SUPPLEMENTAL RISK FACTORS

You should carefully consider the supplemental risks described below in addition to the risks described in Item 1A. Risk Factors in our Annual Report on Form 10-K, filed on February 26, 2010, and in our Quarterly Report on Form 10-Q, filed on October 29, 2010, which are incorporated by reference herein, as well as the other information contained in or incorporated by reference into this prospectus supplement and the accompanying prospectus, before investing in the notes. You could lose part or all of your investment.

There are no financial covenants in the indenture.

Neither we nor any of our subsidiaries are restricted from incurring additional debt or other liabilities, including additional senior debt, under the indenture. If we incur additional debt or liabilities, our ability to pay our obligations on the notes could be adversely affected. We expect that we will from time to time incur additional debt and other liabilities. In addition, we are not restricted from paying dividends or issuing or repurchasing our securities under the indenture.

There are no financial covenants in the indenture. You are not protected under the indenture in the event of a highly leveraged transaction, reorganization, change of control, restructuring, merger or similar transaction that may adversely affect you, except to the extent described under Description of the Notes Consolidation, Merger and Conveyance of Assets as an Entirety; No Financial Covenants.

The notes will not be guaranteed by any of our subsidiaries and will be structurally subordinated to the debt and other liabilities of our subsidiaries, which means that creditors of our subsidiaries will be paid from their assets before holders of the notes would have any claims to those assets.

We are a holding company and conduct substantially all of our operations through subsidiaries. However, the notes will be obligations exclusively of Genworth Financial, Inc. and will not be guaranteed by any of our subsidiaries. As a result, the notes will be structurally subordinated to all debt and other liabilities of our subsidiaries (including liabilities to policyholders and contractholders), which means that creditors of our subsidiaries will be paid from their assets before holders of the notes would have any claims to those assets. As of September 30, 2010, our subsidiaries had outstanding \$92,612 million of total liabilities, including \$3,705 million of debt (excluding, in each case, intercompany liabilities).

An active trading market for the notes may not develop.

The notes constitute a new issue of securities, for which there is no existing market. We do not intend to apply for listing of the notes on any securities exchange or for quotation of the notes in any automated dealer quotation system. We cannot provide you with any assurance regarding whether a trading market for the notes will develop, the ability of holders of the notes to sell their notes or the price at which holders may be able to sell their notes. The underwriters have advised us that they currently intend to make a market in the notes. However, the underwriters are not obligated to do so, and any market-making with respect to the notes may be discontinued at any time without notice. If no active trading market develops, you may be unable to resell your notes at any price or at their fair market value.

If a trading market does develop, changes in our credit ratings or the debt markets could adversely affect the market price of the notes.

The price for the notes will depend on many factors, including:

our credit ratings with major credit rating agencies;

the prevailing interest rates being paid by other companies similar to us;

Table of Contents

the market price of our common stock;

our financial condition, financial performance and future prospects; and

the overall condition of the financial markets.

The condition of the financial markets and prevailing interest rates have fluctuated in the past and are likely to fluctuate in the future. Such fluctuations could have an adverse effect on the price of the notes.

In addition, credit rating agencies continually review their ratings for the companies that they follow, including us. The credit rating agencies also evaluate the insurance industry as a whole and may change their credit rating for us based on their overall view of our industry. A negative change in our rating could have an adverse effect on the price of the notes.

For any period shorter than a full semi-annual period the amount of interest will be calculated on the basis of a 30-day month, and, for any period less than a month, on the basis of the actual number of days elapsed per 30-day month.

If an interest payment date for the notes falls on a date that is not a business day (as defined above), then interest will be paid on the next day that is a business day, and no interest on such payment will accrue for the period from and after such interest payment date. If a redemption date or the maturity date for any note falls on a date that is not a business day, the related payments of principal, premium, if any, and interest may be made on

the next succeeding business day, and no additional interest will accrue on the amount payable for the period from and after the redemption date or maturity date.

The notes will not be entitled to the benefit of any sinking funds.

The notes will be issued as fully registered notes (to be deposited with the depository or its custodian) and in denominations of \$2,000 and integral multiples of \$1,000 in excess of \$2,000.

In addition to the notes, we may issue from time to time other series of debt securities under the indenture consisting of debentures, notes or other unsecured, unsubordinated evidences of indebtedness, but such other series will be separate from and independent of the notes. The indenture does not limit the amount of debt securities or any other debt (whether secured or unsecured or whether subordinated or unsubordinated) which we may incur.

We may from time to time, without the consent of the holders of the notes, reopen the series of debt securities of which the notes are a part and issue additional notes having the same ranking and the same interest rate, maturity and other terms as the notes, except for the public offering price and the issue date and, if applicable, the initial interest accrual date and the initial interest payment date. Any additional notes having similar terms, together with the notes, will constitute a single series of debt securities under the indenture and will be fungible with the previously issued notes to the extent specified in the applicable pricing supplement. No additional such notes may be issued if an event of default has occurred and is continuing with respect to the series of debt securities of which such notes are a part.

The trustee will maintain an office in the Borough of Manhattan, the City of New York where we will pay the principal and premium, if any, on the notes and you may present the notes for registration of transfer and exchange.

Ranking

The notes will be our direct, senior unsecured obligations and will rank without preference or priority among themselves and equally with all of our existing and future senior unsecured debt.

We are a holding company and conduct substantially all of our operations through subsidiaries. However, the notes will be obligations exclusively of Genworth Financial, Inc. and will not be guaranteed by any of our subsidiaries. As a result, the notes will be structurally subordinated to all debt and other liabilities of our subsidiaries (including liabilities to policyholders and contractholders), which means that creditors of our subsidiaries will be paid from their assets before holders of the notes would have any claims to those assets. As of September 30, 2010, our subsidiaries had outstanding \$92,612 million of total liabilities, including \$3,705 million of debt (excluding, in each case, intercompany liabilities).

As a holding company, dividends from our subsidiaries and permitted payments to us under our tax sharing arrangements with our subsidiaries will be our principal sources of cash to pay principal and interest on the notes and meet our other obligations. The payment of dividends and other distributions to us by our insurance subsidiaries is regulated by insurance laws and regulations. In general, dividends in excess of prescribed limits are deemed extraordinary and require insurance regulatory approval. The ability of our insurance subsidiaries to pay dividends to us is also subject to various conditions imposed by the rating agencies for the subsidiaries to maintain their ratings. Our subsidiaries have no obligation to pay any amounts due on the notes.

As of September 30, 2010, we had outstanding \$4,778 million of unsecured and unsubordinated debt at the parent company level. The indenture does not limit our ability to incur senior, subordinated or secured debt, or our ability, or that of any of our existing or future subsidiaries, to incur other indebtedness and other liabilities or issue preferred stock.

Optional Redemption

We may redeem all or a portion of the notes at our option at any time or from time to time as set forth below. We will mail notice of such redemption to the registered holders of the notes to be redeemed at least 30 days and not more than 60 days prior to the redemption date. We may redeem such notes at a redemption price equal to the greater of:

100% of the principal amount plus accrued and unpaid interest to, but excluding, the redemption date; and

the sum of the present values of the remaining scheduled payments of principal and interest (exclusive of interest accrued to the redemption date) discounted to the redemption date on a semiannual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate plus 65 basis points, plus accrued and unpaid interest on the principal amount being redeemed to, but excluding, the redemption date.

Comparable Treasury Issue means the United States Treasury security selected by an Independent Investment Banker as having a maturity comparable to the remaining term (**Remaining Life**) of the notes to be redeemed that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the remaining term of the notes.

Comparable Treasury Price means, with respect to any redemption date, (1) the average of the Reference Treasury Dealer Quotations for such redemption date, after excluding the highest and lowest such Reference Treasury Dealer Quotations, or (2) if the Independent Investment Banker obtains fewer than three such Reference Treasury Dealer Quotations, the average of all such Quotations or, if only one such Quotation is obtained, such Quotation.

Independent Investment Banker means an independent investment banking institution of national standing appointed by us, which may be one of the Reference Treasury Dealers.

Reference Treasury Dealer means each of (1) J.P. Morgan Securities LLC and Merrill Lynch, Pierce, Fenner & Smith Incorporated and their respective successors, *provided* that if any of the foregoing shall cease to be a primary U.S. government securities dealer in the United States (a **Primary Treasury Dealer**), we will substitute therefor another Primary Treasury Dealer and (2) any other Primary Treasury Dealer selected by us.

Reference Treasury Dealer Quotations means, with respect to each Reference Treasury Dealer and any redemption date, the average, as determined by the Independent Investment Banker, of the bid and asked prices for the Comparable Treasury Issue (expressed in each case as a percentage of its principal amount) quoted in writing to the Independent Investment Banker by the Reference Treasury Dealer at 5:00 p.m. on the third business day preceding such redemption date.

Treasury Rate means, with respect to any redemption date, (1) the yield, under the heading which represents the average for the immediately preceding week, appearing in the most recently published statistical release designated H.15(519) or any successor publication which is published weekly by the Board of Governors of the Federal Reserve System and which establishes yields on actively traded United States Treasury securities adjusted to constant maturity under the caption Treasury Constant Maturities, for the maturity corresponding to the Comparable Treasury Issue (if no maturity is within three months before or after the Remaining Life, yields for the two published maturities most closely corresponding to the Comparable Treasury Issue shall be determined and the Treasury Rate shall be interpolated or extrapolated from such yields on a straight line basis, rounding to the nearest month), (2) if the period from the redemption date to the maturity date of the notes to be redeemed is less than one year, the weekly average yield on actually traded United States Treasury securities adjusted to a constant maturity of one year will be used, or (3) if such release (or any successor release) is not published during the week preceding the calculation date or does not contain such

yields, the rate per annum equal to the semiannual equivalent yield to maturity of the Comparable Treasury Issue, calculated using a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for such redemption date. The Treasury Rate shall be calculated by us on the third business day preceding the redemption date. The trustee shall not be responsible for any such calculation.

Events of Default

Any of the following events will constitute an event of default under the indenture with respect to the notes:

failure to pay interest on the notes for thirty days past the applicable due date;

failure to pay the principal amount of, or premium, if any, on the notes when due (whether at maturity or otherwise);

failure to observe or perform any other covenant or agreement in the indenture, which continues for 60 days after written notice from the trustee or holders of at least 25% of the outstanding principal amount of the notes as provided in the indenture;

acceleration of more than \$100 million of our indebtedness for borrowed money by the terms thereof if the acceleration is not rescinded or annulled within 10 days after written notice from the trustee or holders of at least 25% of the outstanding principal amount of the notes as provided in the indenture, provided that this event of default will be remedied, cured or waived without further action upon t
