Harmony Gold Mining Company Limited Production results for the three months ended 30 September 2016
Q1 FY17

FOR THE THREE MONTHS ENDED
30 SEPTEMBER 2016

1. OVERVIEW

We had a very good start to the new financial year, with increased production, even stronger cash flows and a quarter in which we returned

money to shareholders by way of a dividend.

In support of our strategy to grow and improve the quality of our gold ounces, we acquired the other half of the Hidden Valley mine in Papua

New Guinea (PNG) and submitted the special mining lease application in support of the Golpu project.

We recorded our highest ever quarterly revenue of R5.25 billion, a 9% increase quarter on quarter (16% increase to US\$374 million).

The operations generated positive free cash flow of R850 million (US\$60 million), allowing us to reduce net debt by 51% from R1 083 million

to R528 million (reduced by 49% from US\$74 million to US\$38 million), after paying a dividend of R218 million (US\$16 million).

2. SAFETY AND HEALTH

We are committed to creating a culture where safety and health is our first priority. Despite our combined efforts, two of our colleagues tragically

lost their lives in mine related accidents.

The causes of all accidents are investigated and analysed thoroughly by our own safety personnel in conjunction with the authorities and

employee representatives, and lessons learned are rigorously applied.

We will persist with our safety training and awareness campaigns to ensure a safe working place.

PRODUCTION RESULTS

MESSAGE FROM THE CHIEF EXECUTIVE OFFICER

•

Received numerous industry safety awards
at 2016 MineSAFE ceremony

•

10% increase in gold production

•

Production profit of R1.4 billion
(US\$97 million)

•

R850 million (US\$60 million) free
operational cash flow

KEY FEATURES – QUARTER ON QUARTER

•

51% decrease in net debt from R1 083 million to R528 million
(49% decrease from US\$74 million to US\$38 million)

•

R5.25 billion recorded in revenue – highest ever (US\$374 million)

•

Currency and gold hedges realise R240 million (US\$17 million)
in profits

•

Acquired full ownership of Hidden Valley in PNG

Harmony Gold Mining Company Limited Production results for the three months ended 30 September 2016
MESSAGE FROM THE CHIEF EXECUTIVE OFFICER CONTINUED

As regards occupational lung diseases, the Silicosis Working Group, initiated by the gold mining companies, continues to work on a sustainable, all-inclusive and comprehensive solution for the current and legacy dilemmas. See www.oldcollab.co.za for more information.

During the quarter, three of Harmony's operating units – the Asset Management Forum, Kusasalethu and Kalgold – received awards for second, third and fourth places respectively in the Best Improved Safety Performance category at the 2016 MineSAFE awards ceremony. Another three business units – Joel, Bambanani, and Kalgold – came second, third and fourth respectively in the Best Safety Performance category. In addition, our health hubs healthcare model was awarded third place in the Medical/Wellness category.

3. OPERATIONAL RESULTS

Quarter on quarter gold production increased by 10% to 8 630kg compared to 7 880kg in the previous quarter. When comparing actual performance against planned performance, our operations performed in line with or exceeded their plans, with Target 1 being the only exception.

Underground recovered grade increased by 5.5% quarter on quarter to 5.01g/t. Development grades at all operations – except for Target 1 – are in line with expectations and support the expected grade in the life-of-mine plan. At Kusasalethu, better than expected grades were intersected during the quarter.

At Target 1, unstable ground conditions hampered further mining in the higher grade areas. Action plans include an increased focus on development to ensure that mining flexibility improves. Higher grade is only expected by the third quarter of the financial year. Cash operating costs for the September 2016 quarter increased by 12% quarter on quarter in Rand terms (19% increase in US dollar terms), mainly due to an increase in labour costs (bonuses and annual wage increases) and higher electricity costs (winter tariffs).

The all-in sustaining cost for the group remained stable with a 1% decrease to R516 116/kg (5% increase to US\$1 142/oz), despite the seasonal effect of winter electricity tariffs.

4. HEDGING ACTIVITY

Currency hedging

The foreign currency hedging is in the form of zero cost collars, which establish a minimum (floor) and maximum (cap) Rand/US dollar exchange rate at which to convert US dollars to Rands. The nominal value of the hedging contracts as at 30 September 2016 was US\$458 million. The hedging contracts are spread over a 12 month period, and are summarised as follows:

Q2FY17

3

Gold hedging

Gold hedging is in the form of short-term gold forward sale contracts with a maximum term of 24 months. The nominal value hedged at 30

September 2016 was 424 000 ounces, representing approximately 20% of our total production. The breakdown of gold forward sale contracts entered into are as follows:

During the September 2016 quarter (FY17 Q1), a gain of R57 million (US\$4 million) was realised on the contracts that matured.

5. GOLPU

An application for a special mining lease and associated ancillary tenements was lodged with the Mineral Resources Authority on 25 August 2016.

We continue to further research environmentally responsible options for a terrestrial tailings facility, and deep sea tailings placement options.

6. MINERAL AND PETROLEUM RESOURCES DEVELOPMENT BILL AND NEW DRAFT MINING CHARTER

Harmony continues to participate in discussions to influence the final outcome of the legislation applicable to its mining tenure.

7. ACQUISITION OF HIDDEN VALLEY

Harmony continuously investigates opportunities to increase its production and reserves. Its acquisition of Newcrest's 50% share in Hidden Valley

and the surrounding tenement package in PNG is in line with the company's overall aspiration to increase its annual production profile to 1.5Moz within three years. The transaction became unconditional on 25 October 2016. The mine has the potential to contribute approximately 180 000oz of gold per annum to Harmony's production profile, at an all-in sustaining cost of less than US\$950/oz once fully recommissioned. Hidden Valley has an attractive reserve (Au 1.4Moz, Ag 27Moz) with near certain extension within the current open pit resource (Au 4.9Moz, Ag 73Moz), an established quality management team, a stable workforce and strong community support. Harmony plans to invest and develop stages 5 and 6 of the mine initially, mining approximately 1.2Moz of gold and 18Moz of silver over a period of seven years. The capital investment required of up to US\$180 million – consisting of mine development, new equipment and infrastructure – is expected to be completed by the latter half of calendar 2018, after which, the operation will have an all-in sustaining cost of less than US\$950/oz based on current estimates.

Harmony Gold Mining Company Limited Production results for the three months ended 30 September 2016
With brownfields prospecting in tenements surrounding Hidden Valley, it is possible that production could continue for many more years with new and potentially small satellite mines delivering their ore to the Hidden Valley processing plant.

Prior to the full acquisition of Hidden Valley, budgets for FY17 had been based on the processing of lower grade stockpiles together with limited ore from Hamata, to be followed by the operation's entering care and maintenance. Following the acquisition in September 2016, the FY17 budget

for Hidden Valley was revised (applicable from October 2016 onwards) with the following key elements:

- Planned production at steady state of about 180 000oz of gold and 3Moz of silver

- Life-of-mine production of 1.2Moz gold and 18Moz of silver

- Recovered grade of 1.4g/t to 1.5g/t and silver at approximately 20g/t to 23g/t

- Milling rate of about 4Mt per annum

- Mining rate ramps up to 28Mt per annum

- Resume waste stripping at Stage 5

- Investment in additional and replacement mobile fleet

- Process stockpiles and Hamata ore to June 2017 followed by a five-month mill shut down

- Progress maintenance and upgrade projects planned during the shut down

- Recruit personnel to operate and maintain additional fleet trucks

Currently a five-month ore gap is expected from July 2017 to November 2017 in FY18. This ore gap will enable a major plant shutdown for

upgrades and maintenance projects. Reducing this ore gap remains the biggest opportunity to increase our gold ounces at Hidden Valley and is

receiving a high level of attention and management focus.

8. CONCLUSION

Harmony's aspiration is to grow our production to approximately 1.5Moz annually and to increase our profitability within the next three years by:

- growing, nurturing and developing our core assets

- harvesting operations that are high cost and have a short life

- expanding in South Africa, into Africa and in Papua New Guinea

- exploring organic growth opportunities

We understand the significant impact our company has on the lives of people, on the communities that surround our mines, on the environment,

and on the economic well-being of the countries in which we operate. We also understand that we are custodians of shareholders' trust to

optimise their investment in the company. Safe gold production – combined with higher gold prices – means stronger

margins.

Our commitment to our stakeholders is to ensure that we meet our safety and production targets. We are off to a good start and intend

maintaining the momentum to achieve in line with our plans. We are well on track to achieve our annual production guidance of 1.05Moz.

Harmony Gold Mining Company Limited (Harmony), a world-class gold mining and exploration company, has operations and assets in South Africa and PNG. Harmony, which has more than 60 years' experience in the industry, is the third largest gold producer in South Africa. Our assets include one open pit mine and several exploration tenements in PNG, as well as nine underground mines and one open pit operation and several surface sources in South Africa. In addition, we own 50% of the significant Golpu project in a joint venture in PNG.

The company's primary stock exchange listing is on the JSE with a secondary listing on the New York Stock Exchange. The bulk of our shareholders are in South Africa and the United States. Additional information on the company is available on the corporate website, www.harmony.co.za.

Our Integrated Annual Report 2016 tells the story of Harmony for our 2016 financial year (FY16) from 1 July 2015 to 30 June 2016. We aim to show readers what Harmony has done and achieved, what we plan to do and achieve in the future and

how we intend to get there. The report reflects on our journey in FY16 – we explain our external and internal environments, our strategy and business model, together with our objectives and how we performed against these. All of our annual reports are available as pdfs at www.har.co.za, our reporting website, and can also be accessed via our corporate website, www.harmony.co.za.

Harmony Gold Mining Company Limited Production results for the three months ended 30 September 2016

FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements within the meaning of the safe harbour provided by Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended, with respect to our financial condition, results of operations, business strategies, operating efficiencies, competitive positions, growth opportunities for existing services, plans and objectives of management, markets for stock and other matters. These include all statements other than statements of historical fact, including, without limitation, any statements preceded by, followed by, or that include the words “targets”, “believes”, “expects”, “aims” “intends” “will”, “may”, “anticipates”, “would”, “should”, “could”, “estimates”, “forecast”, “predict”, “continue” or similar expressions and their negative thereof.

These forward-looking statements, including, among others, those relating to our future business prospects, revenues and income, wherever they may occur in this report and the exhibits to this report, are essentially estimates reflecting the best judgment of our senior management and involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. As a consequence, these forward-looking statements should be considered in light of various important factors, including those set forth in this report. Important factors that could cause actual results to differ materially from estimates or projections contained in the forward-looking statements include, without limitation: overall economic and business conditions in South Africa, Papua New Guinea, Australia and elsewhere, estimates of future earnings, and the sensitivity of earnings to the gold and other metals prices, estimates of future gold and other metals production and sales, estimates of future cash costs, estimates of future cash flows, and the sensitivity of cash flows to the gold and other metals prices, statements regarding future debt repayments, estimates of future capital expenditures, the success of our business strategy, development activities and other initiatives, estimates of reserves statements regarding future exploration results and the replacement of reserves, the ability to achieve anticipated efficiencies and other cost savings in connection with past and future acquisitions, fluctuations in the market price of gold, the occurrence of hazards associated with underground and surface gold mining, the occurrence of labour disruptions, power cost increases as well as power stoppages, fluctuations and usage constraints, supply chain shortages and increases in the prices of production inputs, availability, terms and deployment of capital, changes in government regulation, particularly mining rights and environmental regulation, fluctuations in exchange rates, the adequacy of the group’s insurance coverage and socio-economic or political instability in South Africa and Papua New Guinea and other countries in which we operate.

For a more detailed discussion of such risks and other factors (such as availability of credit or other sources of financing), see the company’s latest Integrated Annual Report on Form 20-F which is on file with the Securities and Exchange Commission, as well as the Company’s other Securities and Exchange Commission filings. The company undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date of this annual report or to reflect the occurrence of unanticipated events, except as required by law.
