Table of Contents**WisdomTree Asia Bond Fund****Investment Objective**

The WisdomTree Asia Bond Fund (the Fund) seeks to provide a high level of total return consisting of both income and capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund's average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.55%
Distribution and/or Service (12b-1) Fees	None
Other Expenses*	0.00%
Total Annual Fund Operating Expenses	0.55%

* Other Expenses are based on estimated amounts for the current fiscal year.

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years
	\$ 56	\$ 176

Investors may pay brokerage commissions on their purchases and sales of Fund shares, which are not reflected in the example.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or turns over its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. Because the Fund is newly-organized, portfolio turnover information is not yet available.

The Fund's Investment Strategy

The Fund seeks to achieve its investment objective through direct and indirect investment in debt securities issued by governments and corporations in Asian countries. The Fund intends to focus on the developing/emerging market economies in Asia, primarily South Korea, Indonesia, Malaysia, Singapore, Hong Kong, China, India, Thailand, Philippines, and Taiwan. This list may change based on market developments. While the Fund is permitted to invest in developed market economies, this is not a focus of the Fund. Therefore, although it is permitted to do so, the Fund is unlikely to invest in issuers in Japan, Australia, or New Zealand. The Fund is an actively managed exchange-traded fund (ETF).

The Fund is designed to provide broad exposure to Asian government and corporate bonds and will invest in a range of instruments with varying credit risk and duration. The Fund intends to invest in bonds and other debt instruments issued by governments, including their agencies and instrumentalities, as well as in bonds and other debt instruments issued by corporations economically tied to Asian countries. The Fund intends

Edgar Filing: WisdomTree Trust - Form 485BPOS

to invest in fixed income securities denominated in the local currency of countries in Asia but also may invest in instruments denominated in U.S. dollars. The Fund also may invest in fixed income securities denominated in Asian currencies and issued by supranational organizations such as the European Investment Bank, Asian Development Bank, International Bank for Reconstruction and Development or International Finance Corporation, and development agencies supported by other national governments. The Fund may also invest in inflation-linked fixed income securities denominated in Asian currencies.

Table of Contents

In order to provide broad-based exposure to the Asian bond market, the Fund will invest in both investment grade and non-investment grade securities. Securities rated investment grade generally are considered to be of higher credit quality and subject to lower default risk. Although securities rated below investment grade may offer the potential for higher yields, they generally are subject to higher potential risk of loss.

The Fund attempts to limit interest rate risk by maintaining an aggregate portfolio duration of between two and seven years under normal market conditions. Aggregate portfolio duration is important to investors as an indication of the Fund's sensitivity to changes in interest rates. Funds with higher durations generally are subject to greater interest rate risk. The Fund's actual portfolio duration may be longer or shorter depending on market conditions.

The Fund will invest, under normal circumstances, at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in Fixed Income Securities. For these purposes, Fixed Income Securities include debt instruments, such as government and corporate bonds, notes and other obligations issued by governments or corporations economically tied to Asian countries and are denominated in Asian currencies or U.S. dollars, as well as certain derivatives described herein. The decision to secure exposure through direct investment in bonds or indirectly through derivative transactions will be a function of, among other things, market accessibility, credit exposure, tax ramifications and regulatory requirements applicable to U.S. investment companies. If, subsequent to an investment, the 80% requirement is no longer met, the Fund's future investments will be made in a manner that will bring the Fund into compliance with this policy. The Trust will provide shareholders with sixty (60) days' prior notice of any change to this policy for the Fund.

The Fund may enter into forward currency contracts, swap transactions and repurchase agreements. The Fund also may buy and sell futures contracts and credit linked notes. A forward contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A swap is an agreement between two parties to exchange payments based on a reference asset, which may be a currency or interest rate, but also may be a single asset, a pool of assets or an index of assets. A currency swap is an agreement between two parties to exchange one currency for another at agreed upon intervals and/or rates. An interest rate swap typically involves the exchange of one interest rate payment for another, such as a floating interest rate payment for a fixed payment. A total return swap is an agreement between two parties in which one party agrees to make payments of the total return of a reference asset in return for payments equal to a rate of interest on another reference asset. Swap transactions may be settled in U.S. dollars or Asian currencies. A repurchase agreement is when a fund purchases securities or other obligations from a bank or securities dealer and simultaneously commits to resell them to a counterparty at an agreed-upon date or upon demand. Repurchase agreements are designed to result in a fixed rate of return for the Fund insulated from market fluctuations during the holding period. A futures contract may generally be described as an agreement for the future sale by one party and the purchase by another of a specified security or instrument at a specified price and time. The Fund intends to invest in interest rate futures contracts listed for trading on exchanges in Asia. A credit linked note is a type of structured note whose value is linked to an underlying reference asset or entity. Credit linked notes typically provide periodic payments of interest as well as payment of principal upon maturity.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share (NAV), trading price, yield, total return and/or ability to meet its objectives.

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or even long periods of time.

Market Risk. The trading prices of currencies, fixed income securities and other instruments fluctuate in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, as well as events that impact specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or even long periods.

Shares of the Fund May Trade at Prices Other Than NAV. As with all ETFs, Fund shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the shares of the Fund will approximate the Fund's NAV, there may be times when the market price and the NAV vary significantly. Thus, you may pay more (or less) than NAV when you buy shares of the Fund in the secondary market, and you may receive more (or less) than NAV when you sell those shares in the secondary market.

Edgar Filing: WisdomTree Trust - Form 485BPOS

Capital Controls Risk. Economic conditions, such as volatile currency exchange rates and interest rates, political events and other conditions may, without prior warning, lead to intervention by the governments of Asian countries and the imposition of capital controls. Capital controls include the prohibition of, or restrictions on, the ability to transfer currency, securities or other assets. Levies may be placed on profits repatriated by foreign entities (such as the Fund). Capital controls may impact the ability of the Fund to buy, sell or otherwise transfer securities or currency, may adversely affect the trading market and price for shares of the Fund, and may cause the Fund to decline in value.

Table of Contents

Credit Risk. The financial condition of an issuer of a debt security or other instrument may cause it to default or become unable to pay interest or principal due. The Fund cannot collect interest and principal payments on a security or instrument if the issuer defaults. While the Fund attempts to limit credit exposure in a manner consistent with its investment objective, the value of an investment in the Fund may change quickly and without warning in response to issuer defaults and changes in the credit ratings of the Fund's portfolio investments.

Currency Exchange Rate Risk. The Fund invests a significant portion of its assets in investments denominated in non-U.S. currencies, or in securities that provide exposure to such currencies, currency exchange rates or interest rates denominated in such currencies. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Because the Fund's NAV is determined on the basis of U.S. dollars, the U.S. dollar value of your investment in the Fund may go down if the value of the local currency of the non-U.S. markets in which the Fund invests depreciates against the U.S. dollar. This is true even if the local currency value of securities in the Fund's holdings goes up. Conversely, the dollar value of your investment in the Fund may go up if the value of the local currency appreciates against the U.S. dollar. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

Derivatives Investment Risk. The Fund will invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying asset, index, interest rate or currency exchange rate. Derivatives are subject to a number of risks described elsewhere in this Prospectus, such as interest rate risk, market risk, and credit risk. They also involve the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index, or that the counterparty to a derivative contract might default on its obligations. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

Emerging Markets Risk. Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments. For example, developing and emerging markets may be subject to (i) greater market volatility, (ii) lower trading volume and liquidity, (iii) greater social, political and economic uncertainty, (iv) governmental controls on foreign investments and limitations on repatriation of invested capital, (v) lower disclosure, corporate governance, auditing and financial reporting standards, (vi) fewer protections of property rights, (vii) restrictions on the transfer of securities or currency, and (viii) settlement and trading practices that differ from U.S. markets. Each of these factors may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

High Yield Securities Risk. Higher yielding, high risk debt securities, sometimes referred to as junk bonds, may present additional risk because these securities may be less liquid and present more credit risk than investment-grade bonds. The price of high yield securities tends to be more susceptible to issuer-specific operating results and outlook and to real or perceived adverse economic and competitive industry conditions.

Interest Rate Risk. Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. As interest rates rise, the value of certain fixed income securities is likely to decrease. Similarly, if interest rates decline, the value of fixed income securities is likely to increase. Fixed income securities with longer maturities tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations.

Investment in Asia Risk. To the extent that the Fund's investments are concentrated in Asia, the Fund will be susceptible to loss due to adverse market, political, regulatory, and geographic events affecting that region. While certain Asian economies are exemplars of growth and development others have been and continue to be subject, to some extent, to over-extension of credit, currency devaluations and restrictions, high unemployment, high inflation, decreased exports and economic recessions. Each of these factors may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

Edgar Filing: WisdomTree Trust - Form 485BPOS

Management Risk. The Fund is actively managed using proprietary investment strategies and techniques. There can be no guarantee that these strategies and techniques will be successful or that the Fund will achieve its investment objective.

Non-Diversification Risk. Although the Fund intends to invest in a variety of securities and instruments, the Fund will be considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance.

Table of Contents

Offshore Investor Risk. The opportunity for offshore investors to access certain markets can be limited due to a variety of factors including government regulations, adverse tax treatment, and currency convertability issues. These limitations and restrictions may impact the availability, liquidity and pricing of securities designed to provide offshore investors with exposure to such markets. As a result, returns achieved by offshore investors, such as the Fund, could differ from those available to domestic investors in the selected countries.

Sovereign Debt Risk. Bonds issued by emerging market governments, sometimes referred to as sovereign debt, present risks not associated with investments in other types of bonds. The government or agency issuing the debt may be unable or unwilling to make interest payments and/or repay the principal owed. In such instance, the Fund may have limited recourse against the issuing government or agency. In the past, governments of emerging market countries have refused to honor their payment obligations on issued bonds.

Table of Contents

Fund Performance

The Fund has not yet completed a full calendar year of investment operations and therefore does not have any performance history.

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as the investment adviser to the Fund. Mellon Capital Management Corporation serves as the sub-adviser to the Fund.

Portfolio Managers

David C. Kwan, a Managing Director, Fixed Income, has been a portfolio manager of the Fund since its inception.

Lisa Mears O Connor, a Managing Director, Fixed Income, has been a portfolio manager of the Fund since its inception.

Buying and Selling Fund Shares

The Fund is an exchange traded fund. This means that shares of the Fund are listed on a national securities exchange, such as NYSE Arca (the Listing Exchange), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (Creation Units), which only institutions or large investors may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, although this may change from time to time. The Fund generally issues and redeems Creation Units in exchange for a portfolio of fixed income securities closely approximating the holdings of the Fund or a designated basket of non-U.S. currency and/or an amount of U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income or capital gains.

Table of Contents

WisdomTree Latin America Bond Fund

(has not commenced operations as of the date of this Prospectus)

Investment Objective

The WisdomTree Latin America Bond Fund (the Fund) seeks to provide a high level of total return consisting of both income and capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund's average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	--
Distribution and/or Service (12b-1) Fees	None
Other Expenses*	--
Total Annual Fund Operating Expenses	--

* Other Expenses are based on estimated amounts for the current fiscal year.

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years
	\$	\$

Investors may pay brokerage commissions on their purchases and sales of Fund shares, which are not reflected in the example.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or turns over its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. Because the Fund is newly-organized, portfolio turnover information is not yet available.

The Fund's Investment Strategy

The Fund attempts to achieve its investment objective through direct and indirect investment in debt securities issued by governments and corporations in Latin American countries. The Fund intends to focus on investments in Brazil, Chile, Colombia, Mexico, Panama, Peru, Uruguay, and Venezuela. The Fund is an actively managed exchange-traded fund (ETF).

The Fund is designed to provide broad exposure to Latin American government and corporate bonds and will invest in a range of instruments with varying credit risk and duration. The Fund intends to invest in bonds and other debt instruments issued by governments, including their

Edgar Filing: WisdomTree Trust - Form 485BPOS

agencies and instrumentalities, as well as in bonds and other debt instruments issued by corporations economically tied to Latin American countries. The Fund intends to invest in fixed income securities denominated in the local currency of countries in Latin America but also may invest in fixed income securities denominated in U.S. dollars. The Fund also may invest in fixed income securities denominated in Latin American currencies and issued by supranational organizations such as the Inter-American Development Bank, International Bank for Reconstruction and Development or International Finance Corporation, and development agencies supported by other national governments. The Fund may also invest in inflation-linked fixed income securities denominated in Latin American currencies.

Table of Contents

In order to provide broad-based exposure to the Latin American bond market, the Fund will invest in both investment grade and non-investment grade securities. Securities rated investment grade generally are considered to be of higher credit quality and subject to lower default risk. Although securities rated below investment grade may offer the potential for higher yields, they generally are subject to higher potential risk of loss.

The Fund attempts to limit interest rate risk by maintaining an aggregate portfolio duration of between two and seven years under normal market conditions. Aggregate portfolio duration is important to investors as an indication of the Fund's sensitivity to changes in interest rates. Funds with higher durations generally are subject to greater interest rate risk. The Fund's actual portfolio duration may be longer or shorter depending on market conditions.

The Fund will invest, under normal circumstances, at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in Fixed Income Securities. For these purposes, Fixed Income Securities include debt instruments, such as government and corporate bonds, notes and other obligations issued by governments and corporations economically tied to Latin American countries and are denominated in Latin American currencies or U.S. dollars, as well as certain derivatives described herein. The decision to secure exposure through direct investment in bonds or indirectly through derivative transactions will be a function of, among other things, market accessibility, credit exposure, tax ramifications and regulatory requirements applicable to U.S. investment companies. If, subsequent to an investment, the 80% requirement is no longer met, the Fund's future investments will be made in a manner that will bring the Fund into compliance with this policy. The Trust will provide shareholders with sixty (60) days' prior notice of any change to this policy for the Fund.

The Fund may enter into forward currency contracts, swap transactions and repurchase agreements. The Fund also may buy and sell futures contracts and credit linked notes. A forward contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A swap is an agreement between two parties to exchange payments based on a reference asset, which may be a currency or interest rate, but also may be a single asset, a pool of assets or an index of assets. A currency swap is an agreement between two parties to exchange one currency for another at agreed upon intervals and/or rates. An interest rate swap typically involves the exchange of one interest rate payment for another, such as a floating interest rate payment for a fixed payment. A total return swap is an agreement between two parties in which one party agrees to make payments of the total return of a reference asset in return for payments equal to a rate of interest on another reference asset. Swap transactions may be settled in U.S. dollars or Latin American currencies. A repurchase agreement is when a fund purchases securities or other obligations from a bank or securities dealer and simultaneously commits to resell them to a counterparty at an agreed-upon date or upon demand. Repurchase agreements are designed to result in a fixed rate of return for the Fund insulated from market fluctuations during the holding period. A futures contract may generally be described as an agreement for the future sale by one party and the purchase by another of a specified security or instrument at a specified price and time. The Fund intends to invest in interest rate futures contracts listed for trading on exchanges in Latin America. A credit linked note is a type of structured note whose value is linked to an underlying reference asset or entity. Credit linked notes typically provide periodic payments of interest as well as payment of principal upon maturity.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share (NAV), trading price, yield, total return and/or ability to meet its objectives.

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or even long periods of time.

Market Risk. The trading prices of currencies, fixed income securities and other instruments fluctuate in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, as well as events that impact specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or even long periods.

Shares of the Fund May Trade at Prices Other Than NAV. As with all ETFs, Fund shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the shares of the Fund will approximate the Fund's NAV, there may be times when the market price and the NAV vary significantly. Thus, you may pay more (or less) than NAV when you buy shares of the Fund in the secondary market, and you may receive more (or less) than NAV when you sell those shares in the secondary market.

Capital Controls Risk. Economic conditions, such as volatile currency exchange rates and interest rates, political events and other conditions may, without prior warning, lead to intervention by the governments of Latin American countries and the imposition of capital controls. Capital controls include the prohibition of, or restrictions on, the ability to transfer currency, securities or other assets. Levies may be placed on profits repatriated by foreign entities (such as the Fund). Capital controls may impact the ability of the Fund to buy, sell or otherwise transfer securities or currency, may adversely affect the trading market and price for shares of the Fund, and may cause the Fund to decline in value.

Credit Risk. The financial condition of an issuer of a debt security or other instrument may cause it to default or become unable to pay interest or principal due. The Fund cannot collect interest and principal payments on a security or instrument if the issuer defaults. While the Fund attempts to limit credit exposure in a manner consistent with its investment objective, the value of an investment in the Fund may change quickly and without warning in response to issuer defaults and changes in the credit ratings of the Fund's portfolio investments.

Table of Contents

Currency Exchange Rate Risk. The Fund invests a significant portion of its assets in investments denominated in non-U.S. currencies, or in securities that provide exposure to such currencies, currency exchange rates or interest rates denominated in such currencies. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Because the Fund's NAV is determined on the basis of U.S. dollars, the U.S. dollar value of your investment in the Fund may go down if the value of the local currency of the non-U.S. markets in which the Fund invests depreciates against the U.S. dollar. This is true even if the local currency value of securities in the Fund's holdings goes up. Conversely, the dollar value of your investment in the Fund may go up if the value of the local currency appreciates against the U.S. dollar. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

Derivatives Investment Risk. The Fund will invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying asset, index, interest rate or currency exchange rate. Derivatives are subject to a number of risks described elsewhere in this Prospectus, such as interest rate risk, market risk, and credit risk. They also involve the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index, or that the counterparty to a derivative contract might default on its obligations. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

Emerging Markets Risk. Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments. For example, developing and emerging markets may be subject to (i) greater market volatility, (ii) lower trading volume and liquidity, (iii) greater social, political and economic uncertainty, (iv) governmental controls on foreign investments and limitations on repatriation of invested capital, (v) lower disclosure, corporate governance, auditing and financial reporting standards, (vi) fewer protections of property rights, (vii) restrictions on the transfer of securities or currency, and (viii) settlement and trading practices that differ from U.S. markets. Each of these factors may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

High Yield Securities Risk. Higher yielding, high risk debt securities, sometimes referred to as junk bonds, may present additional risk because these securities may be less liquid and present more credit risk than investment-grade bonds. The price of high yield securities tends to be more susceptible to issuer-specific operating results and outlook and to real or perceived adverse economic and competitive industry conditions.

Interest Rate Risk. Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. As interest rates rise, the value of certain fixed income securities is likely to decrease. Similarly, if interest rates decline, the value of fixed income securities is likely to increase. Fixed income securities with longer maturities tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations.

Investment in Latin America Risk. To the extent that the Fund's investments are concentrated in Latin America, the Fund will be susceptible to loss due to adverse market, political, regulatory, and geographic events affecting that region. Many countries in Latin America have long histories of political, social and economic instability and have routinely suffered from regional conflict, political corruption, totalitarianism, intervention by the military in civilian and economic spheres, protectionist measures, and nationalization. The continuation or worsening of such instability could reverse favorable trends toward market and economic reform, privatization, and removal of trade barriers, and result in significant disruption in Latin American securities markets. Each of these factors may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

Management Risk. The Fund is actively managed using proprietary investment strategies and techniques. There can be no guarantee that these strategies and techniques will be successful or that the Fund will achieve its investment objective.

Edgar Filing: WisdomTree Trust - Form 485BPOS

Non-Diversification Risk. Although the Fund intends to invest in a variety of securities and instruments, the Fund will be considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance.

Offshore Investor Risk. The opportunity for offshore investors to access certain markets can be limited due to a variety of factors including government regulations, adverse tax treatment, and currency convertability issues.

Table of Contents

These limitations and restrictions may impact the availability, liquidity and pricing of securities designed to provide offshore investors with exposure to such markets. As a result, returns achieved by offshore investors, such as the Fund, could differ from those available to domestic investors in the selected countries.

Sovereign Debt Risk. Bonds issued by emerging market governments, sometimes referred to as sovereign debt, present risks not associated with investments in other types of bonds. The government or agency issuing the debt may be unable or unwilling to make interest payments and/or repay the principal owed. In such instance, the Fund may have limited recourse against the issuing government or agency. In the past, governments of emerging market countries have refused to honor their payment obligations on issued bonds.

Fund Performance

The Fund has not yet completed a full calendar year of investment operations and therefore does not have any performance history.

Management

Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. serves as the investment adviser to the Fund. _____ serves as the sub-adviser to the Fund.

Portfolio Managers

Buying and Selling Fund Shares

The Fund is an exchange traded fund. This means that shares of the Fund are listed on a national securities exchange, such as NYSE Arca (the Listing Exchange), and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares (Creation Units), which only institutions or large investors may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, although this may change from time to time. The Fund generally issues and redeems Creation Units in exchange for a portfolio of fixed income securities closely approximating the holdings of the Fund or a designated basket of non-U.S. currency and/or an amount of U.S. cash.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income or capital gains.

Table of Contents

WisdomTree EMEA Bond Fund

(has not commenced operations as of the date of this Prospectus)

Investment Objective

The WisdomTree EMEA (Europe, Middle East, and Africa) Bond Fund (the Fund) seeks to provide a high level of total return consisting of both income and capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund's average net assets.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	--
Distribution and/or Service (12b-1) Fees	None
Other Expenses*	--
Total Annual Fund Operating Expenses	--

* Other Expenses are based on estimated amounts for the current fiscal year.

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years
	\$	\$

Investors may pay brokerage commissions on their purchases and sales of Fund shares, which are not reflected in the example.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or turns over its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. Because the Fund is newly-organized, portfolio turnover information is not yet available.

The Fund's Investment Strategy

The Fund seeks to achieve its investment objective by investing in bonds issued by governments and corporations in developing countries in Europe, the Middle East and Africa (the EMEA Region). The Fund intends to focus its investment in the Czech Republic, Egypt, Hungary, Israel, Poland, Qatar, Romania, Russia, Slovakia, South Africa, Turkey, and United Arab Emirates. The Fund intends to focus on the developing/emerging countries in the EMEA Region (including those listed above) as opposed to established developed market countries, such as Germany, Europe, and the United Kingdom. The Fund is an actively managed exchange-traded fund (ETF).

Edgar Filing: WisdomTree Trust - Form 485BPOS

The Fund is designed to provide broad exposure to bonds issued by governments and corporations in the EMEA Region and will invest in a range of instruments with varying credit risk and duration. The Fund intends to invest in bonds and other debt instruments issued by governments, including their agencies and instrumentalities, as well as in bonds and other debt instruments issued by corporations economically tied to countries located in the EMEA Region. The Fund intends to invest in fixed income securities denominated in the local currency of countries in the EMEA Region but also may invest in fixed income securities denominated in U.S. dollars. The Fund also may invest in fixed income securities denominated in currencies of the EMEA Region and issued by supranational organizations such as the European Investment Bank, International Bank for Reconstruction and Development or International Finance Corporation, and development agencies supported by other national governments. The Fund may also invest in inflation-linked fixed income securities denominated in European, Middle Eastern and African currencies.

Table of Contents

In order to provide broad-based exposure to the bond markets in the EMEA Region, the Fund will invest in both investment grade and non-investment grade securities. Securities rated investment grade generally are considered to be of higher credit quality and subject to lower default risk. Although securities rated below investment grade may offer the potential for higher yields, they generally are subject to higher potential risk of loss.

The Fund attempts to limit interest rate risk by maintaining an aggregate portfolio duration of between two and seven years under normal market conditions. Aggregate portfolio duration is important to investors as an indication of the Fund's sensitivity to changes in interest rates. Funds with higher durations generally are subject to greater interest rate risk. The Fund's actual portfolio duration may be longer or shorter depending on market conditions.

The Fund will invest, under normal circumstances, at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in Fixed Income Securities. For these purposes, Fixed Income Securities include debt instruments, such as government and corporate bonds, notes and other obligations issued by governments and corporations that are economically tied to developing countries in the EMEA Region and are denominated in local currencies of the EMEA Region or U.S. dollars, as well as certain derivatives described herein. The decision to secure exposure through direct investment in bonds or indirectly through derivative transactions will be a function of, among other things, market accessibility, credit exposure, tax ramifications and regulatory requirements applicable to U.S. investment companies. If, subsequent to an investment, the 80% requirement is no longer met, the Fund's future investments will be made in a manner that will bring the Fund into compliance with this policy. The Trust will provide shareholders with sixty (60) days' prior notice of any change to this policy for the Fund.

The Fund may enter into forward currency contracts, swap transactions and repurchase agreements. The Fund also may buy and sell futures contracts and credit linked notes. A forward contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A swap is an agreement between two parties to exchange payments based on a reference asset, which may be a currency or interest rate, but also may be a single asset, a pool of assets or an index of assets. A currency swap is an agreement between two parties to exchange one currency for another at agreed upon intervals and/or rates. An interest rate swap typically involves the exchange of one interest rate payment for another, such as a floating interest rate payment for a fixed payment. A total return swap is an agreement between two parties in which one party agrees to make payments of the total return of a reference asset in return for payments equal to a rate of interest on another reference asset. Swap transactions may be settled in U.S. dollars or in the currencies of Europe, Middle East and Africa. A repurchase agreement is when a fund purchases securities or other obligations from a bank or securities dealer and simultaneously commits to resell them to a counterparty at an agreed-upon date or upon demand. Repurchase agreements are designed to result in a fixed rate of return for the Fund insulated from market fluctuations during the holding period. A futures contract may generally be described as an agreement for the future sale by one party and the purchase by another of a specified security or instrument at a specified price and time. The Fund intends to invest in interest rate futures contracts listed for trading on exchanges in Europe, Middle East and Africa. A credit linked note is a type of structured note whose value is linked to an underlying reference asset or entity. Credit linked notes typically provide periodic payments of interest as well as payment of principal upon maturity.

Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share (NAV), trading price, yield, total return and/or ability to meet its objectives.

Investment Risk. As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or even long periods of time.

Market Risk. The trading prices of currencies, fixed income securities and other instrument fluctuate in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, as well as events that impact specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or even long periods.

Shares of the Fund May Trade at Prices Other Than NAV. As with all ETFs, Fund shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the shares of the Fund will approximate the Fund's NAV, there may be times when the market price and the NAV vary significantly. Thus, you may pay more (or less) than NAV when you buy shares of the Fund in the secondary market, and you may receive more (or less) than NAV when you sell those shares in the

secondary market.

Capital Controls Risk. Economic conditions, such as volatile currency exchange rates and interest rates, political events and other conditions may, without prior warning, lead to intervention by the governments of countries located in the EMEA Region and the imposition of capital controls. Capital controls include the prohibition of, or restrictions on, the ability to transfer currency, securities or other assets. Levies may be placed on profits repatriated by foreign entities (such as the Fund). Capital controls may impact the ability of the Fund to buy, sell or otherwise transfer securities or currency, may adversely affect the trading market and price for shares of the Fund, and may cause the Fund to decline in value.

Credit Risk. The financial condition of an issuer of a debt security or other instrument may cause it to default or become unable to pay interest or principal due. The Fund cannot collect interest and principal payments on a security or instrument if the issuer defaults. While the Fund attempts to limit credit exposure in a manner consistent with its investment objective, the value of an investment in the Fund may change quickly and without warning in response to issuer defaults and changes in the credit ratings of the Fund's portfolio investments.

Table of Contents

Currency Exchange Rate Risk. The Fund invests a significant portion of its assets in investments denominated in non-U.S. currencies, or in securities that provide exposure to such currencies, currency exchange rates or interest rates denominated in such currencies. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Because the Fund's NAV is determined on the basis of U.S. dollars, the U.S. dollar value of your investment in the Fund may go down if the value of the local currency of the non-U.S. markets in which the Fund invests depreciates against the U.S. dollar. This is true even if the local currency value of securities in the Fund's holdings goes up. Conversely, the dollar value of your investment in the Fund may go up if the value of the local currency appreciates against the U.S. dollar. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

Derivatives Investment Risk. The Fund will invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying asset, index, interest rate or currency exchange rate. Derivatives are subject to a number of risks described elsewhere in this Prospectus, such as interest rate risk, market risk, and credit risk. They also involve the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index, or that the counterparty to a derivative contract might default on its obligations. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

Emerging Markets Risk. Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments. For example, developing and emerging markets may be subject to (i) greater market volatility, (ii) lower trading volume and liquidity, (iii) greater social, political and economic uncertainty, (iv) governmental controls on foreign investments and limitations on repatriation of invested capital, (v) lower disclosure, corporate governance, auditing and financial reporting standards, (vi) fewer protections of property rights, (vii) restrictions on the transfer of securities or currency, and (viii) settlement and trading practices that differ from U.S. markets. Each of these factors may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

High Yield Securities Risk. Higher yielding, high risk debt securities, sometimes referred to as junk bonds, may present additional risk because these securities may be less liquid and present more credit risk than investment-grade bonds. The price of high yield securities tends to be more susceptible to issuer-specific operating results and outlook and to real or perceived adverse economic and competitive industry conditions.

Interest Rate Risk. Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. As interest rates rise, the value of certain fixed income securities is likely to decrease. Similarly, if interest rates decline, the value of fixed income securities is likely to increase. Fixed income securities with longer maturities tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations.

Investment in EMEA Region Risk. To the extent that the Fund's investments are concentrated in the EMEA Region, the Fund will be susceptible to loss due to adverse market, political, regulatory, and geographic events affecting those regions. Each of these factors may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares and cause the Fund to decline in value.

Europe: The European economy is diverse and includes both large, competitive economies and small, struggling economies. As a whole, the European Union is the wealthiest and largest economy in the world. The Economic and Monetary Union of the European Union (the EU) requires compliance with restrictions on inflation rates, deficits, interest rates, debt levels and fiscal and monetary controls, each of which may significantly affect every country in Europe. Decreasing imports or exports, changes in governmental regulations on trade, changes in the exchange rate of the euro, and recessions in EU economies may have a significant adverse effect on the economies of EU member countries and their trading partners.

Edgar Filing: WisdomTree Trust - Form 485BPOS

Middle East and Africa: Investing in Middle Eastern and African securities is highly speculative and involves significant risks and special considerations not typically associated with investing in the securities markets of most other developed countries. Many Middle Eastern and African countries historically have suffered from both political and economic instability. Despite a growing trend towards democratization, especially in Africa, significant political risks continue to affect some Middle Eastern and African countries, such as substantial government control over the private sector, corrupt leaders, civil unrest, suppression of opposition parties that can lead to further dissidence and militancy, fixed elections, terrorism, coups, and war. Certain Middle Eastern and African markets may also face a higher concentration of market capitalization, greater illiquidity and greater price volatility than that found in more developed markets of Western Europe or the United States. The volatility may be exacerbated by this greater illiquidity. Despite a growing trend towards economic diversification, many Middle Eastern and African economies remain heavily dependent upon a limited range of commodities and therefore these economies are greatly affected by international commodity prices and are particularly vulnerable to any weakening in global demand for these products. Certain Middle Eastern and African countries have currencies pegged to the U.S. dollar or euro, rather than at levels determined by market forces. This type of currency regime may experience sudden and significant currency adjustments, which may adversely impact investment returns.

Management Risk. The Fund is actively managed using proprietary investment strategies and techniques. There can be no guarantee that these strategies and techniques will be successful or that the Fund will achieve its investment objective.

Non-Diversification Risk. Although the Fund intends to invest in a variety of securities and instruments, the Fund will be considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance.

Table of Contents

Offshore Investor Risk. The opportunity for offshore investors to access certain markets can be limited due to a variety of factors including government regulations, adverse tax treatment, and currency convertibility issues. These limitations and restrictions may impact the availability, liquidity and pricing of securities designed to provide offshore investors with exposure to such markets. As a result, returns achieved by offshore investors, such as the Fund, could differ from those available to domestic investors in the selected countries.

Sovereign Debt Risk. Bonds issued by emerging market governments, sometimes referred to as sovereign debt, present risks not associated with investments in other types of bonds. The government or agency issuing the debt may be unable or unwilling to make interest payments and/or repay the principal owed. In such instance, the Fund may have limited recourse against the issuing government or agency. In the past, governments of emerging market countries have refused to honor their payment obligations on issued bonds.

The Fund intends to make distributions that may be taxed as ordinary income or capital gains.

Table of Contents

Additional Investment Objective and Risk Information

Objective. Since each Fund's investment objective has been adopted as a non-fundamental policy, each Fund's investment objective may be changed without a vote of shareholders.

Risks. The following section provides additional information regarding certain of the principal risks identified under "Principal Risks of Investing in the Fund" in each Fund's Summary along with additional risk information.

Currency Exchange Rate Risk. Each Fund invests a significant portion of its assets in investments denominated in non-U.S. currencies, or in securities that provide exposure to such currencies, currency exchange rates or interest rates denominated in such currencies. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of a Fund's investment and the value of the Fund shares. Because a Fund's NAV is determined on the basis of U.S. dollars, the U.S. dollar value of your investment in a Fund may go down if the value of the local currency of the non-U.S. markets in which the Fund invests depreciates against the U.S. dollar. This is true even if the local currency value of securities in a Fund's holdings goes up. Conversely, the dollar value of your investment in a Fund may go up if the value of the local currency appreciates against the U.S. dollar.

The value of the U.S. dollar measured against other currencies is influenced by a variety of factors. These factors include: interest rates, national debt levels and trade deficits, changes in balances of payments and trade, domestic and foreign interest and inflation rates, global or regional political, economic or financial events, monetary policies of governments, actual or potential government intervention, and global energy prices. Political instability, the possibility of government intervention and restrictive or opaque business and investment policies may also reduce the value of a country's currency. Government monetary policies and the buying or selling of currency by a country's government may also influence exchange rates. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in a Fund may change quickly and without warning and you may lose money.

Derivatives Investment Risk. Each Fund may invest in derivatives. Derivatives are financial instruments that derive their performance from an underlying asset, index, interest rate or currency exchange rate, such as forward currency contracts, futures contracts and currency, interest rate swaps, total return swaps and credit linked notes. A forward currency contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A non-deliverable forward currency contract is a contract where there is no physical settlement of two currencies at maturity. Rather, based on the movement of the currencies, a net cash settlement will be made by one party to the other. A futures contract may generally be described as an agreement for the future sale by one party and the purchase by another of a specified security or instrument at a specified price and time. A currency swap is an agreement between two parties to exchange one currency for another at a future rate. An interest rate swap involves the exchange of a floating interest rate payment for a fixed payment. A total return swap is an agreement between two parties in which one party agrees to make payments of the total return of a reference asset in return for payments equal to a rate of interest on another reference asset. A credit linked note is a type of structured note whose value is linked to an underlying reference asset or entity. Credit linked notes typically provide periodic payments of interest as well as payment of principal upon maturity. Derivatives are subject to a number of risks described elsewhere in this Prospectus, such as credit risk, interest rate risk, and market risk. They also involve the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. The counterparty to a derivative contract might default on its obligations. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in a Fund may change quickly and without warning and you may lose money.

Table of Contents

High Yield Risk. Each Fund may invest a limited portion of its assets in securities rated lower than Baa by Moody's, or equivalently rated by S&P or Fitch. Such securities are sometimes referred to as "high yield securities" or "junk bonds." Investing in these securities involves special risks in addition to the risks associated with investments in higher-rated fixed income securities. While offering a greater potential for capital appreciation and higher yields, high yield securities typically entail higher price volatility and may be less liquid than securities with higher ratings. High yield securities may be regarded as predominately speculative with respect to the issuer's continuing ability to meet principal and interest payments. Issuers of securities in default may fail to resume principal or interest payments, in which case the Funds may lose their entire investment.

Table of Contents**Management****Investment Adviser**

As investment adviser to the Funds, WisdomTree Asset Management, Inc. (WisdomTree Asset Management) has overall responsibility for the general management and administration of WisdomTree Trust (the Trust) and each of its separate investment portfolios called Funds. WisdomTree Investments, Inc.* (WisdomTree Investments) is the parent company of WisdomTree Asset Management. WisdomTree Asset Management provides an investment program for each Fund. WisdomTree Asset Management also arranges for sub-advisory, transfer agency, custody, fund administration, and all other non-distribution-related services necessary for the Funds to operate. For its services, WisdomTree Asset Management expects to receive a fee from the Fund, based on a percentage of the Fund's average daily net assets, as shown in the following table:

Name of Fund	Management Fee
WisdomTree Asia Bond Fund	0.55%
WisdomTree Latin America Bond Fund	--
WisdomTree EMEA Bond Fund	--

Under the Investment Advisory Agreement, WisdomTree Asset Management agrees to pay all expenses of each Fund, except compensation and expenses of the Independent Trustees, counsel to the Independent Trustees and the Trust's Chief Compliance Officer (CCO), interest expenses and taxes, brokerage expenses and other expenses connected with the execution of portfolio transactions, any distribution fees or expenses, acquired fund fees and expenses, legal fees or expenses and extraordinary expenses. Pursuant to a separate contractual arrangement, WisdomTree Asset Management arranges for the provision of CCO services with respect to each Fund, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees. WisdomTree Asset Management receives a fee of up to 0.0044% of each Fund's assets for providing such services and paying such expenses. WisdomTree Asset Management provides CCO services to the Trust.

The basis for the Board of Trustees' approval of the Funds' Investment Advisory Agreement will be available in the Trust's Semi-Annual Report to Shareholders for the period ended February 28, 2011.

WisdomTree Asset Management is a registered investment adviser with offices located at 380 Madison Avenue, 21st Floor, New York, NY 10017 and is a leader in ETF management.

Sub-Adviser

As sub-adviser to the Asia Bond Fund, Mellon Capital Corporation (Mellon Capital) is responsible for the day-to-day management of the Fund. Mellon Capital chooses the Fund's portfolio investments and places orders to buy and sell the Fund's portfolio investments. WisdomTree Asset Management pays Mellon Capital a fee equal to one-half of the fee paid to WisdomTree Asset Management for providing advisory services to the Fund.

Mellon Capital is a leading innovator in the investment industry and manages global quantitative-based investment strategies for institutional and private investors. As of November 30, 2010, Mellon Capital had assets under management totaling approximately \$198 billion, including overlay strategies and assets managed as dual employees of The Bank of New York Mellon and The Dreyfus Corporation. Mellon Capital is a wholly owned indirect subsidiary of The Bank of New York Mellon Corporation, a publicly traded financial holding company. Mellon Capital is a registered investment adviser with offices located at 50 Fremont Street, San Francisco, CA 94105.

The basis for the Board of Trustees' approval of the Investment Sub-Advisory Agreement will be available in the Trust's Semi-Annual Report to Shareholders for the period ended February 28, 2011.

WisdomTree Asset Management, as the investment adviser for the Funds, may hire one or more sub-advisers to oversee the day-to-day activities of the Funds. The sub-advisers are subject to oversight by WisdomTree Asset Management. WisdomTree Asset Management and the Trust have received an exemptive order from the SEC that permits WisdomTree Asset Management, with the approval of the Independent Trustees of the Trust, to retain unaffiliated investment sub-advisers for the Funds without submitting the sub-advisory agreement to a vote of the Funds' shareholders. The Trust will notify shareholders in the event of any change in the identity of such sub-adviser or sub-advisers. WisdomTree Asset Management has ultimate responsibility for the investment performance of the Funds due to its responsibility to oversee the sub-advisers and recommend their hiring, termination and replacement.

Edgar Filing: WisdomTree Trust - Form 485BPOS

Portfolio Managers

The Sub-Adviser utilizes a team of investment professionals acting together to manage the assets of the Asia Bond Fund. The team meets regularly to review portfolio holdings and to discuss purchase and sale activity. The team adjusts holdings in the Asia Bond Fund's portfolio as it deems appropriate in the pursuit of the Fund's investment objective. The individual members of the team who are primarily responsible for the day-to-day management of the Asia Bond Fund's portfolio are listed below.

* WisdomTree is a registered mark of WisdomTree Investments and has been licensed for use by the Trust. WisdomTree Investments has patent applications pending on the methodology and operation of its Indexes and the Funds.

Table of Contents

David C. Kwan has been a Managing Director of Mellon Capital since 2000. He has also been the Head of the Fixed Income Management Group since 1994. Mr. Kwan has direct oversight responsibility for the management of the Asia Bond Fund. He received his M.B.A. from the University of California at Berkeley in 1990. Mr. Kwan has 20 years of investment experience.

Lisa Mears O Connor, CFA, has been a Managing Director of Mellon Capital since 2010. She manages Mellon Capital's active fixed income team. Ms. Mears O Connor has direct oversight responsibility for the Asia Bond Fund. She received her M.B.A. from the University of California at Berkeley in 2002. Ms. Mears O Connor attained the Chartered Financial Analyst (CFA) designation in 1998. Ms. Mears O Connor has over 17 years of investment experience.

The Funds' Statement of Additional Information (SAI) provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of shares in the Asia Bond Fund.

Portfolio Holdings Information

Once available, information about each Fund's daily portfolio holdings will be available at www.wisdomtree.com. In addition, each Fund will disclose its complete portfolio holdings as of the end of its fiscal year (August 31) and its second fiscal quarter (February 28) in its reports to shareholders. Each Fund files its complete portfolio holdings as of the end of its first and third fiscal quarters (November 30 and May 31, respectively) with the SEC on Form N-Q no later than 60 days after the relevant fiscal period. Once available, you can find the SEC filings on the SEC's website, www.sec.gov. A summarized description of the Funds' policies and procedures with respect to the disclosure of each Fund's portfolio holdings is available in the Funds' SAI.

Table of Contents

Additional Information on Buying and Selling Shares

Most investors will buy and sell shares of the Funds through brokers. Shares of the Funds trade on national securities exchanges and elsewhere during the trading day and can be bought and sold throughout the trading day like other shares of publicly traded securities. When buying or selling shares through a broker, most investors will incur customary brokerage commissions and charges. Shares of the Funds trade under the trading symbol listed in the Summary section describing such Fund.

Share Trading Prices

As with other types of securities, the trading prices of shares in the secondary market can be affected by market forces such as supply and demand, economic conditions and other factors. The price you pay or receive when you buy or sell your shares in the secondary market may be more or less than the NAV of such shares.

The approximate value of shares of each Fund is disseminated every 15 seconds throughout the trading day by the Listing Exchange or by other information providers. This approximate value should not be viewed as a real time update of the NAV because the approximate value may not be calculated in the same manner as the NAV, which is computed once per day. The approximate value generally is determined by using current market quotations and/or price quotations obtained from broker-dealers that may trade in the portfolio securities held by the Funds. The Funds are not involved in, or responsible for, the calculation or dissemination of the approximate value and makes no warranty as to its accuracy.

Determination of Net Asset Value

The NAV of each Fund's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange, generally 4:00 p.m. New York time (the NAV Calculation Time). NAV per share is calculated by dividing a Fund's net assets by the number of Fund shares outstanding.

In calculating the Funds' NAV, each Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. Debt obligations with maturities of 60 days or less are valued at amortized cost, which approximates fair value. Fair value pricing is used by the Funds when reliable market valuations are not readily available or are not deemed to reflect current market values. For these purposes, a price based on amortized cost is considered a market valuation. Securities that may be valued using fair value pricing may include, but are not limited to, securities for which there are no current market quotations or whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by significant events. A significant event is an event occurring after the close of the market in which a security trades but before the Funds' next NAV Calculation Time that may materially affect the value of a Fund's investment (e.g., government action, natural disaster, or significant market fluctuation). When fair value pricing is employed, the prices of securities used by the Funds to calculate their respective NAVs may differ from quoted or published prices for the same securities.

Transactions in Fund shares will be priced at NAV only if you purchase or redeem shares directly from the Funds in Creation Units. Fund shares are purchased or sold on a national securities exchange at market prices, which may be higher or lower than NAV.

Dividends and Distributions

Each Fund intends to pay out dividends, if any, to investors at least annually. Each Fund intends to distribute its net realized capital gains, if any, to investors annually. The Funds may occasionally be required to make supplemental distributions at some other time during the year. Distributions in cash may be reinvested automatically in additional whole shares only if the broker through whom you purchased shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

Book Entry

Shares of each Fund are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company (DTC) or its nominee is the record owner of all outstanding shares of each Fund.

Investors owning shares of the Funds are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all shares of the Funds. Participants include DTC, securities brokers and dealers, banks, trust companies, clearing corporations, and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of shares, you are not entitled to receive physical delivery of stock certificates or to have shares registered in your name, and you are not considered a registered owner of shares. Therefore, to exercise any right as an owner of shares, you must rely upon the procedures of DTC and its participants. These procedures

Edgar Filing: WisdomTree Trust - Form 485BPOS

are the same as those that apply to any securities that you hold in book-entry or street name form. Your broker will provide you with account statements, confirmations of your purchases and sales, and tax information.

Table of Contents

Delivery of Shareholder Documents Householding

Householding is an option available to certain investors of the Funds. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Funds is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.

Frequent Purchases and Redemptions of Fund Shares

The Funds have adopted policies and procedures with respect to frequent purchases and redemptions of Creation Units of Fund shares. Since the Funds are ETFs, only a few institutional investors (known as Authorized Participants) are authorized to purchase and redeem shares directly with the Funds. Because purchase and redemption transactions with Authorized Participants are an essential part of the ETF process and help keep ETF trading prices in line with NAV, each Fund accommodates frequent purchases and redemptions by Authorized Participants. Frequent purchases and redemptions for cash may increase portfolio transaction costs and may lead to the realization of capital gains. Frequent in-kind creations and redemptions do not give rise to these concerns. The Funds reserve the right to reject any purchase order at any time. Each Fund reserves the right to impose restrictions on disruptive, excessive, or short-term trading and may reject purchase or redemption orders in such instances.

Investments by Registered Investment Companies

Section 12(d)(1) of the Investment Company Act of 1940 restricts investments by registered investment companies in the securities of other investment companies, including shares of each Fund. Registered investment companies generally are permitted to invest in the WisdomTree Funds beyond the limits set forth in section 12(d)(1), subject to certain terms and conditions set forth in an SEC exemptive order issued to the Trust, including that such investment companies enter into an agreement with the Funds.

Additional Tax Information

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Funds. Your investment in a Fund may have other tax implications. Please consult your tax advisor about the tax consequences of an investment in Fund shares, including the possible application of foreign, state, and local tax laws.

Each Fund intends to qualify each year as a regulated investment company (RIC). A RIC is not subject to tax at the fund level on income and gains from investments that are distributed to shareholders. However, a Fund 's failure to qualify as a RIC would result in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Unless your investment in shares is made through a tax-exempt entity or tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when:

A Fund makes distributions,

You sell shares, and

You purchase or redeem Creation Units (institutional investors only).

Taxes on Distributions

For federal income tax purposes, distributions of investment income are generally taxable as ordinary income. Taxes on distributions of capital gains (if any) are determined by how long a Fund owned the investments that generated them, rather than how long a shareholder has owned his or her Fund shares. Distributions of net capital gains (the excess of net long-term capital gains from the sale of investments that a Fund owned for more than one year over net short-term capital losses) that are properly designated by the Fund as capital gain dividends (Capital Gain Dividends) will be taxable as long-term capital gains. Long-term capital gain rates have been temporarily reduced in general, to 15% with lower

Edgar Filing: WisdomTree Trust - Form 485BPOS

rates applying to taxpayers in the 10% and 15% rate brackets for taxable years beginning before January 1, 2013. Distributions of gains from the sale of investments that a Fund owned for one year or less will be taxable as ordinary income.

For taxable years beginning before January 1, 2013, distributions of investment income designated by a Fund as derived from qualified dividend income are taxed at the rates applicable to long-term capital gain, provided holding period and other requirements are met at both the shareholder and the Fund level. The Funds do not, however, expect a significant portion of its distributions to be derived from qualified dividend income. Distributions are taxable even if they are paid from income or gains earned by a Fund before your investment (and thus were included in the price you paid for your shares).

Table of Contents

If a shareholder is neither a lawful permanent resident nor a citizen of the United States or if a shareholder is a foreign entity, the Fund's ordinary income dividends (which include distributions of net short-term capital gains) generally will be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies. However, for taxable years beginning before January 1, 2012, certain distributions designated by the Fund as either interest-related dividends or short-term gain dividends and paid to a foreign shareholder would be eligible for an exemption from U.S. withholding tax.

The Funds (or a financial intermediary such as a broker through which a shareholder owns Fund shares) generally are required to withhold and to remit to the U.S. Treasury a percentage of the taxable distributions and the sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding.

Taxes When Fund Shares Are Sold

Any capital gain or loss realized upon a sale of Fund shares is generally treated as a long-term gain or loss if the shares have been held for more than one year. Any capital gain or loss realized upon a sale of Fund shares held for one year or less is generally treated as a short-term gain or loss, except that any capital loss on a sale of shares held for six months or less is treated as long-term capital loss to the extent that capital gain dividends were paid with respect to such shares. The ability to deduct capital losses may be limited depending on your circumstances.

Taxes on Creation and Redemption of Creation Units

An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the exchanger's aggregate basis in the securities surrendered and the cash component paid. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities and the amount of cash received for such Creation Units. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing wash sales, or on the basis that there has been no significant change in economic position.

Gain or loss recognized by an Authorized Participant upon an issuance of Creation Units in exchange for non-U.S. currency will generally be treated as ordinary income or loss. Gain or loss recognized by an Authorized Participant upon an issuance of Creation Units in exchange for fixed income securities, or upon a redemption of Creation Units, may be capital or ordinary gain or loss depending on the circumstances. Any capital gain or loss realized upon an issuance of Creation Units in exchange for fixed income securities will generally be treated as long-term capital gain or loss if the fixed income securities have been held for more than one year. Any capital gain or loss realized upon the redemption of a Creation Unit will generally be treated as long-term capital gain or loss if the Fund shares comprising the Creation Unit have been held for more than one year. Otherwise, such capital gains or losses are treated as short-term capital gains or losses.

A person subject to U.S. federal income tax who receives non-U.S. currency upon a redemption of Creation Units and does not immediately convert the non-U.S. currency into U.S. dollars may, upon a later conversion of the non-U.S. currency into U.S. dollars, recognize as ordinary gains or losses any gains or losses resulting from fluctuations in the value of the non-U.S. currency relative to the U.S. dollar since the date of the redemption.

Persons exchanging securities or non-U.S. currency for Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction. If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many shares you purchased or redeemed and at what price.

Foreign Investments

Interest and other income received by the Funds with respect to foreign securities may give rise to withholding and other taxes imposed by foreign countries. Tax conventions between certain countries and the United States may reduce or eliminate such taxes. If as of the close of a taxable year more than 50% of the total assets of a Fund consists of stock or securities of foreign corporations, that Fund intends to pass through to investors the amount of foreign income and similar taxes (including withholding taxes) paid by the Fund during that taxable year. This means that investors will be considered to have received as additional income their respective shares of such foreign taxes, but may be entitled to either a corresponding tax deduction in calculating taxable income or, subject to certain limitations, a credit in calculating federal income tax.

Distribution

Edgar Filing: WisdomTree Trust - Form 485BPOS

ALPS Distributors, Inc. (the Distributor) serves as the distributor of Creation Units for the Funds on an agency basis. The Distributor does not maintain a secondary market in shares of the Funds. The Distributor s principal address is 1290 Broadway, Suite 1100, Denver, Colorado 80203. The Distributor has no role in determining the policies of each Fund or the securities that are purchased or sold by any Fund.

GENERAL DESCRIPTION OF THE TRUST AND THE FUNDS

The Trust was organized as a Delaware statutory trust on December 15, 2005 and is authorized to issue multiple series or portfolios. The Trust is an open-end management investment company, registered under the Investment Company Act of 1940, as amended (the "1940 Act"). The offering of the Trust's shares is registered under the Securities Act of 1933, as amended (the "Securities Act").

WisdomTree Asset Management, Inc. ("WisdomTree Asset Management" or the "Adviser") serves as the investment adviser to the Funds. Mellon Capital Management Corporation (the "Sub-Adviser") serves as the investment sub-adviser to the Asia Bond Fund. ALPS Distributors, Inc. ("Distributor") is the distributor of the shares of each Fund.

Each Fund is an actively exchange-traded fund ("ETF") and issues and redeems shares at net asset value per share ("NAV") only in large blocks of shares ("Creation Units"). Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 50,000 shares. These transactions are usually in exchange for a basket of securities and an amount of cash. As a practical matter, only institutions or large investors purchase or redeem Creation Units. Except when aggregated in Creation Units, shares of each Fund are not redeemable securities.

Shares of each Fund are listed on a national securities exchange, such as the NYSE Arca (the "Listing Exchange"), and trade throughout the day on the Listing Exchange and other secondary markets at market prices that may differ from NAV. As in the case of other publicly traded securities, brokers' commissions on transactions will be based on negotiated commission rates at customary levels.

The Trust reserves the right to adjust the prices of shares in the future to maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the Funds.

Wisdom Tree is a service mark of Wisdom Tree Investments and has been licensed for use by the Trust.

INVESTMENT STRATEGIES AND RISKS

The investment objective and general investment policies of each Fund are described in the Funds' Prospectus. Additional information concerning the Funds is set forth below. With respect to each Fund's investments, unless otherwise noted, if a percentage limitation on investment is adhered to at the time of investment or contract, a subsequent increase or decrease as a result of market movement or redemption will not result in a violation of such investment limitation. The Funds are new and therefore portfolio turnover information is not yet available.

PRINCIPAL INVESTMENT STRATEGIES

Bond Funds

Asia Bond Fund

The Fund seeks to achieve its investment objective through direct and indirect investment in debt securities issued by governments and corporations in Asian countries. The Fund intends to focus on the developing/emerging market economies in Asia, primarily South Korea, Indonesia, Malaysia, Singapore, Hong Kong, China, India, Thailand, Philippines, and Taiwan. This list may change based on market developments. While the Fund is permitted to invest in developed market economies, this is not a focus of the Fund. Therefore, although it is permitted to do so, the Fund is unlikely to invest in issuers in Japan, Australia, or New Zealand.

The Fund is designed to provide broad exposure to Asian governments and corporate bonds and will invest in a range of instruments with varying credit risk and duration. The Fund intends to invest in bonds and other debt instruments issued by governments,

Table of Contents

including their agencies and instrumentalities, as well as in bonds and other debt instruments issued by corporations economically tied to Asian countries. The Fund intends to invest in fixed income securities denominated in the local currency of countries in Asia but also may invest in instruments denominated in U.S. dollars. The Fund also may invest in fixed income securities denominated in Asian currencies and issued by supranational organizations such as the European Investment Bank, Asian Development Bank, International Bank for Reconstruction and Development or International Finance Corporation, and development agencies supported by other national governments. The Fund may also invest in inflation-linked in fixed income securities denominated in Asian currencies.

In order to provide broad-based exposure to the Asian bond market, the Fund will invest in both investment grade and non-investment grade securities. Securities rated investment grade generally are considered to be of higher credit quality and subject to lower default risk. Although securities rated below investment grade may offer the potential for higher yields, they generally are subject to higher potential risk of loss.

The Fund attempts to limit interest rate risk by maintaining an aggregate portfolio duration of between two and seven years under normal market conditions. Aggregate portfolio duration is important to investors as an indication of the Fund's sensitivity to changes in interest rates. Funds with higher durations generally are subject to greater interest rate risk. The Fund's actual portfolio duration may be longer or shorter depending on market conditions.

The Fund will invest, under normal circumstances, at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in Fixed Income Securities. For these purposes, Fixed Income Securities include debt instruments, such as government and corporate bonds, notes and other obligations issued by governments or corporations economically tied to Asian countries and are denominated in Asian currencies or U.S. dollars, as well as certain derivatives described herein. The decision to secure exposure through direct investment in bonds or indirectly through derivative transactions will be a function of, among other things, market accessibility, credit exposure, tax ramifications and regulatory requirements applicable to U.S. investment companies. If, subsequent to an investment, the 80% requirement is no longer met, the Fund's future investments will be made in a manner that will bring the Fund into compliance with this policy. The Trust will provide shareholders with sixty (60) days' prior notice of any change to this policy for the Fund.

The Fund may enter into forward currency contracts, swap transactions and repurchase agreements. The Fund also may buy and sell futures contracts and credit linked notes. A forward contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A swap is an agreement between two parties to exchange payments based on a reference asset, which may be a currency or interest rate, but also may be a single asset, a pool of assets or an index of assets. A currency swap is an agreement between two parties to exchange one currency for another at agreed upon intervals and/or rates. An interest rate swap typically involves the exchange of one interest rate payment for another, such as a floating interest rate payment for a fixed payment. A total return swap is an agreement between two parties in which one party agrees to make payments of the total return of a reference asset in return for payments equal to a rate of interest on another reference asset. Swap transactions may be settled in U.S. dollars or Asian currencies. A repurchase agreement is when a fund purchases securities or other obligations from a bank or securities dealer and simultaneously commits to resell them to a counterparty at an agreed-upon date or upon demand. Repurchase agreements are designed to result in a fixed rate of return for the fund insulated from market fluctuations during the holding period. A futures contract may generally be described as an agreement for the future sale by one party and the purchase by another of a specified security or instrument at a specified price and time. The Fund intends to invest in interest rate futures contracts listed for trading on exchanges in Asia. A credit linked note is a type of structured note whose value is linked to an underlying reference asset or entity. Credit linked notes typically provide periodic payments of interest as well as payment of principal upon maturity.

Latin America Bond Fund

The Fund attempts to achieve its investment objective through direct and indirect investment in debt securities issued by governments and corporations in Latin American countries. The Fund intends to focus on investments in Brazil, Chile, Colombia, Mexico, Panama, Peru, Uruguay, and Venezuela. The Fund is an actively managed exchange-traded fund (ETF).

The Fund is designed to provide broad exposure to the bonds issued by governments and corporations located in Latin America and will invest in a range of instruments with varying credit risk and duration. The Fund intends to invest in bonds and other debt instruments issued by governments, including their agencies and instrumentalities, as well as in bonds and other debt instruments issued by corporations economically tied to Latin American countries. The Fund intends to invest in fixed income securities denominated in the local currency of countries in Latin America but also may invest in fixed income securities denominated in U.S. dollars. The Fund also may invest in fixed income securities denominated in Latin American currencies and issued by supranational organizations such as the Inter-American Development Bank, International Bank for Reconstruction and Development or International Finance Corporation, and development agencies supported by other national governments. The Fund may also invest in inflation-linked fixed income securities denominated in Latin American currencies.

In order to provide broad-based exposure to the Latin American bond market, the Fund will invest in both investment grade and non-investment grade securities. Securities rated investment grade generally are considered to be of higher credit quality and subject to lower default risk.

Edgar Filing: WisdomTree Trust - Form 485BPOS

Although securities rated below investment grade may offer the potential for higher yields, they generally are subject to higher potential risk of loss.

The Fund attempts to limit interest rate risk by maintaining an aggregate portfolio duration of between two and seven years under normal market conditions. Aggregate portfolio duration is important to investors as an indication of the Fund's sensitivity to changes in interest rates. Funds with higher durations generally are subject to greater interest rate risk. The Fund's actual portfolio duration may be longer or shorter depending on market conditions.

The Fund will invest, under normal circumstances, at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in Fixed Income Securities. For these purposes, Fixed Income Securities include debt instruments, such as government and corporate bonds, notes and other obligations issued by governments and corporations economically tied to Latin American countries and are denominated in Latin American currencies or U.S. dollars, as well as certain derivatives described herein. The decision to secure exposure through direct investment in bonds or indirectly through derivative transactions will be a function of, among other things, market accessibility, credit exposure, tax ramifications and regulatory requirements applicable to U.S. investment companies. If, subsequent to an investment, the 80% requirement is no longer met, the Fund's future investments will be made in a manner that will bring the Fund into compliance with this policy. The Trust will provide shareholders with sixty (60) days' prior notice of any change to this policy for the Fund.

Table of Contents

The Fund may enter into forward currency contracts, swap transactions and repurchase agreements. The Fund also may buy and sell futures contracts and credit linked notes. A forward contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. A swap is an agreement between two parties to exchange payments based on a reference asset, which may be a currency or interest rate, but also may be a single asset, a pool of assets or an index of assets. A currency swap is an agreement between two parties to exchange one currency for another at agreed upon intervals and/or rates. An interest rate swap typically involves the exchange of one interest rate payment for another, such as a floating interest rate payment for a fixed payment. A total return swap is an agreement between two parties in which one party agrees to make payments of the total return of a reference asset in return for payments equal to a rate of interest on another reference asset. Swap transactions may be settled in U.S. dollars or Latin American currencies. A repurchase agreement is when a fund purchases securities or other obligations from a bank or securities dealer and simultaneously commits to resell them to a counterparty at an agreed-upon date or upon demand. A futures contract may generally be described as an agreement for the future sale by one party and the purchase by another of a specified security or instrument at a specified price and time. The Fund intends to invest in interest rate futures contracts listed for trading on exchanges in Latin America. A credit linked note is a type of structured note whose value is linked to an underlying reference asset or entity. Credit linked notes typically provide periodic payments of interest as well as payment of principal upon maturity.

EMEA Bond Fund

The Fund seeks to achieve its investment objective by investing in bonds issued by governments and corporations in developing countries in Europe, the Middle East and Africa (the EMEA Region). The Fund intends to focus its investment in the Czech Republic, Egypt, Hungary, Israel, Poland, Qatar, Romania, Russia, Slovakia, South Africa, Turkey, and United Arab Emirates. The Fund intends to focus on the developing/emerging countries in the EMEA Region (including those listed above) as opposed to established developed market countries such as Germany, Europe, and the United Kingdom.

The Fund is designed to provide broad exposure to bonds issued by governments and corporations in the EMEA Region and will invest in a range of instruments with varying credit risk and duration. The Fund intends to invest in bonds and other debt instruments issued by governments, including their agencies and instrumentalities, as well as in bonds and other debt instruments issued by corporations economically tied to countries located in the EMEA Region. The Fund intends to invest in fixed income securities denominated in the local currency of countries in the EMEA Region but also may invest in fixed income securities denominated in U.S. dollars. The Fund also may invest in fixed income securities denominated in currencies of the EMEA Region and issued by supranational organizations such as the European Investment Bank, International Bank for Reconstruction and Development or International Finance Corporation, and development agencies supported by other national governments. The Fund may also invest in inflation-linked fixed income securities denominated in European, Middle Eastern and African currencies.

In order to provide broad-based exposure to the bond markets in the EMEA Region, the Fund will invest in both investment grade and non-investment grade securities. Securities rated investment grade generally are considered to be of higher credit quality and subject to lower default risk. Although securities rated below investment grade may offer the potential for higher yields, they generally are subject to higher potential risk of loss.

The Fund attempts to limit interest rate risk by maintaining an aggregate portfolio duration of between two and seven years under normal market conditions. Aggregate portfolio duration is important to investors as an indication of the Fund's sensitivity to changes in interest rates. Funds with higher durations generally are subject to greater interest rate risk. The Fund's actual portfolio duration may be longer or shorter depending on market conditions.

The Fund will invest, under normal circumstances, at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in Fixed Income Securities. For these purposes, Fixed Income Securities include debt instruments, such as government and corporate bonds, notes and other obligations issued by governments and corporations that are economically tied to developing countries in the EMEA Region and are denominated in local currencies of the EMEA Region or U.S. dollars, as well as certain derivatives described herein. The decision to secure exposure through direct investment in bonds or indirectly through derivative transactions will be a function of, among other things, market accessibility, credit exposure, tax ramifications and regulatory requirements applicable to U.S. investment companies. If, subsequent to an investment, the 80% requirement is no longer met, the Fund's future investments will be made in a manner that will bring the Fund into compliance with this policy. The Trust will provide shareholders with sixty (60) days' prior notice of any change to this policy for the Fund.

Table of Contents

The Fund may enter into forward currency contracts, swap transactions and repurchase agreements. The Fund also may buy and sell futures contracts and credit linked notes. A forward contract is an agreement to buy or sell a specific currency at a future date at a price set at the time of the contract. Credit linked notes typically provide periodic payments of interest as well as payment of principal upon maturity.

All Funds

As a matter of general policy, each Fund will invest under normal circumstances at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in investments whose combined performances is tied economically to the particular country, geographic region or basket of currencies suggested by the Fund's name. If, subsequent to an investment, the 80% requirement is no longer met, the affected Fund's future investments will be made in a manner that will bring the Fund into compliance with this policy. The Trust will provide shareholders with 60 days' prior notice of any change to this policy for the Fund. Each Fund's investment in derivatives will be included in its net assets when determining whether the Fund satisfies the 80% test described above.

All U.S. money market securities acquired by the Funds will be rated in the upper two short-term ratings by at least two NRSROs or, if unrated, deemed to be of equivalent quality. A First Tier security is (i) a rated security that has received a short-term rating from the NRSROs in the highest short-term rating category for debt obligations (within which there may be sub-categories or gradations indicating relative standing); (ii) an unrated security that is of comparable quality to a security, as determined by the Funds' board of directors; (iii) a security issued by a registered investment company that is a money market fund; or (iv) a security issued by the U.S. government or any of its agencies or instrumentalities. A Second Tier security is a rated security that has received a short-term rating other than a first tier rating from an NRSRO for debt obligations (within which there may be sub-categories or gradations indicating relative standing) or is an unrated security that is of comparable quality. Each Fund intends to limit its overall exposure to Second Tier money market securities to 5% of total assets. Any security originally issued as a long-term obligation will be rated A or higher at the time of purchase by at least two NRSROs or, if unrated, deemed to be of equivalent quality.

Each Fund intends to qualify each year as a regulated investment company (a "RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"), so that it will not be subject to federal income tax on income and gains that are timely distributed to Fund shareholders. Each Fund will invest its assets, and otherwise conduct its operations, in a manner that is intended to satisfy the qualifying income, diversification and distribution requirements necessary to establish and maintain RIC qualification under Subchapter M.

In addition to satisfying the above-referenced RIC diversification requirements, no portfolio security held by a Fund (other than U.S. government securities and non-U.S. government securities) will represent more than 30% of the weight of the Fund and the five highest weighted portfolio securities of the Fund (other than U.S. government securities and/or non-U.S. government securities) will not in the aggregate account for more than 65% of the weight of the Fund. For these purposes, a Fund may treat repurchase agreements collateralized by U.S. government securities or non-U.S. government securities as U.S. or non-U.S. government securities, as applicable.

Each Fund is considered "non-diversified," as such term is used in the 1940 Act.

GENERAL RISKS

An investment in a Fund should be made with an understanding that the value of the Fund's portfolio securities may fluctuate in accordance with changes in the financial condition of an issuer or counterparty, changes in specific economic or political conditions that affect a particular security or issuer and changes in general economic or political conditions. Fund shares may trade above or below their net asset value.

Table of Contents

An investor in a Fund could lose money over short or even long periods of time. Each Fund invests in short-term, intermediate and long-term U.S. and/or non-U.S. money market securities. The price of the securities held by the Funds, and thus the value of a Fund's portfolio, is expected to fluctuate in accordance with general economic conditions, interest rates, political events and other factors. An investment in a Fund should also be made with an understanding of the risks inherent in an investment in money market and fixed income securities. The value of money market and fixed income securities, and the value of an investment in a Fund, may change in response to changes in interest rates and other factors. Generally, if U.S. interest rates rise, then the value of a U.S. money market and fixed income security is expected to decrease. Similarly, if non-U.S. interest rates rise, the value of a money market and fixed income security denominated in that non-U.S. currency would also be expected to decrease. In general, securities with longer maturities, such as those held by the Fund, are more vulnerable to interest rate changes.

Investor perceptions may also impact the value of Fund investments and the value of an investment in Fund shares. These investor perceptions are based on various and unpredictable factors, including expectations regarding government, economic, monetary and fiscal policies, inflation and interest rates, economic expansion or contraction, and global or regional political, economic or banking crises. Issuer-specific conditions may also affect the value of a Fund investment. The financial condition of an issuer of a fixed income or money market security may cause it to default or become unable to pay interest or principal due on the security. A Fund cannot collect interest and principal payments on a security if the issuer defaults. Accordingly, the value of an investment in a Fund may change in response to issuer defaults and changes in the credit ratings of the Fund's portfolio securities.

Events in the financial sector have resulted, and may continue to result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. Both domestic and foreign fixed income and equity markets have been experiencing extreme volatility and turmoil. Issuers that have exposure to the real estate, mortgage and credit markets have been particularly affected and well-known financial institutions have experienced significant liquidity and other problems. Some of these institutions have declared bankruptcy or defaulted on their debt. It is uncertain whether or for how long these conditions will continue. These events and possible continuing market turbulence may have an adverse effect on Fund performance.

Although the Funds attempt to invest in liquid securities and instruments, there can be no guarantees that a liquid market for such securities and instruments will be maintained. The price at which securities may be sold and the value of a Fund's shares will be adversely affected if trading markets for a Fund's portfolio holdings are limited.

Authorized Participants should refer to the section herein entitled "Creation and Redemption of Creation Unit Aggregations" for additional information that may impact them.

BORROWING. Although the Funds do not intend to borrow money, each Fund may do so to the extent permitted by the 1940 Act. Under the 1940 Act, a fund may borrow up to 33% of its net assets. The Funds will borrow only for short-term or emergency purposes.

Borrowing will tend to exaggerate the effect on net asset value of any increase or decrease in the market value of a Fund's portfolio. Money borrowed will be subject to interest costs that may or may not be recovered by earnings on the securities purchased. A Fund also may be required to maintain minimum average balances in connection with a borrowing or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

CAPITAL CONTROL RISK. Economic conditions, such as volatile currency exchange rates and interest rates, political events and other conditions may, without prior warning, lead to government intervention and the imposition of capital controls. Countries use these controls to restrict volatile movements of capital entering (inflows) and exiting (outflows) their country to respond to certain economic conditions. Such controls are mainly applied to short-term capital transactions to counter speculative flows that threaten to undermine the stability of the exchange rate and deplete foreign exchange reserves. Capital controls include the prohibition of, or restrictions on, the ability to transfer currency, securities or other assets. Levies may be placed on profits repatriated by foreign entities (such as the Funds). Capital controls may impact the ability of a Fund to create and redeem Creation Units, adversely affect the trading market for shares of the Fund, and cause a Fund to trade at prices materially different from its NAV. A Fund may change its creation or redemption procedures without notice in response to the imposition of capital controls. There can be no assurance a country in which a Fund invests will not impose a form of capital control to the possible detriment of a Fund and its shareholders.

CURRENCY EXCHANGE RATE RISK. The Fund invests a significant portion of its assets in investment denominated in non-U.S. currencies, or in securities that provide exposure to non-U.S. currencies, currency exchange rates or interest rates denominated in non-U.S. currencies. Changes in currency exchange rates and the relative value of the non-U.S. currencies will affect the value of the Fund's investments and the value of your Fund shares. Because the Fund's NAV is determined on the basis of U.S. dollars, the U.S. dollar value of your investment in the Fund may go down if the value of the non-U.S. currencies depreciates against the U.S. dollar. This is true even if the value of the Fund's holdings denominated in non-U.S. currencies goes up. Conversely, the dollar value of your investment in the Fund may go up if the value of the non-U.S. currency the Fund invests in appreciates against the U.S. dollar. Currency exchange rates can be very volatile and can change quickly

Edgar Filing: WisdomTree Trust - Form 485BPOS

and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.

FOREIGN SECURITIES RISK. Each Fund invests a significant portion of its assets in non-U.S. securities and instruments, or in instruments that provide exposure to such securities and instruments. Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability. There may be less information publicly available about a non-U.S. issuer than a U.S. issuer. Non-U.S. issuers may be subject to different accounting, auditing, financial reporting and investor protection standards than U.S. issuers. Investments in non-U.S. securities may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. With respect to certain countries, there is the possibility of government intervention and expropriation or nationalization of assets. Because legal systems differ, there is also the possibility that it will be difficult to obtain or enforce legal judgments in certain countries. Since foreign exchanges may be open on days when a Fund does not price its shares, the value of the securities in a Fund's portfolio may change on days when shareholders will not be able to purchase or sell a Fund's shares. Conversely, Fund shares may trade on days when foreign exchanges are closed. Each of these factors can make investments in the Fund more volatile and potentially less liquid than other types of investments.

HIGH YIELD RISK. Each Fund may invest a limited portion of its assets in securities rated lower than Baa by Moody's, or equivalently rated by S&P or Fitch. Such securities are sometimes referred to as high yield securities or junk bonds. Investing in these securities involves special risks in addition to the risks associated with investments in higher-rated fixed income securities. While offering a greater potential for capital appreciation and higher yields, high yield securities typically entail higher price volatility and may be less liquid than securities with higher ratings. High yield securities may be regarded as predominately speculative with respect to the issuer's continuing ability to meet principal and interest payments. Issuers of securities in default may fail to resume principal or interest payments, in which case the Funds may lose their entire investment.

Table of Contents

LACK OF DIVERSIFICATION. Although each Fund intends to invest in a variety of securities and instruments, the Funds are considered non-diversified as such term is used in the 1940 Act. Each Fund is considered to be non-diversified and is not limited by the 1940 Act with regard to the percentage of its assets that may be invested in the securities of a single issuer. As a result, each of the Funds may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were classified as a diversified fund. Therefore, each Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a small number of issuers than a fund that invests more widely, which may have a greater impact on the Fund's volatility and performance.

However, each Fund will maintain the level of diversification necessary to qualify as a RIC under Subchapter M of the Code. The Subchapter M diversification tests generally require that (i) a Fund invest no more than 25% of its total assets in securities (other than securities of the U.S. government or other RICs) of any one issuer or two or more issuers that are controlled by a Fund and that are engaged in the same, similar or related trades or businesses, and (ii) at least 50% of a Fund's total assets consist of cash and cash items, U.S. government securities, securities of other RICs and other securities, with investments in such other securities limited in respect of any one issuer to an amount not greater than 5% of the value of the Fund's total assets and 10% of the outstanding voting securities of such issuer. These tax requirements are generally applied at the end of each quarter of a Fund's taxable year.

TAX RISK. To qualify for the favorable U.S. federal income tax treatment accorded to RICs, a Fund must, among other things, derive in each taxable year at least 90% of its gross income from certain prescribed sources. The U.S. Treasury Department has authority to issue regulations that would exclude foreign currency gains from qualifying income if such gains are not directly related to a Fund's business of investing in stock or securities. Accordingly, regulations may be issued in the future that could treat some or all of a Fund's foreign currency gains as non-qualifying income, which might jeopardize the Fund's status as a RIC for all years to which the regulations are applicable. If for any taxable year a Fund does not qualify as a RIC, all of its taxable income (including its net capital gain) for that year would be subject to tax at regular corporate rates without any deduction for distributions to shareholders, and such distributions would be taxable to shareholders as dividend income to the extent of the Fund's current and accumulated earnings and profits.

A discussion of some of the other risks associated with an investment in a Fund is contained in each Fund's Prospectus.

SPECIFIC INVESTMENT STRATEGIES

A description of certain investment strategies and types of investments used by the Funds are set forth below.

U.S. GOVERNMENT SECURITIES. Each Fund may purchase short-term obligations issued or guaranteed by the U.S. Treasury or the agencies or instrumentalities of the U.S. government. Each Fund may also purchase intermediate and long-term obligations issued or guaranteed by the U.S. Treasury or the agencies or instrumentalities of the U.S. government. U.S. government securities are obligations of, or guaranteed by, the U.S. government, its agencies or government-sponsored enterprises. U.S. government securities are subject to market and interest rate risk, and may be subject to varying degrees of credit risk. U.S. government securities include inflation-indexed fixed income securities, such as U.S. Treasury Inflation Protected Securities (TIPS). U.S. government securities include zero coupon securities, which tend to be subject to greater market risk than interest-paying securities of similar maturities.

NON-U.S. GOVERNMENT SECURITIES. Each Fund intends to invest in securities issued or guaranteed by the Asian, Latin American, European, Middle Eastern and African governments, their agencies and instrumentalities. Such securities include direct obligations, as well as obligations guaranteed by the Asian, Latin American, European, Middle Eastern and African governments. These guarantees do not guarantee the market value of the obligations, which can increase or decrease in value. Such securities may be denominated in U.S. dollars or the non-U.S. currencies invested in by each fund.

SUPRANATIONAL SECURITIES. Each Fund may invest in securities issued by supranational entities. A supranational entity is formed by two or more central governments to promote economic development for the member countries. Supranational entities finance their activities by issuing bond debt and are usually considered part of the sub-sovereign debt market. Some well-known examples of supranational entities are the World Bank, International Monetary Fund, European Investment Bank, Asian Development Bank, Inter-American Development Bank and other regional multilateral development banks. These securities are subject to varying degrees of credit risk and interest rate risk.

BANK DEPOSITS AND OBLIGATIONS. Each Fund may invest in deposits and other obligations of U.S. and non-U.S. banks and financial institutions. Deposits and obligations of banks and financial institutions include certificates of deposit, time deposits, and bankers' acceptances. Certificates of deposit and time deposits represent an institution's obligation to repay funds deposited with it that earn a specified interest rate. Certificates of deposit are negotiable certificates, while time deposits are non-negotiable deposits.

Table of Contents

A banker's acceptance is a time draft drawn on and accepted by a bank that becomes a primary and unconditional liability of the bank upon acceptance. Investments in obligations of non-U.S. banks and financial institutions may involve risks that are different from investments in obligations of U.S. banks. These risks include future unfavorable political and economic developments, seizure or nationalization of foreign deposits, currency controls, interest limitations or other governmental restrictions that might affect the payment of principal or interest on the securities held in each Fund.

COMMERCIAL PAPER. Commercial paper is an unsecured short-term promissory note with a fixed maturity of no more than 270 days issued by corporations, generally to finance short-term business needs.

If a security satisfies the rating requirement upon initial purchase and is subsequently downgraded, the Funds are not required to dispose of the security. In the event of such an occurrence, the Adviser or the Sub-Adviser will determine what action, including potential sale, is in the best interest of each Fund.

Commercial paper issues in which the Funds may invest include securities issued by corporations without registration under the Securities Act in reliance on the exemption from such registration afforded by Section 3(a)(3) thereof, and commercial paper issued in reliance on the so-called "private placement" exemption from registration, which is afforded by Section 4(2) of the Securities Act ("Section 4(2) paper"). Section 4(2) paper is restricted as to disposition under the federal securities laws in that any resale must similarly be made in an exempt transaction. Section 4(2) paper is normally resold to other institutional investors through or with the assistance of investment dealers who make a market in Section 4(2) paper, thus providing liquidity.

CORPORATE DEBT OBLIGATIONS. The Funds may invest in both short- and long-term corporate debt obligations denominated in the currencies of countries in Asia, Latin America, Europe, Middle East and Africa or U.S. dollars. Corporate debt obligations are interest bearing securities in which the corporate issuer has a contractual obligation to pay interest at a stated rate on specific dates and to repay principal periodically or on a specified maturity date. Each Fund may invest in both rated and unrated debt, subject to the credit quality restrictions set forth in the description of each Fund's Principal Investment Strategies herein.

If a security satisfies the rating requirement upon initial purchase and is subsequently downgraded, the Funds are not required to dispose of the security. In the event of such an occurrence, WisdomTree Asset Management or the Sub-Adviser will determine what action, including potential sale, is in the best interest of each Fund.

FLOATING AND ADJUSTABLE RATE NOTES. Each Fund may purchase floating rate and adjustable rate obligations, such as demand notes, bonds, and commercial paper. These securities may bear interest at a rate that resets based on standard money market indices or are remarketed at current market rates. They may permit the holder to demand payment of principal at any time or at specified intervals not exceeding 397 days. The issuer of such obligations may also have the right to prepay, in its discretion, the principal amount of the obligations plus any accrued interest. The reset date of securities held by each Fund may not be longer than 397 days (and therefore would be considered to be within each Fund's general maturity restriction of 397 days). Given that most floating rate securities reset their interest rates prior to their final maturity date, each Fund uses the period to the next reset date to calculate the securities contribution to the average portfolio maturity of the Fund.

DERIVATIVES. Each Fund intends to use derivative instruments as part of its investment strategies. Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to bonds, interest rates, currencies, commodities, and related indexes. Examples of derivative instruments include forward currency contracts, non-deliverable forward currency contracts, currency, interest rate and total return swaps, currency options, futures contracts, options on futures contracts, swap agreements and credit linked notes. Each Fund's use of derivative instruments (other than credit linked notes) will be underpinned by investments in short-term, high-quality U.S. money market securities.

With respect to certain kinds of derivative transactions entered into by the Funds that involve obligations to make future payments to third parties, including, but not limited to, futures, forward contracts, swap contracts, the purchase of securities on a when-issued or delayed delivery basis, or reverse repurchase agreements, under applicable federal securities laws, rules, and interpretations thereof, each Fund must set aside (referred to sometimes as "asset segregation") liquid assets, or engage in other measures to cover open positions with respect to such transactions. For example, with respect to forward foreign currency exchange contracts and futures contracts that are not contractually required to cash-settle, each Fund must cover its open positions by setting aside liquid assets equal to the contracts' full notional value, except that deliverable foreign currency exchange contracts for currencies that are liquid will be treated as the equivalent of cash settled contracts. As such, each Fund may set aside liquid assets in an amount equal to the Fund's daily marked-to-market (net) obligation (i.e., the Fund's daily net liability if any) rather than the full notional amount under such deliverable forward foreign currency exchange contracts. With respect to forward foreign currency exchange contracts and futures contracts that are contractually required to cash-settle, each Fund may set aside liquid assets in an amount equal to the Fund's daily marked-to-market (net) obligation rather than the notional value. Each Fund reserves the right to modify its asset segregation

policies in the future.

Table of Contents

Credit Linked Notes. Each Fund may invest in credit linked notes. A credit linked note is a type of structured note whose value is linked to an underlying reference asset. Credit linked notes typically provide periodic payments of interest as well as payment of principal upon maturity. The value of the periodic payments and the principal amount payable upon maturity are tied (positively or negatively) to a reference asset, such as an index, government bond, interest rate or currency exchange rate. The ongoing payments and principal upon maturity typically will increase or decrease depending on increases or decreases in the value of the reference asset. A credit linked note typically is issued by a special purpose trust or similar entity and is a direct obligation of the issuing entity. The entity, in turn, invests in bonds or derivative contracts in order to provide the exposure set forth in the credit linked note. The periodic interest payments and principal obligations payable under the terms of the note typically are conditioned upon the entity's receipt of payments on its underlying investment. If the underlying investment defaults, the periodic payments and principal received by the Fund will be reduced or eliminated. The buyer of a credit linked note assumes the risk of default by the issuer and the underlying reference asset or entity. Generally, investors in credit linked notes assume the risk of default by the issuer and the reference entity in return for a potentially higher yield on their investment or access to an investment that they could otherwise not obtain. In the event the issuer defaults or there is a credit event that relates to the reference asset, the recovery rate is generally less than the Fund's initial investment and the Fund may lose money.

Foreign Currency Transactions. Each Fund may engage in foreign currency transactions. Each Fund may invest directly in foreign currencies in the form of bank and financial institution deposits, certificates of deposit, and bankers' acceptances denominated in a specified non-U.S. currency. Each Fund may enter into foreign currency exchange transactions. Each Fund will conduct its foreign currency exchange transactions either on a spot (i.e., cash) basis at the spot rate prevailing in the foreign currency exchange market, or by entering into forward currency contracts to purchase or sell foreign currencies or forward currency swaps to exchange cash flows based on the notional difference among two or more currencies.

Each Fund may buy or sell government bonds, commercial paper, corporate debt obligations, notes and other fixed income securities denominated in currencies other than the U.S. dollar. Any security or instrument denominated in a currency other than the U.S. dollar is subject to foreign currency risk.

Forward Currency Contracts. Each Fund may enter into forward currency contracts. A forward currency contract is a privately negotiated contract to purchase or sell a specific currency at a future date (usually less than one year) at a price set at the time of the contract. These contracts generally are traded directly between currency traders (usually large commercial banks) and their customers. Each Fund may enter into forward currency contracts in order to lock in the exchange rate between the currency it will deliver and the currency it will receive for the duration of the contract. The settlement of the contracts may occur with the physical delivery of a specified amount of currency equivalent to the market value of the contract. This is sometimes referred to as a deliverable forward contract. A non-deliverable forward contract is a forward contract where there is no physical settlement of two currencies at maturity. Non-deliverable forward contracts will usually be done on a net basis, the Fund receiving or paying only the net amount of the two payments. The net amount of the excess, if any, of the Fund's obligations over its entitlements with respect to each non-deliverable forward contract is accrued on a daily basis and an amount of cash or highly liquid securities having an aggregate value at least equal to the accrued excess is maintained in an account at the Trust's custodian bank. The risk of loss with respect to non-deliverable forward contracts generally is limited to the net amount of payments that the Fund is contractually obligated to make or receive. Each Fund may invest in a combination of forward currency contracts and U.S. dollar-denominated money market securities in an attempt to obtain an investment result that is similar to a direct investment in a foreign currency denominated instrument. This investment technique, if successful, creates a synthetic position in the particular foreign currency instrument the Fund is trying to duplicate. Forward contracts are subject to the risk that the counterparty will default on its obligations.

Currency, Interest Rate and Total Return Swaps. Each Fund may enter into swap agreements, including interest rate swaps, currency swaps and total return swaps. A typical interest rate swap involves the exchange of a floating interest rate payment for a fixed interest rate payment. A typical foreign currency swap involves the exchange of cash flows based on the notional difference among two or more currencies (e.g., the U.S. dollar and the non-U.S. currencies). A typical total return swap involves the payment of the total return on a reference asset in return for payments equal to a rate of interest on another reference asset. The total return includes appreciation or depreciation on the reference asset, plus any interest or dividend payments. Swap agreements may be used to achieve exposure to, for example, currencies, interest rates, and money market securities without actually purchasing such currencies or securities. Each Fund will use swap agreements to invest in a market without owning or taking physical custody of the underlying securities in circumstances in which direct investment is restricted for legal reasons or is otherwise impracticable. Swap agreements will tend to shift a Fund's investment exposure from one type of investment to another or from one payment stream to another. Depending on their structure, swap agreements may increase or decrease a Fund's exposure to long-term or short-term interest rates (in the United States or abroad), foreign currencies, corporate borrowing rates, or other factors, and may increase or decrease the overall volatility of the Fund's investments and its share price.

Currency Options. Each Fund may buy or sell put and call options on foreign currencies either on exchanges or in the over-the-counter market. A put option on a foreign currency gives the purchaser of the option the right to sell a foreign currency at the exercise price until the option expires. A call option on a foreign currency gives the purchaser of the option the right to purchase the currency at the exercise price until the

option expires.

Table of Contents

Futures Contracts and Options on Futures Contracts. Each Fund may use futures contracts and related options: (i) to attempt to gain exposure to foreign currencies, and (ii) to attempt to gain exposure to a particular market, instrument or index.

A futures contract may generally be described as an agreement for the future sale by one party and the purchase by another of a specified security or instrument at a specified price and time. An option on a futures contract gives the purchaser the right, in exchange for payment of a premium, to assume a position in a futures contract at a specified exercise price during the term of the option. A put option gives the purchaser of the option the right to sell, and the writer of the option the obligation to buy, the underlying security or instrument at any time during the option period. A call option on a security gives the purchaser of the option the right to buy, and the writer of the option the obligation to sell, the underlying security or instrument at any time during the option period.

Swap Agreements. Each Fund may engage in swap transactions. Swap agreements can be individually negotiated and structured to include exposure to a variety of different types of investments or market factors. Depending on their structure, swap agreements may increase or decrease a Fund's exposure to long-term or short-term interest rates (in the United States or abroad), foreign currencies, commodities, commodity indexes, or inflation rates. Depending on how they are used, swap agreements may increase or decrease the overall volatility of a Fund's investments and the volatility of a Fund's share price. The most significant factor in the performance of swap agreements is the change in the factors that determine the amounts of payments due to and from a Fund. If a swap agreement calls for payments by a Fund, the Fund must be prepared to make such payments when due. If a swap counterparty's creditworthiness declines, the risk that such counterparty may not perform may increase, potentially resulting in a loss to the Fund. Each Fund may be able to reduce or eliminate its exposure under a swap agreement either by assignment or other disposition, or by entering into an offsetting swap agreement with the same party or a similarly creditworthy party. There is no guarantee these strategies will be successful.

Table of Contents

REPURCHASE AGREEMENTS. Each Fund may enter into repurchase agreements with counterparties that are deemed to present acceptable credit risks. A repurchase agreement is a transaction in which a Fund purchases securities or other obligations from a bank or securities dealer (or its affiliate) and simultaneously commits to resell them to a counterparty at an agreed-upon date or upon demand and at a price reflecting a market rate of interest unrelated to the coupon rate or maturity of the purchased obligations. This is designed to result in a fixed rate of return for a Fund insulated from market fluctuations during the holding period. Because they are collateralized by securities, including mortgage-backed securities, repurchase agreements are subject to market and credit risk. As discussed herein, a Fund may not invest more than 10% of its net assets in illiquid securities. A repurchase agreement maturing in more than seven days may be considered an illiquid security. Each Fund maintains custody of the underlying obligations prior to their repurchase, either through its regular custodian or through a special triparty custodian or sub-custodian that maintains separate accounts for both the Fund and its counterparty. Thus, the obligation of the counterparty to pay the repurchase price on the date agreed to or upon demand is, in effect, secured by such obligations.

Repurchase agreements carry certain risks not associated with direct investments in securities, including a possible decline in the market value of the underlying obligations. If their value becomes less than the repurchase price, plus any agreed upon additional amount, the counterparty must provide additional collateral so that at all times the collateral is at least equal to the repurchase price plus any agreed upon additional amount. The difference between the total amount to be received upon repurchase of the obligations and the price that was paid by a Fund upon acquisition is accrued as interest and included in its net investment income. Repurchase agreements involving obligations other than U.S. government securities (such as commercial paper and corporate bonds) may be subject to special risks and may not have the benefit of certain protections in the event of the counterparty's insolvency. If the seller or guarantor becomes insolvent, a Fund may suffer delays, costs and possible losses in connection with the disposition of collateral.

REVERSE REPURCHASE AGREEMENTS. Each Fund may enter into reverse repurchase agreements, which involve the sale of securities held by a Fund subject to its agreement to repurchase the securities at an agreed upon date or upon demand and at a price reflecting a market rate of interest. Reverse repurchase agreements are subject to each Fund's limitation on borrowings and may be entered into only with banks or securities dealers or their affiliates. While a reverse repurchase agreement is outstanding, a Fund will maintain the segregation, either on its records or with the Trust's custodian, of cash or other liquid securities, marked to market daily, in an amount at least equal to its obligations under the reverse repurchase agreement. Reverse repurchase agreements involve the risk that the buyer of the securities sold by a Fund might be unable to deliver them when the Fund seeks to repurchase. If the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the buyer or trustee or receiver may receive an extension of time to determine whether to enforce a Fund's obligation to repurchase the securities, and the Fund's use of the proceeds of the reverse repurchase agreement may effectively be restricted pending such decision.

INVESTMENT COMPANY SECURITIES. Each Fund may invest in the securities of other investment companies (including money market funds and Underlying ETFs). The 1940 Act generally prohibits a fund from acquiring more than 3% of the outstanding voting shares of an investment company and limits such investments to no more than 5% of each fund's total assets in any single investment company and no more than 10% in any combination of two or more investment companies. Each Fund may purchase or otherwise invest in shares of affiliated ETFs. Each Fund may invest in affiliated money market funds and Underlying ETFs.

ILLIQUID SECURITIES. Although the Funds do not intend to do so, as a matter of policy, each Fund may invest up to an aggregate amount of 10% of its net assets in illiquid securities. Illiquid securities include securities subject to contractual or other restrictions on resale and other instruments that lack readily available markets. The inability of the Funds to dispose of illiquid or not readily marketable investments readily or at a reasonable price could impair a Fund's ability to raise cash for redemptions or other purposes. The liquidity of securities purchased by the Funds which are eligible for resale pursuant to Rule 144A will be monitored by each Fund on an ongoing basis. In the event that such a security is deemed to be no longer liquid, a Fund's holdings will be reviewed to determine what action, if any, is required to ensure that the retention of such security does not result in the Fund having more than 10% of its assets invested in illiquid or not readily marketable securities.

FINANCIAL SECTOR INVESTMENTS. The Funds may engage in transactions with or invest in companies that are considered to be in the financial sector, including commercial banks, brokerage firms, diversified financial services, a variety of firms in all segments of the insurance industry (such as multi-line, property and casualty, and life insurance) and real estate related companies. There can be no guarantee that these strategies may be successful. Each Fund may lose money as a result of defaults or downgrades within the financial sector.

Events in the financial sector have resulted in increased concerns about credit risk and exposure. Well-known financial institutions have experienced significant liquidity and other problems and have defaulted on their debt obligations. Issuers that have exposure to real estate, mortgage and credit markets have been particularly affected. It is uncertain whether or how long these conditions will continue. These events and possible continuing market turbulence may have an adverse effect on Fund performance.

Table of Contents

Rule 12d3-1 under the 1940 Act limits the extent to which a fund may invest in the securities of any one company that derives more than 15% of its revenues from brokerage, underwriting or investment management activities. Each fund may purchase securities of an issuer that derived more than 15% of its gross revenues in its most recent fiscal year from securities-related activities, subject to the following conditions: (1) the purchase cannot cause more than 5% of the fund's total assets to be invested in securities of that issuer; (2) for any equity security, the purchase cannot result in the fund owning more than 5% of the issuer's outstanding securities in that class; and (3) for a debt security, the purchase cannot result in the fund owning more than 10% of the outstanding principal amount of the issuer's debt securities.

In applying the gross revenue test, an issuer's own securities-related activities must be combined with its ratable share of securities-related revenues from enterprises in which it owns a 20% or greater voting or equity interest. All of the above percentage limitations, as well as the issuer's gross revenue test, are applicable at the time of purchase. With respect to warrants, rights, and convertible securities, a determination of compliance with the above limitations shall be made as though such warrant, right, or conversion privilege had been exercised. The Funds will not be required to divest its holdings of a particular issuer when circumstances subsequent to the purchase cause one of the above conditions to not be met. The purchase of a general partnership interest in a securities-related business is prohibited.

NON-U.S. SECURITIES. The Funds invest a significant portion of its assets in non-U.S. securities. Investments in non-U.S. securities involve certain risks that may not be present in investments in U.S. securities. For example, non-U.S. securities may be subject to currency risks or to foreign government taxes. There may be less information publicly available about a non-U.S. issuer than about a U.S. issuer, and a foreign issuer may or may not be subject to uniform accounting, auditing and financial reporting standards and practices comparable to those in the U.S. Other risks of investing in such securities include political or economic instability in the country involved, the difficulty of predicting international trade patterns and the possibility of imposition of exchange controls. The prices of such securities may be more volatile than those of domestic securities. With respect to certain foreign countries, there is a possibility of expropriation of assets or nationalization, imposition of withholding taxes on dividend or interest payments, difficulty in obtaining and enforcing judgments against foreign entities or diplomatic developments which could affect investment in these countries. Losses and other expenses may be incurred in converting between various currencies in connection with purchases and sales of foreign securities.

Set forth below is a description of the markets in which the Funds may invest and a brief description of some of the conditions and risks in such markets.

Investments in Asia. The Asia Bond Fund may invest in fixed income securities issued by the government and/or corporations economically tied to Asia. Many countries in the region have historically faced political uncertainty, corruption, military intervention, and social unrest. Examples include military threats in Korea and Taiwan, the ethnic, sectarian, and separatist violence found in Indonesia, and the nuclear arms threats between India and Pakistan. To the extent that such events continue in the future, they can be expected to have an unpredictable effect on economic and securities market conditions in the region.

The economies of many Asian countries are heavily dependent on international trade and are accordingly affected by protective trade barriers and the economic conditions of their trading partners, principally, the U.S., Japan, China, and the European Union. The recent global economic crisis has impacted Asia, significantly lowering its exports and foreign investments, which are driving forces of its economic growth. Current economic conditions are also significantly affecting consumer confidence and local stock markets.

In addition to general risks affecting Asian countries, certain Asian countries, including China, Hong Kong, and Taiwan, are subject to additional risks that are based on each country's history, economy and geography. Certain risks associated with investments in these countries are discussed below.

Investments in Brazil. The Latin America Bond Fund may invest in fixed income securities issued by the Brazilian government and/or corporations economically tied to Brazil. Investing in Brazil involves certain considerations not typically associated with investing in securities of U.S. companies or the U.S. government, including: (i) investment and repatriation controls, which could affect the Fund's ability to operate, and to qualify for the favorable tax treatment afforded to regulated investment companies for U.S. federal income tax purposes, (ii) fluctuations in the rate of exchange between the Brazilian real and the U.S. dollar, (iii) the generally greater price volatility and lesser liquidity that characterize Brazilian securities markets, as compared with U.S. markets, (iv) the effect that a trade deficit could have on economic stability and the Brazilian government's economic policy, (v) high rates of inflation, (vi) governmental involvement in and influence on the private sector, (vii) Brazilian accounting, auditing and financial standards and requirements, which differ from those in the United States, and (viii) political and other considerations, including changes in applicable Brazilian tax laws. These and other factors could have a negative impact on a Fund's performance.

Investments in Chile. The Latin America Bond Fund may invest in fixed income securities issued by the Chilean government and/or corporations economically tied to Chile. Investing in Chile involves certain considerations not typically associated with investing in securities of U.S. companies or the U.S. government. The Chilean economy is subject to risks of social unrest, high unemployment, governmental control and

Edgar Filing: WisdomTree Trust - Form 485BPOS

heavy regulation of the labor industry. Historically, Chile has experienced periods of political instability and certain sectors and regions of Chile have experienced high unemployment. Any recurrence of these events may cause downturns in the Chilean market and adversely impact investments in the Fund. Heavy regulation of labor and product markets is pervasive in Chile and may stifle Chilean economic growth or contribute to prolonged periods of recession. Chile is located in a part of the world that has historically been prone to natural disasters such as earthquakes and volcanoes and is economically sensitive to environmental events. Any such event could result in a significant adverse impact on the Chilean economy. The Chilean economy is affected by the economies of other Central and South American countries, some of which have experienced high interest rates, economic volatility, inflation, currency devaluations and high unemployment rates. Any adverse economic event in one country can have a significant effect on other countries of this region. In addition, commodities (such as oil, gas and minerals) represent a significant percentage of the region's exports, and many economies in this region, including Chile's, are particularly sensitive to fluctuations in commodity prices. These and other factors could have a negative impact on the Fund's performance.

Table of Contents

Investments in China and Hong Kong. The Asia Bond Fund may invest in fixed income securities issued by governments and/or corporations economically tied to China and Hong Kong. In addition to the aforementioned risks of investing in non-U.S. securities, investing in securities listed and traded in China and Hong Kong involves special considerations not typically associated with investing in countries with more democratic governments or more established economies or securities markets. Such risks may include: (i) the risk of nationalization or expropriation of assets or confiscatory taxation; (ii) greater social, economic and political uncertainty (including the risk of war); (iii) dependency on exports and the corresponding importance of international trade; (iv) increasing competition from Asia's other low-cost emerging economies; (v) currency exchange rate fluctuations and the lack of available currency hedging instruments; (vi) higher rates of inflation; (vii) controls on foreign investment and limitations on repatriation of invested capital and on the Fund's ability to exchange local currencies for U.S. dollars; (viii) greater governmental involvement in and control over the economy; (ix) the risk that the Chinese government may decide not to continue to support the economic reform programs implemented since 1978 and could return to the prior, completely centrally planned, economy; (x) the fact that Chinese companies, particularly those located in China, may be smaller, less seasoned and newly organized; (xi) the differences in, or lack of, auditing and financial reporting standards which may result in unavailability of material information about issuers, particularly in China; (xii) the fact that statistical information regarding the economy of China may be inaccurate or not comparable to statistical information regarding the U.S. or other economies; (xiii) the less extensive, and still developing, regulation of the securities markets, business entities and commercial transactions; (xiv) the fact that the settlement period of securities transactions in foreign markets may be longer; (xv) the willingness and ability of the Chinese government to support the Chinese and Hong Kong economies and markets is uncertain; (xvi) the risk that it may be more difficult, or impossible, to obtain and/or enforce a judgment than in other countries; (xvii) the rapidity and erratic nature of growth, particularly in China, resulting in inefficiencies and dislocations; (xviii) the risk that, because of the degree of interconnectivity between the economies and financial markets of China and Hong Kong, any sizable reduction in the demand for goods from China, or an economic downturn in China, could negatively affect the economy and financial market of Hong Kong as well; and (xix) the risk that certain companies in the Fund's Index may have dealings with countries subject to sanctions or embargoes imposed by the U.S. Government or identified as state sponsors of terrorism.

Investments in Hong Kong are also subject to certain political risks. Following the establishment of the People's Republic of China by the Communist Party in 1949, the Chinese government renounced various debt obligations incurred by China's predecessor governments, which obligations remain in default, and expropriated assets without compensation. There can be no assurance that the Chinese government will not take similar action in the future. An investment in the Fund involves risk of a total loss. China has committed by treaty to preserve Hong Kong's autonomy and its economic, political and social freedoms for 50 years from the July 1, 1997 transfer of sovereignty from Great Britain to China. However, if China would exert its authority so as to alter the economic, political or legal structures or the existing social policy of Hong Kong, investor and business confidence in Hong Kong could be negatively affected, which in turn could negatively affect markets and business performance. These and other factors could have a negative impact on the Fund's performance.

Investments in Colombia. The Latin America Bond Fund may invest in fixed income securities issued by the Colombian government and/or corporations economically tied to Colombia. The Colombian economy is subject to risks of social unrest, high unemployment, governmental control and heavy regulation of the labor industry. Historically, Colombia has experienced periods of political instability and certain sectors and regions of Colombia have experienced high unemployment. Any recurrence of these events may cause downturns in the Colombian market and adversely impact investments in the Fund. Heavy regulation of labor and product markets is pervasive in Colombia and may stifle Colombian economic growth or contribute to prolonged periods of recession. Colombia is located in a part of the world that has historically been prone to natural disasters such as earthquakes and volcanoes and is economically sensitive to environmental events. Any such event could result in a significant adverse impact on the Colombian economy. The Colombian economy is affected by the economies of other Central and South American countries, some of which have experienced high interest rates, economic volatility, inflation, currency devaluations and high unemployment rates. Any adverse economic event in one country can have a significant effect on other countries of this region. In addition, commodities (such as oil, gas and minerals) represent a significant percentage of the region's exports and many economies in this region, including Colombia's, are particularly sensitive. These and other factors could have a negative impact on the Fund's performance.

Investments in Czech Republic. The EMEA Bond Fund may invest in fixed income securities issued by the government and/or corporations economically tied to the Czech Republic. The Czech Republic is subject to a considerable degree of economic, political and social instability, which could adversely affect investments in the Fund. A significant portion of the workforce in Eastern Europe is unionized and certain regions and sectors of these countries have experienced very high unemployment rates and periods of labor and social unrest. Despite significant recent reform and privatization, Eastern European governments continue to control a large share of economic activity in the region. Government spending in these countries remains high compared to that of other European countries. These and other factors could have a negative impact on the Fund's performance.

Table of Contents

Investments in Emerging Markets. The Funds invest substantially all of their assets in a market considered to be emerging or developing securities that provide exposure to such market(s). Investing in developing markets may be subject to additional risks not associated with more developed economies. Such risks may include: (i) the risk that government and quasi-government entities may not honor their obligations, (ii) greater market volatility, (iii) lower trading volume and liquidity, (iv) greater social, political and economic uncertainty, (v) governmental controls on foreign investments and limitations on repatriation of invested capital, (vi) the risk that governments and companies may be held to lower disclosure, corporate governance, auditing and financial reporting standards than companies in more developed markets, and (vii) the risk that there may be less protection of property rights than in other countries. Some emerging markets have experienced and may continue to experience high inflation rates, currency devaluations and economic recessions. Each of these factors may cause the Funds to decline in value. Unanticipated political or social developments may result in sudden and significant investment losses, and may affect the ability of governments and government agencies in these markets to meet their debt obligations. These and other factors could have a negative impact on Fund performance and increase the volatility of an investment in a Fund.

Investments in Europe. The EMEA Bond Fund may invest in fixed income securities issued by the government and/or corporations economically tied to Europe. The securities markets of many European countries are relatively small, with the majority of market capitalization and trading volume concentrated in a limited number of companies representing a small number of industries. Consequently, a portfolio invested in securities of European companies may experience greater price volatility and significantly lower liquidity than a portfolio invested in equity securities of U.S. companies. These markets may be subject to greater influence by adverse events generally affecting the market, and by large investors trading significant blocks of securities, than is usual in the U.S.

In addition, the securities markets of European countries are subject to varying degrees of regulation, which may be either less or more restrictive than that imposed by the U.S. government. For example, the reporting, accounting and auditing standards of European countries differ from U.S. standards in important respects and less information is available to investors in securities of European companies than to investors in U.S. securities.

The EU has been extending its influence to the east. It has accepted several new members that were previously behind the Iron Curtain, and has plans to accept several more in the medium-term. It is hoped that membership for these countries will help cement economic and political stability. Nevertheless, eight of the new entrants are former Soviet satellites and remain burdened to various extents by the inherited inefficiencies of centrally planned economies similar to what existed under the former Soviet Union. The current and future status of the EU continues to be the subject of political controversy, with widely differing views both within and between member countries.

Increased terrorism activity and related geo-political risks have led to increased short-term market volatility and may have adverse long-term effects on world economies and markets generally.

Investments in Frontier Markets Securities. Most African and Middle Eastern countries are considered to be frontier markets and the EMEA Bond Fund may invest in fixed income securities issued by governments and/or corporations economically tied to these markets. The economies of frontier markets included in the Fund generally have lower trading volumes and greater potential for illiquidity and price volatility than more developed markets. These markets have a smaller number of issuers and participants and therefore may also be affected to a greater extent by the actions of a small number of issuers and investors. A significant change in cash flows investing in these markets could have a substantial effect on local stock prices and, therefore, prices of Fund shares. Investments in certain frontier market countries are restricted or controlled to varying extents.

At times, these restrictions or controls may limit or prevent foreign investment and/or increase the investment costs and expenses of the Fund. Frontier markets may be subject to greater political instability, threat of war or terrorism and government intervention than more developed markets, including many emerging market economies. Frontier markets generally are not as correlated to global economic cycles as those of more developed countries. These and other factors make investing in the frontier market countries significantly riskier than investing in developed market and emerging market countries.

Certain frontier countries impose additional restrictions, such as requiring governmental approval prior to investments by foreign persons, limiting the amount of investments by foreign persons in a particular issuer, limiting investments by foreign persons to a particular class of securities of an issuer that may have less advantageous rights than other classes, and imposing additional taxes. For countries that require prior government approval, delays in obtaining such approval would delay investments, and consequently the Fund may be unable to invest in all of the securities included in the Index until such approval is final. This could increase Index tracking error. Some frontier countries may also limit investment in issuers in industries considered essential to national interests and may require governmental approval for the repatriation of investment income, capital or the proceeds of security sales by foreign investors, including the Fund. Some frontier country governments may levy certain taxes on dividend and interest income. Although in some countries a portion of these taxes are recoverable, the nonrecovered portion of foreign withholding taxes will decrease the income generated from investments in such countries.

Edgar Filing: WisdomTree Trust - Form 485BPOS

Some banks that are eligible foreign sub-custodians in frontier markets may have been organized only recently or may otherwise not have extensive operating experience. There may also be legal restrictions or limitations on the ability of the Fund to recover assets held in custody by a foreign sub-custodian, such as in cases where the sub-custodian becomes bankrupt. Settlement systems may not be as established as in developed markets or even emerging markets. As a result, settlements may be delayed and cash or Fund securities may be jeopardized because of system defects. In addition, the laws of certain countries in which the Fund invests may require the Fund to release local shares before receiving cash payment, or to make cash payment before receiving local shares. This increases the risk of loss to the Fund.

The Fund invests in some frontier countries that use share blocking. Share blocking refers to the practice of predicating voting rights related to an issuer's securities on those securities being blocked from trading at the custodian or sub-custodian level for a period of time near the date of a shareholder meeting. Such restrictions have the potential to effectively prevent securities from being voted and from trading within a specified number of days before, and in some cases after, the shareholder meeting. Share blocking may preclude the Fund from purchasing or selling securities for a period of time. During the time that shares are blocked, trades in such securities will not settle. Although practices may vary by market, a blocking period may last from one day to several weeks. Once blocked, the block may be removed only by withdrawing a previously cast vote or abstaining from voting completely, a process that may be burdensome. In certain countries, the block cannot be removed. Share blocking may impose operational difficulties on the Fund, including the potential effect that a block would have on pending trades. Share blocking may cause pending trades to fail or remain unsettled for an extended period of time. Trade failures may also expose the transfer agent and the Fund to situations in which a counterparty may have the right to go to market, buy a security at the current market price and have any additional expense borne by the Fund or transfer agent if the counterparty is unable to deliver shares after a certain period of time. The Adviser, on behalf of the Fund, reserves the right to abstain from voting proxies in share blocking proxy markets. These and other factors could have a negative impact on Fund performance.

Table of Contents

Investments in Hungary. The EMEA Bond Fund may invest in fixed income securities issued by the Hungarian government and/or corporations economically tied to Hungary. Hungary is subject to a considerable degree of economic, political and social instability, which could adversely affect investments in the Fund. Hungary has experienced currency devaluations, substantial rates of inflation, defaults on debt, widespread corruption or economic recessions, causing a negative effect on the economies and securities markets of the country. A significant portion of the workforce in Eastern Europe is unionized and certain regions and sectors of these countries have experienced very high unemployment rates and periods of labor and social unrest. Despite significant recent reform and privatization, Eastern European governments continue to control a large share of economic activity in the region. Government spending in these countries remains high compared to that of other European countries. Investment in Hungary is uncomplicated, although it is subject to government licensing in security-sensitive areas. Such business licensing is a problem, as regulations are not applied consistently. These and other factors could have a negative impact on the Fund's performance.

Investments in India. The Asia Bond Fund may invest in fixed income securities issued by governments and/or corporations economically tied to India. Investments in India involve special considerations not typically associated with investing in countries with more established economies or currency markets. Political and economic conditions and changes in regulatory, tax, or economic policy in India could significantly affect the market in that country and in surrounding or related countries and have a negative impact on the Fund's performance. Economic and political structures in India may lack the stability of those of more developed nations. Unanticipated political or social developments in India and surrounding regions may affect the value of the Fund's investments and the value of Fund shares. The Indian government has exercised and continues to exercise significant influence over many aspects of the economy, and the number of public sector enterprises in India is substantial. Although the government has recently begun to institute economic reform policies, there can be no assurance that it will continue to pursue such policies, or, if it does, that such policies will succeed. While the government of India is moving to a more liberal approach, it still places restrictions on the capability and capacity of foreign investors to access and trade rupee directly. Foreign investors in India still face burdensome taxes on investments in income producing securities as well as potentially high levels of inflation. The laws relating to limited liability of corporate shareholders, fiduciary duties of officers and directors, and the bankruptcy of state enterprises are generally less well developed than or different from laws in the U.S. These and other factors may decrease the value and liquidity of the Fund's investments, and therefore the value and liquidity of an investment in the Fund.

Investments in Indonesia. The Asia Bond Fund may invest in fixed income securities issued by Indonesian governments and/or corporations economically tied to Indonesia. Southeast Asia is heavily dependent on exports and is thus particularly vulnerable to any weakening in global demand for these products. As the current global economic crisis intensifies, the economies of Southeast Asian countries could be severely impacted once the effects of this crisis fully unfold. Indonesia has restored financial stability and pursued sober fiscal policies since the 1997-1998 Asian financial crisis, but many economic development problems remain, including high unemployment, a fragile banking sector, endemic corruption, inadequate infrastructure, a poor investment climate, and unequal resource distribution among regions. These problems may limit the country's ability to contain the increasingly severe and negative impact of the current global economic crisis on its economy.

Economic growth of Indonesia has slowed as a result of the current global economic crisis and could be more severely impacted once the full effects of the crisis fully unfold. Keys to future growth remain internal reform, peaceful resolution of internal conflicts, building up the confidence of international and domestic investors, and strong global economic growth. Economic growth of Indonesia has slowed as a result of the 2004 tsunami and the current global economic crisis. The nation's economy could be more severely impacted once the full effects of the crisis fully unfold. Economic growth of Indonesia has slowed as a result of the current global economic crisis and could be more severely impacted once the full effects of the crisis fully unfold. These and other factors could have a negative impact on the Fund's performance.

Investments in Israel. The EMEA Bond Fund may invest in fixed income securities issued by the Israeli government and/or corporations economically tied to Israel. The Israeli economy is dependent on trade with certain key trading partners. Reduction in spending by these economies on Israeli products and services or negative changes in any of these economies may cause an adverse impact on the Israeli economy.

Israel has begun a process of privatization of certain entities and industries. Historically, investors in some newly privatized entities have suffered losses due to the inability of the newly privatized company to adjust quickly to a competitive environment or to changing regulatory and legal standards. There is no assurance that such losses will not recur. The United States is Israel's single largest trade and investment partner. A decrease in U.S. imports, new trade regulations, changes in the U.S. dollar exchange rates or a recession in the U.S. may have an adverse impact on the Israeli economy.

Israel has historically experienced acts of terrorism or strained international relations related to border disputes, historical animosities or other defense concerns. These situations may cause uncertainty in the Israeli market and adversely affect the performance of the Israeli economy. Unanticipated or sudden political or social developments may result in sudden and significant investment. The Israeli economy has suffered from debt burdens, high inflation rates, currency devaluations and economic recessions, any of which may have a negative effect on the Israeli economy and securities market. These and other factors could have a negative impact on the Fund's performance.

Table of Contents

Investments in Latin America. The Latin America Bond Fund may invest in fixed income securities issued by the government and/or corporations economically tied to Latin America. Many countries in Latin America have long histories of political, social and economic instability and have routinely suffered from regional conflict, political corruption, totalitarianism, intervention by the military in civilian and economic spheres, protectionist measures, and nationalization. The continuation or worsening of such instability could reverse favorable trends toward market and economic reform, privatization, and removal of trade barriers, and result in significant disruption in Latin American securities markets.

Latin American countries are among the largest debtors of developing countries as a majority of the region's economies are dependent on foreign credit and loans from external sources to fund economic development. There have been moratoria on, and restructurings of, repayment with respect to these debts. Such events can restrict the flexibility of these debtor nations in the international markets and result in the imposition of onerous conditions on their economies. In addition, interest on the debt is subject to market conditions. Unfavorable market conditions may impair economic activity and create a difficult and costly environment for borrowers.

Most Latin American countries have experienced, at one time or another, severe and persistent levels of inflation, including, in some cases, hyperinflation. Although inflation in many countries has lessened, as they develop sustainable and more democratic political environments, there is no guarantee it will remain at lower levels. In addition, certain Latin American countries may experience sudden and large adjustments in their currency which, in turn, can have a disruptive and negative effect on foreign investors. For example, in late 1994 the Mexican peso lost more than one-third of its value relative to the U.S. dollar. In 1999, the Brazilian real lost 30% of its value against the U.S. dollar. Certain Latin American countries may impose restrictions, from time to time and without warning, on the free conversion of their currency into foreign currencies, including the U.S. dollar. There is no significant foreign exchange market for many currencies and it would, as a result, be difficult for the Funds to engage in foreign currency transactions designed to protect the value of the Funds' interests in securities denominated in such currencies.

In addition, commodities (such as oil, gas and minerals) represent a significant percentage of the region's exports. Thus, many economies in this region are particularly sensitive to fluctuations in the commodity markets. Because the economies of certain Latin American countries are interdependent, economic events in one country may have a significant adverse effect on other countries in the region.

Investments in Malaysia. The Asia Bond Fund may invest in fixed income securities issued by the Malaysian government and/or corporations economically tied to Malaysia. The Malaysian economy is dependent on the economies of Southeast Asia and the United States as key trading partners. Reduction in spending by these countries on Malaysian products and services or negative changes in any of these economies may cause an adverse impact in the Malaysian economy. Certain Asian economies experience over-extension of credit, currency devaluations and restrictions, rising unemployment, high inflation, decreased exports and economic recessions. Economic events in any one country can have a significant effect on the entire Asian region as well as on major trading partners outside Asia and any adverse event in the Asian markets may have a significant adverse effect on the Malaysian economy. The United States is a significant trading and investment partner of Malaysia. A decrease in U.S. imports, new trade regulations, changes in the U.S. dollar exchange rates or a recession in the U.S. may have an adverse impact on the Malaysian economy. These and other factors could have a negative impact on the Fund's performance.

Investments in Mexico. The Latin America Bond Fund may invest in fixed income securities issued by the Mexican government and/or corporations economically tied to Mexico. Investing in Mexico involves certain considerations not typically associated with investing in securities of U.S. companies or the U.S. government. The Mexican economy may be significantly affected by the economies of other Central and South American countries. High interest, inflation, and unemployment rates characterize the economies in some Central and South American countries. Currency devaluations in any Central and South American country can have a significant effect on the entire region. Because commodities such as oil and gas, minerals, and metals represent a significant percentage of the region's exports, the economies of Central and South American countries are particularly sensitive to fluctuations in commodity prices. As a result, the economies in many Central and South American countries can experience significant volatility. The United States is Mexico's largest trade and investment partner and the Mexican economy is significantly affected by developments in the U.S. economy. Since the implementation of the North American Free Trade Agreement (NAFTA) in 1994 among Canada, the U.S. and Mexico, total two-way merchandise trade between the United States and Mexico has increased. To further this relationship, the three NAFTA countries entered into The Security and Prosperity Partnership of North America in March 2005, which may further affect Mexico's dependency on the U.S. economy. Any downturn in U.S. or Canadian economic activity is likely to have an adverse impact on the Mexican economy. Mexico has begun a process of privatization of certain entities and industries. Historically, investors in some newly privatized entities have suffered losses due to the inability of the newly privatized companies to adjust quickly to a competitive environment or to changing regulatory and legal standards. There is no assurance that such losses will not recur. Mexico has historically experienced acts of violence, terrorism, significant criminal activity and strained international relations related to border disputes, historical animosities, the drug trade and other defense concerns. These situations may cause uncertainty in the Mexican market and adversely affect the performance of the Mexican economy.

Edgar Filing: WisdomTree Trust - Form 485BPOS

Certain political and currency instability risks have contributed to a level of price volatility in the Mexican equity and currency markets and could adversely affect investments in the Funds. Mexico has been destabilized by local insurrections and social upheavals in certain regions, particularly the State of Chiapas. Recurrence of these conditions may adversely impact the Mexican economy. Some of the government's challenges include the upgrade of infrastructure, the modernization of the tax system and labor laws, and the reduction of income inequality. In addition, Mexico has had one political party dominating government until the elections of 2000. Recently, Mexican elections have been contentious and have been very closely decided.

Changes in political parties or other Mexican political events may affect the economy and cause instability. Mexico has, in recent history, experienced substantial economic instability resulting from, among other things, periods of very high inflation and significant devaluations of the Mexican currency, the peso. These and other factors could have a negative impact on the Fund's performance.

Investments in the Middle East. The EMEA Bond Fund may invest in fixed income securities issued by the governments and corporations economically tied to Egypt, Qatar and the United Arab Emirates. Countries in the Middle East may be affected by political instability, war or the threat of war, regional instability, terrorist activities and religious, ethnic and/or socioeconomic unrest. Markets in the Middle East generally have lower trading volumes and greater potential for illiquidity and price volatility than more developed markets. These markets also have a smaller number of issuers and participants and therefore may also be affected to a greater extent by the actions of a small number of issuers and investors. A significant change in cash flows investing in these markets could have a substantial effect on local stock prices. Some Middle Eastern countries prohibit or impose substantial restrictions on investments in their capital markets, particularly their equity markets, by foreign entities such as the Fund. For example, certain countries may require governmental approval prior to investment by foreign persons or limit the amount of investment by foreign persons in a particular issuer. They may also limit the investment by foreign persons to only a specific class of securities of an issuer that may have less advantageous terms (including price) than securities of the issuer available for purchase by nationals. The manner in which foreign investors may invest in companies in certain Middle Eastern countries, as well as limitations on those investments, may have an adverse impact on the operations of the Fund. For example, the Fund may be required in certain of these countries to invest initially through a local broker or other entity and then have the shares that were purchased re-registered in the name of the Fund. Re-registration in some instances may not be possible on a timely basis. This may result in a delay during which the Fund may be denied certain of its rights as an investor, including rights as to dividends or to be made aware of certain corporate actions. The legal systems in certain Middle Eastern countries may have

Table of Contents

an adverse impact on the Fund. For example, the potential liability of a shareholder in a U.S. corporation with respect to acts of the corporation generally is limited to the amount of the shareholder's investment. However, the notion of limited liability is less clear in certain Middle Eastern countries. The Fund therefore may be liable in certain Middle Eastern countries for the acts of a corporation in which it invests for an amount greater than the Fund's actual investment in that corporation. Similarly, the rights of investors in Middle Eastern issuers may be more limited than those of shareholders of a U.S. corporation. It may be difficult or impossible to obtain and/or enforce a judgment in a Middle Eastern country. These and other factors could have a negative impact on the Fund's performance.

Investments in Panama. The Latin America Bond Fund may invest in fixed income securities issued by the Panamanian government and/or corporations economically tied to Panama. The Panamanian economy is affected by the economies of other Central and South American countries, some of which have experienced high interest rates, economic volatility, inflation, currency devaluations and high unemployment rates. Any adverse economic event in one country can have a significant effect on other countries of this region. These and other factors could have a negative impact on the Fund's performance.

Investments in Peru. The Latin America Bond Fund may invest in fixed income securities issued by the Peruvian government and/or corporations economically tied to Peru. The Peruvian economy is subject to risks of social unrest, high unemployment, governmental control and heavy regulation of the labor industry. Historically, Peru has experienced periods of political instability and certain sectors and regions of Peru have experienced high unemployment. Any recurrence of these events may cause downturns in the Peruvian market and adversely impact investments in the Fund. Heavy regulation of labor and product markets is pervasive in Peru and may stifle Peruvian economic growth or contribute to prolonged periods of recession. The Peruvian economy is affected by the economies of other Central and South American countries, some of which have experienced high interest rates, economic volatility, inflation, currency devaluations and high unemployment rates. Any adverse economic event in one country can have a significant effect on other countries of this region. In addition, commodities (such as oil, gas and minerals) represent a significant percentage of the region's exports, and many economies in this region, including Peru's, are particularly sensitive to fluctuations in commodity prices. Peru's main exports are copper, gold, zinc, textiles, and fish meal; its major trade partners are the United States, China, Brazil, and Chile. These and other factors could have a negative impact on the Fund's performance.

Investments in the Philippines. The Asia Bond Fund may invest in fixed income securities issued by the Philippine government and/or corporations economically tied to the Philippines. The Philippines' economy is heavily dependent on exports and subject to high interest rates, economic volatility, inflation, currency devaluations, high unemployment rates and high level of debt and public spending. As an emerging country, the Philippines' economy is susceptible to economic, political and social instability; unanticipated economic, political or social developments could impact economic growth. The Philippines is subject to natural disaster risk. These and other factors could have a negative impact on the Fund's performance.

Investments in Poland. The EMEA Bond Fund may invest in fixed income securities issued by the Polish government and/or corporations economically tied to Poland. Poland is considered to have one of the healthiest economies of the post-communist countries and is currently one of the fastest growing countries within the EU. Since the fall of the communist government, Poland has steadfastly pursued a policy of liberalizing the economy and today stands out as a successful example of the transition from a centrally planned economy to a primarily capitalistic market economy. Poland is the only member of the European Union to have avoided a decline in GDP during the late 2000s recession. In 2009 Poland had the greatest GDP growth in the EU. As of November 2009 the Polish economy had not entered the global recession of the late 2000s nor had it even contracted. Investment in securities of Polish issuers involves risks not typically associated with investments in securities of issuers in developed countries. Such heightened risks include, among others, a relatively short history of democracy, expropriation and/or nationalization of assets, confiscatory taxation, less publicly available financial and other information, and potential difficulties in enforcing contractual obligations. In addition, Poland faces many economic development problems, including high unemployment, inadequate infrastructure, endemic corruption, poverty, and intensifying global competition from neighboring countries.

The securities market of Poland is considered an emerging market characterized by a small number of listed companies and a relatively illiquid secondary trading market, particularly for corporate bonds. These factors, coupled with restrictions on foreign investment and other factors, limit the supply of securities available for investment by the Fund. This will affect the rate at which the Fund is able to invest in Poland, the purchase and sale prices for such securities and the timing of purchases and sales.

The government in Poland may also restrict or control to varying degrees the ability of foreign investors to invest in securities of issuers located or operating in Poland. Moreover, governmental approval or special licenses prior to investments by foreign investors may be required and may limit the amount of investments by foreign investors in a particular industry and/or issuer.

The government of Poland may also withdraw or decline to renew a license that enables the Fund to invest in Poland. Any one of these factors could cause a decline in the value of the Fund.

Edgar Filing: WisdomTree Trust - Form 485BPOS

The Polish government may exercise substantial influence over many aspects of the private sector and may own or control many companies. Future government actions could have a significant effect on the economic conditions in Poland, which could have a

Table of Contents

negative impact on private sector companies. There is also the possibility of diplomatic developments that could adversely affect investments in Poland. The market for Polish securities is directly influenced by the flow of international capital, and economic and market conditions of certain countries, especially emerging market countries in Eastern Europe. Adverse economic conditions or developments in other emerging market countries have at times significantly affected the availability of credit in the Polish economy and resulted in considerable outflows of funds and declines in the amount of foreign currency invested in Poland. These and other factors could have a negative impact on the Fund's performance.

Investments in Romania. The EMEA Bond Fund may invest in fixed income securities issued by the Romanian government and/or corporations economically tied to Romania. A significant portion of the workforce in Eastern Europe is unionized and certain regions and sectors of these countries have experienced very high unemployment rates and periods of labor and social unrest. Despite significant recent reform and privatization, Eastern European governments continue to control a large share of economic activity in the region. These and other factors could have a negative impact on the Fund's performance.

Investments in Russia. The EMEA Bond Fund may invest in fixed income securities issued by the Russian government and/or corporations economically tied to Russia. Investments in Russia involve special considerations not typically associated with investing in countries with more established economies or currency markets. On an ongoing basis, Russia's government has been faced with the daunting task of stabilizing its domestic economy, while transforming it into a modern and efficient structure able to compete in international markets and respond to the needs of its citizens. However, to date, many of the country's economic reform initiatives have floundered as the proceeds of IMF and other economic assistance have been squandered or stolen. Instability, geopolitical tensions, poor accounting standards, inept management, pervasive corruption, insider trading and crime, and inadequate regulatory protection for the rights of investors all pose a significant risk, particularly to foreign investors. Compared to most national stock markets, the Russian securities market suffers from a variety of problems not encountered in more developed markets, which, among other things, may make obtaining accurate prices on portfolio securities more difficult than in more developed markets. Because of the recent formation of the Russian securities market as well as the underdeveloped state of the banking and telecommunications systems, settlement, clearing and registration of securities transactions are subject to significant risks. The Russian economy is heavily dependent upon the export of a range of commodities including most industrial metals, forestry products, oil, and gas. Accordingly, it is strongly affected by international commodity prices and is particularly vulnerable to any weakening in global demand for these products. As the current global economic crisis causes the commodity prices, especially the price of oil, to tumble, many sectors in the Russian economy have fallen into turmoil, threatening to push the whole economy into significant slowdown and even recession. Foreign investors also face a high degree of currency risk when investing in Russian securities and a lack of available currency hedging instruments. There is the risk the government may impose capital controls on foreign portfolio investments in the event of extreme financial or political crisis. Such capital controls would prevent the sale of a portfolio of foreign assets and the repatriation of investment income and capital. Such risks have led to heightened scrutiny of Russian liquidity conditions, which in turn creates a heightened risk of the repatriation of ruble assets by nervous foreign investors. The current economic turmoil in Russia and the effects of the current global economic crisis on the Russian economy can cause flight from the Russian ruble into United States dollars and other currencies and can force the Russian central bank to spend reserves to maintain the value of the ruble. If the Russian central bank falters in its defense of the ruble, there could be additional pressure on Russia's banks and its currency. These and other factors could have a negative impact on the Fund's performance.

Investments in Singapore. The Asia Bond Fund may invest in fixed income securities issued by the government and/or corporations economically tied to Singapore. The economy of Singapore is heavily dependent on international trade and export. Conditions that weaken demand for such products worldwide or in the Asian region could have a negative and significant impact on the Singaporean economy as a whole. In addition, the economy of Singapore may be particularly vulnerable to external market changes because of its smaller size. These and other factors could have a negative impact on the Fund's performance.

Investments in Slovakia. The EMEA Bond Fund may invest in fixed income securities issued by the Slovakian government and/or corporations economically tied to Slovakia. A significant portion of the workforce in Eastern Europe is unionized and certain regions and sectors of these countries have experienced very high unemployment rates and periods of labor and social unrest. Despite significant recent reform and privatization, Eastern European governments continue to control a large share of economic activity in the region. Government spending in these countries remains high compared to that of other European countries. These and other factors could have a negative impact on the Fund's performance.

Investments in South Africa. The EMEA Bond Fund may invest in fixed income securities issued by the South African government and/or corporations economically tied to South Africa. Investing in South Africa involves special considerations not typically associated with investing in countries with more established economies or currency markets. Although South Africa is a developing country with a solid economic infrastructure (in some regards rivaling other developed countries), certain issues, such as unemployment, access to health care, limited economic opportunity, and other financial constraints, continue to present obstacles to full economic development. Disparities of wealth, the pace and success of democratization and capital market development and religious and racial disaffection have also led to social and political unrest. South Africa's currency has recently fluctuated significantly and may be vulnerable to significant devaluation. There can be no assurance

Edgar Filing: WisdomTree Trust - Form 485BPOS

that initiatives by the government to address these issues will achieve the desired results. These and other factors could have a negative impact on the Fund's performance and increase the volatility of an investment in the Fund.

Table of Contents

Investments in South Korea. The Asia Bond Fund may invest in fixed income securities issued by the South Korean government and/or corporations economically tied to South Korea. The economy of South Korea is heavily dependent on exports and the demand for certain finished goods. South Korea's main industries include electronics, automobile production, chemicals, shipbuilding, steel, textiles, clothing, footwear, and food processing. Conditions that weaken demand for such products worldwide or in other Asian countries could have a negative impact on the South Korean economy as a whole. Relations with North Korea could also have a significant impact on the economy of South Korea. These and other factors could have a negative impact on the Fund's performance.

Investments in Taiwan. The Asia Bond Fund, may invest in fixed income securities issued by the government and/or corporations economically tied to Taiwan. The economy of Taiwan is heavily dependent on exports. Currency fluctuations, increasing competition from Asia's other emerging economies, and conditions that weaken demand for Taiwan's export products worldwide could have a negative impact on the Taiwanese economy as a whole. Concerns over Taiwan's history of political contention and its current relationship with China may also have a significant impact on the economy of Taiwan. These and other factors could have a negative impact on the Fund's performance.

Investments in Thailand. The Asia Bond Fund may invest in fixed income securities issued by the Thai government and/or corporations economically tied to Thailand. The Thai economy is dependent on commodity prices and trade with the economies of Asia, Europe and the United States. Reduction in spending by these economies on Thai products and services or negative changes in any of these economies may cause an adverse impact on the Thai economy. Certain Asian economies have experienced over-extension of credit, currency devaluations and restrictions, high unemployment, high inflation, decreased exports and economic recessions. Economic events in any one country can have a significant economic effect on the entire Asian region as well as on major trading partners outside Asia and any adverse event in the Asian markets may have a significant adverse effect on the Thai economy. The United States is Thailand's largest export market and third largest supplier, after Japan and China. Decreasing U.S. imports, new trade regulations, changes in the U.S. dollar exchange rates or a recession in the United States may have an adverse impact on the Thai economy.

Thailand has historically experienced acts of terrorism and strained international relations related to border disputes, historical animosities and other defense concerns. These situations may cause uncertainty in the Thai market and adversely affect the Thai economy. Economic and political instability have contributed to high price volatility in the Thai equity and currency markets, which could affect investments in the Fund.

The Thai economy has experienced periods of substantial inflation, currency devaluations and economic recessions, any of which may have a negative effect on the Thai economy and securities markets. Thailand has at times been destabilized by frequent government turnover and significant political changes, including military coups. Recurrence of these conditions, unanticipated or sudden changes in the political structure or other Thai political events may result in sudden and significant investment losses. These and other factors could have a negative impact on the Fund's performance.

Investments in Turkey. The EMEA Bond Fund may invest in fixed income securities issued by the Turkish government and/or corporations economically tied to Turkey. The Turkish economy is dependent on trade with certain key trading partners. Reduction in spending by these economies on Turkish products and services or negative changes in any of these economies may cause an adverse impact on the Turkish economy.

Turkey has begun a process of privatization of certain entities and industries. Historically, investors in some newly privatized entities have suffered losses due to the inability of the newly privatized company to adjust quickly to a competitive environment or to changing regulatory and legal standards, or in some cases due to re-nationalization of such privatized entities. There is no assurance that such losses will not recur. The United States is a significant trading partner of and investor in Turkey. A decrease in U.S. imports, new trade regulations, changes in the U.S. dollar exchange rates or a recession in the U.S. may have an adverse impact on the Turkish economy.

Turkey has historically experienced acts of terrorism and strained international relations related to border disputes, historical animosities and other defense concerns. These situations may cause uncertainty in the Turkish market and adversely affect the performance of the Turkish economy.

Historically, Turkey's national politics have been unpredictable and subject to influence by the military, and its government may be subject to sudden change. Disparities of wealth, the pace and success of democratization and capital market development and religious and racial disaffection have also led to social and political unrest. Unanticipated or sudden political or social developments may result in sudden and significant investment losses. Turkey has experienced periods of substantial inflation, currency devaluations and severe economic recessions, any of which may have a negative effect on the Turkish economy and securities market. Turkey has experienced a high level of debt and public spending, which may stifle Turkish economic growth, contribute to prolonged periods of recession or lower Turkey's sovereign debt rating. These and other factors could have a negative impact on the Fund's performance.

Table of Contents

Investments in Uruguay. The Latin America Bond Fund may invest in fixed income securities issued by the Uruguayan government and/or corporations economically tied to Uruguay. Uruguay is located in a part of the world that has historically been prone to natural disasters such as earthquakes and volcanoes and is economically sensitive to environmental events. Any such event could result in a significant adverse impact on the Uruguayan economy. The Uruguayan economy is affected by the economies of other Central and South American countries, some of which have experienced high interest rates, economic volatility, inflation, currency devaluations and high unemployment rates. Any adverse economic event in one country can have a significant effect on other countries of this region. These and other factors could have a negative impact on the Fund's performance.

Investments in Venezuela. The Latin America Bond Fund may invest in fixed income securities issued by the Venezuelan government and/or corporations economically tied to Venezuela. Venezuela is located in a part of the world that has historically been prone to natural disasters such as earthquakes and volcanoes and is economically sensitive to environmental events. Any such event could result in a significant adverse impact on the Venezuelan economy. The Venezuelan economy is affected by the economies of other Central and South American countries, some of which have experienced high interest rates, economic volatility, inflation, currency devaluations and high unemployment rates. Any adverse economic event in one country can have a significant effect on other countries of this region. These and other factors could have a negative impact on the Fund's performance.

Table of Contents

SHORT SALES. Each Fund may make short sales as part of its overall portfolio management strategies or to offset a potential decline in value of a security. A short sale involves the sale of a security that is borrowed from a broker or other institution to complete the sale. Short sales expose the Funds to the risk that they will be required to acquire, convert or exchange securities to replace the borrowed securities (also known as covering the short position) at a time when the securities sold short have appreciated in value, thus resulting in a loss to the Funds. If the Funds make a short sale, it must segregate or earmark assets determined to be liquid by the Advisor in accordance with procedures established by the Board of Trustees or otherwise cover its position in a permissible manner.

FUTURE DEVELOPMENTS. The Board may, in the future, authorize each Fund to invest in securities contracts and investments other than those listed in this SAI and in the Fund's Prospectus, provided they are consistent with each Fund's investment objective and do not violate any fundamental investment restrictions or policies.

PROXY VOTING POLICY

The Trust has adopted as its proxy voting policies for the Funds the proxy voting guidelines of the Sub-Adviser. The Trust has delegated to the Sub-Adviser the authority and responsibility for voting proxies on the portfolio securities held by each Fund. The remainder of this section discusses each Fund's proxy voting guidelines and the Sub-Adviser's role in implementing such guidelines.

The Sub-Adviser, through its participation in the Bank of New York Mellon (BNY Mellon) Corporation's a Proxy Policy Committee (PPC), has adopted a Proxy Voting Policy, related procedures, and voting guidelines which are applied to those client accounts over which it has been delegated the authority to vote proxies. In voting proxies, the Sub-Adviser seeks to act solely in the best financial and economic interest of the applicable client. The Sub-Adviser will carefully review proposals that would limit shareholder control or could affect the value of a client's investment. It will generally oppose proposals designed to insulate an issuer's management unnecessarily from the wishes of a majority of shareholders. It will generally support proposals designed to provide management with short-term insulation from outside influences so as to enable management to negotiate effectively and otherwise achieve long-term goals. On questions of social responsibility where economic performance does not appear to be an issue, the Sub-Adviser will attempt to ensure that management reasonably responds to the social issues. Responsiveness will be measured by management's efforts to address the proposal including, where appropriate, assessment of the implications of the proposal to the ongoing operations of the company. The PPC will pay particular attention to repeat issues where management has failed in its commitment in the intervening period to take action on issues. The Sub-Adviser recognizes its duty to vote proxies in the best interests of its clients. The Sub-Adviser seeks to avoid material conflicts of interest through its participation in the PPC, which applies detailed, pre-determined proxy voting guidelines (the Voting Guidelines) in an objective and consistent manner across client accounts, based on internal and external research and recommendations provided by a third party vendor, and without consideration of any client relationship factors. Further, the Sub-Adviser and its affiliates engage a third party as an independent fiduciary to vote all proxies for Sub-Adviser securities and affiliated mutual fund securities.

Proxy voting proposals are reviewed, categorized, analyzed and voted in accordance with the Voting Guidelines. These guidelines are reviewed periodically and updated as necessary to reflect new issues and any changes in our policies on specific issues. Items that can be categorized under the Voting Guidelines will be voted in accordance with any applicable guidelines or referred to the Proxy Voting Committee, if the applicable guidelines so require. Proposals that cannot be categorized under the Voting Guidelines will be referred to the Proxy Voting Committee for discussion and vote. Additionally, the Proxy Voting Committee may review any proposal where it has identified a particular company, industry or issue for special scrutiny. With regard to voting proxies of foreign companies, the Sub-Adviser may weigh the cost of voting and potential inability to sell the securities (which may occur during the voting process) against the benefit of voting the proxies to determine whether or not to vote.

Table of Contents

In evaluating proposals regarding incentive plans and restricted stock plans, the Proxy Voting Committee typically employs a shareholder value transfer model. This model seeks to assess the amount of shareholder equity flowing out of the company to executives as options are exercised. After determining the cost of the plan, the Proxy Voting Committee evaluates whether the cost is reasonable based on a number of factors, including industry classification and historical performance information. The Proxy Voting Committee generally votes against proposals that permit the repricing or replacement of stock options without shareholder approval.

A complete copy of the Proxy Voting Policy may be obtained by calling 1-866-909-9473; or writing to: WisdomTree Trust, c/o ALPS Distributors, Inc., 1290 Broadway, Suite 1100, Denver, Colorado 80203.

The Trust is required to disclose annually each Fund's complete proxy voting record on Form N-PX covering the period from July 1 of one year through June 30 of the next and to file Form N-PX with the Securities and Exchange Commission (SEC) no later than August 31 of each year. When available, the current Form N-PX for each Fund may be obtained at no charge upon request by calling 1-866-909-9473 or through the Trust's website at www.wisdomtree.com. When available, the Fund's Form N-PX will also be available on the SEC's website at www.sec.gov.

PORTFOLIO HOLDINGS DISCLOSURE POLICIES AND PROCEDURES

The Trust has adopted a Portfolio Holdings Policy (the Policy) designed to govern the disclosure of each Fund's portfolio holdings and the use of material non-public information about each Fund's holdings. The Policy applies to all officers, employees, and agents of the Funds, including WisdomTree Asset Management and any sub-adviser (together, the Advisers). The Policy is designed to ensure that the disclosure of information about each Fund's portfolio holdings is consistent with applicable legal requirements and otherwise in the best interest of the Funds.

As ETFs, information about each Fund's portfolio holdings is made available on a daily basis in accordance with the provisions of any Order of the SEC applicable to each Fund, regulations of the Fund's Listing Exchange and other applicable SEC regulations, orders and no-action relief. Such information typically reflects all or a portion of each Fund's anticipated portfolio holdings as of the next Business Day. A Business Day with respect to each Fund is any day on which the national securities exchange on which each Fund is listed for trading (each a Listing Exchange) is open for business. This information is used in connection with the Creation and Redemption process and is disseminated on a daily basis through the facilities of the Listing Exchange, the National Securities Clearing Corporation (NSCC) and/or third party service providers.

Each Fund may disclose on the Fund's website at the start of each Business Day the identities and quantities of the securities and other assets held by the Fund that will form the basis of the Fund's calculation of its NAV on that Business Day. The portfolio holdings so disclosed will be based on information as of the close of business on the prior Business Day and/or trades that have been completed prior to the opening of business on that Business Day and that are expected to settle on that Business Day.

Daily access to each Fund's portfolio holdings with no lag time is permitted to personnel of the Advisers, the Fund's distributor and the Fund's administrator, custodian and accountant and other agents or service providers of the Trust who have need of such information in connection with the ordinary course of their respective duties to the Funds. The Fund's Chief Compliance Officer may authorize disclosure of portfolio holdings.

Each Fund may disclose its complete portfolio holdings or a portion of its portfolio holdings online at www.wisdomtree.com. Online disclosure of such holdings is publicly available at no charge.

Each Fund will disclose its complete portfolio holdings schedule in public filings with the SEC on a quarterly basis, based on the Fund's fiscal year, within 60 days of the end of the quarter, and will provide that information to shareholders, as required by federal securities laws and regulations thereunder.

No person is authorized to disclose the Funds' portfolio holdings or other investment positions except in accordance with the Policy. The Trust's Board reviews the implementation of the Policy on a periodic basis.

INVESTMENT LIMITATIONS

The following fundamental investment policies and limitations supplement those set forth in the Funds' Prospectus. Unless otherwise noted, whenever a fundamental investment policy or limitation states a maximum percentage of a Fund's assets that may be invested in any security or other asset, or sets forth a policy regarding quality standards, such standard or percentage limitation will be determined immediately after and as a result of the Fund's acquisition of such security or other asset. Accordingly, other than with respect to a Fund's limitations on borrowings, any subsequent change in values, net assets, or other circumstances will not be considered when determining whether the investment complies with the Fund's investment policies and limitations.

Table of Contents

Each Fund's fundamental investment policies cannot be changed without the approval of the holders of a majority of that Fund's outstanding voting securities as defined under the 1940 Act. Each Fund, however, may change the non-fundamental investment policies described below, and its investment objective, without a shareholder vote provided that it obtains Board approval and notifies its shareholders with at least 60 days' prior written notice of any such change.

Fundamental Policies. The following investment policies and limitations are fundamental and may NOT be changed without shareholder approval.

Each Fund, as a fundamental investment policy, may not:

Senior Securities

Issue senior securities, except as permitted under the 1940 Act.

Borrowing

Borrow money, except as permitted under the 1940 Act.

Underwriting

Act as an underwriter of another issuer's securities, except to the extent that each Fund may be considered an underwriter within the meaning of the Securities Act of 1933 in the disposition of portfolio securities.

Concentration

Purchase the securities of any issuer (other than securities issued or guaranteed by the U.S. government, or any non-U.S. government, or their respective agencies or instrumentalities) if, as a result, more than 25% of the Fund's total assets would be invested in the securities of companies whose principal business activities are in the same industry.

Real Estate

Purchase or sell real estate unless acquired as a result of ownership of securities or other instruments (but this shall not prevent the Fund from investing in securities or other instruments backed by real estate, real estate investment trusts or securities of companies engaged in the real estate business).

Commodities

Purchase or sell physical commodities unless acquired as a result of ownership of securities or other instruments (but this shall not prevent each Fund from purchasing or selling options and futures contracts or from investing in securities or other instruments backed by physical commodities).

Loans

Lend any security or make any other loan except as permitted under the 1940 Act.

This means that no more than 33 1/3% of its total assets would be lent to other parties. This limitation does not apply to purchases of debt securities or to repurchase agreements, or to acquisitions of loans, loan participations or other forms of debt instruments, permissible under each Fund's investment policies.

Non-Fundamental Policies. The following investment policy is not fundamental and may be changed without shareholder approval.

Under normal circumstances, the Asia Bond Fund will invest at least 80% of its net assets in debt instruments, such as government and corporate bonds, notes and other obligations of governments and corporations economically tied to Asian countries and are denominated in Asian currencies or U.S. dollars, as well as certain derivatives described herein.

Edgar Filing: WisdomTree Trust - Form 485BPOS

Under normal circumstances, the Latin American Bond Fund will invest at least 80% of its net assets in debt instruments, such as government and corporate bonds, notes and other obligations of governments and corporations economically tied to Latin American countries and are denominated in Latin American currencies or U.S. dollars, as well as certain derivatives described herein.

Under normal circumstances, the EMEA Bond Fund will invest at least 80% of its net assets in debt instruments, such as government and corporate bonds, notes and other obligations of governments and corporations economically tied to developing countries in Europe, the Middle East and Africa and are denominated in local currencies or U.S. dollars, as well as certain derivatives described herein.

If, subsequent to an investment, the 80% requirement is no longer met, a Fund's future investments will be made in a manner that will bring the Fund into compliance with this policy.

CONTINUOUS OFFERING

The method by which Creation Unit Aggregations of shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Unit Aggregations of shares are issued and sold by the Funds on an ongoing basis, at any point a distribution, as such term is used in the Securities Act, may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

Table of Contents

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Unit Aggregations after placing an order with the Funds distributor, breaks them down into constituent shares, and sells such shares directly to customers, or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not underwriters but are effecting transactions in shares, whether or not participating in the distribution of shares, generally are required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. Firms that incur a prospectus delivery obligation with respect to shares of the Funds are reminded that, pursuant to Rule 153 under the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with the sale on the Listing Exchange is satisfied by the fact that the prospectus is available at the Listing Exchange upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

MANAGEMENT OF THE TRUST

Board Responsibilities. The Board of Trustees is responsible for overseeing the management and affairs of the Funds and the Trust. The Board has considered and approved contracts, as described herein, under which certain companies provide essential management and administrative services to the Trust. Like most ETFs, the day-to-day business of the Trust, including the day-to-day management of risk, is performed by third-party service providers, such as the Adviser, Sub-Adviser, Distributor and Administrator. The Board is responsible for overseeing the Trust's service providers and, thus, has oversight responsibility with respect to the risk management performed by those service providers. Risk management seeks to identify and eliminate or mitigate the potential effects of risks, i.e., events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Trust or Funds. Under the overall supervision of the Board and the Audit Committee (discussed in more detail below), the service providers to the Funds employ a variety of processes, procedures and controls to identify risks relevant to the operations of the Trust and the Funds to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Each service provider is responsible for one or more discrete aspects of the Trust's business (e.g., the Sub-Adviser is responsible for the day-to-day management of each Fund's portfolio investments) and, consequently, for managing the risks associated with that activity.

The Board's role in risk management oversight begins before the inception of a fund, at which time the Fund's Adviser presents the Board with information concerning the investment objectives, strategies and risks of the Fund. Additionally, the Fund's Adviser and Sub-Adviser provides the Board with an overview of, among other things, its investment philosophy, brokerage practices and compliance infrastructure. Thereafter, the Board oversees the risk management of the Fund's operations, in part, by requesting periodic reports from and otherwise communicating with various personnel of the Fund and its service providers, including the Trust's Chief Compliance Officer and the Fund's independent accountants. The Board and, with respect to identified risks that relate to its scope of expertise, the Audit Committee, oversee efforts by management and service providers to manage risks to which the Fund may be exposed.

The Board is responsible for overseeing the nature, extent and quality of the services provided to the Funds by the Adviser and receives information about those services at its regular meetings. In addition, on at least an annual basis, in connection with its consideration of whether to renew any Advisory Agreements and Sub-Advisory Agreements with the Adviser and Sub-Adviser, respectively, the Board meets with the Adviser and Sub-Adviser to review such services. Among other things, the Board regularly considers the Adviser's and Sub-Adviser's adherence to each Fund's investment restrictions and compliance with various Fund policies and procedures and with applicable securities regulations. The Board also reviews information about each Fund's performance and investments.

The Trust's Chief Compliance Officer meets regularly with the Board to review and discuss compliance and other issues. At least annually, the Trust's Chief Compliance Officer provides the Board with a report reviewing the adequacy and effectiveness of the Trust's policies and procedures and those of its service providers, including the Adviser and Sub-Adviser. The report addresses the operation of the policies and procedures of the Trust and each service provider since the date of the last report; material changes to the policies and procedures since the date of the last report; any recommendations for material changes to the policies and procedures; and material compliance matters since the date of the last report.

The Board receives reports from the Trust's service providers regarding operational risks, portfolio valuation and other matters. Annually, the independent registered public accounting firm reviews with the Audit Committee its audit of the Trust's financial statements, focusing on major areas of risk encountered by the Trust and noting any significant deficiencies or material weaknesses in the Trust's internal controls.

Table of Contents

The Board recognizes that not all risks that may affect the Funds can be identified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve each Fund's goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, despite the periodic reports the Board receives and the Board's discussions with the service providers to the Funds, it may not be made aware of all of the relevant information of a particular risk. Most of the Trust's investment management and business affairs are carried out by or through the Funds' Adviser, Sub-Adviser and other service providers each of which has an independent interest in risk management but whose policies and the methods by which one or more risk management functions are carried out may differ from the Trust's and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls. As a result of the foregoing and other factors, the Board's risk management oversight is subject to substantial limitations.

Members of the Board and Officers of the Trust. Set forth below are the names, birth years, position with the Trust, term of office, and the principal occupations and other directorships for a minimum of the last five years of each of the persons currently serving as members of the Board and as Executive Officers of the Trust. Also included below is the term of office for each of the Executive Officers of the Trust. The members of the Board serve as Trustees for the life of the Trust or until retirement, removal, or their office is terminated pursuant to the Trust's Declaration of Trust.

The Chairman of the Board of Trustees, Victor Ugolyn, is not an interested person of the Funds as that term is defined in the 1940 Act. The Board of Trustees is comprised of a super-majority (75 percent) of trustees who are not interested persons of the Funds (i.e., independent trustees). There is an Audit Committee and a Governance and Nominating Committee of the Board, each of which is chaired by an independent trustee and comprised solely of independent trustees. The Committee chair for each is responsible for running the Committee meeting, formulating agendas for those meetings, and coordinating with management to serve as a liaison between the independent trustees and management on matters within the scope of the responsibilities of the Committee as set forth in its Board-approved charter. The Funds have determined that this leadership structure is appropriate given the specific characteristics and circumstances of the Funds. The Funds made this determination in consideration of, among other things, the fact that the independent trustees of the Funds constitute a super-majority of the Board, the assets under management of the Funds, the number of Funds overseen by the Board, the total number of trustees on the Board, and the fact that an independent trustee serves as Chair of the Board.

Officer,

2009-present

- * Chair of the Audit Committee.
- ** Chair of the Governance and Nominating Committee.
- **** Elected by and serves at the pleasure of the Board.
- + As of December 31, 2009.

Table of Contents

Audit Committee. Each Independent Trustee is a member of the Trust's Audit Committee (the "Audit Committee"). The principal responsibilities of the Audit Committee are the appointment, compensation and oversight of the Trust's independent auditors, including the resolution of disagreements regarding financial reporting between Trust management and such independent auditors. The Audit Committee's responsibilities include, without limitation, to (i) oversee the accounting and financial reporting processes of the Trust and its internal control over financial reporting and, as the Committee deems appropriate, to inquire into the internal control over financial reporting of certain third-party service providers; (ii) oversee the quality and integrity of the Funds' financial statements and the independent audits thereof; (iii) oversee, or, as appropriate, assist Board oversight of, the Trust's compliance with legal and regulatory requirements that relate to the Trust's accounting and financial reporting, internal control over financial reporting and independent audits; (iv) approve prior to appointment the engagement of the Trust's independent auditors and, in connection therewith, to review and evaluate the qualifications, independence and performance of the Trust's independent auditors; and (v) act as a liaison between the Trust's independent auditors and the full Board. The Board of the Trust has adopted a written charter for the Audit Committee. The Independent Trustees' independent legal counsel assists the Audit Committee in connection with these duties. During the fiscal year ended August 31, 2010, the Audit Committee held six meetings.

Governance and Nominating Committee. Each Independent Trustee is also a member of the Trust's Governance and Nominating Committee. The principal responsibilities of the Governance and Nominating Committee are to (i) oversee Fund governance matters and (ii) identify individuals qualified to serve as Independent Trustees of the Trust and to recommend its nominees for consideration by the full Board. While the Governance and Nominating Committee is solely responsible for the selection and nomination of the Trust's Independent Trustees, the Nominating Committee may consider nominations for the office of Trustee made by Trust stockholders as it deems appropriate. The Governance and Nominating Committee considers nominees recommended by shareholders if such nominees are submitted in accordance with Rule 14a-8 of the Securities Exchange Act of 1934 (the "1934 Act"), in conjunction with a shareholder meeting to consider the election of Trustees. Trust stockholders who wish to recommend a nominee should send nominations to the Secretary of the Trust that include biographical information and set forth the qualifications of the proposed nominee. During the fiscal year ended August 31, 2010, the Nominating Committee held one meeting.

Individual Trustee Qualifications

The Trust has concluded that each of the Trustees should serve on the Board because of their ability to review and understand information about the Trust and the Funds provided to them by management, to identify and request other information they may deem relevant to the performance of their duties, to question management and other service providers regarding material factors bearing on the management and administration of the Funds, and to exercise their business judgment in a manner that serves the best interests of the Funds' shareholders. The Trust has concluded that each of the Trustees should serve as a Trustee based on their own experience, qualifications, attributes and skills as described below.

The Trust has concluded that Mr. Steinberg should serve as trustee of the Funds because of the experience he has gained as president and chief executive officer of WisdomTree Investments and Director of WisdomTree Investments, Inc., his knowledge of and experience in the financial services industry, and the experience he has gained serving as trustee of the Funds since 2005.

The Trust has concluded that Mr. Barton should serve as trustee of the Funds because of the experience he gained working as both a practicing attorney and in a business capacity for several public companies, and the experience he has gained serving as trustee of the Funds since 2006.

The Trust has concluded that Ms. Massaro should serve as trustee of the Funds because of the experience she has gained as a law professor, dean and advisor at various universities, and the experience she has gained serving as trustee of the Fund since 2006.

The Trust has concluded that Mr. Ugolyn should serve as trustee of the Funds because of the experience he gained as chief executive officer of a firm specializing in financial services, his experience in and knowledge of the financial services industry, his service as chairman for another mutual fund family, and the experience he has gained serving as trustee of the Funds since 2006.

Table of Contents

Fund Shares Owned by Board Members. The following table shows the dollar amount range of each Trustee's beneficial ownership of shares of the Funds and each other series of the Trust as of the end of the most recently completed calendar year. Because the Funds are new, as of the date of this SAI, none of the Trustees beneficially own shares of the Funds. Dollar amount ranges disclosed are established by the SEC.

Beneficial ownership is determined in accordance with Rule 16a-1(a)(2) under the 1934 Act. The Trustees and officers of the Trust own less than 1% of the outstanding shares of the Trust.

Name of Trustee	Name of Fund	Dollar Range of Equity Securities in the Fund	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies
Interested Trustee			
Jonathan L. Steinberg	Asia Bond Fund	None	Over \$100,000

Toni M. Massaro	\$ 25,340	None	None	\$ 105,622
Victor Ugolyn	\$ 38,029	None	None	\$ 156,331

Control Persons and Principal Holders of Securities.

Because the Funds are new, as of the date of this SAI, the Funds do not have any beneficial owners to report.

Investment Adviser. The Adviser, WisdomTree Asset Management, Inc., serves as investment adviser to the Funds pursuant to an Investment Advisory Agreement between the Trust and the Adviser. WisdomTree Asset Management is a Delaware corporation registered as an investment adviser under the Investment Advisers Act of 1940, as amended (the Advisers Act), and has offices located at 380 Madison Avenue 2nd Floor, New York, NY 10017.

Under the Investment Advisory Agreement, WisdomTree Asset Management has overall responsibility for the general management and administration of the Trust. WisdomTree Asset Management provides an investment program for the Funds. WisdomTree Asset Management also arranges for sub-advisory, transfer agency, custody, fund administration and all other non-distribution-related services necessary for the Funds to operate.

Edgar Filing: WisdomTree Trust - Form 485BPOS

The Funds pay WisdomTree Asset Management the Management Fee indicated below.

Name of Fund	Management Fee
Asia Bond Fund	0.55%
Latin America Bond Fund	
EMEA Bond Fund	

Table of Contents

With respect to each Fund, WisdomTree Asset Management agrees to pay all expenses of the Trust, except for: (i) brokerage expenses and other expenses (such as stamp taxes) connected with the execution of portfolio transactions or in connection with creation and redemption transactions; (ii) legal fees or expenses in connection with any arbitration, litigation or pending or threatened arbitration or litigation, including any settlements in connection therewith; (iii) compensation and expenses of the Trustees of the Trust who are not officers, directors/trustees, partners or employees of the Adviser or its affiliates (the Independent Trustees); (iv) compensation and expenses of counsel to the Independent Trustees; (v) compensation and expenses of the Trust's chief compliance officer; (vi) extraordinary expenses; (vii) distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act; and (viii) the advisory fee payable to the Adviser hereunder. The Sub-Adviser has agreed to pay the fees owed to BNY Mellon for providing custody, administration and transfer agency services. Pursuant to a separate contractual arrangement with respect to each Fund through August 31, 2011, WisdomTree Asset Management arranges for the provision of chief compliance officer (CCO) services and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees, in exchange for a fee paid by each Fund of up to 0.0044% of that Fund's average daily net assets. WisdomTree Asset Management provides CCO services to the Trust.

The Investment Advisory Agreement with respect to each Fund continues in effect for two years from its effective date, and thereafter is subject to annual approval by (i) the Board of Trustees of the Trust or (ii) the vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund, provided that in either event such continuance is also approved by a vote of a majority of the Trustees of the Trust who are not interested persons (as defined in the 1940 Act) of the Fund, by a vote cast in person at a meeting called for the purpose of voting on such approval. If the shareholders of any Fund fail to approve the Investment Advisory Agreement, WisdomTree Asset Management may continue to serve in the manner and to the extent permitted by the 1940 Act and rules and regulations thereunder. The Investment Advisory Agreement with respect to any Fund is terminable without any penalty, by vote of the Board of Trustees of the Trust or by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of that Fund, or by WisdomTree Asset Management, in each case on not less than 30 days nor more than 60 days prior written notice to the other party; provided, that a shorter notice period shall be permitted for a Fund in the event its shares are no longer listed on a national securities exchange. The Investment Advisory Agreement will terminate automatically and immediately in the event of its assignment (as defined in the 1940 Act).

Sub-Adviser. Mellon Capital Management Corporation (Mellon Capital), a registered investment adviser, with its principal office located at 50 Fremont Street, San Francisco, CA 94105, serves as Sub-Adviser for the Asia Bond Fund. As of November 30, 2010, Mellon Capital managed approximately \$198 billion for institutions. The Sub-Adviser chooses the Asia Bond Fund's portfolio investments and places orders to buy and sell the Asia Bond Fund's portfolio investments. WisdomTree Asset Management pays the Sub-Adviser for providing sub-advisory services to the Asia Bond Fund out of its Management Fee.

With respect to Asia Bond Fund, WisdomTree Asset Management pays the Sub-Adviser a fee equal to one-half of the fee paid to WisdomTree Asset Management for providing sub-advisory services to such Fund as described below.

The Sub-Adviser believes that it may perform sub-advisory and related services for the Trust without violating applicable banking laws or regulations. However, the legal requirements and interpretations about the permissible activities of banks and their affiliates may change in the future. These changes could prevent the Sub-Adviser from continuing to perform services for the Trust. If this happens, the Board would consider selecting other qualified firms.

The Investment Sub-Advisory Agreement with respect to the Asia Bond Fund continues in effect for two years from its effective date, and thereafter is subject to annual approval by (i) the Board of Trustees of the Trust or (ii) the vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Asia Bond Fund, provided that in either event such continuance is also approved by a vote of a majority of the Trustees of the Trust who are not interested persons (as defined in the 1940 Act) of the Asia Bond Fund, by a vote cast in person at a meeting called for the purpose of voting on such approval. If the shareholders of the Asia Bond Fund fail to approve the Investment Sub-Advisory Agreement, WisdomTree Asset Management may continue to serve in the manner and to the extent permitted by the 1940 Act and rules and regulations thereunder. The Investment Sub-Advisory Agreement with respect to the Asia Bond Fund is terminable without any penalty, by vote of the Board of Trustees of the Trust or by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Asia Bond Fund, or by WisdomTree Asset Management, in each case on not less than 30 days nor more than 60 days prior written notice to the other party; provided, that a shorter notice period shall be permitted for the Asia Bond Fund in the event its shares are no longer listed on a national securities exchange. The Investment Sub-Advisory Agreement will terminate automatically and immediately in the event of its assignment (as defined in the 1940 Act).

Portfolio Managers. Mellon Capital utilizes a team of investment professionals acting together to manage the assets of the Asia Bond Fund. The team meets regularly to review portfolio holdings and to discuss purchase and sale activity. The team adjusts holdings in the Asia Bond Fund's portfolio as it deems appropriate in the pursuit of the Fund's investment objective. The individual members of the team who are primarily responsible for the day-to-day management of the Asia Bond Fund's portfolio are listed below.

Edgar Filing: WisdomTree Trust - Form 485BPOS

David C. Kwan has been a Managing Director of Mellon Capital since 2000. He has also been the Head of Fixed Income Management Group since 1994. He received his M.B.A. from the University of California at Berkeley in 1990. Mr. Kwan has 20 years of investment experience.

Lisa Mears O Connor, CFA, has been a Managing Director of Mellon Capital since 2010. She manages Mellon Capital's active fixed income team. She received her M.B.A from the University of California at Berkeley in 2002. Ms. Mears O Connor attained the Chartered Financial Analyst (CFA) designation in 1998. Ms. Mears O Connor has over 17 years of investment experience.

As of August 31, 2010, the team managed eight other registered investment companies with approximately \$3.1 billion in assets; 26 pooled investment vehicles with approximately \$14.1 billion in assets; and 25 other accounts with approximately \$4.9 billion in assets.

Portfolio Manager Fund Ownership. As of the date hereof, none of the portfolio managers owned shares of the Asia Bond Fund.

Portfolio Manager Compensation

Portfolio Manager Compensation. Each portfolio manager receives compensation under a compensation plan directed by Mellon Capital. The primary objectives of the Mellon Capital compensation plan are to:

Motivate and reward continued growth and profitability

Attract and retain high-performing individuals critical to the on going success of Mellon Capital

Motivate and reward superior business/investment performance

Create an ownership mentality for all plan participants

The investment professionals' cash compensation is comprised primarily of a market-based base salary and (variable) incentives (cash and deferred). An investment professional's base salary is determined by the employee's experience and performance in the role, taking into account the ongoing compensation benchmark analyses. A portfolio manager's base salary is generally a fixed amount that may change as a result of an annual review, upon assumption of new duties, or when a market adjustment of the position occurs. Funding for the Mellon Capital Annual and Long Term Incentive Plan is through a pre-determined fixed percentage of overall Mellon Capital profitability. Therefore, all bonus awards are based initially on Mellon Capital's financial performance. Annual incentive opportunities are pre-established for each individual, expressed as a percentage of base salary (target awards). These targets are derived based on a review of competitive market data for each position annually. Annual awards are determined by applying multiples to this target award. Awards are 100% discretionary. Factors considered in awards include individual performance, team performance, investment performance of the associated portfolio(s) including both short- and long-term returns and qualitative behavioral factors. Other factors considered in determining the award are the asset size and revenue growth/retention of the products managed. Awards are paid partially in cash with the balance deferred through the Long Term Incentive Plan.

These positions that participate in the Long Term Incentive Plan have a high level of accountability and a large impact on the success of the business due to the position's scope and overall responsibility. This plan provides for an annual award, payable in cash after a three-year cliff vesting period as well as a grant of BNY Mellon Restricted Stock for senior level roles.

Mellon Capital's portfolio managers responsible for managing mutual funds are paid by Mellon Capital and not by the mutual funds. The same methodology described above is used to determine portfolio manager compensation with respect to the management of mutual funds and other accounts. Mutual fund portfolio managers are also eligible for the standard retirement benefits and health and welfare benefits available to all Mellon Capital employees. Certain portfolio managers may be eligible for additional retirement benefits under several supplemental retirement plans that Mellon Capital provides to restore dollar-for-dollar the benefits of management employees that had been cut back solely as a result of certain limits due to the tax laws. These plans are structured to provide the same retirement benefits as the standard retirement benefits. In addition, mutual fund portfolio managers whose compensation exceeds certain limits may elect to defer a portion of their salary and/or bonus under Bank of New York Mellon Deferred Compensation Plan for Employees.

Table of Contents

Description of Material Conflicts of Interest

Because the portfolio managers manage multiple portfolios for multiple clients, the potential for conflicts of interest exists. Each portfolio manager generally manages portfolios having substantially the same investment style as the Funds. However, the portfolios managed by a portfolio manager may not have portfolio compositions identical to those of the Funds managed by the portfolio manager due, for example, to specific investment limitations or guidelines present in some portfolios or accounts, but not others. The portfolio managers may purchase securities for one portfolio and not another portfolio, and the performance of securities purchased for one portfolio may vary from the performance of securities purchased for other portfolios. A portfolio manager may place transactions on behalf of other accounts that are directly or indirectly contrary to investment decisions made on behalf of the Funds, or make investment decisions that are similar to those made for the Funds, both of which have the potential to adversely impact the Funds depending on market conditions. For example, a portfolio manager may purchase a security in one portfolio while appropriately selling that same security in another portfolio. In addition, some of these portfolios have fee structures that are or have the potential to be higher than the advisory fees paid by the Fund, which can cause potential conflicts in the allocation of investment opportunities between the Funds and the other accounts. However, the compensation structure for portfolio managers does not generally provide incentive to favor one account over another because that part of a manager's bonus based on performance is not based on the performance of one account to the exclusion of others. There are many other factors considered in determining the portfolio manager's bonus and there is no formula that is applied to weight the factors listed. In addition, current trading practices do not allow Mellon Capital to intentionally favor one portfolio over another as trades are executed or as trade orders are received. Portfolio rebalancing dates also generally vary between fund families. Program trades created from the portfolio rebalance are executed at market close.

Code of Ethics. The Trust, WisdomTree Asset Management, the Sub-Adviser and the Funds' distributor have each adopted a Code of Ethics pursuant to Rule 17j-1 under the 1940 Act. Each Code of Ethics permits personnel subject to that Code of Ethics to invest in securities for their personal investment accounts, subject to certain limitations, including securities that may be purchased or held by the Funds. Each Code of Ethics is on public file with, and is available from, the SEC.

Administrator, Custodian, Transfer Agent and Securities Lending Agent. The Bank of New York Mellon (BNYM) serves as administrator, custodian and transfer agent for each Fund. BNYM's principal address is One Wall Street, New York, New York 10286. Under the Fund Administration and Accounting Agreement with the Trust, BNYM provides necessary administrative, legal, tax, accounting services and financial reporting for the maintenance and operations of the Trust and the Funds. In addition, BNYM makes available the office space, equipment, personnel and facilities required to provide such services. Under the custody agreement with the Trust, BNYM maintains in separate accounts cash, securities and other assets of the Trust and the Funds, keeps all necessary accounts and records, and provides other services. BNYM is required, upon the order of the Trust, to deliver securities held by BNYM and to make payments for securities purchased by the Trust for the Funds. Also, under a Delegation Agreement, BNYM is authorized to appoint certain foreign custodians or foreign custody managers for Fund investments outside the United States. Pursuant to a Transfer Agency and Service Agreement with the Trust, BNYM acts as transfer agent for the Funds' authorized and issued shares of beneficial interest, and as dividend disbursing agent of the Trust. As compensation for the foregoing services, BNYM receives certain out-of-pocket costs, transaction fees and asset-based fees which are accrued daily and paid monthly by the Trust from the Trust's custody account with BNYM. BNYM serves as the Funds' securities lending agent. As compensation for providing such services, BNYM receives a portion of the income earned by the Funds on collateral investments in connection with the lending program.

Table of Contents

Distributor. ALPS Distributors, Inc. serves as Distributor for the Trust. The principal address of the Distributor is 1290 Broadway, Suite 1100, Denver, Colorado 80203. The Distributor has entered into a Distribution Agreement with the Trust pursuant to which it distributes shares of each Fund. The Distribution Agreement will continue for two years from its effective date and is renewable annually. Shares are continuously offered for sale by the Funds through the Distributor only in Creation Unit Aggregations, as described in the applicable Prospectus and below in the Creation and Redemption of Creation Units Aggregations section. Shares in less than Creation Unit Aggregations are not distributed by the Distributor. The Distributor will deliver the applicable Prospectus and, upon request, this SAI to persons purchasing Creation Unit Aggregations and will maintain records of both orders placed with it and confirmations of acceptance furnished by it. The Distributor is a broker-dealer registered under the 1934 Act and a member of the Financial Industry Regulatory Authority (FINRA). The Distributor is not affiliated with WisdomTree Investments, WisdomTree Asset Management, or any stock exchange.

The Distribution Agreement for the Funds will provide that it may be terminated at any time, without the payment of any penalty, on at least 60 days prior written notice to the other party (i) by vote of a majority of the Independent Trustees or (ii) by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of each Fund. The Distribution Agreement will terminate automatically in the event of its assignment (as defined in the 1940 Act).

The Distributor may also enter into agreements with securities dealers (Soliciting Dealers) who will solicit purchases of Creation Unit Aggregations of shares. Such Soliciting Dealers may also be Authorized Participants (as defined below) or DTC Participants (as defined below).

Intermediary Compensation. WisdomTree Asset Management or its affiliates, out of their own resources and not out of Fund assets (*i.e.*, without additional cost to the Funds or its shareholders), may pay certain broker-dealers, banks and other financial intermediaries (Intermediaries) for certain activities related to the Funds, including marketing and education support and the sale of Fund shares. These arrangements are sometimes referred to as revenue sharing arrangements. Revenue sharing arrangements are not financed by the Funds, and thus, do not result in increased Fund expenses. They are not reflected in the fees and expenses listed in the fees and expenses sections of each Fund's prospectus and they do not change the price paid by investors for the purchase of the Fund's shares or the amount received by a shareholder as proceeds from the redemption of Fund shares.

Such compensation may be paid to Intermediaries that provide services to each Fund, including marketing and education support (such as through conferences, webinars and printed communications). Such compensation may also be paid to Intermediaries for inclusion of the Funds on a sales list, including a preferred or select sales list, in other sales programs. WisdomTree Asset Management periodically assesses the advisability of continuing to make these payments.

Payments to an Intermediary may be significant to the Intermediary, and amounts that Intermediaries pay to your adviser, broker or other investment professional, if any, may also be significant to such adviser, broker or investment professional. Because an Intermediary may make decisions about which investment options it will make available or recommend, or what services to provide in connection with various products, based on payments it receives or is eligible to receive, such payments create conflicts of interest between the Intermediary and its clients. For example, these financial incentives may cause the Intermediary to recommend the Funds over other investments. The same conflict of interest exists with respect to your financial adviser, broker or investment professionals if he or she receives similar payments from his or her Intermediary firm.

WisdomTree Asset Management has entered into an arrangement with Advisors Asset Management, Inc. (AAM) for the marketing and education support and promotion of each Funds shares in the independent broker-dealer channel in exchange for cash compensation based on the success of AAM's efforts. Specifically, AAM provides marketing and education support and promotes the Funds to broker-dealers and investment advisers who in turn purchase fund shares on behalf of their clients or recommend the purchase of Fund shares to their clients. Upon termination of the agreement the WisdomTree Asset Management will make additional payments to AAM based upon a number of criteria, including the overall success of AAM's efforts.

Intermediary information is only current as of the date of this SAI. Please contact your adviser, broker or other investment professional for more information regarding any payments his or her Intermediary firm may receive. Any payments made by WisdomTree Asset Management or its affiliates to an Intermediary may create the incentive for an Intermediary to encourage customers to buy shares of WisdomTree Funds.

If you have any additional questions, please call 1-866-909-9473.

Table of Contents

BROKERAGE TRANSACTIONS

The Sub-Adviser assumes general supervision over placing orders on behalf of each Fund for the purchase and sale of portfolio securities. In selecting the brokers or dealers for any transaction in portfolio securities, the Sub-Adviser's policy is to make such selection based on factors deemed relevant, including but not limited to, the breadth of the market in the security, the price of the security, the reasonableness of the commission or mark-up or mark-down, if any, execution capability, settlement capability, back office efficiency and the financial condition of the broker or dealer, both for the specific transaction and on a continuing basis. The overall reasonableness of brokerage commissions paid is evaluated by each Sub-Adviser based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services. Brokers may also be selected because of their ability to handle special or difficult executions, such as may be involved in large block trades, less liquid securities, broad distributions, or other circumstances. The Sub-Adviser does not consider the provision or value of research, products or services a broker or dealer may provide, if any, as a factor in the selection of a broker or dealer or the determination of the reasonableness of commissions paid in connection with portfolio transactions. The Trust has adopted policies and procedures that prohibit the consideration of sales of a Fund's shares as a factor in the selection of a broker or a dealer to execute its portfolio transactions.

Portfolio turnover may vary from year to year, as well as within a year. High turnover rates are likely to result in comparatively greater brokerage expenses. The overall reasonableness of brokerage commissions is evaluated by the Adviser based upon its knowledge of available information as to the general level of commissions paid by the other institutional investors for comparable services.

ADDITIONAL INFORMATION CONCERNING THE TRUST

Shares. The Trust was established as a Delaware statutory trust on December 15, 2005, and consists of multiple series or funds. Each Fund issues shares of beneficial interest, with \$0.001 par value. The Board may designate additional funds. The Trust is registered with the SEC as an open-end management investment company.

Each share issued by each Fund has a pro rata interest in the assets of that Fund. Shares have no preemptive, exchange, subscription or conversion rights and are freely transferable. Each share is entitled to participate equally in dividends and distributions declared by the Board of Trustees with respect to the relevant Fund, and in the net distributable assets of such Fund on liquidation.

Each share has one vote with respect to matters upon which a shareholder vote is required consistent with the requirements of the 1940 Act and the rules promulgated thereunder. Shares of all Funds vote together as a single class except that, if the matter being voted on affects only a particular Fund, and, if a matter affects a particular Fund differently from other Funds, that Fund will vote separately on such matter.

Under Delaware law, the Trust is not required to hold an annual meeting of shareholders unless required to do so under the 1940 Act. The policy of the Trust is not to hold an annual meeting of shareholders unless required to do so under the 1940 Act. All shares (regardless of the Fund) have noncumulative voting rights for the Board. Under Delaware law, Trustees of the Trust may be removed by vote of the shareholders.

Following the creation of the initial Creation Unit Aggregation(s) of shares of a Fund and immediately prior to the commencement of trading in such Fund's shares, a holder of shares may be a control person of the Fund, as defined in the 1940 Act. A Fund cannot predict the length of time for which one or more shareholders may remain a control person of the Fund.

Shareholders may make inquiries by writing to the Trust, c/o ALPS Distributors, Inc. at 1290 Broadway, Suite 1100, Denver, Colorado 80203.

Absent an applicable exemption or other relief from the SEC or its staff, beneficial owners of more than 5% of the shares of a Fund may be subject to the reporting provisions of Section 13 of the 1934 Act and the SEC's rules promulgated thereunder. In addition, absent an applicable exemption or other relief from the SEC staff, officers and Trustees of the Fund and beneficial owners of 10% of the shares of the Fund (Insiders) may be subject to the insider reporting, short-swing profit and short sale provisions of Section 16 of the 1934 Act and the SEC's rules promulgated thereunder. Beneficial owners and Insiders should consult with their own legal counsel concerning their obligations under Sections 13 and 16 of the 1934 Act.

Table of Contents

Termination of the Trust or the Funds. The Trust or a Fund may be terminated by a majority vote of the Board of Trustees or the affirmative vote of a super majority of the holders of the Trust or such Fund entitled to vote on termination. Although the shares are not automatically redeemable upon the occurrence of any specific event, the Trust's organizational documents provide that the Board will have the unrestricted power to alter the number of shares in a Creation Unit Aggregation. In the event of a termination of the Trust or a Fund, the Board, in its sole discretion, could determine to permit the shares to be redeemable in aggregations smaller than Creation Unit Aggregations or to be individually redeemable. In such circumstance, the Trust may make redemptions in-kind, for cash, or for a combination of cash or securities.

Role of DTC. The Depository Trust Company (DTC) acts as Securities Depository for the Shares of the Trust. Shares of each Fund are represented by securities registered in the name of DTC or its nominee and deposited with, or on behalf of, DTC.

DTC, a limited-purpose trust company, was created to hold securities of its participants (DTC Participants) and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the NYSE, the AMEX and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (Indirect Participants).

Beneficial ownership of shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in shares (owners of such beneficial interests are referred to herein as Beneficial Owners) is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of shares. No Beneficial Owner shall have the right to receive a certificate representing such shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to the Depository Agreement between the Trust and DTC, DTC is required to make available to the Trust upon request and for a fee to be charged to the Trust a listing of the shares of the Funds held by each DTC Participant. The Trust shall inquire of each such DTC Participant as to the number of Beneficial Owners holding shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, and number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all shares of the Trust. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants' accounts with payments in amounts proportionate to their respective beneficial interests in shares of the Funds as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a street name, and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspect of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests, or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants. DTC may decide to discontinue providing its service with respect to shares of the Trust at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action to find a replacement for DTC to perform its functions at a comparable cost.

CREATION & REDEMPTION OF CREATION UNIT AGGREGATIONS

Creation. The Trust issues and sells shares of the Funds only in Creation Unit Aggregations on a continuous basis through the Distributor, without a sales load, at the NAV next determined after receipt, on any Business Day, of an order in proper form.

Table of Contents

Fund Deposit. The consideration for purchase of Creation Unit Aggregations of a Fund may consist of (i) the in-kind deposit of a designated portfolio of securities and instruments closely approximating the holdings of the Fund, (the *Deposit Securities*) and an amount of cash denominated in U.S. dollars (the *Cash Component*) computed as described below. Together, the Deposit Securities and the Cash Component constitute the *Fund Deposit*, which represents the minimum initial and subsequent investment amount for a Creation Unit Aggregation of any Fund.

Each Fund may accept a basket of securities, instruments and cash that differs from the composition of the published basket. The Fund may permit or require the consideration for Creation Unit Aggregations to consist solely of cash. Each Fund may permit or require the substitution of an amount of cash (i.e., a *cash in lieu* amount) to be added to the Cash Component to replace any Deposit Security. For example, the Trust reserves the right to permit or require a *cash in lieu* amount where the delivery of the Deposit Security by the Authorized Participant (as described below) would be restricted under the securities laws or where the delivery of the Deposit Security to the Authorized Participant would result in the disposition of the Deposit Security by the Authorized Participant becoming restricted under the securities laws, or in certain other situations.

The Cash Component is sometimes also referred to as the *Balancing Amount*. The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit Aggregation and the value of the Deposit Securities. If the Cash Component is a positive number (i.e., the NAV per Creation Unit Aggregation exceeds the value of the Deposit Securities), the creator will deliver the Cash Component. If the Cash Component is a negative number (i.e., the NAV per Creation Unit Aggregation is less than the value of the Deposit Securities), the creator will receive the Cash Component. Computation of the Cash Component excludes any stamp duty tax or other similar fees and expenses payable upon transfer of beneficial ownership of the Deposit Securities, which shall be the sole responsibility of the Authorized Participant.

Each Fund, through the NSCC or otherwise, makes available on each Business Day, prior to the opening of business on the applicable Listing Exchange (currently 9:30 a.m. New York time), the current Fund Deposit for each Fund. Such Deposit Securities are applicable, subject to any adjustments, in order to effect creations of Creation Unit Aggregations of a given Fund until such time as the next-announced composition of the Deposit Securities is made available.

Procedures for Creation of Creation Unit Aggregations. To be eligible to place orders with the Distributor and to create a Creation Unit Aggregation of a Fund, an entity must be a DTC Participant and must have executed an agreement with the Distributor with respect to creations and redemptions of Creation Unit Aggregations (*Participant Agreement*). A DTC Participant that has executed a Participant Agreement is referred to as an *Authorized Participant*. Investors should contact the Distributor for the names of Authorized Participants that have signed a Participant Agreement. All shares of a Fund, however created, will be entered on the records of DTC in the name of Cede & Co. for the account of a DTC Participant.

All orders to create shares must be placed for one or more Creation Unit Aggregations. Orders must be transmitted by an Authorized Participant pursuant to procedures set forth in the Participant Agreement. The date on which an order to create Creation Unit Aggregations (or an order to redeem Creation Unit Aggregations, as discussed below) is placed is referred to as the *Transmittal Date*. Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Distributor pursuant to procedures set forth in the Participant Agreement, as described below. Economic or market disruptions or changes, or telephone or other communication failure, may impede the ability to reach the Distributor or an Authorized Participant.

On days when a Listing Exchange or U.S. markets close earlier than normal, the Funds may require purchase orders to be placed earlier in the day. All questions as to the number of Deposit Securities to be delivered, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities, will be determined by the Trust, whose determination shall be final and binding.

If BNY Mellon does not receive both the required Deposit Securities and the Cash Component by the specified time on the Settlement Date, the Trust may cancel or revoke acceptance of such order. Upon written notice to the Distributor, such canceled or revoked order may be resubmitted the following Business Day using the Fund Deposit as newly constituted to reflect the then current NAV of each Fund. The delivery of Creation Unit Aggregations so created generally will occur no later than the Settlement Date.

Creation Unit Aggregations may be created in advance of receipt by the Trust of all or a portion of the applicable Deposit Securities as described below. In these circumstances, the initial deposit will have a value greater than the NAV of the shares on the date the order is placed in proper form since, in addition to available Deposit Securities, U.S. cash (or an equivalent amount of non-U.S. currency) must be deposited in an amount equal to the sum of (i) the Cash Component, plus (ii) at least 102%, which the Trust may change from time to time, of the market value of the undelivered Deposit Securities (the *Additional Cash Deposit*) with each Fund pending delivery of any missing Deposit Securities. The Authorized Participant must deposit with BNY the appropriate amount of federal funds by 2:00 p.m. Eastern time (or such other time as specified by the Trust) on the Settlement Date. If BNY Mellon does not receive the Additional Cash Deposit in the appropriate amount by such time, then the order may be deemed to be rejected and the Authorized Participant shall be liable to the Funds for losses, if any, resulting

Edgar Filing: WisdomTree Trust - Form 485BPOS

therefrom. An additional amount of U.S. cash shall be required to be deposited with BNY Mellon, pending delivery of the missing Deposit Securities to the extent necessary to maintain the Additional

Table of Contents

Cash Deposit with the Trust in an amount at least equal to 102%, which the Trust may change from time to time, of the daily marked to market value of the missing Deposit Securities. To the extent that missing Deposit Securities are not received by the specified time on the Settlement Date, or in the event a marked-to-market payment is not made within one Business Day following notification by the Distributor that such a payment is required, the Trust may use the cash on deposit to purchase the missing Deposit Securities. The Authorized Participant will be liable to the Trust for the costs incurred by the Trust in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Securities exceeds the market value of such Deposit Securities on the transmittal date plus the brokerage and related transaction costs associated with such purchases. The Trust will return any unused portion of the Additional Cash Deposit once all of the missing Deposit Securities have been properly received by BNY Mellon or purchased by the Trust and deposited into the Trust. In addition, a transaction fee, as listed below, will be charged in all cases.

Acceptance of Orders for Creation Unit Aggregations. The Trust reserves the absolute right to reject or revoke acceptance of a creation order transmitted to it by the Distributor in respect of any Fund. For example, the Trust may reject or revoke acceptance of an order, if (i) the order is not in proper form; (ii) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of any Fund; (iii) the Deposit Securities delivered are not as disseminated through the facilities of the NSCC for that date by the Fund as described above; (iv) acceptance of the Deposit Securities would have certain adverse tax consequences to the Fund; (v) acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; (vi) acceptance of the Fund Deposit would otherwise, in the discretion of the Trust or WisdomTree Asset Management, have an adverse effect on the Trust or the rights of beneficial owners; or (vii) in the event that circumstances outside the control of the Trust, BNY Mellon, the Distributor or WisdomTree Asset Management make it for all practical purposes impossible to process creation orders. Examples of such circumstances include natural disaster, war, revolution; public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Trust, WisdomTree Asset Management, the Distributor, DTC, NSCC, BNY Mellon or sub-custodian or any other participant in the creation process, and similar extraordinary events. The Distributor shall notify a prospective creator of a Creation Unit and/or the Authorized Participant acting on behalf of the creator of a Creation Unit Aggregation of its rejection of the order of such person. The Trust, BNY Mellon, a sub-custodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits nor shall any of them incur any liability for the failure to give any such notification.

Creation/Redemption Transaction Fee. Each Fund imposes a Transaction Fee on investors purchasing or redeeming Creation Units. The Transaction Fee will be limited to amounts that have been determined by WisdomTree Asset Management to be appropriate. The purpose of the Transaction Fee is to protect the existing shareholders of the Funds from the dilutive costs associated with the purchase and redemption of Creation Units. Where a Fund permits cash creations (or redemptions) or cash in lieu of depositing one or more Deposit Securities, the purchaser (or redeemer) may be assessed a higher Transaction Fee to offset the transaction cost to the Fund of buying (or selling) those particular Deposit Securities. Transaction Fees will differ for each Fund, depending on the transaction expenses related to each Fund's portfolio securities. Every purchaser of a Creation Unit will receive a Prospectus that contains disclosure about the Transaction Fee, including the maximum amount of the Transaction Fee charged by each Fund.

The following table sets forth the approximate value of one Creation Unit for each of the Funds, and the standard and maximum creation transaction fee for each of the Funds.

Name of Fund	Approximate Value of One Creation Unit	Standard Creation Transaction Fee	Maximum Creation Transaction Fee
Asia Bond Fund	\$ 5,000,000	\$ 700	\$ 6500
Latin America Bond Fund	\$ 5,000,000	\$ 700	\$ 6500
EMEA Bond Fund	\$ 5,000,000	\$ 700	\$ 6500

Placement of Redemption Orders. The process to redeem Creation Unit Aggregations works much like the process to purchase Creation Unit Aggregations, but in reverse. Orders to redeem Creation Unit Aggregations of the Funds must be delivered through an Authorized Participant. Investors other than Authorized Participants are responsible for making arrangements for a redemption request to be made through an Authorized Participant. Orders must be accompanied or followed by the requisite number of shares of the Fund specified in such order, which delivery must be made to BNY Mellon no later than 10:00 a.m. New York time on the next Business Day following the Transmittal Date. All other procedures set forth in the Participant Agreement must be properly followed.

Table of Contents

To the extent contemplated by an Authorized Participant's agreement, in the event the Authorized Participant has submitted a redemption request in proper form but is unable to transfer all or part of the Creation Unit Aggregation to be redeemed to the Funds' transfer agent, the transfer agent will nonetheless accept the redemption request in reliance on the undertaking by the Authorized Participant to deliver the missing shares as soon as possible. Such undertaking shall be secured by the Authorized Participant's delivery and maintenance of collateral consisting of cash having a value (marked to market daily) at least equal to 102%, which WisdomTree Asset Management may change from time to time, of the value of the missing shares. The current procedures for collateralization of missing shares require, among other things, that any cash collateral shall be in the form of U.S. dollars in immediately-available funds and shall be held by BNY and marked to market daily. The fees of BNY and any sub-custodians in respect of the delivery, maintenance and redelivery of the cash collateral shall be payable by the Authorized Participant. The Trust, on behalf of the affected Fund, is permitted to purchase the missing shares or acquire the Deposit Securities and the Cash Component underlying such shares at any time and will subject the Authorized Participant to liability for any shortfall between the cost to the Trust of purchasing such shares, Deposit Securities or Cash Component and the value of the collateral.

If the requisite number of shares of the relevant Fund are not delivered on the Transmittal Date as described above, the Fund may reject or revoke acceptance of the redemption request. If it is not possible to effect deliveries of the Fund Securities, the Trust may in its discretion exercise its option to redeem such shares in U.S. cash (or in the case of the Funds, an equivalent amount of non-U.S. currency), and the redeeming Authorized Participant will be required to receive its redemption proceeds in cash. In addition, an investor may request a redemption in cash that the Fund may, in its sole discretion, permit. In either case, the investor will receive a cash payment equal to the NAV of its shares based on the NAV of shares of the relevant Fund next determined after the redemption request is received in proper form (minus a redemption transaction fee and additional charge for requested cash redemptions specified above, to offset the Trust's brokerage and other transaction costs associated with the disposition of Fund Securities). The Funds may also, in its sole discretion, upon request of a shareholder, provide such redeemer a portfolio of securities that differs from the exact composition of the Fund Securities but does not differ in NAV.

Redemptions of shares for Fund Securities will be subject to compliance with applicable federal and state securities laws and each Fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Unit Aggregations for cash) to the extent that the Trust could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities under such laws.

The ability of the Trust to effect in-kind creations and redemptions is subject, among other things, to the condition that, within the time period from the date of the order to the date of delivery of the securities, there are no days that are holidays in the applicable foreign market. For every occurrence of one or more intervening holidays in the applicable foreign market that are not holidays observed in the U.S. equity market, the redemption settlement cycle may be extended by the number of such intervening holidays. In addition to holidays, other unforeseeable closings in a foreign market due to emergencies may also prevent the Trust from delivering securities within the normal settlement period. The Funds will not suspend or postpone redemption beyond seven days, except as permitted under Section 22(e) of the 1940 Act. Section 22(e) provides that the right of redemption may be suspended or the date of payment postponed with respect to the Funds (1) for any period during which the New York Stock Exchange (NYSE) is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the NYSE is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of the shares of the Fund's portfolio securities or determination of its NAV is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

TAXES

The following discussion of certain U.S. federal income tax consequences of investing in the Funds is based on the Internal Revenue Code (the Code), U.S. Treasury regulations, and other applicable authority, all as in effect as of the date of the filing of this SAI. These authorities are subject to change by legislative or administrative action, possibly with retroactive effect. The following discussion is only a summary of some of the important U.S. federal income tax considerations generally applicable to investments in the Funds. There may be other tax considerations applicable to particular shareholders. Shareholders should consult their own tax advisors regarding their particular situation and the possible application of foreign, state, and local tax laws.

Qualification as a Regulated Investment Company. Each Fund intends to elect to be treated and qualify each year as a RIC under Subchapter M of the Code. In order to qualify for the special tax treatment accorded RICs and their shareholders, each Fund must, among other things:

(a) derive at least 90% of its gross income each year from (i) dividends, interest, payments with respect to securities loans, gains from the sale or other disposition of stock or securities or foreign currencies, or other income (including but not limited to gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities or currencies, and (ii) net income derived from interests in qualified publicly traded partnerships (as defined below);

(b) diversify its holdings so that, at the end of each quarter of its taxable year, (i) at least 50% of the market value of the Fund's total assets consists of cash and cash items, U.S. government securities, securities of other RICs and other securities, with

Table of Contents

investments in such other securities limited with respect to any one issuer to an amount not greater than 5% of the value of the Fund's total assets and not greater than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of the Fund's total assets is invested in (1) the securities (other than those of the U.S. government or other RICs) of any one issuer or two or more issuers that are controlled by the Fund and that are engaged in the same, similar or related trades or businesses or (2) the securities of one or more qualified publicly traded partnerships; and

(c) distribute with respect to each taxable year at least 90% of its investment company taxable income (as that term is defined in the Code without regard to the deduction for dividends paid—generally taxable ordinary income and the excess, if any, of net short-term capital gains over net long-term capital losses) and net tax-exempt interest income.

In general, for purposes of the 90% of gross income requirement described in (a) above, income derived from a partnership will be treated as qualifying income only to the extent such income is attributable to items of income of the partnership that would be qualifying income if realized directly by a Fund. However, 100% of the net income derived from an interest in a qualified publicly traded partnership (generally, a partnership (i) interests in which are traded on an established securities market or are readily tradable on a secondary market or the substantial equivalent thereof, (ii) that derives at least 90% of its income from the passive income sources specified in Code section 7704(d), and (iii) that derives less than 90% of its income from the qualifying income described in (a)(i) of the prior paragraph) will be treated as qualifying income. In addition, although in general the passive loss rules of the Code do not apply to RICs, such rules do apply to a RIC with respect to items attributable to an interest in a qualified publicly traded partnership.

Taxation of the Funds. If a Fund qualifies as a RIC, that Fund will not be subject to federal income tax on income and gains that are distributed in a timely manner to its shareholders in the form of dividends.

If a Fund fails to qualify for any taxable year as a RIC, all of its taxable income (including its net capital gains) will be subject to tax at corporate income tax rates without any deduction for distributions to shareholders, and all distributions from earnings and profits, including any distributions of net long-term capital gains and net tax-exempt income, would be taxable to shareholders as dividend income. In addition, a Fund could be required to recognize unrealized gains, pay substantial taxes and interest and make substantial distributions before requalifying as a RIC that is accorded special tax treatment.

Each Fund intends to distribute at least annually to its shareholders substantially all of its investment company taxable income and its net capital gains. Investment company taxable income that is retained by a Fund will be subject to tax at regular corporate rates. If a Fund retains any net capital gain, that gain will be subject to tax at corporate rates, but the Fund may designate the retained amount as undistributed capital gains in a notice to its shareholders who (i) will be required to include in income for federal income tax purposes, as long-term capital gain, their shares of such undistributed amount, and (ii) will be entitled to credit their proportionate shares of the tax paid by the Fund on such undistributed amount against their federal income tax liabilities, if any, and to claim refunds on a properly-filed U.S. tax return to the extent the credit exceeds such liabilities. For federal income tax purposes, the tax basis of shares owned by a shareholder of the Fund will be increased by an amount equal to the difference between the amount of undistributed capital gains included in the shareholder's gross income and the tax deemed paid by the shareholder under clause (ii) of the preceding sentence.

If a Fund fails to distribute in a calendar year an amount at least equal to the sum of 98% of its ordinary income for such year and 98.2% of its capital gain net income for the 12 months ending on October 31 of such year, plus any retained amount from the prior year, the Fund will be subject to a nondeductible 4% excise tax on the undistributed amount. For these purposes, a Fund will be treated as having distributed any amount on which it has been subject to corporate income tax for the taxable year ending within the calendar year. A dividend paid to shareholders in January of a year generally is deemed to have been paid by the Fund on December 31 of the preceding year if the dividend was declared and payable to shareholders of record on a date in October, November, or December of that preceding year. Each Fund intends to declare and pay dividends and distributions in the amounts and at the times necessary to avoid the application of the 4% excise tax, although there can be no assurance that it will be able to do so.

Fund Distributions. Distributions are taxable whether shareholders receive them in cash or reinvest them in additional shares. Moreover, distributions on a Fund's shares are generally subject to federal income tax as described herein to the extent they do not exceed the Fund's realized income and gains, even though such dividends and distributions may economically represent a return of a particular shareholder's investment. Such distributions are likely to occur in respect of shares purchased at a time when the Fund's NAV reflects gains that are either unrealized, or realized but not distributed. Such realized gains may be required to be distributed even when the Fund's NAV also reflects unrealized losses.

Table of Contents

Distributions by each Fund of investment income are generally taxable as ordinary income. Taxes on distributions of capital gains are determined by how long a Fund owned the investments that generated those gains, rather than how long a shareholder has owned his or her Fund shares. Distributions of net capital gains from the sale of investments that a Fund owned for more than one year and that are properly designated by the Fund as capital gain dividends (Capital Gain Dividends) will be taxable as long-term capital gains. Distributions from capital gains are generally made after applying any available capital loss carryovers. Long-term capital gain rates applicable to individuals have been temporarily reduced in general, to 15%, with lower rates applying to taxpayers in the 10% and 15% rate brackets for taxable years beginning before January 1, 2013. Distributions of gains from the sale of investments that a Fund owned for one year or less will be taxable as ordinary income.

To the extent that a Fund makes a distribution of income received by such Fund in lieu of dividends (a substitute payment) with respect to securities on loan pursuant to a securities lending transaction, such income will not constitute qualified dividend income to individual shareholders and will not be eligible for the dividends received deduction for corporate shareholders.

If a Fund makes distributions to a shareholder in excess of the Fund's current and accumulated earnings and profits in any taxable year, the excess distribution will be treated as a return of capital to the extent of the shareholder's tax basis in its shares, and thereafter as capital gain. A return of capital is not taxable, but reduces a shareholder's tax basis in its shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition by the shareholder of its shares.

Sale or Exchange of Shares. A sale or exchange of shares in the Funds may give rise to a gain or loss. In general, any gain or loss realized upon a taxable disposition of shares will be treated as long-term capital gain or loss if the shares have been held for more than 12 months. Otherwise, the gain or loss on the taxable disposition of shares will be treated as short-term capital gain or loss. However, any loss realized upon a taxable disposition of shares held for six months or less will be treated as long-term, rather than short-term, to the extent of any long-term capital gain distributions received (or deemed received) by the shareholder with respect to the shares. All or a portion of any loss realized upon a taxable disposition of shares will be disallowed if other substantially identical shares of a Fund are purchased within 30 days before or after the disposition. In such a case, the basis of the newly purchased shares will be adjusted to reflect the disallowed loss.

Backup Withholding. Each Fund (or financial intermediaries, such as brokers, through which a shareholder holds Fund shares) generally is required to withhold and to remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding. The backup withholding tax rate is 28% for amounts paid through 2012. This rate will expire and the backup withholding rate will be 31% for amounts paid after December 31, 2012, unless Congress enacts legislation providing otherwise.

Federal Tax Treatment of Certain Fund Investments. Transactions of the Funds in options, futures contracts, hedging transactions, forward contracts, swap agreements, participation certificates, straddles and foreign currencies may be subject to various special and complex tax rules, including market-to-market, constructive sale, straddle, wash sale and short sale rules. These rules could affect whether gains and losses recognized by the Funds are treated as ordinary income or capital gain, accelerate the recognition of income to the Funds, or defer a Fund's ability to recognize losses. These rules may in turn affect the amount, timing or character of the income distributed to shareholders by each Fund.

Foreign Currency Transactions. Under the Code, gains or losses attributable to fluctuations in exchange rates which occur between the time a Fund accrues income or other receivable or accrues expenses or other liabilities denominated in a foreign currency and the time the Fund actually collects such receivables or pays such liabilities generally are treated as ordinary income or loss. Similarly, on disposition of debt securities denominated in a foreign currency and on disposition of certain other instruments, gains or losses attributable to fluctuations in the value of the foreign currency between the date of acquisition of the security or contract and the date of disposition are also treated as ordinary gain or loss. The gains and losses may increase or decrease the amount of a Fund's investment company taxable income to be distributed to its shareholders as ordinary income.

Non-U.S. Shareholders. In general, dividends other than Capital Gain Dividends paid by a Fund to a shareholder that is not a U.S. person within the meaning of the Code (a foreign person) are subject to withholding of U.S. federal income tax at a rate of 30% (or lower applicable treaty rate).

Table of Contents

Certain interest-related and short-term gain dividends may be exempt from the 30% withholding for taxable years beginning before January 1, 2012 (unless extended by legislation). Assuming certain certification requirements are complied with, a RIC generally is not required to withhold any amounts (i) with respect to distributions attributable to U.S.-source interest income that would be treated as portfolio interest and accordingly would not be subject to U.S. federal income tax if earned directly by an individual foreign person, and (ii) with respect to distributions of net short-term capital gains in excess of net long-term capital losses, in each case to the extent such distributions are properly designated by the RIC. Depending on the circumstances, a Fund may make such designations with respect to all, some or none of their potentially eligible dividends or treat such dividends, in whole or in part, as ineligible for this exemption from withholding. Moreover, in the case of shares held through an intermediary, the intermediary may withhold any such amounts even if a Fund makes a designation with respect to a payment.

A beneficial holder of shares who is a foreign person is not, in general, subject to U.S. federal income tax on gains (and is not allowed a U.S. income tax deduction for losses) realized on a sale of shares of a Fund or on Capital Gain Dividends unless (i) such gain or dividend is effectively connected with the conduct of a trade or business carried on by such holder within the United States or (ii) in the case of an individual holder, the holder is present in the United States for a period or periods aggregating 183 days or more during the year of the sale or the receipt of the Capital Gain Dividend and certain other conditions are met.

In order for a foreign investor to qualify for an exemption from backup withholding, the foreign investor must comply with special certification and filing requirements. Foreign investors in a Fund should consult their tax advisors in this regard. Backup withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's U.S. federal income tax liability, provided the appropriate information is furnished to the Internal Revenue Service.

A beneficial holder of shares who is a foreign person may be subject to state and local tax and to the U.S. federal estate tax in addition to the federal income tax consequences referred to above. If a shareholder is eligible for the benefits of a tax treaty, any effectively connected income or gain will generally be subject to U.S. federal income tax on a net basis only if it is also attributable to a permanent establishment maintained by the shareholder in the United States.

Creation and Redemption of Creation Units. An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and the sum of the exchanger's aggregate basis in the securities surrendered plus the amount of cash paid for such Creation Units. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of any securities received plus the amount of any cash received for such Creation Units. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing wash sales, or on the basis that there has been no significant change in economic position. Any capital gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if the securities exchanged for such Creation Units have been held for more than one year.

Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if the shares comprising the Creation Units have been held for more than one year. Otherwise, such capital gains or losses will be treated as short-term capital gains or losses.

Persons purchasing or redeeming Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction.

Section 351. The Trust on behalf of each Fund has the right to reject an order for a purchase of shares of the Trust if the purchaser (or group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of a given Fund and if, pursuant to Section 351 of the Code, that Fund would have a basis in the securities different from the market value of such securities on the date of deposit. The Trust also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination.

Tax Shelter Reporting Regulations. Under U.S. Treasury regulations, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the Internal Revenue Service a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all RICs. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

Table of Contents

General Considerations. The federal income tax discussion set forth above is for general information only. Prospective investors should consult their tax advisors regarding the specific federal income tax consequences of purchasing, holding and disposing of shares of the Funds, as well as the effect of state, local and foreign tax law and any proposed tax law changes.

DETERMINATION OF NAV

The NAV of each Fund's shares is calculated each day the NYSE are open for trading as of the close of regular trading on the NYSE, generally 4:00 p.m. New York time (the NAV Calculation Time). NAV per share is calculated by dividing a Fund's net assets by the number of Fund shares outstanding.

Stocks held by each Fund are valued at their market value when reliable market quotations are readily available. Certain short-term debt instruments which may be used to manage a Fund's cash are valued on the basis of amortized cost. The values of any foreign securities held by a Fund are converted into U.S. dollars using an exchange rate deemed appropriate by the Funds.

In certain instances, such as when reliable market valuations are not readily available or are not deemed to reflect current market values, a Fund's investments will be valued in accordance with the Fund's pricing policy and procedures. Securities that may be valued using fair value pricing may include, but are not limited to, securities for which there are no current market quotations or whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by significant events. An example of a significant event is an event occurring after the close of the market in which a security trades but before a Fund's next NAV calculation time that may materially affect the value of the Fund's investment (e.g., government action, natural disaster, or significant market fluctuation). Price movements in U.S. markets that are deemed to affect the value of foreign securities, or reflect changes to the value of such securities, also may cause securities to be fair valued.

When fair-value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ from quoted or published prices for the same securities.

Fund shares are purchased or sold on a national securities exchange at market prices, which may be higher or lower than NAV. No secondary sales will be made to brokers or dealers at a concession by the Distributor or by the Funds. Purchases and sales of shares in the secondary market, which will not involve the Funds, will be subject to customary brokerage commissions and charges. Transactions in a Funds shares will be priced at NAV only if you purchase or redeem shares directly from the Fund in Creation Units.

DIVIDENDS AND DISTRIBUTIONS

Each Fund intends to pay out dividends, if any, to investors monthly, but in any event no less frequently than annually. The Funds distribute their net realized capital gains, if any, to investors annually. Each Fund may occasionally be required to make supplemental distributions at some other time during the year. Distributions in cash may be reinvested automatically in additional whole shares only if the broker through whom you purchased shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

The Trust reserves the right to declare special distributions if, in its reasonable discretion, such action is necessary or advisable to preserve the status of the Funds as a RIC or to avoid imposition of income or excise taxes on undistributed income.

FINANCIAL STATEMENTS

When available, the audited financial statements, including the financial highlights appearing in the Trust's Annual Report to Shareholders for the fiscal year ended August 31, 2011 and filed electronically with the SEC, will be incorporated by reference and made part of this SAI. You may request a copy of the Trust's Annual Report at no charge by calling 866-909-9473 or through the Trust's website at www.wisdomtree.com.

MISCELLANEOUS INFORMATION

Counsel. Morgan, Lewis & Bockius LLP, 1111 Pennsylvania Avenue, NW, Washington DC 20004 is counsel to the Trust.

Independent Registered Public Accounting Firm. Ernst & Young LLP, 5 Times Square, New York, New York 10036, is the independent registered public accounting firm to the Trust.

Item 29. Persons Controlled by or Under Common Control with the Registrant

Not applicable.

Table of Contents

Item 30. Indemnification

Reference is made to Article IX of the Registrant's Trust Instrument included as Exhibit (a)(1) to this Registration Statement with respect to the indemnification of the Registrant's trustees and officers, which is set forth below:

Section 1. LIMITATION OF LIABILITY.

All Persons contracting with or having any claim against the Trust or a particular Series shall look only to the assets of the Trust or Assets belonging to such Series, respectively, for payment under such contract or claim; and neither the Trustees nor any of the Trust's officers, employees, or agents, whether past, present, or future, shall be personally liable therefor. Every written instrument or obligation on behalf of the Trust or any Series shall contain a statement to the foregoing effect, but the absence of such statement shall not operate to make any Trustee or officer of the Trust liable thereunder. Provided they have exercised reasonable care and have acted under the reasonable belief that their actions are in the best interest of the Trust, the Trustees and officers of the Trust shall not be responsible or liable for any act or omission or for neglect or wrongdoing of them or any officer, agent, employee, Investment Adviser, or independent contractor of the Trust, but nothing contained in this Trust Instrument or in the Delaware Act shall protect any Trustee or officer of the Trust against liability to the Trust or to Shareholders to which he would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence, or reckless disregard of the duties involved in the conduct of his office.

Section 2. INDEMNIFICATION.

(a) Subject to the exceptions and limitations contained in subsection (b) below:

(i) every Person who is, or has been, a Trustee or an officer, employee, or agent of the Trust (Covered Person) shall be indemnified by the Trust or the appropriate Series (out of Assets belonging to that Series) to the fullest extent permitted by law against liability and against all expenses reasonably incurred or paid by him in connection with any claim, action, suit, or proceeding in which he becomes involved as a party or otherwise by virtue of his being or having been a Covered Person and against amounts paid or incurred by him in the settlement thereof; provided that the transfer agent of the Trust or any Series shall not be considered an agent for these purposes unless expressly deemed to be such by the Trustees in a resolution referring to this Article.

(ii) as used herein, the words claim, action, suit, or proceeding shall apply to all claims, actions, suits, or proceedings (civil, criminal, or other, including appeals), actual or threatened, and the words liability and expenses shall include attorneys fees, costs, judgments, amounts paid in settlement, fines, penalties, and other liabilities.

(b) No indemnification shall be provided hereunder to a Covered Person:

(i) who has been adjudicated by a court or body before which the proceeding was brought (A) to be liable to the Trust or its Shareholders by reason of willful misfeasance, bad faith, gross negligence, or reckless disregard of the duties involved in the conduct of his office or (B) not to have acted in good faith in the reasonable belief that his action was in the best interest of the Trust; or

(ii) in the event of a settlement, unless there has been a determination that such Covered Person did not engage in willful misfeasance, bad faith, gross negligence, or reckless disregard of the duties involved in the conduct of his office (A) by the court or other body approving the settlement, (B) by at least a majority of those Trustees who are neither Interested Persons of the Trust nor are parties to the matter based on a review of readily available facts (as opposed to a full trial-type inquiry), or (C) by written opinion of independent legal counsel based on a review of readily available facts (as opposed to a full trial-type inquiry).

(c) The rights of indemnification herein provided may be insured against by policies maintained by the Trust, shall be severable, shall not be exclusive of or affect any other rights to which any Covered Person may now or hereafter be entitled, and shall inure to the benefit of the

Edgar Filing: WisdomTree Trust - Form 485BPOS

heirs, executors, and administrators of a Covered Person.

- (d) To the maximum extent permitted by applicable law, expenses in connection with the preparation and presentation of a defense to any claim, action, suit, or proceeding of the character described in subsection (a) of this Section shall be paid by the Trust or applicable Series from time to time prior to final disposition thereof on receipt of an undertaking by or on behalf of such Covered Person that such amount will be paid over by him to the Trust or applicable Series if it is ultimately determined that he is not entitled to indemnification under this Section, provided that either (i) such Covered Person has provided appropriate security for such undertaking, (ii) the Trust is insured

Table of Contents

against losses arising out of any such advance payments, or (iii) either a majority of the Trustees who are neither Interested Persons of the Trust nor parties to the matter, or independent legal counsel in a written opinion, has determined, based on a review of readily available facts (as opposed to a full trial-type inquiry) that there is reason to believe that such Covered Person will not be disqualified from indemnification under this Section.

- (e) Any repeal or modification of this Article IX by the Shareholders, or adoption or modification of any other provision of this Trust Instrument or the By-laws inconsistent with this Article, shall be prospective only, to the extent that such repeal, modification, or adoption would, if applied retrospectively, adversely affect any limitation on the liability of any Covered Person or indemnification available to any Covered Person with respect to any act or omission that occurred prior to such repeal, modification, or adoption.

Reference is made to Article VI of the Registrant’s By-Laws included as Exhibit (b) to this Registration Statement with respect to the indemnification of the Registrant’s trustees and officers, which is set forth below:

Section 6.2. Limitation of Liability.

The Declaration refers to the Trustees as Trustees, but not as individuals or personally; and no Trustee, officer, employee or agent of the Trust shall be held to any personal liability, nor shall resort be had to their private property for the satisfaction of any obligation or claim or otherwise in connection with the affairs of the Trust; provided, that nothing contained in the Declaration or the By-Laws shall protect any Trustee or officer of the Trust from any liability to the Trust or its Shareholders to which he would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his office.

Insofar as indemnification for liabilities arising under the Securities Act of 1933, as amended, may be provided to trustees, officers and controlling persons of the Trust, pursuant to the foregoing provisions or otherwise, the Trust has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act of 1933, as amended, and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the Trust of expenses incurred or paid by a trustee, officer or controlling person of the Trust in connection with the successful defense of any action, suit or proceeding or payment pursuant to any insurance policy) is asserted against the Trust by such trustee, officer or controlling person in connection with the securities being registered, the Trust will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Act and will be governed by the final adjudication of such issue.

Item 31. Business and Other Connections of the Investment Adviser

WisdomTree Asset Management, Inc. (WTAM), 380 Madison Avenue, 21st Floor, New York, NY 10017, a wholly-owned subsidiary of WisdomTree Investments, Inc., is a registered investment adviser and serves as investment adviser for each series of the Trust. The description of WTAM under the caption of Management-Investment Adviser in the Prospectus and under the caption Management of the Trust in the Statement of Additional Information constituting Parts A and B, respectively, of this Registration Statement are incorporated herein by reference.

Each of the directors and officers of WTAM will also have substantial responsibilities as directors and/or officers of WisdomTree Investments, Inc., 380 Madison Avenue, 21st Floor, New York, NY 10017. To the knowledge of the Registrant, except as set forth below, none of the directors or executive officers of WTAM is or has been at any time during the past two fiscal years engaged in any other business, profession, vocation or employment of a substantial nature.

Name	Position with WisdomTree Asset Management, Inc.	Principal Business (es) During the Last Two Fiscal Years
Jonathan Steinberg	President, (Principal Executive Officer) and Trustee	Chief Executive Officer of WisdomTree Investments Inc. and Director of WisdomTree Investments, Inc. since 1989; President of the WisdomTree Funds since 2005

Table of Contents

Name	Position with WisdomTree Asset Management, Inc.	Principal Business (es) During the Last Two Fiscal Years
Amit Muni	Chief Financial Officer	Chief Financial Officer and Assistant Secretary of WisdomTree Investments, Inc. since 2008; International Securities Exchange Holdings, Inc. (ISE), Controller and Chief Accounting Officer, 2003 to 2008; Instinet Group, Inc., Vice President Finance, 2000 to 2003.
Richard Morris	General Counsel, Chief Legal Officer	Secretary and Chief Legal Officer of the WisdomTree Trust since 2005; General Counsel of WisdomTree Asset Management, Inc. since 2009; Deputy General Counsel of WisdomTree Investments, Inc. since 2005; Senior Counsel at Barclays Global Investors, N.A. from 2002 to 2005; Counsel at Barclays Global Investors, N.A. from 2000 to 2001.

WTAM, with the approval of the Registrant's Board of Trustees, selects the sub-adviser for each of the Trust's series, as applicable. The Dreyfus Corporation serves as sub-adviser for the Trust's Currency Funds. Mellon Capital Management Corporation serves as sub-adviser for each other series of the Trust.

To the Knowledge of the Registrant, except as set forth below, none of the directors or executive officers of the sub-advisers is or has been at any time during the past two fiscal years engaged in any other business, profession, vocation or employment of a substantial nature.
