

FLAHERTY & CRUMRINE/CLAYMORE TOTAL RETURN FUND INC

Form N-30B-2

October 30, 2012

**Item 1. Schedule of Investments.**

The Schedule(s) of Investment is attached herewith.

*FLAHERTY & CRUMRINE/CLAYMORE TOTAL RETURN FUND*

To the Shareholders of Flaherty & Crumrine/Claymore Total Return Fund:

Your Fund continues to benefit from strong markets, active management, and efficient use of leverage. During the third fiscal quarter<sup>1</sup>, total return on net asset value<sup>2</sup> was +7.5%. Since the fiscal year began on December 1, 2011, total return on NAV was an eye-popping +22.5%. Total return based on market price of Fund shares for the comparable periods was +14.2% and +26.0% respectively.

Conditions in the preferred market have been, and remain, positive. Redemptions of securities have significantly outpaced new issues, leaving many investors scrambling to find replacements. In addition, it appears that fixed-income investors are increasingly turning to preferred securities, attracted to relatively high yields.

Since June 1, redemptions of preferred securities totaled roughly \$44 billion. Redemptions of trust preferred securities issued by U.S. banks accounted for almost \$34 billion. As discussed in the past, over the coming years certain important regulatory benefits of trust preferreds available to banks will be phased out as a result of Dodd-Frank reform legislation. Changes in regulatory treatment of preferred securities and historically low current interest rates made many older issues ripe for redemption.

New issue activity has been robust, but the amount of new issuance, almost \$29 billion since June 1, has fallen well short of redemptions. Of this amount, only \$6.5 billion was issued by U.S. banks in the new form of qualifying Tier 1 capital. This is largely as expected most banks have chosen to build up capital by retaining earnings and issuing common stock. The balance of new issues came from a variety of industries, including insurance (\$3.6b), other finance (\$5.5b), REIT (\$5.7b), foreign banks (\$2.0b) and miscellaneous industrials and energy (\$5.7b).

Fundamental credit quality has improved steadily since the financial crisis, despite sluggish economic growth. As preferred investors, we focus primarily on an issuer's balance sheet to ensure the company's ability to meet its obligations. From our perspective, corporate balance sheets are healthier now than at any time in recent memory. Of course, not all companies are thriving. The ongoing European crisis has strained issuers in that region. However, our approach of owning preferred securities issued by strong, diversified European companies paid off recently this segment of the portfolio (13% as of August 31<sup>st</sup>) was the Fund's top performer during the quarter.

Leverage is an essential component of Fund strategy. We expect the cost of leverage to be below the yield on the Fund's investment portfolio, providing a boost to income available to shareholders. In addition, leverage magnifies the principal change of securities in the portfolio. With leverage, if total return (the sum of income plus principal change) on portfolio holdings is positive (negative), total return on net asset value of the Fund will be even higher (lower) than an unleveraged portfolio. The Fund's leverage has worked exactly as expected and helped produce this year's excellent returns.

While we welcome strong performance for the Fund, shareholders should understand that the decline in preferred securities' yields in the years since the financial crisis, if they persist, will put downward pressure on Fund income over time. The Fund continues to have holdings in bank trust preferred securities that will likely be redeemed (approximately 8.0% of its total net assets as of August 31, 2012) and which have a

<sup>1</sup> June 1, 2012 - August 31, 2012

<sup>2</sup> Following the methodology required by the SEC, total return includes income and principal change, plus the impact of the Fund's leverage and expenses.

weighted average current yield of approximately 8.35% as of August 31, 2012. New issue preferred securities have been coming at yields in the range of 5.20-6.25%. We are working hard to reinvest proceeds from called issues into attractive securities, but in most cases, yields on those securities are lower than the called securities.

On the flip side, the Fund's cost of leverage has remained low, as the Federal Reserve has increased its monetary accommodation. In addition, the Fund increased its *dollar* amount of leverage as preferred securities' values increased while its *percentage* amount of leverage remained at around 33% as of August 31, 2012. Both have helped support the Fund's distributable income per common share. However, leverage costs cannot drop much further. At some point, the lower yield on preferred securities again, if they persist will reduce Fund income. While the distribution rate probably will be lower at some point in the future, we believe preferred securities offer attractive total return potential and the Fund will continue to offer a competitive distribution rate.

As always, we encourage you to visit the Fund's website [www.fcclaymore.com](http://www.fcclaymore.com) for a more in-depth discussion of conditions in both preferred markets and the broader economy.

Sincerely,

Donald F. Crumrine  
Chairman

(1) Whenever the net asset value per share of the Fund's Common Stock is less than or equal to the market price per share on the reinvestment date, new shares issued will be valued at the higher of net asset value or 95% of the then current market price. Otherwise, the reinvestment shares of Common Stock will be purchased in the open market.

Flaherty &amp; Crumrine/Claymore Total Return Fund Incorporated

**NOTES TO FINANCIAL STATEMENTS (Unaudited)****1. Aggregate Information for Federal Income Tax Purposes**

At August 31, 2012, the aggregate cost of securities for federal income tax purposes was \$278,523,396, the aggregate gross unrealized appreciation for all securities in which there is an excess of value over tax cost was \$29,162,497 and the aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value was \$24,132,046.

**2. Additional Accounting Standards**

*Fair Value Measurements:* The Fund has performed an analysis of all existing investments and derivative instruments to determine the significance and character of all inputs to their fair value determination. The levels of fair value inputs used to measure the Fund's investments are characterized into a fair value hierarchy. Where inputs for an asset or liability fall into more than one level in the fair value hierarchy, the investment is classified in its entirety based on the lowest level input that is significant to that investment's valuation. The three levels of the fair value hierarchy are described below:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)  
The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Transfers in and out of levels are recognized at market value at the end of the period. A summary of the inputs used to value the Fund's investments as of August 31, 2012 is as follows:

	Total Value at August 31, 2012	Level 1 Quoted Price	Level 2 Significant Observable Inputs	Level 3 Significant Unobservable Inputs
<b>Preferred Securities</b>				
Banking	\$ 92,457,727	\$ 68,333,856	\$ 24,100,371	\$ 23,500
Financial Services	5,721,842	1,378,052	2,169,750	2,174,040
Insurance	63,879,988	40,923,270	22,956,718	
Utilities	58,552,382	17,333,759	41,218,623	
Energy	14,107,875	14,107,875		
Real Estate Investment Trust (REIT)	272,000	272,000

Money Market Fund	310,352	310,352		
<b>Total Investments</b>	<b>\$ 283,553,847</b>	<b>\$ 163,560,996</b>	<b>\$ 117,231,498</b>	<b>\$ 2,761,353</b>

Flaherty & Crumrine/Claymore Total Return Fund Incorporated

## NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

During the reporting period, there were no transfers into Level 1 from Level 2. During the reporting period, securities with an aggregate market value of \$7,234,137 were transferred into Level 2 from Level 1. The securities were transferred because of a reduction in the amount of observable market data, resulting from: a decrease in market activity for the securities, reduced availability of quoted prices for the securities, or de-listing of securities from a national securities exchange that resulted in a material decrease in activity.

The fair values of the Fund's investments are generally based on market information and quotes received from brokers or independent pricing services approved by the Board and unaffiliated with the Adviser. To assess the continuing appropriateness of security valuations, management, in consultation with the Adviser, regularly compares current prices to prior prices, prices across comparable securities, actual sale prices for securities in the Fund's portfolio, and market information obtained by the Adviser as a function of being an active participant in the markets.

Securities with quotes that are based on actual trades or actionable bids and offers with a sufficient level of activity on or near the measurement date are classified as Level 1. Securities that are priced using quotes derived from implied values, indicative bids and offers, or a limited number of actual trades or the same information for securities that are similar in many respects to those being valued are classified as Level 2. If market information is not available for securities being valued, or materially-comparable securities, then those securities are classified as Level 3. In considering market information, management evaluates changes in liquidity, willingness of a broker to execute at the quoted price, the depth and consistency of prices from pricing services, and the existence of observable trades in the market.

The following is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

		Preferred Securities		Corporate Debt
	Total Investments	Banking	Financial Services	Securities
<b>Balance as of 11/30/11</b>	\$ 3,354,693	\$ 303,500	\$ 2,151,360	\$ 899,833
Accrued discounts/premiums				
Realized gain/(loss)				
Change in unrealized appreciation/(depreciation)	(593,340)	(280,000)	22,680	(336,020)
Purchases				
Sales				
Transfers in				
Transfers out				
<b>Balance as of 8/31/12</b>	\$ 2,761,353	\$ 23,500	\$ 2,174,040	\$ 563,813

For the nine months ended August 31, 2012, total change in unrealized gain/(loss) on Level 3 securities still held at period-end and included in the change in net assets was \$(593,340).

Flaherty &amp; Crumrine/Claymore Total Return Fund Incorporated

**NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)**

The following table summarizes the valuation techniques used and unobservable inputs developed to determine the fair value of Level 3 investments:

Category	Fair Value at 8/31/12	Valuation Technique	Unobservable Input	Input Range (Wgt Avg)
<b>Preferred Securities</b>				
Banking	\$ 23,500	Bankruptcy recovery	Credit/Structure-specific recovery	0.00%-0.50% (0.20%)
Financial Services	2,174,040	Trust Liquidation Value	Discount for marketability	20%-30% (25%)
Corporate Debt Securities	563,813	Bankruptcy recovery	Credit/Structure-specific recovery	20%-25% (21%)

The significant unobservable inputs used in the fair value measurement technique for bankruptcy recovery are based on recovery analysis that is specific to the security being valued, including the level of subordination and structural features of the security, and the current status of any bankruptcy or liquidation proceedings. Observable market trades in bankruptcy claims are utilized by management, when available, to assess the appropriateness of valuations, although the frequency of trading depends on the specific credit and seniority of the claim. Expected recoveries in bankruptcy by security type and industry do not tend to deviate much from historical recovery rates, which are very low (sometimes zero) for preferred securities and more moderate for senior debt. Significant changes in these inputs would result in a significantly higher or lower fair value measurement.

The investment in the category Preferred Securities Financial Services is a subordinated interest in a trust whose assets consist of secured 2<sup>nd</sup> lien senior bank loans with floating-rate (adjustable) coupons. The trust assets are valued by the trustee on a monthly basis utilizing third-party pricing services, and the liabilities are reported at face value. Management utilizes third-party bank loan index data and market spread data to assess the appropriateness of valuations provided by the trustee and to adjust valuations for intra-month valuation purposes. The Fund's investment is a residual claim on the net assets of the trust. The significant unobservable input used in the fair value technique is a discount for marketability of the investment. Significant increases or decreases in this input would result in a significantly higher or lower fair value measurement.
