BURR RIDGE, IL (August 1, 2012) CNH Global N.V. (NYSE: CNH) today announced financial results for the quarter ended June 30, 2012. For the quarter, net sales increased 3% (9% constant currency basis) to \$5.0 billion as firm global demand for agricultural equipment, on the back of favorable agricultural commodity prices, compensated for a more mixed trading environment in the construction equipment sector. Equipment Operations posted a comparable period improvement in gross profit margin of 80 basis points to 21% for the second quarter and an Operating Profit of \$524 million as higher revenues and positive net pricing compensated for increased SG&A expenditures and R&D investment and the negative impact from foreign exchange.

Equipment net sales during the quarter were 80% agricultural equipment and 20% construction equipment, in line with last year. The geographical distribution of net sales in the quarter was 43% North America, 35% EAME & CIS, 13% Latin America, and 9% APAC markets.

In the second quarter, Equipment Operations generated \$789 million in cash flow from operations, a 67% increase over the prior year, resulting in \$281 million cash generation on a year-to-date basis, as improved net sales and operating performance more than offset the increased net working capital needed to support business activity. Year-to-date capital expenditures totaled \$206 million, a 64% increase from the comparable 2011 period, largely as a result of investments in new manufacturing sites and product launches in both the agricultural and construction equipment segments. Through the second quarter, 72% of the capital expenditures were on new product development (inclusive of interim and final Tier 4 emission compliant equipment) and production capacity. The Group expects full year capital expenditures and R&D investment of approximately \$1 billion. CNH's Equipment Operations ended the period with a net cash position of \$2.8 billion. The 32% effective tax rate for the second quarter is within the Group's full year 2012 forecasted effective tax rate guidance of 32% to 35%.

For the quarter, net income, before restructuring and exceptional items, was \$356 million, an increase of 11.3% as a result of solid trading conditions in most regions during the quarter, satisfactory industrial performance, and improved performance by the Group's financial services business offsetting negative currency translation in the period and reduced contribution from unconsolidated industrial subsidiaries. This resulted in the Group generating diluted earnings per share of \$1.47 (before restructuring and exceptional items), up 11% compared to \$1.33 per share in the comparable period of 2011.

2012 Full Year Market Outlook

Worldwide agricultural equipment unit volume is expected to be flat to down 5%

Worldwide construction equipment unit volume is expected to be flat to down 5%

CNH Confirms Its Previously Released Guidance For The Full Year 2012

Despite a mixed economic climate in certain of the Group's operating regions, the negative effect from the translation of earnings to the U.S. dollar, and the poor climatic conditions in the United States, CNH confirms its full year financial guidance.

Revenues up 5%+

Operating Margin in excess of 8.6%

SEGMENT RESULTS

Agricultural Equipment

	Quarter Ended		Change
	6/30/2012	6/30/2011	
	(US \$ in millions, except percentages)		
Net Sales of Equipment	\$ 4,025	\$ 3,851	4.5%
Gross Profit	\$ 915	\$ 850	7.6%
Gross Margin	22.7%	22.1%	0.6 pts
Operating Profit	\$ 507	\$ 496	2.2%
Operating Margin	12.6%	12.9%	-0.3 pts

CNH Agricultural Equipment Second Quarter Results

CNH's net sales in the agricultural equipment sector increased 5% for the quarter (11% on a constant currency basis) driven by volume, positive net pricing, and favorable product mix. All of the Group's regions reported increased revenue on a constant currency basis. Operating profit increased by \$11 million to \$507 million at an operating margin of 12.6%.

Second quarter market share performance for agricultural equipment was in line with the overall market for both tractors and combines. Combine market shares increased in Latin America and APAC and was in line with the market in North America in the quarter.

CNH worldwide production of agricultural equipment matched retail sales in the quarter resulting in a stable level of company and dealer inventory.

At the 2012 Agrishow in Brazil, Case IH, through its strategic partnership with Semeato, expanded its no-till planter offerings to include a range of 7 to 36-row models. As a result of this launch, the Case IH brand now provides the most complete planter product offering in Brazil. In Latin America, the brand also began delivering the larger, more efficient 7120 and 8120 combine models with their industry leading grain quality, and unique features including CVT drives and slope compensation system. Still in Brazil, the brand's sugar cane harvester was honored by Revista Rural magazine with the Top of Mind award. In Europe, Case IH's Puma 145 with Efficient Power was awarded HIT of the Fair at the XIII Mazowieckie Dni Rolnictwa (Mazovian Agricultural Days) exhibition in Poland. Furthermore, Case IH began assembly, at the company joint venture manufacturing facility in Russia, of Axial-Flow Combines 6088 for the local market.

In Europe and in Australia, New Holland Agriculture launched the new BigBaler range, which provides up to 20% increased capacity and up to 5% denser bales for improved productivity. In North America, strong growth in the dairy & livestock customer segments and the onset of an early hay season enabled New Holland to consolidate leadership in this area. With the introduction of the flexible SmartTrax track option on the T9 4WD tractor family, New Holland is well positioned for growth with mixed farmers who are diversifying their income with the opportunities in cash crops available today. At the Agrishow in Brazil, New Holland, as part of its partnership with Semeato, launched the new SOLTT planting equipment, which provides a full range of solutions, from the very small up to the largest planter in the market. The brand also presented the new CR5080, CR6080SL and CR9080 models, which complete the Twin Rotor combine range that features engines from 300 to 450 hp. As part of its Clean Energy Leader strategy, New Holland displayed a project developed in partnership with the Center for Sugarcane Technology (CTC), based in Piracicaba, Brazil which aims to generate renewable energy by baling sugar cane straw. New Holland also sponsored the Rio +20 Summit United Nations Conference on Sustainable Development in Rio de Janeiro and delivered a lecture on sustainable solutions for agribusiness.

New Holland launched its new TT Compact tractor series in several key African countries, including South Africa, Morocco and Tunisia. Featuring fuel-efficient engines ranging from 35 to 47 hp, these all-purpose tractors deliver powerful performance in a compact size for maximum maneuverability, reduced fuel consumption and low emissions. This addition further extends the popular TT tractor range, offering a wider choice for more applications. In South Africa, New Holland also launched the new fuel efficient TD5 series. The new tractors, available for the local market with fuel efficient Tier 3 compliant engines ranging from 88 to 110 hp, feature a completely new cab and can be equipped with a PowerShuttle transmission and a front loader for increased versatility in multiple uses.

Construction Equipment

	Quarter Ended		
	6/30/2012	6/30/2011	Change
	(US \$ in millions, except percentages)		
Net Sales of Equipment	\$ 1,001	\$ 1,030	-2.8%
Gross Profit	\$ 138	\$ 138	0.0%
Gross Margin	13.8%	13.4%	0.4 pts
Operating Profit	\$ 17	\$ 25	-32.0%
Operating Margin	1.7%	2.4%	-0.7 pts

CNH Construction Equipment Second Quarter Results

CNH's construction equipment second quarter 2012 net sales increased 4% on a constant currency basis (-3% on a reported basis) as market conditions remained largely flat to Q1 2012 in the North American market and improved equipment availability drove higher sales in the EAME & CIS markets. Challenging market conditions in Europe and Brazil, coupled with the negative effects of currency translation led to a comparative period margin decline of 70 basis points from the prior period.

Worldwide construction equipment market share was up in the second quarter, with gains in EAME & CIS and APAC light equipment markets and the North American heavy sector, as a result of new product launches and good equipment availability.

Worldwide production of construction equipment was moderately above retail sales during the quarter. The Group expects to moderately reduce construction equipment manufacturing levels, primarily in Latin America and Europe, to balance inventory levels over the remainder of the year.

New Holland Construction continued to renew its product range in high growth and emerging markets. During the quarter, it introduced the new C series crawler excavator and its C series wheel loader with Tier 3 compliant engines to its key markets in Africa, the Middle East, the CIS and Central Asia.

Case Construction Equipment introduced its new 521F and 621F wheel loaders equipped with Tier 3 compliant engines in Africa, the Middle East, the CIS and Central Asia, completing the renewal of its range of heavy line wheel loaders in these markets. In addition, at the CTT trade show in Moscow, Russia, Case presented its latest range of Tier 3 compliant SR and SV skid steer and TR compact track loaders.

In June, CNH celebrated the production of its 25,000th American-made Kobelco excavator at the company's manufacturing facility in Calhoun, Georgia (U.S.).

CNH Financial Services Second Quarter Results

	Quarter Ended		Change
	6/30/2012	6/30/2011	
	(US \$ in millions, except percentages)		
Net Income	\$ 78	\$ 52	50.0%
On-Book Asset Portfolio	\$ 16,075	\$ 15,642	2.8%
Managed Asset Portfolio	\$ 18,399	\$ 18,449	-0.3%

Net income attributable to Financial Services was \$78 million for the quarter, compared with \$52 million in the second quarter of 2011. Improved results were due to a higher average portfolio and lower provision for credit losses, partially offset by a higher provision for income taxes.

At the end of the second quarter of 2012, delinquent receivables greater than 30 days past due were 1.6% of the total on-book portfolio, a decrease from 1.9% at the end of the first quarter of 2012.

Unconsolidated Equipment Operations Subsidiaries

Second quarter results for the Group's unconsolidated Equipment Operations subsidiaries were \$25 million, down from \$35 million in the comparable period of 2011 largely as a result of reduced profits in the construction equipment sector and foreign currency translation.

Combination Transaction Proposal From Fiat Industrial

On May 30, 2012, CNH's Board of Directors received a proposal from Fiat Industrial S.p.A. regarding a combination transaction between Fiat Industrial S.p.A. and CNH Global N.V. The Board of Directors has appointed a special committee of unconflicted directors to evaluate the proposal. The special committee will make a recommendation to the unconflicted members of the board who will make a recommendation to the company's shareholders.

ABOUT CNH

CNH Global N.V. is a world leader in the agricultural and construction equipment businesses. Supported by approximately 11,300 dealers in approximately 170 countries, CNH brings together the knowledge and heritage of its Case and New Holland brand families with the strength and resources of its worldwide commercial, industrial, product support and finance organizations. CNH Global N.V., whose stock is listed on the New York Stock Exchange (NYSE:CNH), is a majority-owned subsidiary of Fiat Industrial S.p.A. (FI.MI). More information about CNH and its Case and New Holland products can be found online at www.cnh.com.

CNH CONFERENCE CALL AND WEBCAST

CNH management will hold a conference call on August 1, 2012 to review second quarter 2012 results. The conference call webcast will begin at 6:00 a.m. U.S. Central Time (7:00 a.m. U.S. Eastern Time). This call can be accessed through the investor information section of the company's website at www.cnh.com and will be transmitted by CCBN.

NON-GAAP MEASURES

CNH utilizes various figures that are Non-GAAP Financial Measures as this term is defined under Regulation G, as promulgated by the SEC. In accordance with Regulation G, CNH has detailed either the computation of these measures from multiple U.S. GAAP figures or reconciled these non-GAAP financial measures to the most relevant U.S. GAAP equivalent in the accompanying tables to this press release. Some of these measures do not have standardized meanings and investors should consider that the methodology applied in calculating such measures may differ among companies and analysts. CNH's management believes these non-GAAP measures provide useful supplementary information to investors in order that they may evaluate CNH's financial performance using the same measures used by our management. These non-GAAP financial measures should not be considered as a substitute for, nor superior to, measures of financial performance prepared in accordance with U.S. GAAP.

CNH defines Equipment Operations Gross Profit as net sales of equipment less costs classified as cost of goods sold. CNH defines Equipment Operations Operating Profit as gross profit less costs classified as selling, general and administrative and research and development costs. CNH defines Equipment Operations Gross Margin as gross profit as a percent of net sales of equipment. CNH defines Equipment Operations Operating Margin as operating profit as a percent of net sales of equipment. Net Debt (Cash) is defined as total debt (including intersegment debt) less cash and cash equivalents, deposits in Fiat Industrial affiliates cash management pool and intersegment notes receivable. CNH defines Net income (loss) and diluted EPS before restructuring and exceptional items as Net income (loss) attributable to CNH, less restructuring charges and exceptional items, after tax. Equipment Operations working capital is defined as accounts and notes receivable and other-net, excluding intersegment notes receivables, plus inventories less accounts payable. The U.S. dollar computation of cash generated from working capital, as defined, is impacted by the effect of foreign currency translation and other non-cash transactions. CNH defines the change in net sales on a constant currency basis as the difference between prior year actual net sales and current year net sales translated at prior year average exchange rates. Elimination of the currency translation effect provides constant comparisons without the distortion of currency rate fluctuations.

FORWARD-LOOKING STATEMENTS

This press release includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact contained in this press release, including statements regarding our competitive strengths, business strategy, future financial position, operating results, budgets, projected costs and plans and objectives of management, are forward-looking statements. These statements may include terminology such as may, will, expect, could, should, intend, estimate, anticipate, believe, outlook, continue, remain, on track, goal, or similar terminology.

Our outlook is largely based on our interpretation of what we consider to be relevant economic assumptions and involves risks and uncertainties that could cause actual results to differ (possibly materially) from such forward-looking statements. Macro-economic factors including monetary policy, interest rates, currency exchange rates, inflation,

deflation, credit availability and the intervention by governments and non-governmental organizations in an attempt to influence such factors can have a material impact on our customers and the demand for our goods. Crop production and commodity prices are strongly affected by weather and can fluctuate significantly. Housing starts and other construction activity are sensitive to, among other things, credit availability, interest rates and government spending. Some of the other significant factors that may affect our results include general economic and capital market conditions, the cyclical nature of our businesses, customer buying patterns and preferences, the impact of changes in geographical sales mix and product sales mix, foreign currency exchange rate movements, our hedging practices, investment returns, our and our customers access to credit, restrictive covenants in our debt agreements, actions by rating agencies concerning the ratings on our debt and asset-backed securities and the credit ratings of Fiat Industrial, risks related to our relationship with Fiat Industrial, the effect of the demerger transaction consummated by Fiat pursuant to which CNH was separated from Fiat's automotive business and became a subsidiary of Fiat Industrial, political uncertainty and civil unrest or war in various areas of the world, pricing, product initiatives and other actions taken by competitors, disruptions in production capacity, excess inventory levels, the effect of changes in laws and regulations (including those related to tax, healthcare, retiree benefits, government subsidies, engine emissions, and international trade regulations), the results of legal proceedings, technological difficulties, results of our research and development activities, changes in environmental laws, employee and labor relations, pension and health care costs, relations with and the financial strength of dealers, the cost and availability of supplies, raw material costs and availability, energy prices, real estate values, animal diseases, crop pests, harvest yields, government farm programs, consumer confidence, housing starts and construction activity, concerns related to modified organisms and fuel and fertilizer costs, and the growth of non-food uses for some crops (including ethanol and biodiesel production). Additionally, our achievement of the anticipated benefits of our margin improvement initiatives depends upon, among other things, industry volumes as well as our ability to effectively rationalize our operations and to execute our brand strategy. Further information concerning factors that could significantly affect expected results is included in our annual report on Form 20-F for the year ended December 31, 2011.

Furthermore, in light of ongoing difficult macroeconomic conditions, both globally and in the industries in which we operate, it is particularly difficult to forecast our results and any estimates or forecasts of particular periods that we provide are uncertain. We can give no assurance that the expectations reflected in our forward-looking statements will prove to be correct. Our actual results could differ materially from those anticipated in these forward-looking statements. All written and oral forward-looking statements attributable to us are expressly qualified in their entirety by the factors we disclose that could cause our actual results to differ materially from our expectations. We undertake no obligation to update or revise publicly any forward-looking statements.

Forward Looking Statement

3

CNH
Global
N.V.
Second
Quarter
and
First
Half

2012
Conference
Call

August
1,
2012

Our outlook is largely based on our interpretation of what we consider to be relevant economic assumptions and involves risks that could cause actual results to differ (possibly materially) from such forward-looking statements. Macro-economic factors including interest rates, currency exchange rates, inflation, deflation, credit availability and the intervention by governments and non-governmental organizations to influence such factors can have a material impact on our customers and the demand for our goods. Crop production and other construction activity are strongly affected by weather and can fluctuate significantly. Housing starts and other construction activity are sensitive to, among other things, availability, interest rates and government spending. Some of the other significant factors that may affect our results include general economic conditions, capital market conditions, the cyclical nature of our businesses, customer buying patterns and preferences, the impact of changing market mix and product sales mix, foreign currency exchange rate movements, our hedging practices, investment returns, our and our subsidiaries' credit, restrictive covenants in our debt agreements, actions by rating agencies concerning the ratings on our debt and asset-backed securities, credit ratings of Fiat Industrial, risks related to our relationship with Fiat Industrial, the effect of the demerger transaction consisting of the separation of CNH from Fiat's automotive business and became a subsidiary of Fiat Industrial, political uncertainty in various areas of the world, pricing, product initiatives and other actions taken by competitors, disruptions in production capacity, the effect of changes in laws and regulations (including those related to tax, healthcare, retiree benefits, government subsidies, international trade regulations), the results of legal proceedings, technological difficulties, results of our research and development, environmental laws, employee and labor relations, pension and health care costs, relations with and the financial strength of dealers, availability of supplies, raw material costs and availability, energy prices, real estate values, animal diseases, crop pests, harvest, farm programs, consumer confidence, housing starts and construction activity, concerns related to modified organisms and fuel, the growth of non-food uses for some crops (including ethanol and biodiesel production). Additionally, our achievement of the margin improvement initiatives depends upon, among other things, industry volumes as well as our ability to effectively ration and execute our brand strategy. Further information concerning factors that could significantly affect expected results is included in our 20-F for the year ended December 31, 2011.

Furthermore, in light of ongoing difficult macroeconomic conditions, both globally and in the industries in which we operate, it is difficult to forecast our results and any estimates or forecasts of particular periods that we provide are uncertain. We can give no assurance that the results reflected in our forward-looking statements will prove to be correct. Our actual results could differ materially from those anticipated in our forward-looking statements. All written and oral forward-looking statements attributable to us are expressly qualified in their entirety by the disclaimer that could cause our actual results to differ materially from our expectations. We undertake no obligation to update or revise our forward-looking statements.

This presentation includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and the Securities Exchange Act of 1934. All statements other than statements of historical fact contained in this presentation, including statements regarding our: competitive strengths; business strategy; future financial position or operating results; budgets; projections with respect to income, earnings (or loss) per share, capital expenditures, dividends, capital structure or other financial items; costs; and plans and management regarding operations and products, are forward-looking statements. These statements may include terminology such as "expect," "could," "should," "intend," "estimate," "anticipate," "believe," "outlook," "continue," "remain," "on track," "may," or similar terminology.

Second Quarter 2012 Highlights

Net Sales increase of 3% (+9% cc basis) to \$5.0 billion in the second quarter and up 11% (+16% cc basis) to \$9.7 billion in the first six months

Market Share / Market Position Data

Certain industry and market share information in this report has been presented on a worldwide basis which includes all countries.

In this report, management estimates of market share information are generally based on retail unit data in North America, on registrations of equipment in most of Europe, Brazil,

and
various

CNH Global N.V. Second Quarter and First Half 2012 Conference Call

August 1, 2012

Non-GAAP Measures

31

CNH Global N.V. Second Quarter and First Half 2012 Conference Call

August 1, 2012

Non-GAAP Measures
CNH
utilizes
various
figures
that
are
Non-GAAP
Financial
Measures

as
this
term
is
defined
under
Regulation G
as promulgated by the SEC. In accordance with Regulation G, CNH has detailed either the computation of
these
financial
measures
from
multiple
U.S.
GAAP
figures
or
reconciled
these
non-GAAP
financial
measures
to
the
most
relevant
U.S.
GAAP
equivalent
in
the
accompanying
tables
in
this
presentation.
Some
of
these
measures do not have standardized meanings and investors should consider that the methodology applied in
calculating such measures may differ among companies and analysts. CNH's management believes these non-
GAAP measures provide useful supplementary information to investors in order that they may evaluate CNH's
financial performance using the same measures used by our management. These non-GAAP financial
measures
should
not
be
considered
as
a

substitute
for,
nor
superior
to,
measures
of
financial
performance
prepared in accordance with U.S. GAAP.
Non-GAAP measures include:

Net Income Before Restructuring and Exceptional Items

33

CNH

defines

net

income

before

restructuring

and

exceptional

item

as

net

income

attributable

to

CNH,

less restructuring charges and exceptional items, after tax. Exceptional items include charges or income that may mask underlying operating results. We believe that net income before restructuring and exceptional items is a useful figure for measuring the performance of our operations.

CNH Global N.V. Second Quarter and First Half 2012 Conference Call

August 1, 2012

Equipment Operations Operating Profit

CNH defines Equipment Operations Gross Profit as net sales of equipment less cost of goods sold. CNH defines Equipment Operations Operating Profit as Gross Profit less selling, general and administrative and research and development costs. Operating Margin is Operating Profit expressed as a percentage of net sales of equipment. The following table summarizes the computation of Equipment Operations Gross and Operating Profit for all periods presented:

34

(U.S. GAAP, US\$ in mils.)
