("Gold Fields" or the "Company")

Announcement of the closing date of the offer to acquire the entire issued share capital of Western Areas Limited, finalization of the offer consideration and no increase to offer consideration.

1. Introduction

On 11 September 2006 Gold Fields issued an announcement detailing the terms of the offer by Gold Fields to acquire the entire issued share capital of Western Areas Limited ("Western Areas") (other than those shares already held by Gold Fields and JCI Limited (together with its subsidiaries "JCI"))("the offer").

2. Terms of the offer

In terms of the offer, the consideration payable is 35 ordinary shares in Gold Fields ("Gold Fields shares") for every 100 ordinary shares held in Western Areas ("Western Areas shares"). Western Areas shareholders were advised on 23 November 2006 that the only remaining condition precedent to the offer had been fulfilled.

3. No increase to the offer

Western Areas shareholders are advised that Gold Fields will not be increasing the offer of 35 ordinary Gold Fields shares for every 100 ordinary shares held in Western Areas.

4. Closing date of the offer

Shareholders are advised that as at 17:00 on 7 December 2006, valid acceptances of the offer have been received in respect of a total of 56,445,831 Western Areas shares (66% of the offer shares). Combined with the 66,122,050 Western Areas shares already held by Gold Fields, these shares will give Gold Fields an effective voting interest of 75.8 % in Western Areas.

5. The Western Areas Derivative Structure

It has been public knowledge for some time that in 2001 Western Areas entered into a long-dated derivative structure (“the derivative structure”) in respect of gold production from South Deep. Under the terms of the derivative structure a change in control of Western Areas without the consent of the derivative counterparties constitutes an event of default by Western Areas which may entitle the counterparties to close out the positions under the derivative structure. The latest available published marked to market value on a close out of the derivative structure including the deferred premium is negative R3.88 billion.

In anticipation of acquiring control of Western Areas, Gold Fields took the following actions:

(a) requested Western Areas to seek the consent of the three derivative counterparties to the change of control;

(b) reached an agreement with two of the counterparties namely Investec Bank Limited (“Investec”) and Barclays Bank PLC (“Barclays”) (Barclays having recently acquired one of the previous counterparties position under the derivative structure) and hence thereby becoming a SAT participant the salient principles of which are that they would vote in favour of waiving such change of control and that they will not, provided Gold Fields retains control of Western Areas for a period commencing on 7 December 2006 and terminating on the first anniversary of the date on which Gold Fields acquires control of Western Areas vote in favour of any exercise of any of their rights following any event of default or termination event whether pre-existing or not and will not exercise such rights.

Barclays and Investec confirmed that they had sufficient votes between them in terms of the derivative structure to secure the required majority to agree to the change of control and to agree not to exercise their rights subject to the terms outlined in this release. Accordingly Western Areas has now been notified that the consent has been granted.

(c) In consideration for these undertakings Gold Fields has agreed that it will subject to acquiring control of Western Areas and subject further to any necessary regulatory approvals it may require to do so, fund (and/or procure one or more third parties to fund) any cashflow shortfalls of Western Areas that arise during the 12 month period commencing on the date upon which Gold Fields acquires control of Western Areas which result from the conduct by Western Areas of its current business in the ordinary course including, without limitation, the incurral of operating and capital expenditure, the payment of taxes, and the performance of scheduled delivery and payment obligations under the derivative structure but expressly excluding any cashflow shortfalls of Western Areas which result from the exercise by any of the counterparties of any rights against Western Areas following any Event of Default or Termination Event under the derivative structure whether as a result of a Change of Control Event or otherwise and/or the exercise against Western Areas by any of the counterparties of any similar rights in respect of any other liability or borrowing of Western Areas. The terms upon which Gold Fields will fund or procure funding for Western Areas will have to be agreed with the Board of Western Areas.

Shareholders will be advised in due course of further developments.
