Managed Distribution Plan. Pursuant to an exemptive order issued by the Securities and Exchange Commission (Order), the Fund is authorized to distribute long-term capital gains to shareholders more frequently than once per year. Pursuant to the Order, the Fund s Board of Trustees approved a Managed Distribution Plan (MDP) pursuant to which the Fund makes monthly cash distributions to common shareholders, stated in terms of a fixed amount per common share.

The Fund currently distributes monthly cash distributions equal to \$0.09 per share in accordance with the MDP. You should not draw any conclusions about the Fund s investment performance from the amount of these distributions or from the terms of the MDP. The MDP will be subject to regular periodic review by the Fund s Board of Trustees and the Board may amend or terminate the MDP at any time without prior notice to Fund shareholders. However, at this time there are no reasonably foreseeable circumstances that might cause the termination of the MDP.

The Fund may distribute more than its net investment income and net realized capital gains and, therefore, a distribution may include a return of capital. A return of capital distribution does not necessarily reflect the Fund s investment performance and should not be confused with yield or income. With each distribution, the Fund will issue a notice to shareholders and a press release containing information about the amount and sources of the distribution and other related information. The amounts and sources of distributions contained in the notice and press release are only estimates and are not provided for tax purposes. The amounts and sources of the Fund s distributions for tax purposes will be reported to shareholders on Form 1099-DIV for each calendar year.

Fund shares are not insured by the FDIC and are not deposits or other obligations of, or guaranteed by, any depository institution. Shares are subject to investment risks, including possible loss of principal invested.

Management s Discussion of Fund Performance

Economic and Market Conditions

The 12-month period ended October 31, 2012 was a year dominated by central bank easing. The most aggressive action took place in developed-market countries that are burdened with debt. With their key policy rates already near zero, the U.S. Federal Reserve (the Fed), Bank of Japan and Bank of England relied on quantitative easing (QE) to try to reduce longer-term borrowing costs and spur economic growth. In particular, weak labor market conditions and sluggish economic growth in the United States drove the Fed s additional QE. In addition, the Fed continued with Operation Twist, a stimulus program that was set to expire in June 2012 but that was extended through the end of 2012. The European Central Bank (ECB) offered low-interest, three-year loans to banks, as the region s debt crisis made it difficult for banks to fund their operations in the public markets. The ECB also cut its main interest rate three times, to a record low of 0.75%, and unveiled a plan to buy bonds of troubled eurozone governments.

The policies from the Fed aimed at keeping interest rates low bolstered demand for U.S. government-backed investments in the second half of the period. In addition to the continuation of Operation Twist announced in June 2012, the Fed in September 2012 announced its plan to keep policy rates at or near zero until at least mid-2015 and also announced further monetary stimulus with its third round of QE. This new QE3 program came in the form of open-ended U.S. government agency mortgage-backed security (MBS) purchases. Against this already favorable backdrop for high-quality fixed-income securities, investor demand for agency mortgage-backed securities further increased after the September 2012 announcement, with yield spreads compared to Treasurys tightening to their lows of the year.

The world s bond markets generally posted positive returns during the fiscal year. Higher-risk securities delivered some of the strongest gains, as investors chased yield in the low-rate environment. For example, local bond prices appreciated throughout much of the emerging world. In the foreign exchange markets, most Latin American and Asian currencies strengthened versus the U.S. dollar, and most Central and Eastern European currencies strengthened versus the euro. On a total return basis, the Mexican peso and Philippine peso did especially well versus the U.S. dollar, while the Polish zloty was a standout performer versus the euro.

Throughout the period, the floating-rate market exhibited resilience amid low U.S. economic growth and uncertainty regarding U.S. fiscal policy. This resilience was due to favorable market technical and fundamental conditions. The net supply of floating-rate loans was moderate, as loan repayments

by issuers helped offset new issue supply coming to market. Improved economic data and the Fed s pledge to keep interest rates low appeared to have fueled investor demand for higher-yielding alternatives to government bonds. Other investors turned to floating-rate loans for protection against potentially rising interest rates. For the period, the modest growth in the overall supply of loans was easily absorbed due to widespread investor demand. In terms of market fundamentals, improving corporate balance sheets and better-than-expected earnings growth also helped bolster loans. Furthermore, the default rate in the market remained well below longer-term averages, ending October 31, 2012 at 1.1% by principal amount on a last-12-months basis, according to S&P Leveraged Commentary Data (LCD).

Fund Performance

For the fiscal year ended October 31,2012, Eaton Vance Short Duration Diversified Income Fund (the Fund) had a total return of 6.92% at net asset value (NAV).

Investments in mortgage-backed securities contributed positively to the Fund s performance. The Fund maintained its focus on seasoned agency MBS, due to the relatively low prepayment profile on these loans which originated more than a decade ago. Amid economic uncertainty and the

Fed s renewed involvement in the MBS market, agency MBS saw spreads to Treasurys tighten, as there continued to be demand from investors looking to pick up additional yield with comparable credit quality. The Fund also benefited from its investment in seasoned inverse interest-only MBS, as there was substantial spread tightening in the sector over the year.

The Fund s exposure to international markets contributed positively to performance during the 12-month period. Investing both long and short in a variety of sovereign instruments, the Fund recorded positive results in most geographic regions. Long positions in Venezuela, Philippines and Poland were significant contributors to overall performance. Detracting from Fund results was a long position in Argentina and short positions in France and Japan.

Investments in senior secured loans also boosted Fund performance. At the start of the period, the asset class was recovering from a late-summer 2011 sell-off. Prices continued to appreciate during the 12-month period, as favorable macroeconomic developments and positive technical trends provided a supportive environment for risk assets. Improving company fundamentals, earnings growth and low new default rates also favorably impacted the performance of loans in the portfolio. An underweighting in publishing sector loans, as well as loans in lower ratings categories, detracted somewhat from Fund performance.

See Endnotes and Additional Disclosures in this report.

Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) or market price (as applicable) with all distributions reinvested. Fund performance at market price will differ from its results at NAV due to factors such as changing perceptions about the Fund, market conditions, fluctuations in supply and demand for Fund shares, or changes in Fund distributions. Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost. Performance less than one year is cumulative. Performance is for the stated time period only; due to market volatility, current Fund performance may be lower or higher than the quoted return. For performance as of the most recent month end, please refer to www.eatonvance.com.

Endnotes and Additional Disclosures

- 1 The views expressed in this report are those of the portfolio manager(s) and are current only through the date stated at the top of this page. These views are subject to change at any time based upon market or other conditions, and Eaton Vance and the Fund(s) disclaim any responsibility to update such views. These views may not be relied upon as investment advice and, because investment decisions are based on many factors, may not be relied upon as an indication of trading intent on behalf of any Eaton Vance fund. This commentary may contain statements that are not historical facts, referred to as forward looking statements. The Fund s actual future results may differ significantly from those stated in any forward looking statement, depending on factors such as changes in securities or financial markets or general economic conditions, the volume of sales and purchases of Fund shares, the continuation of investment advisory, administrative and service contracts, and other risks discussed from time to time in the Fund s filings with the Securities and Exchange Commission.
- 2 Performance results reflect the effects of leverage.
- 3 The Distribution Rate is based on the Fund s last regular distribution per share in the period (annualized) divided by the Fund s NAV or market price at the end of the period. The Fund s distributions may be composed of ordinary income, tax-exempt income, net realized capital gains and return of capital.
- 4 The Fund employs leverage through derivatives and borrowings. Total leverage is shown as a percentage of the Fund s aggregate net assets plus the absolute notional value of long and short derivatives and borrowings outstanding. Use of leverage creates an opportunity for income, but creates risks including greater price volatility. The cost of borrowings rises and falls with changes in short-term interest rates. The Fund is required to maintain prescribed asset coverage for its derivatives and borrowings, which could be reduced if Fund asset values decline.
- 5 Total leveraged assets include all assets of the Fund (including those acquired with financial leverage), the absolute notional value of long and short forward foreign currency contracts and other derivatives held by the Fund. Asset Allocation as a percentage of the Fund s net assets amounted to 202.4%. Please refer to the definition of total leveraged assets within the Notes to Consolidated Financial Statements included herein.

Fund profile subject to change due to active management.

Important Notice to Shareholders

Effective December 6, 2012, Eric A. Stein joined the portfolio management team of the Fund. Mr. Stein is a Vice President of Eaton Vance Management, and also co-manages other Eaton Vance portfolios. Mr. Stein replaced Mark S. Venezia, who retired from Eaton Vance in December 2012.

In October of 2012, the Fund eliminated the 15% limit on the Fund s ability to execute short sales. The Fund will continue to be required to not make short sales of securities or maintain a short position, unless at all times when a short position is open (i) it owns an equal amount of such securities or securities convertible into or exchangeable, without payment of any further consideration, for securities of the same issue as, and equal in amount to, the securities sold short or (ii) it holds in a segregated account cash or other liquid securities (to the extent required under the 1940 Act) in an amount equal to the current market value of the securities sold short.

US: UY	
*	In U.S. dollars unless otherwise indicated.
(1)	Senior floating-rate interests (Senior Loans) often require prepayments from excess cash flows or permit the borrowers to repay at their election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, Senior Loans will have an expected average life of approximately two to four years. The stated interest rate represents the weighted average interest rate of all contracts within the senior loan facility and includes commitment fees on unfunded loan commitments, if any. Senior Loans typically have rates of interest which are redetermined either daily, monthly, quarterly or semi-annually by reference to a base lending rate, plus a premium. These base lending rates are primarily the London Interbank Offered Rate (LIBOR) and secondarily, the prime rate offered by one or more major United States banks (the Prime Rate) and the certificate of deposit (CD) rate or other base lending rates used by commercial lenders.
(2)	This Senior Loan will settle after October 31, 2012, at which time the interest rate will be determined.
(3)	For fair value measurement disclosure purposes, security is categorized as Level 3 (see Note 10).
(4)	Represents a payment-in-kind security which may pay all or a portion of interest in additional par.
(5)	Inverse floating-rate security whose coupon varies inversely with changes in the interest rate index. The stated interest rate represents the coupon rate in effect at October 31, 2012.
(6)	Interest only security that entitles the holder to receive only interest payments on the underlying mortgages. Principal amount shown is the notional amount of the underlying mortgages on which coupon interest is calculated.
(7)	Principal only security that entitles the holder to receive only principal payments on the underlying mortgages.

(9) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities may be sold in certain transactions (normally to qualified institutional buyers) and remain exempt from registration. At October 31, 2012, the aggregate value of these securities is \$6,957,026 or 2.1% of the

(10)	Adjustable rate mortgage security. Rate shown is the rate at October 31, 2012.				
(11)	Security (or a portion thereof) has been pledged to cover collateral requirements on open financial contracts.				
(12)	Variable rate security. The stated interest rate represents the rate in effect at October 31, 2012.				
(13)	Amount is less than 0.05%.				
(14)	Inflation-linked security whose principal is adjusted for inflation based on changes in a designated inflation index or i Interest is calculated based on the inflation-adjusted principal.	nflation ra	te for the appli	cabl	e country.
(15)	Represents a structured security whose market value and interest rate are linked to the performance of the underlying	security.			
	Security exempt from registration under Regulation S of the Securities Act of 1933, which exempts from registration United States. Security may not be offered or sold in the United States except pursuant to an exemption from, or in a trequirements of the Securities Act of 1933. Non-income producing.				
(18)	Security was acquired in connection with a restructuring of a Senior Loan and may be subject to restrictions on resale				
(19)	Affiliated investment company available to Eaton Vance portfolios and funds which invests in high quality, U.S. dollar instruments. The rate shown is the annualized seven-day yield as of October 31, 2012.	ır denomir	nated money m	arke	t

Short Duration Diversified Income Fund

October 31, 2012

Notes to Consolidated Financial Statements

1 Significant Accounting Policies

Eaton Vance Short Duration Diversified Income Fund (the Fund) is a Massachusetts business trust registered under the Investment Company Act of 1940, as amended (the 1940 Act), as a diversified, closed-end management investment company. The Fund s primary investment objective is to provide a high level of current income, with a secondary objective of seeking capital appreciation to the extent consistent with its primary goal.

The Fund seeks to gain exposure to the commodity markets, in whole or in part, through investments in Eaton Vance EVG Commodity Subsidiary, Ltd. (the Subsidiary), a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands with the same objective and investment policies and restrictions as the Fund. The Fund may invest up to 25% of its total assets in the Subsidiary. The net assets of the Subsidiary at October 31, 2012 were \$12,305,904 or 3.6% of the Fund sconsolidated net assets. The accompanying consolidated financial statements include the accounts of the Subsidiary. Intercompany balances and transactions have been eliminated in consolidation.

The following is a summary of significant accounting policies of the Fund. The policies are in conformity with accounting principles generally accepted in the United States of America.

A Investment Valuation Interests in senior floating-rate loans (Senior Loans) for which reliable market quotations are readily available are valued generally at the average mean of bid and ask quotations obtained from a third party pricing service. Other Senior Loans are valued at fair value by the investment adviser under procedures approved by the Trustees. In fair valuing a Senior Loan, the investment adviser utilizes one or more of the valuation techniques described in (i) through (iii) below to assess the likelihood that the borrower will make a full repayment of the loan underlying such Senior Loan relative to yields on other Senior Loans issued by companies of comparable credit quality. If the investment adviser believes that there is a reasonable likelihood of full repayment, the investment adviser will determine fair value using a matrix pricing approach that considers the yield on the Senior Loan. If the investment adviser believes there is not a reasonable likelihood of full repayment, the investment adviser will determine fair value using analyses that include, but are not limited to: (i) a comparison of the value of the borrower s outstanding equity and debt to that of comparable public companies; (ii) a discounted cash flow analysis; or (iii) when the investment adviser believes it is likely that a borrower will be liquidated or sold, an analysis of the terms of such liquidation or sale. In certain cases, the investment adviser will use a combination of analytical methods to determine fair value, such as when only a portion of a borrower s assets are likely to be sold. In conducting its assessment and analyses for purposes of determining fair value of a Senior Loan, the investment adviser will use its discretion and judgment in considering and appraising relevant factors. Fair value determinations are made by the portfolio managers of the Fund based on information available to such managers. The portfolio managers of other funds managed by the investment adviser that invest in Senior Loans may not possess the same information about a Senior Loan borrower as the portfolio managers of the Fund. At times, the fair value of a Senior Loan determined by the portfolio managers of other funds managed by the investment adviser that invest in Senior Loans may vary from the fair value of the same Senior Loan determined by the portfolio managers of the Fund. The fair value of each Senior Loan is periodically reviewed and approved by the investment adviser s Valuation Committee and by the Trustees based upon procedures approved by the Trustees. Junior Loans (i.e., subordinated loans and second lien loans) are valued in the same manner as Senior Loans.

Debt obligations (including short-term obligations with a remaining maturity of more than sixty days and excluding most seasoned, fixed-rate 30-year mortgage-backed securities as noted below) are generally valued on the basis of valuations provided by third party pricing services, as derived from such services pricing models. Inputs to the models may include, but are not limited to, reported trades, executable bid and asked prices, broker/dealer quotations, prices or yields of securities with similar characteristics, benchmark curves or information pertaining to the issuer, as well as industry and economic events. The pricing services may use a matrix approach, which considers information regarding securities with similar characteristics to determine the valuation for a security. Most seasoned, fixed-rate 30-year mortgage-backed securities are valued through the use of the investment adviser s matrix pricing system, which takes into account bond prices, yield differentials, anticipated prepayments and interest rates provided by dealers. Short-term obligations purchased with a remaining maturity of sixty days or less (excluding those that are non-U.S. dollar denominated, which typically are valued by a pricing service or dealer quotes) are generally valued at amortized cost, which approximates market value. Equity securities (including common shares of closed-end investment companies) listed on a U.S. securities exchange generally are valued at the last sale or closing price on the day of valuation or, if no sales took place on such date, at the mean between the closing bid and asked prices therefore on the exchange where such securities are principally traded. Equity securities listed on the NASDAQ Global or Global Select Market generally are valued at the NASDAQ official closing price. Unlisted or listed securities for which closing sales prices or closing quotations are not available are valued at the mean between the latest available bid and asked prices or, in the case of preferred equity securities that ar

metals are valued at the New York composite mean quotation reported by Bloomberg at the valuation time. Exchange-traded options are valued at the mean between the bid and asked prices at valuation time as reported by the Options Price Reporting Authority for U.S. listed options or by the relevant exchange or board of trade for non-U.S. listed options. Over-the-counter options (including options on securities, indices and foreign currencies) are valued by a third party pricing service using techniques that consider factors including the value of the underlying instrument, the volatility of the underlying instrument and the period of time until option expiration. Financial and commodities futures contracts are valued at the closing settlement price established by the board of trade or exchange on which they are traded. Forward foreign currency exchange contracts are generally valued at the mean of the average bid and average asked prices that are reported by currency dealers to a third party pricing service at the valuation time. Such third party pricing service valuations are supplied for specific settlement periods and the Fund s forward foreign currency exchange contracts are valued at an interpolated rate between the closest preceding and subsequent settlement period reported by the third party pricing service.

Short Duration Diversified Income Fund

October 31, 2012

Notes to Consolidated Financial Statements continued

Forward commodity contracts are generally valued based on the price of the underlying futures or forward contract provided by the exchange on which the underlying instruments are traded or if unavailable, based on forward rates provided by broker/dealers. Interest rate and cross-currency swaps are normally valued using valuations provided by a third party pricing service. Such pricing service valuations are based on the present value of fixed and projected floating rate cash flows over the term of the swap contract. Future cash flows are discounted to their present value using swap rates provided by electronic data services or by broker/dealers. Credit default swaps are normally valued using valuations provided by a third party pricing service. The pricing services employ electronic data processing techniques to determine the present value based on credit spread quotations obtained from broker/dealers and expected default recovery rates determined by the pricing service using proprietary models. Foreign securities and currencies are valued in U.S. dollars, based on foreign currency exchange rate quotations supplied by a third party pricing service. The pricing service uses a proprietary model to determine the exchange rate. Inputs to the model include reported trades and implied bid/ask spreads. Investments for which valuations or market quotations are not readily available or are deemed unreliable are valued at fair value using methods determined in good faith by or at the direction of the Trustees of the Fund in a manner that fairly reflects the security s value, or the amount that the Fund might reasonably expect to receive for the security upon its current sale in the ordinary course. Each such determination is based on a consideration of relevant factors, which are likely to vary from one pricing context to another. These factors may include, but are not limited to, the type of security, the existence of any contractual restrictions on the security s disposition, the price and extent of public trading in similar securities of the issuer or of comparable companies or entities, quotations or relevant information obtained from broker/dealers or other market participants, information obtained from the issuer, analysts, and/or the appropriate stock exchange (for exchange-traded securities), an analysis of the company s or entity s financial condition, and an evaluation of the forces that influence the issuer and the market(s) in which the security is purchased and sold.

The Fund may invest in Eaton Vance Cash Reserves Fund, LLC (Cash Reserves Fund), an affiliated investment company managed by Eaton Vance Management (EVM). Cash Reserves Fund generally values its investment securities utilizing the amortized cost valuation technique in accordance with Rule 2a-7 under the 1940 Act. This technique involves initially valuing a portfolio security at its cost and thereafter assuming a constant amortization to maturity of any discount or premium. If amortized cost is determined not to approximate fair value, Cash Reserves Fund may value its investment securities in the same manner as debt obligations described above.

- B Investment Transactions Investment transactions for financial statement purposes are accounted for on a trade date basis. Realized gains and losses on investments sold are determined on the basis of identified cost.
- C Income Interest income is recorded on the basis of interest accrued, adjusted for amortization of premium or accretion of discount. Dividend income is recorded on the ex-dividend date for dividends received in cash and/or securities. Fees associated with loan amendments are recognized immediately. Inflation adjustments to the principal amount of inflation-adjusted bonds and notes are reflected as interest income. Withholding taxes on foreign interest have been provided for in accordance with the Fund s understanding of the applicable countries tax rules and rates.
- D Federal Taxes The Fund's policy is to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute to shareholders each year substantially all of its net investment income, and all or substantially all of its net realized capital gains. Accordingly, no provision for federal income or excise tax is necessary.

The Subsidiary is treated as a controlled foreign corporation under the Internal Revenue Code and is not expected to be subject to U.S. federal income tax. The Fund is treated as a U.S. shareholder of the Subsidiary. As a result, the Fund is required to include in gross income for U.S. federal tax purposes all of the Subsidiary s income, whether or not such income is distributed by the Subsidiary. If a net loss is realized by the Subsidiary, such loss is not generally available to offset the income earned by the Fund.

At October 31, 2012, the Fund, for federal income tax purposes, had a capital loss carryforward of \$21,577,184 which will reduce its taxable income arising from future net realized gains on investment transactions, if any, to the extent permitted by the Internal Revenue Code, and thus will reduce the amount of distributions to shareholders, which would otherwise be necessary to relieve the Fund of any liability for federal income or excise tax. The capital loss carryforward will expire on October 31, 2016 \$(14,101,229), October 31, 2017 (\$738,126), October 31, 2018 (\$5,165,932) and October 31, 2019 (\$1,571,897). In addition, such capital loss carryforward cannot be utilized prior to the utilization of new capital losses, if any, created after October 31, 2012.

During the year ended October 31, 2012, a capital loss carryforward of \$8,153,972 was utilized to offset net realized gains by the Fund.

As of October 31, 2012, the Fund had no uncertain tax positions that would require financial statement recognition, de-recognition, or disclosure. The Fund files a U.S. federal income tax return annually after its fiscal year-end, which is subject to examination by the Internal Revenue Service for a period of three years from the date of filing.

E Expense Reduction State Street Bank and Trust Company (SSBT) serves as custodian of the Fund. Pursuant to the custodian agreement, SSBT receives a fee reduced by credits, which are determined based on the average daily cash balance the Fund maintains with SSBT. All credit balances, if any, used to reduce the Fund s custodian fees are reported as a reduction of expenses in the Consolidated Statement of Operations.

F Foreign Currency Translation Investment valuations, other assets, and liabilities initially expressed in foreign currencies are translated each business day into U.S. dollars based upon current exchange rates. Purchases and sales of foreign investment securities and income and expenses denominated in foreign currencies are translated into U.S. dollars based upon currency exchange rates in effect on the respective dates of such transactions. Recognized

Short Duration Diversified Income Fund

October 31, 2012

Notes to Consolidated Financial Statements continued

gains or losses on investment transactions attributable to changes in foreign currency exchange rates are recorded for financial statement purposes as net realized gains and losses on investments. That portion of unrealized gains and losses on investments that results from fluctuations in foreign currency exchange rates is not separately disclosed.

- G Unfunded Loan Commitments The Fund may enter into certain credit agreements all or a portion of which may be unfunded. The Fund is obligated to fund these commitments at the borrower s discretion. The commitments, if any, are disclosed in the accompanying Consolidated Portfolio of Investments.
- H Use of Estimates The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported amounts of income and expense during the reporting period. Actual results could differ from those estimates.
- Indemnifications Under the Fund's organizational documents, its officers and Trustees may be indemnified against certain liabilities and expenses arising out of the performance of their duties to the Fund. Under Massachusetts law, if certain conditions prevail, shareholders of a Massachusetts business trust (such as the Fund) could be deemed to have personal liability for the obligations of the Fund. However, the Fund's Declaration of Trust contains an express disclaimer of liability on the part of Fund shareholders and the By-laws provide that the Fund shall assume the defense on behalf of any Fund shareholders. Moreover, the By-laws also provide for indemnification out of Fund property of any shareholder held personally liable solely by reason of being or having been a shareholder for all loss or expense arising from such liability. Additionally, in the normal course of business, the Fund enters into agreements with service providers that may contain indemnification clauses. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred.
- J Financial and Commodities Futures Contracts Upon entering into a financial or commodities futures contract, the Fund is required to deposit with the broker, either in cash or securities, an amount equal to a certain percentage of the purchase price (initial margin). Subsequent payments, known as variation margin, are made or received by the Fund each business day, depending on the daily fluctuations in the value of the underlying security, commodity or currency, and are recorded as unrealized gains or losses by the Fund. Gains (losses) are realized upon the expiration or closing of the financial or commodities futures contracts. Should market conditions change unexpectedly, the Fund may not achieve the anticipated benefits of the financial or commodities futures contracts and may realize a loss. Futures contracts have minimal counterparty risk as they are exchange traded and the clearinghouse for the exchange is substituted as the counterparty, guaranteeing counterparty performance.
- K Forward Foreign Currency Exchange and Forward Commodity Contracts The Fund may enter into forward foreign currency exchange contracts for the purchase or sale of a specific foreign currency at a fixed price on a future date. The forward foreign currency exchange contracts are adjusted by the daily exchange rate of the underlying currency and any gains or losses are recorded as unrealized until such time as the contracts have been closed or offset by another contract with the same broker for the same settlement date and currency. Unrealized and realized gains and losses on forward commodity contracts, which are entered into for the purchase or sale of a specific commodity at a fixed price on a future date, are accounted for as described above. Risks may arise upon entering these contracts from the potential inability of counterparties to meet the terms of their contracts and, in the case of forward foreign currency exchange contracts, from movements in the value of a foreign currency relative to the U.S. dollar.
- L Written Options Upon the writing of a call or a put option, the premium received by the Fund is included in the Consolidated Statement of Assets and Liabilities as a liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written, in accordance with the Fund s policies on investment valuations discussed above. Premiums received from writing options which expire are treated as realized gains. Premiums received from writing options which are exercised or are closed are added to or offset against the proceeds or amount paid on the transaction to determine the realized gain or loss. When an index option is exercised, the Fund is required to deliver an amount of cash determined by the excess of the strike price of the option over the value of the index (in the case of a put) or the excess of the value of the index over the strike price of the option (in the case of a call) at contract termination. If a put option on a security is exercised, the premium reduces the cost basis of the securities purchased by the Fund. The Fund, as a writer of an option, may have no control over whether the underlying securities or other assets may be sold (call) or purchased (put) and, as a result, bears the market risk of an unfavorable change in the price of the securities or other assets underlying the written option. The Fund may also bear the risk of not being able to enter into a closing transaction if a liquid secondary market does not exist.

M Purchased Options Upon the purchase of a call or put option, the premium paid by the Fund is included in the Consolidated Statement of Assets and Liabilities as an investment. The amount of the investment is subsequently marked-to-market to reflect the current market value of the option purchased, in accordance with the Fund s policies on investment valuations discussed above. As the purchaser of an index option, the Fund has the right to receive a cash payment equal to any depreciation in the value of the index below the strike price of the option (in the case of a put) or equal to any appreciation in the value of the index over the strike price of the option (in the case of a call) as of the valuation date of the option. If an option which the Fund had purchased expires on the stipulated expiration date, the Fund will realize a loss in the amount of the cost of the option. If the Fund enters into a closing sale transaction, the Fund will realize a gain or loss, depending on whether the sales proceeds from the closing sale transaction are greater or less than the cost of the option. If the Fund exercises a put option on a security, it will realize a gain or loss from the sale of the underlying security, and the proceeds from such sale will be decreased by the premium originally paid. If the Fund exercises a call option on a security, the cost of the security which the Fund purchases upon exercise will be increased by the premium originally paid. The risk associated with purchasing options is limited to the premium originally paid.

Short Duration Diversified Income Fund

October 31, 2012

Notes to Consolidated Financial Statements continued

N Interest Rate Swaps Pursuant to interest rate swap agreements, the Fund either makes floating-rate payments based on a benchmark interest rate in exchange for fixed-rate payments or the Fund makes fixed-rate payments in exchange for payments on a floating benchmark interest rate. Payments received or made are recorded as realized gains or losses. During the term of the outstanding swap agreement, changes in the underlying value of the swap are recorded as unrealized gains or losses. The value of the swap is determined by changes in the relationship between two rates of interest. The Fund is exposed to credit loss in the event of non-performance by the swap counterparty. Risk may also arise from movements in interest rates.

O Cross-Currency Swaps Cross-currency swaps are interest rate swaps in which interest cash flows are exchanged between two parties based on the notional amounts of two different currencies. The notional amounts are typically determined based on the spot exchange rates at the inception of the trade. Cross-currency swaps also involve the exchange of the notional amounts at the start of the contract at the current spot rate with an agreement to re-exchange such amounts at a later date at either the same exchange rate, a specified rate or the then current spot rate. The entire principal value of a cross-currency swap is subject to the risk that the counterparty to the swap will default on its contractual delivery obligations.

P Credit Default Swaps When the Fund is the buyer of a credit default swap contract, the Fund is entitled to receive the par (or other agreed-upon) value of a referenced debt obligation (or basket of debt obligations) from the counterparty to the contract if a credit event by a third party, such as a U.S. or foreign corporate issuer or sovereign issuer, on the debt obligation occurs. In return, the Fund pays the counterparty a periodic stream of payments over the term of the contract provided that no credit event has occurred. If no credit event occurs, the Fund would have spent the stream of payments and received no proceeds from the contract. When the Fund is the seller of a credit default swap contract, it receives the stream of payments, but is obligated to pay to the buyer of the protection an amount up to the notional amount of the swap and in certain instances take delivery of securities of the reference entity upon the occurrence of a credit event, as defined under the terms of that particular swap agreement. Credit events are contract specific but may include bankruptcy, failure to pay, restructuring, obligation acceleration and repudiation/moratorium. If the Fund is a seller of protection and a credit event occurs, the maximum potential amount of future payments that the Fund could be required to make would be an amount equal to the notional amount of the agreement. This potential amount would be partially offset by any recovery value of the respective referenced obligation, or net amount received from the settlement of a buy protection credit default swap agreement entered into by the Fund for the same referenced obligation. As the seller, the Fund may create economic leverage to its portfolio because, in addition to its total net assets, the Fund is subject to investment exposure on the notional amount of the swap. The interest fee paid or received on the swap contract, which is based on a specified interest rate on a fixed notional amount, is accrued daily as a component of unrealized appreciation (depreciation) and is recorded as realized gain upon receipt or realized loss upon payment. The Fund also records an increase or decrease to unrealized appreciation (depreciation) in an amount equal to the daily valuation. Upfront payments or receipts, if any, are recorded as other assets or other liabilities, respectively, and amortized over the life of the swap contract as realized gains or losses. For financial reporting purposes, unamortized upfront payments, if any, are netted with unrealized appreciation or depreciation on swap contracts to determine the market value of swaps as presented in Notes 7 and 10. The Fund segregates assets in the form of cash or liquid securities in an amount equal to the notional amount of the credit default swaps of which it is the seller. The Fund segregates assets in the form of cash or liquid securities in an amount equal to any unrealized depreciation of the credit default swaps of which it is the buyer, marked to market on a daily basis. These transactions involve certain risks, including the risk that the seller may be unable to fulfill the transaction.

Q Repurchase Agreements A repurchase agreement is the purchase by the Fund of securities from a counterparty in exchange for cash that is coupled with an agreement to resell those securities to the counterparty at a specified date and price. When a repurchase agreement is entered, the Fund typically receives securities with a value that equals or exceeds the repurchase price, including any accrued interest earned on the agreement. The value of such securities will be marked to market daily, and cash or additional securities will be exchanged between the parties as needed. Except in the case of a repurchase agreement entered to settle a short sale, the value of the securities delivered to the Fund will be at least equal to 90% of the repurchase price during the term of the repurchase agreement. The terms of a repurchase agreement entered to settle a short sale may provide that the cash purchase price paid by the Fund is more than the value of purchased securities that effectively collateralize the repurchase price payable by the counterparty. Since in such a transaction, the Fund normally will have used the purchased securities to settle the short sale, the Fund will segregate liquid assets equal to the market to market value of the purchased securities that it is obligated to return to the counterparty under the repurchase agreement. In the event of insolvency of the counterparty to a repurchase agreement, recovery of the repurchase price owed to the Fund may be delayed. Such an insolvency also may result in a loss to the extent that the value of the purchased securities decreases during the delay or that value has otherwise not been maintained at an amount at least equal to the repurchase price.

R Securities Sold Short A short sale is a transaction in which the Fund sells a security it does not own in anticipation of a decline in the market value of that security. To complete such a transaction, the Fund must borrow the security to make delivery to the buyer with an obligation to replace such borrowed security at a later date. Until the security is replaced, the Fund is required to repay the lender any interest, which accrues during the period of the loan. The proceeds received

from a short sale are recorded as a liability and the Fund records an unrealized gain or loss to the extent of the difference between the proceeds received and the value of the open short position on the day of determination. A gain, limited to the price at which the Fund sold the security short, or a loss, potentially unlimited as there is no upward limit on the price of a security, is recorded when the short position is terminated. Interest payable on securities sold short is recorded as an expense.

S Stripped Mortgage-Backed Securities The Fund may invest in Interest Only (IO) and Principal Only (PO) securities, a form of stripped mortgage-backed securities, whereby the IO security receives all the interest and the PO security receives all the principal on a pool of mortgage assets. The yield to maturity on an IO security is extremely sensitive to the rate of principal payments (including pre-payments) on the related underlying mortgage assets, and a rapid rate of principal payments may have a material adverse effect on the yield to maturity from these securities. If the underlying mortgages experience greater than anticipated prepayments of principal, the Fund may fail to recoup its initial investment in an IO security. The market value of IO and PO securities can be unusually volatile to changes in interest rates.

Short Duration Diversified Income Fund

October 31, 2012

Notes to Consolidated Financial Statements continued

T Consolidated Statement of Cash Flows The cash amount shown in the Consolidated Statement of Cash Flows of the Fund is the amount included in the Fund s Consolidated Statement of Assets and Liabilities and represents the cash on hand at its custodian and does not include any short-term investments.

2 Distributions to Shareholders

Subject to its Managed Distribution Plan, the Fund intends to make monthly distributions to shareholders and to distribute all or substantially all of its net realized capital gains (reduced by available capital loss carryforwards from prior years, if any). In its distributions, the Fund intends to include amounts attributable to the imputed interest on foreign currency exposures through long and short positions in forward currency exchange contracts (represented by the difference between the foreign currency spot rate and the foreign currency forward rate) and the imputed interest derived from certain other derivative positions. Distributions are recorded on the ex-dividend date. The Fund distinguishes between distributions on a tax basis and a financial reporting basis. Accounting principles generally accepted in the United States of America require that only distributions in excess of tax basis earnings and profits be reported in the consolidated financial statements as a return of capital. Permanent differences between book and tax accounting relating to distributions are reclassified to paid-in capital. For tax purposes, distributions from short-term capital gains are considered to be from ordinary income. In certain circumstances, a portion of distributions to shareholders may include a return of capital component.

The tax character of distributions declared for the years ended October 31, 2012 and October 31, 2011 was as follows:

Year Ended October 31,

2012 2011

Distributions declared from:

Ordinary income \$ 13,830,542 \$ 21,908,451
Tax return of capital \$ 6,566,982 \$

During the year ended October 31, 2012, accumulated net realized loss was decreased \$4,349,719, accumulated undistributed net investment income was decreased by \$3,100,283 and paid-in capital was decreased by \$1,249,436 due to differences between book and tax accounting, primarily for foreign currency gain (loss), swap contracts, mixed straddles, paydown gain (loss), investment in the Subsidiary and premium amortization. These reclassifications had no effect on the net assets or net asset value per share of the Fund.

As of October 31, 2012, the components of distributable earnings (accumulated losses) and unrealized appreciation (depreciation) on a tax basis were as follows:

Capital loss carryforward \$ (21,577,184 Net unrealized appreciation \$ 13,493,489

The differences between components of distributable earnings (accumulated losses) on a tax basis and the amounts reflected in the Consolidated Statement of Assets and Liabilities are primarily due to wash sales, foreign currency transactions, swap contracts, mixed straddle amounts, premium amortization and tax accounting for straddle transactions.

3 Investment Adviser Fee and Other Transactions with Affiliates

The investment adviser fee is earned by EVM as compensation for investment advisory services rendered to the Fund and the Subsidiary. Pursuant to the investment advisory agreement and subsequent fee reduction agreement between the Fund and EVM and the investment advisory agreement between the Subsidiary and EVM, the Fund and Subsidiary each pay EVM a fee at an annual rate of 0.75% of its respective average daily total leveraged assets (excluding its

interest in the Subsidiary in the case of the Fund), subject to the limitation described below, and is payable monthly. Total leveraged assets as referred to herein represent net assets plus liabilities or obligations attributable to investment leverage and the notional value of long and short forward currency contracts, futures contracts and swaps held by the Fund. The notional value of a contract for purposes of calculating total leveraged assets is the stated dollar value of the underlying reference instrument at the time the derivative position is entered into and remains constant throughout the life of the derivative contract. However, the derivative contracts are marked to market daily and any unrealized appreciation or depreciation is reflected in the Fund s net assets. When the Fund holds both long and short forward currency contracts in the same foreign currency, the offsetting positions are netted for purposes of determining total leveraged assets. When the Fund holds other long and short positions in foreign obligations denominated in the same currency, total leveraged assets are calculated by excluding the smaller of the long or short position.

The advisory agreements provide that if investment leverage exceeds 40% of the Funds total leveraged assets, EVM will not receive a management fee on total leveraged assets in excess of this amount. As of October 31, 2012, the Funds investment leverage was 51% of its total leveraged assets. The Funds

Short Duration Diversified Income Fund

October 31, 2012

Notes to Consolidated Financial Statements continued

invests its cash in Cash Reserves Fund. EVM does not currently receive a fee for advisory services provided to Cash Reserves Fund. For the year ended October 31, 2012, the Fund s investment adviser fee amounted to \$4,201,526 or 0.64% of the Fund s average daily total leveraged assets and 1.25% of the Fund s average daily net assets. EVM also serves as administrator of the Fund, but receives no compensation.

In addition, EVM has contractually agreed to reimburse the Fund for fees and other expenses at an annual rate of 0.20% of the Fund s average daily total leveraged assets during the first five full years of the Fund s operations, 0.15% of the Fund s average daily total leveraged assets in year six, 0.10% in year seven and 0.05% in year eight. The Fund concluded its first seven full years of operations on February 28, 2012. Pursuant to this agreement, EVM waived \$370,979 of its investment adviser fee for the year ended October 31, 2012.

Trustees and officers of the Fund who are members of EVM s organization receive remuneration for their services to the Fund out of the investment adviser fee. Trustees of the Fund who are not affiliated with EVM may elect to defer receipt of all or a percentage of their annual fees in accordance with the terms of the Trustees Deferred Compensation Plan. For the year ended October 31, 2012, no significant amounts have been deferred. Certain officers and Trustees of the Fund are officers of EVM.

4 Purchases and Sales of Investments

Purchases and sales of investments, other than short-term obligations and including maturities, paydowns, principal repayments on Senior Loans and securities sold short, for the year ended October 31, 2012 were as follows:

	Purchases	Sales
Investments (non-U.S. Government)	\$ 128,499,141	\$ 130,127,161
U.S. Government and Agency Securities	54,918,152	34,322,597
	\$ 183,417,293	\$ 164,449,758

5 Common Shares of Beneficial Interest

The Fund may issue common shares pursuant to its dividend reinvestment plan. There were no transactions in common shares by the Fund for the years ended October 31, 2012 and October 31, 2011.

6 Federal Income Tax Basis of Investments

7 Financial Instruments

The cost and unrealized appreciation (depreciation) of investments of the Fund at October 31, 2012, as determined on a federal income tax basis, were as follows:

Aggregate cost	\$ 451,572,140
Gross unrealized appreciation Gross unrealized depreciation	\$ 18,510,632 (3,735,697)
Net unrealized appreciation	\$ 14,774,935

The Fund may trade in financial instruments with off-balance sheet risk in the normal course of its investing activities. These financial instruments may include forward commodity contracts, forward foreign currency exchange contracts, futures contracts, swap contracts and written options and may involve, to a varying degree, elements of risk in excess of the amounts recognized for financial statement purposes. The notional or contractual amounts of these instruments represent the investment the Fund has in particular classes of financial instruments and do not necessarily represent the amounts potentially subject to risk. The measurement of the risks associated with these instruments is meaningful only when all related and offsetting transactions are considered.

Short Duration Diversified Income Fund

- * If the Fund is the seller of credit protection, the notional amount is the maximum potential amount of future payments the Fund could be required to make if a credit event, as defined in the credit default swap agreement, were to occur. At October 31, 2012, such maximum potential amount for all open credit default swaps in which the Fund is the seller was \$32,186,000.
- ** The contract annual fixed rate represents the fixed rate of interest received by the Fund (as a seller of protection) or paid by the Fund (as a buyer of protection) annually on the notional amount of the credit default swap contract.
- *** Current market annual fixed rates, utilized in determining the net unrealized appreciation or depreciation as of year end, serve as an indicator of the market sperception of the current status of the payment/performance risk associated with the credit derivative. The current market annual fixed rate of a particular reference entity reflects the cost, as quoted by the pricing vendor, of selling protection against default of that entity as of period end and may include upfront payments required to be made to enter into the agreement. The higher the fixed rate, the greater the market perceived risk of a credit event involving the reference entity. A rate identified as Defaulted indicates a credit event has occurred for the reference entity.
- (1) Upfront payment is exchanged with the counterparty as a result of the standardized trading coupon.

Short Duration Diversified Income Fund

October 31, 2012

Notes to Consolidated Financial Statements continued

The Fund pays interest on the currency received and receives interest on the currency delivered. At the termination date, the notional amount of the currency received will be exchanged for the notional amount of the currency delivered.

Written options activity for the year ended October 31, 2012 was as follows:

	Principal Amount of Contracts (000 s omitted)	Premiums Received	
Outstanding, beginning of year Options written	INR 975,700	\$ 629,303	
Outstanding, end of year	INR 975,700	\$ 629,303	

INR Indian Rupee

At October 31, 2012, the Fund had sufficient cash and/or securities to cover commitments under these contracts.

In the normal course of pursuing its investment objectives, the Fund is subject to the following risks:

Commodity Risk: The Fund invests in commodities-linked derivative investments, including commodity futures contracts and options thereon and forward commodity contracts, that provide exposure to the investment returns of certain commodities. Commodities-linked derivative investments are used to enhance total return and/or as a substitute for the purchase or sale of commodities.

Credit Risk: The Fund enters into credit default swap contracts to manage certain investment risks and/or to enhance total return.

Foreign Exchange Risk: The Fund engages in forward foreign currency exchange contracts, options on currencies and cross-currency swaps to enhance total return, to seek to hedge against fluctuations in currency exchange rates and/or as a substitute for the purchase or sale of securities or currencies. It also enters into forward foreign currency exchange contracts to hedge the currency risks of investments it anticipates purchasing.

Interest Rate Risk: The Fund utilizes various interest rate derivatives including futures, interest rate swaps and cross-currency swaps to enhance total return, to seek to hedge against fluctuations in interest rates, and/or to change the effective duration of its portfolio.

The Fund enters into swap contracts, over-the-counter options, forward commodity contracts and forward foreign currency exchange contracts that may contain provisions whereby the counterparty may terminate the contract under certain conditions, including but not limited to a decline in the Fund s net assets below a certain level over a certain period of time, which would trigger a payment by the Fund for those derivatives in a liability position. At October 31, 2012, the fair value, excluding upfront payments, of derivatives with credit-related contingent features in a net liability position was \$4,897,333. The aggregate fair value of assets pledged as collateral by the Fund for such liability was \$623,379 at October 31, 2012.

The non-exchange traded derivatives in which the Fund invests, including swap contracts, over-the-counter options, forward commodity contracts and forward foreign currency exchange contracts, are subject to the risk that the counterparty to the contract fails to perform its obligations under the contract. The Fund is not subject to counterparty credit risk with respect to its written options as the Fund, not the counterparty, is obligated to perform under such derivatives. At October 31, 2012, the maximum amount of loss the Fund would incur due to counterparty risk was \$3,536,825, with the highest amount from any one counterparty

being \$548,048. Such maximum amount would be reduced by any unamortized upfront payments received by the Fund. Such amount would be increased by any unamortized upfront payments made by the Fund. To mitigate this risk, the Fund (and subsidiary) has entered into master netting agreements with substantially all its derivative counterparties, which allows it and a counterparty to aggregate amounts owed by each of them for derivative transactions under the agreement into a single net amount payable by either the Fund (and subsidiary) or the counterparty. At October 31, 2012, the maximum amount of loss the Fund would incur due to counterparty risk would be reduced by approximately \$2,553,000 due to master netting agreements. Counterparties may be required to pledge collateral in the form of cash, U.S. Government securities or highly-rated bonds for the benefit of the Fund if the net amount due from the counterparty with respect to a derivative contract exceeds a certain threshold. The amount of collateral posted by the counterparties with respect to such contracts would also reduce the amount of any loss incurred. Because the Subsidiary is not registered under the 1940 Act, it may not be able to negotiate terms with its counterparties that are equivalent to those a registered fund may negotiate. As a result, the Subsidiary may have greater exposure to those counterparties than a registered fund.

Short Duration Diversified Income Fund

Short Duration Diversified Income Fund

October 31, 2012

Notes to Consolidated Financial Statements continued

The average notional amounts of futures contracts, forward commodity contracts, forward foreign currency exchange contracts and swap contracts outstanding during the year ended October 31, 2012, which are indicative of the volume of these derivative types, were approximately \$17,764,000, \$2,129,000, \$179,634,000 and \$101,734,000, respectively.

The average principal amount of purchased currency options contracts and average number of purchased commodity options contracts outstanding during the year ended October 31, 2012, which are indicative of the volume of these derivative types, were approximately \$24,742,000 and 5 contracts, respectively.

8 Credit Agreement

The Fund has entered into a Credit Agreement (the Agreement) with a bank to borrow up to a limit of \$150 million pursuant to a 364-day revolving line of credit. Borrowings under the Agreement are secured by the assets of the Fund. Interest is charged at a rate above the London Interbank Offered Rate (LIBOR) and is payable monthly. Under the terms of the Agreement, the Fund pays a commitment fee of 0.15% on the borrowing limit. The Fund is required to maintain certain net asset levels during the term of the Agreement. At October 31, 2012, the Fund had borrowings outstanding under the Agreement of \$115,000,000 at an interest rate of 1.03%. The carrying amount of the borrowings at October 31, 2012 approximated its fair value. If measured at fair value, borrowings under the Agreement would have been considered as Level 2 in the fair value hierarchy (see Note 10) at October 31, 2012. For the year ended October 31, 2012, the average borrowings under the Agreement and the average interest rate were \$101,666,667 and 1.08%, respectively.

9 Risks Associated with Foreign Investments and Currencies

Investing in securities issued by companies whose principal business activities are outside the United States may involve significant risks not present in domestic investments. For example, there is generally less publicly available information about foreign companies, particularly those not subject to the disclosure and reporting requirements of the U.S. securities laws. Certain foreign issuers are generally not bound by uniform accounting, auditing, and financial reporting requirements and standards of practice comparable to those applicable to domestic issuers. Investments in foreign securities and currencies also involve the risk of possible adverse changes in investment or exchange control regulations, expropriation or confiscatory taxation, limitation on the removal of funds or other assets of the Fund, political or financial instability or diplomatic and other developments which could affect such investments. Foreign securities markets, while growing in volume and sophistication, are generally not as developed as those in the United States, and securities of some foreign issuers (particularly those located in developing countries) may be less liquid and more volatile than securities of comparable U.S. companies. In general, there is less overall governmental supervision and regulation of foreign securities markets, broker/dealers and issuers than in the United States.

10 Fair Value Measurements

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including a fund s own assumptions in determining the fair value of investments)

In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

Short Duration Diversified Income Fund

October 31, 2012

Notes to Consolidated Financial Statements continued

At October 31, 2012, the hierarchy of inputs used in valuing the Fund s investments and open derivative instruments, which are carried at value, were as follows:

Asset Description	Level 1	Level 2	Level 3*	Total

^{*} None of the unobservable inputs for Level 3 assets, individually or collectively, had a material impact on the Fund.

Level 3 investments at the beginning and/or end of the period in relation to net assets were not significant and accordingly, a reconciliation of Level 3 assets for the year ended October 31, 2012 is not presented. At October 31, 2012, there were no investments transferred between Level 1 and Level 2 during the year then ended.

Short Duration Diversified Income Fund

October 31, 2012

Report of Independent Registered Public Accounting Firm

To the Trustees and Shareholders of Eaton Vance Short Duration Diversified Income Fund:

We have audited the accompanying consolidated statement of assets and liabilities of Eaton Vance Short Duration Diversified Income Fund and subsidiary (the Fund), including the consolidated portfolio of investments, as of October 31, 2012, and the related consolidated statements of operations and cash flows for the year then ended, the consolidated statements of changes in net assets for each of the two years in the period then ended, and the consolidated financial highlights for each of the five years in the period then ended. These consolidated financial statements and consolidated financial highlights are the responsibility of the Fund s management. Our responsibility is to express an opinion on these consolidated financial statements and consolidated financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements and consolidated financial highlights are free of material misstatement. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures included confirmation of securities and senior loans owned as of October 31, 2012, by correspondence with the custodian, brokers and selling or agent banks; where replies were not received from brokers and selling or agent banks, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements and consolidated financial highlights referred to above present fairly, in all material respects, the financial position of Eaton Vance Short Duration Diversified Income Fund and subsidiary as of October 31, 2012, the results of their operations and their cash flows for the year then ended, the changes in their net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

Short Duration Diversified Income Fund

October 31, 2012

Federal Tax Information (Unaudited)

The Form 1099-DIV you receive in January 2013 will show the tax status of all distributions paid to your account in calendar year 2012. Shareholders are advised to consult their own tax adviser with respect to the tax consequences of their investment in the Fund. As required by the Internal Revenue Code and/or regulations, shareholders must be notified regarding the status of qualified dividend income for individuals.

Qualified Dividend Income. The Fund designates approximately \$284,168, or up to the maximum amount of such dividends allowable pursuant to the Internal Revenue Code, as qualified dividend income eligible for the reduced tax rate of 15%.

Short Duration Diversified Income Fund

October 31, 2012

Notice to Shareholders (Unaudited)

At the August 8, 2011 Board Meeting, the Trustees approved the following defensive investing policy: During unusual market conditions, the Fund may invest up to 100% of its assets in cash or cash equivalents temporarily, which may be inconsistent with its investment objective(s) and other policies.

In October of 2012, the Fund eliminated the 15% limit on the Fund s ability to execute short sales. The Fund will continue to be required to not make short sales of securities or maintain a short position, unless at all times when a short position is open (i) it owns an equal amount of such securities or securities convertible into or exchangeable, without payment of any further consideration, for securities of the same issue as, and equal in amount to, the securities sold short or (ii) it holds in a segregated account cash or other liquid securities (to the extent required under the 1940 Act) in an amount equal to the current market value of the securities sold short.

Short Duration Diversified Income Fund

October 31, 2012

Dividend Reinvestment Plan

The Fund offers a dividend reinvestment plan (Plan) pursuant to which shareholders may elect to have distributions automatically reinvested in common shares (Shares) of the Fund. You may elect to participate in the Plan by completing the Dividend Reinvestment Plan Application Form. If you do not participate, you will receive all distributions in cash paid by check mailed directly to you by American Stock Transfer & Trust Company (AST) as dividend paying agent. On the distribution payment date, if the NAV per Share is equal to or less than the market price per Share plus estimated brokerage commissions, then new Shares will be issued. The number of Shares shall be determined by the greater of the NAV per Share or 95% of the market price. Otherwise, Shares generally will be purchased on the open market by AST, the Plan agent (Agent). Distributions subject to income tax (if any) are taxable whether or not Shares are reinvested.

If your Shares are in the name of a brokerage firm, bank, or other nominee, you can ask the firm or nominee to participate in the Plan on your behalf. If the nominee does not offer the Plan, you will need to request that the Fund s transfer agent re-register your Shares in your name or you will not be able to participate.

The Agent s service fee for handling distributions will be paid by the Fund. Plan participants will be charged their pro rata share of brokerage commissions on all open-market purchases.

Plan participants may withdraw from the Plan at any time by writing to the Agent at the address noted on the following page. If you withdraw, you will receive Shares in your name for all Shares credited to your account under the Plan. If a participant elects by written notice to the Agent to sell part or all of his or her Shares and remit the proceeds, the Agent is authorized to deduct a \$5.00 fee plus brokerage commissions from the proceeds.

If you wish to participate in the Plan and your Shares are held in your own name, you may complete the form on the following page and deliver it to the Agent. Any inquiries regarding the Plan can be directed to the Agent at 1-866-439-6787.

Application for Participation in Dividend Reinvestment Plan

This form is for shareholders who hold their common shares in their own names. If your common shares are held in the name of a brokerage firm, bank, or other nominee, you should contact your nominee to see if it will participate in the Plan on your behalf. If you wish to participate in the Plan, but your brokerage firm, bank, or nominee is unable to participate on your behalf, you should request that your common shares be re-registered in your own name which will enable your participation in the Plan.

The following authorization and appointment is given with the understanding that I may terminate it at any time by terminating my participation in the Plan as provided in the terms and conditions of the Plan.

Please print exact name on account:		
Shareholder signature	Date	
Shareholder signature	Date	
Please sign exactly as your common shares are registered.	All persons whose names appear on the share certificate must sign.	

YOU SHOULD NOT RETURN THIS FORM IF YOU WISH TO RECEIVE YOUR DISTRIBUTIONS IN CASH. THIS IS NOT A PROXY.

This authorization form, when signed, should be mailed to the following address:

Management and Organization

Fund Management. The Trustees of Eaton Vance Short Duration Diversified Income Fund (the Fund) are responsible for the overall management and supervision of the Fund saffairs. The Trustees and officers of the Fund are listed below. Except as indicated, each individual has held the office shown or other offices in the same company for the last five years. The Noninterested Trustees consist of those Trustees who are not interested persons of the Fund, as that term is defined under the 1940 Act. The business address of each Trustee and officer is Two International Place, Boston, Massachusetts 02110. As used below, EVC refers to Eaton Vance Corp., EV refers to Eaton Vance, Inc., EVM refers to Eaton Vance Management, BMR refers to Boston Management and Research and EVD refers to Eaton Vance Distributors, Inc. EVC and EV are the corporate parent and trustee, respectively, of EVM and BMR. EVD is a wholly-owned subsidiary of EVC. Each officer affiliated with Eaton Vance may hold a position with other Eaton Vance affiliates that is comparable to his or her position with EVM listed below. Each Trustee oversees 187 portfolios in the Eaton Vance Complex (including all master and feeder funds in a master feeder structure). Each officer serves as an officer of certain other Eaton Vance funds. Each Trustee serves for a three year term. Each officer serves until his or her successor is elected.

Eaton Vance Funds

IMPORTANT NOTICES

Privacy. The Eaton Vance organization is committed to ensuring your financial privacy. Each of the financial institutions identified below has in effect the following policy (Privacy Policy) with respect to nonpublic personal information about its customers:

Only such information received from you, through application forms or otherwise, and information about your Eaton Vance fund transactions will be collected. This may include information such as name, address, social security number, tax status, account balances and transactions.

None of such information about you (or former customers) will be disclosed to anyone, except as permitted by law (which includes disclosure to employees necessary to service your account). In the normal course of servicing a customer s account, Eaton Vance may share information with unaffiliated third parties that perform various required services such as transfer agents, custodians and broker-dealers.

Policies and procedures (including physical, electronic and procedural safeguards) are in place that are designed to protect the confidentiality of such information.

We reserve the right to change our Privacy Policy at any time upon proper notification to you. Customers may want to review our Privacy Policy periodically for changes by accessing the link on our homepage: www.eatonvance.com.

Our pledge of privacy applies to the following entities within the Eaton Vance organization: the Eaton Vance Family of Funds, Eaton Vance Management, Eaton Vance Investment Counsel, Eaton Vance Distributors, Inc., Eaton Vance Trust Company, Eaton Vance Management s Real Estate Investment Group and Boston Management and Research. In addition, our Privacy Policy applies only to those Eaton Vance customers who are individuals and who have a direct relationship with us. If a customer s account (i.e., fund shares) is held in the name of a third-party financial advisor/broker-dealer, it is likely that only such advisor s privacy policies apply to the customer. This notice supersedes all previously issued privacy disclosures. For more information about Eaton Vance s Privacy Policy, please call 1-800-262-1122.

Delivery of Shareholder Documents. The Securities and Exchange Commission (SEC) permits funds to deliver only one copy of shareholder documents, including prospectuses, proxy statements and shareholder reports, to fund investors with multiple accounts at the same residential or post office box address. This practice is often called householding and it helps eliminate duplicate mailings to shareholders. Eaton Vance, or your financial advisor, may household the mailing of your documents indefinitely unless you instruct Eaton Vance, or your financial advisor, otherwise. If you would prefer that your Eaton Vance documents not be householded, please contact Eaton Vance at 1-800-262-1122, or contact your financial advisor. Your instructions that householding not apply to delivery of your Eaton Vance documents will be effective within 30 days of receipt by Eaton Vance or your financial advisor.

Portfolio Holdings. Each Eaton Vance Fund and its underlying Portfolio(s) (if applicable) will file a schedule of portfolio holdings on Form N-Q with the SEC for the first and third quarters of each fiscal year. The Form N-Q will be available on the Eaton Vance website at www.eatonvance.com, by calling Eaton Vance at 1-800-262-1122 or in the EDGAR database on the SEC s website at www.sec.gov. Form N-Q may also be reviewed and copied at the SEC s public reference room in Washington, D.C. (call 1-800-732-0330 for information on the operation of the public reference room).

Proxy Voting. From time to time, funds are required to vote proxies related to the securities held by the funds. The Eaton Vance Funds or their underlying Portfolios (if applicable) vote proxies according to a set of policies and procedures approved by the Funds and Portfolios Boards. You may obtain a description of these policies and procedures and information on how the Funds or Portfolios voted proxies relating to portfolio securities during the most recent 12-month period ended June 30, without charge, upon request, by calling 1-800-262-1122 and by accessing the SEC s website at www.sec.gov.

Additional Notice to Shareholders. A Fund also may purchase shares of its common stock in the open market when they trade at a discount to net asset value or at other times if the Fund determines such purchases are advisable. There can be no assurance that a Fund will take such action or that such purchases would reduce the discount. If applicable, a Fund may also redeem or purchase its outstanding auction preferred shares (APS) in order to maintain compliance with regulatory requirements, borrowing or rating agency requirements or for other purposes as it deems appropriate or necessary.

Closed-End Fund Information. The Eaton Vance closed-end funds make certain fund performance data and information about portfolio characteristics (such as top holdings and asset allocation) available on the Eaton Vance website after the end of each month. Certain fund performance data for the funds, including total returns, are posted to the website shortly after the end of each month. Portfolio holdings for the most recent month-end are also posted to the website approximately 30 days following the end of the month. This information is available at www.eatonvance.com on the fund information pages under Individual Investors Closed-End Funds.

Item 2. Code of Ethics

Not required in this filing.

Item 3. Audit Committee Financial Expert

The registrant s Board has designated William H. Park, an independent trustee, as its audit committee financial expert. Mr. Park is a certified public accountant who is a consultant and private investor. Previously, he served as the Chief Financial Officer of Aveon Group, L.P. (an investment management firm), as the Vice Chairman of Commercial Industrial Finance Corp. (specialty finance company), as President and Chief Executive Officer of Prizm Capital Management, LLC (investment management firm), as Executive Vice President and Chief Financial Officer of United Asset Management Corporation (an institutional investment management firm) and as a Senior Manager at Price Waterhouse (now PricewaterhouseCoopers) (an independent registered public accounting firm).

Item 4. Principal Accountant Fees and Services

(a) (d)

The following table presents the aggregate fees billed to the registrant s fiscal years ended October 31, 2011 and October 31, 2012 by the registrant s principal accountant, Deloitte & Touche LLP (D&T), for professional services rendered for the audit of the registrant s annual financial statements and fees billed for other services rendered by D&T during such periods.

Fiscal Years Ended	10/31/11	10/31/12
Audit Fees	\$ 85,200	\$ 88,710
Audit-Related Fees ⁽¹⁾	\$ 0	\$ 0
Tax Fees ⁽²⁾	\$ 27,610	\$ 31,710
All Other Fees ⁽³⁾	\$ 1,200	\$ 7,940
Total	\$ 114,010	\$ 128,360

- (1) Audit-related fees consist of the aggregate fees billed for assurance and related services that are reasonably related to the performance of the audit of the registrant s financial statements and are not reported under the category of audit fees.
- (2) Tax fees consist of the aggregate fees billed for professional services rendered by the principal accountant relating to tax compliance, tax advice, and tax planning and specifically include fees for tax return preparation and other related tax compliance/planning matters.
- (3) All other fees consist of the aggregate fees billed for products and services provided by the registrant s principal accountant other than audit, audit-related, and tax services.

(e)(1) The registrant s audit committee has adopted policies and procedures relating to the pre-approval of services provided by the registrant s principal accountant (the Pre-Approval Policies). The Pre-Approval Policies establish a framework intended to assist the audit committee in the proper discharge of its pre-approval responsibilities. As a general matter, the Pre-Approval Policies (i) specify certain types of audit, audit-related, tax, and other services determined to be pre-approved by the audit committee; and (ii) delineate specific procedures governing the mechanics of the pre-approval process, including the approval and monitoring of audit and non-audit service fees. Unless a service is specifically pre-approved under the Pre-Approval Policies, it must be separately pre-approved by the audit committee.

The Pre-Approval Policies and the types of audit and non-audit services pre-approved therein must be reviewed and ratified by the registrant s audit committee at least annually. The registrant s audit committee maintains full responsibility for the appointment, compensation, and oversight of the work of the registrant s principal accountant.

(e)(2) No services described in paragraphs (b)-(d) above were approved by the registrant s audit committee pursuant to the de minimis exception set forth in Rule 2-01 (c)(7)(i)(C) of Regulation S-X.

(f) Not applicable.

(g) The following table presents (i) the aggregate non-audit fees (i.e., fees for audit-related, tax, and other services) billed to the registrant by D&T for the registrant s fiscal years ended October 31, 2011 and October 31, 2012; and (ii) the aggregate non-audit fees (i.e., fees for audit-related, tax, and other services) billed to the Eaton Vance organization by D&T for the same time periods.

Fiscal Years Ended	10/31/11	10/31/12
Registrant	\$ 28,810	\$ 39,650
Eaton Vance ⁽¹⁾	\$ 266,431	\$ 566,619

- (1) The investment adviser to the registrant, as well as any of its affiliates that provide ongoing services to the registrant, are subsidiaries of Eaton Vance Corp.
- (h) The registrant s audit committee has considered whether the provision by the registrant s principal accountant of non-audit services to the registrant s investment adviser and any entity controlled by, or under common control with the adviser that provides ongoing services to the registrant that were not pre-approved pursuant to Rule 2-01(c)(7)(ii) of Regulation S-X is compatible with maintaining the principal accountant s independence.

Item 5. Audit Committee of Listed Registrants

The registrant has a separately-designated standing audit committee established in accordance with Section 3(a)(58)(A) of the Securities and Exchange Act of 1934, as amended. William H. Park (Chair), Scott E. Eston, Helen Frame Peters, Lynn A. Stout and Ralph F. Verni are the members of the registrant s audit committee.

Item 6. Schedule of Investments

Please see schedule of investments contained in the Report to Stockholders included under Item 1 of this Form N-CSR.

Item 7. Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies

The Board of Trustees of the Trust has adopted a proxy voting policy and procedure (the Fund Policy), pursuant to which the Trustees have delegated proxy voting responsibility to the Fund s investment adviser and adopted the investment adviser s proxy voting policies and procedures (the Policies) which are described below. The Trustees will review the Fund s proxy voting records from time to time and will annually consider approving the Policies for the upcoming year. In the event that a conflict of interest arises between the Fund s shareholders and the investment adviser, the administrator, or any of their affiliates or any affiliate of the Fund, the investment adviser will generally refrain from voting the proxies related to the companies giving rise to such conflict until it consults with the Board s Special Committee except as contemplated under the Fund Policy. The Board s Special Committee will instruct the investment adviser on the appropriate course of action.

The Policies are designed to promote accountability of a company s management to its shareholders and to align the interests of management with those shareholders. An independent proxy voting service (Agent), currently Institutional Shareholder Services, Inc., has been retained to assist in the voting of proxies through the provision of vote analysis, implementation and recordkeeping and disclosure

services. The investment adviser will generally vote proxies through the Agent. The Agent is required to vote all proxies and/or refer them back to the investment adviser pursuant to the Policies. It is generally the policy of the investment adviser to vote in accordance with the recommendation of the Agent. The Agent shall refer to the investment adviser proxies relating to mergers and restructurings, and the disposition of assets, termination, liquidation and mergers contained in mutual fund proxies. The investment adviser will normally vote against anti-takeover measures and other proposals designed to limit the ability of shareholders to act on possible transactions, except in the case of closed-end management investment companies. The investment adviser generally supports management on social and environmental proposals. The investment adviser may abstain from voting from time to time where it determines that the costs associated with voting a proxy outweighs the benefits derived from exercising the right to vote or the economic effect on shareholders interests or the value of the portfolio holding is indeterminable or insignificant.

In addition, the investment adviser will monitor situations that may result in a conflict of interest between the Fund s shareholders and the investment adviser, the administrator, or any of their affiliates or any affiliate of the Fund by maintaining a list of significant existing and prospective corporate clients. The investment adviser s personnel responsible for reviewing and voting proxies on behalf of the Fund will report any proxy received or expected to be received from a company included on that list to the personnel of the investment adviser identified in the Policies. If such personnel expects to instruct the Agent to vote such proxies in a manner inconsistent with the guidelines of the Policies or the recommendation of the Agent, the personnel will consult with members of senior management of the investment adviser to determine if a material conflict of interests exists. If it is determined that a material conflict does exist, the investment adviser will seek instruction on how to vote from the Special Committee.

Information on how the Fund voted proxies relating to portfolio securities during the most recent 12 month period ended June 30 is available (1) without charge, upon request, by calling 1-800-262-1122, and (2) on the Securities and Exchange Commission s website at http://www.sec.gov.

Item 8. Portfolio Managers of Closed-End Management Investment Companies

Scott H. Page, Payson F. Swaffield, Catherine M. McDermott, Eric A. Stein and Andrew Szczurowski and other Eaton Vance Management (EVM) investment professionals comprise the investment team responsible for the overall and day-to-day management of the Fund s investments as well as allocations among the Fund s three principal investment categories.

Mr. Page has been an Eaton Vance portfolio manager since 1996 and is a Vice President of EVM and Boston Management and Research, an Eaton Vance subsidiary (BMR). He is head of Eaton Vance s Bank Loan Investment Group. Mr. Swaffield is Chief Income Investment Officer of EVM and BMR and has been an Eaton Vance portfolio manager since 1996. Ms. McDermott has been with Eaton Vance since 2000 and is a Vice President of EVM and BMR. Mr. Stein became a portfolio manager effective December 6, 2012, is a Vice President of EVM and BMR and co-manages other Eaton Vance funds and portfolios. Mr. Stein originally joined EVM in July 2002. Prior to rejoining EVM in 2008, Mr. Stein worked at the Federal Reserve Bank of New York (2007-2008) and attended business school in Chicago, Illinois. Mr. Szczurowski became a portfolio manager effective November 1, 2011 and is an Assistant Vice President of EVM and BMR. He has been a member of the MBS group at Eaton Vance since 2007 and an analyst since 2008. Prior to 2007, Mr. Szczurowski was affiliated with Bank of New York Mellon. This information is provided as of the date of filing of this report.

The following table shows, as of the Funds most recent fiscal year end, the number of accounts each portfolio manager managed in each of the listed categories and the total assets (in millions of dollars), in the accounts managed within each category. The table also shows the number of accounts with

respect to which the advisory fee is based on the performance of the account, if any, and the total assets (in millions of dollars) in those accounts.

	Number of All Accounts	Total Assets of All Accounts	Number of Accounts Paying a Performance Fee	A P	l assets of ecounts aying a emance Fee
Scott H. Page					
Registered Investment Companies	13	\$ 21,546.2	0	\$	0

Andrew Szczurowski					
Registered Investment Companies	2	\$ 2,302.2	0	\$	0
Other Pooled Investment Vehicles	0	\$ 0	0	\$	0
Other Accounts	0	\$ 0	0	\$	0

^{*} Mr. Stein became a portfolio manager of the Fund effective December 6, 2012. This portfolio manager serves as portfolio manager of one or more registered investment companies that invest in one or more underlying registered investment companies in the Eaton Vance fund family. The underlying investment companies may be managed by this portfolio manager or another portfolio manager(s).

The following table shows the dollar range of Fund shares beneficially owned by each portfolio manager as of the Fund s most recent fiscal year end.

	Dollar Range of Equity
	Securities
Portfolio Manager	Owned in the Fund
Scott H. Page	None
Payson F. Swaffield	None
Catherine M. McDermott	None
Eric A. Stein	\$1 - \$10,000
Andrew Szczurowski	None

Potential for Conflicts of Interest. It is possible that conflicts of interest may arise in connection with a portfolio manager s management of the Fund s investments on the one hand and investments of other accounts for which a portfolio manager is responsible on the other. For example, a portfolio manager may have conflicts of interest in allocating management time, resources and investment opportunities among the Fund and other accounts he or she advises. In addition, due to differences in the investment strategies or restrictions between the Fund and the other accounts, a portfolio manager may take action with respect to another account that differs from the action taken with respect to the Fund. In some cases, another account managed by a portfolio manager may compensate the investment adviser based on the performance of the securities held by that account. The existence of such a performance based fee may create additional conflicts of interest for a portfolio manager in the allocation of management time, resources and investment opportunities. Whenever conflicts of interest arise, a portfolio manager will endeavor to exercise his or her discretion in a manner that he or she believes is equitable to all interested persons. EVM has adopted several policies and procedures designed to address these potential conflicts including a code of ethics and policies which govern the investment adviser s trading practices, including among other things the aggregation and allocation of trades among clients, brokerage allocation, cross trades and best execution.

Compensation Structure for EVM

Compensation of EVM s portfolio managers and other investment professionals has three primary components: (1) a base salary, (2) an annual cash bonus, and (3) annual stock-based compensation consisting of options to purchase shares of EVC s nonvoting common stock and/or restricted shares of EVC s nonvoting common stock. EVM s investment professionals also receive certain retirement, insurance and other benefits that are broadly available to EVM s employees. Compensation of EVM s investment professionals is reviewed primarily on an annual basis. Cash bonuses, stock-based compensation awards, and adjustments in base salary are typically paid or put into effect at or shortly after the October 31st fiscal year end of EVC.

Method to Determine Compensation. EVM compensates its portfolio managers based primarily on the scale and complexity of their portfolio responsibilities and the total return performance of managed funds and accounts versus the benchmark(s) stated in the prospectus, as well as an appropriate peer group (as described below). In addition to rankings within peer groups of funds on the basis of absolute performance, consideration may also be given to relative risk-adjusted performance. Risk-adjusted performance measures include, but are not limited to, the Sharpe Ratio. Performance is normally based on periods ending on the September 30th preceding fiscal year end. Fund performance is normally evaluated primarily versus peer groups of funds as determined by Lipper Inc. and/or Morningstar, Inc. When a fund s peer group as determined by Lipper or Morningstar is deemed by EVM s management not to provide a fair comparison, performance may instead be evaluated primarily

against a custom peer group. In evaluating the performance of a fund and its manager, primary emphasis is normally placed on three-year performance, with secondary consideration of performance over longer and shorter periods. For funds that are tax-managed or otherwise have an objective of after-tax returns, performance is measured net of taxes. For other funds, performance is evaluated on a pre-tax basis. For funds with an investment objective other than total return (such as current income), consideration will also be given to the fund success in achieving its objective. For managers responsible for multiple funds and accounts, investment performance is evaluated on an aggregate basis, based on averages or weighted averages among managed funds and accounts. Funds and accounts that have performance-based advisory fees are not accorded disproportionate weightings in measuring aggregate portfolio manager performance.

The compensation of portfolio managers with other job responsibilities (such as heading an investment group or providing analytical support to other portfolios) will include consideration of the scope of such responsibilities and the managers performance in meeting them.

EVM seeks to compensate portfolio managers commensurate with their responsibilities and performance, and competitive with other firms within the investment management industry. EVM participates in investment-industry compensation surveys and utilizes survey data as a factor in determining salary, bonus and stock-based compensation levels for portfolio managers and other investment professionals. Salaries, bonuses and stock-based compensation are also influenced by the operating performance of EVM and its parent company. The overall annual cash bonus pool is based on a substantially fixed percentage of pre-bonus operating income. While the salaries of EVM s portfolio managers are comparatively fixed, cash bonuses and stock-based compensation may fluctuate significantly from year to year, based on changes in manager performance and other factors as described herein. For a high performing portfolio manager, cash bonuses and stock-based compensation may represent a substantial portion of total compensation.

Item 9. Purchases of Equity Securities by Closed-End Management Investment Company and Affiliated Purchasers

No such purchases this period.

Item 10. Submission of Matters to a Vote of Security Holders

No Material Changes.

Item 11. Controls and Procedures

- (a) It is the conclusion of the registrant s principal executive officer and principal financial officer that the effectiveness of the registrant s current disclosure controls and procedures (such disclosure controls and procedures having been evaluated within 90 days of the date of this filing) provide reasonable assurance that the information required to be disclosed by the registrant has been recorded, processed, summarized and reported within the time period specified in the Commission s rules and forms and that the information required to be disclosed by the registrant has been accumulated and communicated to the registrant s principal executive officer and principal financial officer in order to allow timely decisions regarding required disclosure.
- (b) There have been no changes in the registrant s internal controls over financial reporting during the second fiscal quarter of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant s internal control over financial reporting.

Item 12. Exhibits

Plan.

(a)(1) Registrant s Code of Ethics Not applicable (please see Item 2).
 (a)(2)(i) Treasurer s Section 302 certification.
 (a)(2)(ii) President s Section 302 certification.
 (b) Combined Section 906 certification.
 (c) Registrant s notices to shareholders pursuant to Registrant s exemptive order granting an exemption from Section 19(b) of the 1940 Act and Rule 19b-1 thereunder regarding distributions paid pursuant to the Registrant s Managed Distribution

Signatures
