CAD - Canadian Dollar EUR - Euro GBP - British Pound Sterling In U.S. dollars unless otherwise indicated. (1) Senior floating-rate interests (Senior Loans) often require prepayments from excess cash flows or permit the borrowers to repay at their election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, Senior Loans will have an expected average life of approximately two to four years. The stated interest rate represents the weighted average interest rate of all contracts within the senior loan facility and includes commitment fees on unfunded loan commitments, if any, Senior Loans typically have rates of interest which are redetermined either daily, monthly, quarterly or semi-annually by reference to a base lending rate, plus a premium. These base lending rates are primarily the London Interbank Offered Rate (LIBOR) and secondarily, the prime rate offered by one or more major United States banks (the Prime Rate) and the certificate of deposit (CD) rate or other base lending rates used by commercial lenders. (2) Currently the issuer is in default with respect to interest payments. For a variable rate security, interest rate has been adjusted to reflect non-accrual status. For fair value measurement disclosure purposes, security is categorized as Level 3. (3) This Senior Loan will settle after March 31, 2014, at which time the interest rate will be determined. (4) Unfunded or partially unfunded loan commitments. The Trust may enter into certain credit agreements all or a portion of which may (5) be unfunded. The Trust is obligated to fund these commitments at the borrower s discretion. (6) Amount is less than 0.05% or (0.05)%, as applicable. (7) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities may be sold in certain transactions (normally to qualified institutional buyers) and remain exempt from registration. At March 31, 2014, the aggregate value of these securities is \$25,480,139 or 9.2% of the Trust s net assets applicable to common shares.

Represents a payment-in-kind security which may pay all or a portion of interest in additional principal. The interest rate paid in

additional principal is generally higher than the indicated cash rate.

At March 31, 2014, the Trust had sufficient cash and/or securities to cover commitments under these contracts.

The Trust is subject to foreign exchange risk in the normal course of pursuing its investment objective. Because the Trust holds foreign currency denominated investments, the value of these investments and related receivables and payables may change due to future changes in foreign currency exchange rates. To hedge against this risk, the Trust enters into forward foreign currency exchange contracts.

At March 31, 2014, the aggregate fair value of open derivative instruments (not considered to be hedging instruments for accounting disclosure purposes) in an asset position and in a liability position and whose primary underlying risk exposure is foreign exchange risk was \$1,757 and \$70,799, respectively.

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund s own assumptions in determining the fair value of investments)

In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

At March 31, 2014, the hierarchy of inputs used in valuing the Trust s investments and open derivative instruments, which are carried at value, were as follows:

Asset Description	Level 1	Level 2	Level 3*		Total	
Senior Floating-Rate Interests (Less						
Unfunded Loan Commitments)	\$	\$ 400,651,128	\$	367,360	\$	401,018,488

Miscellaneous		8,028				8,028
Short-Term Investments		8,382,561				8,382,561
Total Investments	\$ 470,201	\$ 450,415,088	\$	2,313,664	\$	453,198,953
Forward Foreign Currency Exchange						
Contracts	\$	\$ 1,757	\$		\$	1,757

Forward Foreign Currency Exchange						
Contracts	\$	\$ (70,799)	\$		\$	(70,799)
Total	\$	\$ (70,799)	\$		\$	(70,799)

^{*} None of the unobservable inputs for Level 3 assets, individually or collectively, had a material impact on the Trust.

Level 3 investments at the beginning and/or end of the period in relation to net assets were not significant and accordingly, a reconciliation of Level 3 assets for the fiscal year to date ended March 31, 2014 is not presented.

At March 31, 2014, there were no investments transferred between Level 1 and Level 2 during the fiscal year to date then ended.
