mPHASE TECHNOLOGIES, INC.

(A DEVELOPMENT STAGE COMPANY)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

1. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

NATURE OF OPERATIONS

mPhase Technologies, Inc. (the "Company") was organized on October 2, 1996 and is in the development stage, as defined by Statement of Financial Accounting Standards ("SFAS") No. 7, "Accounting and Reporting by Development Stage Enterprises." The Company's present activities are focused on the commercial deployment of its proprietary IPTV or TV+ solution and DSL component products. The Company is also engaged in exploratory research through Lucent Technologies Inc. of electronic sensors and power cells (nanotechnology). Since mPhase is in the development stage, the accompanying consolidated financial statements should not be regarded as typical for normal operating periods.

BASIS OF PRESENTATION - The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and pursuant to the regulations of the Securities Exchange Commission. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring nature) considered necessary for a fair presentation have been included. Operating results for the three months ending September 30, 2006 are not necessarily indicative of the results that may be expected for a full fiscal year. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended June 30, 2006.

Through September 30, 2006, the Company had incurred cumulative (a) development stage losses totaling approximately (\$155,418,059), (b) a stockholders' equity (deficit) of (\$2,741,716), and (c) negative cash flow from operations equal to (\$70,022,378). At September 30, 2006, the Company had \$149 of cash, cash equivalents and \$2,140 of trade receivables to fund short-term working capital requirements. The Company's ability to continue as a going concern and its future success is dependent upon its ability to raise capital in the near term to: (1) satisfy its current obligations, (2) continue its research and development efforts, and (3) allow the successful wide scale development, deployment and marketing of its products.

7

mPHASE TECHNOLOGIES, INC.

(A DEVELOPMENT STAGE COMPANY)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

USE OF ESTIMATES - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

RECLASSIFICATIONS - Certain reclassifications have been made in the prior period consolidated financial statements to conform to the current period presentation. The most substantial reclassification in these financial statements is for charges for reparation expenses for equity issued to investors for market value adjustments previously included in general and administrative expenses which are now included in the other income (expense).

LOSS PER COMMON SHARE, BASIC AND DILUTED - The Company accounts for net loss per common share in accordance with the provisions of SFAS No. 128, "EARNINGS PER SHARE" ("EPS"). SFAS No. 128 requires the disclosure of the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the entity. Common equivalent shares have been excluded from the computation of diluted EPS for all periods presented since their affect is anti dilutive.

REVENUE RECOGNITION IN FINANCIAL STATEMENTS, which provides guidance on applying generally accepted accounting principles to revenue recognition based on the interpretations and practices of the SEC. The Company recognizes revenue for its line of POTS Splitter products and other DSL component products at the time of shipment, at which time, no other significant obligations of the Company exist, other than normal warranty support. In addition, the Company includes costs of shipping and handling billed to customers in revenue and the related expenses of shipping and handling costs is included in cost of sales.

STATEMENT OF CASH FLOW SUPPLEMENTAL INFORMATION

	2005	2006
Interest Paid	\$ 14,201	\$4,414
Non Cash Investing and Financing Activities:		
Issuance of options to employees and officers		\$463,400
Issuance of common stock for services	\$99,000	\$229,971

2. RELATED PARTY TRANSACTIONS

MICROPHASE CORPORATION

mPhase's President, Chief Operating Officer and Chairman of the Board of the Company are also officers of Microphase and mPhase's president and chairman of the board are shareholders of Microphase. On May 1, 1997, the Company entered into an agreement with Microphase, whereby it will use office space as well as the administrative services of Microphase, including the use of accounting personnel. This agreement was for \$5,000 per month and was on a month-to-month basis. In July 1998, the office space agreement was revised to \$10,000, in January 2000 to \$11,050 per month, in July 2001 to \$11,340 per month, in July 2002 to \$12,200 per month, in January 2003 to \$10,000 per month, and in July 2003 to \$18,000 per month. Additionally, in July 1998, mPhase entered into an agreement with Microphase, whereby mPhase reimburses Microphase \$40,000 per month for technical research and development. In January 2003 the technical research and development agreement was revised to \$20,000 per month, and in July 2003 it was further revised to \$5,000 per month for technical and research development, \$5,000 per month for administrative services and \$5,000 per month under the office space agreement. Beginning July 1, 2006, billings for all of the above services has been \$5,000 per month.

Microphase also charges fees for specific projects on a project-by-project basis. During the three months ended September 30, 2005 and 2006 and from inception (October 2, 1996) to September 30, 2006, \$90,984, \$56,339 and \$8,727,115 respectively, have been charged to expense.

As a result of the foregoing transactions as of September 30, 2006, the Company had a \$57,240 payable to Microphase.

mPHASE TECHNOLOGIES, INC.

(A DEVELOPMENT STAGE COMPANY)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

JANIFAST LTD.

The Company purchases products and incurs certain research and development expenses with Janifast Ltd., which is owned by U.S. Janifast Holdings, Ltd., a company in which three directors of mPhase are significant shareholders and one is an officer, in connection with the manufacturing of POTS Splitter shelves and component products including cards and filters sold by the Company.

During the three months ended September 30, 2005 and 2006 and the period from inception (October 2, 1996) to September 30, 2006, \$215,974, \$134,115 and \$16,031,211 respectively have been charged by Janifast to inventory or is included in operating expenses in the accompanying statements of operations.

As a result of the foregoing transactions as of September 30, 2006, the Company had \$98,082 payable to Janifast, which is included in amounts due to related parties in the accompanying balance sheet. Additionally, at September 30, 2006, there were no undelivered purchase orders outstanding to Janifast Ltd.

OTHER RELATED PARTIES

On August 30, 2004, the Company paid \$100,000 in cash to Piper Rudnick LLP, outside legal counsel to the Company as part of a renegotiated settlement agreement that was originally effective as of March 31, 2002. The Company was in arrears with respect to payments due under the original settlement agreement and as part of the renegotiated agreement agreed to make the following payments:

Edgar Filing: MPHASE TECHNOLOGIES INC - Form 10-Q

a. \$25,000 on each of December 1, 2004, March 1, 2005, June 1, 2005, September 1, 2005 and a \$50,000 payment on December 1, 2005. Thereafter the Company was obligated to pay \$25,000 on each of March 1, 2006, June 1, 2006, and September 1, 2006 with a final payment of \$75,000 on December 1, 2006.

b. The Company also delivered a 5 year cashless warrant to purchase \$150,000 worth of common stock at \$.25 per share. The warrant was valued pursuant to EITF 96-18, the ascribed value of the warrant minus the debt cancelled resulting loss of \$40,500.

As of September 30, 2006, the Company has made each payment owed to Piper Rudnick LLP, except for the \$25,000 payment due September 1, 2006.

Mr. Abraham Biderman was employed until September 30, 2003 by our former investment-banking firm Lipper & Company. During the three months ended September 30, 2006, Mr. Biderman's affiliated firm of Palladium Capital Advisors received a finder's fee of \$100,000.

In addition during the quarter ended September 30, 2006, Messrs, Durando, Dotoli and Smiley have provided \$300,000 in bridge loans to the Company which is evidenced by 3 individual promissory notes in the face amount of \$101,000 each. Subsequently, Messrs Durando, Dotoli and Smiley have extended additional bridge loans to the Company of \$30,000, \$100,000 and \$60,000 respectively, evidenced by promissory notes with a 12% rate of interest. All of the foregoing promissory notes are payable on demand.

The following table summarizes all related party expenses during the quarter ended September 30, 2006

Summary of Compensation to Related Parties

mPHASE TECHNOLOGIES, INC.

(A DEVELOPMENT STAGE COMPANY)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

3. EQUITY TRANSACTIONS

During the quarter ended September 30, 2006, the Company issued 6,780,716 shares of its common stock together with 5,555,556 of 5 year warrants to purchase one share each of the Company's common stock, with an exercise price of \$.18 per share in private placements generating net proceeds of \$1,104,000.

Also during the quarter ended September 30, 2006, the Company issued 138,889 shares of its common stock pursuant to the exercise of warrants, generating net proceeds of \$25,000 to the Company. In August, 2006 the Company authorized the issuance of 3,310,000 options to employees and officers for the right to purchase a like amount of common shares. Pursuant to the adoption of FAS 123(R), the Company recognized an expense in the amount of \$463,400, all of which has been included in general and administrative expense. The fair value of options granted was estimated as of the date of grant using the Black-Scholes stock option pricing model, based on the following weighted average assumptions: annual expected return of 0%, annual volatility of 95.6%, based on a risk-free interest rate of 4.8% and expected option life of 5 years.

During the quarter ended September 30, 2006, the Board of Directors authorized the issuance of 1,220,900 shares of common stock to consultants. The stock value ranged from \$.17 to \$.20 per share, the fair value on the date of the awards. (See also Note 5)

4. COMMITMENTS AND CONTINGENCIES

mPhase has entered into various agreements with Georgia Tech Research ("GTRC") and its affiliate, Georgia Tech Applied Research Corporation, ("GTARC"), pursuant to which the Company receives technical assistance in developing the commercialization of its Digital Video and Data Delivery System. The amount incurred by the Company for GTRC technical assistance with respect to its research and development activities during the quarters

ended September 30, 2005 and 2006 totaled \$0 and \$0 respectively and \$13,539,952 from the period from inception through September 30, 2006. If and when sales commence utilizing its legacy DVDDS digital broadcast television platform, mPhase will be obligated to pay to GTRC a royalty up to 5% of product sales, as defined.

As of September 30, 2006, mPhase is obligated to pay Lucent Technologies, Inc. \$200,000 per month through and including the first of each month from March 1, 2006 through and including February 1, 2007 in connection with the development of its Nanotechnology product line. The Company owed Lucent \$300,000 in accounts payable on September 30, 2006. The amount incurred by the Company with Lucent for assistance with respect to its research and development activities during the quarters ended September 30, 2005 and 2006 and inception to date totaled \$1,384,480, \$600,000 and \$12,006,651 respectively.

Other significant contractual obligations require the Company to pay Magpie Telecom Insiders Inc, certain amounts related to the successful development of its TV+ product. This contract requires a payment of a \$60,000 monthly relationship fee plus \$135,000 per achievement of specified milestones. This contract expires in January 2007.

In addition, the Company has an agreement with Velankani Information Systems to further develop its TV+ product. This agreement requires the Company to pay approximately \$98,000 per month until January 2007.

From time to time, mPhase may be involved in various legal proceedings and other matters arising in the normal course of business. On November 15, 2005 a civil enforcement action (c.v. action no. 3:05 cv1747) was filed in Federal District Court in the State of Connecticut against Packetport.com, Inc. and others including Messrs. Durando and Dotoli in their individual capacity for alleged violations of the federal securities laws in connection with their activities as Officers and Directors of Packetport.com during the year 1999-2000. A summary of the Complaint is contained in SEC Litigation Release No. 19465 dated November 15, 2005. The original complaint may be accessed on the SEC web site under <http://www.sec.gov/litigation> . As noted in other public filings with the SEC, mPhase Technologies, Inc. is not named as a party to the civil action. Both Messrs. Durando and Dotoli continue to deny any wrongdoing and will vigorously defend all allegations in the complaint.

5. SUBSEQUENT EVENT

In the period following the end of the first fiscal quarter, the Company's low levels of liquidity required that funds for operations be raised through continued short term loans from officers in an amount aggregating \$190,000 (see Note 2) and a temporary hold on payments to its CEO and COO for their services. In addition, payment of Accounts Payable to vendors, including research partners, has been extended beyond terms. The Company is actively engaged in negotiations with equity providers who may provide the necessary funds to continue operations, although no assurances can be given that such agreements will be transacted. As of the date of this filing and subsequent to September 30, 2006, approximately \$550,000 of such funds has been received and will require the issuance of approximately 3.7 million shares of common stock.

ITEM 2. MANAGEMENT'S DISCUSSION OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS

The following is management's discussion and analysis of certain significant factors, which have affected mPhase's financial position and should be read in conjunction with the accompanying financial statements, financial data, and the related notes.

CAUTIONARY STATEMENT PURSUANT TO SAFE HARBOR PROVISIONS OF THE PRIVATE LITIGATION REFORM ACT OF 1995:

Some of the statements contained in or incorporated by reference in this Form 10-Q discuss the Company's plans and strategies for its business or state other forward-looking statements, as this term is defined in the Private Securities Litigation Reform Act of 1995. The words "anticipate," "believe," "estimate," "expect," "plan," "intend," "should," "seek," "will," and similar expressions are intended to identify these forward-looking statements, but are not the exclusive means of identifying them. These forward-looking statements include, among others, statements concerning the Company's expectations regarding its working capital requirements, gross margin, results of operations, business, growth prospects, competition and other statements of expectations, beliefs, future plans and strategies, anticipated events or trends, and similar expressions concerning matters that are not historical facts. Any forward-looking statements contained in this Quarterly Report on Form 10-Q are subject to risks and uncertainties that could cause actual results to differ materially from those results expressed in or implied by the statements contained herein.

RESULTS OF OPERATIONS

OVERVIEW

mPhase, a New Jersey corporation, founded in 1996 is a publicly-held company with over 15,000 shareholders and approximately 286 million shares of common stock outstanding. The Company's common stock is traded on the Over the Counter Bulletin Board under the ticker symbol XDSL. We are headquartered in Norwalk, Connecticut with offices in Little Falls, NJ and New York, N.Y. mPhase shares common office space with Microphase Corporation, a privately held company. Microphase is a leader in the field of radio frequency and filtering technologies within the defense and telecommunications industry. It has been in operation for over 50 years and supports mPhase with both engineering and administrative and financial resources as needed.

mPhase is a developer of broadband communications products, specifically, IP TV plus a digital subscriber line (DSL) products for telecommunications service providers around the world. In February of 2004 mPhase has entered into the new and emerging area of NanoTechnology. Since our inception in 1996 we have been a development-stage company and operating activities have related primarily to research and development, establishing third-party manufacturing relationships and developing product brand recognition among telecommunications service providers.

Description of Operations

Since our inception in 1996 our primary activities through fiscal year 2003 consisted of designing, manufacturing and testing our flagship products designed to enable telephone service providers to deliver digital broadcast television over DSL. Fiscal years 2004 and 2005 marked a significant shift of the Company's focus, in response to technology advancements with respect to the delivery of video data using internet protocol. The Company has shifted its telecommunications solution focus from technology for the delivery of broadcast television high speed internet and voice over DSL to the development of middleware/software for carrier class delivery of IP TV over copper, fiber, coax or any infrastructure representing a combination of the foregoing that is used by a telecommunications service provider. This shift has taken place over the past two years and has culminated in our flagship product namely Release 5.0 of our TV+ solution. This product is scheduled for final testing in the second quarter of fiscal year 2007 as part of an initial deployment of 1000 ports, and 1,500 ports with two major telecommunications service providers in Russia and the Ukraine respectively. We have not, as yet, derived any significant revenue from our TV+ solution, which is the culmination of several earlier versions that have been changed to accommodate the latest in technological innovation and market demand for IPTV. The Company's recent entry into the field of nanotechnology is focused upon exploratory development of batteries with significantly longer shelf lives and enhanced capabilities and magnetometer sensor devices with potentially wide applicability for both military and commercial security applications.

The Company believes that such development is consistent with its strategy of being a pioneer of high growth technology products and potentially diversifies its product mix. mPhase introduced its first TV over DSL platform, the Traverser™ Digital Video and Data Delivery System ("DVDDS"), in 1998. The DVDDS is a patented end to end system that enables a telecommunications service provider to deliver up to several hundred channels of motion picture experts group two ("MPEG-2") standard broadcast digital television, high speed internet and voice over copper telephone lines between a central office facility of the provider and a customer's premise.

mPhase has not derived any material revenues from sales of the legacy DVDDS which has been discontinued and replaced by its IPTV+ middleware solution. The IPTV solution is an open standards carrier class middleware designed to enable telecommunications service devices to deliver over any network system using internet protocol, voice, digital broadcast television, video on demand and high-speed internet.

For mPhase the development of the TV+ software marks a change in the Company's core product line from an end to end proprietary hardware and software product to a middleware solution enabling telephone service providers to deliver converged services to customers. The Company believes that the demand for the TV+ system will initially be greatest in markets primarily outside of the United States that do not have a hybrid fiber coaxial cable ("HFC") infrastructure necessary for cable TV or fiber to the curb necessary for very fast DSL (VDSL).

The current release of the TV+ solution, utilizes a communications framework based upon Internet Protocol (IP) instead of Asynchronous Transfer Mode (ATM) that is utilized by Releases 1.0 and 2.1. ATM is an industry standard for transportation of data based upon a packaging of information into a fixed-size cell format for transportation across networks. Many telecommunications service providers currently deploy equipment that handles this protocol because it can support voice, video, data and multimedia applications simultaneously with a high degree of reliability. IP is another transport protocol that maintains network information and routes packets across networks. IP packets are larger and can hold more data than ATM cells. Historically, there have been concerns that service providers would be unable to provide the same quality of service with IP because it is not optimized for time-sensitive signals such as broadcast television and voice. Nevertheless, there is a greater demand by telecommunication service providers for IP systems for delivery of television, voice and high-speed data because such systems are significantly more cost effective to deploy based upon greater scalability.

The current release of the TV+ solution is a system management software/middleware product that will operate with both the Lucent Stinger as well as the DSLAM's of other major vendors. The current release of the TV system will also be able to send multiple TV channels over both fiber, coax as well as down a single DSL line over copper using ADSL2 supported DSLAM's and be capable of delivery of Video on Demand. Our TV+ solution is an open standards-based, carrier class technology with tremendous scalability and enables a telecommunications service provider to custom tailor the deployment of feature rich IP television, high speed internet and voice. Such solution enables a telecommunications service provider to significantly enhance revenue, margins with a very high rate of return as compared to the traditional economics for delivery of telephone voice services only. In addition, Teleco's around the world are under increased pressure to delivery multiple converged services in order to retain their

traditional telephone voice customers. The TV+ solution may be used in combination with any vendors set top box designed for the delivery of IP TV and the DSLAM's of all major vendors. The solution allows a service provider to start small and test its take rate among customers with a maximum of flexibility of design, features and cost allowing it to enter the market for converged services to its customers on an optimal basis.

mPhase has transformed itself from a developer of closed end proprietary technology for the delivery of TV over DSL to a Company that has developed a carrier class middleware/software solution for the delivery of IP TV using a standards-based platform designed to provide telecommunications with maximum flexibility in system configuration with components from all major vendors. mPhase is continuing in the development of a next generation set top box designed to further enhance its IP TV+ solution and to be used as a stand alone product. mPhase's current IPTV solution is designed to be used over fiber, coax and copper or any combination thereof currently deployed by a telecommunications service provider. In addition our IPTV solution may be used with other telecommunications transport technology such as Multicast Routers instead of DSLAM's for the delivery of voice, data and IPTV.

mPhase DSL Component Products. mPhase is currently seeking to use the combination of capabilities of Microphase and Janifast Ltd. to develop a new line of customer premises splitters for VDSL (Very Fast DSL) to address what appears to be a new and evolving market in DSL components.

Nanotechnology

Effective February 3, 2004, mPhase has entered into a Development Agreement with Lucent Technologies, Inc. to commercialize the use of nano power cell technology. The initial agreement was for a 12 month period of exploratory development at the cost of \$100,000 per month of a new form of power cell having a shelf life far in excess of conventional battery technology. In March of 2005 the Company extended such Agreement for another 12 months at the cost of \$100,000 per month to continue development of the nano power cell product. We believe that this arrangement with the Bell Labs division of Lucent will give mPhase the opportunity to develop and offer breakthrough battery technology and other potential applications, initially to the government market for defense and homeland security and ultimately to the commercial market. It is anticipated that the initial applications for nano power cells will address the need to supply emergency and reserve power to a broad range of products for the defense department.

The Company believes that its entry into this new field of high technology growth will provide product diversification without negatively affecting its focus upon its traditional products aimed at delivery of Television over DSL. The Company developed a lab prototype of its first nano power cell product that was completed in the second quarter of fiscal year 2005. The Company is unable, at this time, to predict when significant commercialization and material revenues will be derived from its entry into the NanoTechnology business.

On March 10, 2005 the Company announced an agreement with the Bell Labs research and development arm of Lucent Technologies, Inc. to co develop using the science of nanotechnology and commercialize uncooled magnetic ultra-sensitive sensors for a host of defense and civilian applications. The sensors, technically referred to as magnetometers, are based upon Micro Electro Mechanical Systems (MEMS) using designs based upon fundamental breakthroughs made in the past few years at Bell Labs as part of the New Jersey Nanotechnology Consortium. Initial tests of these MEMS magnetometers indicate sensitivities 1000 times those achieved in presently available uncooled magnetometers. Such devices are designed to create a new generation of ultra sensitive magnetic field sensors that will enable military combatants to detect with greater accuracy and range hostile military forces. Commercial applications may include inexpensive navigational components for mobile phones to sensing devices for identification used in homeland security products, as well as sensors used in diagnostic systems for detection of metal fatigue for numerous industrial applications.

In April of 2006, the Company extended its Development Agreements with the Bell Labs division of Lucent Technologies, Inc for its battery product and magnetometer through February of 2007 and March of 2007 respectively at a cost of \$100,000 per month.

Nano Battery:

mPhase Technologies along with its partner Lucent/Bell Labs, has been jointly conducting research since February 2004 that demonstrates control and manipulation of fluids on superhydrophobic surfaces to create power cells by controlling wetting behavior of electrolyte on nanostructured electrode surfaces. The scientific research conducted this year has set the groundwork for continued exploration in the development of intelligent nanotechnology power cells (nano-batteries), and forms a path to commercialization of the technology for a broad range of market opportunities. During the first half of 2005 the battery team has been testing modifications and enhancements to the internal design of the battery to optimize its power and energy density characteristics, as well as making engineering improvements that will assist in making the battery easier to manufacture when the project reaches that level of maturity.

In June of 2005 the battery project was expanded to include a joint technical development effort through December 2005 between mPhase and Rutgers University to potentially incorporate a Lithium based design. This work program has initially started as a modest technology effort to help characterize and test the nano battery design using Lithium chemistry to determine if the current design is capable of supporting the lithium based chemistry. Based on the results of the testing with Rutgers University, mPhase may decide to accelerate the work effort.

Magnetometer:

In February 2005 mPhase and Lucent Technologies' Bell Laboratories entered into a joint effort to develop an extremely sensitive magnetometer. Magnetometers can be used in a wide range of applications that include military surveillance, securing the retail environment, automotive sensors and actuators, industrial processing, medical imaging, scientific measurements, detection of mineral deposits and even air and space exploration. In sensor networks ultra-sensitive magnetometers can be used, for example, to detect and accurately pinpoint battlefield objects or they might also be used to study the workings of the human brain.

Magnetometers work by sensing changes in magnetic fields due to the motion of magnetic objects or changes in electrical currents generated by those objects. The magnetometer detects these objects by measuring time-varying magnetic signals that are superimposed on the combination of earth's background field (used to orient compasses) and static magnetic fields due to nearby magnetic objects.

Highly Sensitive Magnetometers - The enhanced sensitivity of these devices results from two scientific advances recently made by researchers at Lucent Bell Labs. Presently, the highest sensitivity magnetometers commercially available require cooling to cryogenic temperatures. Called SQUIDS (for Superconducting Quantum Interference Devices) these devices only work at the temperature where liquid helium boils, -455 degrees below zero Fahrenheit, making such magnetometers expensive and bulky and therefore ill-suited for remote-sensing applications. Room temperature magnetometers, on the other hand, are less sensitive, and use technology that was developed in World War II for detecting submarines.

The new technology being developed by Bell Labs and mPhase employs a number of different designs based on Micro-Mechanical Systems (MEMS). These designs use the very high "Quality Factor (Q)" of the mechanical resonance in single crystals of silicon. A resonance is similar to the fundamental frequency of a tuning fork. When tapped, a tuning fork will vibrate for a length of time inversely proportional to the internal friction of vibration within the metal of the tuning fork. A comparable tuning fork made from single crystal silicon, which has less internal friction than the hardest metal, will vibrate almost a thousand times longer. Based on this principal, a device employing a high Q resonator will have enhanced amplitude of vibration at the resonance frequency, and hence will display a greater sensitivity to external perturbations that affect its resonance frequency. By coupling the mechanical motion of a bar or a paddle constructed from silicon to the ambient magnetic field, this high mechanical sensitivity can be converted to high magnetic field sensitivity. The technical approach that the team is developing can be achieved either statically with an integrated magnetic film, or dynamically through motion of the silicon bar or paddle.

The Benefits of MEMS - Commercial magnetometers using purely electronic detection, such as Hall, magneto-resistance or flux-gate devices, have sensitivities limited by their electronic Q-factor. This Q-factor depends on the natural electrical resistance, or electronic friction, of the metal in the circuit. For room-temperature operations it is therefore difficult to reduce the electrical Q-factor. Mechanical resonators made from semiconductor-grade silicon, on the other hand, exhibit mechanical Q-factors, approaching 100,000 at room temperature. In all, these new, smaller and less costly magnetometers should be 100-1000 times more sensitive than existing commercial devices, thus enabling a new class of sensor systems that mPhase plans on commercializing.

The mPhase and Lucent magnetometer team has successfully reached an early milestone and have produced a number MEM based sensor samples from the clean room facilities and are working on integrating them into the surrounding electronic circuitry so that measurement, characterization and sensitivity testing can be conducted.

Revenues. To date, all material revenues have been generated from sales of the POTS Splitter Shelves and other DSL component products to a small number of telecommunications companies. mPhase believes that future revenues are difficult to predict because of "the length and variability of the commercial roll-out of the IPTV to various telecommunications service providers and (ii) the Company's recent entry into the NanoTechnology business. Since the Company believes that there may be a significant international market for its TV+ IPTV solution involving many different countries, with different regulations, certifications and commercial practices than the United States, future revenues are highly subject to the changing variables and uncertainties. Additionally, the recent instability of the telecommunications market evidenced by reduction in capital spending across the whole in the telecom sector contributes to our difficulty in accurately predicting future revenues.

Cost of revenues. The costs necessary to generate revenues from the sale of POTS Splitter Shelves and other related DSL component products include direct material, labor and manufacturing. mPhase paid these costs to Janifast Ltd., which has facilities in the People's Republic of China and is owned by and managed by certain senior executives of the Company. The cost of revenues also includes certain royalties paid to Microphase Corporation, a privately held corporation organized in 1955, which shares certain common management with the Company and is majority-owned by a director of mPhase. Costs for future production of the TV + Platform will consist primarily of payments to manufacturers to acquire the necessary components and assemble the product including Lucent Technologies Inc.,

Espial Group and Magpie Telecom Insiders, Inc.

Research and development. Research and development expenses consist principally of the payments made to Microphase and Lucent, respectively, for development of the Broadband Loop Watch, the TV+ IPTV solution and nanotechnology products respectively. The IPTV+ solution consists primarily of middleware/software designed for the delivery of feature rich, carrier class, broadcast TV, high speed internet and voice by telecommunications service providers open using standards based equipment and transport configurations. All research and development costs are expensed as incurred.

General and administrative. Selling, general and administrative expenses consist primarily of salaries and related expenses for personnel engaged in direct marketing of the TV+ solution for IPTV, POTS Splitter Shelves, the Broadband Loop Watch "intelligent pots splitter" diagnostic product and other DSL component products, as well as support functions including executive, legal and accounting personnel. Certain administrative activities are outsourced on a monthly fee basis to Microphase and mPhase leases its principal office in Norwalk, Connecticut from Microphase.

Non-Cash compensation charges. The Company makes extensive use of stock options and warrants as a form of compensation to employees, directors and outside consultants. We incurred non-cash compensation charges totaling \$59,764,748 from inception (October 2, 1996) through September 30, 2006, of which \$2,318,519 was included in research and development expenses and \$57,050,170 was included in general and administrative expenses.

General and administrative. Selling, general and administrative expenses consist primarily of salaries and related expenses for personnel engaged in direct marketing of the TV+, the POTS Splitter Shelves and other DSL component products and Nanotechnology battery product, as well as support functions including executive, legal and accounting personnel. Certain administrative activities are outsourced on a monthly fee basis to Microphase Corporation. Finally, mPhase leases the principal office from Microphase Corporation. From inception (October 2, 1996) through September 30, 2006 the Company has incurred cumulative (a) development stage losses of \$155,418,059, and (b) negative cash flow from operations of \$70,022,378. The auditors report for the fiscal year ended June 30, 2006 includes the statement that "there is substantial doubt of the Company's ability to continue as a going concern". Management estimates that the Company needs to raise approximately 10,000,000 during the next 12 months to continue its present level of operations. As of September 30, 2006, the Company had a negative net worth of (\$2,741,716) compared to a negative net worth of (\$606,085) as of June 30, 2006 as a result of continuing net losses incurred after June 30, 2006.

The Company believes that significant deployments and resulting revenues from the deployment of the TV+ are not expected until fiscal year 2007. The Company further believes that an increase in capital expenditures in the telecommunications industry will also increase sales and improve the Company's margins as well as increase the probability that the Company will attain profitability. The Company does not expect to derive any material revenue from its Nanotechnology product development until fiscal year 2008

THREE MONTHS ENDED September 30, 2006 VS. September 30, 2005

REVENUE

Total revenues were \$105,846 for the three months ended September 30, 2006 compared to \$380,594 for the three months ended September 30, 2005. The decrease was primarily attributable to a decreased demand of the Company's POTS Splitter product line. The Company continues to believe that its line of POTS Splitter products is positioned to be competitively priced with high reliability and connectivity, and as such has the potential to be a part of continuing DSL deployment worldwide. The Company cannot predict when a new upturn in sales of its POTS Splitter product might begin. The revenue was primarily from one customer, Covad Communications.

COST OF REVENUES

Cost of sales was \$85,390 for the three months ended September 30, 2006 as compared to \$337,973 in the comparable prior period in 2005, representing 81% of gross revenues for the quarter ended September 30, 2006 and 88% for the quarter ended September 30, 2005, respectively. Our margins have contracted dramatically over the past three years as spending among the telecommunications providers has contracted, coupled with downward pressures related to the supply and demand of telecommunications products.

RESEARCH AND DEVELOPMENT

Research and development expenses were \$1,990,313 for the three months ended September 30, 2006 as compared to \$1,861,420 during the comparable period in 2005 or an increase of \$128,893. This consists of increased spending in development and testing of Release 3.0 of the TV+ product, testing and deployment for a Russia telecommunications provider and exploratory development activity of the new magnetometer as well as the power cell products using the science of Nanotechnology. Both areas represent activities contracted through Lucent Technologies and other vendors such as Magpie, Latens, Velankani, and Espial and managed by mPhase.

The Company expects continued increases in research and development costs throughout fiscal year 2007 as the Company continues and expands its development through Lucent Technologies, Inc of the Nanotechnology product lines. In order to broaden and diversify its current line of business into additional high growth technology areas, the Company plans to continue its development efforts with the Bell labs division of Lucent Technologies, Inc. to commercialize the use of nano power cell technology. Lucent/ Bell Labs is developing for mPhase micro-power source arrays fabricated using nanotextured, superhydrophobic materials. This new business arrangement with Lucent Bell Labs will give mPhase the opportunity to develop and offer breakthrough battery technology applications, initially to government market segments including defense and homeland security, and ultimately to the commercial market. The initial applications for the nano power cell technology will address the need to supply emergency and reserved power to a wide range of electronic devices for the defense department. In addition the Company plans to continue its research and development efforts with respect to the magnetometer product line using the science of Nanotechnology.

Research expenditures incurred with Microphase were related to the continuing development of the company's DSL component products, including the Company's line of pots splitters and microfilters and the company's newest products, the *ipots(tm)* and the mPhase stretch. We believe the Broadband Watch product that enables telcos to remotely and cost-effectively perform loop management and maintenance including line testing, qualification and troubleshooting provides a much needed solution to achieve greater cost efficiencies for the deployment of telecommunications products.. Prior to the introduction of such product, loop management could not be remotely performed through a conventional pots splitter without manual intervention. The unique (patent pending) Broadband Watch circuit allows most test heads to perform both narrow and wideband testing of the local loop through the central office pots splitter without having to physically disconnect the pots splitter, thereby eliminating the need to dispatch personnel and a truckroll.

SELLING GENERAL AND ADMINISTRATIVE EXPENSES

Selling, general and administrative (SG&A) expenses were \$1,961,832 for the three months ending September 30, 2006 up from \$1,092,292 or an increase of \$869,540 from the comparable period in 2005. The increase in SG&A expense is primarily the result of non-cash charges relating to the issues of common stock and options to employees and consultants. During the quarter ended September 30, 2006 the Company recorded \$693,371 of such expense versus \$99,000 in the comparable quarter on 2005, Additionally, the Company experienced higher levels of marketing, payroll, and legal expense which increased by approximately \$93,000, \$75,000 and \$80,000 respectively. Travel expenses decreased modestly by \$47,000. We expect sales and travel expenses to grow as the Company approaches the deployment of its TV+ products in the future.

DEPRECIATION AND AMORTIZATION

Total Depreciation and Amortization including that related to research and development equipment amounted to \$54,728 for the three months ended September 30, 2006 as compared to \$38,151 for the three months ended September 30 2005. A total of \$32,829 and \$17,882 of such depreciation was allocated to research and development for the three months ended September 30, 2006 and 2005 respectively. The increase is a result of increased outlays for capital expenditures over the previous year. We expect to increase capital expenditures in connection with the deployment of equipment at test sites with various telecommunications service providers globally as deployment of our TV+ product progresses.

NET LOSS

The Company recorded a net loss of \$3,958,002 for the three months ended September 30, 2006 as compared to a loss of \$2,957,536 for the three months ended September 30, 2005. This represents a loss per common share of \$.01 for the three month period ended September 30, 2006 as compared to a loss per common share of \$.02 for the three months ending September 30, 2005; based upon weighted average common shares outstanding of 282,306,237 and 152,291,645 respectively. Approximately \$693,372 of the increase in the Company's net loss was the result of non-cash stock based compensation to employees and consultants.

The Company believes the initial major deployments and the resultant revenues of its Flagship product, the TV+ platform, are not expected until the third quarter of fiscal year 2007, which along with any upturn of spending in the telephone industry will also increase sales, and improve the Company's margins and provide the Company with the opportunity to attain profitability.

CRITICAL ACCOUNTING POLICIES

REVENUE RECOGNITION

All revenue included in the accompanying consolidated statements of operations for all periods presented relates to sales of mPhase's POTS Splitter Shelves and DSL component products.

As required, mPhase has adopted the Securities and Exchange Commission ("SEC") Staff Accounting Bulletin ("SAB") No. 101, "Revenue Recognition in Financial Statements", which provides guidelines on applying generally

accepted accounting principals to revenue recognition based upon the interpretations and practices of the SEC. The Company recognizes revenue for its POTS Splitter Shelf and Other DSL component products at the time of shipment, at which time, no other significant obligations of the Company exist, other than normal warranty support.

RESEARCH AND DEVELOPMENT

Research and development costs are charged to operations as incurred in accordance with Statement of Financial Accounting Standards ("SFAS"), No.2, "Accounting for Research and Development Cost."

INCOME TAXES

mPhase accounts for income taxes using the asset and liability method in accordance with SFAS No.109 "Accounting for Income Taxes." Under this method, deferred tax assets and liabilities are measured using currently enacted tax rates. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in results of operations in the period that includes the enactment date. Because of the uncertainty as to their future realizability, net deferred tax assets, consisting primarily of net operating loss carry forwards, have been fully reserved for. Accordingly, no income tax benefit for the net operating loss has been recorded in the accompanying financial statements.

Utilization of net operating losses generated through June 30, 2006 may be limited due to "changes in control" of our common stock that occurred.

STOCK-BASED COMPENSATION

On July 1, 2005, the Company adopted the provisions of Financial Accounting Standards Board Statement No. 123R, "Share-Based Payment" (SFAS 123R). SFAS 123R revised SFAS 123, "Accounting for Stock Based Compensation" and supersedes APB Opinion No. 25, "Accounting for Stock Issued to Employees." SFAS 123R requires companies to measure and recognize compensation expense for all employee stock-based payments at fair value over the service period underlying the arrangement. Therefore, the Company is now required to record the grant-date fair value of its stock-based payments (i.e., stock options and other equity-based compensation) in the statement of operations. The Company adopted FAS 123R using the "modified prospective" method, whereby fair value of all previously-granted employee stock-based arrangements that remained unvested at July 1, 2005 and all grants made on or after July 1, 2005 have been included in the Company's determination of stock-based compensation expense for the three September 30, 2006. The Company has not restated its operating results for any period prior to July 1, 2005.

INVENTORY RESERVE AND VALUATION ALLOWANCE

The Company carries its inventory at the lower of cost, determined on a first in, first out basis, or market. Inventory consists mainly of the Company's POTS Splitter Shelf and Filters. In determining the lower of cost or market, the Company periodically reviews and estimates a valuation allowance to reserve for technical obsolescence and marketability. The allowance represents management's assessment and reserve for the technical obsolescence based upon the inter-operability of its component products, primarily filters and splitters, with presently deployed and next generation DSL infrastructures as well as a reserve for marketability based upon current prices and the overall demand for the individual inventory items. Material changes in either the technical standards of future DSL deployments or further erosion in the demand for deployments of DSL infrastructures could affect the estimates and assumptions resulting in the amounts reported.

MATERIAL RELATED PARTY TRANSACTIONS

MICROPHASE CORPORATION

mPhase's President, Chief Operating Officer and Chairman of the Board of the Company are also officers of Microphase and mPhase's president and chairman of the board are shareholders of Microphase. On May 1, 1997, the Company entered into an agreement with Microphase, whereby it will use office space as well as the administrative services of Microphase, including the use of accounting personnel. This agreement was for \$5,000 per month and was on a month-to-month basis. In July 1998, the office space agreement was revised to \$10,000, in January 2000 to \$11,050 per month, in July 2001 to \$11,340 per month, in July 2002 to \$12,200 per month, in January 2003 to \$10,000 per month, and in July 2003 to \$18,000 per month. Additionally, in July 1998, mPhase entered into an agreement with Microphase, whereby mPhase reimburses Microphase \$40,000 per month for technical research and development. In January 2003 the technical research and development agreement was revised to \$20,000 per month, and in July 2003 it was further revised to \$5,000 per month for technical and research development, \$5,000 per month for administrative services and \$5,000 per month under the office space agreement. Beginning July 1, 2006, billings for all of the above services have been \$5,000 per month

Microphase also charges fees for specific projects on a project-by-project basis. During the three months ended September 30, 2005 and 2006 and from inception (October 2, 1996) to September 30, 2006, \$90,984, \$56,339 and \$8,727,115 respectively, have been charged to expense.

As a result of the foregoing transactions as of September 30, 2006 the Company had a \$57,240 payable to Microphase.

JANIFAST LTD.

The Company purchases products and incurs certain research and development expenses with Janifast Ltd., which is owned by U.S. Janifast Holdings, Ltd., a company in which three directors of mPhase are significant shareholders and one is an officer, in connection with the manufacturing of POTS Splitter shelves and component products including cards and filters sold by the Company.

During the three months ended September 30, 2005 and 2006 and the period from inception (October 2, 1996) to September 30, 2006, \$215,974, \$134,115 and \$16,031,211 respectively have been charged by Janifast to inventory or is included in operating expenses in the accompanying statements of operations.

As a result of the foregoing transactions as of September 30, 2006, the Company had \$98,082 payable to Janifast, which is included in amounts due to related parties in the accompanying balance sheet. Additionally, at September 30, 2006, there were no undelivered purchase orders outstanding to Janifast Ltd.

OTHER RELATED PARTIES

On August 30, 2004, the Company paid \$100,000 in cash to Piper Rudnick LLP, outside legal counsel to the Company as part of a renegotiated settlement agreement that was originally effective as of March 31, 2002. The Company was in arrears with respect to payments due under the original settlement agreement and as part of the renegotiated agreement agreed to make the following payments:

a. \$25,000 on each of December 1, 2004, March 1, 2005, June 1, 2005, September 1, 2005 and a \$50,000 payment on December 1, 2005. Thereafter the Company was obligated to pay \$25,000 on each of March 1, 2006, June 1, 2006, and September 1, 2006 with a final payment of \$75,000 on December 1, 2006.

b. The Company also delivered a 5 year cashless warrant to purchase \$150,000 worth of common stock at \$.25 per share. The warrant was valued pursuant to EITF 96-18, the ascribed value of the warrant minus the debt cancelled resulting loss of \$40,500.

As of September 30, 2006, the Company has made each payment owed to Piper Rudnick LLP, except for the \$25,000 payment due September 1, 2006.

Mr. Abraham Biderman was employed until September 30, 2003 by our former investment-banking firm Lipper & Company. During the three months ended September 30, 2006, Mr. Biderman's affiliated firm of Palladium Capital Advisors received a finder's fee of \$100,000.

In addition during the quarter ended September 30, 2006 Messrs, Durando, Dotoli and Smiley have provided \$300,000 in bridge loans to the Company which is evidenced by 3 individual promissory notes in the face amount of \$101,000. Subsequently, Messrs Dotoli and Mr. Smiley have extended additional bridge loans to the Company of \$70,000 and \$30,000 respectively, evidenced by promissory notes with a 12% rate of interest. All of the foregoing promissory notes are payable on demand.

The following table summarizes all related party expenses during the quarter ended September 30, 2006

Summary of Compensation to Related Parties

	Durando	Dotoli	Ergul	Biderman	Smiley	Guerino	Lawrence	Janifast	Microphase	TOTAL RELATED
Consulting / Salary	\$98,400	\$70,500			\$50,000					\$218,900
Directors Stipend	\$3,750	\$3,750	\$3,750	\$3,750	\$3,750	\$3,750	\$3,750			\$26,250

Totals	\$298,150	\$200,250	\$66,750	\$12,150	\$109,750	\$3,750	\$3,750	\$134,115	\$56,339	\$885,004

LIQUIDITY AND CAPITAL RESOURCES

At September 30, 2006 mPhase had a working capital deficit of \$3,176, 745 as compared to working capital deficit of \$1,093,784 at June 30, 2006. Through September 30, 2006, the Company had incurred development stage losses totaling approximately \$155,418,059. At September 30, 2006, the Company had \$149 of cash, cash equivalents and \$2,140 of trade receivables to fund short-term working capital requirements. The Company's ability to continue as a going concern and its future success is dependent upon its ability to raise capital in the near term to: (1) satisfy its current obligations, (2) continue its research and development efforts, and (3) the successful wide scale development, deployment and marketing of its products.

Historically, mPhase has funded its operations and capital expenditures primarily through private placements of common stock. Management expects that its ongoing financial needs will be provided by financing activities and believes that the sales of its line of POTS Splitter products and other related DSL component products will provide some offset to cash flow used in operations, although there can be no assurance as to the level and growth rate of such

sales in future periods as seen with quarter to quarter fluctuations in component sales.

Cash used in operating activities was \$2,764,718 during the three months ending September 30, 2006. The cash used by operating activities principally consists of the net loss and significant changes in assets and liabilities, including cash generated by increasing accounts payable by \$679,048 offset by decreased accrued expenses by approximately \$215,528 and by adjusting for non-cash charges of \$693,371 for common stock options and warrants issued for services.

The Company has from time to time negotiated the conversion of liabilities into shares of the Company's common stock. Significant transactions of this kind are summarized below:

-

Effective June 30, 2001 the Company converted \$2,420,039 of liabilities due to directors and related parties into 4,840,077 shares of the Company's common stock pursuant to debt conversion agreements.

-

During the fiscal year ended June 30, 2002 certain strategic vendors and related parties converted approximately \$2.7 million of accounts payable and accrued expenses into 7,492,996 shares of the Company's common stock and 5,953,490 warrants. Such vendors include Microphase Corporation, Janifast, Ltd., and Piper Rudnick LLP, mPhase's outside counsel.

-

During the twelve months ending June 30, 2003, certain strategic vendors and related parties converted approximately \$1.9 million of accounts payable and accrued expenses into 5,923,333 shares of the Company's common stock and warrants to purchase 3,706,800 shares of common stock of mPhase.

-

During the twelve months ending June 30, 2004, certain strategic vendors and related parties converted approximately \$1.9 million of accounts payable and accrued expenses into 110,467 shares of the Company's common stock and warrants to purchase 5,069,242 shares of common stock of mPhase.

-

During the twelve months ending June 30, 2005, certain strategic vendors and related parties converted approximately \$1.2 million of accounts payable and accrued expenses into 3,895,171 shares of the Company's common stock and warrants to purchase 4,616,571 shares of the Company's common stock.

-

During the twelve months ending June 30, 2006 certain strategic vendors and related parties converted approximately \$590,000 of accounts payable and accrued expenses into 3,336,864 shares of the Company's common stock

and warrants to purchase 3,277,778 shares of common stock of mPhase.

18

The Company is obligated to make payments of \$100,000 per month through February 2007 under a Development Agreement with Lucent Technologies covering the development of its new battery and is also obligated to make payments of \$100,000 per month through February 2007 under an additional Development Agreement with Lucent covering the development of a Magnetometer. Both products are being developed through the science of Nanotechnology. In general, Lucent will develop for mPhase micro-power source arrays fabricated using nanotextured, superhydrophobic materials. This business arrangement with Lucent will give mPhase the opportunity to develop and offer breakthrough battery technology applications, initially to government market segments including defense and homeland security, and ultimately to the commercial market. The initial applications for the nano power cell technology will address the need to supply emergency and reserved power to a wide range of electronic devices for the defense department.

Other significant contractual obligations require the Company to pay Magpie Telecom Insiders Inc, certain amounts related to the successful development of its TV+ product. This contract requires a payment of a \$60,000 monthly relationship fee plus \$135,000 per achievement of specified milestones. This contract expires in January 2007.

In addition, the Company has an agreement with Velankani Information Systems to further develop its TV+ product. This agreement requires the Company to pay approximately \$98,000 per month until January 2007.

LOSSES DURING THE DEVELOPMENT STAGE AND MANAGEMENT'S PLANS

From inception (October 2, 1996) through September 30, 2006 the Company had incurred development stage losses and has an accumulated deficit of approximately \$155,418,059 and a stockholders' equity (deficit) of (\$2,741,716). For the three months ended September 30, 2006, and from inception through September 30, 2006 respectively, the Company had negative cash flow from operations of \$2,764,718 and \$70,022,378 respectively. The report of the Company's outside auditors, Rosenberg, Rich, Baker, Berman and Company with respect to its latest audited 10K/A for the fiscal year ended June 30, 2006 stated that "there is substantial doubt of the Company's ability to continue as a going concern".

We continue our efforts to raise additional funds through private placements of our common stock and strategic alliances, the proceeds of which are required to fund continuing expenditures and the controlled development stage rollout of our TV+. However, there can be no assurance that mPhase will generate sufficient revenues to provide positive cash flows from operations or that sufficient capital will be available, when needed or at terms that we deem to be reasonable.

We have evaluated our cash requirements for the remainder of fiscal year 2007 based upon certain assumptions, including our ability to raise additional financing and increased sales of our POTS Splitter, Broadband Watch and TV+ products. The Company anticipates that it will need to raise, at a minimum, approximately \$10 million primarily in private placement of its common stock with accredited investors, during the next 12 months, or alternatively we will need to curtail certain expenses as incurred at the present levels including marketing and research and development expenses. Additional investments in development of the TV+ and Nanotechnology battery products will be required in the next 12 months.

Should these cash flows not be available to us, we believe we would have the ability to revise our operating plan and make certain further reductions in expenses, so that our resources which were available at September 30, 2006, plus financing to be secured during the balance of fiscal year 2007, and expected POTS splitter revenues, will be sufficient to meet our obligations through the end of fiscal year 2007. We have continued to experience operating losses and negative cash flows. To date, we have funded our operations with a combination of component sales, debt conversions with related parties and strategic vendors, and private equity offerings. Management believes that additional equity arrangements will provide adequate funding operations through our next fiscal year. However, failure to raise additional funds, or generate significant cash flows through revenues, could have a material adverse effect on our ability to achieve our intended business objectives.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is not exposed to changes in interest rates as the Company has no debt arrangements and no investments in certain held-to-maturity securities. Under our current policies, we do not use interest rate derivative instruments to manage exposure to interest rate changes. A hypothetical 100 basis point adverse move in interest rates along the entire interest rate yield curve would not materially affect the fair value of any financial instruments at September 30, 2006.

ITEM 4. CONTROLS AND PROCEDURES

Under the supervision and with the participation of management including the Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-14c and of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that these disclosure controls and procedures are effective. There were no changes in our internal control over financial reporting during the quarter ended September 30, 2006 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

mPhase was advised in April 2002 that following an investigation by the staff of the Securities and Exchange Commission, the staff intended to recommend that the Commission file a civil injunctive action against Packetport.com, Inc. ("Packetport") and its Officer's and Directors. Such recommendation related to alleged civil violations by Packetport and such Officers and Directors of various sections of the Federal Securities Laws. The staff has alleged civil violations of Sections 5 and 17(a) of the Securities Act of 1933 and Sections 10(b) and 13(d) of the Securities Exchange Act of 1934. mPhase's directors and officers also serve as directors and officers of Packetport. On November 15, 2005, a civil enforcement action was filed in Federal District Court against Microphase Corporation and the CEO and COO of mPhase corporation. mPhase is not named as a party in connection with this matter. As noted in other public filings of mPhase, the CEO and COO of mPhase as well as Packetport continue to deny any wrongdoing in connection with the Civil Action filed and intend to vigorously defend any and all counts set forth in such action.

From time to time mPhase may be involved in various legal proceedings and other matters arising in the normal course of business.

ITEM 2. CHANGES IN SECURITIES

During the quarter ended September 30, 2006, the Company issued 6,780,716 shares of its common stock together with 5,555,556 of 5 year warrants to purchase one share each of the Company's common stock, with an exercise price of \$.18 per share in private placements generating net proceeds of \$1,104,000.

Also during the quarter ended September 30, 2006, the Company issued 138,889 shares of its common stock pursuant to the exercise of warrants, generating net proceeds of \$25,000 to the Company. In August 2006 the Company authorized the issuance of 3,310,000 options to employees and officers for the right to purchase a like amount of common shares. Pursuant to the adoption of FAS 123(R), the Company recognized an expense in the amount of \$463,400, all of which has been included in general and administrative expense. The fair value of options granted were estimated as of the date of grant using the Black-Scholes stock option pricing model, based on the following weighted average assumptions: annual expected return of 0%, annual volatility of 95.6%, based on a risk-free interest rate of 4.7% and expected option life of 3 years.

During the quarter ended Sept 30, 2006, the Board of Directors authorized the issuance of 1,220,900 shares of common stock to certain consultants. The stock value ranged from \$.17 to \$.20 per share, the fair value on the date of the awards.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K

EXHIBITS.

31.1 Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes - Oxley Act of 2002. 31.2
