Dear Shareholder:

Municipal bonds posted solid returns during the six-month reporting period ended October 31, 2011. Low levels of new issuance together with concerns of higher taxes, helped to drive prices higher. Despite ongoing challenges for the U.S. economy, anxiety over municipal defaults eased.

Six-Month Period in Review

For the fiscal six-month period ended October 31, 2011:

PIMCO Municipal Income Fund increased 14.50% on net asset value (NAV) and 10.32% on market price.

PIMCO California Municipal Income Fund increased 14.11% on NAV and 10.68% on market price.

PIMCO New York Municipal Income Fund increased 9.73% on NAV and 10.04% on market price.

The U.S. economy gained strength during the reporting period. As it began, gross domestic product (GDP), the value of goods and services produced in the country, the broadest measure of economic activity and the principal indicator of economic performance, rose at an annual rate of 1.3%. GDP nearly doubled to an annual rate of 2.0% between July and September 2011.

During the period, Standard & Poor's (S&P) downgraded the long-term credit rating of U.S. government debt from AAA to AA+. This move reflected S&P's concern that Congress and the White House would not be able to solve the nation's deepening fiscal problems. Other credit ratings agencies, however, maintained their top ratings for U.S. debt and the downgrade did not harm investor demand for U.S. Treasury securities. In fact, it had the opposite effect—investors reaffirmed the view that Treasuries were a relatively safe haven in times of uncertainty. Demand for government debt surged, with the yield on the benchmark 10-year Treasury bond dropping at one point to 1.72%, the lowest level in more than half-a-century. Municipal bond prices, which tend to closely track their Treasury brethren, rose accordingly. New issuance remained low throughout much of the reporting period, though it began to rise during the latter stages of the six-month period as suppliers moved to lock in low interest rates. In California, demand for new securities was strong, while a rally in higher-quality credits benefitted issuance in New York State.

Table of Contents

The Federal Reserve (the Fed) launched a third attempt to stimulate the economy. Its latest effort, Operation Twist, involves the selling of \$400 billion of short-term Treasury securities in exchange for a similar amount of longer-term bonds. The Fed indicated this move is aimed at lowering longer-term bond yields while maintaining short-term rates at their current and historically low levels. This is regarded as an attempt to boost the ailing housing market by lowering mortgage rates, though such rates stand at the lowest levels in half-a-century. The Fed warned of significant downside risks to the economic outlook, including strains in global financial markets.

Outlook

The U.S. economy and the fiscal situation at the state and local level have strengthened of late, however, the overall picture remains daunting. The Center on Budget and Policy Priorities reports that collectively, states are grappling with \$103 billion in red ink during the 2012 fiscal year. Separately, the National League of Cities reported that 57% of cities are facing greater financial

difficulties in 2011 than in 2010. These difficulties are compounded by uncertainty on taxes and budgets at the federal level, notably ongoing efforts by the so-called Congressional super committee to reduce the federal debt by \$1.5 trillion.

For specific information on the Funds and their performance, please review the following pages. If you have any questions regarding the information provided, we encourage you to contact your financial advisor or call the Funds shareholder servicing agent at (800) 254-5197. In addition, a wide range of information and resources is available on our website, www.allianzinvestors.com/closedendfunds.

Together with Allianz Global Investors Fund Management LLC, the Funds investment manager, and Pacific Investment Management Company LLC (PIMCO), the Funds sub-adviser, we thank you for investing with us.

We remain dedicated to serving your investment needs.

Sincerely,

Hans W. Kertess

PIMCO Municipal Income Funds Fund Insights

October 31, 2011 (unaudited)

For the six-months ended October 31, 2011, PIMCO Municipal Income Fund returned 14.50% on net asset value (NAV) and 10.32% on market price.

For the six-months ended October 31, 2011, PIMCO California Municipal Income Fund returned 14.11% on net asset value (NAV) and 10.68% on market price.

For the six-months ended October 31, 2011, PIMCO New York Municipal Income Fund returned 9.73% on net asset value (NAV) and 10.04% on market price.

The municipal bond market produced strong results during the six-months ended October 31, 2011. The overall municipal market (as measured by the Barclays Capital Municipal Bond Index) posted a positive return during five of the six months of the reporting period. Factors supporting the market during the period included: generally robust investor demand as fear of mass defaults from earlier in the year were somewhat mitigated, as states observed improving revenue and actively addressed structural budgetary issues; a sharp decline in new issuance of municipal securities; sharply declining interest rates due to several flights to quality.

During the reporting period, Municipal Income and New York Municipal emphasized revenue bonds over general obligation bonds. This was beneficial for results as revenue bonds outperformed general obligation bonds. California Municipal in contrast, was aided by its positioning in California general obligation bonds, as these securities outperformed revenue bonds.

The Funds were rewarded for having exposure to tobacco bonds. This higher yielding sector outperformed the benchmark during the six months ended October 31, 2011.

Exposure to the health care was additive for the Funds' performance as this sector outperformed the benchmarks during the reporting period. Municipal Income and New York Municipal benefited from exposure to the corporate-backed sector. California Municipal's performance was enhanced by exposure to the education sector.

Shorter duration than that of their benchmarks detracted from performance, of each Fund, as municipal yields declined during the reporting period. A steepening yield curve bias also adversely effected results, as the municipal curve flattened during the six-month period.

Moody's Rating

(as a % of total investments)

(1) **Past performance is no guarantee of future results.** Total return is calculated by determining the percentage change in NAV or market price (as applicable) in the specified period. The calculation assumes that all income dividends and capital gain distributions, if any, have been reinvested. Total return does not reflect broker commissions or sales charges in connection with the purchase or sale of Fund shares. Total investment return for a period of less than one year is not annualized. Total return for a period of more than one year represents the average annual total return.

Performance at market price will differ from results at NAV. Although market price returns typically reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about the Funds, market conditions, supply and demand for each Fund's shares, or changes in the Funds' dividends.

An investment in the Funds involves risk, including the loss of principal. Total return, market price, market price yield and NAV will fluctuate with changes in market conditions. This data is provided for information purposes only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. There is a one time public offering and once issued, shares of closed-end funds are traded in the open market through a stock exchange. NAV is equal to total assets attributable to common shareholders less total liabilities divided by the number of common shares outstanding. Holdings are subject to change daily.

Edgar Filing: PIMCO MUNICIPAL INCOME FUND - Form N-CSRS

(2) Market Price Yield is determined by dividing the annualized current monthly per common share dividend (comprised of net investment income) payable to common shareholders by the market price per common share at October 31, 2011.

PIMCO Municipal Income Funds Notes to Schedule of Investments

October 31, 2011 (unaudited) (continued)

- (a) Private Placement Restricted as to resale and may not have a readily available market. Securities with an aggregate value of \$10,839,959 and \$9,833,061, representing 2.2% and 2.4% of total investments in Municipal and California Municipal, respectively.
- (b) Illiquid.
- (c) Pre-refunded bonds are collateralized by U.S. Government or other eligible securities which are held in escrow and used to pay principal and interest and retire the bonds at the earliest refunding date (payment date) and/or whose interest rates vary with changes in a designated base rate (such as the prime interest rate).
- (d) 144A Exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, typically only to qualified institutional buyers. Unless otherwise indicated, these securities are not considered to be illiquid.
- (e) When-issued. To be settled after October 31, 2011.
- (f) In default.
- (g) Inverse Floater The interest rate shown bears an inverse relationship to the interest rate on another security or the value of an index. The interest rate disclosed reflects the rate in effect on October 31, 2011.
- (h) Variable Rate Notes Instruments whose interest rates change on specified date (such as a coupon date or interest payment date) and/or whose interest rates vary with changes in a designated base rate (such as the prime interest rate). The interest rate disclosed reflects the rate in effect on October 31, 2011.
- (i) Residual Interest Bonds held in Trust Securities represent underlying bonds transferred to a separate securitization trust established in a tender option bond transaction in which each Fund acquired the residual interest certificates. These securities serve as collateral in a financing transaction.
- (j) Step Bond Coupon is a fixed rate for an initial period then resets at a specific date and rate.
- (k) Restricted. The aggregate acquisition cost of such securities is \$935,300 in Municipal. The aggregate market value is \$472,350, representing 0.1% of total investments in Municipal.
- (l) Rates reflect the effective yields at purchase date.

PIMCO Municipal Income Funds Notes to Financial Statements

October 31, 2011 (unaudited)

1. Organization and Significant Accounting Policies

PIMCO Municipal Income Fund (Municipal), PIMCO California Municipal Income Fund (California Municipal) and PIMCO New York Municipal Income Fund (New York Municipal), each a Fund and collectively referred to as the Funds or PIMCO Municipal Income Funds, were organized as Massachusetts business trusts on May 10, 2001. Prior to commencing operations on June 29, 2001, the Funds had no operations other than matters relating to their organization and registration as non-diversified, closed-end management investment companies registered under the Investment Company Act of 1940 and the rules and regulations thereunder, as amended. Allianz Global Investors Fund Management LLC (the Investment Manager) serves as the Investment Manager and is an indirect, wholly-owned subsidiary of Allianz Global Investors of America L.P. (Allianz Global). Allianz Global is an indirect, wholly-owned subsidiary of Allianz SE, a publicly traded European insurance and financial services company. Each Fund has an unlimited amount of no par value per share of common shares authorized.

Under normal market conditions, Municipal invests substantially all of its assets in a portfolio of municipal bonds, the interest from which is exempt from federal income taxes. Under normal market conditions, California Municipal invests substantially all of its assets in municipal bonds which pay interest that is exempt from federal and California state income taxes. Under normal market conditions, New York Municipal invests substantially all of its assets in municipal bonds which pay interest that is exempt from federal, New York State and New York City income taxes. There is no guarantee that the Funds will meet their stated objectives. The Funds will generally seek to avoid investing in bonds generating interest income which could potentially subject individuals to alternative minimum tax. The issuers' abilities to meet their obligations may be affected by economic and political developments in a specific state or region.

The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in each Fund's financial statements. Actual results could differ from those estimates.

In the normal course of business, the Funds enter into contracts that contain a variety of representations that provide general indemnifications. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred.

In May 2011, the Financial Accounting Standards Board (FASB) issued an Accounting Standards Update (ASU) to develop common requirements for measuring fair value and for disclosing information about fair value measurements in accordance with Generally Accepted Accounting Principles (GAAP) and International Financial Reporting Standards (IFRSs). FASB concluded that the amendments in this ASU will improve the comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with GAAP and IFRSs. The ASU is effective prospectively during interim or annual periods beginning on or after December 15, 2011. The Funds' management is evaluating the implications of this change.

The following is a summary of significant accounting policies consistently followed by the Funds:

(a) Valuation of Investments

Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, on the basis of quotes obtained from a quotation reporting system, established market makers, or independent pricing services.

Edgar Filing: PIMCO MUNICIPAL INCOME FUND - Form N-CSRS

Portfolio securities and other financial instruments for which market quotations are not readily available, or for which a development/event occurs that may significantly impact the value of a security, are fair-valued, in good faith, pursuant to procedures established by the Board of Trustees, or persons acting at their discretion pursuant to procedures established by the Board of Trustees. The Funds' investments are valued daily using prices supplied by an independent pricing service or dealer quotations, or by using the last sale price on the exchange that is the primary market for such securities, or the mean between the last quoted bid and ask price. Independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Securities purchased on a when-issued basis are marked to market daily until settlement at the forward settlement date. Short-term securities maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less, or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days.

Table of Contents

PIMCO Municipal Income Funds Notes to Financial Statements

October 31, 2011 (unaudited)

1. Organization and Significant Accounting Policies (continued)

The prices used by the Funds to value securities may differ from the value that would be realized if the securities were sold and these differences could be material to the Funds' financial statements. Each Fund's net asset value (NAV) is normally determined as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the New York Stock Exchange (NYSE) on each day the NYSE is open for business.

(b) Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (*i.e.* the exit price) in an orderly transaction between market participants. The three levels of the fair value hierarchy are described below:

- Level 1 quoted prices in active markets for identical investments that the Funds have the ability to access
- Level 2 valuations based on other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.) or quotes from inactive exchanges
- Level 3 valuations based on significant unobservable inputs (including the Funds' own assumptions in determining the fair value of investments)

An investment asset's or liability's level within the fair value hierarchy is based on the lowest level input, individually or in aggregate, that is significant to fair value measurement. The objective of fair value measurement remains the same even when there is a significant decrease in the volume and level of activity for an asset or liability and regardless of the valuation technique used.

The valuation techniques used by the Funds to measure fair value during the six months ended October 31, 2011 maximized the use of observable inputs and minimized the use of unobservable inputs.

The inputs or methodology used for valuing securities is not necessarily an indication of the risk associated with investing in those securities. The following are certain inputs and techniques that the Funds generally use to evaluate how to classify each major category of assets and liabilities for Level 2 and Level 3, in accordance with GAAP.

Municipal Bonds & Notes and Variable Rate Notes Municipal bonds and notes and variable rate notes are valued by independent pricing services based on pricing models that take into account, among other factors, information received from market makers and broker-dealers, current trades, bid-want lists, offerings, market movements, the callability of the bond, state of issuance, benchmark yield curves, and bond insurance. To the extent that these inputs are observable, the values of municipal bonds and notes and variable rate notes are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

Edgar Filing: PIMCO MUNICIPAL INCOME FUND - Form N-CSRS

U.S. Treasury Obligations U.S. Treasury obligations are valued by independent pricing services based on pricing models that evaluate the mean between the most recently quoted bid and ask price. The models also take into consideration data received from active market makers and broker-dealers, yield curves, and the spread over comparable U.S. Treasury issues. The spreads change daily in response to market conditions and are generally obtained from the new issue market and broker-dealer sources. To the extent that these inputs are observable, the values of U.S. Treasury obligations are categorized as Level 2. To the extent that these inputs are unobservable, the values are categorized as Level 3.

October 31, 2011 (unaudited)

1. Organization and Significant Accounting Policies (continued)

The Funds' policy is to recognize transfers between levels at the end of the reporting period.

A summary of the inputs used at October 31, 2011 in valuing each Fund's assets and liabilities is listed below:

Municipal:

	Level 1 Quoted Prices	Level 2 Other Significant Observable Inputs	Level 3 Significant Unobservable Inputs	Value at 10/31/11
Investments in Securities Assets				
Municipal Bonds & Notes:				
Tennessee		\$ 22,827,368	\$ 472,350	\$ 23,299,718
All Other		454,522,440		454,522,440
Variable Rate Notes		10,367,609		10,367,609
Short-Term Investments		3,563,746		3,563,746
Total Investments in Securities		\$ 491,281,163	\$ 472,350	\$ 491,753,513

California Municipal:

	Level 1 Quoted Prices	Level 2 Other Significant Observable Inputs	Level 3 Significant Unobservable Inputs	Value at 10/31/11
Investments in Securities Assets				
California Municipal Bonds & Notes		\$ 376,403,978		\$ 376,403,978
Other Municipal Bonds & Notes		8,880,144		8,880,144
California Variable Rate Notes		8,622,786		8,622,786
Short-Term Investments		9,490,355		9,490,355
Total Investments in Securities Assets		\$ 403,397,263		\$ 403,397,263

New York Municipal:

	Level 1 Quoted Prices	Level 2 Other Significant Observable Inputs	Level 3 Significant Unobservable Inputs	Value at 10/31/11
Investments in Securities				
New York Municipal Bonds & Notes		\$ 123,014,650		\$ 123,014,650
Other Municipal Bonds & Notes		6,933,490		6,933,490
Short-Term Investments		2,349,777		2,349,777
Total Investments in Securities		\$ 132,297,917		\$ 132,297,917

Edgar Filing: PIMCO MUNICIPAL INCOME FUND - Form N-CSRS

There were no significant transfers between Levels 1 and 2 during the six months ended October 31, 2011.

A roll forward of fair value measurements using significant unobservable inputs (Level 3) for the six months ended October 31, 2011, was as follows:

<u>Municipal:</u>											
		Beginning				Accrued	Net	Net	Transfers	Transfers	Ending
		Balance				Discounts	Realized	Change	into	out of	Balance
		4/30/11	Purchases	Sales	(Premiums)	Gain (Loss)	in Unrealized/	Level	Level	Level	10/31/11
Investments in Securities	Assets										
Municipal Bonds & Notes:											
	Tennessee	\$ 472,350							3	3	\$ 472,350
Total Investments		\$ 472,350									\$ 472,350

Table of Contents

PIMCO Municipal Income Funds Notes to Financial Statements

October 31, 2011 (unaudited)

1. Organization and Significant Accounting Policies (continued)

There was no change in unrealized appreciation/depreciation of Level 3 investments which Municipal held at October 31, 2011. Net change in unrealized appreciation/depreciation is reflected on the Statements of Operations.

(c) Investment Transactions and Investment Income

Investment transactions are accounted for on the trade date. Securities purchased and sold on a when-issued basis may be settled a month or more after the trade date. Realized gains and losses on investments are determined on an identified cost basis. Interest income adjusted for the accretion of discounts and amortization of premiums is recorded on an accrual basis. Discounts or premiums on debt securities purchased are accreted or amortized, respectively, to interest income over the lives of the respective securities.

(d) Federal Income Taxes

The Funds intend to distribute all of their taxable income and to comply with the other requirements of Subchapter M of the U.S. Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required.

Accounting for uncertainty in income taxes establishes for all entities, including pass-through entities such as the Funds, a minimum threshold for financial statement recognition of the benefit of positions taken in filing tax returns (including whether an entity is taxable in a particular jurisdiction), and requires certain expanded tax disclosures. The Funds' management has determined that its evaluation has resulted in no material impact to the Funds' financial statements at October 31, 2011. The Funds' federal tax returns for the prior three years remain subject to examination by the Internal Revenue Service.

(e) Dividends and Distributions - Common Shares

The Funds declare dividends from net investment income monthly to common shareholders. Distributions of net realized capital gains, if any, are paid at least annually. The Funds record dividends and distributions to their respective shareholders on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations, which may differ from GAAP. These book-tax differences are considered either temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal income tax treatment. Temporary differences do not require reclassification. To the extent dividends and/or distributions exceed current and accumulated earnings and profits for federal income tax purposes, they are reported as dividends and/or distributions to shareholders from return of capital.

(f) Reverse Repurchase Agreements

In a reverse repurchase agreement, the Funds sell securities to a bank or broker-dealer and agree to repurchase the securities at a mutually agreed upon date and price. Generally, the effect of such a transaction is that the Funds can recover and reinvest all or most of the cash invested in portfolio securities involved during the term of the reverse repurchase agreement and still be entitled to the returns associated with those portfolio securities. Such transactions are advantageous if the interest cost to the Funds of the reverse repurchase transaction is less than the returns they obtain on investments purchased with the cash. To the extent the Funds

Edgar Filing: PIMCO MUNICIPAL INCOME FUND - Form N-CSRS

do not cover their positions in reverse repurchase agreements (by segregating liquid assets at least equal in amount to the forward purchase commitment), the Funds' uncovered obligations under the agreements will be subject to the Funds' limitations on borrowings. Reverse repurchase agreements involve leverage risk and also the risk that the market value of the securities that the Funds are obligated to repurchase under the agreements may decline below the repurchase price. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the Funds' use of the proceeds of the agreement may be restricted pending determination by the other party, or their trustee or receiver, whether to enforce the Funds' obligation to repurchase the securities. There were no reverse repurchase agreements open at October 31, 2011.

Table of Contents

PIMCO Municipal Income Funds Notes to Financial Statements

October 31, 2011 (unaudited)

1. Organization and Significant Accounting Policies (continued)

(g) Inverse Floating Rate Transactions Residual Interest Municipal Bonds (RIBs)/ Residual Interest Tax Exempt Bonds (RITEs)

The Funds invest in RIBs and RITEs (Inverse Floaters), whose interest rates bear an inverse relationship to the interest rate on another security or the value of an index. In inverse floating rate transactions, the Funds sell a fixed rate municipal bond (Fixed Rate Bond) to a broker who places the Fixed Rate Bond in a special purpose trust (Trust) from which floating rate bonds (Floating Rate Notes) and Inverse Floaters are issued. The Funds simultaneously or within a short period of time, purchase the Inverse Floaters from the broker. The Inverse Floaters held by the Funds provide the Funds with the right to: (1) cause the holders of the Floating Rate Notes to tender their notes at par, and (2) cause the broker to transfer the Fixed-Rate Bond held by the Trust to the Funds, thereby collapsing the Trust. The Funds account for the transaction described above as a secured borrowing by including the Fixed Rate Bond in their Schedules of Investments, and account for the Floating Rate Notes as a liability under the caption Payable for floating rate notes issued in the Funds Statements of Assets and Liabilities. The Floating Rate Notes have interest rates that generally reset weekly and their holders have the option to tender their notes to the broker for redemption at par at each reset date.

The Funds may also invest in Inverse Floaters without transferring a fixed rate municipal bond into a special purpose trust, which are not accounted for as secured borrowings. The Funds may also invest in Inverse Floaters for the purpose of increasing leverage.

The Inverse Floaters are created by dividing the income stream provided by the underlying bonds to create two securities, one short-term and one long-term. The interest rate on the short-term component is reset by an index or auction process typically every 7 to 35 days. After income is paid on the short-term securities at current rates, the residual income from the underlying bond(s) goes to the long-term securities. Therefore, rising short-term rates result in lower income for the long-term component and vice versa. The longer-term bonds may be more volatile and less liquid than other municipal bonds of comparable maturity. Investments in Inverse Floaters typically will involve greater risk than in an investment in Fixed Rate Bonds.

The Funds' restrictions on borrowings do not apply to the secured borrowings deemed to have occurred for accounting purposes. Inverse Floaters held by the Funds are exempt from registration under Rule 144A of the Securities Act of 1933.

In addition to general market risks, the Funds' investments in Inverse Floaters may involve greater risk and volatility than an investment in a fixed rate bond, and the value of Inverse Floaters may decrease significantly when market interest rates increase. Inverse Floaters have varying degrees of liquidity, and the market for these securities may be volatile. These securities tend to underperform the market for fixed rate bonds in a rising interest rate environment, but tend to outperform the market for fixed rate bonds when interest rates decline or remain relatively stable. Although volatile, Inverse Floaters typically offer the potential for yields exceeding the yields available on fixed rate bonds with comparable credit quality, coupon, call provisions and maturity. Trusts in which Inverse Floaters may be held could be terminated due to market, credit or other events beyond the Funds' control, which could require the Funds to reduce leverage and dispose of portfolio investments at inopportune times and prices.

(h) When-Issued/Delayed-Delivery Transactions

When-issued or delayed-delivery transactions involve a commitment to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery purchases are outstanding, the Funds will set aside and maintain until the settlement date in a designated account, liquid assets in an amount sufficient to meet the purchase price. When purchasing a security on a delayed-delivery basis, the Funds

Edgar Filing: PIMCO MUNICIPAL INCOME FUND - Form N-CSRS

assume the rights and risks of ownership of the security, including the risk of price and yield fluctuations; consequently, such fluctuations are taken into account when determining the net asset value. The Funds may dispose of or renegotiate a delayed-delivery transaction after it is entered into, and may sell when-issued securities before they are delivered, which may result in a realized gain or loss. When a security is sold on a delayed-delivery basis, the Funds do not participate in future gains and losses with respect to the security.

Table of Contents

PIMCO Municipal Income Funds Notes to Financial Statements

October 31, 2011 (unaudited)

1. Organization and Significant Accounting Policies (continued)

(i) Restricted Securities

The Funds are permitted to invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expenses, and prompt sale at an acceptable price may be difficult.

(j) Custody Credits on Cash Balances

The Funds benefit from an expense offset arrangement with their custodian bank, whereby uninvested cash balances earn credits that reduce monthly custodian and accounting agent expenses. Had these cash balances been invested in income-producing securities, they would have generated income for the Funds. Cash overdraft charges, if any, are included in custodian and accounting agent fees.

(k) Interest Expense

Interest expense primarily relates to the Funds' participation in floating rate notes held by third parties in conjunction with Inverse Floater transactions.

2. Principal Risks

In the normal course of business, the Funds trade financial instruments and enter into financial transactions where risk of potential loss exists due to, among other things, changes in the market (market risk) or failure of the other party to a transaction to perform (counterparty risk). The Funds are also exposed to other risks such as, but not limited to, interest rate and credit risks.

Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. As nominal interest rates rise, the value of certain fixed income securities held by the Funds are likely to decrease. A nominal interest rate can be described as the sum of a real interest rate and an expected inflation rate. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. Duration is used primarily as a measure of the sensitivity of a fixed income security's market price to interest rate (*i.e.* yield) movements.

Variable and floating rate securities generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. Conversely, floating rate securities will not generally increase in value if interest rates decline. Inverse floating rate securities may decrease in value if interest rates increase. Inverse floating rate securities may also exhibit greater price volatility than a fixed rate obligation with similar credit quality. When the Funds hold variable or floating rate securities, a decrease (or, in the case of inverse floating rate securities, an increase) in market interest rates will adversely affect the income received from such securities and the NAV of the Funds' shares.

Edgar Filing: PIMCO MUNICIPAL INCOME FUND - Form N-CSRS

The Funds are exposed to credit risk, which is the risk of losing money if the issuer or guarantor of a fixed income security is unable or unwilling, or is perceived (whether by market participants, rating agencies, pricing services or otherwise) as unable or unwilling, to make timely principal and/or interest payments, or to otherwise honor its obligations. Securities are subject to varying degrees of credit risk, which are often reflected in credit ratings.

The Funds are exposed to counterparty risk, or the risk that an institution or other entity with which the Funds have unsettled or open transactions will default. The potential loss to the Funds could exceed the value of the financial assets recorded in the Funds' financial statements. Financial assets, which potentially expose the Funds to counterparty risk, consist principally of cash due from counterparties and investments. The Funds' Sub-Adviser, Pacific Investment Management Company LLC (the Sub-Adviser), an affiliate of the Investment Manager, seeks to minimize the Funds' counterparty risk by performing reviews of each counterparty and by minimizing concentration of counterparty risk by undertaking transactions with multiple customers and counterparties on recognized and reputable exchanges. Delivery of securities sold is only made once the Funds have received payment. Payment is made on a purchase once the securities have been delivered by the counterparty. The trade will fail if either party fails to meet its obligation.

Table of Contents

PIMCO Municipal Income Funds Notes to Financial Statements

October 31, 2011 (unaudited)

2. Principal Risks (continued)

Leverage will cause the value of the Funds' shares to be more volatile than if the Funds did not use leverage. This is because leverage tends to exaggerate the effect of any increase or decrease in the value of the Funds' portfolio securities. The Funds may engage in transactions or purchase instruments that give rise to forms of leverage. In addition, to the extent the Funds employ leverage, interest costs may not be recovered by any appreciation of the securities purchased with the leverage proceeds and could exceed the Funds' investment returns, resulting in greater losses.

The Funds are party to International Swaps and Derivatives Association, Inc. Master Agreements (ISDA Master Agreements) with select counterparties that govern transactions, over-the-counter derivatives and foreign exchange contracts entered into by the Funds and those counterparties. The ISDA Master Agreements contain provisions for general obligations, representations, agreements, collateral and events of default or termination. Events of termination include conditions that may entitle counterparties to elect to terminate early and cause settlement of all outstanding transactions under the applicable ISDA Master Agreement. Any election to terminate early could be material to the financial statements of the Funds.

3. Financial Derivative Instruments

Disclosure about derivatives and hedging activities requires qualitative disclosure regarding objectives and strategies for using derivatives, quantitative disclosure about fair value amounts of gains and losses on derivatives, and disclosure about credit-risk-related contingent features in derivative agreements. The disclosure requirements distinguish between derivatives, which are accounted for as hedges , and those that do not qualify for such accounting. Although the Funds sometimes use derivatives for hedging purposes, the Funds reflect derivatives at fair value and recognize changes in fair value through the Funds' Statements of Operations, and such derivatives do not qualify for hedge accounting treatment.

(a) Futures Contracts

The Funds use futures contracts to manage their exposure to the securities markets or the movements in interest rates and currency values. A futures contract is an agreement between two parties to buy and sell a financial instrument at a set price on a future date. Upon entering into such a contract, the Funds are required to pledge to the broker an amount of cash or securities equal to the minimum initial margin requirements of the exchange. Pursuant to the contracts, the Funds agree to receive from or pay to the broker an amount of cash or securities equal to the daily fluctuation in the value of the contracts. Such receipts or payments are known as variation margin and are recorded by the Funds as unrealized appreciation or depreciation. When the contracts are closed, the Funds record a realized gain or loss equal to the difference between the value of the contracts at the time they were opened and the value at the time they were closed. Any unrealized appreciation or depreciation recorded is simultaneously reversed. The use of futures transactions involves various risks, including the risk of an imperfect correlation in the movements in the price of futures contracts, interest rates and underlying hedging assets, and possible inability or unwillingness of counterparties to meet the terms of their contracts.

(b) Swap Agreements

Swap agreements are bilaterally negotiated agreements between the Funds and a counterparty to exchange or swap investment cash flows, assets, foreign currencies or market-linked returns at specified, future intervals. Swap agreements are privately negotiated in the over-the-counter market (OTC swaps) and may be executed in a multilateral or other trade facility platform, such as a registered commodities exchange (centrally cleared swaps). The Funds enter into credit default, cross-currency, interest rate, total return, variance and other forms of swap agreements in order to manage their exposure to credit, currency and interest rate risk. In connection with these agreements, securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

Edgar Filing: PIMCO MUNICIPAL INCOME FUND - Form N-CSRS

OTC swap payments received or made at the beginning of the measurement period, if any, are reflected as such on the Funds' Statements of Assets and Liabilities and represent payments made or received upon entering into the swap agreement to compensate for differences between the stated terms of the swap agreement and prevailing market conditions (credit spreads, currency exchange rates, interest rates, and other relevant factors). These upfront payments, if any, are recorded as realized gains or losses on the Funds' Statements of Operations upon termination or maturity of the

3. Financial Derivative Instruments (continued)

swap. A liquidation payment received or made at the termination of the swap, if any, is recorded as realized gain or loss on the Funds' Statements of Operations. Net periodic payments received or paid by the Funds, if any, are included as part of realized gains or losses on the Funds' Statements of Operations. Changes in market value, if any, are reflected as a component of net changes in unrealized appreciation/depreciation on the Funds' Statements of Operations. Daily changes in valuation of centrally cleared swaps, if any, are recorded as a receivable or payable for variation margin on centrally cleared swaps on the Funds' Statements of Assets and Liabilities.

Entering into these agreements involves, to varying degrees, elements of credit, legal, market and documentation risk in excess of the amounts recognized on the Funds' Statements of Assets and Liabilities. Such risks include the possibility that there will be no liquid market for these agreements, that the counterparties to the agreements may default on their obligation to perform or disagree as to the meaning of contractual terms in the agreements and that there may be unfavorable changes in interest rates.

Interest Rate Swap Agreements Interest rate swap agreements involve the exchange by the Funds with a counterparty of their respective commitments to pay or receive interest, e.g., an exchange of floating rate payments for fixed rate payments, with respect to the notional amount of principal. Certain forms of interest rate swap agreements may include: (i) interest rate caps, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates exceed a specified rate, or "cap", (ii) interest rate floors, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates fall below a specified rate, or "floor", (iii) interest rate collars, under which a party sells a cap and purchases a floor or vice versa in an attempt to protect itself against interest rate movements exceeding given minimum or maximum levels, (iv) callable interest rate swaps, under which the counterparty may terminate the swap transaction in whole at zero cost by a predetermined date and time prior to the maturity date, (v) spreadlocks, which allow the interest rate swap users to lock in the forward differential (or spread) between the interest rate swap rate and a specified benchmark, or (vi) basis swaps, under which two parties can exchange variable interest rates based on different money markets.

The following is a summary of the fair valuation of the Funds' derivatives categorized by risk exposure.

The effect of derivatives on the Statements of Operations for the six months ended October 31, 2011:

Municipal:

Location	Interest Rate Contracts
Net realized gain (loss) on:	
Futures contracts	\$ 267,808
Swaps	(4,431,799)
Total net realized gain (loss)	\$ (4,163,991)
Net change in unrealized appreciation/depreciation of:	
Swaps	\$ 911,084

Edgar Filing: PIMCO MUNICIPAL INCOME FUND - Form N-CSRS

California Municipal:

Location	Interest Rate Contracts
Net realized gain (loss) on:	
Futures contracts	\$ 207,688
Swaps	(11,472,396)
Total net realized gain (loss)	\$ (11,264,708)
Net change in unrealized appreciation/depreciation of:	
Swaps	\$ 2,315,148

3. Financial Derivative Instruments (continued)New York Municipal:

Location	Interest Rate Contracts
Net realized gain (loss) on:	
Futures contracts	\$ 71,051
Swaps	(2,372,276)
Total net realized gain (loss)	\$ (2,301,225)
Net change in unrealized appreciation/depreciation of:	
Swaps	\$ 372,095

The average volume (measured at each fiscal quarter end) of derivative activity during the six months ended October 31, 2011:

	Interest Rate Swap Agreements ⁽¹⁾
Municipal	\$ 10,267
California Municipal	25,200
New York Municipal	5,200

⁽¹⁾ Notional amount (in thousands)

4. Investment Manager/Sub-Adviser

Each Fund has an Investment Management Agreement (each an "Agreement") with the Investment Manager. Subject to the supervision of the Funds' Board of Trustees, the Investment Manager is responsible for managing, either directly or through others selected by it, the Funds' investment activities, business affairs and administrative matters. Pursuant to each Agreement, the Investment Manager receives an annual fee, payable monthly, at an annual rate of 0.65% of each Fund's average daily net assets, inclusive of daily net assets attributable to any Preferred Shares outstanding. The Investment Manager has voluntarily agreed to waive a portion of its fee for each Fund at the annual rate of 0.05% of each Fund's average daily net assets, inclusive of net assets attributable to any Preferred Shares that may be outstanding, for the period from July 1, 2011 through June 30, 2012. For the six months ended October 31, 2011, each Fund paid investment management fees at an effective rate of 0.62% of each Fund's average daily net assets, inclusive of net assets attributable to any Preferred Shares that were outstanding.

The Investment Manager has retained the Sub-Adviser to manage the Funds' investments. Subject to the supervision of the Investment Manager, the Sub-Adviser is responsible for making all of the Funds' investment decisions. The Investment Manager, and not the Funds, pays a portion of the fees it receives as Investment Manager to the Sub-Adviser in return for its services.

Edgar Filing: PIMCO MUNICIPAL INCOME FUND - Form N-CSRS

5. Investments in Securities

Purchases and sales of investments, other than short-term securities and U.S. government obligations, for the six months ended October 31, 2011:

	Municipal	California Municipal	New York Municipal
Purchases	\$ 44,124,777	\$ 4,542,086	\$ 16,045,260
Sales	43,034,825	26,304,380	23,795,349

(a) Floating rate notes:

The weighted average daily balance of floating rate notes outstanding during the six months ended October 31, 2011 for Municipal, California Municipal and New York Municipal was \$18,063,277, \$35,661,418 and \$10,476,876 at a weighted average interest rate, including fees, of 1.65%, 0.37% and 0.26%, respectively.

6. Income Tax Information

Under the recently enacted Regulated Investment Company Modernization Act of 2010, the Funds will be permitted to carry forward capital losses incurred in taxable years beginning after December 22, 2010, for an unlimited period. However, any losses incurred during those future taxable years will be required to be utilized prior to the losses incurred in pre-enactment taxable years. As a result of this, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term capital losses.

The cost basis of investments for federal income tax purposes and gross unrealized appreciation and gross unrealized depreciation of investments at October 31, 2011 were:

	Cost of Investments	Gross Unrealized Appreciation	Gross Unrealized Depreciation	Net Unrealized Appreciation
Municipal	\$ 456,842,487	\$ 32,963,902	\$ 12,818,612	\$ 20,145,290
California Municipal	352,324,126	24,438,351	8,181,205	16,257,146
New York Municipal	119,831,660	5,449,271	2,074,047	3,425,224

The difference between book and tax cost and appreciation/depreciation were attributable to inverse floater transactions.

7. Auction-Rate Preferred Shares

Municipal has 1,520 shares of Preferred Shares Series A, 1,520 shares of Preferred Shares Series B, 1,520 shares of Preferred Shares Series C, 1,520 shares of Preferred Shares Series D and 1,520 shares of Preferred Shares Series E outstanding, each with a liquidation preference value of \$25,000 per share plus any accumulated, unpaid dividends.

California Municipal has 2,000 shares of Preferred Shares Series A, 2,000 shares of Preferred Shares Series B and 2,000 shares of Preferred Shares Series C outstanding, each with a liquidation preference value of \$25,000 per share plus any accumulated, unpaid dividends.

New York Municipal has 1,880 shares of Preferred Shares Series A outstanding, with a liquidation preference value of \$25,000 per share plus any accumulated, unpaid dividends.

Dividends are accumulated daily at an annual rate (typically re-set every seven days) through auction procedures (or through default provisions in the event of failed auctions). Distributions of net realized capital gains, if any, are paid annually.

Edgar Filing: PIMCO MUNICIPAL INCOME FUND - Form N-CSRS

For the six months ended October 31, 2011, the annualized dividend rates for each Fund ranged from:

	High	Low	At October 31, 2011
<u>Municipal:</u>			
Series A	0.396%	0.107%	0.229%
Series B	0.411%	0.107%	0.229%
Series C	0.411%	0.110%	0.229%
Series D	0.411%	0.107%	0.229%
Series E	0.411%	0.107%	0.229%
<u>California Municipal:</u>			
Series A	0.396%	0.107%	0.229%
Series B	0.411%	0.110%	0.229%
Series C	0.411%	0.107%	0.229%
<u>New York Municipal:</u>			
Series A	0.411%	0.107%	0.229%

7. Auction-Rate Preferred Shares (continued)

The Funds are subject to certain limitations and restrictions while Preferred Shares are outstanding. Failure to comply with these limitations and restrictions could preclude the Funds from declaring or paying any dividends or distributions to common shareholders or repurchasing common shares and/or could trigger the mandatory redemption of Preferred Shares at their liquidation preference value plus any accumulated, unpaid dividends.

Preferred shareholders, who are entitled to one vote per share, generally vote together with the common shareholders but vote separately as a class to elect two Trustees and on any matters affecting the rights of the Preferred Shares.

Since mid-February 2008, holders of auction-rate preferred shares (ARPS) issued by the Funds have been directly impacted by an unprecedented lack of liquidity, which has similarly affected ARPS holders in many of the nation's closed-end funds. Since then, regularly scheduled auctions for ARPS issued by the Funds have consistently failed because of insufficient demand (bids to buy shares) to meet the supply (shares offered for sale) at each auction. In a failed auction, ARPS holders cannot sell all, and may not be able to sell any, of their shares tendered for sale. While repeated auction failures have affected the liquidity for ARPS, they do not constitute a default or automatically alter the credit quality of the ARPS, and the ARPS holders have continued to receive dividends at the defined maximum rate equal to the higher of the 30-day AA Composite Commercial Paper Rate multiplied by 110% or the Taxable Equivalent of the Short-Term Municipal Obligations Rate-defined as 90% of the quotient of (A) the per annum rate expressed on an interest equivalent basis equal to the Kenny S&P 30-day High Grade Index divided by (B) 1.00 minus the Marginal Tax Rate (expressed as a decimal) multiplied by 110% (which is a function of short-term interest rates and typically higher than the rate that would have otherwise been set through a successful auction). If the Funds ARPS auctions continue to fail and the maximum rate payable on the ARPS rises as a result of changes in short-term interest rates, returns for the Funds common shareholders could be adversely affected.

8. Subsequent Events

On November 1, 2011, the following dividends were declared to common shareholders payable December 1, 2011 to shareholders of record on November 14, 2011:

Municipal	\$0.08125 per common share
California Municipal	\$0.077 per common share
New York Municipal	\$0.057 per common share

On December 1, 2011, the following dividends were declared to common shareholders payable January 3, 2012 to shareholders of record on December 12, 2011:

Municipal	\$0.08125 per common share
-----------	----------------------------

Edgar Filing: PIMCO MUNICIPAL INCOME FUND - Form N-CSRS

California Municipal	\$0.077 per common share
New York Municipal	\$0.057 per common share

The Funds' amended Dividend Reinvestment Plan became effective on November 15, 2011, for distributions paid after December 15, 2011.

It is anticipated that Paul Belica will retire from the Trust's Board as a Trustee on December 31, 2011.
