**PART I**

**ITEM 1: BUSINESS**

*Our Annual Report on Form 10-K and the documents incorporated herein by reference contain forward-looking statements relating to our anticipated plans, products, services, and financial performance. Other than statements of historical fact, all statements made in this Annual Report on Form 10-K are forward-looking, including, but not limited to, statements regarding industry prospects, future results of operations or financial position (including our revenue and expense expectations in 2011 and our liquidity expectations), and statements of our intent, belief and current expectations about our strategic direction, prospective and future financial results and condition. The words "will," "should," "plan," "estimate," "believe," "expect," "anticipate," "intend" and similar expressions identify forward-looking statements, but their absence does not mean the statement is not forward looking. These statements are not guarantees of future performance and are subject to certain risks, uncertainties and assumptions that could cause actual results to differ materially from those anticipated in the forward looking statements. Factors that could affect the company's actual results include its ability to retain and increase its customer base, to continue to grow revenues from the company's software-as-a-service products, to continue to maintain current customer retention levels, to maintain conversion rates of customers acquired through promotional offers, to respond to competitive threats and real estate market conditions, to manage lead-generation and other costs, to develop new products, and to expand into new lines of business, and other matters discussed in Risk Factors contained in Item 1A. of this Annual Report on Form 10-K. Given these risks and uncertainties, you should not place undue reliance on our forward-looking statements. The inclusion of such forward-looking statements should not be regarded as a representation that contemplated future events, plans or expectations will be achieved. The forward-looking statements are made as of the date of this report and, except as required by law, we assume no obligation to update any of these statements to reflect events or circumstances after the date hereof.*

*Unless the context requires otherwise, the terms "Market Leader," "the Company," "we," "us" and "our" refer to Market Leader, Inc. and its subsidiaries.*

**Company Background and Overview**

Market Leader, Inc. is a leading software-as-a-service provider to the real estate industry. Our dedicated focus on real estate distinguishes us from other software companies. Within the real estate category, Market Leader is distinguished by its focus on real estate professionals, and by the breadth and depth of the business solutions we provide to enable those professionals to be successful.

Our customers include individual agents and brokerage offices to which we market our services, both directly and in marketing partnerships with leading real estate franchise networks. We further expanded our sales range and reach with the announcement on January 10, 2011 of our selection by Keller Williams Realty International to provide a comprehensive end-to-end business and marketing solution to their entire franchise organization.

At the core of our value proposition is a comprehensive software-as-a-service-based business solution for real estate professionals. We provide a personalized, customer-branded website, with full MLS integration, that is optimized to generate consumer response. We also enable Realtors to leverage the finest library of sales & marketing materials in order to easily design, create, publish, and manage their own personalized marketing campaigns. And we provide tools to generate traffic and leads and engage with all of their contacts and clients through our proprietary customer relationship management tool. All of these services are delivered as one tightly integrated solution that we believe is unparalleled in comprehensiveness, power, and ease of use.

## Table of Contents

Our software-as-a-service based products are primarily delivered through a single flexible and robust platform that can be configured and integrated with other services to create customized solutions. Popular products delivered from this platform include:

**Growth Leader**, a personalized website and proprietary customer relationship management tool for real estate agents launched in September 2008.

**RealtyGenerator**<sup>®</sup>, a turnkey lead-generation and lead management system for real estate brokerage offices that we acquired in 2007.

Additionally, Market Leader was selected by Keller Williams Realty in 2011 to provide across their franchise network customized marketing and business solutions that incorporate elements of our core software-as-a-service functionality integrated with specified third-party applications.

We also acquired, through incremental investment late in the third quarter of 2010, a controlling interest in ActiveRain Real Estate Network. ActiveRain operates the leading social media site focused on the real estate industry, based upon data published in The National Association of Realtors 2010 REALTOR<sup>®</sup> Technology Survey Report. ActiveRain has over 200,000 real estate professional users. While these are primarily free memberships, we believe that our access to this membership provides substantial advertising and marketing benefits. Together with the expanding usage of our other software and services, these users give Market Leader a formidable marketing footprint in the real estate industry today.

Altogether software-as-a-service based products drove approximately two-thirds of 2010 revenue. The remainder was driven by our traditional lead-generation products that drove approximately two-thirds of revenue in 2009. We believe that 2010 was an inflection point for our business that now derives the majority of revenue from fast-growing, software-as-a-service based products.

These software-as-a-service based products extend Market Leader's legacy as an innovator of internet-based marketing services for real estate professionals since the Company's inception.

Founded by a second-generation real estate agent, the Company was incorporated in the State of Washington on May 28, 1999 as HouseValues, Inc. After operating as a privately-held business for several years, we completed our initial public offering in December 2004. In November 2008, we changed our name to Market Leader, Inc.

Our original business model pioneered lead-generation services for real estate agents. Our traditional lead-generation products, HouseValues<sup>®</sup> and JustListed<sup>®</sup>, deliver home seller or buyer leads to customers via an online software tool that is bundled with the offerings.

These traditional products drove extremely rapid growth in the Company's early years that was in part aided by a robust residential real estate market. When the slowdown in real estate transactions led to declines in our traditional business, we adapted by significantly reducing expenses in all categories. Sales efforts associated with traditional products were curtailed and related development was discontinued. By utilizing the cash flows of our traditional business, we preserved our capital, enhanced our ability to invest in new products, and ultimately rebuilt the Company around more powerful offerings.

Key among these investments in new products was our acquisition of substantially all of the assets of Realty Generator, LLC in late 2007 for \$11.2 million in cash and assumed liabilities. In addition to gaining access to a broader set of customers as a result of the acquisition, we leveraged the acquired technology and business model to develop our primary software-as-a-service based products and thereby achieved a key intended benefit of the acquisition.

In 2008 we began to shift our business model from our original lead-generation model toward software-as-a-service based offerings. We believe that the four consecutive quarters of revenue growth in 2010 represents the early fruition of those efforts.

## **Table of Contents**

### **Services for Our Customers Real Estate Professionals**

We provide the majority of our real estate professional customers with a bundle of services that includes:

Customer relationship management (CRM) tools and content designed to help our customers build relationships with prospective home buyers and sellers over the Internet. These online prospect management systems help our real estate professional customers manage and cultivate prospects. By automating many of the repetitive tasks that are required to follow up and communicate with potential clients, these tools allow our customers to focus on transacting their current business while efficiently marketing their services to potential clients to maintain a pipeline of future business opportunities. Our CRM tools also include proprietary real estate content and consumer email campaigns that our customers use to position themselves as highly engaged, technology-savvy neighborhood experts. By incorporating a tightly integrated, agent-branded website, these systems offer the added advantage of real-time insight into consumer online behavior.

Community and training services that enable our customers to share and learn best practices to help them close more business with Internet consumers. Customers of our premium software offerings are invited to participate in company-hosted group coaching calls and peer-to-peer best practices training conference calls. Performance measurement and benchmarking tools built into these products also enable comparison of key performance factors to those of successful producers while highlighting areas for improvement. These community and training services also include ActiveRain, the leading professional and social media site focused on the real-estate industry identified by the National Association of Realtors 2010 REALTOR® Technology Survey Report. ActiveRain has over 200,000 members including over 5,000 customers that use the company's subscription software Internet-enablement tools.

Leads in the local neighborhoods where our customers do business.

We offer our products for a monthly fixed fee pursuant to contracts, until terminated. Customers on our core software-as-a-service platform generally buy lead-generation services in addition to their software-as-a-service subscription, and they have the flexibility to adjust their lead-generation expenditures as their business needs dictate.

We believe that successful real estate professionals typically have systems and processes in place to capture and develop leads or prospects, and to maintain and expand their businesses. In addition, we believe that the value of the website traffic and leads generated for our customers through our network of websites and national advertising expertise is enhanced when combined with our integrated offerings that help our customers convert these leads into closed transactions.

We believe that our specialized real estate lead-generation capabilities provide a competitive advantage for our customers. We use direct-response advertising, including Internet media and television, to drive prospective home buyers and sellers to our real estate-oriented websites. We regularly advertise on major Internet search engines and other websites, and supplement this advertising with national and local television advertising and other media to help manage and geographically target consumer traffic and lead volume.

### **How We Generate Revenues**

We generate the majority of our revenues from the services we provide to real estate professionals.

*Growth Leader* and *RealtyGenerator*: We charge real estate professionals a one-time set-up fee and a monthly fixed fee for services, which include a personalized website, the CRM tool, marketing materials, training and support. We also generate revenue by generating leads for our real estate professional customers, driving traffic to their website.

## **Table of Contents**

*HouseValues:* We charge real estate agents a one-time set-up fee and a monthly fixed fee for a monthly bundle of exclusive leads on prospective home sellers, the Market Leader CRM tool, training and coaching programs.

*JustListed:* Like our HouseValues product, we charge real estate agents a one-time set-up fee and a monthly fixed fee for a monthly bundle of exclusive leads on prospective home buyers, the Market Leader CRM tool, training and coaching programs.

*ActiveRain:* We charge real estate professionals a monthly fixed fee for a blogging product designed to connect real estate professionals with consumers on ActiveRain.com as well as the ability for real estate professionals to syndicate their blog at ActiveRain.com to a personal blog hosted on their domain.

We recognize monthly service fees as revenue in the month that the service is provided, and we recognize initial set-up fees as revenue on a straight-line basis over the estimated customer life or the life of the contract, whichever is longer.

Other revenue is derived from advertising income, training, sales of excess leads and traffic, and the collection of contract termination fees, none of which materially affects our operating results. These revenues in the aggregate were less than 5% of our revenues for each of the past two years.

## **Our Expenses**

The largest components of our expenses are personnel and marketing costs. Personnel expenses are categorized in our statements of operations based on each employee's principal function. Marketing expenses consist of programs designed to attract consumers to our websites and to promote our services to potential customers—residential real estate professionals.

## **Geographic Areas**

We generate most of our revenue from U.S. customers. For the years ended December 31, 2010 and 2009, revenue generated from customers located within the United States was \$21.7 million and \$21.8 million, respectively. The rest of our revenue is primarily from Canada.

## **Competition**

We believe the principal competitive factors affecting our markets are product selection and quality; price; customer service and support; brand recognition; and reputation, reliability and trust. We believe that we compete effectively in these areas and that several factors contribute to our competitive advantage.

We believe that our focus on Internet marketing products is a competitive advantage as we compete for real estate marketing dollars. According to the National Association of Realtors Profile of Home Buyers and Sellers, in 2010 approximately 89% of home buyers used the Internet to search for homes. Eighty-five percent of these Internet users engaged a real estate professional in their home purchase, and approximately 64% selected the first real estate agent they interviewed. By helping real estate agents provide market and listing information early in the consumers home buying process, our products help position the agent to win the business of assisting these consumers in their home buying and selling transactions.

The size and geographic breadth of our customer base creates efficiencies in consumer lead-generation, website traffic and distribution of traffic and prospects that may not be available to competitors that lack our scale and nationwide distribution.

## **Table of Contents**

Success in our business requires a competency in small business sales and service, which we believe we have developed. The challenges we encountered building our customer base while expanding our nationwide presence will be encountered by other entrants as they seek to establish and grow competitive offerings.

Finally, we have introduced services that provide our real estate professional customers greater insight into the online behavior of their consumer prospects than traditional real estate lead-generation systems. The differentiated design and features of our services can result in efficiency and efficacy when deployed by real estate professionals and their success and satisfaction can lead to strong customer retention and high lifetime customer value.

Our current competitors include:

*Online Companies Focused on Residential Real Estate.* We compete with a variety of online marketing and lead-generation companies that focus exclusively on the real estate industry. Such companies include HomeGain of Classified Ventures; Realtor.com and Move.com of Move, Inc.; Homes.com of Dominion Enterprises; Reply.com; Zillow; Trulia; RealEstateABC of InternetBrands, and Lending Tree, which includes Domania.com, RealEstate.com, and iNest Realty. All of these companies have established websites and compete or may compete for real estate professionals' advertising expenditures. In addition to these established firms, there are a host of smaller new entrants that compete for market share.

*Internet Media Companies.* We compete with large Internet media companies, including Google, Yahoo!, MSN, and AOL for residential real estate professionals' marketing dollars.

*Traditional Real Estate Brokerage Firms.* Some real estate brokerage firms currently offer services similar to ours, and in the future these firms or other brokerage/franchise firms may develop similar offerings. A significant percentage of residential real estate agents are affiliated with large national or regional brokerage firms.

*Discounted and Non-Traditional Real Estate Brokerage Firms.* Some companies have extended their focus on online consumers to discount and non-traditional real estate brokerages. Companies such as Redfin, ZipRealty, and others offer similar consumer information services as well as discounted transaction fees to home buyers and sellers. While more directly competitive with traditional brokerage firms, these companies compete with us for online consumers.

*Traditional Sellers of Advertising to Real Estate Professionals.* We compete with traditional sellers of advertising, including local and regional newspapers, local magazines, and rack publications advertising homes for sale, for a share of the marketing dollars that residential real estate agents and brokers spend to attract prospective home buyers and sellers.

## **Technology and Infrastructure**

We have built and acquired proprietary, feature-rich systems to interact with consumers, provide our suite of services to real estate professionals and manage our business.

*Software-as-a-Service offerings* Our software-as-a-service based products include websites that we create on behalf of our real estate professional customers to enable consumers to research home listings and comprehensive neighborhood information online. These websites are tightly integrated with our proprietary CRM tool. We have focused our ongoing development efforts on the software-as-a-service based products, which drove the majority of our revenue in 2010 and enable us to enjoy stronger customer retention compared to our traditional products. Additionally, ActiveRain has a variety of software-as-a-service offerings including professional networking and online marketing services for real estate professionals.

*Lead-generation and Management Systems* We have built systems to deliver website traffic to our customers and consider our advertising capabilities to be a key competitive advantage. We have developed

## **Table of Contents**

systems to efficiently provide lead-generation services for thousands of websites, including our own as well as sites we operate on customers behalf. Through our systems we interact with thousands of Internet-enabled consumers every day, driving traffic to these websites and enabling tracking and testing so that we can monitor visitor conversion metrics. We also have geography-targeted, business-rule driven traffic routing and lead management systems that enable us to manage traffic and lead flow and to optimize monetization across our agent and broker customer base.

*Market Leader CRM.* This product is an online prospect management system through which we distribute leads from prospective home buyers and sellers to agent customers and that helps our customers manage and cultivate those leads.

*Training Systems* We provide our real estate professional customers with marketing materials, training and support, including online training and certification programs.

Our systems are hosted in a co-location facility in Kent, Washington. We have secure and fully redundant systems and our software and databases are backed up daily and stored at an offsite location.

## **Intellectual Property**

To protect our proprietary rights, we rely on a combination of trademark, copyright and trade secret laws, confidentiality agreements with our employees and consultants, and confidentiality provisions in our vendor and client agreements. We currently have fifteen trademarks registered in the United States and four trademarks registered in Canada. Applications for additional trademarks are pending for our product names and certain words and phrases that we use in our business. We also rely on copyright laws to protect computer programs relating to our websites and our proprietary technologies although to date we have not registered for copyright protection and we currently do not have any patents pending. We have also registered numerous Internet domain names related to our business in order to protect our proprietary interests.

## **Government Regulation**

Our business is subject to various laws and regulations relating to Internet commerce and telemarketing, as well as federal and state laws and regulations relating to real estate and mortgage matters.

*Regulation Relating to Internet Commerce.* Several jurisdictions have recently proposed or adopted privacy-related laws that restrict or prohibit unsolicited email solicitations, commonly known as spam, that impose complex and often burdensome requirements in connection with sending commercial email.

*Telemarketing Laws.* Both federal and state laws regulate the practice of telemarketing. Most jurisdictions have implemented do not call lists. In addition, a number of states require telemarketers to register with the state and post a bond, prohibit automated systems and recorded messages, impose disclosure requirements upon sales calls, and require written sales contracts for certain telemarketing transactions.

*State Real Estate Regulation.* Real estate licensing laws vary from state to state, but generally require corporations engaged in the real estate brokerage business to obtain a corporate real estate broker's license. We currently hold a corporate real estate broker's license in the State of Washington and various other states, and intend to obtain licenses in other states that we determine are necessary for our business.

## **Employees**

As of December 31, 2010, we had 186 employees primarily located in or near Seattle, Washington. None of our employees are covered by a collective bargaining agreement. We have never experienced employment-related work stoppages and consider our employee relations to be good.

---

### **Available Information**

Our Internet address is [www.marketleader.com](http://www.marketleader.com). On the Investor Relations Financial Information section of our website, we provide free access to our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to those reports as soon as reasonably practicable after they are electronically filed with or furnished to the Securities and Exchange Commission (SEC). The information found on our website is not a part of this or any other report filed with or furnished to the SEC. The SEC maintains a website ([www.sec.gov](http://www.sec.gov)) that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC. The public may read and copy any materials that we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549, on official business days during the hours of 10:00 am to 3:00 pm, or by calling 1-800-SEC-0330.

### **ITEM 1A: RISK FACTORS**

*You should carefully consider the following factors that may affect our business, future operating results and financial condition, as well as other information included in this Annual Report. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties not presently known to us or that we currently deem immaterial also may impair our business operations. If any of the following risks actually occur, our business, financial condition and operating results could be materially adversely affected.*

#### ***Our operating results are subject to fluctuations that may cause our stock price to decline.***

We have reported net losses for the past five years. Our operating results have fluctuated in the past and are likely to continue to do so in the future. Our revenues are unpredictable and may fluctuate from quarter to quarter due to changes in rates of customer acquisition and retention, the rate of adoption of our software-as-a-service based products, the success of our efforts to upsell customers from promotional offers to higher revenue services, the rate of decline in revenues from our traditional lead-generation products, the cyclical nature of the real estate industry, and other factors outside of our control. In addition, our expenses and revenues may fluctuate from quarter to quarter due to, among other factors, the timing of sales and marketing campaigns.

We believe that period-to-period comparisons of our past operating results may not be good indicators of our future performance and should not be relied on to predict the future performance of our stock price.

It is possible that in the future our operating results will not meet the expectations of investors, causing the market price of our common stock to decline. In the past, companies that have experienced decreases in the market price of their stock have been subject to securities class action litigation. A securities class action lawsuit against us could result in substantial costs and divert our management's attention from other business concerns.

#### ***Our operating results have been and may continue to be adversely affected by the cyclical nature of the real estate industry.***

Our business is dependent on the health of the residential real estate industry. The residential real estate market historically has been subject to economic cycles. An economic slowdown or recession, adverse tax policies, lower availability of credit, increased interest rates, or other factors that impact consumer confidence could decrease demand for residential real estate. For example, our revenues have declined over the past three years due in part to the national downturn in the real estate industry, including a decrease in the number of real estate professionals, and the economic slowdown. Trends in the real estate industry are unpredictable; therefore, our operating results, to the extent they reflect changes in the broader real estate industry, may continue to be subject to significant fluctuations.

#### ***We may be unable to compete successfully with our current or future competitors.***

We operate in a highly competitive environment and expect that competition will continue to be intense. The barriers to entry in our industry are low, making it possible for current or new competitors to adopt certain

## **Table of Contents**

aspects of our business model without great financial expense, thereby reducing our ability to differentiate our services. All of our services, including online lead-generation, online prospect management, online real estate portal content and advertising, and customer coaching and training, are provided in part or in combination by other companies. One or more of these companies, or a new market entrant, could adopt a business model that competes directly with us, which could have an adverse impact on our business and operating results. See Item 1 Business Competition for a discussion of our competitors.

Many of our existing and potential competitors have longer operating histories, greater name recognition, greater technological capabilities or greater financial, sales, marketing and human resources than we do. These competitors could do any of the following, which could adversely impact our business and operating results:

develop services that are as effective as or superior to our services or that achieve greater market acceptance than do our services;

devote greater resources to marketing or selling their services;

withstand price competition more successfully than we can;

make more attractive offers to existing and potential employees or independent contractors than we do;

more effectively negotiate third-party arrangements; and

take advantage of investments, acquisitions or other opportunities more readily than we can.

***Any efforts to expand into new lines of business and offer new products may not be successful, or may take longer than expected to complete.***

New initiatives we may pursue may not be successful or the anticipated benefits may take longer to realize than expected. Also, we may have little or no experience in these areas which may result in errors in the conception, structure or implementation of a strategy to take advantage of available opportunities. We cannot assure you that any new products or other expansion efforts will be successful.

***Our business model is evolving and our future operating results are unpredictable.***

The success of our business model depends on our ability to attract new and retain existing customers and to efficiently generate traffic and leads. Any failure to execute this strategy could harm our business. Our business model is constantly evolving. Further, because our newer software-as-a-service based products allow customers to adjust their advertising expenditure as business needs dictate, our revenue may become more variable. Additionally, because the margin on advertising revenue is less than that of software subscriptions, overall margins may be more variable and lower depending upon the mix of advertising revenue.

We may have to increase our expenses as we seek to expand our business and diversify our product mix. We cannot assure you that our strategies to return to growth will be successful or that we will return to profitability on a quarterly or annual basis.

***Any failure to increase the number of our customers would harm our business.***

Growth of our business depends in large part on increasing the number of our real estate professional customers. However, prospective customers may not be familiar with our services and may be accustomed to using traditional methods of advertising and marketing. To attract more customers, we must convince real estate professionals to spend a portion of their advertising and marketing budgets on our services. We cannot assure you that we will be successful in continuing to acquire customers or that we will be able to acquire them at the same rate that we have historically. If we reach the point at which we have attempted to sell our services to the majority of residential real estate professionals, our ability to further increase the number of customers could be limited. We may not know or be able to estimate when we have reached this point because we currently cannot

## **Table of Contents**

reliably estimate the total number of residential real estate professionals that are actively engaged in the industry during any particular period and media reports indicate that the total number of real estate professionals are expected to decline because of the ongoing negative trends in the real estate industry.

*Any failure to retain customers could harm our business.*

Our ability to retain our real estate professional customers will depend on our ability to generate website traffic and leads from prospective home buyers and sellers in quantities demanded by our customers, to enhance our existing services, develop new technologies that address the increasingly sophisticated and varied needs of our customers, and respond to technological advances and emerging industry standards and practices in a timely manner and on a cost effective basis. If we do not deliver the website traffic or quantity and quality of leads expected by our customers, maintain adequate technical support levels, or continue to improve the ease of use, functionality and features of our prospect management systems, customer coaching and training offerings, or if customers are dissatisfied with the quality of the leads that we provide, our customers may choose not to extend their contracts for our services or may choose to terminate their contracts.

*Real estate professionals remain customers typically only for a limited period of time, and we have limited ability to predict how long they will remain customers.*

The majority of our customer contracts have automatic one-month extensions at the end of their term, unless terminated by either party. Some customers have decided not to extend their contracts due to their inability to convert the leads we have provided into closed transactions, due to their dissatisfaction with our services, or their inability to pay for our services.

We cannot accurately predict how long real estate professionals will remain customers.

*Acquisitions we may undertake may be unsuccessful and may divert our management's attention and consume significant resources.*

We may selectively acquire other businesses, product lines or technologies. The successful execution of an acquisition strategy will depend on our ability to identify, negotiate, complete and integrate suitable acquisitions and, if necessary, to obtain satisfactory debt or equity financing. Acquisitions involve numerous risks, including:

difficulties in integrating the operations, technologies, and products of the acquired companies;

diversion of management's attention from normal daily operations of the business;

inability to maintain the key business relationships and the reputations of acquired businesses;

entry into markets in which we have limited or no prior experience and in which competitors have stronger market positions;

dependence on unfamiliar affiliates and partners;

insufficient revenues to offset increased expenses associated with acquisitions;

reduction or replacement of the sales of existing services by sales of products or services from acquired lines of business;

responsibility for the liabilities of acquired businesses;

inability to maintain our internal standards, controls, procedures and policies; and

potential loss of key employees of the acquired companies.

Acquisitions may not be successful, and if we are unable to effectively manage the risks described above or other risks we encounter, our business, operating results or financial condition may be negatively affected.

## **Table of Contents**

Mergers and acquisitions are inherently risky, and we cannot assure you that our acquisitions will be successful. Failure to manage and successfully integrate acquired businesses could harm our business.

*We may be required to take an impairment charge for goodwill or other long-lived assets, which could adversely impact our results of operations.*

We have acquired certain portions of our business through acquisitions and may continue to pursue acquisitions of other companies as part of our long-term business strategy. In connection with prior acquisitions, we have accounted for the portion of the purchase price paid in excess of the fair value of the net assets acquired as goodwill and may be required to do so for future acquisitions. Additionally, we have invested in other long-lived assets designed to enhance our product offerings or assist in achieving our business plan for our company.

Under the applicable accounting rules, goodwill is not amortized and is carried on our books at its original value, subject to periodic review and evaluation for impairment, whereas intangible and fixed assets are amortized or depreciated over the life of the asset. If, as a result of our periodic review and evaluation of our other long-lived assets for potential impairment, we determine that changes in the business itself, the economic environment including business valuation levels and trends, or the legislative or regulatory environment have adversely affected either the fair value of the business or the fair value of our assets, we may be required to take additional impairment charges. If market and economic conditions deteriorate further, this could increase the likelihood that we will need to record additional impairment charges.

While we have a plan to restore our business fundamentals to levels that would support our book value per share, we have no assurance that the plan will be achieved or that the market price of our common stock will increase to such levels in the foreseeable future. In that event, we may be required to take an impairment charge to the extent the carrying value of our net assets exceed the fair value of our overall business, which could adversely impact our results of operations.

*We rely almost entirely on advertising to generate leads for customers.*

We rely heavily on advertising to attract consumers to our websites and to generate traffic and leads. We advertise primarily through online media and television commercials.

*Business Risks Associated with Online Advertising.* We rely on online media to attract a significant percentage of the consumers visiting our websites. Prices for online advertising have increased as a result of increased demand for advertising inventory, which has caused our expenses to increase and has resulted in lower margins. Our advertising contracts with online search engines are typically short-term. If one or more search engines on which we rely for advertising modifies or terminates its relationship with us, our expenses could further increase, the number of leads we generate could decrease and our revenues or margins could decline.

*Business Risks Associated with Television Advertising.* Television advertising rates depend on a number of factors, including the strength of the national economy and regional economies and the strength of certain industries that advertise frequently. Advertising rates are also subject to cyclical and seasonal fluctuations. If television advertising prices increase significantly or if the effectiveness of this advertising declines, in the absence of more efficient ways to generate leads, our marketing expenses will also increase, which would harm our results of operations.

If we are required to drive additional traffic for an increasing customer base or if the number of leads that we are required to deliver increases, we may be required to increase the levels of advertising to meet those requirements. Increasing our advertising expenditures may not result in increases in traffic or leads. If the effectiveness of our advertising declines, our business will suffer.

---

**Table of Contents**

***We may in the future be subject to intellectual property rights claims.***

Other companies, including our current or potential competitors, could make claims against us alleging infringement of their intellectual property rights. We have been subject to and expect to continue to be subject to, claims regarding alleged infringement by us of the patents, trademarks and other intellectual property rights of third parties. Any intellectual property claims, regardless of merit, could be time-consuming and expensive to litigate or settle, and could significantly divert management's attention from other business concerns. We may need to obtain licenses from third parties who allege that we have infringed their rights, but such licenses may not be available on terms acceptable to us or at all.

Our technologies and content may not be able to withstand third-party claims or rights against their use. If we were unable to successfully defend against such claims, we may have to pay damages, stop using the technology or content found to be in violation of a third party's rights, seek a license for the infringing technology or content, or develop alternative non-infringing technology or content. If we are required to obtain a license for the infringing technology or content, it may not be available on reasonable terms, if at all. In addition, developing alternative non-infringing technology or content could require significant effort and expense. If we cannot license or develop technology or content for any infringing aspects of our business, we may be forced to limit our service offerings. Any of these results could reduce our ability to compete effectively and harm our business.

Our trademarks are important to our business. Other companies may own, obtain or claim trademarks that could prevent, limit or interfere with our use of trademarks. If we were unable to use these trademarks, our business would be harmed and we would need to devote substantial resources toward developing different brand identities.

***Prospective home buyers and sellers may be reluctant to sign up for our services due to general privacy concerns.***

Concern among consumers regarding our use of personal information collected on our websites, such as email addresses, home addresses and geographic preferences, could keep them from using our websites and thereby reduce the number of leads we generate. Industry-wide events or events with respect to our websites, including misappropriation of third-party information, security breaches, or changes in industry standards, regulations or laws could deter people from using the Internet or our websites to conduct transactions that involve the transmission of confidential information, which could harm our business.

We rely on the collection, use and disclosure of personally identifiable information from prospective home buyers and sellers and from customers to conduct our business. We disclose our information collection and dissemination practices in a published privacy statement on our websites, which we may modify from time to time to meet operational needs or changes in the law or industry best practices. We may be subject to legal claims, government action and damage to our reputation if we act or are perceived to be acting inconsistently with the terms of our privacy statement, customer expectations or the law. In addition, concern among real estate professionals or potential home buyers or sellers about our privacy practices could keep them from using our services and require us to alter our business practices or incur significant expenses to educate them about how we use this information. Further, changes in laws and regulations applicable to the privacy of personal information or in the interpretation or enforcement of such laws or regulations, could require us to modify our practices regarding use, collection, protection and disclosure of such information. Any required modifications could result in significant expenses to us.

***The value of our services could be diminished if anti-spam software filters out emails we send.***

Our prospect management system includes a feature that automatically sends out personalized email messages to prospective home buyers and sellers on behalf of real estate professionals who are our customers. In

## **Table of Contents**

addition, we send a large amount of email to real estate professionals as part of our customer acquisition strategy, some of which is unsolicited. In the past, anti-spam software used by Internet service providers and personal computer users has filtered out these email messages as unsolicited email, or spam. If this problem persists or becomes more pervasive, the value of our prospect management system to customers, and our ability to attract new customers, could be reduced, both of which would harm our business. In addition, it is possible that we may not currently or in the future fully comply with anti-spam legislation, and any failure to comply with such laws could result in penalties or damage our reputation.

***We rely on information from real estate multiple listing services provided by third parties that we do not control.***

The websites we provide to our software-as-a-service based customers combine aerial maps and for sale home listings, including listings in most of the major metropolitan markets in the United States. In addition, in selected markets, including most of the major metropolitan markets in the United States, we provide customers with functionality that allows them to automatically email their prospective clients information about newly available homes that meet the prospective clients' criteria. The for sale home listings information provided by our websites and the automated email functionality are supplied only in markets in which we, our broker customers, or the broker affiliated with our agent customers have a relationship with the local multiple listing service (MLS). Our agreements with MLSs to display property listings have short terms, or can be terminated by the MLSs, or, in some cases, the broker, with little notice. The success of our products depends in part on our continued ability to provide customers with MLS listings and data, as well as our ability to expand listings in markets in which it is not currently available. Our inability to supply this information will harm our business and operating results.

***If we fail to comply with the various laws and regulations that govern the real estate industry, our business may be harmed.***

Our business is governed by various federal, state and local laws and regulations governing the real estate industry, including the Real Estate Settlement Procedures Act (RESPA), the Fair Housing Act, state and local real estate broker licensing laws, federal and state laws prohibiting unfair and deceptive acts and practices, and federal and state advertising laws. We may not have always been and may not always be in compliance with each of these requirements. Failure to comply with these requirements may result in, among other things, revocation of required licenses, indemnification liability to contract counterparties, class action lawsuits, administrative enforcement actions and civil and criminal liability.

Due to the geographic scope of our operations and the nature of the services we provide, we may be required to obtain and maintain real estate brokerage licenses in certain states in which we operate. In connection with such licenses, we are required to designate individual licensed brokers of record. We cannot assure you that we are, and will remain at all times, in full compliance with state real estate licensing laws and regulations and we may be subject to fines or penalties in the event of any non-compliance. If in the future a state agency were to determine that we are required to obtain a real estate brokerage license in that state in order to receive payments or commissions from real estate professionals, or if we lose the services of a designated broker, we may be subject to fines or legal penalties or our business operations in that state may be suspended until we obtain the license or replace the designated broker. Any failure to comply with applicable laws and regulations may limit our ability to expand into new markets, offer new products or continue to operate in one or more of our current markets.

***We may be limited in the way in which we market our business or generate revenue by federal law prohibiting referral fees in real estate transactions.***

RESPA generally prohibits the payment or receipt of fees or any other thing of value for the referral of business related to a residential real estate settlement service, including real estate brokerage services. RESPA

## **Table of Contents**

also prohibits fee shares or splits or unearned fees in connection with the provision of residential real estate settlement services. However, RESPA expressly permits payments pursuant to cooperative brokerage and referral arrangements or agreements between real estate agents and brokers. In addition, RESPA permits payments for goods or facilities furnished or for services actually performed, so long as those payments bear a reasonable relationship to the market value of the goods or facilities furnished or the services performed, excluding the value of any referrals that may be provided in connection with such goods, facilities or services. Failure to comply with RESPA may result in, among other things, administrative enforcement actions, class action lawsuits, and civil and criminal liability.

There has been limited guidance by the appropriate federal regulator or the courts regarding the applicability of RESPA to online marketing relationships for real estate or mortgage services, including those we provide. Nonetheless, RESPA may restrict our ability to enter into marketing and distribution arrangements with third parties, particularly to the extent that such arrangements may be characterized as involving payments for the referral of residential real estate settlement service business.

***We rely on our sales force to sell our services and increase revenue. Failure to attract, motivate and retain qualified sales personnel may harm our business.***

We have high productivity standards for our sales personnel, which in the past has resulted in relatively high turnover. This turnover has required us to expend a substantial amount of time and money to replace sales persons as we expand our business. Competition for qualified sales personnel is intense. Any failure to attract, retain and motivate a sufficient number of qualified sales personnel could impair our ability to generate new customers, which would harm our business.

***Our business could be harmed by the actions of third parties over whom we have little or no control.***

Prospective home buyers and sellers could make a claim against us for the actions of a real estate agent or broker customer over whom we have little or no control. We do not conduct any due diligence or background checks on new customers or seek information regarding their credentials. We may be liable for content provided by customers that is posted on or disseminated through our websites. Our insurance may not be adequate to cover us for these liabilities, and, to the extent not covered by insurance, these liabilities could reduce our margins and harm our business.

***Our brand could be harmed if customers do not provide quality service to prospective home buyers and sellers.***

We rely on real estate professionals who are our customers of our lead-generation products to promote our brand by providing high-quality service to prospective home buyers and sellers. We have little control over the activities of customers. If customers do not provide prospective home buyers and sellers with high-quality service, or if they use the functionality of our systems to send unwanted email to prospective home buyers or sellers, our brand value and our ability to generate leads may diminish.

***Our operating results may be subject to seasonality and may vary significantly among quarters during a calendar year.***

We are subject to seasonal fluctuations in advertising rates and lead-generation. Changing consumer behavior at various times throughout the year affects our advertising expenses. Television advertising is generally more expensive in the fourth calendar quarter in connection with the holiday season.

While individual markets vary, real estate transaction activity tends to progressively increase from January through the summer months, and then gradually slows over the last quarter of the calendar year. The real estate industry generally experiences decreased activity toward the end of the year, which may result in slower lead-generation and lower growth rates.

---

**Table of Contents**

Throughout the history of our company, our quarterly revenue changes have masked seasonality effects. As a result, investors may be unable to predict our annual operating results based on a quarter-to-quarter comparison of our operating results.

***Third parties may copy or otherwise obtain and use our proprietary information without authorization or develop similar technology independently.***

We currently rely on a combination of copyright, trademark and trade secret laws and confidentiality procedures to establish and protect our proprietary rights. If we fail to successfully enforce our intellectual property rights, the value of our services could be diminished and our business may suffer. Our success depends in large part on our proprietary technology and on our continuing use of our trademarks. We hold fifteen registered trademarks registered in the United States and four trademarks registered in Canada. We have sought registration for a number of additional trademarks. We have not sought registration for any copyrights. We have not been issued any patents and do not have any pending patent applications. Accordingly, our intellectual property position is more vulnerable than it otherwise would be if it were protected by issued patents, copyrights or additional registered trademarks. We may not receive approval of our various trademark applications, and any trademarks we may be granted may be successfully challenged by others or invalidated. If our trademark applications are not approved or if our trademarks are invalidated, our use of them could be restricted unless we enter into arrangements with these third parties, which might not be possible on commercially reasonable terms, if at all.

We regard substantial elements of our websites, software tools and applications and underlying technology as proprietary. Despite our precautionary measures, third parties may copy or otherwise obtain and use our proprietary information without authorization or may develop similar technology independently. We may not be able to detect such infringements or may lose any competitive advantage in the market before we do so. In addition, competitors may design around our technology or develop competing technologies substantially similar to ours. Unauthorized parties may attempt to disclose, obtain or use our technology. Our precautions may not prevent misappropriation of our intellectual property, particularly in foreign countries where laws or law enforcement practices may not protect our proprietary rights as fully as in the United States. Any legal action that we may bring to protect our proprietary information could be unsuccessful and expensive and could divert management's attention from other business concerns. Legal standards relating to the validity, enforceability and scope of protection of proprietary rights in Internet-related businesses are uncertain and evolving, and we cannot assure you of the future viability or value of any of our proprietary rights.

***Increased government regulation of the Internet and claims under state consumer protection laws could force us to change the manner in which we conduct our business or result in monetary fines or increased costs.***

The adoption or modification of laws or regulations relating to the Internet could adversely affect the manner in which we currently conduct our business. In addition, the growth and development of the market for online commerce may lead to more stringent consumer protection laws that may impose additional burdens on us. Laws and regulations relating to communications or commerce over the Internet are becoming more prevalent. In addition, the interpretation and application of laws applicable to the Internet remain largely unsettled, even in areas where there has been some legislative action. It may take years to determine whether and how existing laws, such as those governing intellectual property, privacy, libel and taxation, apply to the Internet. New laws and regulations, and changes in the interpretation of existing laws and regulations relating to the Internet, could lead to situations in which we are considered to operate or do business in states where customers conduct their business, resulting in potential claims or regulatory action. If we are required to comply with new laws or regulations or new interpretations of existing laws or regulations, or if we are unable to comply with these laws or regulations, our business could be harmed. Our practices may not have always been and may not always be in compliance with the requirements of Internet-related laws or regulations. Failure to comply with these laws and regulations could result in administrative enforcement actions, class action lawsuits, and civil and criminal liability.

## **Table of Contents**

We may be subject to claims under state consumer protection statutes if our customers are dissatisfied with the quality of our leads, customer service, training programs or contract cancellation policies. These claims could result in monetary fines or require us to change the manner in which we conduct our business, either of which could have a material adverse effect on our business and results of operations. Any of these types of claims, regardless of merit, could be time-consuming, could harm our reputation and could be expensive to litigate or settle.

### ***Changes in government regulation of advertising and customer solicitation could affect our business.***

We rely on various marketing channels, such as email and other means of electronic and telephonic communication, to reach real estate professionals, prospective home buyers and sellers and other consumers. The laws governing marketing and advertising continue to evolve and we may be subject to restrictions that limit our ability to continue to operate or expand our business, which could result in legal claims or government action. For example, a federal statute places restrictions on unsolicited commercial email, commonly known as spam, and imposes obligations upon senders of commercial email. Additionally, state laws governing falsity or deception with regard to email apply in addition to the federal statute. These federal and state laws impose significant civil and criminal penalties for violations. As the interpretation and enforcement of these laws evolve, they may impose burdens on our email marketing practices and affect features of our Customer Relationship Management systems and other services we offer or may offer. In addition, federal and state statutes prohibiting false or deceptive acts in commerce apply to Internet advertising, and some states have passed legislation regulating Internet advertising. The requirements of some of these laws, and their interpretation and enforcement by governmental authorities, are not clear and uniform. These laws may adversely affect our ability to market our services to real estate industry participants in a cost-effective manner and the violation of these laws may result in enforcement actions and penalties or damage our reputation.

### ***Our sales activities are or may in the future be subject to laws regulating telemarketing, which could subject us to penalties or limit our ability to market our services.***

Both federal and state laws regulate the practice of telemarketing and placing other commercial telephone calls. All 50 states have enacted some form of telemarketing law, and federal statutes and regulations place restrictions on live, recorded and text telemarketing calls. In particular, the federal government and a significant number of states have implemented do not call lists. In addition, a number of states require telemarketers to register with the state and post a bond, regulate or prohibit automated systems and recorded messages, impose disclosure requirements upon sales calls and require written sales contracts for certain telemarketing transactions. We are subject to certain of these laws, and our failure to register in a jurisdiction where we are required to do so could subject us to penalties, limit our ability to market our services and hamper our ability to enforce contracts in these jurisdictions. Other violations of these laws may damage our reputation and may result in administrative enforcement, fines and civil or criminal penalties.

### ***Any failure of our technology to perform satisfactorily could result in lost revenue, damage to our reputation and expenditure of significant resources.***

Our technology is relatively new and complex and may in the future be subject to errors, defects or performance problems. In addition, we may encounter problems when we update our technology to expand and enhance its capabilities. Our technology may malfunction or suffer from defects that become apparent only after further use. Furthermore, our services could be rendered unreliable or be perceived as unreliable by customers or prospective home buyers and sellers. In such instances, we would need to expend significant resources to address these problems, and may nonetheless be unable to adequately remedy these problems. These problems could result in lost revenue and damage to our reputation.

## **Table of Contents**

### ***Sustained or repeated system failures could significantly impair our operations and lead to customer dissatisfaction.***

The continuous and uninterrupted performance of our systems is critical to our success. Our operations depend on our ability to protect these systems against damage from fire, power loss, water, earthquakes, telecommunications failures, viruses, vandalism and other malicious acts and similar unexpected adverse events. Customers and prospective home buyers and sellers may become dissatisfied by any system failure that interrupts our ability to provide our services to them.

Our services substantially depend on systems provided by third parties, over whom we have little control. Interruptions in our services could result from the failure of telecommunications providers and other third parties to provide the necessary data communications capacity in the time frame required. Our operations depend on our ability to maintain and protect our computer systems, located at our headquarters in Kirkland, Washington and at co-location facilities operated by third parties. We depend on these third-party providers of Internet communication services to provide continuous and uninterrupted service. We also depend on Internet service providers that provide access to our services. Any disruption in the Internet access provided by third-party providers or any failure of third-party providers to handle higher volumes of user traffic could harm our business.

### ***Our customers, our reputation and our products may be harmed by security breaches.***

Unauthorized computer programmers, or hackers, may attempt to penetrate our network security from time to time. A hacker who penetrates our network security could misappropriate personal information about our customers, proprietary information or cause interruptions in our services. We might be required to expend significant capital and resources to protect against, or to alleviate, problems caused by hackers. We also may not have a timely remedy against a hacker who is able to penetrate our network security. In addition to purposeful security breaches, the inadvertent transmission of computer viruses could adversely affect our systems and harm our business.

Several payment card brands and an independent standards body have adopted security standards, compliance with which is required of all merchants and service providers that process, transmit or store certain types of personal information pertaining to credit card holders. If we fail to comply with these standards, we could be subject to fines and our ability to accept some or all credit cards could be restricted or suspended. Any such suspension or restriction would significantly affect our ability to collect fees from our customers, many of whom pay with a credit card. This would result in harm to our business.

Additionally, the majority of states and various federal regulatory bodies now require companies that maintain personal information about consumers to notify those consumers in the event of a breach of security in which certain types of personal information relating to those consumers is, or is suspected to have been, obtained by an unauthorized person. These laws vary in their scope and requirements, and some of them also require notice to governmental agencies and other third parties. In addition, other public disclosure laws may require that material security breaches be reported. If we are required to disclose a security breach to consumers or other third parties, our business and reputation could be harmed.

### ***We may invest our cash in securities that become illiquid or that significantly decrease in value.***

We may invest our cash in securities that are affected by adverse market conditions. Current market conditions and lack of investor confidence have led to reduced liquidity in securities that had previously been viewed as more liquid. As a result, our investments may decline in value, or we may not be able to access our cash equivalents or short-term investments when needed for strategic investment purposes or for operations and capital expenditures. Loss of cash value and inability to access funds would harm our business.

**Table of Contents**

*If we do not have access to additional funds on acceptable terms, we may be unable to continue to expand our business or service offerings.*

To pursue our current and future business plans, we may choose to seek additional funding through public or private financings, including equity financings, and through other arrangements. Poor financial results, unanticipated expenses or unanticipated opportunities that require financial commitments could give rise to additional financing requirements sooner than we expect. However, financing may be unavailable when we need it or may not be available on acceptable terms. Recently, the general economic and capital market conditions in the United States and other parts of the world have deteriorated significantly and have adversely affected access to capital and increased the cost of capital. As a result, we may be unable to obtain financing and may be required to delay, scale back or eliminate expenditures for future strategic initiatives, operations or capital expenditures. If we raise additional funds by issuing equity or convertible debt securities, the percentage ownership of our existing shareholders would be reduced and these securities might have rights superior to those of our common stock.

**ITEM 1B: UNRESOLVED STAFF COMMENTS**

None

**ITEM 2: PROPERTIES**

We lease approximately 31,000 square feet of commercial office space in the greater Seattle, Washington area. The leases expire in 2013 and include options to extend the terms for periods between two and five years.

**ITEM 3: LEGAL PROCEEDINGS**

From time to time, we may become involved in litigation relating to claims arising from the ordinary course of our business, including actions relating to employment issues. We believe that there are no claims or actions pending or threatened against us, the ultimate disposition of which would have a material adverse effect on us.

**ITEM 4: (REMOVED AND RESERVED)**

**Table of Contents****PART II****ITEM 5: MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Market Information for Common Stock**

Our common stock is traded on The Nasdaq Global Select Market under the symbol LEDR. The following table shows the high and low sales prices for our common stock as reported by The Nasdaq Global Select Market for the periods indicated.

<b>Year</b>	<b>High</b>	<b>Low</b>
<b>Fiscal 2009 (ended December 31, 2009)</b>		
First Quarter	\$ 1.93	\$ 1.25
Second Quarter	2.00	1.39
Third Quarter	2.30	1.70
Fourth Quarter	2.48	1.80
<b>Fiscal 2010 (ended December 31, 2010)</b>		
First Quarter	\$ 2.19	\$ 1.88
Second Quarter	2.41	1.91
Third Quarter	2.15	1.74
Fourth Quarter	2.15	1.66

 **Holders**

At March 10, 2010 there were approximately 18 holders of record of our common stock. This does not include the number of persons whose stock is in nominee or street name accounts through brokers.

 **Dividends**

We have not paid cash dividends since 2003 when we were a private company. We do not anticipate paying cash dividends on our capital stock in the foreseeable future.

 **Stock Repurchases by Market Leader**

We did not repurchase any shares of our common stock during the fourth quarter of 2010. See Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations Purchase and Retirement of Common Stock for information on stock repurchases during 2010.

 **Use of Proceeds**

On December 9, 2004, the Securities and Exchange Commission declared effective our registration statement on Form S-1 (SEC File No. 333-118740) in connection with our initial public offering of common stock, which resulted in net proceeds to the company of \$56.1 million. Through December 31, 2010, we have used approximately \$46.8 million of the net proceeds from our initial public offering to purchase property and equipment, intangible assets, and to complete acquisitions, including related earn-out payments. The remaining proceeds have been invested in U.S. Treasury securities money market funds with short-term weighted average duration, U.S. Treasury bills, and FDIC-insured certificates of deposit with maturities of one year or less. Our current and planned use of the proceeds does not represent a material change from the use of proceeds described in the prospectus relating to the Registration Statement on Form S-1.

*You should read the following discussion and analysis of our financial condition and results of operations in conjunction with our consolidated financial statements and the accompanying notes included elsewhere in this Annual Report on Form 10-K. This discussion contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of the inherent risks and uncertainties, including those discussed in the introductory paragraph to Item 1 Business and in Item 1A Risk Factors of this Annual Report. Given these risks and uncertainties, you should not place undue reliance on these forward looking statements. The forward-looking statements are made as of the date of this report and, except as required by law, we assume no obligation to update any such statements to reflect events or circumstances after the date hereof.*

**Overview**

Market Leader, Inc. is a leading provider of software-as-a-service offerings and related services for the real estate industry. Market Leader provides real estate agents, and brokerage companies with subscription software and advertising products that enable them to generate a steady stream of prospects, as well as the tools and training they need to convert these prospects into clients.

**Current Year Overview**

Market Leader's business saw an inflection point in 2010 as sequential quarterly revenue increased every quarter following four years of quarterly revenue declines. We have been successful driving new revenue with a growing number of customers using our newer software-as-a-service based products, and that revenue growth has largely offset attrition from our traditional products. Starting in the fourth quarter, additional software-as-a-service revenues from the consolidation of ActiveRain Real Estate Network (ActiveRain) drove annual revenue to \$24.4 million, a 2% increase over the prior year.

We increased our ActiveRain ownership percentage to 51% at the end of third quarter with the acquisition of an additional 18% of the outstanding voting stock of for \$450. ActiveRain is a provider of professional networking, referral, recruitment, content syndication and online marketing services for a growing community of over 200,000 professionals in real estate and related businesses. Our incremental investment in ActiveRain provides access to a sizable and rapidly growing professional community which we expect will help us increase our effectiveness in selling our premium software-as-a-service offerings.

We continued to make progress shifting our business model toward our software-as-a-service based products in 2010. We began to shift in 2008 from traditional lead-generation products to offerings that combine software-as-a-service with access to advertising-buying and lead-generation services. Our original business model is represented by our HouseValues and JustListed products while our new model is represented by our products including Growth Leader and RealtyGenerator. See Business for a specific discussion of our products. Our acquisition of Realty Generator, LLC in November 2007 enabled us to leverage the technology and business model acquired to develop these software-as-a-service based products. Revenue from software-as-a-service based products increased 65% in 2010 from 2009 and represented 62% of our revenue in 2010, demonstrating the progress on our business model shift.

Our longer term goal is to return the company to profitable growth, and we believe that to do so will require a resurgence in customer acquisition. Towards that goal, we accelerated our customer acquisition efforts during 2010. A significant portion of the increase was dedicated to the development and expansion of marketing programs through leading real estate franchise networks, based on our success with that channel in 2009 with Realty Executives International. These efforts gained substantial traction with several leading franchise networks in 2010, leading to significant signings of our RealtyGenerator product. In addition, we expanded the sales team to expand our reach to the higher value brokerage office customers.

**Table of Contents**

The significant majority of new brokerage customers signed in 2010 took advantage of compelling offers that waive set-up and software-as-a-service fees during the promotional period even while we incur and expense the costs of acquiring these customers as well as their lead-generation costs. Initially, the acquisition of these customers has a substantial negative impact on our near term operating results as related expenses exceed the revenue that they contribute. We expect to reap long-term benefits as a result of these customer acquisition investments, based upon experience that suggests more than half of these customers will convert at the conclusion of the promotional periods to ongoing accounts that generate software-as-a-service fees in addition to advertising revenue for the life of the customer.

We used cash in operations in 2010 as part of a strategy to better present our new solutions and to acquire customers we expect to have high lifetime value. We believe that the strategic value of investment in our business has been significantly enhanced by our introduction of innovative products and new sales channels. These benefits were exemplified by an agreement with Keller William Realty International (Keller Williams) that represents the largest deal in Market Leader history.

In January 2011, we announced that Market Leader was selected by Keller Williams, one of the nation's largest real estate franchisors, to provide a franchise-wide real estate marketing and business platform under a five year agreement. The agreement provides for minimum payments from Keller Williams totaling approximately \$10 million through the initial term, beginning in April 2011 and paid on a quarterly basis. In February 2011, we successfully fulfilled the first phase of this agreement by making its platform available to nearly 80,000 Keller Williams agents across the United States and Canada. As a result, Market Leader is significantly increasing its user base as Keller Williams agents adopt this new platform. In addition, we are increasing our ability to up-sell premium software and services in the future. Overall, our agreement with Keller Williams is expected to begin to significantly contribute to revenue growth starting in the second half of 2011.

While making strategic investments in our products and customer acquisition, we continue to avoid non-strategic uses of cash. We reduced a significant non-strategic expense as a result of our successful renegotiation of our Kirkland, Washington facility lease midway through 2009, realizing the full cost savings benefit in 2010. The lease amendment eliminated the expense of excess space, avoided fees for early lease termination, and kept the team in our current location focused on building the business.

**Results of Operations**

The following table presents our historical operating results as a percentage of revenues for the periods indicated:

	<b>Years Ended December 31,</b>	
	<b>2010</b>	<b>2009</b>
Revenues	100%	100%
Expenses:		
Sales and marketing	98	81
Technology and product development	22	21
General and administrative	24	29
Depreciation and amortization of property and equipment	10	12
Amortization of acquired intangible assets	8	8
Total expenses	162	151
Loss from operations	(62)	(51)

**Table of Contents****Comparison of Years Ended December 31, 2010 and December 31, 2009***Revenues*

	Years Ended December 31,			Percent Change
	2010	2009 (dollars in thousands)	Change	
Revenues	\$ 24,430	\$ 23,935	\$ 495	2%

2010 revenues increased 2% from last year, reflecting the inclusion of ActiveRain revenue in the fourth quarter of 2010 as well as an increase in our average monthly revenue per customer in 2010 for customers of products other than those offered by ActiveRain. The increased average revenue per customer is being driven in part by the increase in the number of high-value RealtyGenerator customers from 2009 to 2010. Ending customers at December 31, 2010 also increased compared to December 31, 2009 as a result of our success in driving a growing number of customers using our newer software-as-a-service based products, which has offset attrition from our traditional products.

More detailed information about the change in revenue and customers is included under the heading, *Key Operational Metrics* below.

Based upon our increased focus on and investment in customer acquisition, we expect to grow revenue every quarter in 2011, and that growth in our software-as-a-service based products will more than offset continued attrition from our traditional products. In addition, we expect revenue contribution from our new relationship with Keller Williams in the second half of the year.

*Sales and Marketing*

	Years Ended December 31,			Percent Change
	2010	2009 (dollars in thousands)	Change	
Sales and marketing expense	\$ 23,908	\$ 19,297	\$ 4,611	24%

Sales and marketing expenses consist primarily of customer acquisition costs and lead-generation costs, as well as customer support and servicing costs. These expenses take the form of online advertising expenses, salaries, commissions and related expenses for our sales, marketing and customer support staff. Other expenses include corporate marketing and communications expenses and merchant card processing fees.

Sales and marketing expense increased significantly in 2010, consistent with our plans to invest in new customer acquisition. Customer acquisition costs increased with higher sales and marketing staffing levels and marketing programs, especially those targeted at franchise network relationships, as well as the addition of ActiveRain's sales and marketing expenses beginning in the fourth quarter. We also increased advertising costs as customer demand for lead-generation services expanded relative to the growth in our software-as-a-service based products. Lead-generation costs are a higher percentage of revenue for those products, particularly for customers who are only paying for lead-generation services during promotional periods. We believe the software-as-a-service based product offerings deliver better value for our customers and are driving better customer retention rates, leading to improved operating results over time.

In 2011, we expect to continue to focus on customer acquisition and maintain that component of our sales and marketing spend. Advertising expenses will increase relative to increases in customer demand for lead-generation services. We also expect modest increases in our customer support and servicing costs as we grow our customer base. However, we expect sales and marketing spend to decrease as a percentage of revenue during 2011.

**Table of Contents***Technology and Product Development*

	Years Ended December 31,			Percent Change
	2010	2009 (dollars in thousands)	Change	
Technology and product development expense	\$ 5,358	\$ 5,114	\$ 244	5%

Technology and product development expenses consist primarily of salaries and related expenses for employees responsible for customer and internal technology services. Also included are license fees, maintenance costs, Internet and phone connectivity and hosting costs. Technology costs are reduced for the costs of new product development that are capitalized.

Technology and product development expense increased modestly in 2010 due to the addition of ActiveRain's technology costs beginning in the fourth quarter, as well as a higher level of activity to implement new products and to transition customers to a new software platform in 2010, compared to the same period in 2009.

In 2011, we expect the level of technology and product development costs to increase as we incur third party software licensing costs that are part of the new product we are delivering to Keller Williams starting in the first quarter of 2011. Technology expenses will fluctuate depending on the level of effort required to develop new products, which costs are subject to capitalization.

*General and Administrative*

	Years Ended December 31,			Percent Change
	2010	2009 (dollars in thousands)	Change	
General and administrative expense	\$ 5,920	\$ 6,915	\$ (995)	(14%)

General and administrative expenses consist primarily of salaries and related expenses for executive, accounting, and human resources personnel. These costs also include audit and legal fees, business consulting fees, business insurance premiums, rent and related expenses.

General and administrative expense decreased due to reduced staffing, professional fees and occupancy expenses. Staffing costs declined due to reduced headcount, lower stock compensation charges, and a decrease in the use of consultants. Lower occupancy expenses reflect the terms of our amended lease that reduced the size of our corporate headquarters. These reduced expenses were partially offset by the addition of ActiveRain's general and administrative expense effective in the fourth quarter of 2010, as well as an increase in recruiting fees.

In 2011, we expect general and administrative expenses to increase in part from the addition of expenses from consolidating ActiveRain operating results.

*Depreciation and Amortization of Property and Equipment*

Depreciation and amortization of property and equipment decreased in 2010 primarily because many assets became fully depreciated during 2010 and due to the renegotiation of our office lease which accelerated the amortization on certain tenant improvements in 2009.

**Table of Contents**

*Amortization of Acquired Intangible Assets*

Amortization of intangible assets decreased for 2010 when compared to 2009, as certain intangible assets became fully amortized. This decrease was partially offset by the addition of amortization on ActiveRain intangible assets following our acquisition of a controlling interest late in the third quarter of 2010.

*Equity in Loss of Unconsolidated Subsidiary*

Our equity in the losses of ActiveRain in 2010 was consistent with the level in 2009. We will no longer report these results as ActiveRain is now included in our consolidated operating results.

*Interest Income and expense, net*

Interest income decreased in 2010 when compared to 2009 due to decreased rates of return on investments as well as a reduction in the amount of cash, cash equivalents and short-term investments held. At December 31, 2010, we held \$45.3 million in cash, cash equivalents and short-term investments compared to \$51.4 million in cash, cash equivalents and short-term investments at December 31, 2009.

*Income Taxes*

We recognized a \$4.8 million tax benefit in 2009 as a result of legislation passed in November 2009 that allowed us to carryback our 2009 operating losses and recover taxes paid in 2004 and 2005. There was no similar carryback opportunity in 2010.

The majority of our deferred tax assets and liabilities are expected to reverse over the next five years, except for prior years net operating losses. We believe that based on the decline in the national real estate market and our continued operating losses, it is more likely than not that we will be unable to generate sufficient taxable income to realize our deferred tax assets. Accordingly, a full valuation allowance has been recorded against our deferred tax assets.

**Table of Contents****Quarterly Consolidated Statements of Operations**

The following tables present the unaudited operational data for the eight quarters ended December 31, 2010. This quarterly information has been prepared on the same basis as our audited consolidated financial statements and, in the opinion of our management, reflects all adjustments necessary for a fair representation of the information for the periods presented. This data should be read in conjunction with our audited consolidated financial statements and the related notes included in this filing. Operating results for any quarter apply to that quarter only and are not necessarily indicative of results for any future period.

**Table of Contents**

Adjusted EBITDA is a non-GAAP financial measure provided as a complement to results in accordance with accounting principles generally accepted in the US. Adjusted EBITDA is not a substitute for measures determined in accordance with GAAP, and may not be comparable to Adjusted EBITDA as reported by other companies. Our use of the term Adjusted EBITDA refers to a financial measure defined as earnings or loss before net interest, income taxes, depreciation, amortization, stock-based compensation, and, to the extent relevant to a particular period, net loss available to non-controlling interest, equity in loss of unconsolidated subsidiary, and gain on valuation of investment in subsidiary. We believe Adjusted EBITDA to be relevant and useful information to our investors as this measure is an integral part of our internal management reporting and planning process and is the primary measure used by our management to evaluate operating performance. See the table below for a reconciliation of Adjusted EBITDA to net loss, the most comparable GAAP measure.

---

**Table of Contents**

- (1) Real estate professional revenues consist of all revenue generated from our real estate professional customers, primarily for our RealtyGenerator, Team Leader, Growth Leader, HouseValues, JustListed and Market Leader CRM products.
- (2) Other revenues consist primarily of ActiveRain revenues and other miscellaneous revenue streams.
- (3) Real estate professional customers consist of real estate agents subscribing to our Growth Leader, Team Leader, HouseValues, JustListed and Market Leader CRM products and real estate brokers subscribing to our RealtyGenerator product.
- (4) One minus our average monthly churn rate equates to our average monthly retention rate. Average monthly customer churn is calculated by dividing the number of customers who canceled during the quarter by the average customers in the quarter, divided by the number of months in the quarter. Other companies may calculate churn and retention differently, and their churn and retention data may not be directly comparable to ours.
- (5) Average real estate professional customers in the quarter are calculated as the average of customers at the beginning and at the end of the quarter.
- (6) Average monthly revenue per customer is calculated as real estate professional revenue for the quarter divided by the average number of customers in the quarter.

Ending customers at December 31, 2010 increased by 70 customers compared to December 31, 2009. We have focused efforts on customer acquisition, particularly of higher value RealtyGenerator customer. While our customer count increased modestly during 2010, our brokerage office customers became an increased share of our customer base, which is helping to drive our revenue growth.

The average monthly retention rate for our customers was 93.8% for the fourth quarter of 2010, a decline from the third quarter of 2010 retention rate of 94.4%. While customer retention decreased this quarter, the rate remained strong when compared with the past sixteen directly comparable quarters. We believe that the continued strong trend can be attributed to a combination of factors – the increased portion of revenue from our software-as-a-service based products, a smaller overall customer base, as well as the strong retention of customers who have been with us for two or more years. However, due to the continued volatility of the real estate market and broader economic concerns, we expect to experience fluctuations in our customer retention rate from quarter to quarter.

Average monthly revenue per customer for the fourth quarter of 2010 increased slightly compared to the third quarter of 2010 as a result of the shift in our product mix towards our broker and other software-as-a-service based products. Average revenue per customer will fluctuate from quarter to quarter based on our customer mix, as well as the mix of sales for products priced differently across lower and higher priced geographies, pricing adjustments we may make in response to the market conditions, the demand for existing services and the acceptance of new product offerings.

**Liquidity and Capital Resources**

Our principal sources of liquidity are our cash, cash equivalents and short-term investments, as well as the cash flow that we may generate from our operations. Our cash, cash equivalents and short-term investments totaled \$45.3 million at December 31, 2010 as compared to \$51.4 million at December 31, 2009.

We follow an investment strategy that prioritizes the preservation and security and liquidity of our funds, which has resulted in significantly lower rates of return. As of December 31, 2010, we have invested in cash equivalents consisting of money market funds that hold U. S. Treasury securities with short-term weighted average duration. Short-term investments are comprised of U. S. Treasury bills and notes and FDIC-insured certificates of deposit with terms of one year or less.

We believe that our existing cash, cash equivalents and short-term investments will be sufficient to satisfy our currently anticipated cash requirements through at least the next twelve months. Our future capital requirements will depend on many factors, including our revenue trend, the level of our marketing and sales activities, the timing and extent of spending to support product development efforts, and the timing of introductions of new services and enhancements to existing services.

**Table of Contents**

The following table presents summary cash flow data:

	<b>Year Ended December 31,</b>	
	<b>2010</b>	<b>2009</b>
	<b>(dollars in thousands)</b>	
Cash used in operating activities	\$ (3,595)	\$ (4,338)
Cash used in investing activities	(4,906)	(17,693)
Cash used in financing activities	(246)	(203)

***Operating Activities***

Net cash used in operating activities consists of our net operating results adjusted for certain non-cash items, including depreciation, amortization, stock-based compensation, gain on valuation of investment in subsidiary, equity in loss of our unconsolidated subsidiary, and the effect of changes in working capital. We used cash in operations of \$3.6 million in 2010 compared to cash used in operations of \$4.3 million in 2009. Cash used in operations decreased in 2010 primarily due to the receipt of our income tax receivable that was largely offset by an increase in our net loss after non-cash items.

***Investing Activities***

Cash used in investing activities for 2010 was \$4.9 million compared to the cash used in investing activities for 2009 of \$17.7 million. During 2010, we made net short-term investments of \$2.6 million compared to net short-term investments of \$15.0 million in 2009.

***Financing Activities***

Cash used in financing activities during 2010 was consistent with the same period in 2009.

**Purchase and Retirement of Common Stock**

In October 2006, our Board of Directors authorized a share repurchase program to purchase and retire up to 2 million shares of our common stock. We did not make any purchases pursuant to the share repurchase program during 2010. At December 31, 2010, 928,043 shares remain available for purchase under the share repurchase program. During 2010, an aggregate of 175,581 shares of our common stock were tendered at amounts between \$1.87 and \$2.02 per share, in satisfaction of employees' income taxes upon the vesting of restricted stock.

**Critical Accounting Policies and Estimates**

Our financial statements are prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, costs and expenses and related disclosures. We base our estimates on historical experience and on other assumptions that we believe to be reasonable under the circumstances. Actual results may differ from these estimates. The following discussion highlights the policies and estimates we feel are critical.

***Business Combinations, Intangible Assets, and Goodwill***

*Valuation when acquired.* We account for our business combinations using the purchase method of accounting, which requires that we record the assets acquired and liabilities assumed at their fair values on the date of acquisition, as well as the valuation of any contingent consideration. Significant judgment is used to estimate the fair values of the assets and liabilities acquired, including estimating future cash flows from the acquired business, determining appropriate discount rates, asset lives and other assumptions.

---

## **Table of Contents**

*Ongoing reporting and impairment testing.* Our intangible assets, other than goodwill, and other long-lived assets are amortized or depreciated over their estimated useful lives and are tested for recoverability whenever events or changes in circumstances indicate that carrying amounts may not be recoverable. The assessment of impairment of long-lived assets, including goodwill requires significant judgment to determine the asset groups and number of reporting units, to estimate future undiscounted cash flows, to use appropriate market value factors, to estimate the related asset lives and other assumptions as noted below. Changes in these estimates and assumptions can materially affect the fair value determination and potential goodwill impairment.

*Results of impairment tests.* Based on our continued operating losses, we evaluated our long-lived assets for impairment during 2009 and 2010 and determined that our long-lived assets were not impaired.

We evaluated our recently established goodwill for impairment in the fourth quarter of 2010. Consistent with the outcome of our long-lived asset assessment, we determined our goodwill was not impaired.

Our impairment analysis for goodwill was dependent on many variables. We determined the fair value of our net assets based on a combination of market and income approaches. Key assumptions used in the market approaches included the determination that we have a single reporting unit, the appropriate stock price to determine market value, use of control premium and determination of the appropriate control premium, and determination of an appropriate set of comparable companies. Key assumptions in the income approach were based on a discounted cash flow model, which included significant assumptions about our future revenues, expenses, target profitability rates, and determination of an appropriate discount rate.

Our impairment analyses for our long-lived assets other than goodwill included a number of key variables, included estimated future cash flows. We determined the fair value of our long-lived assets based on several key assumptions, including the determination that we have a single asset grouping, references to quoted market prices for similar assets, as well as assumptions about our future revenues, expenses, and target profitability rates.

As of December 31, 2010, we have \$1.0 million in goodwill and approximately \$6.2 million of long-lived assets. While we continue to depreciate the long-lived assets, at the same time, we continue to capitalize costs related to internally generated software and may acquire other capital assets. Factors that may require future assessments of impairment of our goodwill and long-lived assets include, among others, deterioration of our estimate of future cash flows, stock price, lower customer revenues and lower retention rates than projected.

### ***Accounting for Income Taxes***

We use the asset and liability method of accounting for income taxes. Deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax basis of assets and liabilities and for operating loss carryforwards in our existing business and related to acquisitions. We must make significant assumptions, judgments and estimates to determine the provision for income taxes and the related current and deferred tax assets and liabilities, as well as the valuation allowance to be recorded against deferred tax assets. Our judgments, assumptions and estimates must take into account current tax laws, our interpretation of current tax laws and possible outcomes of future tax audits.

New tax legislation was passed in November 2009, which allowed us to carry back 2009 losses up to five years. As a result, we recognized a \$4.8 million tax benefit in 2009 and received the related tax refund in 2010.

Changes in the amount of our operating losses, changes in the tax laws or our interpretation of the tax laws and the resolution of future tax audits could significantly impact the amounts provided for income taxes and the amount of valuation allowances required in our consolidated financial statements.

At December 31, 2010, we have gross deferred tax assets of \$14.6 million, before reduction for our valuation allowance. We considered all available evidence to determine whether a valuation allowance was

**Table of Contents**

required for those assets, including the following factors: estimates regarding the timing and amount of the reversal of taxable temporary differences, taxable income in prior carryback years as permitted under tax law, and historical taxable income normalized for non-recurring items, expected future taxable income, and the impact of tax planning strategies. A valuation allowance is required when it is more likely than not that all or a portion of a deferred tax asset will not be realized. Based on our current projections of future operating profits, we continue to believe that it is not likely that we will be able to realize our deferred tax assets and continue to maintain a valuation allowance for the full amount of our net deferred tax assets at December 31, 2010.

We account for uncertainty in income taxes using a more-likely-than-not recognition threshold based on the technical merits of the tax position taken. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of the tax benefits, determined on a cumulative probability basis, which is more likely than not to be realized upon effective settlement. Our accounting policy is to recognize interest and penalties related to income tax matters as tax expense.

**Stock-Based Compensation**

We recognize stock-based compensation related to option grants using the fair value based method. We use the Black-Scholes pricing model which requires the input of highly subjective assumptions, including estimating the stock option expected life and stock price volatility. Changes in any of these assumptions could materially impact the estimated fair value of options granted.

The following table illustrates the effect of changing these significant variables on the estimated fair value of our options. The following examples are hypothetical but representative of our option grants and their related fair values at December 31, 2010. In each analysis, the remaining variables are held constant. This illustration is not intended to provide a range of exposure or expected deviation.

Effect of a 10% change in our stock price volatility estimate:

	-10%	Current Volatility Estimate	+10%
Stock option volatility	50%	60%	70%
Estimated fair value	\$ 0.71	\$ 0.83	\$ 0.94

Effect of a 1-year change in expected life of our stock options:

	-1 Year	Current Expected Life Estimate	+1 Year
Estimated option life	2.5 years	3.5 years	4.5 years
Estimated fair value	\$ 0.71	\$ 0.83	\$ 0.93

**Recent Accounting Pronouncements**

In January 2010, the FASB issued ASU 2010-06, *Fair Value Measurements and Disclosures: Improving Disclosures about Fair Value Measurements* ( ASU 2010-06 ), which requires additional disclosures and clarifies some existing disclosure requirements about fair value measurement. ASU 2010-06 amends Codification Subtopic 820-10 to require a reporting entity to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 of the fair value hierarchy and describe the reasons for the transfers. The ASU also requires additional information in the roll-forward of Level 3 assets and liabilities including the presentation of purchases, sales, issuances and settlements on a gross basis. The Company adopted ASU 2010-06 beginning January 1, 2010, with the exception of the additional information in the roll-forward of Level 3 assets and liabilities, which will be effective for fiscal years beginning after December 15, 2010. This adoption had no impact on our financial position, results of operations or cash flows and we expect to provide any additional disclosure required for Level 3 assets and liabilities in our first quarter report in 2011.

---

**Table of Contents**

In October 2009, the FASB issued Accounting Standards Update ( ASU ) No. 2009-13, *Multiple-Deliverable Revenue Arrangements* ( ASU 2009-13 ). ASU 2009-13 establishes the accounting and reporting guidance for arrangements including multiple revenue-generating activities, and provides amendments to the criteria for separating deliverables, and measuring and allocating arrangement consideration to one or more units of accounting. The amendments of ASU 2009-13 also establish a selling price hierarchy for determining the selling price of a deliverable. Significantly enhanced disclosures are also required to provide information about a vendor s multiple-deliverable revenue arrangements, including information about the nature and terms, significant deliverables, and its performance within arrangements. The amendments also require providing information about the significant judgments made and changes to those judgments and about how the application of the relative selling-price method affects the timing or amount of revenue recognition. The amendments in ASU 2009-13 are effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. We do not expect the adoption of this new standard to have a material impact on our financial position, results of operations or cash flows.

**ITEM 7A: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

Not applicable.

**ITEM 8: FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA**

See Item 15 Exhibits and Financial Statement Schedules for the Index to the consolidated financial statements and supplementary data required by this item, which are filed as part of this report and are incorporated herein by reference.

See Item 7 Management s Discussion and Analysis of Financial Condition and Results of Operations Quarterly Consolidated Statements of Operations for selected quarterly financial data, which data is incorporated herein by reference.

**ITEM 9: CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE**

None.

**ITEM 9A: CONTROLS AND PROCEDURES**

**Disclosure Controls and Procedures**

As of the end of the period covered by this Annual Report on Form 10-K, we performed an evaluation under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act )). Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this Annual Report, our disclosure controls and procedures, were effective in ensuring that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC s rules and forms, and is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

**Management s Annual Report on Internal Control Over Financial Reporting**

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Exchange Act Rules 13a-15(f), for us. Our management conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework and criteria established in

**Table of Contents**

*Internal Control – Integrated Framework* issued by the Committee of the Sponsoring Organizations of the Treadway Commission. Based on that evaluation, our management concluded that our internal control over financial reporting was effective as of December 31, 2010.

We acquired majority ownership of ActiveRain in 2010 at the end of the third quarter. Management excluded ActiveRain from its assessment of the effectiveness of our internal control over financial reporting as of December 31, 2010, including the internal control over financial reporting associated with ActiveRain, which had total assets of \$2.8 million at December 31, 2010, and reported revenue of \$0.7 million for the year ended December 31, 2010, which was included in our consolidated financial statements for the year ended December 31, 2010.

We do not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all error and all fraud. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected.

**Changes in Internal Control over Financial Reporting**

There were no changes in our internal control over financial reporting during the quarter ended December 31, 2010, which were identified in connection with our management's evaluation required by Rules 13a-15(d) and 15d-15(d) under the Exchange Act, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**Table of Contents****ITEM 9B: OTHER INFORMATION**

No information was required to be disclosed in a Current Report on Form 8-K during the fourth quarter of 2010 that was not reported as required.

**PART III****ITEM 10: DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE**

Information required for this section will be included in our Proxy Statement relating to our annual meeting of shareholders to be held on May 26, 2011, and is incorporated herein by reference. Our Proxy Statement will be filed within 120 days of December 31, 2010, our fiscal year end.

We have adopted a code of ethics applicable to our Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer or Controller, or persons performing similar functions. The code of ethics is available on the Investor Relations-Corporate Governance section of our Internet website at [www.marketleader.com](http://www.marketleader.com).

**ITEM 11: EXECUTIVE COMPENSATION**

Information required for this section will be included in our Proxy Statement relating to our annual meeting of shareholders to be held on May 26, 2011, and is incorporated herein by reference. Our Proxy Statement will be filed within 120 days of December 31, 2010, our fiscal year end.

**ITEM 12: SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS**

Except for the Equity Compensation Plan Information below, the information required for this section will be included in our Proxy Statement relating to our annual meeting of shareholders to be held on May 26, 2011, and is incorporated herein by reference. Our Proxy Statement will be filed within 120 days of December 31, 2010, our fiscal year end.

**EQUITY COMPENSATION PLAN INFORMATION**

The following table sets forth information concerning our equity compensation plans as of December 31, 2010:

Plan Category	(a) Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights(1)	(b) Weighted-average Exercise Price of Outstanding Options, Warrants and Rights	(c) Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (excluding securities reflected in column (a))
Equity compensation plans approved by shareholders	5,352,739	\$ 2.97(2)	1,068,851(3)(4)
Equity compensation plans not approved by shareholders			
<b>Total</b>	<b>5,352,739</b>	<b>\$ 2.97(2)</b>	<b>1,068,851(3)(4)</b>

- (1) We have stock options outstanding under the 1999 Stock Option Plan as well as stock options and restricted stock units under the 2004 Equity Incentive Plan. The 1999 Plan was terminated on December 15, 2004 with respect to new grants, and no further options will be granted under the 1999 Plan. In August 2004, our board of directors and shareholders approved the 2004 Plan, which became effective on

December 15, 2004.

**Table of Contents**

- (2) Includes restricted stock units, which have no exercise price. The weighted-average exercise price excluding the restricted stock units is \$3.55.
- (3) The 2004 Plan provides for an automatic annual increase in the number of shares on January 1st of each year for the life of the plan starting in 2005, equal to the least of (i) 700,000 shares, (ii) 3% of the outstanding common stock at the end of the immediately preceding year or (iii) a lesser amount as may be determined by our board of directors. Effective January 1, 2010, an additional 700,000 shares have been authorized for issuance under the automatic annual increase provisions of the 2004 Plan.
- (4) Under the 2004 Plan, in addition to stock options and restricted stock units, we may grant restricted stock, stock appreciation rights, performance units, performance shares, and other stock based awards.

**ITEM 13: CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE**

Information required for this section will be included in our Proxy Statement relating to our annual meeting of shareholders to be held on May 26, 2011, and is incorporated herein by reference. Our Proxy Statement will be filed within 120 days of December 31, 2010, our fiscal year end.

**ITEM 14: PRINCIPAL ACCOUNTANT FEES AND SERVICES**

Information required for this section will be included in our Proxy Statement relating to our annual meeting of shareholders to be held on May 26, 2011, and is incorporated herein by reference. Our Proxy Statement will be filed within 120 days of December 31, 2010, our fiscal year end.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

The Board of Directors and Shareholders

Market Leader, Inc.:

We have audited the accompanying consolidated balance sheets of Market Leader, Inc. and subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of operations, shareholders' equity, and cash flows for the years then ended. In connection with our audits of the consolidated financial statements, we also have audited financial statement Schedule II - Valuation and Qualifying accounts. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Market Leader, Inc. and subsidiaries as of December 31, 2010 and 2009, and the results of their operations and their cash flows for the years then ended in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

/s/ KPMG LLP

Seattle, Washington

March 22, 2011
