Invests primarily in global fixed-income securities

Quarterly Report

January 31, 2003

Letter to Shareholders

March 14, 2003

Dear Shareholder,

We present this Quarterly Report which covers the activities of Aberdeen Global Income Fund, Inc. (the "Fund") for the quarter ended January 31, 2003. Included in this report is a review of the global economy and investment markets, together with an overview of the Fund's investments prepared by Aberdeen Asset Managers (C.I.) Limited (the "Investment Manager").

High Credit Quality: 79.7% of Securities Rated or Deemed Equivalent to AA/Aa or Better

The Fund's high credit quality has been maintained. Over 79.7% of assets are rated AA/Aa or better, or are considered of equivalent quality by the Investment Manager. An additional 11.3% is held in A rated securities.

Distributions

Cash distributions to common shareholders for the 12 months ended January 31, 2003 totaled 72 cents per share. Based on the share price of \$10.81 on January 31, 2003, the cash distribution rate over the 12 months then ended was 6.7%. Since all distributions are paid after deducting applicable withholding taxes, the effective distribution rate may be higher for those U.S. investors who are able to claim a tax credit.

On March 13, 2003 the Board of Directors declared a monthly distribution of 6 cents per share payable on April 11, 2003 to all shareholders of record as of March 31, 2003.

The Board's policy is to provide investors with a stable monthly distribution out of current income, supplemented by realized capital gains and, to the extent necessary, paid-in capital. This policy is subject to regular review at the Board's quarterly meetings, unless market conditions require an earlier evaluation. The next review is scheduled to take place in June 2003.

Net Asset Value Performance: 7.1% Per Annum Return Since Inception

The Fund's total return based on Net Asset Value ("NAV") was 9.7% over the quarter ended January 31, 2003 and 7.1% per annum since inception, assuming reinvestment of distributions.

## Edgar Filing: ABERDEEN GLOBAL INCOME FUND INC - Form N-30B-2

Aberdeen Global Income Fund, Inc. 1

Letter to Shareholders (continued)

### Share Price Performance

The Fund's share price rose 15.6% over the quarter, from \$9.35 on October 31, 2002 to \$10.81 on January 31, 2003. The Fund's share price on January 31, 2003 represented a discount of 4.2% to the NAV per share of \$11.28 on that date. This represents a narrowing of the discount to NAV of 10.6% on October 31, 2002.

### Implementation of Global Investment Strategy

In March 1999 the Fund's shareholders approved amendments to the Fund's principal investment objective, investment policies and investment restrictions to enable the Fund to invest up to 35% of its total assets in Global Debt Securities. The term "Global Debt Securities" includes securities of issuers located in, or securities denominated in the currency of, countries other than Australia, Canada, New Zealand or the United Kingdom. This strategy was proposed to be implemented in two phases. The first phase involved the immediate investment of up to 20% of the Fund's assets in Asian debt markets. On September 3, 2001 the Board of Directors authorized the Investment Manager, in its discretion, to implement the second phase of the global investment strategy. This allows the Fund to invest up to 35% of its total assets in Global Debt Securities, with a view to enhancing yield.

### Global Debt Securities: 12.8% of Total Assets Invested in Global Debt Securities

As of January 31, 2003, 12.8% of the Fund's total assets were held in Global Debt Securities. This included 8% in Asian debt securities. During the quarter ended January 31, 2003, 1.7% of the Fund's total assets were invested in Eastern Europe, 2.3% in Latin America and 0.8% in Western Europe. Although these Global Debt Securities present attractive opportunities, the Fund's ability to increase its investments in Global Debt Securities remains constrained by the potential realization of foreign exchange losses.

2 Aberdeen Global Income Fund, Inc.

Letter to Shareholders (concluded)

### Determination Not to Proceed with Proposed Rights Offering

On October 8, 2002 the Fund filed a registration statement with the Securities and Exchange Commission in connection with a proposed transferable rights offering to common shareholders. On November 19, 2002 the Fund issued a press release indicating that the Rights Offering Committee of the Board of Directors had made a determination that market conditions were not then favorable for the commencement of the offering and that the commencement of the offering should be delayed until such time as market conditions might provide the Fund with an opportunity to enhance returns to shareholders. On January 10, 2003 the Fund announced that it would not proceed with the proposed rights offering, based upon the determination of the Rights Offering Committee that market conditions remained unfavorable for the commencement of the rights offering and that favorable market conditions were not anticipated to develop in the near term.

Aberdeen Global Income Fund, Inc. 3

-----  
Your Board's policy is to provide investors with a stable monthly distribution out of current income, supplemented by realized capital gains and, to the extent necessary, paid-in capital.

The Fund is subject to U.S. corporate, tax and securities laws. Under U.S. tax accounting rules, the amount of distributable income for each fiscal period depends on the actual exchange rates during the entire year between the U.S. dollar and the currencies in which Fund assets are denominated and on the aggregate gains and losses realized by the Fund during the entire year.

Therefore, the exact amount of distributable income for each fiscal year can only be determined as at the end of the Fund's fiscal year, October 31. However, under the U.S. Investment Company Act of 1940, the Fund is required to indicate the source of each distribution to shareholders.

The Fund estimates that distributions for the fiscal year commencing November 1, 2002, including the distribution paid on March 14, 2003, are comprised of 69% net investment income and 31% return of paid in capital.

This estimated distribution composition may vary from month to month because it may be materially impacted by future realized gains and losses on securities and fluctuations in the value of the currencies in which Fund assets are denominated.

The amount attributed as a return of capital reflects, in part, the realization of currency losses in the Fund's Australian bond portfolio as a result of positioning the Fund's investments more towards global debt securities. Fund assets are marked to market, therefore the realization of such currency losses does not impact the Fund's net asset value. However, these losses do offset distributable income, therefore increasing the return of capital component of the distribution.

The Investment Manager anticipates further increases in the level of investment in global fixed income securities, which may result in the realization of additional currency losses. The Investment Manager believes that the Fund will benefit from the increased global exposure. Likewise, the Investment Manager

Edgar Filing: ABERDEEN GLOBAL INCOME FUND INC - Form N-30B-2

anticipates that the higher yields currently available in certain global markets, as compared with yields currently available in Commonwealth countries, may better position the Fund to reduce and potentially eliminate the return of capital component of the Fund's monthly distributions. There can be no assurance, however, that the Investment Manager's expectations will be met.

In January 2004, a Form 1099 DIV will be sent to shareholders, which will state the amount and composition of distributions and provide information with respect to their appropriate tax treatment.

-----  
4 Aberdeen Global Income Fund, Inc.

Dividend Reinvestment and Cash Purchase Plan

We invite you to participate in the Fund's Dividend Reinvestment and Cash Purchase Plan ("the Plan") which allows you to automatically reinvest your distributions in shares of the Fund's common stock at favorable commission rates. Distributions made under the Plan are taxable to the same extent as are cash distributions. The Plan also enables you to make additional cash investments in shares of at least \$100 per month. Under this arrangement EquiServe Trust Company N.A. (the "Plan Agent") will purchase shares for you on the stock exchange or otherwise on the open market on or about the 15th of each month, unless shares of the Fund are trading at a premium, in which case the Fund will issue additional shares. As a participant in the Plan you will have the convenience of:

Automatic reinvestment -- the Plan Agent will automatically reinvest your distributions, allowing you to gradually grow your holdings in the Fund;

Lower costs -- shares purchased on your behalf under the Plan will be at reduced brokerage rates. Brokerage on share purchases is currently 2 cents per share;

Convenience -- the Plan Agent will hold your shares in non-certificated form and will provide a detailed record of your holdings at the end of each distribution period.

To request a brochure containing information on the Plan, together with an authorization form, please contact the Plan Agent, EquiServe Trust Company N.A., P.O. Box 43011, Providence, RI 02490-3011 or call toll free on 1-800-426-5523.

6 Aberdeen Global Income Fund, Inc.

Report of the Investment Manager (continued)

### Distributions

The Investment Manager continues its efforts to reallocate the portfolio toward higher yielding Global Debt Securities, in addition to fixed income securities denominated in the Commonwealth Currencies. This may enhance the Fund's net investment income and ability to realize capital gains. There can, however, be no assurance that the Investment Manager's expectations will be met.

### Auction Market Preferred Stock (AMPS)

The Fund's \$30 million of AMPS continued to be well bid at the weekly auctions. The average interest rate paid was 1.74% over the quarter ended January 31, 2003, compared with 1.28% for 30-day U.S. commercial paper over the same period. These rates declined over the period as the U.S. Federal Reserve eased interest rates by 0.5% in early November. The rates paid to preferred shareholders have decreased further since January 31, 2003 to a level of 1.45% as of the date of this report.

Over the past year, the impact of AMPS on the Fund has been positive, as the key

## Edgar Filing: ABERDEEN GLOBAL INCOME FUND INC - Form N-30B-2

currencies of the Fund -- the Australian dollar, British pound, New Zealand dollar and Canadian dollar -- were all stronger against the U.S. dollar, with key Asian currencies following a similar trend. With the U.S. Federal Reserve lowering interest rates by a further 0.5% during the period, the differential between AMPS funding rates and the yields at which the Fund invests has remained positive. Overall, the outlook over the medium-term for investment markets and the portfolio in respect of these factors is considered by the Investment Manager to be favorable and AMPS are therefore seen as having the potential to enhance total shareholder returns in the medium term.

On September 16, 2002 the Fund entered into a 2-year interest rate swap agreement in order to hedge one-third of the Fund's outstanding issue of AMPS. Under the original terms of the agreement the Fund received a floating rate of interest (one month USD-LIBOR BBA rate) based on a notional amount of US\$10,000,000 and paid interest at a fixed rate of 2.46%. The fixed rate interest payment was re-priced to 2.10% on October 1, 2002 and then to 1.7175% on December 24, 2002.

Market Review and Outlook

AUSTRALIA

The Australian economy is currently in its eleventh year of expansion. Recent economic data indicated that the economy's annual growth rate was 3.7% in the third quarter of 2002. This result was underpinned by a strong consumer demand, with retail sales currently around 8% above the level in the third quarter of 2001, and a strong housing sector, with building approvals recently pulling back from eight year highs.

The Reserve Bank of Australia ("RBA") opted to leave official cash rates unchanged since June 2002, with its decisions likely to have been influenced by uncertainty about the strength of the global recovery, the threat of military action in Iraq and concerns about the outlook for the rural sector domestically. The RBA indicated in its February 2003 Statement of Monetary Policy that it retains a 'neutral' bias for monetary policy. The Investment Manager expects Australian monetary policy to remain on hold in the near future, with the tightening cycle likely to resume towards the middle of 2003, lowering official cash rates towards a more 'neutral' 5.25-5.5%. With current official cash rates remaining quite accommodative, however, the Investment Manager does not foresee the need for the RBA to ease official cash rates at this stage.

The Australian dollar rose over the quarter, up 5.4% to close at \$0.59 on January 31, 2003.

CANADA

Economic activity slowed in the fourth quarter of 2002, as the gross domestic product advanced 0.4%. The slower rate of growth in the fourth quarter resulted from decreased output in manufacturing and agriculture and lower activity levels in the finance sector. The economy appears to be pulling back to a more sustainable pace of growth. Ongoing strength in the labor market continues to underpin growth in the near-term. The Canadian economy created 58,000 jobs in December, surpassing even the most optimistic forecasts. The December increase puts total job gains for 2002 at 560,000 -- the fastest pace of job growth since 1987. The Bank of Canada ("BoC") has kept interest rates on hold in recent months, after announcing 75 basis points of tightening last year. The BoC recently reported that Canada's economic growth in the second half of 2002 was lower than previously expected and that the most appropriate course of action was therefore to maintain a steady policy. However, looking forward the BoC does expect a strengthening of domestic and foreign

## Edgar Filing: ABERDEEN GLOBAL INCOME FUND INC - Form N-30B-2

### Market Review and Outlook (continued)

demand, with a resumption of above-potential growth to continue in the second half of 2003. Accordingly, the BoC still maintains that the timely removal of monetary stimulus will be required to achieve the inflation target over the medium-term. The Investment Manager continues to factor in rate rises in Canada in the latter part of this year.

The Canadian dollar rose slightly over the quarter, up 1.6% to close at \$0.65.

### NEW ZEALAND

After posting growth of 1.7% quarter on quarter in the second quarter of 2002, the New Zealand economy expanded by a further 1.0% quarter on quarter in the third quarter. Strong domestic demand was the key factor in the third quarter, with solid growth in private consumption being reinforced by very strong growth in residential building activity, the latter largely a function of rapid migrant-driven population growth. In contrast, net exports were sharply negative, although this followed a sizeable positive contribution in the second quarter of 2002. Despite global uncertainty, the confidence of New Zealand's consumers has remained relatively robust, providing a solid base for retail spending in the near-term. Consumer confidence remained unchanged in the December 2002 quarter but the index remains at historically high levels, boosted by strong employment growth, a decade-low unemployment rate, higher wages and rising house prices. With the economy still on track to post above-potential growth this year, and already stretched for resources, the risk remains that the Reserve Bank of New Zealand may edge rates higher over coming months to slow the domestic economy. The Investment Manager forecasts that official cash rates will remain unchanged during 2003 but believes there is a risk of a tightening towards the middle of the year.

The New Zealand dollar performed strongly over the quarter, rising 10.2% to close at \$0.54.

### UNITED KINGDOM

The U.K. economy showed signs of slowing over the three months to January 31, 2003. Consumer demand, which had been a mainstay of the economy through 2002, started to slow into the end of 2002. Manufacturing, whilst showing some tentative signs of improvement earlier in 2002, has weakened again through late 2002. Industrial production has fallen for the past five months. Leading indices for the business sector are also showing renewed weakness. The housing market remains supported by low interest rates but there are now clear signs that momentum has slowed dramatically in housing price increases.

Aberdeen Global Income Fund, Inc. 13

### Market Review and Outlook (continued)

The widespread expectations of firmer monetary policy have not materialized and there has been an easing in monetary policy in early 2003. This has been partly justified by the slowing in domestic activity and the global macro uncertainty. The Investment Manager does not expect a major decline in activity throughout the year, but growth closer to 2%, below current consensus and government expectations. This could produce a further interest rate cut later in the year. The pound has strengthened over recent months against a weaker US\$ but weakened against the Euro. The pound remains an over-valued currency and the Investment Manager expects a net depreciation in 2003 on a trade weighted basis.

## Edgar Filing: ABERDEEN GLOBAL INCOME FUND INC - Form N-30B-2

The pound rose over the quarter, closing at \$1.64.

### EASTERN EUROPE AND LATIN AMERICA

Emerging Market debt continued its "New Year" rally in January, although at a slowing pace, with the spread on the Emerging Markets Bond Index tightening from 765 basis points (bps) over U.S. Treasuries to 730 bps over. In terms of global risk markets, while equity markets are at or near historic lows, fixed income markets, whether emerging markets, high yield or investment grade, have yet to react to the depressed global environment. The Investment Manager believes that part of this is due to the sectors involved, such as Brazilian telecommunication companies, as they are now recovering following last year's difficulties. For emerging markets there have been major oil beneficiaries resulting from the concerns over Iraq. Venezuela came through a two month general strike, maintaining civil order and increasing oil production and Ecuador is on the point of signing a new International Monetary Fund ("IMF") agreement. The purchase in Russia by BP of TNK/Sidanco underlines the new importance of Russian oil for Western companies keen to increase their reserves, and has led to a substantial rally across all Russian assets. Argentina continues to recover well and the cheapness of both the Argentine Peso and Brazilian Real augur well for export-led recoveries that have turned around the external accounts dramatically. In Brazil, the risk premiums are slowly relaxing and the 2002 fiscal performance was better than the IMF target, producing a primary surplus of 4.06%.

14 Aberdeen Global Income Fund, Inc.

### Market Review and Outlook (continued)

#### ASIA

##### Economies

The period under review proved to be an uncertain period for global economies against the backdrop of rising geopolitical risks and risk aversion. High levels of corporate bankruptcy and debt default negatively affected growth in the U.S., while the prospect of a U.S.-Iraq war reduced investor confidence.

However, news flow in the Asia-Pacific region was broadly supportive over the quarter. Economic data showed steady improvement, with the region's fundamentals looking solid. This, in part, reflected the growing importance of domestic demand in many countries.

Domestic consumption has helped to offset a slowdown in exports, notably in South Korea and Thailand where demand for autos and housing was fueled by easier credit and falling interest rates. Malaysia also witnessed a domestic demand revival, albeit one buttressed by government spending.

Hong Kong and Singapore experienced worsening business conditions, to varying degrees. Although Hong Kong managed to pull out of recession in the second quarter of 2002, investors remain unconvinced over the sustainability of the turnaround. Despite robust exports, the domestic economy is stuck in a deflationary cycle and retail sales are weak. Meanwhile, a slowing U.S. economy hurt Singapore, and its trade-dependent manufacturing base.

##### Domestic Bond and Currency Markets

In keeping with an uncertain global economic outlook, central banks kept monetary policy accommodative. The Federal Reserve in the U.S. continued to lead

## Edgar Filing: ABERDEEN GLOBAL INCOME FUND INC - Form N-30B-2

by example when it cut rates by 0.5% in early November. The aggressive move took the Federal Funds rate down to 1.25%, a 41-year low.

Continued high levels of liquidity and geopolitical concerns triggered flight-to-quality moves in the domestic bond market. Consequently, government bonds rallied, leading to a flattening of the yield curve.

Aberdeen Global Income Fund, Inc. 15

### Market Review and Outlook (concluded)

The U.S. dollar remained weak against the backdrop of increased tensions in the Persian Gulf and concerns regarding the rising U.S. current account and budget deficits. Asian currencies were generally stronger, save for the Philippine peso, which underperformed on concerns over its fiscal deficit and the impact of a U.S.-Iraq war on its economy.

### Asian Yankee (US\$) Bond Market

Over the quarter ended January 31, 2003 sentiment was generally positive in the Asian Yankee bond market, supported by upgrades of credit ratings or outlooks on various sovereigns and corporates. New issues in both investment-grade and high-yield bonds, dominated by South Korean banks, were well received by the markets.

The beginning of 2003 saw strong demand, particularly for South Korean and Malaysian paper, as well as in selective high-yield issues (namely Thai bank subordinated debt and Indonesian corporates). However, some of the gains were pared at the end of the three-month period, amid increased security concerns stemming from North Korea's nuclear weapons program.

16 Aberdeen Global Income Fund, Inc.

### Summary of Key Rates

The following table summarizes the movements of key interest rates and currencies over the last three and twelve month periods.

	January 31, 2003	October 31, 2002	January 31, 2002
Australia
