CNH Meets Heilongjiang Province High Officials to Discuss

Development of Cooperation

HARBIN, China (October 30, 2012) Franco Fusignani, Head of CNH International, and Mr. Lin Duo, Party Secretary of Harbin, met last week to discuss the state of the strong cooperation between the Company and Harbin Party in support of the Heilongjiang Province's agricultural development and mechanization.

Mr. Fusignani and Mr. Lin discussed future investments and the progress of the recently announced extension of the Case-New Holland Harbin facility that will add 400,000 m² to the existing plant, making this site the largest agricultural equipment factory in Northeast China. The first phase of the project, with an initial investment of over US\$ 100 Million, will see production of tractors, balers, planters and sprayers move to the new facility which will also manufacture combine harvesters and the construction of a new R&D center. Mr. Fusignani was pleased to inform Mr. Lin about the project's good progress, including the advanced stage of development of the R&D center that will be completed as early as February 2013, ready to begin operation in the following months of the new year.

After the meeting, Mr. Fusignani commented: "We greatly appreciate the cooperation of Harbin Party and Government leaders in support of our largest industrial project in China, here in the Harbin Economic Technological Development Zone. We believe that with the continued support of the local authorities we can successfully drive forward farm mechanization in Heilongjiang and help to develop its agricultural sector, which is the key contributor to the Province's economy. CNH is a long standing partner of China and a major player in the Country's agricultural development. The Company's two brands, Case IH and New Holland Agriculture, have always met their commitments in China with a strong focus on service and a global offering of products and applications to continuously improve agricultural activities. It has been our endeavour to be considered as a local partner capable of providing an offering with a high technological content well suited to the evolution of Chinese agriculture."

CNH Global, a worldwide leader in the agricultural and construction equipment businesses and part of Fiat Industrial, has a strong presence in China, where it holds a leading position in the market for high horsepower tractors, large combine harvesters, cotton pickers and sugar cane harvesters with its two brands, Case IH and New Holland Agriculture. This result is achieved through the local support provided to Chinese agriculture by the eight companies CNH operates in the country, which include four plants, two R&D centers and two trading companies.

CNH has invested in China since the first International Harvester tractor was imported back in 1909 and has steadily developed its relationship with this country. The more recent business relationship started in 1997 with the delivery, the following year, of more than 360 tractors New Holland M160 to Heilongjiang Province, which played a key role in the introduction of high horsepower tractors in China. During this time CNH has also built a strong partnership with the Province through the establishment of a local team and Service, Parts and Training centers to support the Province's agricultural mechanization. This was further strengthened in 2000 with the start of tractor assembly in CNH's first plant in Harbin, followed by new and improved parts, service and training facilities. Since 2009, a joint educational cooperation project with Heilongjiang Agricultural Engineering Vocational College provides training to local students on a regular basis, with the aid of CNH domestic and foreign technical experts, introducing them to the latest agricultural practices. Over the years, CNH's operations in the country have led to a steadily increasing presence of large Case IH and New Holland machinery covering the entire agricultural production cycle from planters and sprayers to tractors, balers and combine harvesters as well as specialized equipment such as cotton pickers and sugar cane harvesters.

CNH's leading presence in China is based on a manufacturing network currently comprising the Harbin industrial complex and the Shanghai plant for tractors under 135 horsepower. Two more facilities will be added in 2013: the plant in Urumqi for cotton pickers and another one in Guangzhou for sugar cane harvesters. With this manufacturing base, CNH is set to offer a full offering of high quality products for a wide variety of applications, bringing the most advanced technologies to China's farmers. All these products are backed by a strong organization to provide service support and training, contributing to a continuous improvement and advance of Chinese agriculture.

###

CNH International S.A., a subsidiary of CNH Global N.V., is the company responsible for the sales, distribution and after sales operations of agricultural and construction branded equipment in over 120 countries throughout Africa, the Middle East, the Commonwealth of Independent States, Asia and Oceania, encompassing Australia, China and India. CNH International was established in 2007 to strengthen CNH's brands focus in emerging and high-growth markets.
