ¥6,472 million (US\$70 million).

### ***Mid-West (FCO)***

In July 2008, we entered into a financing agreement with a Brazilian financial institution under which the Mid-West Financing Constitutional Fund (FCO) agreed to disburse two loans in the aggregate principal amount of R\$75 million. The proceeds of these loans were used to expand our voice and data networks in the States of Goiás, Mato Grosso, Mato Grosso do Sul and the Federal District.

The loans under this financing agreement bear interest at a rate of 10% per annum, which is currently payable monthly in arrears, with a 15% discount available for timely payment of the interest payments under these loans. The principal amount of these loans are payable in 60 equal monthly installments commencing in September 2009. At December 31, 2009, the outstanding principal amount under this loan was R\$80 million.

### **Off-Balance Sheet Arrangements**

We do not currently have any transactions involving off-balance sheet arrangements.

**Table of Contents****Contractual Commitments**

The following table summarizes significant contractual obligations and commitments at December 31, 2009:

	Payments Due by Period				Total
	Less than One Year	One to Three Years	Three to Five Years	More than Five Years	
	(in millions of reais)				
Loans and financings (1)	R\$ 859	R\$ 1,563	R\$ 692	R\$ 238	R\$ 3,352
Debentures (2)	11	1,080			1,091
Swap adjustments (3)	133	65			198
Concession fees (4)		228	130	385	1,043
Usage rights (5)	99	316	196	98	709
Pension plan contributions	103	310	207	59	679
Capital lease obligations	5				5
Total contractual obligations and commitments	R\$ 1,210	R\$ 3,562	R\$ 1,225	R\$ 1,080	R\$ 7,077

- (1) Includes estimated future payments of interest on our loans and financings, calculated based on interest rates and foreign exchange rates applicable at December 31, 2009 and assuming that all amortization payments and payments at maturity on our loans and financings will be made on their scheduled payment dates.
- (2) Includes estimated future payments of interest on our debentures, calculated based on interest rates applicable at December 31, 2009 and assuming that all amortization payments and payments at maturity on our debentures will be made on their scheduled payment dates.
- (3) Includes accrued and unpaid interest as of December 31, 2009.
- (4) Consists of estimated bi-annual fees due to ANATEL under our concession agreements equal to 2.0% of the net operating revenues of Brasil Telecom that are derived from the provision of local fixed-line services (excluding taxes and social contributions) during the immediately preceding year. These estimated amounts are calculated based on our results for the year ended December 31, 2009.
- (5) Consists of payments due to ANATEL for radio frequency licenses. Includes accrued and unpaid interest as of December 31, 2009. We are also subject to contingencies with respect to tax, civil, labor and other claims and have made provisions for accrued liability for legal proceedings related to certain tax, civil, labor and other claims of R\$4,655 million at December 31, 2009, of which we have made judicial deposits of R\$2,781 million. See Item 8. Financial Information Legal Proceedings and note 25 to our audited consolidated financial statements included in this annual report.

**U.S. GAAP Reconciliation**

Our net loss in accordance with Brazilian GAAP was R\$1,143 million in 2009, and our net income was R\$1,030 million in 2008 and R\$800 million in 2007. Under U.S. GAAP, we would have reported net income of R\$4,882 million in 2009, R\$1,088 million in 2008 and R\$1,046 million in 2007.

Our shareholders' equity in accordance with Brazilian GAAP was R\$11,095 million at December 31, 2009 and R\$6,241 million at December 31, 2008. Under U.S. GAAP, we would have reported shareholders' equity of R\$24,246 million at December 31, 2009 and R\$9,422 million at December 31, 2008.

**Table of Contents**

The principal differences between Brazilian GAAP and U.S. GAAP that affected our net income in 2009, 2008 and 2007, as well as shareholders equity at December 31, 2009 and 2008, are described in note 32 to our audited consolidated financial statements included in this annual report. The major differences relate to the accounting treatment of the following items:

capitalized interest;

business combinations;

pension plan;

earnings per share;

comprehensive income;

predecessor accounting;

combination of entities under common control;

dividends;

presentation of non-controlling interest;

revenue recognition; and

segment reporting.

For a discussion of the principal differences between Brazilian GAAP and U.S. GAAP as they relate to our financial statements and a reconciliation of net income and shareholders equity, see note 32 to our audited consolidated financial statements included in this annual report.

**Table of Contents****ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES**

Our board of directors (*conselho de administração*) and our board of executive officers (*diretoria*) are responsible for operating our business.

**Board of Directors**

Our board of directors is a decision-making body responsible for, among other things, determining policies and guidelines for our business and our wholly-owned subsidiaries and controlled companies. Our board of directors also supervises our board of executive officers and monitors its implementation of the policies and guidelines that are established from time to time by the board of directors. Under the Brazilian Corporation Law, our board of directors is also responsible for hiring independent accountants.

Our bylaws provide for a board of directors of seven members and seven alternate members. As of the date of this annual report, our board of directors has two vacancies and is currently composed of five members and their respective alternate members. During periods of absence or temporary unavailability of a regular member of our board of directors, the corresponding alternate member substitutes for the absent or unavailable regular member.

The members of our board of directors are elected at general meetings of shareholders for three-year terms and are eligible for reelection. The terms of all current members expire at our annual shareholders meeting in 2011. Members of our board of directors are subject to removal at any time with or without cause at a general meeting of shareholders. Although our bylaws do not contain any citizenship or residency requirements for members of our board of directors, the members of our board of directors must be shareholders of our company. Our board of directors is presided over by the chairman of the board of directors, and, in his absence, on an interim basis, by his designated alternate. The chairman of our board of directors is elected at a general meeting of shareholders from among the members of our board of directors, serves for a three-year term and is eligible for reelection.

Our board of directors ordinarily meets once every month and extraordinarily when a meeting is called by the chairman or any two other members of our board of directors. Decisions of our board of directors require a quorum of a majority of the directors and are taken by a majority vote of those directors present.

The following table sets forth certain information with respect to the current members of our board of directors and their alternates.

<b>Name</b>	<b>Position</b>	<b>Member Since</b>	<b>Age</b>
José Mauro Mettrau Carneiro da Cunha	Chairman	February 2009	59
Maxim Medvedovsky	Alternate	February 2009	36
João de Deus Pinheiro de Macêdo	Vice Chairman	February 2009	61
Pedro Jereissati	Alternate	February 2009	31
Eurico de Jesus Teles Neto	Director	February 2009	53
Otávio Marques de Azevedo	Alternate	February 2009	58
José Augusto da Gama Figueira	Director	February 2009	61
João José de Araújo Pereira Pavel	Alternate	February 2009	27
Antonio Cardoso dos Santos (1)	Director	March 2008	59

(1) Elected by the preferred shareholders.

We summarize below the business experience, areas of expertise and principal outside business interests of our current directors and their alternates.

---

**Table of Contents**
**Directors**

*José Mauro Mettrau Carneiro da Cunha.* Mr. Cunha currently serves as chairman of our board of directors, and he has served as chairman of the board of directors of TNL since April 2007. He has also been an alternate director of TmarPart since April 2008, and was a member of the board of directors of Telemar from December 1999 to July 2002, before he rejoined the board of directors of Telemar, as chairman, in April 2007. Mr. Cunha has held several executive positions at BNDES, and was a member of its board of executive officers from 1991 to 2002. He was the vice president of strategic planning of Braskem S.A. from February 2003 to October 2005, and was a business consultant from November 2005 to February 2007. He was a member of the board of directors of Braskem S.A. from July 2007 to April 2010, Light Serviços de Eletricidade S.A. from December 1997 to July 2000, Aracruz Celulose S.A. from June 1997 to July 2002, FUNTTEL from December 2000 to January 2002, FUNCEX- Fundação Centro de Estudos do Comércio Exterior from June 1997 to January 2002, and Politeno Indústria e Comércio S.A. from April 2003 to April 2005. Mr. Cunha holds a bachelor's degree in mechanical engineering from Universidade Católica de Petrópolis in Rio de Janeiro and a master's degree in industrial and transportation projects from Instituto Alberto Luiz Coimbra de Pós-Graduação (COPPE) at Universidade Federal do Rio de Janeiro. He attended the Executive Program in Management at the Anderson School at the University of California in Los Angeles.

*João de Deus Pinheiro de Macêdo.* Mr. Macêdo currently serves as the vice chairman of our board of directors and is the planning officer of TNL. Mr. Macêdo served as business officer of Telemar Matriz from August 1998 to April 2000, and from May 2000 to September 2001 he served as individual client officer at the Rio de Janeiro branch. From 1985 to 1998, he served as the operations officer at Telecomunicações da Bahia S.A., or Telebahia, and was responsible for customer service, sales, operations and plant maintenance. In 1971, he started his career at Telebahia as supervisor of implementation and maintenance. At Telebahia, he managed the equipment division, the department of capital operations and the department of marketing and services. Mr. Macêdo holds a bachelor's degree in electric and electronic engineering from Universidade Federal da Bahia (UFBA). He attended a course in Transmission Systems (NEC Corp. and OKI Electric Industry Co., Ltd. Japan), Digital Switching (Nippon Telegraph & Telephone Corp. Japan) and Quality Management (Japan).

*Eurico de Jesus Teles Neto.* Mr. Neto currently serves as a member of our board of directors and is also the legal officer of Telemar, a position that he has held since April 2007. Mr. Neto served as legal manager of Telemar from April 2005 to April 2007. He previously served as manager of the real estate division at Telecomunicações da Bahia S.A. starting in 1980, where he went on to hold the position of legal consultant in 1990. Mr. Neto holds a bachelor's degree in economics and a degree in legal sciences from Universidade Católica de Salvador. He holds a post graduate degree in Employment Law from Estácio de Sá.

*José Augusto da Gama Figueira.* Mr. Figueira currently serves as an alternate member of our board of directors. He has served as a director of TmarPart since April 2008, an executive officer of TmarPart since June 1999, an alternate director of TNL since March 2007, and an alternate director of Telemar since 2002. He previously served as an alternate member of TNL's board of directors from April 2003 to March 2004. He has also served as president of Instituto Telemar since August 2001. He was an executive officer of Pegasus, a company in the Andrade Gutierrez Group, from July 1997 to August 1999, and a member of the fiscal council of Telecomunicações do Espírito Santo S.A., Telecomunicações do Piauí S.A. and Telecomunicações do Amazonas S.A. from April to December 1999. He holds a bachelor's degree in electrical engineering from the Universidade do Estado do Rio de Janeiro and an MBA from Fundação Getulio Vargas (FGV).

*Antonio Cardoso dos Santos.* Mr. Cardoso was elected to our board of directors as a nominee of our preferred shareholders in March 2008. He was a member of the board of directors of Telemig Celular S.A. from 2004 until 2007, a member of the board of directors of Amazônia Celular from 2004 to 2007, a member of the board of directors of Telecomunicações do Pará S.A. in 2001 and a member of the board of directors of Telecomunicações de Santa Catarina S.A. in 1999. Mr. Cardoso has also served as a member of the fiscal council of Companhia Telefônica Melhoramento e Resistência, Telecomunicações do Paraná S.A., Telecomunicações da Bahia S.A., Telecomunicações do Mato Grosso S.A., Telecomunicações de Rondônia S.A., Telecomunicações do Piauí S.A., Telecomunicações do Rio Grande do Norte S.A., Telecomunicações de Goiás S.A., Telecomunicações de Brasília S.A. and CRT. Mr. Cardoso received a bachelor's degree in business administration from São Paulo Superior School of Business Administration and holds a *Latu Sensu* Graduate degree in Business Management from Associação de Ensino Unificado do Distrito Federal (AEUDF).

---

## **Table of Contents**

### ***Alternate Directors***

*Maxim Medvedovsky.* Mr. Medvedovsky currently serves as an alternate member of our board of directors, and he has served as the administrative officer of Grupo Oi since January 2009. Mr. Medvedovsky was the officer responsible for the shared services center of Grupo Oi from March 2006 to December 2008, the officer responsible for relations with service providers of Telemar from 2004 to 2006, and the officer responsible for interconnection and roaming of Oi from 2001 to 2004. He started at Telemar in September 1998 as corporate planning manager. Mr. Medvedovsky worked on the privatization process of Sistema Telebrás at Banco Patrimônio / Salomon Brothers, and was responsible for the appraisal of TNL. He also previously served as telecommunications analyst at Banco Patrimônio in 1998 and as telecommunications analyst and resources manager of Banco Icatu from 1994 to 1998. Mr. Medvedovsky holds a bachelor's degree in Electric Engineering from Pontifícia Universidade Católica - Rio de Janeiro and an MBA from Fundação Dom Cabral (FDC) and FGV.

*Pedro Jereissati.* Mr. Jereissati currently serves as an alternate member of our board of directors. He has also served as a member of the board of directors of TmarPart since April 2006, chief executive officer and investor relations officer of TmarPart since April 2008, a member of the board of directors of TNL since April 2008 and an alternate director of Telemar since 2002. Mr. Jereissati has also served as an officer of Instituto Telemar since April 2004. He has been a member of the board of directors of Iguatemi Empresa de Shopping Centers S.A. since January 2007, Jereissati Participações S.A. since April 2008, Contax Participações S.A. since April 2006, and was a member of the board of directors of Pegasus Telecom from August 2000 to December 2002. Mr. Jereissati joined the Jereissati Group in 1995 and worked in the operational area in Empresa de Shopping Centers S.A. He served as the new business director of Jereissati Participações S.A. from April 2001 until June 2006, and as chief financial officer of Iguatemi Empresa de Shopping Centers S.A. until April 2008. Mr. Jereissati has served as an executive officer of L.F. Tel S.A. or L.F. Tel, and La Fonte Telecom since May 2006. Mr. Jereissati is a member of the board of director of CTX Participações S.A. and Privatinvest Participações S.A. Mr. Jereissati holds a bachelor's degree in business administration from Fundação Armando Álvares Penteado and has an MBA from the Kellogg School of Management at Northwestern University.

*Otávio Marques de Azevedo.* Mr. Azevedo currently serves as an alternate member of our board of directors. He has also served as a member of the board of directors of TmarPart since October 2004 and the chairman of the board of directors of TmarPart since April 2008, a member of the board of directors of TNL since October 2003 and its chairman from October 2003 to October 2004, and an alternate director of Telemar since 2002. Mr. Azevedo is an electrical engineer with extensive experience in the Brazilian telecommunications industry. He has served as the chief executive officer of AG Telecom Participações S.A., or AG Telecom, since April 2008 and has served as president of Grupo Andrade Gutierrez S.A. and Andrade Gutierrez Telecomunicações Ltda. since 1993. Mr. Azevedo was the chairman of ANATEL's consulting board from February 2001 to February 2002. He served as an executive vice president of TNL from August 1998 to February 1999 and was responsible for the implementation of TNL's first business plan. He was the vice president of Telebrás S.A. from 1991 to 1993. Mr. Azevedo is the president of the board of director of CTX Participações S.A, Privatinvest Participações S.A and Alium Participações S.A. and a member of the board of directors of Telemar and Contax Participações. Mr. Azevedo holds a bachelor's degree in electrical engineering from Pontifícia Universidade Católica de Minas Gerais.

*João José de Araújo Pereira Pavel.* Mr. Pavel currently serves as an alternate member of our board of directors, and he has served as an alternate member of the board of directors of TNL since May 2008 and an alternate member of the board of directors of Telemar since May 2008. He joined the Grupo Andrade Gutierrez in December 2003 in the investment area and became a manager of financial projects in August 2006. He worked at Light S.A. as manager of financial projects from August 2006 to April 2008 following the Andrade Gutierrez Group's investment in Light S.A. in 2006. He returned to the investment area of Grupo Andrade Gutierrez in May 2008. He holds a bachelor's degree in economics from Instituto Brasileiro de Mercado de Capitais (IBMEC) in Rio de Janeiro.

### **Executive Officers**

Our board of executive officers is our executive management body. Our executive officers are our legal representatives and are responsible for our internal organization and day-to-day operations and the implementation of the general policies and guidelines established from time to time by our board of directors.

**Table of Contents**

Our bylaws require that the board of executive officers consist of between five and nine members, including a chief executive officer. Each officer is responsible for business areas that our board of directors assigns to them. The members of our board of executive officers, other than our chief executive officer have no formal titles (other than the title of executive officer or *Diretor* ), although the board of directors may assign specific attributions, such as chief financial officer, investor relations officer and chief operating officer.

The members of our board of executive officers are elected by our board of directors for three-year terms and are eligible for reelection. The current term of all of our executive officers ends on the date after our first board of directors meeting following our annual shareholders meeting in 2012. Our board of directors may remove any executive officer from office at any time with or without cause. According to the Brazilian Corporation Law, executive officers must be residents of Brazil but need not be shareholders of our company. Our board of executive officers holds meetings when called by our chief executive officer.

The following table sets forth certain information with respect to the current members of our board of executive officers.

<b>Name</b>	<b>Position</b>	<b>Date Elected/ Appointed</b>	<b>Age</b>
Luiz Eduardo Falco Pires Corrêa	Chief Executive Officer	January 2009	48
Alex Waldemar Zornig	Chief Financial Officer and Investor Relations Officer	January 2009	51
João Francisco da Silveira Neto	Executive Officer	March 2010	46
Júlio Cesar Pinto	Executive Officer	January 2009	58

Summarized below is information regarding the business experience, areas of expertise and principal outside business interests of our current executive officers.

*Luiz Eduardo Falco Pires Corrêa.* Mr. Falco has been our chief executive officer since January 2009. Mr. Falco has served as the chief executive officer of TNL since October 2002, a member of the board of directors of Telemar since June 2006 and the chief executive officer of Telemar since June 2006. He worked for TAM S.A. from March 1982 to September 2001 in several capacities, including production manager, technology officer and as vice president of marketing and sales. Mr. Falco holds a bachelor's degree in aviation engineering from Instituto Tecnológico da Aeronáutica (ITA) and has completed continuing education courses in marketing and finance at FGV.

*Alex Waldemar Zornig.* Mr. Zornig has been our chief financial officer and investor relations officer since January 2009. Mr. Zornig has served as the chief financial officer and investor relations officer of TNL since November 2008 and the chief financial officer and investor relations officer of Telemar since November 2008. He began his career at PriceWaterhouse where he worked for 14 years (including three years in London) and last served in the capacity of an officer. He served as chief financial officer head of corporate administrative services at BankBoston, where he worked for 13 years (including two years in Boston). He served as an officer at Banco Itaú from May 1993 to August 2007. Prior to joining our company, Mr. Zornig was an executive vice president at Banco Safra, where he was in charge of all support areas of the bank from September 2007 to November 2008. Mr. Zornig holds a bachelor's degree in accounting from the Universidade de São Paulo, an MBA from FGV and a post-graduate degree from the London Business School.

*João Francisco da Silveira Neto.* Mr. Silveira Neto has been one of our executive officers since March 2010. Mr. Silveira Neto has been market director of the Telemar group since 2009 and was retail and marketing manager of Oi from 2004 to 2009. He began working in 2002 for the Telemar group as corporate manager. Mr. Silveira Neto has held positions at several large corporations, including marketing and sales manager at Hewlett Packard, General Manager of Casa Centro and Inacom do Brasil and President of Supermercados ABC. He holds a bachelor's degree in mechanical engineering from ITA and a post-graduate degree in accounting from FGV in São Paulo.

## **Table of Contents**

*Julio Cesar Pinto.* Mr. Pinto has been one of our executive officers since January 2009. Mr. Pinto has served as an executive officer of TNL and the officer responsible for TNL's internal audit function since 2002, an executive officer of Telemar June 2006 and a member of the board of directors of Telemar from 2002 to April 2009. Mr. Pinto has held several positions in the financial areas of large companies including MRS Logística S.A., ATL Algar Telecom Leste S.A. (Claro), Globex Utilidades S.A., Aracruz Celulose S.A., Xerox do Brasil S.A. and Minerações Brasileiras Reunidas S.A. He holds a bachelor's degree in accounting from the Faculdade Moraes Júnior, and he completed several courses in the United States, including the Stanford University Financial Management Program, the Xerox Corporation Middle Management Program and the Bourse Game for Citibank N.A.

### **Fiscal Council**

The Brazilian Corporation Law requires us to establish a permanent or non-permanent fiscal council (*conselho fiscal*). Our bylaws provide for a permanent fiscal council composed of between three and five members and their respective alternate members. The fiscal council is a separate corporate body independent of our board of directors, our board of executive officers and our independent accountants. The primary responsibility of the fiscal council is to review our management's activities and our financial statements and to report their findings to our shareholders.

The members of our fiscal council are elected by our shareholders at the annual shareholders' meeting for one-year terms and are eligible for reelection. The terms of the members of our fiscal council expire at the next annual shareholders' meeting. Under the Brazilian Corporation Law, the fiscal council may not contain members who are members of our board of directors or our board of executive officers, spouses or relatives of any member of our board of directors or our board of executive officers, or our employees. To be eligible to serve on our fiscal council, a person must be a resident of Brazil and either be a university graduate or have been a company officer or fiscal council member of another Brazilian company for at least three years prior to election to our fiscal council. Holders of preferred shares without voting rights and non-controlling common shareholders that together hold at least 10.0% of our voting share capital are each entitled to elect one member and his or her respective alternate to the fiscal council.

The following table sets forth certain information with respect to the current members of our fiscal council and their alternates.

<b>Name</b>	<b>Position</b>	<b>Member Since</b>	<b>Age</b>
Aparecido Carlos Correia Galdino	Member	February 2009	58
Sidnei Nunes	Alternate	February 2009	49
Éder Carvalho Magalhães	Member	February 2009	40
Sergio Bernstein	Alternate	February 2009	72
Allan Kardec de Melo Ferreira	Member	February 2009	62
Dênis Kleber Gomide Leite	Alternate	February 2009	63
Marcos Duarte dos Santos (1)	Member	April 2010	39
Carlos Eduardo Parente de Oliveira Alves (1)	Alternate	April 2010	32

(1) Elected by the preferred shareholders.

We summarize below the business experience, areas of expertise and principal outside business interests of the current members of our fiscal council and their alternates.

### ***Fiscal Council Members***

*Aparecido Carlos Correia Galdino.* Mr. Galdino currently serves as a member of our fiscal council, and he has served as a member of the fiscal council of TmarPart since April 2008 and an alternate member of the fiscal council of TNL since April 2009. He joined the Jereissati Group in 1971 and has been managing officer and investor relations officer of Jereissati Participações S.A. since April 1990. He has served as the chief financial officer of La Fonte Participações S.A. since April 1990, and has been a member of the board of directors of L.F. Tel S.A. since February 2008, Iguatemi Empresa de Shopping Centers S.A. since July 2008 and La Fonte Telecom S.A. since April 1991. He has served as a member of the fiscal council of Contax Participações S.A. since April 2008, as a member

**Table of Contents**

of the fiscal council of Tele Norte Celular Participações S.A. from May 2008 to present and as a member of the fiscal council of Amazônia Celular S.A. from May 2008 to March 2009. Mr. Galdino holds a bachelor's degree in business administration from *Faculdades Integradas Princesa Isabel*.

*Éder Carvalho Magalhães*. Mr. Magalhães serves as a member of our fiscal council. Since 1995, Mr. Magalhães has been directly responsible for the accounting of all companies of the Grupo Andrade Gutierrez. In January 2002, he also became an officer of the real estate division of Grupo Andrade Gutierrez. He previously served as the controller of Fiat Finanças Brasil Ltda. from 1993 to 1995. Mr. Magalhães began his career as a trainee at PriceWaterhouse in 1987, and served as audit supervisor from 1992 to 1993. Mr. Magalhães holds a bachelor's degree in accounting from Instituto Cultural Newton Paiva Ferreira and an MBA from IBMEC.

*Allan Kardec de Melo Ferreira*. Mr. Ferreira currently serves as a member of our fiscal council. He has also served as an alternate member of the fiscal council of TmarPart since April 2006 and a member of the fiscal council of TNL since April 2002. From 1971 to 1993, he was an in-house counsel with Construtora Andrade Gutierrez. His current activities include management consultancy services to a number of companies in the civil, commercial and tax areas, participation in corporate restructuring processes (mergers, spin-offs, disposals, sale of assets) of the telecommunications companies of the Andrade Gutierrez Group and in several bidding processes conducted by the Minas Gerais Roads Department (*Departamento de Estrada de Rodagem de Minas Gerais*), the Belo Horizonte Traffic Department (*Empresa de Transporte e Trânsito de Belo Horizonte*), the Ministry of Communications, the National Road Department (*Departamento Nacional de Estradas de Rodagem*) and ANATEL. He holds a degree in law from Pontifícia Universidade Católica de Minas Gerais, in addition to having participated in several extension courses in foreign trade, in particular export services, at Fundação Centro de Comércio Exterior, FDC, Foreign Trade Ministry, and Construtora Andrade Gutierrez.

*Marcos Duarte dos Santos*. Mr. Duarte currently serves as a member of our fiscal council as a nominee of our preferred shareholders. He has served as a member of the fiscal council of Telemar since April 2007. Mr. Duarte was a vice president and fixed income trader at CSFB Garantia from 1997 to 1998, a vice president for Bankers Trust Company in New York from 1996 to 1997, and a vice president for Bankers Trust Company in Rio de Janeiro from 1994 to 1996. He served as a member of the fiscal councils of Tele Norte Celular S.A., Tele Ceará S.A. and Tele Espírito Santo S.A. from 2001 to 2002. He holds a bachelor's degree in production engineering from the Universidade Federal do Rio de Janeiro.

***Alternate Fiscal Council Members***

*Sidnei Nunes*. Mr. Nunes currently serves as an alternate member of our fiscal council, has served as an alternate member of the fiscal council of TNL since April 2007, an alternate member of the fiscal council of TmarPart since April 2008 and an alternate member of the fiscal council of Telemar since April 2007. He has been managing officer of Jereissati Participações S.A. since April 2008, chief financial officer of La Fonte Telecom S.A. since April 2008 and managing officer of L.F. Tel since April 2006. Mr. Nunes has served as a member of the boards of directors of Iguatemi Empresa de Shopping Centers S.A. since April 2006, L.F. Tel since April 2006, and Grande Moinho Cearense S.A. since April 2005. Mr. Nunes is a financial officer and controller of several companies of the Jereissati Group since September 1995. Mr. Nunes holds bachelor's degrees in business administration and accounting from the Faculdade de Administração Paulo Eiró and an MBA from the University of São Paulo.

*Sérgio Bernstein*. Mr. Bernstein currently serves as an alternate member of our fiscal council. He has also served as a member of the fiscal council of TNL since April 2007 and a member of the fiscal council of Telemar since April 2008. He has served as an alternate member of the board of directors and vice president of Jereissati Participações S.A. from 1990 to 2007. Mr. Bernstein is a civil engineer and has extensive experience serving as an officer of Brazilian companies. Mr. Bernstein started his career as a trainee in finance at General Electric S.A. in Brazil in 1961 where he held several managerial positions and was elected vice president of finance in 1984. Mr. Bernstein holds a bachelor's degree in civil engineering from the National School of Engineering in Rio de Janeiro.

*Denis Kleber Gomide Leite*. Mr. Leite currently serves as an alternate member of our fiscal council, and he has served as a member of the fiscal council of TmarPart since April 2006, an alternate member of the fiscal council of TNL since April 2002 and an alternate member of the fiscal council of Telemar since April 2009. Mr. Leite served as a member of the board on economic matters for the commercial trade association of the State of Minas Gerais

---

## **Table of Contents**

(*Conselho de v.c. Assuntos Econômicos da Associação Comercial de Minas Gerais*) from October 1993 up to December 1998; the infrastructure board of the National Industry Confederation in Brazil (*Conselho de Infraestrutura da CNI - Confederação Nacional da Indústria*) from October 1993 up to December 1998; the commission for technical and political matters of TELEXPO from October 1993 up to December 1998; and the São Paulo Chamber of Telecommunications and Information Technology Chamber (*Câmara Paulista de Telecomunicações e Informática*) from October 1993 up to December 1998. He has professional experience in commercial, general, financial and human resources administration, and he has held senior management positions in the following companies: Cia. de Tecnologia da Informação do Estado de Minas Gerais; Sociedade Mineira de Engenheiros; Fertilizantes Fosfatados Fosfértil Grupo Petrobrás Fertilizantes; Federação das Indústrias de Minas Gerais; and Instituto Horizontes e Instituto Brasileiro para o Desenvolvimento das Telecomunicações. Mr. Leite holds a degree in law from the Universidade Federal de Minas Gerais, a degree in business administration from the União de Negócios e Administração and a master's degree in financial administration from the FGV.

*Carlos Eduardo Parente de Oliveira Alves*. Mr. Alves currently serves as an alternate member of our fiscal council as a nominee of our preferred shareholders. He has worked at Polo Capital as an analyst and variable income manager in the electricity, paper and cellulose, oil, petrochemical and transportations sectors since 2003. Between 2000 and 2003 he worked at Banco UBS as an analyst for the Latin America electricity and sanitation sector. Mr. Alves holds a bachelor's degree in production engineering from Pontifícia Universidade Católica do Rio de Janeiro.

## **Corporate Risk Management**

In January 2009, TNL adopted a Risk Management and Internal Controls Methodology and Policy and established a risk management office to implement and monitor this policy, which was designed to enhance our practices relating to corporate governance, risk and controls. The creation of this office enabled the implementation and cultural dissemination of a risk management and internal controls methodology, consistent with international standards such as the Committee of Sponsoring Organizations of the Treadway Commission, or COSO, ERM (Enterprise Risk Management) and ISO 31000.

This corporate risk management system provides to the managers an interactive tool for the management of risks and controls inherent in our business processes, assisting them in decision making, in achieving established goals, in loss prevention and in the safeguarding of assets.

TNL has worked to expand the scope of risk management and internal controls throughout our company through an integrated approach with its board of executive officers, allowing our company to make decisions based on the key risks and opportunities of our business.

During 2009, TNL's risk management office identified and assessed risk factors inherent to our business processes, enabling managers responsible for those processes to strengthen the infrastructure of controls through actions to mitigate and reduce likely impacts.

Among the actions planned for 2010 to improve our management of risks and internal controls is the development of a mathematical model to calculate the quantitative impacts inherent to the risks of our company to enable us to increase the accuracy of our information processes and the transparency and safety of our strategic decision making processes.

## **Compensation**

According to our bylaws, our shareholders are responsible for establishing the aggregate compensation we pay to the members of our board of directors and our board of executive officers, as well as the individual compensation we pay to members of our fiscal council. Our shareholders determine this compensation at the annual shareholders' meeting. Once aggregate compensation is established, our board of directors is responsible for distributing such aggregate compensation individually to the members of our board of directors and our board of executive officers in compliance with our bylaws. Our board of directors does not have a compensation committee.

---

## **Table of Contents**

The aggregate compensation paid by us to all members of our board of directors, board of executive officers and our fiscal council for services in all capacities was R\$35 million in 2009. This amount includes pension, retirement or similar benefits for our officers and directors. On April 27, 2010, our shareholders (acting at the annual shareholders' meeting) established the following compensation for the year 2010:

*board of directors:* an aggregate limit of R\$187,740;

*board of executive officers:* an aggregate limit of R\$1,043,000, not including possible amounts paid as benefits, representation allowance or profit sharing; and

*each regular member of our fiscal council:* R\$2,500 per month, plus travel and lodging expenses (the statutory minimum set forth in the Brazilian Corporation Law and in our bylaws).

We compensate our alternate directors for each meeting of our board of directors that they attend. We compensate alternate members of our fiscal council for each meeting of our fiscal council that they attend.

Our executive officers receive the same benefits generally provided to our employees, such as medical (including dental) assistance, private pension plan and meal vouchers. Like our employees, our executive officers also receive an annual bonus equal to one-month's salary (known as the thirteenth (monthly) salary in Brazil), an additional one-third of one-month's salary for vacation, and contributions of 8.0% of their salary into a defined contribution pension fund known as the Guarantee Fund for Time of Service (*Fundo de Garantia por Tempo de Serviço*). Members of our board of directors and fiscal council are not entitled to these benefits.

Members of our board of directors, board of executive officers and fiscal council are not parties to contracts providing for benefits upon the termination of employment other than, in the case of executive officers, the benefits described above.

### **Share Ownership**

Our common and preferred shares held by the members of our board of directors and board of executive officers, supervisory or management bodies, including outstanding stock options, do not exceed 1% of either class of our outstanding shares.

### **Stock Option Plans**

#### ***2000 Stock Option Plan***

On April 28, 2000, our shareholders approved a stock option plan for officers and employees of our company and our subsidiaries. This plan has expired. However, the rights vested under stock option agreements entered into while this plan was effective remain valid and effective according to the terms of those agreements. This plan was divided into two separate programs: Program A, under which no options were granted, and Program B as described below.

#### ***Program B***

Under Program B, we granted options to purchase preferred shares of our company. The exercise price of these options was established by a managing committee based on the market price of our preferred shares on the date of the grant of the option and is adjusted by the IGP-M between the agreement execution date and the payment date.

**Table of Contents**

The remaining outstanding options granted under Program B are exercisable until December 31, 2011. Information related to outstanding options under Program B is summarized below:

	2008		2009	
	Preferred share options	Average exercise price (in reais)	Preferred share options	Average exercise price (in reais)
Opening balance	256,855	16.88	79,512	19.04
Exercised options	(162,084)	17.01		
Cancelled options	(15,259)	17.60	(47,869)	18.96
Closing balance	79,512	19.04	31,643	18.87

As of December 31, 2009, the premiums on these options payable to our company, calculated under the Black-Scholes method on the date of grant, would be approximately R\$88,000 assuming all outstanding options will be fully exercised. As a result of the departure of four executives in early 2009, 15,259 of the preferred share options outstanding as of December 31, 2008 were canceled.

For more information on our stock option plans, see notes 26(c) and 32(j) to our audited consolidated financial statements included in this annual report.

**Employees**

As of December 31, 2009, we had a total of 3,619 employees. All of our employees are employed on a full-time basis, divided into the following functions: network operations, sales and marketing, information technology, call center operations, support areas and authorized agents.

The table below sets forth a breakdown of our employees by main category of activity and geographic location as of the dates indicated:

	As of December 31,		
	2007	2008	2009
<b>Number of employees by category of activity:</b>			
Plant operation, maintenance, expansion and modernization	2,340	2,162	1,468
Sales and marketing	2,095	2,141	1,328
Call center operations	10,860	14,064	
Support areas	1,309	1,434	823
Authorized agents	165	650	
<b>Total</b>	<b>16,769</b>	<b>20,451</b>	<b>3,619</b>
<b>Number of employees by geographic location:</b>			
Goiás	4,138	6,779	212
Paraná	4,814	5,273	410
Federal District	2,175	2,377	605
Santa Catarina	1,997	2,107	290

Acre	42	43	24
Rio de Janeiro	39	42	636
Minas Gerais	7	8	23
Ceará	2	2	1
United States, Venezuela and the Bermuda Islands	21	24	41

Total

16,769 20,541 3,619

## **Table of Contents**

We negotiate separate collective bargaining agreements with the local unions in each of the states in Region II for our company and each of our subsidiaries operating in such states. New collective bargaining agreements with these unions are negotiated every year. We maintain good relations with each of the unions representing our employees. As of December 31, 2009, approximately 15% of our employees were members of state labor unions associated either with the National Federation of Telecommunications Workers (*Federação Nacional dos Trabalhadores em Telecomunicações*), or Fenattel, or with the Interstate Federation of Telecommunications Workers (*Federação Interstadual dos Trabalhadores em Telecomunicações*), or Fittel. Some employees in particular job categories are affiliated with other unions specific to such categories. We have never experienced a strike that had a material effect on our operations.

### ***Employee Benefits***

#### ***Pension Benefit and Retiree Welfare Plans***

##### ***Fundação Sistel (PBS-A Plan)***

Sistel is a not-for-profit private pension fund created by Telebrás in November 1977 to supplement the benefits provided by the federal government to employees of the former Telebrás System. Since the privatization of Telebrás, the Sistel Benefits Plan (*Plano de Benefícios da Sistel Assistidos*), or PBS-A plan, a defined benefit plan, has been sponsored by the fixed-line telecommunications companies that resulted from the privatization of Telebrás, including our company. The PBS-A plan is self-funded and has been closed to new members since January 2000. Contributions to the PBS-A plan are contingent on the determination of an accumulated deficit and we are jointly and severally liable, along with other fixed-line telecommunications companies, for 100% of any insufficiency in payments owed to members of the PBS-A plan.

As of December 31, 2009, the PBS-A plan had a surplus of R\$2,300 million and we were not required to make contributions to the PBS-A plan in 2007, 2008 or 2009.

##### ***Fundação Sistel (PAMA Plan and PCE Plan)***

Since the privatization of Telebrás, the Medical Assistance Plan to the Retired (*Plano de Assistência Médica ao Aposentado*), or PAMA, a health-care plan managed by Sistel, has been sponsored by the fixed-line telecommunications companies that resulted from the privatization of Telebrás, including our company. The PAMA plan is defined contribution plan and has been closed to new members since January 2000, other than employees that are covered by the PBS-A plan who have not yet elected to join the PAMA plan.

In December 2003, we and the other telecommunications companies that resulted from the privatization of Telebrás began sponsoring the PCE Special Coverage Plan, or the PCE plan, a defined contribution plan health-care plan managed by Sistel. The PCE plan is open to employees that are covered by the PBS-A plan who have not yet elected to join the PCE plan. From March to July 2004, December 2005 to April 2006 and June to November 2008, we offered incentives to our employees to migrate from the PAMA plan to the PCE plan. As of December 31, 2009, the PAMA plan had a deficit of R\$3 million and we were required to make contributions to the PAMA plan of less than R\$1 million in each of 2008 and 2009.

##### ***Fundação Atlântico de Seguridade Social (TSCPREV Plan)***

In December 1999, we and the other companies that participate in the plans managed by Sistel agreed to withdraw the active participants in these plans and each company agreed to establish its own separate new plan for these participants. In February 2000, we began sponsoring the TSCPREV Plan, a private defined contribution pension plan and settled benefit plan offered to our employees that participated in the PBS-A plan and new employees who were employed by our company after the privatization of the Telebrás System. Approximately 80% of our active employees that were participants in the PBS-A plan migrated to the TSCPREV plan. In March 2005, Fundação 14 de Previdência Privada, or Fundação 14, a private not-for-profit pension fund created by Brasil Telecom Holding in 2004 to manage the TSCPREV plan, began managing the TSCPREV plan. In January 2010, Fundação Atlântico de Seguridade Social, or FASS, a private not-for-profit social security fund manager created by TNL in 2004 to manage Telemar's pension plans, began managing the TSCPREV plan.

---

**Table of Contents**

The TCSPREV plan offers three categories of benefits to its members: (1) risk benefits, which are funded according to the defined benefit method; (2) programmable benefits, which are funded according to the defined contribution method; (3) proportional paid benefits, applicable to those employees who migrated to a defined contribution method with their rights reserved as contributors to the defined benefit system. This plan was closed to new participants in March 2003; however, we resumed offering programmable benefits under this plan to new employees beginning in March 2005. We are liable for any deficits incurred by the TCSPREV plan according to the existing proportion of the contributions we make to this plan. As of December 31, 2009, the TCSPREV plan had a surplus of R\$119 million and we were not been required to make contributions to the TCSPREV plan in 2007, 2008 or 2009.

***Fundação Atlântico de Seguridade Social (Fundador/Alternativo Plan and BrTPREV Plan)***

In 2000, as a result of our acquisition of CRT, we assumed liability for retirement benefits to CRT's employees by means of the creation of the Fundador/Alternativo plan, a defined benefit plan, which is managed by Fundação BrTPREV, a private not-for-profit pension fund created by CRT in 1971 to manage the CRT plans. This plan has been closed to new members since October 2002.

In October 2002, we began sponsoring the BrTPREV plan, a private defined contribution pension plan and settled benefit plan offered to our employees that participated in the Fundador/Alternativo plan and new employees of our company. Approximately 96% of our active employees that were participants in the Fundador/Alternativo plan migrated to the BrTPREV plan. This plan was offered to our new employees from March 2003 to February 2005, when it was closed to new participants. In March 2005, Fundação BrTPREV began managing these plans. In January 2010, FASS began managing the Fundador/Alternativo plan and the BrTPREV plan.

The BrTPREV plan offers three categories of benefits to its members: (1) risk benefits, which are funded according to the defined benefit method; (2) programmable benefits, which are funded according to the defined contribution method; (3) proportional paid benefits, applicable to those employees who migrated to a defined contribution method with their rights reserved as contributors to the defined benefit system. We are liable for any deficits incurred by the Fundador/Alternativo plan or the BrTPREV plan according to the existing proportion of the contributions we make to this plan. As of December 31, 2009, the Fundador/Alternativo plan and the BrTPREV plan had an aggregate deficit of R\$687 million, which is being amortized through 2022. Since February 2003, we have been making additional monthly contributions to the Fundador/Alternativo plan and the BrTPREV plan to reduce this deficit. During 2009, we contributed an aggregate of R\$161 million to the Fundador/Alternativo plan and the BrTPREV plan, including R\$148 million contributed to reduce the deficit.

***PAMEC-BrT Plan***

We also provide health care benefit for some retirees and pensioners that are members of the TCSPREV plan under the PAMEC-BrT plan, a defined benefit plan. The contributions for the PAMEC-BrT plan were fully paid in July 1998, through a single payment. In November 2007, the assets and liabilities of PAMEC-BrT were transferred from Fundação 14 to us and we began managing the plan. As a result of the transfer, we do not recognize assets to cover current expenses and we fully recognize the actuarial obligations as liabilities. As of December 31, 2009, the PAMEC-BrT plan had a deficit of R\$3 million and we were required to make contributions to the PAMEC-BrT plan of less than R\$1 million in each of 2008 and 2009.

For more information on our pension benefit and retiree welfare plans, see notes 26 and 33 to our audited consolidated financial statements included in this annual report.

**Table of Contents***Medical, Dental and Employee Assistance Benefits*

We provide our employees with medical and dental assistance, pharmacy and prescription drug assistance, group life insurance and meal, food and transportation assistance. We and our employees cover the costs of these benefits on a shared basis. In 2009, we contributed R\$22 million to the medical and dental assistance and medicine plans, R\$23 million for the Worker's Food Program (*Programa de Alimentação do Trabalhador*), or PAT, and R\$7 million to the other benefits programs.

*Profit Sharing Plans*

Our collective bargaining agreements with several labor unions require us to pay bonuses to employees who reach certain operational targets. As of December 31, 2008, we had provisioned R\$99 million to be distributed in bonuses with respect to 2008. As a result of the acquisition of control of our company by Telemar, the profit sharing plan applied to our company has been revised to align this plan with the plan adopted by Telemar. As of December 31, 2009, we had provisioned R\$29 million to be distributed in bonuses with respect to 2009.

*Education and Training*

We contribute to the professional qualification of our employees by offering training for the development of organizational and technical skills. Approximately 15,915 hours of distance education training were offered in 2009 to Brasil Telecom and third-party employees. In order to meet the demand for technical training, we supported our second group of employees pursuing advanced degrees in engineering at the Universidade de Brasília.

In 2009, the Program of MBA Scholarships, administered in conjunction with IBMEC, in Rio de Janeiro and the Federal District of Brasília, provided 106 employees from all over Brazil with scholarships to improve their technical and managerial performance at our company. In 2009, approximately R\$6 million was invested in the qualification and training of our employees.

**ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS****Major Shareholders**

Brasil Telecom has two outstanding classes of share capital: common shares and preferred shares with no par value. Generally, only Brasil Telecom's common shares have voting rights. Brasil Telecom's preferred shares have voting rights only in exceptional circumstances.

As of June 28, 2010, Brasil Telecom had 203,423,176 issued common shares and 399,597,370 issued preferred shares, including 13,231,556 preferred shares held in treasury.

At June 28, 2010, we had approximately 1,532,648 shareholders, including 113 U.S. resident holders of our common shares and approximately 183 U.S. resident holders of our preferred shares (including The Bank of New York Mellon, as depositary under our American Depositary Receipt, or ADR, facilities). At June 28, 2010, there were 13,894,543 common shares (including common shares represented by ADSs) and 119,353,102 preferred shares (including preferred shares represented by ADSs) held by U.S. resident holders.

The following table sets forth information concerning the ownership of our common shares and preferred shares at June 28, 2010, by each person whom we know to be the owner of more than 5% of our outstanding common shares and our outstanding preferred shares, and by all of our directors and executive officers as a group. Except for the shareholders listed below, we are not aware of any other of our shareholders holding more than 5% of any class of our share capital. Our principal shareholders have the same voting rights with respect to each class of our shares that they own as other holders of shares of that class.

Name	Common Shares		Preferred Shares		Total	
	Number of Shares	%	Number of Shares	%	Number of Shares	%
Coari Participações S.A.	161,990,001	79.6	128,675,049	33.3	290,665,050	49.3

**Table of Contents**

- (1) Represents 161,990,001 common shares and 128,675,049 preferred shares held by Coari. Telemar owns all of the issued and outstanding shares of Coari.
- (2) Represents 161,990,001 common shares and 128,675,049 preferred shares held by Coari. Telemar owns all of the issued and outstanding shares of Coari. TNL owns 97.4% of the common shares and 70.1% of the preferred shares of Telemar, representing 82.0% of the outstanding share capital of Telemar. TNL disclaims ownership of our shares owned by Coari other than with respect to its proportionate interest in these shares.
- (3) Represents 161,990,001 common shares and 128,675,049 preferred shares held by Coari. Telemar owns all of the issued and outstanding shares of Coari. TmarPart owns 53.7% of the common shares of TNL, representing 17.9% of the outstanding share capital of TNL, and 10.0% of the preferred shares of Telemar, representing 5.5% of the outstanding share capital of Telemar. TmarPart disclaims ownership of our shares owned by Coari other than with respect to its proportionate interest in these shares.
- (4) Based on filing of Aviva plc with the SEC on Schedule 13D on April 29, 2010.

***Changes in Share Ownership***

*Closing of the Share Purchase Agreement*

On January 8, 2009, Copart 1 acquired all of the outstanding shares of Invitel and 12,185,836 common shares of Brasil Telecom Holding owned by the shareholders of Invitel for an aggregate purchase price of R\$5,371 million.

*Tender Offers for Common Shares of Brasil Telecom Holding and Brasil Telecom*

Under Article 254-A of the Brazilian Corporation Law and CVM Instruction No. 361, of March 5, 2002, as amended, Telemar was required to offer to purchase any and all common shares of Brasil Telecom Holding and our company held by public shareholders as a result of Telemar's acquisition of control over Brasil Telecom Holding and our company.

On May 22, 2009, (1) Copart 1 announced the commencement of a mandatory tender offer for any and all outstanding common shares of Brasil Telecom Holding at a purchase price of R\$61.63 per share (adjusted by the fluctuation in average daily rate of the CDI, from January 8, 2009 until the date payment was made), and (2) Copart 2 announced the commencement of a mandatory tender offer for any and all of our outstanding common shares at a purchase price of R\$57.76 per share (adjusted by the fluctuation in average daily rate of the CDI from January 8, 2009 until the date payment was made).

The auctions with respect to these tender offers took place on the BM&FBOVESPA on June 23, 2009. In the auctions, (1) Copart 1 acquired 40,452,227 common shares of Brasil Telecom Holding, representing 30.5% of the outstanding common shares of Brasil Telecom Holding and 11.2% of the outstanding share capital of Brasil Telecom Holding, for an aggregate purchase price of R\$2,618 million, and (2) Copart 2 acquired 630,872 common shares of Brasil Telecom, representing 0.3% of the outstanding common shares of Brasil Telecom and 0.1% of the outstanding share capital of Brasil Telecom, for an aggregate purchase price of R\$38 million.

*Merger of Copart 1 into Brasil Telecom Holding*

On July 31, 2009, (1) Invitel merged with and into Solpart, with Solpart as the surviving company, (2) Solpart merged with and into Copart 1, with Copart 1 as the surviving company, and (3) Copart 1 merged with and into Brasil Telecom Holding, with Brasil Telecom Holding as the surviving company. As a result of these mergers, Coari owned 54.7% of the outstanding share capital, including 91.7% of the outstanding voting share capital, of Brasil Telecom Holding.

## **Table of Contents**

### *Merger of Copart 2 into Brasil Telecom*

On July 31, 2009, Copart 2 merged with and into Brasil Telecom, with Brasil Telecom as the surviving company. As a result of this transaction, Coari owned 10.9% of the outstanding share capital, including 0.3% of the outstanding voting share capital, of Brasil Telecom.

### *Merger of Brasil Telecom Holding into Brasil Telecom*

On September 30, 2009, the shareholders of Brasil Telecom and Brasil Telecom Holding approved a merger under Brazilian law of Brasil Telecom Holding with and into Brasil Telecom, with Brasil Telecom as the surviving company. In the Brasil Telecom merger:

each issued and then outstanding common share of Brasil Telecom Holding (other than any common shares held by shareholders seeking withdrawal of their common shares) was converted automatically into 1.2190981 common shares of Brasil Telecom;

each issued and then outstanding preferred share of Brasil Telecom Holding (including preferred shares of Brasil Telecom Holding represented by the Brasil Telecom Holding ADSs) was converted automatically into 0.1720066 common shares of Brasil Telecom and 0.9096173 preferred shares of Brasil Telecom;

holders of Brasil Telecom Holding ADSs were entitled to receive 0.860033 Common ADSs of Brasil Telecom and 1.516028 Preferred ADSs of Brasil Telecom for each Brasil Telecom Holding ADS they held; and

all issued and then outstanding shares of Brasil Telecom held by Brasil Telecom Holding were cancelled.

As a result of the Brasil Telecom merger, Brasil Telecom Holding ceased to exist and, as of June 28, 2010, Coari owns 49.3% of the total outstanding share capital of Brasil Telecom, including 79.6% of its outstanding voting share capital.

### ***TmarPart***

TmarPart has two outstanding classes of share capital: common shares and preferred shares with no par value. Generally, only TmarPart's common shares have voting rights. TmarPart's preferred shares have voting rights only in exceptional circumstances.

Certain of TmarPart's shareholders are parties to shareholders' agreements that address, among other matters, (1) voting rights at TmarPart shareholders' meetings, and (2) rights of first refusal and preemptive rights for disposal and purchase. See TmarPart Shareholders' Agreements.

On April 25, 2008, TmarPart announced that its shareholders had agreed to a restructuring of their holdings of TmarPart. In July 2009, Fiago Participações S.A., or Fiago, one of the shareholders of TmarPart, distributed the shares of TmarPart that it held to PREVI, PETROS, FUNCEF and FASS. On June 17, 2010, BNDESPar conducted an auction of a portion of its common shares of TmarPart over the BM&FBOVESPA, and PETROS and FUNCEF each exercised its respective pre-emptive rights with respect to the sale of these shares. The transfer of these shares from BNDESPar to FUNCEF and PETROS is subject to approval by ANATEL.

**Table of Contents**

The following table sets forth information concerning the ownership of the common shares and preferred shares of TmarPart following the completion of the sale of these shares.

Name	Common Shares		Preferred Shares		Total	
	Number of Shares	%	Number of Shares	%	Number of Shares	%
BNDES Participações S.A.	462,234,643	16.9	1,000,000	100	463,234,643	16.9
L.F. Tel S.A.	529,095,885	19.3			529,095,885	19.3
AG Telecom Participações S.A.(1)	529,095,885	19.3			529,095,885	19.3
PREVI Caixa de Previdência dos Funcionários do Banco do Brasil	354,506,325	13.0			354,506,325	13.0
Fundação Atlântico de Seguridade Social.	314,569,805	11.5			314,569,805	11.5
FUNCEF Fundação dos Economiários Federais.	273,688,938	10.0			273,688,938	10.0
PETROS Fundação Petrobrás de Seguridade Social	273,688,937	10.0			273,688,937	10.0

(1) Represents direct ownership of 352,730,588 common shares owned by AG Telecom and indirect ownership of 176,365,294 common shares held by Luxemburgo Participações S.A., a subsidiary of AG Telecom.

The following is a brief description of the principal shareholders of TmarPart:

**BNDES Participações S.A.**, or BNDESPar, is a subsidiary of BNDES, that offers long-term financing to Brazilian companies to contribute to the country's development. BNDESPar is dedicated to strengthening the capital structure of private companies in Brazil and developing the capital markets in Brazil in a manner that is consistent with the operational priorities and policies established by BNDES. See Related Party Transactions BNDES Facilities.

**L.F. Tel S.A.** is a subsidiary of La Fonte Telecom S.A., a holding company that is part of the Jereissati Group. The Jereissati Group partially owns and manages nine shopping malls in the Southern and Southeastern regions of Brazil. In 1997, the Jereissati Group made its first investment in the telecommunications sector by acquiring a small stake in the Band B telephone mobile operators Americel and Telet, which it sold in 2001. L.F. Tel has then been investing in telecommunications in Brazil through TNL and its subsidiaries.

**AG Telecom Participações S.A.** is a subsidiary of Andrade Gutierrez S.A. responsible for managing the telecommunications business of the Andrade Gutierrez Group. This Group is focused on three core businesses: (1) engineering and construction work in Brazil and abroad; (2) public concessions in Brazil; and (3) telecommunications in Brazil.

**PREVI Caixa de Previdência dos Funcionários do Banco do Brasil**, or PREVI, is a private pension entity that manages pension plans for the benefit of the employees of the Bank of Brazil and PREVI's employees.

**Fundação Atlântico de Seguridade Social** is a private supplementary pension entity that TNL incorporated in August 2004, and which manages private pension plans for the benefit of the employees of TNL and its subsidiaries.

**FUNCEF Fundação dos Economiários Federais**, or FUNCEF, is a private pension entity that manages pension plans for the benefit of the employees of *Caixa Econômica Federal*, a Brazilian Federal Economic Bank.

**PETROS Fundação Petrobrás de Seguridade Social** is a private supplementary pension entity established by Petrobrás, whose objective is to establish, administer and manage the benefit plans of various entities with whom it has entered into advisory agreements.

**TmarPart Shareholders Agreements**

On April 25, 2008, TmarPart's shareholders entered into two shareholders' agreements. We refer to the Shareholders' Agreement among AG Telecom, L.F. Tel, Asseca Participações S.A., or Asseca, BNDESPar, Fiago,

## **Table of Contents**

and FASS as parties, with TmarPart, PREVI, PETROS, FUNCEF and Andrade Gutierrez Investimentos em Telecomunicações S.A., as intervening parties, as the Global Shareholders Agreement. We refer to the Shareholders Agreement among AG Telecom, L.F. Tel, Asseca and FASS as parties, with TmarPart and Andrade Gutierrez Investimentos em Telecomunicações S.A., as intervening parties, as the Control Group Shareholders Agreement.

On June 20, 2008, the 352,730,590 common shares of TmarPart owned by Asseca were distributed to L.F. Tel and Andrade Gutierrez Investimentos em Telecomunicações S.A., with each receiving 176,365,295 common shares of TmarPart. As a result, Asseca is no longer a shareholder of TmarPart and has no rights under the Global Shareholders Agreement or the Control Group Shareholders Agreement.

In July 2009, Fiago distributed the shares of TmarPart that it held to PREVI, PETROS, FUNCEF and FASS. As a result of this distribution, Fiago is no longer a shareholder of TmarPart and has no rights under the Global Shareholders Agreement. Following this distribution, PREVI holds sufficient voting share capital of TmarPart to designate one member of the board of directors of each of the controlled subsidiaries and his or her alternate, as described below.

### ***Global Shareholders Agreement***

The initial term of the Global Shareholders Agreement expires on the later of April 25, 2048 or the expiration date of the last to expire of the concessions or authorizations held by TmarPart or its subsidiaries. The term of the Global Shareholders Agreement may be extended for successive periods of 10 years with the consent of each of the parties thereto.

The parties to the Global Shareholders Agreement have agreed to the following provisions with respect to elections of members of the boards of directors and executive officers, and the voting of their shares, of TNL, Telemar, Brasil Telecom Holding and Brasil Telecom and each of TNL's other subsidiaries that have annual net operating revenues equal to or greater than R\$100 million, which we refer to as the controlled subsidiaries:

AG Telecom, L.F. Tel, and FASS will together have the right to designate a majority of the members of the board of directors of each of the controlled subsidiaries;

Each increment of 9% of the voting share capital of TmarPart held by each of AG Telecom, L.F. Tel, FASS, BNDESPar, PREVI, PETROS and FUNCEF will entitle that party to designate one member of the board of directors of each of the controlled subsidiaries and his or her alternate;

PREVI, PETROS and FUNCEF will be entitled to aggregate their shares with BNDESPar to determine their eligibility to exercise the rights described above;

AG Telecom, L.F. Tel, FASS, BNDESPar, PREVI, PETROS and FUNCEF will together, through rules outlined in the Global Shareholders Agreement, select the chief executive officers of each of the controlled subsidiaries;

the chief executive officer of TNL will select the other executive officers of TNL;

the chief executive officer of TNL, in conjunction with the chief executive officer of each of the other controlled subsidiaries, will select the other executive officers of that controlled subsidiary;

BNDESPar, PREVI, PETROS, and FUNCEF, collectively, have the right to designate one member to the Fiscal Council of each of the controlled subsidiaries; and

## Edgar Filing: BRASIL TELECOM SA - Form 20-F

AG Telecom, L.F. Tel, FASS, BNDESPar, PREVI, PETROS and FUNCEF will hold pre-meetings prior to meetings of shareholders and of the boards of directors of the controlled subsidiaries and will vote their TmarPart shares and instruct their representatives on the these boards of directors to vote in accordance with the decisions made at the pre-meetings.

## **Table of Contents**

Under the Global Shareholders Agreement, each of the parties has agreed:

not enter into other shareholders agreements with respect to its TmarPart shares, other than the Control Group Shareholders Agreement, and not to amend the Control Group Shareholders Agreement without the consent of all parties to the Global Shareholders Agreement;

not to grant any liens on any of its TmarPart shares;

to grant a right of first refusal and tag along rights to the other parties to the Global Shareholders Agreement with respect to any sale of its TmarPart shares; and

to sell its TmarPart shares to the other parties to the Global Shareholders Agreement in the event of a transfer of control of such shareholder.

### ***Control Group Shareholders Agreement***

The initial term of the Control Group Shareholders Agreement expires on April 25, 2048 and may be extended for successive periods of 10 years with the consent of each of the parties thereto.

Under the Control Group Shareholders Agreement, each of the parties has agreed:

to hold pre-meetings prior to the pre-meetings to be held pursuant to the Global Shareholders Agreement and to vote their TmarPart shares in accordance with the decisions made at such pre-meetings;

not to enter into other shareholders agreements, other than the Global Shareholders Agreement; and

that any TmarPart shares sold by a party to the Control Group Shareholders Agreement to any other party to this agreement will remain subject to this agreement.

### **Related Party Transactions**

The following summarizes the material transactions that we have engaged in with our principal shareholders and their affiliates in 2009.

Under the Brazilian Corporation Law, each of our directors, their alternates and our executive officers cannot vote on any matter in which they have a conflict of interest and such transactions can only be approved on reasonable and fair terms and conditions that are no more favorable than the terms and conditions prevailing in the market or offered by third parties. However, if one of our directors is absent from a meeting of our board of directors, that director's alternate may vote even if that director has a conflict of interest, unless the alternate director shares that conflict of interest or has another conflict of interest.

### ***BNDES Facilities***

For a description of our credit facilities with BNDES, see Item 5. Operating and Financial Review and Prospects Indebtedness and Financing Strategy Long-Term Indebtedness. For other information about these agreements, see note 28 to our audited consolidated financial statements included in this annual report.

### ***Telemar***

## Edgar Filing: BRASIL TELECOM SA - Form 20-F

The Brazilian General Telecommunications Law requires all telecommunications service providers to interconnect their networks with those of other providers on a non-discriminatory basis. As a result, our company, on the one hand, and Telemar and its subsidiaries, on the other hand, make certain interconnection payments to each other on terms established by ANATEL. In 2009, Telemar and its subsidiaries paid an aggregate of R\$125.6 million to us and we paid an aggregate of R\$57.8 million to Telemar and its subsidiaries related to interconnection payments. See Item 4. Information on the Company Our Services Network Usage Service (Interconnection Services).

## **Table of Contents**

In February 2009, Brasil Telecom Holding subscribed private debentures issued by Telemar. As a result of the merger of Brasil Telecom Holding into our company on September 30, 2009, we became the holders of these debentures. In March 2009, Brasil Telecom Mobile subscribed additional private debentures issued by Telemar. The outstanding principal amount of these debentures is payable at maturity in December 2013. These debentures bear interest at a rate of CDI plus 4.0% per annum, payable with the principal at maturity. At December 31, 2009, the outstanding amount of these debentures was R\$1,675 million.

## **ITEM 8. FINANCIAL INFORMATION** **Consolidated Statements and Other Financial Information**

Reference is made to Item 19 for a list of all financial statements filed as part of this annual report.

### **Legal Proceedings**

#### ***General***

We are a party to certain legal proceedings arising in the normal course of business, including civil, administrative, tax, social security and labor proceedings. We classify our risk of loss in legal proceedings as remote, possible or probable, and we only record provisions for reasonably estimable probable losses, as determined by our management. As of December 31, 2009, the total estimated amount in controversy for those proceedings in respect of which the risk of loss was deemed probable or possible totaled approximately R\$6,038 million, and we had established provisions of R\$1,873 million as of that date. Our provisions for legal contingencies are subject to monthly monetary adjustments. For a detailed description of our provisions for contingencies, see note 25 to our audited consolidated financial statements included in this annual report.

#### ***Tax Proceedings***

As of December 31, 2009, the total estimated contingency in connection with tax proceedings against us in respect of which the risk of loss was deemed probable or possible totaled R\$2,242 million, and we had recorded provisions of R\$463 million and made judicial deposits of R\$23 million related to these proceedings.

#### ***Value-Added State Taxes (ICMS)***

Under the regulations governing the ICMS, in effect in all Brazilian states, telecommunications companies must pay ICMS on every transaction involving the sale of telecommunications services they provide. We may record ICMS credits for each of our purchases of operational assets. The ICMS regulations allow us to apply the credits we have recorded for the purchase of operational assets to reduce the ICMS amounts we must pay when we sell our services.

We have received various tax assessments challenging the amount of tax credits that we recorded to offset the ICMS amounts we owed. Most of the tax assessments are based on two main issues: (1) whether ICMS is due on those services subject to the Local Service Tax (*Imposto Sobre Serviços de Qualquer Natureza*), or ISS; and (2) whether some of the assets we have purchased are related to the telecommunications services provided, and, therefore, eligible for an ICMS tax credit. A small part of the assessments that are considered to have a probable risk of loss are related to: (1) whether certain revenues are subject to ICMS tax or ISS tax; (2) offset and usage of tax credits on the purchase of goods and other materials, including those necessary to maintain the network; and (3) assessments related to non-compliance with certain ancillary (non-monetary) obligations.

---

## **Table of Contents**

As of December 31, 2009, we deemed the risk of loss as possible with respect to approximately R\$709 million of these assessments and had not recorded any provisions in respect of these assessments. As of that date, we had recorded provisions in the amount of R\$470 million for those assessments in respect of which we deemed the risk of loss as probable.

### *Local Service Tax (ISS)*

We have received various tax assessments claiming that we owe ISS taxes on supplementary services. We have challenged these assessments on the basis that ISS taxes should not be applied to supplementary services (such as, among others things, equipment leasing and technical and administrative services) provided by telecommunications service providers, because these services do not clearly fit into the definition of telecommunications services.

As of December 31, 2009, we deemed the risk of loss as possible with respect to approximately R\$282 million of these assessments and had not recorded any provisions in respect of these assessments. As of that date, we had recorded provisions in the amount of R\$10 million for those assessments in respect of which we deemed the risk of loss as probable.

### *FUST*

The FUST is a fund that was established to promote the expansion of telecommunications services to non-commercially viable users. We are required to make contributions to the FUST. Due to a change by ANATEL in the basis for calculation of our contributions to the FUST, we made provisions for additional contributions to this fund. With respect to the calculation of the contribution to the FUST, the Brazilian Association of Fixed-Line Companies (*Associação Brasileira das Empresas de Telefonia Fixa*) of which we are members, filed a lawsuit to request a review of the applicable legislation.

As of December 31, 2009, we deemed the risk of loss as possible with respect to approximately R\$123 million of these assessments and had not recorded any provisions in respect of these assessments. As of that date, we had recorded provisions in the amount of \$4 million for assessments of the FUST in respect of which we deemed the risk of loss as probable.

### *Contributions to the INSS*

Pursuant to Brazilian social security legislation, companies must pay contributions to the National Social Security Institute (*Instituto Nacional do Seguro Social*), or INSS, based on their payroll. In the case of outsourced services, the contracting parties must, in certain circumstances, withhold the social contribution due from the third-party service providers and pay the retained amounts to the INSS. In other cases, the parties are jointly and severally liable for contributions to the INSS. Assessments have been filed against us primarily relating to claims regarding joint and several liability and claims regarding the percentage to be used to calculate workers' compensation benefits and other amounts subject to social security tax.

As of December 31, 2009, we deemed the risk of loss as possible with respect to approximately R\$286 million of these assessments and had not recorded any provisions in respect of these assessments. As of that date, we had recorded provisions of less than R\$1 million for those assessments in respect of which we deemed the risk of loss as probable.

### *Civil Claims*

As of December 31, 2009, the total estimated contingency in connection with civil claims against us, including ANATEL proceedings, in respect of which the risk of loss was deemed probable or possible totaled R\$4,631 million, and we had recorded provisions of R\$3,374 million made judicial deposits of R\$577 million related to these claims.

---

**Table of Contents**

*Administrative Proceedings*

We are subject to administrative proceedings brought by ANATEL, which primarily relate to the establishment of customer service kiosks, the failure to achieve certain goals defined in the General Plan on Universal Service relating to the installation of individual access lines, and compliance with ANATEL rules relating to technical support for wireless internet users. As of December 31, 2009, we deemed the risk of loss as possible with respect to approximately R\$156 million of these claims and had not recorded any provisions in respect of these claims. As of that date, we had recorded provisions in the amount of R\$201 million for those claims in respect of which we deemed the risk of loss as probable.

*Financial Interest Agreement (CRT and Community Telephone Program)*

As successor to CRT, which we acquired in July 2000, we are subject to various civil claims. The claims, filed in 1998 and 1999, allege: (1) error in the sale of CRT's share capital; (2) the illegality of bidding procedure No. 04/98; (3) errors in the calculation of the number of shares offered; (4) procedural nonconformities in the shareholders' meeting that approved the sale of shares of CRT; and (5) errors in the valuation of the shares of CRT.

We are also a defendant in several claims filed by users of telephone lines in the State of Rio Grande do Sul. Prior to our acquisition of control of CRT in July 2000, CRT entered into financial interest agreements with its fixed-line subscribers. Under these financial interest agreements, customers subscribing to CRT's fixed-line service had the right to subscribe to a number of CRT shares. The number of shares to be issued to such subscribers was determined based on a formula that divided the cost of the fixed-line subscription by the book value of CRT's shares.

Beginning in June 1997, certain of CRT's fixed-line subscribers began to file suits in which they claimed that the calculation used by CRT to arrive at the number of shares to be issued pursuant to the financial interest agreements was incorrect and resulted in the claimants receiving too few shares.

In addition, as successor to Telecomunicações do Mato Grosso do Sul S.A., Telems, Telecomunicações de Goiás S.A., Telegoiás and Telecomunicações do Mato Grosso S.A., Telemat, which were operating companies that Brasil Telecom Holding acquired in the privatization of Telebrás and which were subsequently merged into our company, we are subject to various civil claims in connection with telephone programs (Community Telephone Programs) established in the States of Mato Grosso do Sul, Goiás and Mato Grosso.

In 2009, two court decisions significantly changed the assumptions underlying our estimate of the potential losses relating to these suits.

On March 30, 2009, the Superior Court of Justice ruled that for suits that had yet to be adjudicated, the number of shares to be issued must be calculated using CRT's balance sheet at the end of the month in which the shares were issued. However, for those lawsuits that have already been adjudicated, the number of shares to be issued must be calculated according to the most recent judicial decision, which, in most of the cases, used the balance sheet at the end of the year prior to the date on which the shares were issued.

On May 28, 2009, a member of the Brazilian Supreme Court published a decision ruling that the financial interest agreements are not subject to a statute of limitations, which resulted in a change in the likelihood of an unfavorable outcome in these pending cases to probable.

As of December 31, 2009, we deemed the risk of loss as possible with respect to approximately R\$595 million of these claims and had not recorded any provisions in respect of these claims. As of that date, we had recorded provisions in the amount of R\$2,665 million for those claims in respect of which we deemed the risk of loss as probable.

*Splice do Brasil Telecomunicações e Eletrodomésticos Ltda.*

Splice do Brasil Telecomunicações e Eletrodomésticos Ltda., or Splice, brought an action against us in connection with a contractual dispute over pricing terms. During 2009, we settled the most relevant part of this claim for R\$53 million.

---

## **Table of Contents**

### *Customer Service Centers*

We are a defendant in 39 civil class action lawsuits filed by the Attorney General of the National Treasury jointly with certain consumer agencies demanding the re-opening of customer service centers. The lower courts rendered decisions unfavorable to us in 24 of these lawsuits, and we have appealed these decisions. As of December 31, 2009, we had recorded provisions in the amount of R\$27 million for those claims in respect of which we deemed the risk of loss as probable. The Superior Justice Tribunal (*Superior Tribunal de Justica*), after determining that our previous pricing model, which had been contested by consumers, was legal, called for the dismissal of all ongoing proceedings in the Special Civil Courts (*Juizados Especiais Civeis*).

### *Subscription Fees*

We are a defendant in several class action lawsuits and individual claims which contest the legality of the subscription fees charged for fixed-line services. The Superior Justice Tribunal, after determining that our previous pricing model, which had been contested by consumers, was legal, called for the dismissal of all ongoing proceedings in the Special Civil Courts.

### *Labor Claims*

We are a party to a large number of labor claims arising out of the ordinary course of our businesses. We do not believe any of these claims, individually or in the aggregate would have a material effect on our business, financial condition or results of operations if such claims are decided against us. These proceedings generally involve claims for (1) risk premium payments sought by employees working in dangerous conditions, (2) wage parity claims seeking equal pay among employees who do the same kind of work, within a given period of time, and have the same productivity and technical performance, (3) indemnification payments for, among other things, work accidents, occupational injuries, employment stability, child care allowances and achievement of productivity standards set forth in our collective bargaining agreements, (4) overtime wages, and (5) joint liability allegations by employees of third-party service providers.

As of December 31, 2009, the total estimated contingency in connection with labor claims against us in respect of which the risk of loss was deemed probable or possible totaled R\$1,923 million, and we had recorded provisions of R\$794 million and made judicial deposits in the amount of R\$385 million related to these claims.

### *Claims Relating to Telebrás*

The legality of the breakup and privatization of Telebrás has been challenged in numerous legal proceedings, a large majority of which have now been dismissed. A few, however, are still pending. We believe that the final resolution of these proceedings will not have a material adverse effect on our business, financial condition and results of operations.

Telebrás is party to various judicial proceedings and subject to certain other claims and contingencies. Under the terms of the breakup and privatization of Telebrás, Telebrás remains liable for acts committed by Telebrás prior to the date of its breakup and privatization, except for labor and tax related claims, for which Telebrás and its successors (including our company) are jointly and severally liable. We believe that the risk that one of these claims would have a material adverse effect on our company is remote.

### **Dividends and Dividend Policy**

#### *Payment of Dividends*

Our dividend distribution policy has historically included the distribution of periodic dividends, based on annual balance sheets approved by our board of directors. When we pay dividends on an annual basis, they are declared at our annual shareholders meeting, which we are required by the Brazilian Corporation Law and our bylaws to hold by April 30 of each year. When we declare dividends, we are generally required to pay them within 60 days of declaring them unless the shareholders resolution establishes another payment date. In any event, if we declare

**Table of Contents**

dividends, we must pay them by the end of the fiscal year for which they are declared. Under Article 9 of Law 9,249/95 and our bylaws, we also may pay interest attributable to shareholders' equity as an alternative form of dividends upon approval of our board of directors. For a more detailed description of interest attributable to shareholders' equity, see Payment of Dividends and Interest Attributable to Shareholders' Equity Interest Attributable to Shareholders' Equity.

The following table sets forth the dividends and/or interest attributable to shareholders' equity paid to holders of our common shares and preferred shares since January 1, 2005 in *reais* and in U.S. dollars translated from *reais* at the commercial market selling rate in effect as of the payment date.

Year	Payment Date	Nominal <i>Reais</i> per		US\$ equivalent per	
		Common Shares	Preferred Shares	Common Shares	Preferred Shares
2005	January 13, 2005(1)	0.7134	0.7134	0.2641	0.2641
	January 14, 2005(1)	0.8224	0.8224	0.3037	0.3037
	January 16, 2005(1)	0.4433	0.4433	0.1637	0.1637
2007	May 31, 2007(2)	0.7506	0.7506	0.3891	0.3891
2008	April 16, 2008(3)	1.3840	1.3840	0.8288	0.8288
2009	August 10, 2009(4)	0.5924	0.5924	0.3220	0.3220

- (1) Represents interest attributable to shareholders' equity.
- (2) Represents interest attributable to shareholders' equity of R\$0.6375 (US\$0.3305) per common and preferred share, plus dividends of R\$0.1131 (US\$0.0586) per common and preferred share.
- (3) Represents interest attributable to shareholders' equity of R\$0.6403 (US\$0.3834) per common and preferred share, plus dividends of R\$0.7437 (US\$0.4454) per common and preferred share.
- (4) Represents interest attributable to shareholders' equity.

The following discussion summarizes the principal provisions of the Brazilian Corporation Law and our bylaws relating to the distribution of dividends, including interest attributable to shareholders' equity.

**Calculation of Adjusted Net Profits**

At each annual shareholders' meeting, our board of directors is required to recommend how to allocate our net profits for the preceding fiscal year, which recommendation our board of executive officers initially submits to our board of directors for approval. This allocation is subject to approval by our common shareholders. The Brazilian Corporation Law defines net profits for any fiscal year as our net income after income taxes for that fiscal year, net of any accumulated losses from prior fiscal years and any amounts allocated to employees' participation in our net profits in that fiscal year. Under the Brazilian Corporation Law, our adjusted net profits available for distribution are equal to our net profits in any fiscal year, reduced by amounts allocated to our legal reserve and other applicable reserves, and increased by any reversals of reserves that we constituted in prior years.

Our calculation of net profits and allocations to reserves for any fiscal year are determined on the basis of financial statements prepared in accordance with Brazilian GAAP.

**Reserve Accounts**

Under the Brazilian Corporation Law and our bylaws, we are required to maintain a legal reserve. In addition, we are permitted by the Brazilian Corporation Law to establish the following discretionary reserves:

a contingency reserve for an anticipated loss that is deemed probable in future years. Any amount so allocated in a previous year must be reversed in the fiscal year in which the loss had been anticipated if the loss does not occur as projected or charged off in the event that the anticipated loss occurs;

a reserve for investment projects, in an amount based on a capital expenditure budget approved by our shareholders;

---

**Table of Contents**

a special goodwill reserve for the merger, which represents the net amount of the counterpart of the premium amount recorded in the asset, pursuant to provisions of CVM Instruction 319/1999;

an unrealized income reserve described under *Mandatory Distributions* below; and

a tax incentive investment reserve, included in our capital reserve accounts, in the amount of the reduction in our income tax obligations due to government tax incentive programs.

Allocations to each of these reserves (other than the legal reserve) are subject to approval by our common shareholders voting at our annual shareholders meeting.

The Brazilian Corporation Law provides that the legal reserve and the tax incentive investment reserve may be credited to shareholders' equity or used to absorb losses, but these reserves are unavailable for the payment of distributions in subsequent years. The amounts allocated to the other reserves may be credited to shareholders' equity and used for the payment of distributions in subsequent years.

*Legal Reserve Account*

Under the Brazilian Corporation Law and our bylaws, we must allocate 5% of our net profits for each fiscal year to our legal reserve until the aggregate amount of our legal reserve equals 20% of our paid-in capital. However, we are not required to make any allocations to our legal reserve in a fiscal year in which our legal reserve, when added to our other reserves, exceeds 30% of our shareholders' equity. At December 31, 2009, we had a balance of R\$384 million in our legal reserve account.

*Capital Reserve Accounts*

Under the Brazilian Corporation Law, we are also permitted to record a capital reserve that may be used only (1) to absorb losses which exceed retained earnings and profit reserves as defined in the Brazilian Corporation Law, (2) to redeem or repurchase share capital and/or participation certificates, (3) to increase our capital, or (4) if specified in our bylaws (which currently do not so specify), to pay preferred share dividends. Amounts allocated to our capital reserves are unavailable for the payment of distributions and are not taken into consideration for purposes of determining the mandatory distributable amount. At December 31, 2009, we had a balance of R\$7,130 million in our capital reserve accounts.

*Dividend Preference of Preferred Shares*

Under our bylaws, our preferred shareholders are entitled to a minimum annual non-cumulative preferential dividend, or the Minimum Preferred Dividend, equal to the greater of (1) 6.0% per year of their *pro rata* share of our capital, or (2) 3.0% per year of the book value of our shareholders' equity divided by our total number of shares, before dividends may be paid to our common shareholders. Distributions of dividends in any year are made:

first, to the holders of preferred shares, up to the amount of the Minimum Preferred Dividend for such year;

then, to the holders of common shares, until the amount distributed in respect of each common share is equal to the amount distributed in respect of each preferred share; and

thereafter, to the common and preferred shareholders on a *pro rata* basis.

If the Minimum Preferred Dividend is not paid for a period of three years, holders of preferred shares shall be entitled to full voting rights.

---

## **Table of Contents**

### ***Mandatory Distributions***

As permitted by the Brazilian Corporation Law, our bylaws specify that 25% of our adjusted net profits for each fiscal year must be distributed to shareholders as dividends or interest attributable to shareholders' equity. We refer to this amount as the mandatory distributable amount.

Under the Brazilian Corporation Law, the amount by which the mandatory distributable amount exceeds the realized portion of net income for any particular year may be allocated to the unrealized income reserve, and the mandatory distribution may be limited to the realized portion of net income. The realized portion of net income is the amount by which our net income exceeds the sum of (1) our net positive results, if any, from the equity method of accounting for earnings and losses of our subsidiaries and certain associated companies, and (2) the profits, gains or income obtained on transactions maturing after the end of the following fiscal year. As amounts allocated to the unrealized income reserve are realized in subsequent years, such amounts must be added to the dividend payment relating to the year of realization.

In addition to the mandatory distributable amount, our board of directors may recommend that holders of our common shares approve the payment of additional distributions. Distributions made to holders of our preferred shares are computed in determining whether we have paid the required mandatory distribution. We net any payment of interim distributions against the required mandatory distribution for that fiscal year.

The Brazilian Corporation Law permits us to suspend the mandatory distribution in respect of common shares and preferred shares if our board of directors reports to our annual shareholders' meeting that the distribution would be incompatible with our financial condition at that time. Our fiscal council must approve any suspension of the mandatory distribution. In addition, our management must report the reasons of any suspension of the mandatory distribution to the CVM. We must allocate net profits not distributed by our company as a result of a suspension to a special reserve and, if not absorbed by subsequent losses, we must distribute these amounts as soon as our financial condition permits. In case our profits reserves, as defined in the Brazilian Corporation Law, exceed our share capital, the excess must be credited to shareholders' equity or used for the payment of distributions.

### ***Payment of Dividends and Interest Attributable to Shareholders' Equity***

We may pay the mandatory distributable amount as dividends or as interest attributable to shareholders' equity, which is similar to a dividend but is deductible in calculating our income tax obligations.

Because our shares are issued in book-entry form, dividends with respect to any share are automatically credited to the account holding such share. Shareholders who are not residents of Brazil must register with the Brazilian Central Bank in order for dividends, sales proceeds or other amounts with respect to their shares to be eligible to be remitted outside of Brazil.

The common and preferred shares underlying the ADSs are held in Brazil by the depositary, which has registered with the Brazilian Central Bank as the registered owner of our common and preferred shares. Payments of cash dividends and distributions, if any, will be made in Brazilian currency to the depositary. The depositary will then convert such proceeds into dollars and will cause such dollars to be distributed to holders of ADSs. As with other types of remittances from Brazil, the Brazilian government may impose temporary restrictions on remittances to foreign investors of the proceeds of their investments in Brazil, as it did for approximately six months in 1989 and early 1999, and on the conversion of Brazilian currency into foreign currencies, which could hinder or prevent the depositary from converting dividends into U.S. dollars and remitting these U.S. dollars abroad. See Item 3. Key Information Risk Factors Risks Relating to Our Preferred Shares and the ADSs.

### ***Dividends***

We are required by the Brazilian Corporation Law and by our bylaws to hold an annual shareholders' meeting by April 30 of each year. At our annual shareholders' meeting, our common shareholders may vote to declare an annual dividend. Our payment of annual dividends is based on our audited financial statements prepared for our preceding fiscal year.

---

## **Table of Contents**

Any holder of record of shares at the time that a dividend is declared is entitled to receive dividends. Under the Brazilian Corporation Law, we are generally required to pay dividends within 60 days after declaring them, unless the shareholders' resolution establishes another payment date, which, in any case, must occur prior to the end of the fiscal year in which the dividend is declared.

Our board of directors may declare interim dividends based on the accrued profits recorded or the realized profits in our annual or semi-annual financial statements approved by our common shareholders. In addition, we may pay dividends from net income based on our unaudited quarterly financial statements. We may set off any payment of interim dividends against the amount of the mandatory distributable amount for the year in which the interim dividends were paid.

### *Interest Attributable to Shareholders' Equity*

Brazilian companies, including our company, are permitted to pay interest attributable to shareholders' equity as an alternative form of payment of dividends to our shareholders. These payments may be deducted when calculating Brazilian income tax and social contribution tax. The interest rate applied to these distributions generally cannot exceed the Long-Term Interest Rate for the applicable period. The amount of interest paid that we can deduct for tax purposes cannot exceed the greater of:

50% of our net income (after the deduction of the provision for social contribution tax and before the deduction of the provision for corporate income tax) before taking into account any such distribution for the period for which the payment is made; and

50% of the sum of our retained earnings and profit reserves.

Any payment of interest attributable to shareholders' equity to holders of common shares, preferred shares or ADSs, whether or not they are Brazilian residents, is subject to Brazilian withholding tax at the rate of 15%, except that a 25% withholding tax rate applies if the recipient is a resident of a tax haven jurisdiction. A tax haven jurisdiction is a country (1) that does not impose income tax or whose income tax rate is lower than 20%, or (2) which does not permit disclosure of the identity of shareholders of entities organized under its jurisdiction. See Item 10. Additional Information Taxation Brazilian Tax Considerations. Under our bylaws, we may include the amount distributed as interest attributable to shareholders' equity, net of any withholding tax, as part of the mandatory distributable amount.

### *Prescription of Payments*

Our shareholders have three years to claim dividend distributions made with respect to their shares, as from the date that we distribute the dividends to our shareholders, after which any unclaimed dividend distributions legally revert to us. We are not required to adjust the amount of any distributions for inflation that occurs during the period from the date of declaration to the payment date.

## **Significant Changes**

Other than as disclosed in this annual report, no significant change has occurred since the date of the audited consolidated financial statements included in this annual report.

## **ITEM 9. THE OFFER AND LISTING**

### **Markets for Our Equity Securities**

The principal trading market for our common shares and preferred shares is the BM&FBOVESPA, where they are traded under the symbols BRTO3 and BRTO4, respectively. Our common shares and preferred shares began trading on the BM&FBOVESPA on July 10, 1992. On November 16, 2001, the Preferred ADSs began trading on the NYSE under the symbol BTM. On November 17, 2009, the Common ADSs began trading on NYSE under the symbol BTMC.

**Table of Contents**

We have registered our Common ADSs and Preferred ADSs with the SEC pursuant to the Securities Act. On December 31, 2009, there were 14,081,611 Common ADSs outstanding, representing 14,081,611 common shares, or 34.0% of our outstanding common shares and 31,708,635 Preferred ADSs outstanding, representing 95,125,907 preferred shares, or 36.9% of our outstanding preferred shares.

**Price History of Our Common Shares, Preferred Shares and the ADSs**

The tables below set forth the high and low closing sales prices and the approximate average daily trading volume for our common shares and preferred shares on the BM&FBOVESPA and the high and low closing sales prices and the approximate average daily trading volume for the Common ADSs and the Preferred ADSs on the NYSE for the periods indicated.

## **Table of Contents**

### **Regulation of Brazilian Securities Markets**

The Brazilian securities markets are regulated by the CVM, which has regulatory authority over the stock exchanges and the securities markets generally, the National Monetary Council and the Central Bank, which has, among other powers, licensing authority over brokerage firms and which regulates foreign investment and foreign exchange transactions. The Brazilian securities markets are governed by (1) Law No. 6,385, as amended and supplemented, which is the principal law governing the Brazilian securities markets, (2) the Brazilian Corporation Law, and (3) the regulations issued by the CVM, the National Monetary Council and the Central Bank.

These laws and regulations provide for, among other things, disclosure requirements applicable to issuers of publicly traded securities, restrictions on insider trading (including criminal sanctions under the Brazilian Penal Code) and price manipulation, protection of minority shareholders and disclosure of transactions in a company's securities by its insiders, including directors, officers and major shareholders. They also provide for the licensing and oversight of brokerage firms and the governance of Brazilian stock exchanges.

However, the Brazilian securities markets are not as highly regulated or supervised as U.S. securities markets or securities markets in some other jurisdictions. In addition, rules and policies against self-dealing or for preserving shareholder interests may be less well-defined and enforced in Brazil than in the United States, which may put holders of our preferred shares and the ADSs at a disadvantage. Finally, corporate disclosures also may be less complete than for public companies in the United States and certain other jurisdictions.

Under the Brazilian Corporation Law, a company is either publicly held (*companhia aberta*), as we are, or privately held (*companhia fechada*). All publicly held companies are registered with the CVM and are subject to reporting and regulatory requirements. A company registered with CVM may have its securities traded either on the BM&FBOVESPA or in the Brazilian over-the-counter market. Shares of companies, such as our company, that are listed on the BM&FBOVESPA may not simultaneously trade on the Brazilian over-the-counter market. The shares of a publicly held company may also be traded privately, subject to certain limitations.

The Brazilian over-the-counter market consists of direct trades between individuals in which a financial institution registered with the CVM serves as intermediary. No special application, other than registration with the CVM, is necessary for securities of a public company to be traded in this market. The CVM requires that it be given notice of all trades carried out in the Brazilian over-the-counter market by the respective intermediaries.

### ***Disclosure Requirements***

Law No. 6,385 and CVM Instruction No. 202 require that a publicly traded company, such as our company, submit to the CVM and the BM&FBOVESPA certain periodic information, including annual and quarterly reports prepared by management and independent auditors. Law No. 6,385 and CVM Instruction No. 202 also require us to file with the CVM our shareholders' agreements, notices of shareholders' meetings and copies of the minutes of these meetings.

CVM Instruction No. 358, which became effective in April 2002, revised and consolidated the requirements regarding the disclosure and use of information related to material facts and acts of publicly traded companies, including the disclosure of information in the trading and acquisition of securities issued by publicly traded companies.

CVM Instruction No. 358 includes provisions that:

establish the concept of a material fact that gives rise to reporting requirements. Material facts include decisions made by the controlling shareholders, resolutions of the general meeting of shareholders and of management of the company, or any other facts related to the company's business (whether occurring within the company or otherwise related thereto) that may influence the price of its publicly traded securities, or the decision of investors to trade such securities or to exercise any of such securities' underlying rights;

## **Table of Contents**

specify examples of facts that are considered to be material, which include, among others, the execution of agreements providing for the transfer of control, the entry or withdrawal of shareholders that maintain any managing, financial, technological or administrative function with or contribution to the company, and any corporate restructuring undertaken among related companies;

require the investor relations officer, controlling shareholders, other officers or directors, members of the fiscal council and other advisory boards to disclose material facts;

require simultaneous disclosure of material facts to all markets in which the company's securities are admitted for trading;

require the acquirer of a controlling stake in a company to publish material facts, including its intentions as to whether or not to de-list the company's shares, within one year;

establish rules regarding disclosure requirements in the acquisition and disposal of a material shareholding stake; and

prohibit trading on the basis of material non-public information.

Brazilian regulations also require that any person or group of persons representing the same interest that has directly or indirectly acquired an interest corresponding to 5% of a type or class of shares of a publicly traded company must provide such publicly traded company with information on such acquisition and its purpose, and such company must transmit this information to the CVM. If this acquisition causes a change in the control of the company or in the administrative structure of the company, or if this acquisition triggers the obligation to make a public offering in accordance with CVM Instruction No. 361, as amended, then the acquirer must disclose this information to the applicable stock exchanges and the appropriate Brazilian newspapers.

### ***Recent Regulatory Developments***

On July 13, 2007, the CVM issued CVM Rule No. 457 to require listed companies to publish consolidated financial statements prepared in accordance with IFRS beginning with the fiscal year ending December 31, 2010.

On December 28, 2007, Law No. 11,638 was enacted and amended numerous provisions of the Brazilian Securities Law and the Brazilian Corporation Law relating to accounting principles and authority to issue accounting standards. Law No. 11,638 sought to enable greater convergence between Brazilian GAAP and IFRS. To promote convergence, Law No. 11,638 modified certain accounting principles of the Brazilian Corporation Law and mandated the CVM to issue accounting rules conforming to the accounting standards adopted in international markets. In December 2008, the CVM issued Deliberation No. 565 implementing these changes in accounting policies. Additionally, Law No. 11,638 acknowledged a role in the setting of accounting standards for the CPC, which is a committee of officials from the BM&FBOVESPA, industry representatives and academic bodies that has issued accounting guidance and pursued the improvement of accounting standards in Brazil. Law No. 11,638 permits the CVM and the Brazilian Central Bank to rely on the accounting standards issued by the CPC in establishing accounting principles for regulated entities.

On December 11, 2008, the CVM issued CVM Deliberation No. 560 which requires a company listed on the BM&FBOVESPA to disclose all the benefits granted to its employees and managers, including any benefits paid to such employees and managers due to their ownership of shares or other securities of the listed company.

On May 27, 2009, Law No. 11,941 was enacted, codifying CVM Deliberation No. 560 and amending numerous provisions of the Brazilian Corporation Law and Brazilian tax regulations to enable greater convergence between Brazilian GAAP and IFRS. Law No. 11,941 is currently subject to several accounting complementary regulations that affect, among others, the accounting of goodwill, deferred expenses, stock, provisions and real estate investments. Law No. 11,941 also broadens the criteria to be observed upon the elaboration of the notes to the financial statements. Financial statements as of December 31, 2010 of companies listed on the BM&FBOVESPA must be prepared in accordance with the new regulations. The adoption of the new accounting criteria in tax computations is optional.

---

**Table of Contents**

On December 7, 2009, the CVM issued CVM Instruction No. 480, a new regulation which superseded CVM Instruction No. 202, in order to, among other things:

consolidate the rules regarding registration of securities to be issued so that the procedures of registration, suspension and cancellation are identical for all issuers.

create two different categories of securities issuers in accordance with the securities that those issuers are authorized to issue in the Brazilian regulated markets and establish different disclosure requirements for each category. A category A issuer, such as our company, is authorized to issue any and all securities and is subject to more stringent disclosure requirements. A category B issuer is authorized to issue any and all securities, other than shares, share certificates and other securities issued by the issuer of such shares or shares certificates or by a company of its group that grants to its holders the right to acquire such shares or shares certificates.

create a new CVM form for annual reports (*Formulário de Referência*) to replace the previous form for annual reports (*Formulário de Informações Anuais*) that requires a significantly higher level of disclosure in several areas, including, among others, management discussion and analysis of the financial statements, management compensation, risk controls and derivative policies, and which must be signed by the company's chief executive officer and investor relations officer.

replace the former requirements with respect to the content of a prospectus used in a public securities offering with a requirement to publish an offering note with information on the public securities offering to supplement the *Formulário de Referência*.

classify as Well-Known Seasoned Issuers (*Emissor de Grande Exposição ao Mercado*) companies (1) that have had securities traded in the BM&FBOVESPA for at least three years, (2) that are in compliance with the CVM rules on current and periodic reporting obligations on the previous 12 months, and (3) which have shares traded in the market with a market value equal or greater than R\$5 billion. The CVM is expected to issue regulations regarding which public securities offerings by Well-Known Seasoned Issuers that will permit these issuers to register public securities offerings through an expedited procedure.

On December 17, 2009, the CVM issued Instruction No. 481, which sets forth (1) the procedures relating to the public solicitation of proxies for the exercise of voting rights at shareholders' meetings of publicly held companies, and (2) disclosure requirements to be followed by public held companies before such shareholders meetings.

CVM Instruction No. 481 provides that:

shareholders that own 0.5% or more of a company's share capital may nominate members of the board of directors and the fiscal council in a public solicitation of proxies conducted by the company's management, and that shareholders will be entitled to vote with respect to these nominations;

companies that accept digital proxies sent through the internet must allow shareholders who hold 0.5% or more of the company's share capital to make a public solicitation of proxies through the company's digital proxy system; and

publicly held companies that do not accept digital proxies sent through the internet must pay part of the costs of the public solicitation of proxies made by shareholders that own 0.5% or more of the company's share capital.

CVM Instruction No. 481 also specifies the information and documents that must be made available to shareholders following the date of the publication of the first call notice for the shareholders' meeting. The information and documents that must be provided varies according to the agenda of the shareholders' meeting. This information must be available through the CVM's website before the shareholders' meeting, must be prepared in accordance with the requirements of Instruction No. 481, and, if the information and documents relate to the annual shareholders

## Edgar Filing: BRASIL TELECOM SA - Form 20-F

meeting, must include management's discussion and analysis of the financial statements, personal data and history of the nominees for election to the company's board of directors and/or fiscal council, and a proposal for the compensation of the company's management.

## **Table of Contents**

### **Trading on the BM&FBOVESPA**

#### ***Overview of the BM&FBOVESPA***

In 2000, the São Paulo Stock Exchange (*Bolsa de Valores de São Paulo S.A. BVSP*), or the BOVESPA, was reorganized through the execution of memoranda of understanding by the Brazilian stock exchanges. Following this reorganization, the BOVESPA was a non-profit entity owned by its member brokerage firms and trading on the BOVESPA was limited to these member brokerage firms and a limited number of authorized nonmembers. Under the memoranda, all securities are now traded only on the BM&FBOVESPA, with the exception of electronically traded public debt securities and privatization auctions, which are traded on the Rio de Janeiro Stock Exchange.

In August 2007, BOVESPA underwent a corporate restructuring that resulted in the creation of BOVESPA Holding S.A., a public corporation, whose wholly-owned subsidiaries were (1) the BOVESPA, which is responsible for the operations of the stock exchange and the organized over-the-counter markets, and (2) the Brazilian Settlement and Custodial Company (*Companhia Brasileira de Liquidação e Custódia*), or CBLC, which is responsible for settlement, clearing and depositary services. In the corporate restructuring, all holders of membership certificates of the BOVESPA and of shares of CBLC became shareholders of BOVESPA Holding S.A. As a result of the corporate restructuring, access to the trading and other services rendered by the BM&FBOVESPA is not conditioned on stock ownership in BOVESPA Holding S.A.

In May 2008, the BOVESPA merged with the Commodities and Futures Exchange (*Bolsa de Mercadorias & Futuros*) to form the BM&FBOVESPA. In November 2008, the CBLC merged with the BM&FBOVESPA. As a result, the BM&FBOVESPA now performs its own settlement, clearing and depositary services.

#### ***Trading and Settlement***

Trading of equity securities on the BM&FBOVESPA is conducted through an electronic trading system called Megabolsa every business day from 10:00 a.m. to 5:00 p.m., São Paulo time (or during daylight savings time in the U.S. from 11:00 a.m. to 6:00 p.m., São Paulo time). Trading of equity securities on the BM&FBOVESPA is also conducted between 5:45 p.m. and 7:00 p.m., São Paulo time (or during daylight savings time in the U.S. from 6:45 p.m. to 8:00 p.m., São Paulo time), in an after-market system connected to both traditional brokerage firms and brokerage firms operating on the internet. This after-market trading is subject to regulatory limits on price volatility of securities and on the volume of shares traded by investors operating on the internet.

Since March 2003, market making activities have been allowed on the BM&FBOVESPA, although there are no specialists or market makers for our shares on the BM&FBOVESPA. Trading in securities listed on the BM&FBOVESPA may be effected off the exchange in the unorganized over-the-counter market under certain circumstances, although such trading is very limited.

The trading of securities of a company on the BM&FBOVESPA may be suspended at the request of a company in anticipation of the announcement of a material event. A requesting company must also suspend trading of its securities on international stock exchanges on which its securities are traded. The CVM and the BM&FBOVESPA have discretionary authority to suspend trading in shares of a particular issuer, based on or due to a belief that, among other reasons, a company has provided inadequate information regarding a material event or has provided inadequate responses to inquiries by the CVM or the BM&FBOVESPA.

In order to reduce volatility, the BM&FBOVESPA has adopted a circuit breaker mechanism under which trading sessions may be suspended for a period of 30 minutes or one hour whenever the Ibovespa index falls 10% or 15%, respectively, compared to the closing of the previous trading session.

Settlement of transactions on the BM&FBOVESPA is effected three business days after the trade date, without adjustment of the purchase price for inflation. Delivery of and payment for shares is made through the facilities of the clearing and settlement chamber of the BM&FBOVESPA. The seller is ordinarily required to deliver shares to the clearing and settlement chamber of the BM&FBOVESPA on the second business day following the trade date.

---

## **Table of Contents**

### ***Market Size***

Although the Brazilian equity market is Latin America's largest in terms of market capitalization, it is smaller, more volatile and less liquid than the major U.S. and European securities markets. Moreover, the BM&FBOVESPA is significantly less liquid than the NYSE or other major exchanges in the world.

As of December 31, 2009, the aggregate market capitalization of all companies listed on the BM&FBOVESPA was equivalent to approximately R\$2,335 billion (US\$1,341 billion) and the 10 largest companies listed on the BM&FBOVESPA represented approximately 55% of the total market capitalization of all listed companies. By comparison, as of December 31, 2009, the aggregate market capitalization of the companies (including U.S. and non-U.S. companies) listed on the NYSE was approximately US\$18.9 trillion. The average daily trading volume of the BM&FBOVESPA and the NYSE for 2009 was approximately R\$4.6 billion (US\$2.7 billion) and US\$46 billion, respectively.

Although any of the outstanding shares of a listed company may trade on the BM&FBOVESPA, in most cases fewer than half of the listed shares are actually available for trading by the public, the remainder being held by small groups of controlling persons, one principal shareholder or governmental entities that rarely trade their shares. For this reason, data showing the total market capitalization of the BM&FBOVESPA tends to overstate the liquidity of the Brazilian equity market. The relative volatility and illiquidity of the Brazilian equity markets may substantially limit your ability to sell our common shares or preferred shares at the time and price you desire and, as a result, could negatively impact the market price of these securities.

### ***Regulation of Foreign Investments***

Trading on the BM&FBOVESPA by a holder not deemed to be domiciled in Brazil for Brazilian tax and regulatory purposes, or a non-Brazilian holder, is subject to certain limitations under Brazilian foreign investment regulations. With limited exceptions, non-Brazilian holders may trade on the BM&FBOVESPA only in accordance with the requirements of Resolution No. 2,689 of the National Monetary Council. Resolution No. 2,689 requires that securities held by non-Brazilian holders be maintained in the custody of, or in deposit accounts with, financial institutions that are authorized by the Central Bank and the CVM. In addition, Resolution No. 2,689 requires non-Brazilian holders to restrict their securities trading to transactions on the BM&FBOVESPA or qualified over-the-counter markets. With limited exceptions, non-Brazilian holders may not transfer the ownership of investments made under Resolution No. 2,689 to other non-Brazilian holders through private transactions. See Item 10. Additional Information Exchange Controls Resolution 2,689 for further information about Resolution 2,689, and Item 10. Additional Information Taxation Brazilian Tax Considerations Taxation of Gains for a description of certain tax benefits extended to non-Brazilian holders who qualify under Resolution No. 2,689.

## **ITEM 10. ADDITIONAL INFORMATION**

### **Description of Our Company's Bylaws**

The following is a summary of the material provisions of our bylaws and of the Brazilian Corporation Law. In Brazil, a company's bylaws (*estatuto social*) are the principal governing document of a corporation (*sociedade anônima*).

#### ***General***

Our registered name is Brasil Telecom S.A., and our registered office is located in the Federal District of Brasília, Brazil. Our registration number with the Brazilian Commercial Registry is No. 53.3.0000622.9. We have been duly registered with the CVM under No. 11312 since March 27, 1980. Our headquarters are located in the Federal District of Brasília, Brazil. Our company has a perpetual existence.

At June 28, 2010, we had outstanding share capital of R\$3,731,058,950.28, equal to 603,020,546 total shares, consisting of 203,423,176 issued common shares and 399,597,370 issued preferred shares, including 13,231,556 preferred shares held in treasury. All of our outstanding share capital is fully paid. All of our shares are without par value. Under the Brazilian Corporation Law, the aggregate number of our non-voting and limited voting preferred shares may not exceed two-thirds of our total outstanding share capital.

## **Table of Contents**

### ***Corporate Purposes***

Under Article 2 of our bylaws, our corporate purposes are:

to offer telecommunications services and all activities required or useful for the operation of these services, in conformity with our concessions, authorizations and permits;

to participate in the capital of other companies seeking to fulfill the national telecommunications policy;

to organize wholly-owned subsidiaries for the performance of activities consistent with our corporate purposes;

to import, or promote the importation of, goods and services that are necessary to the performance of activities consistent with our corporate purposes;

to provide technical assistance services to other telecommunications companies engaged in activities of common interest;

to perform study and research activities aimed at the development of the telecommunications sector;

to enter into contracts and agreements with other telecommunications companies or other persons or entities to assure the operations of our services; and

to perform other activities related to the above corporate purposes.

### ***Board of Directors***

Under the Brazilian Corporation Law, any matters subject to the approval of our board of directors can be approved by a simple majority of votes of the members present at a duly convened meeting, unless our bylaws otherwise specify. Under our bylaws, our board of directors may only deliberate if a majority of its members are present at a duly convened meeting. Any resolutions of our board of directors may be approved by the affirmative vote of a majority of the members present at the meeting.

### ***Election of Directors***

The shareholders of TmarPart, our controlling shareholder, have entered into shareholders agreements that determine the representation of these shareholders on our board of directors. See Item 7. Major Shareholders and Related Party Transactions Major Shareholders TmarPart Shareholders Agreements. The members of our board of directors are elected at general meetings of shareholders for concurrent three-year terms.

### ***Qualification of Directors***

The Brazilian Corporation Law requires members of our board of directors to own shares of our company. However, there is no minimum share ownership or residency requirement to qualify for membership on our board of directors. Our bylaws do not require the members of our board of directors to be residents of Brazil. The Brazilian Corporation Law requires each of our executive officers to be residents of Brazil.

### ***Fiduciary Duties and Conflicts of Interest***

Edgar Filing: BRASIL TELECOM SA - Form 20-F

All members of our board of directors and their alternates owe fiduciary duties to us and all of our shareholders.

## **Table of Contents**

Under the Brazilian Corporation Law, if one of our directors or his respective alternate or one of our executive officers has a conflict of interest with our company in connection with any proposed transaction, such director, alternate director or executive officer may not vote in any decision of our board of directors or of our board of executive officers, as the case may be, regarding such transaction and must disclose the nature and extent of his conflicting interest for inclusion in the minutes of the applicable meeting. However, if one of our directors is absent from a meeting of our board of directors, that director's alternate may vote even if that director has a conflict of interest, unless the alternate director shares that conflict of interest or has another conflict of interest.

Any transaction in which one of our directors (including the alternate members) or executive officers may have an interest, including any financings, can only be approved on reasonable and fair terms and conditions that are no more favorable than the terms and conditions prevailing in the market or offered by third parties. If any such transaction does not meet this requirement, then the Brazilian Corporation Law provides that the transaction may be nullified and the interested director or executive officer must return to us any benefits or other advantages that he obtained from, or as result of, such transaction. Under the Brazilian Corporation Law and upon the request of a shareholder who owns at least 5.0% of our total share capital, our directors and executive officers must reveal to our shareholders at an ordinary meeting of our shareholders certain transactions and circumstances that may give rise to a conflict of interest. In addition, our company or shareholders who own 5.0% or more of our share capital may bring an action for civil liability against directors and executive officers for any losses caused to us as a result of a conflict of interest.

### *Compensation*

Under our bylaws, our common shareholders approve the aggregate compensation payable to our directors, executive officers and members of our fiscal council. Subject to this approval, our board of directors establishes the compensation of its members and of our executive officers. See Item 6. Directors, Senior Management and Employees Compensation.

### *Mandatory Retirement*

Neither the Brazilian Corporation Law nor our bylaws establish any mandatory retirement age for our directors or executive officers.

### *Share Capital*

Under the Brazilian Corporation Law, the number of our issued and outstanding non-voting shares or shares with limited voting rights, such as our preferred shares, may not exceed two-thirds of our total outstanding share capital.

Each of our common shares entitles its holder to one vote at our annual and extraordinary shareholders' meetings. Holders of our common shares are not entitled to any preference in respect of our dividends or other distributions or otherwise in case of our liquidation.

Our preferred shares are non-voting, except in limited circumstances, and have priority over our common shares in the case of our liquidation. See Voting Rights for information regarding the voting rights of our preferred shares, Liquidation for information regarding the liquidation preferences of our preferred shares, and Item 8. Financial Information Dividends and Dividend Policy Calculation of Adjusted Net Profits and Dividend Preference of Preferred Shares for information regarding the distribution preferences of our preferred shares.

## Table of Contents

### *Shareholders Meetings*

Under the Brazilian Corporation Law, we must hold an annual shareholders meeting by April 30 of each year in order to:

approve or reject the financial statements approved by our board of directors and board of executive officers, including any recommendation by our board of directors for the allocation of net profits and distribution of dividends;

elect members of our board of directors (upon expiration of their three-year terms) and members of our fiscal council, subject to the right of minority shareholders to elect members of our board of directors and our fiscal council; and

approve any monetary adjustment to our share capital.

In addition to the annual shareholders meetings, holders of our common shares have the power to determine any matters related to changes in our corporate purposes and to pass any resolutions they deem necessary to protect and enhance our development whenever our interests so require, by means of extraordinary shareholders meetings.

We convene our shareholders meetings, including our annual shareholders meeting, by publishing a notice in the Brazilian newspapers *Diário Oficial do Estado do Rio de Janeiro* and *Valor Econômico*. On the first call of any meeting, the notice must be published no fewer than three times, beginning at least 15 calendar days prior to the scheduled meeting date. For meetings involving the issuance of securities or deliberations where preferred shareholders are entitled to vote, the notice must be published at least 30 calendar days prior to the scheduled meeting date. The notice must contain the meeting's place, date, time, agenda and, in the case of a proposed amendment to our bylaws, a description of the subject matter of the proposed amendment.

Our board of directors may convene a shareholders meeting. Under the Brazilian Corporation Law, shareholders meetings also may be convened by our shareholders as follows:

by any of our shareholders if, under certain circumstances set forth in the Brazilian Corporation Law, our directors do not convene a shareholders meeting within 60 days;

by shareholders holding at least 5% of our total share capital if, after a period of eight days, our directors fail to call a shareholders meeting that has been requested by such shareholders; and

by shareholders holding at least 5% of either our total voting share capital or our total non-voting share capital, if after a period of eight days, our directors fail to call a shareholders meeting for the purpose of appointing a fiscal council that has been requested by such shareholders.

In addition, our fiscal council may convene a shareholders meeting if our board of directors does not convene an annual shareholders meeting within 30 days or at any other time to consider any urgent and serious matters.

Each shareholders meeting is presided over by the chairman of our board of directors, who is responsible for choosing a secretary of the meeting. A shareholder may be represented at a shareholders meeting by an attorney-in-fact appointed by the shareholder not more than one year before the meeting. The attorney-in-fact must be a shareholder, a member of our board of directors, a lawyer or a financial institution, and the power of attorney appointing the attorney-in-fact must comply with certain formalities set forth under Brazilian law. To be admitted to a shareholders meeting, a person must produce proof of his or her shareholder status or a valid power of attorney.

In order for a valid action to be taken at a shareholders meeting, shareholders representing at least 25% of our issued and outstanding voting share capital must be present on first call. However, shareholders representing at least two-thirds of our issued and outstanding voting share capital must be present at a shareholders meeting called to amend our bylaws. If a quorum is not present, our board of directors may issue a

## Edgar Filing: BRASIL TELECOM SA - Form 20-F

second call by publishing a notice as described above at least eight calendar days prior to the scheduled meeting. The quorum requirements do not apply to a meeting held on the second call, and the shareholders' meetings may be convened with the presence of shareholders representing any number of shares (subject to the voting requirements for certain matters described below). A shareholder without a right to vote may attend a shareholders' meeting and take part in the discussion of matters submitted for consideration.

## Table of Contents

### *Voting Rights*

Under the Brazilian Corporation Law and our bylaws, each of our common shares entitles its holder to one vote at our shareholders' meetings. Our preferred shares generally do not confer voting rights, except in limited circumstances described below. We may not restrain or deny any voting rights without the consent of the majority of the shares affected. Whenever the shares of any class of share capital are entitled to vote, each share is entitled to one vote.

### *Voting Rights of Common Shares*

Except as otherwise provided by law, resolutions of a shareholders' meeting are passed by a simple majority vote of the holders of our common shares present or represented at the meeting, without taking abstentions into account. Under the Brazilian Corporation Law, the approval of shareholders representing at least a majority of our outstanding voting shares is required for the types of action described below:

creating preferred shares or disproportionately increasing an existing class of our preferred shares relative to the other classes of our preferred shares, other than to the extent permitted by our bylaws;

changing a priority, preference, right, privilege or condition of redemption or amortization of any class of our preferred shares or creating a new class of preferred shares that has a priority, preference, right, condition or redemption or amortization superior to an existing class of our preferred shares;

reducing the mandatory dividend set forth in our bylaws;

changing our corporate purpose;

merging our company with another company, or consolidating our company, subject to the conditions set forth in the Brazilian Corporation Law;

transferring all of our shares to another company, known as an *incorporação de ações* under the Brazilian Corporation Law;

participating in a centralized group of companies (*grupo de sociedades*) as defined under the Brazilian Corporation Law and subject to the conditions set forth in the Brazilian Corporation Law;

dissolving or liquidating our company or canceling any ongoing liquidation of our company;

creating any founders' shares (*partes beneficiárias*) entitling the holders thereof to participate in the profits of our company; and

spinning-off of all or any part of our company.

In addition, pursuant to our bylaws, extraordinary meetings called to decide on these matters must be called at least 30 days in advance of the scheduled meeting date.

Decisions on the transformation of our company into another form of company require the unanimous approval of our shareholders, including the holders of our preferred shares.

## Edgar Filing: BRASIL TELECOM SA - Form 20-F

Our company is required to give effect to shareholders agreements that contain provisions regarding the purchase or sale of our shares, preemptive rights to acquire our shares, the exercise of the right to vote our shares or the power to control our company, if these agreements are filed with our headquarters in Brasília. Brazilian Corporation Law obligates the president of any shareholder or board of directors meeting to disregard any vote taken by any of the parties to any shareholders agreement that has been duly filed with our company that violates the provisions of any such agreement. In the event that a shareholder that is party to a shareholders agreement (or a director appointed by such shareholder) is absent from any shareholders or board of directors meeting or abstains from voting, the other party or parties to that shareholders agreement have the right to vote the shares of the absent or abstaining shareholder (or on behalf of the absent director) in compliance with that shareholders agreement.

**Table of Contents**

Under the Brazilian Corporation Law, neither our bylaws nor actions taken at a shareholders meeting may deprive any of our shareholders of certain specific rights, including:

the right to participate in the distribution of our profits;

the right to participate in any remaining residual assets in the event of our liquidation;

the right to supervise the management of our corporate business as specified in the Brazilian Corporation Law;

the right to preemptive rights in the event of an issuance of our shares, debentures convertible into our shares or subscription bonuses, other than with respect to a public offering of our securities; and

the right to withdraw from our company under the circumstances specified in the Brazilian Corporation Law.

*Voting Rights of Minority Shareholders*

Shareholders holding shares representing not less than 10% of our shares entitled to vote at our shareholders meeting have the right to request that we adopt a cumulative voting procedure. If the cumulative voting procedure is adopted, our controlling shareholders always retain the right to elect at least one member more than the number of members elected by the other shareholders, regardless of the total number of members of our board of directors. This procedure must be requested by the required number of shareholders at least 48 hours prior to a shareholders meeting.

Under the Brazilian Corporation Law, shareholders that are not controlling shareholders, but that together hold either:

non-voting preferred shares representing at least 10% of our total share capital; or

common shares representing at least 15% of our voting capital, have the right to appoint one member and an alternate to our board of directors at our annual shareholders meeting. If no group of our common or preferred shareholders meets the thresholds described above, shareholders holding preferred shares or common shares representing at least 10% of our total share capital are entitled to combine their holdings to appoint one member and an alternate to our board of directors. In the event that minority holders of common shares and/or holders of non-voting preferred shares elect a director and the cumulative voting procedures described above are also used, our controlling shareholders always retain the right to elect at least one member more than the number of members elected by the other shareholders, regardless of the total number of members of our board of directors. The shareholders seeking to exercise these minority rights must prove that they have held their shares for not less than three months preceding the shareholders meeting at which the director will be appointed. Any directors appointed by the non-controlling shareholders have the right to veto for cause the selection of our independent registered public accounting firm.

In accordance with the Brazilian Corporation Law, the holders of preferred shares without voting rights or with restricted voting rights are entitled to elect one member and an alternate to our fiscal council in a separate election. Minority shareholders have the same right as long as they jointly represent 10% or more of the voting shares. The other shareholders with the right to vote may elect the remaining members and alternates, who, in any event, must number more than the directors and alternates elected by the holders of the non-voting preferred shares and the minority shareholders.

## **Table of Contents**

### *Voting Rights of Preferred Shares*

Holders of our preferred shares are not entitled to vote on any matter, except (1) with respect to the election of a member of our board of directors by preferred shareholders holding at least 10% of our total share capital as described above, (2) with respect to the election of a member and alternate member of our fiscal council as described above, and (3) in the limited circumstances described below.

The Brazilian Corporation Law and our bylaws provide that our preferred shares will acquire unrestricted voting rights after the third consecutive fiscal year that we fail to pay the minimum dividends to which our preferred shares are entitled. This voting right will continue until the past due minimum dividend for any year in that three consecutive-year period is paid in full. Our preferred shareholders will also obtain unrestricted voting rights if we enter into a liquidation process.

Under the Brazilian Corporation Law, the following actions require ratification by the majority of issued and outstanding shares of the affected class within one year from the shareholders' meeting at which the common shareholders approve the action:

the creation of preferred shares or a disproportionate increase of an existing class of our preferred shares relative to the other classes of our preferred shares, other than to the extent permitted by our bylaws;

a change of a priority, preference, right, privilege or condition of redemption or amortization of any class of our preferred shares; or

the creation of a new class of preferred shares that has a priority, preference, right, condition or redemption or amortization superior to an existing class of our preferred shares.

In addition, under our bylaws, our preferred shareholders are entitled to vote on proposals to:

approve long-term agreements between us and our related parties (subsidiaries, controlling shareholders, companies under common control), except for market standard agreements; and

amend or repeal provisions of our bylaws requiring (1) shareholder approval for long-term agreements between us and our related parties, and (2) a 30-day prior notice to call those special shareholders' meetings that require a two-thirds quorum to be convened.

### ***Liquidation***

We may be liquidated in accordance with the provisions of Brazilian law. In the event of our extrajudicial liquidation, a shareholders' meeting will determine the manner of our liquidation, appoint our liquidator and our fiscal council that will function during the liquidation period.

In the event of our liquidation, the assets available for distribution to our shareholders would be distributed equally and ratably to our preferred shareholders and our common shareholders.

### ***Preemptive Rights***

Under the Brazilian Corporation Law, each of our shareholders has a general preemptive right to subscribe for our shares or securities convertible into our shares in any capital increase, in proportion to the number of our shares held by such shareholder.

Under our bylaws, except when issuing voting shares or securities convertible into voting shares, our board of directors or our shareholders, as the case may be, may decide to reduce the term of preemptive rights or not to extend preemptive rights to our shareholders with respect to any issuance of our non-voting shares, debentures convertible into our shares or warrants made in connection with a public exchange made to acquire control of another company or in connection with a public offering or through a stock exchange. The preemptive rights are

---

## **Table of Contents**

transferable and must be exercised within a period of at least 30 days following the publication of notice of the issuance of shares or securities convertible into our shares. Holders of our ADSs may not be able to exercise the preemptive rights relating to our preferred shares underlying their ADSs unless a registration statement under the Securities Act is effective with respect to those rights or an exemption from the registration requirements of the Securities Act is available. We are not obligated to file a registration statement with respect to the shares relating to these preemptive rights or to take any other action to make preemptive rights available to holders of our ADSs, and we may not file any such registration statement.

### ***Redemption, Amortization, Tender Offers and Rights of Withdrawal***

Our bylaws or our shareholders at a shareholders meeting may authorize us to use our profits or reserves to redeem or amortize our shares in accordance with conditions and procedures established for such redemption or amortization. The Brazilian Corporation Law defines redemption (*resgate de ações*) as the payment of the value of the shares in order to permanently remove such shares from circulation, with or without a corresponding reduction of our share capital. The Brazilian Corporation Law defines amortization (*amortização*) as the distribution to the shareholders, without a corresponding capital reduction, of amounts that they would otherwise receive if we were liquidated. If an amortization distribution has been paid prior to our liquidation, then upon our liquidation, the shareholders who did not receive an amortization distribution will have a preference equal to the amount of the amortization distribution in the distribution of our capital.

The Brazilian Corporation Law authorizes us to redeem shares not held by our controlling shareholders, if, after a tender offer effected as a consequence of delisting or a substantial reduction in the liquidity of our shares, our controlling shareholders increase their participation in our total share capital to more than 95%. The redemption price in such case would be the same price paid for our shares in any such tender offer.

The Brazilian Corporation Law and our bylaws also require the acquirer of control (in case of a change of control) or the controller (in case of delisting or a substantial reduction in liquidity of our shares) to make a tender offer for the acquisition of the shares held by minority shareholders under certain circumstances described below under **Mandatory Tender Offers**. The shareholder can also withdraw its capital from our company under certain circumstances described below under **Rights of Withdrawal**.

### ***Mandatory Tender Offers***

The Brazilian Corporation Law requires that if our common shares are delisted from the BM&FBOVESPA or there is a substantial reduction in liquidity of our common shares, as defined by the CVM, in each case as a result of purchases by our controlling shareholders, our controlling shareholders must effect a tender offer for acquisition of our remaining common shares at a purchase price equal to the fair value of our common shares taking into account the total number of our outstanding common shares.

If our controlling shareholders enter into a transaction which results in a change of control of our company, the controlling shareholders must include in the documentation of the transaction an obligation to effect a public offer for the purchase of all our common shares for the same price per share paid to the controlling shareholders. The tender offer must be submitted to the CVM within 30 days from the date of execution of the documents that provide for the change of control.

### ***Rights of Withdrawal***

The Brazilian Corporation Law provides that, in certain limited circumstances, a dissenting shareholder may withdraw its equity interest from our company and be reimbursed by us for the value of our common or preferred shares that it then holds.

This right of withdrawal may be exercised by the dissenting or non-voting holders of the adversely affected class of shares (including any holder of preferred shares of an adversely affected class) in the event that the holders of a majority of all outstanding common shares authorize:

the creation of preferred shares or a disproportionate increase of an existing class of our preferred shares relative to the other classes of our preferred shares, other than to the extent permitted by our bylaws;

**Table of Contents**

a change of a priority, preference, right, privilege or condition of redemption or amortization of any class of our preferred shares; or

the creation of a new class of preferred shares that has a priority, preference, right, condition or redemption or amortization superior to an existing class of our preferred shares.

In addition, this right of withdrawal may be exercised by any dissenting or non-voting shareholder (including any holder of preferred shares) in the event that the holders of a majority of the outstanding common shares authorize:

a reduction of the mandatory dividend set forth in our bylaws;

our participation in a centralized group of companies;

a change in our corporate purpose;

spinning-off of all or any part of our company, if such spin-off implies (1) a change in our business purpose (except if the spun-off assets revert to a company whose main purpose is the same as ours), (2) a reduction of the mandatory dividend set forth in our bylaws, or (3) our participation in a centralized group of companies; or

in one of the following transactions in which the shares held by such holders do not meet liquidity and dispersion thresholds under the Brazilian Corporation Law:

the merger of our company with another company, or the consolidation of our company, in a transaction in which our company is not the surviving entity;

the transfer of all of our outstanding shares to another company in an *incorporação de ações* transaction;

the transfer of all of the outstanding shares of another company to us in an *incorporação de ações* transaction; or

the acquisition of control of another company at a price that exceeds certain limits set forth in the Brazilian Corporation Law. Dissenting or non-voting shareholders are also entitled to withdraw in the event that the entity resulting from a merger or spin-off does not have its shares listed in an exchange or traded in the secondary market within 120 days from the shareholders' meeting that approved the relevant merger or spin-off.

Notwithstanding the above, in the event that we are consolidated or merged with another company, become part of a centralized group of companies, or acquire the control of another company for a price in excess of certain limits imposed by the Brazilian Corporation Law, holders of any type or class of our shares or the shares of the resulting entity that have minimal market liquidity and are dispersed among a sufficient number of shareholders will not have the right to withdraw. For this purpose, shares that are part of general indices representative of portfolios of securities traded in Brazil or abroad are considered liquid, and sufficient dispersion will exist if the controlling shareholder, the parent company or other companies under its control hold less than half of the total number of outstanding shares of that type or class. In case of a spin-off, the right of withdrawal will only exist if there is a significant change in the corporate purpose or a reduction in the mandatory dividend.

## **Table of Contents**

Only shareholders who own shares on the date of publication of the first notice convening the relevant shareholders' meeting or the press release concerning the relevant transaction is published, whichever is earlier, will be entitled to withdrawal rights.

The redemption of shares arising out of the exercise of any withdrawal rights would be made at the economic value of the shares, generally equal to the book value per share, determined on the basis of our most recent audited balance sheet approved by our shareholders. The economic value of the shares may be lower than the net book value amount if it is based on the economic value of the enterprise, as determined by an appraisal process in accordance with Brazilian Corporation Law. If the shareholders' meeting approving the action that gave rise to withdrawal rights occurred more than 60 days after the date of the most recent approved audited balance sheet, a shareholder may demand that its shares be valued on the basis of a balance sheet prepared specifically for this purpose.

The right of withdrawal lapses 30 days after the date of publication of the minutes of the shareholders' meeting that approved the action that gave rise to withdrawal rights, except when the resolution is approved pending confirmation by the holders of our preferred shares (such confirmation to be given at an extraordinary meeting of such preferred shareholders to be held within one year). In this event, the 30-day period for dissenting shareholders begins at the date of publication of the minutes of the extraordinary meeting of such preferred shareholders. Our shareholders may reconsider any resolution giving rise to withdrawal rights within 10 days after the expiration of the exercise period of withdrawal rights if we believe that the withdrawal of shares of dissenting shareholders would jeopardize our financial stability.

### ***Liability of Our Shareholders for Further Capital Calls***

Neither Brazilian law nor our bylaws require any capital calls. Our shareholders' liability for capital calls is limited to the payment of the issue price of any shares subscribed or acquired.

### ***Inspection of Corporate Records***

Shareholders that own 5% or more of our outstanding share capital have the right to inspect our corporate records, including shareholders' lists, corporate minutes, financial records and other documents of our company, if (1) we or any of our officers or directors have committed any act contrary to Brazilian law or our bylaws, or (2) there are grounds to suspect that there are material irregularities in our company. However, in either case, the shareholder that desires to inspect our corporate records must obtain a court order authorizing the inspection.

### ***Disclosures of Share Ownership***

Brazilian regulations require that (1) each of our controlling shareholders, directly or indirectly, (2) shareholders who have elected members of our board of directors or fiscal council, and (3) any person or group of persons representing a person that has directly or indirectly acquired or sold an interest corresponding to at least 5% of the total number of our shares of any type or class to disclose its or their share ownership or divestment to the CVM and to the BM&FBOVESPA. In addition, a statement (*fato relevante*) containing certain required information must be published in the Brazilian newspapers *Jornal de Brasília* and *Valor Econômico*, and in the Official Gazette of the Federal Executive.

Our controlling shareholders, shareholders that appoint members of our board of directors or fiscal council and members of our board of directors, board of executive officers or fiscal council must file a statement of any change in their holdings of our shares with the CVM and the Brazilian stock exchanges on which our securities are traded.

### ***Form and Transfer***

Our preferred shares and common shares are in book-entry form, registered in the name of each shareholder or its nominee. The transfer of our shares is governed by Article 35 of the Brazilian Corporation Law, which provides that a transfer of shares is effected by our transfer agent, Banco Bradesco S.A., by an entry made by the transfer agent in its books, upon presentation of valid written share transfer instructions to us by a transferor or its representative. When preferred shares or common shares are acquired or sold on a Brazilian stock exchange, the

---

## **Table of Contents**

transfer is effected on the records of our transfer agent by a representative of a brokerage firm or the stock exchange's clearing system. The transfer agent also performs all the services of safe-keeping of our shares. Transfers of our shares by a non-Brazilian investor are made in the same manner and are executed on the investor's behalf by the investor's local agent. If the original investment was registered with the Central Bank pursuant to foreign investment regulations, the non-Brazilian investor is also required to amend, if necessary, through its local agent, the electronic certificate of registration to reflect the new ownership.

The BM&FBOVESPA operates a central clearing system. A holder of our shares may choose, at its discretion, to participate in this system, and all shares that such shareholder elects to be put into the clearing system are deposited in custody with the clearing and settlement chamber of the BM&FBOVESPA (through a Brazilian institution that is duly authorized to operate by the Central Bank and maintains a clearing account with the clearing and settlement chamber of the BM&FBOVESPA). Shares subject to the custody of the clearing and settlement chamber of the BM&FBOVESPA are noted as such in our registry of shareholders. Each participating shareholder will, in turn, be registered in the register of the clearing and settlement chamber of the BM&FBOVESPA and will be treated in the same manner as shareholders registered in our books.

## **Material Contracts**

We have not entered into any material contracts, other than those described in this annual report or entered into in the ordinary course of business.

## **Exchange Controls**

There are no restrictions on ownership or voting of our capital stock by individuals or legal entities domiciled outside Brazil. However, the right to convert dividend payments, interest on shareholders' equity payments and proceeds from the sale of our share capital into foreign currency and to remit such amounts outside Brazil is subject to restrictions under foreign investment legislation and foreign exchange regulations, which generally require, among other things, the registration of the relevant investment with the Central Bank and the CVM.

Investments in our common shares or preferred shares by (1) a holder not deemed to be domiciled in Brazil for Brazilian tax purposes, (2) a non-Brazilian holder who is registered with the CVM under Resolution No. 2,689, or (3) the depositary, are eligible for registration with the Central Bank. This registration (the amount so registered is referred to as registered capital) allows the remittance outside Brazil of foreign currency, converted at the commercial market rate, acquired with the proceeds of distributions on, and amounts realized through, dispositions of our common shares or preferred shares. The registered capital per common share or preferred share purchased in the form of an ADS, or purchased in Brazil and deposited with the depositary in exchange for an ADS, will be equal to its purchase price (stated in U.S. dollars). The registered capital per common share withdrawn upon cancellation of a Common ADS will be the U.S. dollar equivalent of (1) the average price of a common share on the BM&FBOVESPA on the day of withdrawal, or (2) if no preferred shares were traded on that day, the average price on the BM&FBOVESPA in the 15 trading sessions immediately preceding such withdrawal. The registered capital per preferred share withdrawn upon cancellation of a Preferred ADS will be the U.S. dollar equivalent of (1) the average price of a preferred share on the BM&FBOVESPA on the day of withdrawal, or (2) if no preferred shares were traded on that day, the average price on the BM&FBOVESPA in the 15 trading sessions immediately preceding such withdrawal. The U.S. dollar equivalent will be determined on the basis of the average commercial market rates quoted by the Central Bank on the relevant dates.

## ***Annex V Regulations***

Resolution No. 1,927 of the National Monetary Council, as amended, provides for the issuance of depositary receipts in foreign markets in respect of shares of Brazilian issuers. It restates and amends Annex V to Resolution No. 1,289 of the National Monetary Council, known as the Annex V Regulations. The ADS program was approved under the Annex V Regulations by the Central Bank and the CVM prior to the issuance of the ADSs. Accordingly, the proceeds from the sale of ADSs by ADR holders outside Brazil are not subject to Brazilian foreign investment controls, and holders of the ADSs who are not resident in a tax haven jurisdiction are entitled to favorable tax treatment. See *Taxation Brazilian Tax Considerations*.

---

**Table of Contents**

We pay dividends and other cash distributions with respect to our common shares and preferred shares in *reais*. We have obtained an electronic certificate of foreign capital registration from the Central Bank in the name of the depository with respect to our ADSs to be maintained by the custodian on behalf of the depository. Pursuant to this registration, the custodian is able to convert dividends and other distributions with respect to our common shares and preferred shares represented by ADSs into foreign currency and remit the proceeds outside Brazil to the depository so that the depository may distribute these proceeds to the holders of record of the ADSs.

Investors residing outside Brazil may register their investments in our shares as foreign portfolio investments under Resolution No. 2,689 (described below) or as foreign direct investments under Law No. 4,131 (described below). Registration under Resolution No. 2,689 or Law No. 4,131 generally enables non-Brazilian investors to convert dividends, other distributions and sales proceeds received in connection with registered investments into foreign currency and to remit such amounts outside Brazil. Registration under Resolution No. 2,689 affords favorable tax treatment to non-Brazilian portfolio investors who are not resident in a tax haven jurisdiction, which is defined under Brazilian tax laws as a country that does not impose taxes or where the maximum income tax rate is lower than 20% or that restricts the disclosure of shareholder composition or ownership of investments. See [Taxation Brazilian Tax Considerations](#).

In the event that a holder of ADSs exchanges those ADSs for the underlying common shares or preferred shares, the holder must:

sell those shares on the BM&FBOVESPA and rely on the depository's electronic registration for five business days from the date of exchange to obtain and remit U.S. dollars outside Brazil upon the holder's sale of our preferred shares;

convert its investment in those shares into a foreign portfolio investment under Resolution No. 2,689; or

convert its investment in those shares into a direct foreign investment under Law No. 4,131.

The custodian is authorized to update the depository's electronic registration to reflect conversions of ADSs into foreign portfolio investments under Resolution No. 2,689.

If a holder of ADSs elects to convert its ADSs into a foreign direct investment under Law No. 4,131, the conversion will be effected by the Central Bank after receipt of an electronic request from the custodian with details of the transaction. If a foreign direct investor under Law No. 4,131 elects to deposit its common shares or preferred shares into the relevant ADR program in exchange for ADSs, such holder will be required to present to the custodian evidence of payment of capital gains taxes. The conversion will be effected by the Central Bank after receipt of an electronic request from the custodian with details of the transaction.

See [Taxation Brazilian Tax Considerations](#) for details of the tax consequences to an investor residing outside Brazil of investing in our common shares or preferred shares in Brazil.

If a holder of ADSs wishes to convert its investment in our shares into either a foreign portfolio investment under Resolution No. 2,689 or a foreign direct investment under Law No. 4,131, it should begin the process of obtaining its own foreign investor registration with the Central Bank or with the CVM, as the case may be, in advance of exchanging the ADSs for the underlying common shares or preferred shares. A non-Brazilian holder of common shares or preferred shares may experience delays in obtaining a foreign investor registration, which may delay remittances outside Brazil, which may in turn adversely affect the amount, in U.S. dollars, received by the non-Brazilian holder.

Unless the holder has registered its investment with the Central Bank, the holder may not be able to convert the proceeds from the disposition of, or distributions with respect to, such common shares or preferred shares into foreign currency or remit those proceeds outside Brazil. In addition, if the non-Brazilian investor resides in a tax haven jurisdiction or is not an investor registered under Resolution No. 2,689, the investor will be subject to less favorable tax treatment than a holder of ADSs. See [Taxation Brazilian Tax Considerations](#).

## **Table of Contents**

### ***Resolution 2,689***

All investments made by a non-Brazilian investor under Resolution No. 2,689 are subject to an electronic registration with the Central Bank. This registration permits non-Brazilian investors to convert dividend payments, interest on shareholders' equity payments and proceeds from the sale of our share capital into foreign currency and to remit such amounts outside Brazil.

Under Resolution No. 2,689, non-Brazilian investors registered with the CVM may invest in almost all financial assets and engage in almost all transactions available to Brazilian investors in the Brazilian financial and capital markets without obtaining a separate Central Bank registration for each transaction, provided that certain requirements are fulfilled. Under Resolution No. 2,689, the definition of a non-Brazilian investor includes individuals, legal entities, mutual funds and other collective investment entities, domiciled or headquartered outside Brazil.

Pursuant to Resolution No. 2,689, non-Brazilian investors must:

appoint at least one representative in Brazil with powers to take action relating to its investments;

appoint an authorized custodian in Brazil for its investments, which must be a financial institution duly authorized by the Central Bank and CVM;

complete the appropriate foreign investor registration forms;

register as a non-Brazilian investor with the CVM;

register its investments with the Central Bank; and

obtain a taxpayer identification number from the Brazilian federal tax authorities.

The securities and other financial assets held by a non-Brazilian investor pursuant to Resolution No. 2,689 must be registered or maintained in deposit accounts or under the custody of an entity duly licensed by the Central Bank or the CVM or be registered in registration, clearing and custody systems authorized by the Central Bank or by the CVM. In addition, the trading of securities held under Resolution No. 2,689 is restricted to transactions carried out on stock exchanges or through organized over-the-counter markets licensed by the CVM.

The offshore transfer or assignment of the securities or other financial assets held by non-Brazilian investors pursuant to Resolution No. 2,689 are prohibited, except for transfers resulting from a corporate reorganization effected abroad by a non-Brazilian investor, or occurring upon the death of an investor by operation of law or will.

### ***Law 4,131***

To obtain a certificate of foreign capital registration from the Central Bank under Law No. 4,131, a foreign direct investor must:

register as a foreign direct investor with the Central Bank;

obtain a taxpayer identification number from the Brazilian tax authorities;

Edgar Filing: BRASIL TELECOM SA - Form 20-F

appoint a tax representative in Brazil; and

appoint a representative in Brazil for service of process in respect of suits based on the Brazilian Corporation Law.

---

## **Table of Contents**

Foreign direct investors under Law No. 4,131 may sell their shares in either private or open market transactions, but these investors will generally be subject to less favorable tax treatment on gains with respect to our common or preferred shares.

See Taxation Brazilian Tax Considerations.

### **Taxation**

The following discussion contains a description of the material Brazilian and U.S. federal income tax consequences of the acquisition, ownership and disposition of our common shares, preferred shares or ADSs. The following discussion does not purport to be a comprehensive description of all the tax considerations that may be relevant to a decision to purchase, hold or dispose of our common shares, preferred shares or ADSs. This discussion is based upon the tax laws of Brazil and the United States and regulations under these tax laws as currently in effect, which are subject to change.

Although there is at present no income tax treaty between Brazil and the United States, the tax authorities of the two countries have had discussions that may culminate in such a treaty. No assurance can be given, however, as to whether or when a treaty will enter into force or how it will affect the U.S. holders of our common shares, preferred shares or ADSs.

**Prospective purchasers of our common shares, preferred shares or ADSs should consult their own tax advisors as to the tax consequences of the acquisition, ownership and disposition of our common shares, preferred shares or ADSs in their particular circumstances.**

### ***Brazilian Tax Considerations***

The following discussion contains a description of the material Brazilian tax consequences, subject to the limitations set forth herein, of the acquisition, ownership and disposition of our common shares, preferred shares or ADSs by a holder not deemed to be domiciled in Brazil for purposes of Brazilian taxation, or a Non-Brazilian Holder. This discussion is based on the tax laws of Brazil and regulations thereunder in effect on the date hereof, which are subject to change (possibly with retroactive effect). This discussion does not specifically address all of the Brazilian tax considerations that may be applicable to any particular Non-Brazilian Holder. Therefore, each Non-Brazilian Holder should consult its own tax advisor about the Brazilian tax consequences of an investment in our common shares, preferred shares or ADSs.

Individuals domiciled in Brazil and Brazilian companies are taxed in Brazil on the basis of their worldwide income which includes earnings of Brazilian companies' foreign subsidiaries, branches and affiliates. The earnings of branches of foreign companies and non-Brazilian residents, or nonresidents, in general are taxed in Brazil only on income derived from Brazilian sources.

### ***Dividends***

Dividends paid by a Brazilian corporation, such as Brasil Telecom, including stock dividends and other dividends paid to a Non-Brazilian Holder of our common shares, preferred shares or ADSs, are currently not subject to income tax withholding in Brazil to the extent that such amounts are related to profits generated after January 1, 1996. Dividends paid from profits generated before January 1, 1996 may be subject to Brazilian income tax withholding at varying rates, according to the tax legislation applicable to each corresponding year.

### ***Interest on Shareholders' Equity***

Law No. 9,249, dated December 26, 1995, as amended, allows a Brazilian corporation, such as Brasil Telecom, to make distributions to shareholders of interest on shareholders' equity, and treat those payments as a deductible expense for purposes of calculating Brazilian corporate income tax, and, since 1998, social contribution on net profits as well, as long as the limits described below are observed. These distributions may be paid in cash. For tax purposes, the deductible amount of this interest is limited to the daily pro rata variation of the TJLP, as determined by the Brazilian Central Bank from time to time, and the amount of the deduction may not exceed the greater of:

50% of net income (after the deduction of social contribution on net profits but before taking into account the provision for corporate income tax and the amounts attributable to shareholders as interest on shareholders' equity) for the period in respect of which the payment is made; and

**Table of Contents**

50% of the sum of retained profits and profit reserves as of the date of the beginning of the period in respect of which the payment is made.

Payment of interest on shareholders' equity to a Non-Brazilian Holder is subject to income tax withholding at the rate of 15%, or 25% if the Non-Brazilian Holder is domiciled in a country or location that is considered to be a tax haven jurisdiction for this purpose. For this purpose, the definition of tax haven encompasses countries and locations (1) that do not impose income tax, (2) that impose income tax at a rate of 20% or less, or (3) that impose restrictions on the disclosure of shareholding composition, of the ownership of investments, or of the identity of the ultimate beneficiary of earnings that are attributed to non-residents. See Interpretation of the Definition of Tax Haven Jurisdictions.

These payments of interest on shareholders' equity may be included, at their net value, as part of any mandatory dividend. To the extent payment of interest on net equity is so included, Brasil Telecom is required to distribute to shareholders an additional amount to ensure that the net amount received by them, after payment of the applicable income tax withholding, is at least equal to the mandatory dividend.

Payments of interest on shareholders' equity are decided by Brasil Telecom's shareholders, at its annual shareholders meeting, on the basis of recommendations of its board of directors. No assurance can be given that Brasil Telecom's board of directors will not recommend that future distributions of profits should be made by means of interest on shareholders' equity instead of by means of dividends.

*Taxation of Gains*

Under Law No. 10,833, enacted on December 29, 2003, the gain on the disposition or sale of assets located in Brazil by a Non-Brazilian Holder, whether to another non-Brazilian resident or to a Brazilian resident, may be subject to income tax withholding in Brazil.

With respect to the disposition of our common shares or preferred shares, as they are assets located in Brazil, the Non-Brazilian Holder should be subject to income tax on the gains assessed, following the rules described below, regardless of whether the transactions are conducted in Brazil or with a Brazilian resident.

With respect to our ADSs, although the matter is not entirely clear, arguably the gains realized by a Non-Brazilian Holder upon the disposition of ADSs to another non-Brazilian resident will not be taxed in Brazil, on the basis that ADSs are not assets located in Brazil for the purposes of Law No. 10,833. We cannot assure you, however, that the Brazilian tax authorities or the Brazilian courts will agree with this interpretation. As a result, gains on a disposition of ADSs by a Non-Brazilian Holder to a Brazilian resident, or even to a non-Brazilian resident, in the event that courts determine that ADSs would constitute assets located in Brazil, may be subject to income tax in Brazil according to the rules applicable to our common shares and preferred shares, described above.

As a general rule, gains realized as a result of a disposition of our common shares, preferred shares or ADSs are the positive difference between the amount realized on the transaction and the acquisition cost of our common shares, preferred shares or ADSs.

Under Brazilian law, however, income tax rules on such gains can vary depending on the domicile of the Non-Brazilian Holder, the type of registration of the investment by the Non-Brazilian Holder with the Central Bank and how the disposition is carried out, as described below.

Gains realized on a disposition of shares carried out on a Brazilian stock exchange (which includes the organized over-the-counter market) are:

exempt from income tax when realized by a Non-Brazilian Holder that (1) has registered its investment in Brazil with the Central Bank under the rules of Resolution 2,689 (a 2,689 Holder), and (2) is not a resident in a country or location which is defined as a tax haven jurisdiction for this purposes (as described below); or

---

**Table of Contents**

subject to income tax at a rate of up to 25% in any other case, including a case of gains assessed by a Non-Brazilian Holder that is not a 2,689 Holder, and is a resident of a country or location defined as a tax haven jurisdiction for this purpose (as described below). In these cases, a withholding income tax of 0.005% of the sale value will be applicable and can be later offset with the eventual income tax due on the capital gain. This 0.005% withholding income tax is not levied on day trade transactions.

Any gains assessed on a disposition of our common shares or preferred shares that is not carried out on a Brazilian stock exchange are subject to income tax at the rate of 15%, or 25% in the case of a Non-Brazilian Holder which resides in a tax haven jurisdiction according to the definition applicable to this situation. In the case that these gains are related to transactions conducted on the Brazilian non-organized over-the-counter market with intermediation, income tax withholding of 0.005% will also be applicable and can be offset against the eventual income tax due on the capital gain. This 0.005% income tax withholding is not levied in day trade transactions.

In the case of 2,689 Holders, a country or location should only be defined as a tax haven jurisdiction when it (1) does not tax income, or (2) taxes income at a rate of 20% or less. In the case of gains realized by Non-Brazilian Holders other than 2,689 Holders, a country or location should be defined as a tax haven jurisdiction when it (a) does not tax income, (b) taxes income at a rate of 20% or less, or (c) imposes restrictions on the disclosure of shareholding composition, of the ownership of investments, or of the identity of the ultimate beneficiary of earnings that are attributed to non-residents. However, there is doubt as to the application of these criteria by the Brazilian tax authorities. See Interpretation of the Definition of Tax Haven Jurisdictions.

In the case of redemption of securities or capital reduction by a Brazilian corporation, such as Brasil Telecom, the positive difference between the amount effectively received by the Non-Brazilian Holder and the corresponding acquisition cost is treated, for tax purposes, as capital gain derived from sale or exchange of shares not carried out on a Brazilian stock exchange market, and is therefore subject to income tax at the rate of 15% or 25%, as the case may be.

The deposit of our common or preferred shares in exchange for ADSs will be subject to Brazilian income tax if the acquisition cost of the shares is lower than (1) the average price per share on a Brazilian stock exchange on which the greatest number of such shares were sold on the day of deposit, or (2) if no shares were sold on that day, the average price on the Brazilian stock exchange on which the greatest number of shares were sold in the 15 trading sessions immediately preceding such deposit. In such case, the difference between the acquisition cost and the average price of the shares calculated as above will be considered to be a capital gain subject to income tax withholding at the rate of 15% or 25%, as the case may be. In some circumstances, there may be arguments to claim that this taxation is not applicable in the case of a Non-Brazilian Holder that is a 2,689 Holder and is not a resident in a tax haven jurisdiction for this purpose. The availability of these arguments to any specific holder of our common shares or preferred shares will depend on the circumstances of such holder. Prospective holders of our common shares or preferred shares should consult their own tax advisors as to the tax consequences of the deposit of our common shares or preferred shares in exchange for ADSs.

Any exercise of preemptive rights relating to our common shares, preferred shares or ADSs will not be subject to Brazilian taxation. Any gain on the sale or assignment of preemptive rights relating to our common shares or preferred shares, including the sale or assignment carried out by the depositary, on behalf of Non-Brazilian Holders of ADSs, will be subject to Brazilian income taxation according to the same rules applicable to the sale or disposition of our common shares or preferred shares.

**Table of Contents***Interpretation of the Discussion on the Definition of Tax Haven Jurisdictions*

On June 24, 2008, Law No. 11,727 broadened the definition of tax haven jurisdiction for specific purposes, with effect as from January 1, 2009. However, the Brazilian tax authorities regularly issue a list of jurisdictions that are considered tax haven jurisdictions, and such list has not been updated after the modifications introduced by Law No. 11,727. We can offer no assurance that, when and if Brazilian tax authorities issue a new list, those authorities will not regard as tax haven jurisdictions countries or locations which do not meet the criteria provided for under applicable law, in each particular situation.

*Tax on Foreign Exchange Transactions (IOF/Exchange Tax)*

Brazilian law imposes the IOF/Exchange Tax on the conversion of *reais* into foreign currency and on the conversion of foreign currency into *reais*. Foreign exchange agreements entered into as from October 20, 2009 in connection with inflows of funds related to investments carried out by Non-Brazilian Holders in the Brazilian financial and capital markets are subject to the IOF/Exchange Tax at a rate of 2.0%. However, foreign exchange transactions related to outflows of funds in connection with investments made in the Brazilian financial and capital markets are subject to IOF/Exchange at a zero percent rate. This zero percent rate applies to payments of dividends and interest on shareholders' equity to Non-Brazilian Holders with respect to investments in the Brazilian financial and capital markets. Other than these transactions, the rate applicable to most foreign exchange transactions is 0.38%. Other rates may apply to particular transactions and the Brazilian government may increase the rate at any time up to 25.0% on the foreign exchange transaction amount. However, any increase in rates is only authorized to apply to future transactions.

*Tax on Transactions Involving Bonds and Securities (IOF/Bonds and Securities Tax)*

Brazilian law also imposes the IOF/Bonds Tax due on transactions involving bonds and securities, including those carried out on a Brazilian stock exchange. The rate of the IOF/Bonds and Securities Tax applicable to transactions involving our common shares or preferred shares is currently zero. However, the rate of the IOF/Bonds and Securities Tax applicable to the transfer of our common shares or preferred shares with the specific purpose of enabling the issuance of ADSs is currently 1.5%. This rate is applied on the product of (1) the number of shares which are transferred, multiplied by (2) the closing price for those shares on the date prior to the transfer or, if such closing price is not available on that date, the last available closing price for those shares. The Brazilian government may increase the rate of the IOF/Bonds and Securities Tax at any time up to 1.5% per day of the transaction amount, but only in respect of transactions carried out after the increase in rate enters into force.

*Other Brazilian Taxes*

There are no Brazilian inheritance, gift or succession taxes applicable to the ownership, transfer or disposition of our common shares, preferred shares or ADSs by a Non-Brazilian Holder except for gift and inheritance taxes levied by some states in Brazil. There are no Brazilian stamp, issue, registration, or similar taxes or duties payable by Non-Brazilian Holders of our common shares, preferred shares or ADSs.

***U.S. Federal Income Tax Considerations***

The following is a discussion of the material U.S. federal income tax consequences that may be relevant with respect to the ownership and disposition of the common shares, preferred shares or ADSs of Brasil Telecom, which are evidenced by ADRs. This description addresses only the U.S. federal income tax considerations of U.S. Holders (as defined below) that are initial purchasers of the common shares, preferred shares or ADSs of Brasil Telecom and that will hold such shares or ADSs as capital assets. This description does not address tax considerations applicable to holders that may be subject to special tax rules, such as banks, financial institutions, insurance companies, real estate investment trusts, grantor trusts, regulated investment companies, dealers or traders in securities or currencies, tax-exempt entities, pension funds, persons that received the common shares, preferred shares or ADSs of Brasil Telecom pursuant to an exercise of employee stock options or rights or otherwise as compensation for the performance of services, persons that will hold the common shares, preferred shares or ADSs of Brasil Telecom as a position in a straddle or as a part of a hedging, conversion or other risk reduction transaction for U.S. federal income tax purposes, persons that have a functional currency other than the U.S. dollar, persons that will own the common shares, preferred shares or ADSs of Brasil Telecom through partnerships or other pass through entities, holders subject to the alternative minimum tax, certain former citizens or long-term residents of the United States or holders that own (or are deemed to own) 10% or more (by voting power) of the shares of Brasil Telecom.

**Table of Contents**

This description does not address any state, local or non-U.S. tax consequences of the ownership and disposition of the common shares, preferred shares or ADSs of Brasil Telecom by U.S. Holders. Moreover, this description does not address the consequences of any U.S. federal tax other than income tax, including but not limited to the U.S. federal estate and gift taxes. This description is based on (1) the Internal Revenue Code of 1986, as amended (the Code), existing and temporary U.S. Treasury Regulations and judicial and administrative interpretations thereof, in each case as in effect and available on the date of this annual report, as well as proposed Treasury Regulations available on the date of this annual report, and (2) in part, on the representations of the depositary and the assumption that each obligation in the deposit agreement and any related agreement will be performed in accordance with its terms. All of the foregoing is subject to change, which change could apply retroactively and could affect the tax consequences described below. Holders should consult their tax advisers to determine the particular tax consequences to such holders of the ownership and disposition of the common shares, preferred shares or ADSs of Brasil Telecom, including the applicability and effect of U.S. state, local and non-U.S. tax laws.

As used herein, the term U.S. Holder means, for U.S. federal tax purposes, a beneficial owner of common shares, preferred shares or ADSs of Brasil Telecom that is:

an individual citizen or resident of the United States;

a corporation organized under the laws of the United States, any state thereof or the District of Columbia;

an estate the income of which is subject to U.S. federal income taxation regardless of its source; or

a trust if (1) a court within the United States is able to exercise primary supervision over its administration, and (2) one or more United States persons have the authority to control all of the substantial decisions of such trust.

If a partnership (or any other entity treated as a partnership for U.S. federal income tax purposes) holds the common shares, preferred shares or ADSs of Brasil Telecom, the tax treatment of a partner in such partnership will generally depend on the status of the partner and the activities of the partnership. A partnership or its partners should consult their tax advisor as to its tax consequences.

*Treatment of ADSs*

In general, for U.S. federal income tax purposes, a holder of an ADR evidencing an ADS will be treated as the beneficial owner of the common shares or preferred shares of Brasil Telecom represented by the applicable ADS. The U.S. Treasury Department has expressed concern that depositaries for ADSs, or other intermediaries between the holders of shares of an issuer and the issuer, may be taking actions that are inconsistent with the claiming of U.S. foreign tax credits by U.S. Holders of such receipts or shares. Accordingly, the analysis regarding the availability of a U.S. foreign tax credit for Brazilian taxes and sourcing rules described below could be affected by future actions that may be taken by the U.S. Treasury Department.

*Taxation of Dividends*

Subject to the discussion below under Passive Foreign Investment Company Rules, in general, the gross amount of a distribution made with respect to a common share, preferred share or ADS of Brasil Telecom (which for this purpose shall include distributions of interest attributable to shareholders equity before any reduction for any Brazilian taxes withheld therefrom) will, to the extent made from the current or accumulated earnings and profits of Brasil Telecom, as determined under U.S. federal income tax principles, constitute a dividend to a U.S. Holder for U.S. federal income tax purposes. For taxable years beginning on or before December 31, 2010, non-corporate U.S. Holders may be taxed on dividends from a qualified foreign corporation at the lower rates applicable to long-term capital gains (i.e., gains with respect to capital assets held for more than one year). A foreign corporation is treated as a qualified foreign corporation with respect to dividends received from that corporation on shares or ADSs that are readily tradable on an established securities market in the United States. U.S. Treasury Department guidance indicates that the ADSs of Brasil Telecom (which are listed on the NYSE), but not the common or preferred shares

**Table of Contents**

of Brasil Telecom, are readily tradable on an established securities market in the United States. Thus, subject to the discussion below under Passive Foreign Investment Company Rules, dividends that Brasil Telecom pays on the ADS, but not on the common shares or preferred shares of Brasil Telecom, currently meet the conditions required for these reduced tax rates. However, there can be no assurance that the ADSs will be considered readily tradable on an established securities market in later years. Furthermore, a U.S. Holder's eligibility for such preferential rate is subject to certain holding period requirements and the non-existence of certain risk reduction transactions with respect to the ADSs. Such dividends will not be eligible for the dividends received deduction generally allowed to corporate U.S. Holders. Subject to the discussion below under Passive Foreign Investment Company Rules, if a distribution exceeds the amount of the current and accumulated earnings and profits of Brasil Telecom, it will be treated as a non-taxable return of capital to the extent of the U.S. Holder's tax basis in the common share, preferred share or ADS of Brasil Telecom on which it is paid and thereafter as capital gain. Brasil Telecom does not maintain calculations of the earnings and profits of Brasil Telecom under U.S. federal income tax principles. Therefore, U.S. Holders should expect that distributions by Brasil Telecom generally will be treated as dividends for U.S. federal income tax purposes.

A dividend paid in *reais* will be includible in the income of a U.S. Holder at its value in U.S. dollars calculated by reference to the prevailing spot market exchange rate in effect on the day it is received by the U.S. Holder in the case of the common shares or preferred shares of Brasil Telecom or, in the case of a dividend received in respect of ADSs of Brasil Telecom, on the date the dividend is received by the depository, whether or not the dividend is converted into U.S. dollars. Assuming the payment is not converted at that time, the U.S. Holder will have a tax basis in *reais* equal to that U.S. dollar amount, which will be used to measure gain or loss from subsequent changes in exchange rates. Any gain or loss realized by a U.S. Holder that subsequently sells or otherwise disposes of *reais*, which gain or loss is attributable to currency fluctuations after the date of receipt of the dividend, will be ordinary gain or loss. The amount of any distribution of property other than cash will be the fair market value of such property on the date of distribution.

The gross amount of any dividend paid (which will include any amounts withheld in respect of Brazilian taxes) with respect to a common share, preferred share or ADS of Brasil Telecom will be subject to U.S. federal income taxation as foreign source dividend income, which may be relevant in calculating a U.S. Holder's foreign tax credit limitation. Subject to limitations under U.S. federal income tax law concerning credits or deductions for foreign taxes and certain exceptions for short-term and hedged positions, any Brazilian withholding tax will be treated as a foreign income tax eligible for credit against a U.S. Holder's U.S. federal income tax liability (or at a U.S. Holder's election, may be deducted in computing taxable income if the U.S. Holder has elected to deduct all foreign income taxes for the taxable year). The limitation on foreign taxes eligible for the U.S. foreign tax credit is calculated separately with respect to specific baskets of income. For this purpose, the dividends should generally constitute passive category income, or in the case of certain U.S. Holders, general category income. The rules with respect to foreign tax credits are complex, and U.S. Holders are urged to consult their own tax advisors regarding the availability of the foreign tax credit under their particular circumstances.

Section 305 of the Code provides special rules for the tax treatment of preferred stock. According to the U.S. Treasury Regulations under that section, the term preferred stock generally refers to stock which enjoys certain limited rights and privileges (generally associated with specified dividend and liquidation priorities) but does not participate in corporate growth to any significant extent. While Brasil Telecom's preferred shares have some preferences over its common shares, the preferred shares are not fixed as to dividend payments or liquidation value. Consequently, although the matter is not entirely clear, because the determination is highly factual in nature, it is more likely than not that the preferred shares of Brasil Telecom will be treated as common stock within the meaning of Section 305 of the Code. If the preferred shares are treated as common stock for purposes of Section 305 of the Code, distributions to U.S. Holders of additional shares of such common stock or preemptive rights relating to such common stock with respect to their preferred shares or ADSs that are made as part of a pro rata distribution to all shareholders in most instances will not be subject to U.S. federal income tax. On the other hand, if the preferred shares are treated as preferred stock within the meaning of Section 305 of the Code, and if a U.S. Holder receives a distribution of additional shares or preemptive rights as described in the preceding sentence, such distributions (including amounts withheld in respect of any Brazilian taxes) will be treated as dividends to the same extent and in the same manner as distributions payable in cash. In that event, the amount of such distribution (and the basis of the new shares or preemptive rights so received) will equal the fair market value of the shares or preemptive rights on the date of distribution.

**Table of Contents***Sale, Exchange or Other Disposition of the Common Shares, Preferred Shares or ADSs of Brasil Telecom*

A deposit or withdrawal of common shares or preferred shares by a U.S. Holder in exchange for the ADS that represent such shares will not result in the realization of gain or loss for U.S. federal income tax purposes. A U.S. Holder generally will recognize capital gain or loss upon a sale, exchange or other disposition of a common share, preferred share or ADS of Brasil Telecom held by the U.S. Holder or the depository, as the case may be, in an amount equal to the difference between the U.S. Holder's adjusted basis in its common shares, preferred shares or ADSs of Brasil Telecom (determined in U.S. dollars) and the U.S. dollar amount realized on the sale, exchange or other disposition. If a Brazilian tax is withheld on the sale, exchange or other disposition of a share, the amount realized by a U.S. Holder will include the gross amount of the proceeds of that sale, exchange or other disposition before deduction of the Brazilian tax. In the case of a non-corporate U.S. Holder, the maximum marginal U.S. federal income tax rate applicable to capital gain generally will be lower than the maximum marginal U.S. federal income tax rate applicable to ordinary income (other than, as discussed above, certain dividends) if such holder's holding period for such common share, preferred share or ADS of Brasil Telecom exceeds one year (i.e., such gain is a long-term capital gain). Capital gain, if any, realized by a U.S. Holder on the sale or exchange of a common shares, preferred share or ADS of Brasil Telecom generally will be treated as U.S. source income for U.S. foreign tax credit purposes. Consequently, in the case of a disposition or deposit of a common share, preferred share or ADS of Brasil Telecom that is subject to Brazilian tax, the U.S. Holder may not be able to use the foreign tax credit for that Brazilian tax unless it can apply the credit against U.S. tax payable on other income from foreign sources in the appropriate income category, or, alternatively, it may take a deduction for the Brazilian tax if it elects to deduct all of its foreign income taxes. The deductibility of capital losses is subject to limitations under the Code.

The initial tax basis of a U.S. Holder's common shares, preferred shares or ADSs of Brasil Telecom will be the U.S. dollar value of the *reais*-denominated purchase price determined on the date of purchase. If the common shares, preferred shares or ADSs of Brasil Telecom are treated as traded on an established securities market, a cash basis U.S. Holder, or, if it elects, an accrual basis U.S. Holder, will determine the dollar value of the cost of such common shares, preferred shares or ADSs by translating the amount paid at the spot rate of exchange on the settlement date of the purchase. The conversion of U.S. dollars to *reais* and the immediate use of that currency to purchase common shares, preferred shares or ADSs generally will not result in taxable gain or loss for a U.S. Holder.

With respect to the sale or exchange of or common shares, preferred shares or ADSs, the amount realized generally will be the U.S. dollar value of the payment received determined on (1) the date of receipt of payment in the case of a cash basis U.S. Holder, and (2) the date of disposition in the case of an accrual basis U.S. Holder. If the common shares, preferred shares or ADSs of Brasil Telecom are treated as traded on an established securities market, a cash basis taxpayer, or, if it elects, an accrual basis taxpayer, will determine the U.S. dollar value of the amount realized by translating the amount received at the spot rate of exchange on the settlement date of the sale.

*Other Brazilian Taxes*

Any Brazilian IOF/Exchange Tax or IOF/Bonds and Securities Tax (as discussed under Brazilian Tax Considerations above) may not be treated as a creditable foreign tax for U.S. federal income tax purposes, although a U.S. Holder may be entitled to deduct such taxes if it elects to deduct all of its foreign income taxes. U.S. Holders should consult their tax advisors regarding the U.S. federal income tax consequences of these taxes.

*New Legislation*

Newly enacted legislation requires certain U.S. Holders who are individuals, estates or trusts to pay a 3.8% tax on, among other things, dividends and capital gains from the sale or other disposition of the common shares, preferred shares or ADSs of Brasil Telecom for taxable years beginning after December 31, 2012. In addition, for taxable years beginning after March 18, 2010, new legislation requires certain U.S. Holders who are individuals to report information relating to an interest in the common shares, preferred shares or ADSs of Brasil Telecom, subject to certain exceptions (including an exception for shares or ADSs held in custodial accounts maintained with a U.S. financial institution). U.S. Holders are urged to consult their tax advisers regarding the effect, if any, of new U.S. federal income tax legislation on their ownership and disposition of the common shares, preferred shares or ADSs of Brasil Telecom.

**Table of Contents***Passive Foreign Investment Company Rules*

A Non-U.S. corporation will be classified as a passive foreign investment company, or a PFIC, for U.S. federal income tax purposes in any taxable year in which, after applying certain look-through rules, either (1) at least 75 percent of its gross income is passive income, or (2) at least 50 percent of the average value of its gross assets is attributable to assets that produce passive income or is held for the production of passive income. Passive income for this purpose generally includes dividends, interest, royalties, rents and gains from commodities and securities transactions. For purposes of the PFIC asset test, the aggregate fair market value of the assets of a publicly traded foreign corporation generally is treated as being equal to the sum of the aggregate value of the outstanding stock and the total amount of the liabilities of such corporation (the Market Capitalization).

Based on certain estimates of the gross income and gross assets of Brasil Telecom, the nature of its business, the size of its investment in certain subsidiaries, and its anticipated Market Capitalization, Brasil Telecom believes that it will not be classified as a PFIC for its taxable year ended December 31, 2009. Brasil Telecom's status in future years will depend on its assets and activities in those years. Brasil Telecom has no reason to believe that its assets or activities will change in a manner that would cause it to be classified as a PFIC for the taxable year ending December 31, 2010 or any future year, but there can be no assurance that Brasil Telecom will not be considered a PFIC for any taxable year because its status will depend on its assets and activities in those years, as well as its actual Market Capitalization as determined at the end of each calendar quarter. If Brasil Telecom is or becomes a PFIC (except as discussed below), any excess distribution (generally a distribution in excess of 125% of the average distribution over a three-year period or shorter holding period for Brasil Telecom's common shares or preferred shares) and realized gain will be treated as ordinary income and will be subject to tax as if (1) the excess distribution or gain had been realized ratably over the U.S. Holder's holding period, (2) the amount deemed realized in each year had been subject to tax in each such year at the highest marginal rate for such year (other than income allocated to the current period or any taxable period before Brasil Telecom became a PFIC, which would be subject to tax at the U.S. Holder's regular ordinary income rate for the current year and would not be subject to the interest charge discussed below), and (3) the interest charge generally applicable to underpayments of tax had been imposed on the taxes deemed to have been payable in those years. U.S. Holders should consult their own tax advisors regarding the tax consequences that would arise if Brasil Telecom were treated as a PFIC.

If Brasil Telecom were a PFIC, a U.S. Holder of the common shares, preferred shares or ADSs of Brasil Telecom may be able to make certain elections that may alleviate certain of the tax consequences referred to above. Where a company that is a PFIC meets certain reporting requirements, a U.S. Holder can avoid certain adverse PFIC consequences described above by making a qualified electing fund, or QEF, election to be taxed currently on its proportionate share of the PFIC's ordinary income and net capital gains. However, Brasil Telecom does not intend to comply with the necessary accounting and record keeping requirements that would allow a U.S. Holder to make a QEF election with respect to Brasil Telecom.

If the common shares, preferred shares or ADSs of Brasil Telecom are regularly traded on a qualified exchange, a U.S. Holder may make a mark-to-market election with respect to the common shares, preferred shares or ADSs of Brasil Telecom, as the case may be. If a U.S. Holder makes the mark-to-market election, for each year in which Brasil Telecom is a PFIC, the holder will generally include as ordinary income the excess, if any, of the fair market value of the common shares, preferred shares, or ADSs of Brasil Telecom, as the case may be, at the end of the taxable year over their adjusted tax basis, and will be permitted an ordinary loss in respect of the excess, if any, of the adjusted tax basis of the common shares, preferred shares or ADSs of Brasil Telecom, over their fair market value at the end of the taxable year (but only to the extent of the net amount of previously included income as a result of the mark-to-market election). If a U.S. Holder makes the election, the holder's tax basis in the common shares, preferred shares or ADSs of Brasil Telecom, as the case may be, will be adjusted to reflect the amount of any such income or loss. Any gain recognized on the sale or other disposition of the common shares, preferred shares or ADSs of Brasil Telecom will be treated as ordinary income. Our common shares, preferred shares and ADSs will be considered marketable stock if they are traded on a qualified exchange, other than in de minimis quantities, on at least 15 days during each calendar quarter. The NYSE is a qualified exchange and the BM&FBOVESPA may constitute a qualified exchange for this purpose provided the BM&FBOVESPA meets certain trading volume, listing, financial disclosure, surveillance and other requirements set forth in applicable U.S. Treasury Regulations. However, Brasil Telecom cannot be certain that the common shares, preferred shares or ADSs of Brasil Telecom will continue to trade on the BM&FBOVESPA or the NYSE, respectively, or that the common shares, preferred

**Table of Contents**

shares or ADSs of Brasil Telecom will be traded on at least 15 days in each calendar quarter in other than de minimis quantities. U.S. Holders should be aware, however, that if Brasil Telecom were determined to be a PFIC, the interest charge regime described above could be applied to indirect distributions or gains deemed to be attributable to U.S. Holders in respect of any of its subsidiaries that also may be determined to be a PFIC, and the mark-to-market election generally would not be effective for such subsidiaries. Each U.S. Holder should consult its own tax advisor to determine whether a mark-to-market election is available and the consequences of making an election if Brasil Telecom were characterized as a PFIC.

Recently enacted legislation creates an additional annual filing requirement (the Reporting Legislation) for U.S. persons who are shareholders of a PFIC. The Reporting Legislation does not describe what information will be required to be included in the additional annual filing, but rather grants the Secretary of the U.S. Treasury authority to decide what information must be included in such annual filing. The IRS has recently issued guidance providing that as it develops further guidance regarding the Reporting Legislation, (1) persons that were required to file Form 8621 prior to the enactment of the Reporting Legislation must continue to file Form 8621 as appropriate, and (2) shareholders of a PFIC that were not otherwise required to file Form 8621 annually prior to March 18, 2010, will not be required to file an annual report as a result of the Reporting Legislation for taxable years beginning before March 18, 2010. If Brasil Telecom were a PFIC for a given taxable year, then U.S. Holders should consult their tax adviser concerning their annual filing requirements.

*Backup Withholding Tax and Information Reporting Requirements*

U.S. backup withholding tax and information reporting requirements generally apply to certain payments to certain non-corporate holders. Information reporting generally will apply to the distributions made on the common shares, preferred shares or ADSs of Brasil Telecom, and to proceeds from the sale or other disposition of the common shares, preferred shares or ADSs of Brasil Telecom made within the United States or by a U.S. payor or U.S. middleman to a holder of the common shares, preferred shares or ADSs of Brasil Telecom, other than an exempt recipient, including a corporation, a payee that is a non-U.S. person that provides an appropriate certification and certain other persons. A payor will be required to withhold backup withholding tax from any distributions made on the common shares, preferred shares or ADSs of Brasil Telecom, and to proceeds from the sale or other disposition of the common shares, preferred shares or ADSs of Brasil Telecom made within the United States or by a U.S. payor or U.S. middleman to a holder of the common shares, preferred shares or ADSs of Brasil Telecom, other than an exempt recipient, if such holder fails to furnish its correct taxpayer identification number or otherwise fails to comply with, or establish an exemption from, such backup withholding tax requirements. The backup withholding tax rate is 28% for taxable years through 2010.

Backup withholding is not an additional tax. A U.S. Holder generally may obtain a refund of any amounts withheld under the backup withholding rules that exceed such holder's U.S. federal income tax liability by filing a refund claim with the IRS. A U.S. Holder will be entitled to credit any amounts withheld under the backup withholding rules against such holder's U.S. federal income tax liability provided the required information is furnished to the IRS in a timely manner.

The above description is not intended to constitute a complete analysis of all tax consequences relating to ownership and disposition of common shares, preferred shares or ADSs. Prospective purchasers should consult their own tax advisors concerning the tax consequences of their particular situations.

**Documents on Display**

Statements contained in this annual report regarding the contents of any contract or other document filed as an exhibit to this annual report summarize their material terms, but are not necessarily complete, and each of these statements is qualified in all respects by reference to the full text of such contract or other document.

We are subject to the periodic reporting and other informational requirements of the Exchange Act applicable to a foreign private issuer. Accordingly, we are required to file with or furnish to the SEC reports and other information, including annual reports on Form 20-F and reports on Form 6-K.

**Table of Contents**

As a foreign private issuer, we are exempt under the Exchange Act from, among other things, the rules prescribing the furnishing and content of proxy statements, and members of our board of directors and board of executive officers and our principal shareholders are exempt from reporting and short-swing profit recovery provisions contained in Section 16 of the Exchange Act. In addition, as a foreign private issuer, we will not be required under the Exchange Act to file periodic reports and financial statements with the SEC as frequently or as promptly as U.S. companies whose securities are registered under the Exchange Act.

You may inspect and copy reports and other information that we file with or furnish to the SEC at the SEC's Public Reference Room located at 100 F Street, N.E., Washington, D.C. 20549. Copies of these materials may be obtained by mail from the SEC's Public Reference Room at prescribed rates. The public may obtain information on the operation of the SEC's Public Reference Room by calling the SEC in the United States at 1-800-SEC-0330. In addition, the SEC maintains an internet website at [www.sec.gov](http://www.sec.gov) from which you can electronically access these materials.

We also file financial statements and other periodic reports with the CVM, which are available for investor inspection at the CVM's offices located at Rua Sete de Setembro, 111, 2nd floor, Rio de Janeiro, RJ, and Rua Formosa, 367, 20th floor, São Paulo, SP. The telephone numbers of the CVM in Rio de Janeiro and São Paulo are +55-21-3233-8390 and +55-11-2146-2000, respectively.

Copies of our annual report on Form 20-F and documents referred to in this annual report and our bylaws are available for inspection upon request at our headquarters at SIA/Sul, ASP, Lote D, Bloco B 71215-000 Setor de Indústria, Brasília, DF, Brazil. Our filings are also available to the public through the internet at our website at [www.oi.com.br/ir](http://www.oi.com.br/ir). The information included on our website or that might be accessed through our website is not included in this annual report and is not incorporated into this annual report by reference.

**ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We are exposed to market risks related to changes in exchange rates and interest rates. The principal market for our products and services is Brazil, and substantially all of our revenues are denominated in *reais*.

***Exchange Rate Risk***

We are exposed to foreign exchange risk because a significant portion of our equipment costs, such as costs relating to switching centers and software used for upgrading network capacity, are primarily denominated in foreign currencies or linked to foreign currencies, primarily the U.S. dollar. In 2009, approximately 30% of our capital expenditures were U.S. dollar-denominated or linked to the U.S. dollar. A hypothetical, instantaneous 10.0% depreciation of the *real* against the U.S. dollar as of December 31, 2008 would have resulted in an increase of R\$32 million in the cost of our capital expenditures in 2009, assuming that we would have incurred all of these capital expenditures notwithstanding the adverse change in the exchange rates.

Our financing cost and the amount of financial liabilities that we record are also exposed to exchange rate risk. As of December 31, 2009, R\$532 million, or 12.0%, of our total consolidated indebtedness was denominated in foreign currency, excluding swap adjustments. At December 31, 2009, we protected 39.7% of our indebtedness affected by exchange rate variation against significant variations in exchange rates (primarily U.S. dollars, Japanese Yen and *Cesta de Moedas*) by using foreign currency swaps and foreign currency investments. At December 31, 2009, the aggregate notional principal amount of our swap contracts was approximately US\$95 million, which mature in one to three years. At December 31, 2009, the fair value of the swap contracts was R\$198 million.

In 2009, gains on foreign currency and monetary restatement amounted to R\$123 million due to the appreciation of the *real* against the U.S. dollar. At December 31, 2009, a hypothetical, instantaneous and unfavorable 10.0% depreciation of the *real* against other relevant currencies would result in an increase of R\$64 million in our total debt obligations considering the net impact of the increase in our debt obligations and the decrease in our swap position. For further information about our swap agreements, see note 30 to our audited consolidated financial statements included in this annual report.

**Table of Contents****Interest Rate Risk**

We are exposed to interest rate risk because a significant portion of our indebtedness bears interest at floating rates. At December 31, 2009, our total outstanding indebtedness on a consolidated basis was R\$4,454 million (excluding swap adjustments of R\$198 million and including the transaction costs of R\$11 million), of which R\$3,927 million, or 88.2%, bore interest at floating rates, including R\$3,796 million of *real*-denominated indebtedness that bore interest at rates based on the CDI rate or the TJLP rate, and R\$131 million of U.S. dollar- and Japanese Yen-denominated indebtedness that bore interest at rates based on U.S. dollar and Japanese Yen LIBOR. At December 31, 2009, we did not have any outstanding derivative agreements to limit our exposure to variations in the TJLP rate or the CDI rate.

We invest our excess liquidity (R\$2,099 million as of December 31, 2009) mainly in certificates of deposit issued by financial institutions with AAA rating from international rating agencies and in investment funds created by top Brazilian asset managers exclusively for us. The fund managers are responsible for managing our funds, subject to the direction of our senior management and board of directors. Currently, these funds are comprised mainly of government bonds and other low-risk financial instruments linked to the CDI rate. We believe that our exposure to fluctuations in Brazilian interest rates is partially mitigated by these investments.

The potential loss to us over one year that would have resulted from a hypothetical, instantaneous and unfavorable change of 100 basis points in the interest rates, extracted from the current forward curves would be approximately R\$11 million to our future cash flows, considering both the impact in our debt obligations and swap position. This sensitivity analysis is based on the assumption of an unfavorable 100 basis points movement of the interest rates applicable to each homogeneous category of financial liabilities and sustained over a period of one year. A homogeneous category is defined according to the currency in which financial assets and liabilities are denominated and assumes the same interest rate movement within each homogeneous category (*e.g., reais*). As a result, our interest rate risk sensitivity model may overstate the impact of interest rate fluctuation for such financial instruments, as consistently unfavorable movements of all interest rates are unlikely.

**Hedging Policy**

We employ financial risk management strategies using cross-currency interest rate swaps. Our financial risk management strategy is designed to protect us against devaluation of the *real* against foreign currencies and increases in foreign currency interest rates, according to our foreign-currency exposure in connection with our financings. We do not enter into derivatives transactions for speculative or any other purposes.

**ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES**

The depositary, The Bank of New York Mellon, collects its fees for the delivery and surrender of ADSs directly from investors depositing shares or surrendering ADSs or from intermediaries acting for them. The depositary also collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees. The depositary may collect its annual fee for depositary services by deductions from cash distributions or by directly billing investors or by charging the book-entry system accounts of participants acting for them. The depositary may generally refuse to provide fee-attracting services until its fees for those services are paid.

Persons depositing or withdrawing shares must pay:

US\$5.00 (or less) per 100 ADSs (or portion of 100 ADSs) for the issuance of ADSs, including issuances resulting from a distribution of shares or rights or other property;

US\$5.00 (or less) per 100 ADSs (or portion of 100 ADSs) for the cancellation of ADSs for the purpose of withdrawal, including in the event of the termination of the deposit agreement;

US\$0.02 (or less) per ADS (or portion thereof) for any cash distribution;

**Table of Contents**

US\$0.02 (or less) per ADS (or portion thereof) per calendar year for depositary services;

in the event of distributions of securities (other than our Class A preferred shares), a fee equivalent to the fee for the execution and delivery of ADRs referred to above which would have been charged, as a result of the deposit of such securities (treating such securities as Class A Preferred Shares for the purposes of this fee);

registration or transfer fees for the transfer and registration of shares on our share register to or from the name of the depositary or its agent when you deposit or withdraw shares;

expenses of the depositary for (1) cable, telex and facsimile transmissions (when expressly provided in the deposit agreement), and (2) converting foreign currency to U.S. dollars;

taxes and other governmental charges the depositary or the custodian have to pay on any ADS or share underlying an ADS, for example, stock transfer taxes, stamp duty or withholding taxes, as necessary; and

any charges incurred by the depositary or its agents for servicing the deposited securities, as necessary.

Subject to certain terms and conditions, The Bank of New York Mellon has agreed to reimburse us for certain expenses it incurs that are related to establishment and maintenance expenses of the ADS program, including the standard out-of-pocket maintenance costs for the ADRs, which consist of the expenses of postage and envelopes for mailing annual and interim financial reports, printing and distributing dividend checks, electronic filing of U.S. Federal tax information, mailing required tax forms, stationery, postage, facsimile, and telephone calls. There are limits on the amount of expenses for which the depositary will reimburse us, but the amount of reimbursement available to us is not necessarily tied to the amount of fees the depositary collects from investors.

During the year ended December 31, 2009, we did not receive any fees or reimbursements from the depositary or the former depositary of our ADSs.

**PART II**

**ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES**

Not applicable.

**ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS**

Not applicable.

**ITEM 15. CONTROLS AND PROCEDURES**

**Disclosure Controls and Procedures**

Our chief executive officer, or CEO, and our chief financial officer, or CFO, are responsible for establishing and maintaining our disclosure controls and procedures. These controls and procedures were designed to ensure that information that we are required to disclose in the reports that we file under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the applicable rules and forms of the SEC, and that it is accumulated and communicated to our management, including our CEO and CFO, as appropriate to allow timely decisions regarding required disclosure. We performed an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2009 under the supervision of our CEO and CFO. Based on our evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective at reasonable assurance level as of December 31, 2009.

**Management's Annual Report on Internal Control over Financial Reporting and Report of Independent Registered Public Accounting Firm**

Our management is responsible for establishing and maintaining adequate internal controls over financial reporting.

Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with applicable generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with applicable generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

---

**Table of Contents**

Under the supervision and with the participation of our CEO and CFO, our management conducted an assessment of our internal control over financial reporting as of December 31, 2009 based on the criteria established in *Internal Control – Integrated Framework* issued by COSO.

As a result of the assessment described above, our management concluded that as of December 31, 2009, we did maintain effective internal control over financial reporting based on the criteria established in *Internal Control – Integrated Framework* issued by COSO.

**Attestation Report of Independent Registered Public Accounting Firm**

To the Board of Directors and Shareholders of Brasil Telecom S.A.

We have audited the internal control over financial reporting of Brasil Telecom S.A. and subsidiaries (the *Company*) as of December 31, 2009, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The *Company*'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the *Company*'s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on that risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A *company*'s internal control over financial reporting is a process designed by, or under the supervision of, the *company*'s principal executive and principal financial officers, or persons performing similar functions, and effected by the *company*'s board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A *company*'s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the *company*; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the *company* are being made only in accordance with authorizations of management and directors of the *company*; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the *company*'s assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the *Company* has maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on the criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2009 of the *Company* and our report dated June 29, 2010, expressed an unqualified opinion on those financial statements and included explanatory paragraphs relating to the differences between Brazilian accounting practices and accounting principles generally accepted in the United States of America; the suspension of the corporate restructuring process; and the fact that the balances as of December 31, 2008 and for the years ended December 31, 2008 and 2007 were reclassified.

/s/ Deloitte Touche Tohmatsu

Auditores Independentes

June 29, 2010

Rio de Janeiro, Brazil.

**Changes in Internal Control over Financial Reporting**

During the year ended December 31, 2009, we implemented certain changes to our internal controls over financial reporting, in order to align our practices with those of our new controlling shareholder. Moreover, in order to mitigate the effects of the material weakness we had identified as of December 31, 2008 relating to the financial statement closing process, in connection with the reconciliations of shareholders' equity and net income from Brazilian GAAP to U.S. GAAP, we improved the quality and efficiency of the process to monitor, review and operate the key internal controls over the financial reporting closing process, based on the expertise of the new controlling company's specialized group, which became responsible for preparing our U.S. GAAP reconciliations in connection with our acquisition on January 8, 2009.

Since the end of 2009, in connection with the requirements of the Sarbanes-Oxley Act of 2002, our management undertook, among others, the following major action:

continued to integrate the internal control processes previously followed by our company with the internal control structure of its controlling shareholder.

**ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT**

Our fiscal council currently includes an audit committee financial expert within the meaning of this Item 16A. Our fiscal council has determined that Éder Carvalho Magalhães is our fiscal council financial expert. Éder Carvalho Magalhães's biographical information is included in Item 6. Directors, Senior Management and Employees. Éder Carvalho Magalhães is independent, as that term is defined in Rule 303A.02 of the New York Stock Exchange's Listed Company Manual.

**Table of Contents****ITEM 16B. CODE OF ETHICS**

We have adopted a code of ethics that applies to members of our board of directors, fiscal council and board of executive officers, as well as to our other employees. A copy of our code of ethics may be found on our website at [www.oi.com.br/ir](http://www.oi.com.br/ir). The information included on our website or that might be accessed through our website is not included in this annual report and is not incorporated into this annual report by reference.

**ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES****Audit and Non-Audit Fees**

The following table sets forth the fees billed to us by our independent registered public accounting firm, Deloitte Touche Tohmatsu Auditores Independentes, during the fiscal years ended December 31, 2009 and 2008.

	Year ended December 31,	
	2009	2008
	(in millions of reais)	
Audit fees (1)	R\$ 5.0	R\$ 2.1
Audit-related fees		
Tax fees		
All other fees		
<b>Total fees</b>	<b>R\$ 5.0</b>	<b>R\$ 2.1</b>

- (1) Audit fees consist of the aggregate fees billed by Deloitte Touche Tohmatsu Auditores Independentes in connection with the audit of our annual financial statements and interim reviews of our quarterly financial information.

**Pre-Approval Policies and Procedures**

Our fiscal council and board of directors have approved an Audit and Non-Audit Services Pre-Approval Policy that sets forth the procedures and the conditions pursuant to which services proposed to be performed by our independent auditors may be pre-approved. This policy is designed to (1) provide both general pre-approval of certain types of services through the use of an annually established schedule setting forth the types of services that have already been pre-approved for a certain year and, with respect to services not included in an annual schedule, special pre-approval of services on a case by case basis by our fiscal council and our board of directors, and (2) assess compliance with the pre-approval policies and procedures. Our management periodically reports to our fiscal council the nature and scope of audit and non-audit services rendered by our independent auditors and is also required to report to our fiscal council any breach of this policy of which our management is aware.

**ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES**

We are relying on the general exemption from the listing standards relating to audit committees contained in Rule 10A-3(c)(3) under the Exchange Act for the following reasons:

we are a foreign private issuer that has a fiscal council, which is a board of auditors (or similar body) established and selected pursuant to and as expressly permitted under Brazilian law;

Brazilian law requires our fiscal council to be separate from our board of directors;

## **Table of Contents**

members of our fiscal council are not elected by our management, and none of our executive officers is a member of our fiscal council;

Brazilian law provides standards for the independence of our fiscal council from our management;

our fiscal council, in accordance with its charter, makes recommendations to our board of directors regarding the appointment, retention and oversight of the work of any registered public accounting firm engaged (including, the intermediation of disagreements between our management and our independent auditors regarding financial reporting) for the purpose of preparing or issuing an audit report or performing other audit, review or attest services for our company, as Brazilian law requires that our board of directors appoint, retain and oversee the work of our independent public accountants;

our fiscal council (1) has implemented procedures for receiving, retaining and addressing complaints regarding accounting, internal control and auditing matters, including the submission of confidential, anonymous complaints from employees regarding questionable accounting or auditing, and (2) has authority to engage independent counsel and other advisors as it determines necessary to carry out its duties; and

our company compensates our independent auditors and any outside advisors hired by our fiscal council and provides funding for ordinary administrative expenses incurred by the fiscal council in the course of its duties.

We, however, do not believe that our reliance on this general exemption will materially adversely affect the ability of our fiscal council to act independently and to satisfy the other requirements of the listing standards relating to audit committees contained in Rule 10A-3 under the Exchange Act.

### **ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS**

Not Applicable.

### **ITEM 16F. CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT**

Not Applicable.

### **ITEM 16G. CORPORATE GOVERNANCE**

On November 4, 2003, the SEC approved the final corporate governance rules established by the NYSE. According to these rules, foreign private issuers that are listed on the NYSE, such as Brasil Telecom, are subject to a more limited set of corporate governance requirements than those imposed on U.S. domestic issuers. As a foreign private issuer, Brasil Telecom must comply with the following four requirements imposed by the NYSE:

Brasil Telecom must satisfy the audit committee requirements of Rule 10A-3 under the Exchange Act;

Brasil Telecom's Chief Executive Officer must promptly notify the NYSE in writing if any executive officer of Brasil Telecom becomes aware of any material non-compliance with any of the applicable NYSE corporate governance rules;

## Edgar Filing: BRASIL TELECOM SA - Form 20-F

Brasil Telecom must provide a brief description of any significant ways in which Brasil Telecom's corporate governance practices differ from those required to be followed by U.S. domestic issuers under the NYSE corporate governance rules; and

Brasil Telecom must submit an executed written affirmation annually to the NYSE and an interim written affirmation to the NYSE each time a change occurs to Brasil Telecom's board of directors or any committees of Brasil Telecom's board of directors that are subject to Section 303A, in each case in the form specified by the NYSE.

## **Table of Contents**

### **Significant Differences**

The significant differences between Brasil Telecom's corporate governance practices and the NYSE's corporate governance standards are mainly due to the differences between the U.S. and Brazilian legal systems. Brasil Telecom must comply with the corporate governance standards set forth under the Brazilian Corporation Law, the rules of the CVM and the applicable rules of the BM&FBOVESPA, as well as those set forth in Brasil Telecom's bylaws.

The significant differences between Brasil Telecom's corporate governance practices and the NYSE's corporate governance standards are set forth below.

### ***Independence of Directors and Independence Tests***

In general, the NYSE corporate governance standards require listed companies to have a majority of independent directors and set forth the principals by which a listed company can determine whether a director is independent. However, under the NYSE corporate governance standards, a listed company (whether U.S or foreign) of which more than 50% of the voting power is held by another company (a controlled company), need not comply with the following NYSE corporate governance standards:

A controlled company need not have a majority of independent directors;

A controlled company need not have a nominating/corporate governance committee composed of independent directors with a charter that complies with the NYSE corporate governance rules; and

A controlled company need not have a compensation committee composed of independent directors with a charter that complies with the NYSE corporate governance rules.

Because a majority of the voting power of Brasil Telecom's capital stock is directly controlled by Coari, Brasil Telecom is a controlled company, and would therefore not be required to have a majority of independent directors if it were a U.S. domestic issuer.

Although Brazilian Corporation Law and Brasil Telecom's bylaws establish rules in relation to certain qualification requirements of its directors, neither Brazilian Corporation Law nor Brasil Telecom's bylaws require that Brasil Telecom have a majority of independent directors nor require Brasil Telecom's board of directors or management to test the independence of Brasil Telecom's directors before such directors are appointed.

### ***Executive Sessions***

The NYSE corporate governance standards require non-management directors of a listed company to meet at regularly scheduled executive sessions without management.

According to the Brazilian Corporation Law, up to 1/3 of the members of Brasil Telecom's board of directors can be elected to management positions. The remaining non-management directors are not expressly empowered to serve as a check on Brasil Telecom's management, and there is no requirement that those directors meet regularly without management. Notwithstanding the foregoing, Brasil Telecom's board of directors consists entirely of non-management directors, and as such Brasil Telecom believes it would be in compliance with this NYSE corporate governance standard.

### ***Nominating/Corporate Governance and Compensation Committees***

The NYSE corporate governance standards require that a listed company have a nomination/corporate governance committee and a compensation committee, each composed entirely of independent directors and each with a written charter that addresses certain duties. However, as a controlled company, Brasil Telecom would not be required to comply with these requirements if it were a U.S. domestic company.

## **Table of Contents**

Brasil Telecom is not required under Brazilian law to have, and accordingly does not have, a nominating/corporate governance committee or a compensation committee. Brasil Telecom believes that, pursuant to its bylaws, the role of a nominating committee is generally performed by Brasil Telecom's board of directors and the role of the corporate governance committee is generally performed by either its board of directors or its senior management.

Brasil Telecom is not required under Brazilian law to have, and accordingly does not have, a compensation committee. Under Brazilian Corporation Law, Brasil Telecom's shareholders establish the aggregate compensation of its directors and executive officers, including benefits and allowances, at a general shareholder's meeting based on the recommendation of Brasil Telecom's board of directors.

### ***Audit Committee and Audit Committee Additional Requirements***

The NYSE corporate governance standards require that a listed company have an audit committee with a written charter that addresses certain specified duties and that is composed of at least three members, all of whom satisfy the independence requirements of Rule 10A-3 under the Exchange Act and Section 303A.02 of the NYSE's Listed Company Manual.

As a foreign private issuer that qualifies for the general exemption from the listing standards relating to audit committees set forth in Section 10A-3(c)(3) under the Exchange Act, Brasil Telecom is not subject to the independence requirements of the NYSE corporate governance standards. See Item 16D. Exemptions From the Listing Standards for Audit Committees.

### ***Shareholder Approval of Equity Compensation Plans***

The NYSE corporate governance standards require that shareholders of a listed company must be given the opportunity to vote on all equity compensation plans and material revisions thereto, subject to certain exceptions.

Under Brazilian Corporation Law, shareholder pre-approval is required for the adoption and revision of any equity compensation plans, but this decision may be delegated to the board of directors. On November 6, 2007, the shareholders of Brasil Telecom approved a stock option plan at their extraordinary shareholders meeting. At this meeting, the shareholders of Brasil Telecom granted Brasil Telecom's board of directors the authority to manage and periodically create new stock option programs under this stock option plan. The board of directors has adopted two stock option programs. See Item 6. Directors, Senior Management and Employees' Stock Option Plans.

### ***Corporate Governance Guidelines***

The NYSE corporate governance standards require that a listed company must adopt and disclose corporate governance guidelines that address certain minimum specified standards which include: (1) director qualification standards; (2) director responsibilities; (3) director access to management and independent advisors; (4) director compensation; (5) director orientation and continuing education; (6) management succession; and (7) annual performance evaluation of the board of directors.

Brasil Telecom must comply with certain corporate governance standards set forth under Brazilian Corporation Law, CVM rules and the applicable rules of the BM&FBOVESPA. See Item 9. The Offer and Listing Regulation of Brazilian Securities Markets. These rules do not require Brasil Telecom to adopt and disclose corporate governance guidelines covering the matters set forth in the NYSE's corporate governance standards. However, certain provisions of Brazilian Corporation Law that are applicable to Brasil Telecom address certain aspects of director qualifications standards and director responsibilities.

**Table of Contents**

*Code of Business Conduct and Ethics*

The NYSE corporate governance standards require that a listed company must adopt and disclose a code of business conduct and ethics for directors, officers and employees and promptly disclose any waivers of the code for directors or officers. Each code of business conduct and ethics should address the following items: conflicts of interest; corporate opportunities; confidentiality; fair dealing; protection and proper use of company assets; compliance with laws, rules and regulations (including insider trading laws); and encouraging the reporting of any illegal or unethical behavior.

Although the adoption of a code of ethics is not required by Brazilian law, Brasil Telecom has adopted a code of ethics applicable to its directors, officers and employees, which addresses each of the items listed above. See Item 16B. Code of Ethics.

**Report of Independent Registered Public Accounting Firm**

To the Board of Directors and Shareholders of

Brasil Telecom S.A.

We have audited the accompanying consolidated balance sheets of Brasil Telecom S.A. and subsidiaries (the Company) as of December 31, 2009 and 2008, and the related consolidated statements of operations, changes in shareholders' equity, cash flows and value added for the three years in the period ended December 31, 2009. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statements presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Company as of December 31, 2009 and 2008, and the consolidated results of its operations, the changes in shareholders' equity, its cash flows and the value added in its operations for the three years in the period ended December 31, 2009, in conformity with Brazilian accounting practices.

Brazilian accounting practices vary in certain significant respects from accounting principles generally accepted in the United States of America. Information relating to the nature and effect of such differences is presented in Note 32 to the consolidated financial statements.

As mentioned in Note 1(b), on September 25, 2009, the Fiscal Committee and the Board of Directors of Brasil Telecom S.A. and its shareholder Coari Participações S.A., approved the phase of the corporate restructuring involving the exchange of shares held by minority shareholders in Brasil Telecom S.A. for shares of Coari Participações S.A.. Furthermore, as mentioned in Note 31, in an extraordinary shareholders' meeting that took place on June 16, 2010, the minority shareholders of the common and preferred shares of the Company did not approve the new proposed indirect share exchange ratios between the Company and Telemar Norte Leste S.A. that would have been used in the final phase of the corporate restructuring. Consequently, the corporate restructuring was suspended indefinitely.

As mentioned in Note 2, as a result of the harmonization of certain accounting practices between the Company and its new controlling shareholder, certain reclassifications were made to the prior period balance sheet as of December 31, 2008 and statements of operations for the years ended December 31, 2008 and 2007, pursuant to NPC 12 - Accounting Policies, Changes in Accounting Estimates and Error Correction, approved by CVM Resolution 506 / 06.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2009 based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated June 29, 2010, expressed an unqualified opinion on the Company's internal control over financial reporting.
