---

**UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, D. C. 20549**

**FORM 10-Q**

- Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934  
For the quarterly period ended March 31, 2009.
- Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934  
For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file number 001-15373

**ENTERPRISE FINANCIAL SERVICES CORP**

**Incorporated in the State of Delaware  
I.R.S. Employer Identification # 43-1706259  
Address: 150 North Meramec  
Clayton, MO 63105  
Telephone: (314) 725-5500**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-7 (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer  Accelerated filer  Non-accelerated filer  Smaller reporting company   
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company as defined in Rule 12b-2 of the Exchange Act  
Yes  No

As of March 7, 2009, the Registrant had 12,833,777 shares of outstanding common stock.

Transfer to other real estate owned in settlement of loans	978	5,468

See accompanying notes to consolidated financial statements.

**ENTERPRISE FINANCIAL SERVICES CORP AND SUBSIDIARIES**  
**Notes to Consolidated Unaudited Financial Statements**

**NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The more significant accounting policies used by the Company in the preparation of the consolidated financial statements are summarized below:

**Basis of Financial Statement Presentation**

Enterprise Financial Services Corp (the "Company" or "EFSC") is a financial holding company that provides a full range of banking and wealth management services to individuals and corporate customers located in the St. Louis and Kansas City metropolitan markets through its banking subsidiary, Enterprise Bank & Trust ("Enterprise"). Enterprise also operates a loan production office in Phoenix, Arizona. In addition, the Company owns 100% of Millennium Brokerage Group, LLC ("Millennium"). Millennium is headquartered in Nashville, Tennessee and operates life insurance advisory and brokerage operations from fourteen offices serving life agents, banks, CPA firms, property and casualty groups, and financial advisors in 49 states. On July 31, 2008, the Company sold its remaining interests in Great American Bank ("Great American"). See Note 2 in the Company's Annual Report on Form 10-K for the year ended December 31, 2008 for more information.

The consolidated financial statements of the Company and its subsidiaries have been prepared in accordance with U.S. Generally Accepted Accounting Principles ("U.S. GAAP") for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. They do not include all information and footnotes required by U.S. GAAP for complete financial statements. The consolidated financial statements include the accounts of the Company, Enterprise, Millennium and Great American (through the date of disposition.) Acquired businesses are included in the consolidated financial statements from the date of acquisition. All material intercompany accounts and transactions have been eliminated. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included.

Operating results for the three months ended March 31, 2009 are not necessarily indicative of the results that may be expected for any other interim period or for the year ending December 31, 2009. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2008. Certain reclassifications have been made to prior year balances to conform to the current year presentation. Such reclassifications had no effect on previously reported consolidated net income or shareholders' equity.

### **New Accounting Standards**

In December 2007, the Financial Accounting Standards Board (FASB) issued FASB No. 141R (*Business Combinations - a replacement of FASB No. 141*) (FASB 141R). FASB 141R replaces FASB 141 (*Business Combination*) (FASB 141) and applies to all transaction and other events in which one entity obtains control over one or more other businesses. FASB 141R requires an acquirer, upon initially obtaining control of another entity, to recognize the assets, liabilities and any non-controlling interest in the acquiree at fair value as of the acquisition date. Contingent consideration is required to be recognized and measured at fair value on the date of acquisition rather than at a later date when the amount of that consideration may be determinable beyond a reasonable doubt. This fair value approach replaces the cost-allocation process required under FASB 141 whereby the cost of an acquisition was allocated to the individual assets acquired and liabilities assumed based on their estimated fair value. FASB 141R requires acquirers to expense acquisition-related costs as incurred rather than allocating such costs to the assets acquired and liabilities assumed, as was previously the case under FASB 141. Under FASB 141R, the requirements of FASB 146, *Accounting for Costs Associated with Exit or Disposal Activities*, would have to be met in order to accrue for a restructuring plan in purchase accounting. Pre-acquisition contingencies are to be recognized at fair value, unless it is a non-contractual contingency that is not likely to materialize, in which case, nothing should be recognized in purchase accounting and, instead, that contingency would be subject to the probable and estimable recognition criteria of FASB 5, *Accounting for Contingencies*. FASB 141R is expected to have an impact on the Company's accounting for business combinations closing on or after January 1, 2009.

In December 2007, the FASB issued FASB No. 160, *Noncontrolling Interests in Consolidated Financial Statements - an amendment of ARB No. 51* (FASB 160). FASB 160 amends Accounting Research Bulletin No. 51, *Consolidated Financial Statements*, to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. FASB 160 also clarifies that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. FASB 160 requires consolidated net income to be reported at amounts that include the amounts attributable to both the parent and the noncontrolling interest. Prior to FASB 160, net income attributable to the noncontrolling interest generally was reported as an expense or other deduction in arriving at consolidated net income. Additional disclosures are required as a result of FASB 160 to clearly identify and distinguish between the interests of the parent's owners and the interests of the noncontrolling owners of a subsidiary. FASB 160 is effective for fiscal years beginning after December 15, 2008. As of March 31, 2009, the Company had no noncontrolling interests. FASB 160 will impact consolidated financial statements if noncontrolling interests are acquired in the future.

---

On January 1, 2009, the Company adopted FASB No. 161, *Disclosures about Derivative Instruments and Hedging Activities - an Amendment of FASB Statement No. 133* (FASB 161). FASB 161 expands disclosure requirements regarding an entity's derivative instruments and hedging activities. Expanded qualitative disclosures required under FASB 161 include: (1) how and why an entity uses derivative instruments; (2) how derivative instruments and related hedged items are accounted for under FASB 133, *Accounting for Derivative Instruments and Hedging Activities*, and related interpretations; and (3) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. FASB 161 also requires several added quantitative disclosures in financial statements.

In February 2008, the FASB issued FSP FAS 157-2, *Effective Date of FASB Statement No. 157*, which delayed application of FASB 157, *Fair Value Measurements*, for certain nonfinancial assets and nonfinancial liabilities to fiscal years beginning after November 15, 2008. As a result, the Company adopted FSP FAS 157-2 on January 1, 2009.

In response to constituent feedback and financial statement user demand, in April 2009, the FASB issued three FASB Staff Positions (FSP) that address areas of accounting guidance that have received considerable scrutiny as global financial markets have struggled. The FSPs are: FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*, FSP FAS 115-2 and 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments* and FSP FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments*.

- **FSP FAS 157-4**, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*. This FSP addresses concerns that FASB 157, *Fair Value Measurements*, emphasized the use of an observable market transaction even when that transaction may not have been orderly or the market for that transaction may not have been active. FSP FAS 157-4 provides additional guidance on: (a) determining when the volume and level of activity for the asset or liability has significantly decreased; (b) identifying circumstances in which a transaction is not orderly; and (c) understanding the fair value measurement implications of both (a) and (b). The objectives of fair value measurement under Statement 157 have not changed.

FSP FAS 157-4 requires several new disclosures, including the inputs and valuation techniques used to measure fair value and a discussion of changes in valuation techniques and related inputs, if any, in both interim and annual periods.

- **FSP FAS 115-2 and FAS 124-2**, *Recognition and Presentation of Other-Than-Temporary Impairments* (*FSP 115-2*). This FSP amends the other-than-temporary impairment guidance for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments in the financial statements. The most significant change FSP 115-2 brings is a revision to the amount of other-than-temporary loss of a debt security recorded in earnings.

FSP 115-2 clarifies the interaction of the factors that should be considered when determining whether a debt security is other-than-temporarily impaired. For debt securities, management must assess whether (a) it has the intent to sell the security, or (b) it is more likely than not that it will be required to sell the security prior to its anticipated recovery. These steps are done before assessing whether the entity will recover the cost basis of the investment. Previously, this assessment required management to assert it has both the intent and the ability to hold a security for a period of time sufficient to allow for an anticipated recovery in fair value to avoid recognizing an other-than-temporary impairment. In assessing whether the entire cost basis of the security will be recovered, a comparison must be made of the present value of the cash flows expected to be collected from the security to the amortized cost basis of the security. In addition, if it is more likely than not the entity will be required to sell the security before recovery of its cost basis, an other-than-temporary impairment is deemed to have occurred.

FSP 115-2 changes the presentation and amount of the other-than-temporary impairment recognized in the statement of earnings. The other-than-temporary impairment is separated into (a) the amount of the total other-than-temporary impairment related to credit issues in the debt security and (b) the amount of the total other-than-temporary impairment related to all other factors. The amount of the total other-than-temporary impairment related to credit issues is recognized in earnings. The amount of the total other-than-temporary impairment related to all other factors is recognized in other comprehensive income.

---

This FSP also expands and increases the frequency of certain existing disclosures related to other-than-temporary impairments.

FSP FAS 115-2 and FAS 124-2 are effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. FSP FAS 157-4 (see above) and FSP FAS 115-2/FAS 124-2 must be adopted at the same time. The Company does not expect that the adoption of FSP FAS 115-2/FAS 124-2 will have a material impact on our financial condition or results of operations.

- **FSP FAS 107-1 and ABP 28**, *Interim Disclosures About Fair Value of Financial Instruments* (*FSP FAS 107-1*) which amends FASB 107, *Disclosures about Fair Value of Financial Instruments* to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. FSP FAS 107-1 also amends Accounting Principles

Board Opinion No. 28, *Interim Financial Reporting*, to require those disclosures in summarized financial information at interim reporting periods. FSP FAS 107-1 is effective for interim reporting periods ending after June 15, 2009. The Company is currently evaluating the impact that FSP FAS 107-1 will have on its future consolidated financial statements.

In September 2008, the FASB issued FSP EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*. The guidance applies to the calculation of earnings per share under FASB No. 128, *Earnings per Share*, for share-based payment awards with rights to dividends or dividend equivalents. Unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities, according to the FSP, and should be included when computing earnings per share following the two-class method. The FSP is effective for financial statements issued for fiscal years beginning after Dec. 15, 2008, and interim periods within those years. FSP EITF 03-6-1 does not apply to the Company since our unvested share-based payment awards do not carry dividend rights until vesting.

## NOTE 2 EARNINGS (LOSS) PER SHARE

Basic earnings (loss) per share data is calculated by dividing net income available to common shareholders by the weighted average number of common shares outstanding during the period. Diluted earnings per common share gives effect to all dilutive potential common shares outstanding during the period using the treasury stock method and the if-converted method for convertible securities related to an issuance of trust preferred securities. The following table presents a summary of per share data and amounts for the periods indicated.

<i>(in thousands, except per share data)</i>	Three months ended March 31,	
	2009	2008
Net (loss) income, as reported	\$ (50,617)	\$ 3,563
Preferred stock dividend	(438)	-
Amortization of preferred stock discount	(161)	-
Net (loss) income available to common shareholders	\$ (51,216)	\$ 3,563
Weighted average common shares outstanding	12,828	12,441
Additional dilutive common stock equivalents	6	234
Diluted common shares outstanding	12,834	12,675
Basic (loss) earnings per common share	\$ (3.99)	\$ 0.29
Diluted (loss) earnings per common share	\$ (3.99)	\$ 0.28

For the three months ended March 31, 2009 and 2008, there were weighted average common stock equivalents of approximately 2.4 million and 342,000, respectively, which were excluded from the per share calculations because their effect was anti-dilutive. In addition, at March 31, 2009, the Company had outstanding warrants to purchase 324,074 shares of common stock associated with the U.S. Treasury Capital Purchase Program which were excluded from the earnings per share calculation because their effect was also anti-dilutive.

## NOTE 3 GOODWILL AND INTANGIBLE ASSETS

FASB 142, *Goodwill and Other Intangible Assets*, requires that goodwill be tested for impairment annually and more frequently if events or changes in circumstances indicate that the asset might be impaired. Historically the Banking reporting unit has been tested for goodwill impairment at December 31 and the Millennium reporting unit goodwill tested at September 30. The market price of the Company's common stock has declined from an average closing price of \$15.55 during the fourth quarter of 2008 to \$11.03 during the first quarter of 2009, a 29% decrease. The closing market value of the Company's common stock on March 31, 2009 was \$9.76. As a result of the Company's market capitalization being significantly less than total stockholders' equity at March 31, 2009, an interim goodwill impairment valuation analysis was performed on the Banking reporting unit.

Edgar Filing: ENTERPRISE FINANCIAL SERVICES CORP - Form 10-Q

The evaluation identified impairment and as a result, the Company recorded an impairment charge of \$45.4 million, which eliminated all goodwill at the Banking reporting unit. The Company also tested the Banking reporting unit core deposit intangible assets for impairment in conformity with FASB 144, *Accounting for the Impairment or Disposal of Long-Lived Asset*. Based on the testing, the Company determined that the core deposit intangible assets were not impaired. The goodwill impairment charge did not affect the Company's regulatory capital or cash flow.

There were no events or circumstances that required an interim impairment test for the Millennium reporting unit for the quarter ended March 31, 2009.

The table below summarizes the changes to goodwill for the periods presented.

<i>(in thousands)</i>	Reporting Unit		
	Millennium	Bank	Total
Balance at December 31, 2008	\$ 3,134	\$ 45,378	\$ 48,512
Goodwill impairment related to Banking segment	-	(45,378)	(45,378)
Balance at March 31, 2009	\$ 3,134	\$ 0	\$ 3,134

The table below summarizes the changes to intangible asset balances. Customer and trade name intangibles are related to the Millennium reporting unit and Core deposit intangibles are related to the Banking reporting unit.

<i>(in thousands)</i>	Customer and Trade Name Intangibles	Core Deposit Intangible	Net Intangible
	Balance at December 31, 2008	\$ 1,379	\$ 2,125
Amortization expense	(149)	(128)	(277)
Balance at March 31, 2009	\$ 1,230	\$ 1,997	\$ 3,227

8

The following table reflects the expected amortization schedule for the customer, trade name and core deposit.

Year	Amount
Remaining 2009	\$ 800
2010	1,015
2011	371
2012	309
2013	247
After 2013	485
	\$ 3,227

**NOTE 4 DISCLOSURES ABOUT FINANCIAL INSTRUMENTS**

The Company issues financial instruments with off balance sheet risk in the normal course of the business of meeting the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments may involve, to varying degrees, elements of credit and interest-rate risk in excess of the amounts recognized in the consolidated balance sheets.

The Company's extent of involvement and maximum potential exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of these instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for financial instruments included on its consolidated balance sheets. At March 31, 2009, no amounts have been accrued for any estimated losses for

these financial instruments.

The contractual amount of off-balance-sheet financial instruments as of March 31, 2009 and December 31, 2008 are as follows:

<i>(in thousands)</i>	March 31, 2009	December 31, 2008
Commitments to extend credit	\$ 516,502	\$ 555,361
Standby letters of credit	32,010	33,875

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments usually have fixed expiration dates or other termination clauses and may require payment of a fee. Of the total commitments to extend credit at March 31, 2009 and December 31, 2008, approximately \$112.0 million and \$131.0 million, respectively, represent fixed rate loan commitments. Since certain of the commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The bank evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by each bank upon extension of credit, is based on management's credit evaluation of the borrower. Collateral held varies, but may include accounts receivable, inventory, premises and equipment, and real estate.

Standby letters of credit are conditional commitments issued by Enterprise to guarantee the performance of a customer to a third party. These standby letters of credit are issued to support contractual obligations of the bank's customers. The credit risk involved in issuing letters of credit is essentially the same as the risk involved in extending loans to customers. The approximate remaining term of standby letters of credit range from 6 months to 5 years at March 31, 2009.

#### **NOTE 5 DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES**

Effective January 1, 2009, the Company adopted FASB 161, *Disclosures about Derivative Instruments and Hedging Activities - an Amendment of FASB Statement 133*, which increased required disclosures regarding derivatives and hedging activities, including disclosures regarding how an entity uses derivative instruments and how derivative instruments and related hedged items are accounted for and affect an entity's financial position, financial performance, and cash flows. The Company is a party to various derivative financial instruments that are used in the normal course of business to meet the needs of its clients and as part of its risk management activities.

9

These instruments include interest rate swaps and option contracts. The Company does not enter into derivative financial instruments for trading or speculative purposes.

Interest rate swap contracts involve the exchange of fixed and floating rate interest payment obligations without the exchange of the underlying principal amounts. The Company enters into interest rate swap contracts on behalf of its clients and also utilizes such contracts to reduce or eliminate the exposure to changes in the cash flows or value of hedged assets or liabilities due to changes in interest rates. Interest rate option contracts consist of caps and provide for the transfer or reduction of interest rate risk in exchange for a fee. In November 2008, the Company entered into a series of interest rate caps in order to economically hedge changes in fair value of the State tax credits held for sale.

All derivative financial instruments, whether designated as hedges or not, are recorded on the consolidated balance sheet at fair value within Other assets or Other liabilities. The accounting for changes in the fair value of a derivative in the consolidated statement of income depends on whether the contract has been designated as a hedge and qualifies for hedge accounting in accordance with FASB No. 133. At March 31, 2009, the Company did not have any derivatives designated as cash flow or fair value hedges under FASB 133.

Using derivative instruments means assuming counterparty credit risk. Counterparty credit risk relates to the loss we could incur if a counterparty were to default on a derivative contract. Notional amounts of derivative financial instruments do not represent credit risk, and are not recorded in the consolidated balance sheet. They

are used merely to express the volume of this activity. We monitor the overall credit risk and exposure to individual counterparties. We do not anticipate nonperformance by any counterparties. The amount of counterparty credit exposure is the unrealized gains, if any, on such derivative contracts. At March 31, 2009 and December 31, 2008, Enterprise had pledged cash of \$1.5 million and \$470,000, respectively, as collateral in connection with interest rate swap agreements.

### Risk Management Instruments.

**Economic hedge of state tax credits.** In November 2008, the Company entered into a series of interest rate caps in order to economically hedge changes in fair value of the State tax credits held for sale. The Company paid \$2.1 million at inception of the contracts. The caps have performed generally as expected on a life-to-date basis, but did not offset the fair value of the state tax credits during the first quarter period. See Note 7 Fair Value Measurements for further discussion of the fair value of the state tax credits.

- Economic hedge of prime based loans.** The Company had two interest rate swaps with notional values of \$40.0 million each which economically hedged changes in cash flows of a pool of prime based loans. Those derivatives were terminated in February 2009, and the Company recognized a loss of \$530,000 upon termination. The loss was included in Miscellaneous loss in the consolidated statement of operations. The derivatives had previously been designated as cash flow hedges. However, in December 2008, due to a variable rate differential, the Company concluded the cash flow hedges would not be prospectively effective and the hedges were dedesignated. The unrealized gain prior to dedesignation was included in Accumulated other comprehensive income and is being amortized over the expected life of the related loans. At March 31, 2009, the amount remaining in Accumulated other comprehensive income was \$378,000, and \$62,000 was reclassified into Miscellaneous income during the quarter ended March 31, 2009. The Company expects to reclassify \$248,000 of remaining derivative gains from Accumulated other comprehensive income to earnings over the next twelve months.

The table below summarizes the notional amount and fair values of the derivative instruments used to manage risk.

(in thousands)	Notional Amount		Asset Derivatives Fair Value		Liability Derivatives Fair Value	
	March 31, 2009	December 31, 2008	March 31, 2009	December 31, 2008	March 31, 2009	December 31, 2008
	Non-designated hedging instruments					
Interest rate option contracts	\$ 188,050	\$ 188,050	\$ 460	\$ 544	\$ -	\$ -

10

The following table shows the location and amount of gains and losses related to derivatives used for risk management purposes that were recorded in the consolidated statements of income for the three months ended March 31, 2009 and 2008.

(in thousands)	Location of Gain or (Loss) Recognized in Income on Derivative	Amount of Gain or (Loss) Recognized in Income on Derivative	
		2009	2008
		Non-designated hedging instruments	
Interest rate option contracts	State tax credit activity, net	\$ (84)	\$ -
Interest rate swap contracts	Miscellaneous (loss) income	\$ (468)	\$ -

**Client-Related Derivative Instruments.** As an accommodation to certain customers, the Company enters into interest rate swaps to economically hedge changes in fair value of certain loans. The table below summarizes the notional amount and fair values of the client-related derivative instruments.

<i>(in thousands)</i>	Notional Amount		Asset Derivatives Fair Value		Liability Derivatives Fair Value	
	March 31,	December	March	December	March 31,	December
	2009	31, 2008	31, 2009	31, 2008	2009	31, 2008
Non-designated hedging instruments						
Interest rate swap contracts	\$ 31,179	\$ 17,429	\$ 183	\$ -	\$ 1,598	\$ 1,467

Changes in the fair value of client-related derivative instruments are recognized currently in income. The following table shows the location and amount of gains and losses recorded in the consolidated statements of income for the three months ended March 31, 2009 and 2008.

<i>(in thousands)</i>	Location of Gain or (Loss) Recognized in Income on Derivative	Amount of Gain or (Loss) Recognized in Income on Derivative	
		2009	2008
Non-designated hedging instruments			
Interest rate swap contracts	Interest and fees on loans	\$ (177)	\$ (6)

#### NOTE 6 SHARE-BASED COMPENSATION PLANS

The Company maintains a number of share-based incentive programs, which are discussed in more detail in Note 17 of the Company's Annual Report on Form 10-K for the year ended December 31, 2008. There were no stock options granted in the three months ended March 31, 2009. The share-based compensation expense charged against income was \$650,000 and \$453,000 for the three months ended March 31, 2009 and 2008, respectively.

11

#### Employee Stock Options and Stock-settled Stock Appreciation Rights (SSAR)

At March 31, 2009, there was \$39,000 and \$2.7 million of total unrecognized compensation costs related to stock options and SSARs, respectively, which is expected to be recognized over a weighted average period of 1.5 and 3.4 years, respectively. Following is a summary of the employee stock option and SSAR activity for the first three months of 2009.

<i>(Dollars in thousands, except share data)</i>	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at December 31, 2008	827,471	\$ 17.03		
Granted	-	-		
Exercised	(1,500)	10.00		
Forfeited	(13,083)	23.08		
Outstanding at March 31, 2009	812,888	\$ 16.95	6.2 years	\$ -
Exercisable at March 31, 2009	481,792	\$ 14.25	4.3 years	\$ -
Vested and expected to vest at March 31, 2009	750,874	\$ 16.36	6.2 years	\$ -

#### Restricted Stock Units (RSU)

At March 31, 2009, there was \$2.7 million of total unrecognized compensation costs related to the RSUs, which is

Edgar Filing: ENTERPRISE FINANCIAL SERVICES CORP - Form 10-Q

expected to be recognized over a weighted average period of 2.8 years. A summary of the Company's restricted stock unit activity for the first three months of 2009 is presented below.

	Shares	Weighted Average Grant Date Fair Value
Outstanding at December 31, 2008	150,463	\$ 22.89
Granted	-	-
Vested	(5)	22.63
Forfeited	(8,673)	24.30
Outstanding at March 31, 2009	141,785	\$ 22.80

*Stock Plan for Non-Management Directors*

The Company recognized \$98,000 and \$95,000 of stock-based compensation expense for the directors for the three months ended March 31, 2009 and 2008, respectively. Shares are issued twice a year and compensation expense is recorded as the shares are earned, therefore, there is no unrecognized compensation expense related to this plan. Pursuant to this plan, the Company issued 8,007 and 4,356 shares in the first three months of 2009 and 2008, respectively.

*Moneta Plan*

As of December 31, 2006, the fair value of all Moneta options had been expensed. As a result, there have been no option-related expenses for Moneta in 2009 or 2008. Following is a summary of the Moneta stock option activity for the first three months of 2009.

<i>(Dollars in thousands, except share data)</i>	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at December 31, 2008	91,001	\$ 13.55

Forfeited	(270)	10.33		
Outstanding at March 31, 2009	68,269	\$ 14.62	1.4 years	\$ -
Exercisable at March 31, 2009	68,269	\$ 14.62	1.4 years	\$ -

**NOTE 7 □ FAIR VALUE MEASUREMENTS**

On January 1, 2008, the Company adopted FASB 157, *Fair Value Measurements*, for financial assets and financial liabilities. FASB 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. In accordance with FSP FAS 157-2, *Effective Date of FASB Statement No. 157*, the Company adopted FASB 157 for non-financial assets and non-financial liabilities on January 1, 2009.

*State tax credits held for sale.* Pursuant to the provisions of FASB 159, the Company elected not to account for state tax credits purchased in the first quarter of 2009 at fair value. Of the \$43.5 million of state tax credits, held for sale, on the consolidated balance sheet at March 31, 2009, approximately \$36.9 million were accounted for at fair value. The remaining \$6.6 million of state tax credits were accounted for at cost. The Company elected not to account for the newly purchased state tax credits at fair value in order to limit the volatility of the fair value changes in our consolidated statements of income.

Edgar Filing: ENTERPRISE FINANCIAL SERVICES CORP - Form 10-Q

The fair value of the state tax credits decreased by \$533,000 in the first quarter of 2009 compared to a \$903,000 increase in the first quarter of 2008. These fair value changes are included in State tax credit activity, net in the consolidated statements of income.

The following table summarizes financial instruments measured at fair value on a recurring basis as of March 31, 2009, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value.

<i>(in thousands)</i>	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total Fair Value

**NOTE 8 SEGMENT REPORTING**

The Company has two primary operating segments, Banking and Wealth Management, which are delineated by the products and services that each segment offers. The segments are evaluated separately on their individual performance, as well as, their contribution to the Company as a whole.

The Banking operating segment consists of a full-service commercial bank, Enterprise, with locations in St. Louis and Kansas City and a loan production office in Phoenix, Arizona. The majority of the Company's assets and income result from the Banking segment. With the exception of the loan production office, all banking locations have the same product and service offerings, have similar types and classes of customers and utilize similar service delivery methods. Pricing guidelines and operating policies for products and services are the same across all regions.

The Wealth Management segment includes the Trust division of Enterprise, the state tax credit brokerage activities, and Millennium. The Trust division provides estate planning, investment management, and retirement planning as well as consulting on management compensation, strategic planning and management succession issues. State tax credits are part of a fee initiative designed to augment the Company's wealth management segment and banking lines of business. Millennium operates life insurance advisory and brokerage operations serving life agents, banks, CPA firms, property & casualty groups, and financial advisors in 49 states.

The Corporate segment's principal activities include the direct ownership of the Company's banking and non-banking subsidiaries and the issuance of debt and equity. Its principal source of liquidity is dividends from its subsidiaries and stock option exercises.

The financial information for each business segment reflects that information which is specifically identifiable or which is allocated based on an internal allocation method. There were no material intersegment revenues among the three segments. Management periodically makes changes to methods of assigning costs and income to its business segments to better reflect operating results. When appropriate, these changes are reflected in prior year information presented below.

14

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Readers should note that in addition to the historical information contained herein, some of the information in this report contains forward-looking statements within the meaning of the federal securities laws. Forward-looking statements typically are identified with use of terms such as "may," "will," "expect," "anticipate," "estimate," "potential," "could": and similar words, although some forward-looking statements are expressed differently. You should be aware that the Company's actual results could differ materially from those contained in the forward-looking statements due to a number of factors, including: burdens imposed by federal and state regulation, changes in accounting regulation or standards of banks; credit risk; exposure to general and local economic conditions; risks associated with rapid increase or decrease in prevailing interest rates; consolidation within the banking industry; competition from banks and other financial institutions; our ability to attract and retain relationship officers and other key personnel and technological developments; and other risks discussed in more detail in Item 1A: "Risk Factors" on Form 10-K, all of which could cause the Company's actual results to differ from those set forth in the forward-looking statements.

Readers are cautioned not to place undue reliance on our forward-looking statements, which reflect management's analysis only as of the date of the statements. The Company does not intend to publicly revise or update forward-looking statements to reflect events or circumstances that arise after the date of this report. Readers should carefully review all disclosures we file from time to time with the Securities and Exchange Commission which are available on our website at [www.enterprisebank.com](http://www.enterprisebank.com).

**Introduction**

The following discussion describes the significant changes to the financial condition of the Company that have occurred during the first three months of 2009 compared to the financial condition as of December 31, 2008. In addition, this discussion summarizes the significant factors affecting the consolidated results of operations, liquidity and cash flows of the Company for the three months ended March 31, 2009 compared to the same periods in 2008. This discussion should be read in conjunction with the accompanying consolidated financial statements included in this report and our Annual Report on Form 10-K for the year ended December 31, 2008.

**Operating Results**

For the three months ended March 31, 2009, the Company reported a net loss of \$50.6 million, or \$3.99 per common diluted share, compared to net income of \$3.6 million, or \$0.28 per share in the first quarter of 2008. The net loss was attributable to a \$45.4 million non-cash accounting charge to eliminate goodwill related to our Banking reporting unit and loan loss provision totaling \$15.1 million in the first quarter of 2009 compared to \$2.3 million in the same quarter of 2008.

The goodwill impairment charge is a non-cash accounting adjustment that does not reduce the Company's regulatory or tangible capital position, liquidity or cash flow and does not impact the Company's operations. The goodwill impairment charge was primarily driven by the deterioration in the general economic environment and the resulting decline in the Company's share price and market capitalization in the first quarter of 2009. See Note 3 Goodwill and Intangible Assets for more information.

On a pre-tax, pre-provision basis, absent the goodwill impairment charge, the Company's operating earnings for the quarter were \$7.6 million. This represents a 5% increase in operating earnings over the first quarter of 2008. We are presenting operating earnings and loss figures, which are not financial measures as defined under U.S. GAAP, because we believe adjusting our results to exclude loan loss provision expenses and extraordinary gains or losses provides shareholders with a more comparable basis for evaluating our period-to-period operating results and financial performance. Below is a reconciliation of U.S. GAAP net (loss) income to operating (loss) earnings for the current quarter along with last quarter and one year ago quarter.

Operating earnings before income taxes and provision for loan losses	\$ 7,617	\$ 11,208	\$ 7,264

16

We are concentrating our resources on growing our core banking and wealth management businesses and aggressively managing asset quality through this credit cycle. The additional capital raised during the fourth quarter of 2008 bolstered our already well-capitalized position.

Below are highlights of our Banking and Wealth Management segments. For more information on our segments, see Note 8 Segment Reporting.

**Banking Segment**

- Loan growth** At March 31, 2009, portfolio loans were \$1.96 billion, an increase of \$283.0 million, or 14%, from March 31, 2008. Portfolio loans decreased by \$13.0 million from December 31, 2008 as payoffs, paydowns and net charge-offs slightly exceeded loan fundings. Through March 2009, the Phoenix loan production office has generated approximately \$25.0 million of commercial and industrial and commercial real estate loans. Enterprise has continued its lending activities since the issuance of

preferred stock to the U.S. Treasury on December 19, 2008. From the close of business December 18, 2008 through March 31, 2009, Enterprise funded over \$66.0 million in new loans and advanced another \$90.0 million on existing loans.

- **Deposit growth** □ Total deposits were \$1.75 billion at March 31, 2009, an increase of \$155.0 million, or 10%, from March 31, 2008. Total deposits declined \$47.0 million, or 3%, from December 31, 2008. Excluding brokered certificates of deposit, □core□ deposits grew \$43.0 million, or 3%, from a year ago, and \$31.0 million, or 2%, during the quarter. Core deposits typically decline in the first quarter, but a promotional deposit campaign generated approximately \$112.0 million in new funds. Core deposits include certificates of deposit sold to clients through the CDARS program. As of March 31, 2009, Enterprise had \$98.0 million of reciprocal CDARS deposits outstanding compared to \$60.0 million at December 31, 2008. Most of the increase represents new deposits.

Brokered deposits declined \$78.0 million from December 31, 2008 which contributed to the decline in total deposits for the quarter. For the first quarter of 2009, brokered certificates of deposit represented 18% of total deposits on average. For the quarter ended December 31, 2008, brokered deposits represented 19% of total deposits on average and 8% for the first quarter of 2008. Non-interest bearing demand deposits represented 14% of total deposits at March 31, 2009 and December 31, 2008, compared to 15% of total deposits at March 31, 2008. We have adjusted our incentive programs to focus our associates on deposit gathering efforts and will be aggressively managing deposit rates to achieve this objective.

- **Asset quality** □ Loan loss provision for the quarter was \$15.1 million compared to \$2.3 million in the same period a year ago. The increase was driven by higher levels of nonperforming loans, declining real estate values on collateral for certain impaired credits and adverse risk rating changes on performing loans. Our goal with respect to the loan loss provision is to strengthen the balance sheet, to stay ahead of the credit cycle and to continue to be conservative with respect to how we deal with risk. See Provision for Loan Losses and Nonperforming Assets below for more information.

### **Wealth Management Segment**

Fee income from the Wealth Management segment, including results from state tax credit brokerage activity, totaled \$3.2 million in the first quarter of 2009, a decrease of \$370,000, or 10%, from the same quarter of 2008.

- **Trust revenues** □ Revenues in the first quarter of 2009 from the Trust division decreased \$284,000, or 19%, from the same quarter of 2008. Declines in the overall financial markets continue to drive the revenue decrease. Trust assets under administration were \$1.1 billion at March 31, 2009 compared to \$1.2 billion at December 31, 2008 and \$1.6 billion one year ago.
- **State tax credit brokerage activities** □ For the first quarter of 2009, we recorded a \$46,000 loss on state tax credit activity compared to a \$1.0 million gain in the first quarter of 2008. Gains of \$570,000 from the sale of state tax credits to clients were more than offset by a \$533,000 negative fair value adjustment on the tax credit assets and an \$84,000 negative fair value adjustment on the interest rate caps used to economically hedge the tax credits. See Note 5 □ Derivatives Instruments and Hedging Activities above for more information. For more detailed information on the fair value treatment of the state tax credits, see Note 19 □ Fair Value Measurements in our Annual Report on Form 10-K for the year ended December 31, 2008.
- **Millennium** □ Millennium revenues increased \$972,000, or 89%, in the first quarter of 2009 compared to the same period last year. The increase was due to the successful sale of several large insurance cases. For the full year of 2009, we expect Millennium earnings before taxes and amortization to be comparable to 2008. While market conditions remain difficult, we continue to examine strategic alternatives for Millennium.

---

### **Net Interest Income**

In response to federal funds (□fed funds□) rate decreases in 2008, which in turn lowered the prime rate earned on many of our loans, we continue to look for opportunities to reduce the cost of our short-term and maturing funding, while maintaining a competitive position within our market. The Enterprise prime rate remained at 4.00% during the first quarter, and we continued to incorporate floors and increase spreads on our new and renewing loans. In order to increase liquidity, we raised \$93.1 million in time deposits and \$19.1 million in money market deposits through an aggressively priced deposit campaign during the first quarter and reduced brokered deposit balances and other short term borrowings. We expect that increases in the fed funds rate will initially

have a negative impact on net interest income because the Enterprise prime rate is set higher than the market prime rate and will not increase with the cost of liabilities.

Net interest income (on a tax-equivalent basis) was \$17.2 million for the three months ended March 31, 2009 compared to \$16.4 million for the same period of 2008, an increase of \$0.8 million, or 5%. Total interest income decreased \$2.8 million offset by a decrease in total interest expense of \$3.6 million.

Average interest-earning assets increased \$295.2 million, or 16%, to \$2.106 billion for the quarter ended March 31, 2009 compared to \$1.810 billion for the quarter ended March 31, 2008. Loans accounted for the majority of the growth, increasing by \$294.8 million, or 17% to \$1.984 billion. Interest income on loans increased \$4.6 million from growth, but was offset by a decrease of \$7.4 million due to the impact of lower rates, for a net decrease of \$2.8 million versus first quarter of 2008.

For the quarter ended March 31, 2009, average interest-bearing liabilities increased \$255.5 million, or 16%, to \$1.822 billion compared to \$1.567 billion for the quarter ended March 31, 2008. The growth in interest-bearing liabilities resulted from a \$190.3 million increase in net brokered certificates of deposit, a \$28.3 million increase in subordinated debentures, and a \$50.1 million increase in borrowed funds including FHLB advances and federal funds purchased, offset by a decrease of \$13.2 million in core deposits. This included approximately \$30.0 million in deposits included with the sale of the De Soto, Kansas branch in the third quarter of 2008. We experienced some normal seasonal deposit runoff of transaction accounts during the first quarter of 2009 which was offset by attracting new deposits through the previously mentioned deposit campaign. Due to the low borrowing rate (0.50%), we are continuing to utilize the Federal Reserve discount window to meet funding shortfalls. For the first quarter of 2009, interest expense on interest-bearing liabilities increased \$2.8 million due to growth while the impact of declining rates decreased interest expense on interest-bearing liabilities by \$6.4 million versus first quarter of 2008, for a net decrease of \$3.6 million.

The tax-equivalent net interest rate margin was 3.32% for the first quarter of 2009 compared to 3.63% for same period of 2008. The decline in the margin was due to sharply falling interest rates, increased levels of nonperforming assets, and higher levels of more expensive wholesale funding to support loan growth. Higher average levels of nonperforming loans reduced the net interest rate margin by 0.14% in the first quarter of 2009 compared to a reduction of 0.04% in the first quarter of 2008. The net interest margin was five basis points lower than in the fourth quarter of 2008. The margin is stabilizing as a result of improved loan pricing that is largely offsetting the effects of higher nonperforming assets and interest costs associated with the recent deposit campaign.

### Average Balance Sheet

The following table presents, for the periods indicated, certain information related to our average interest-earning assets and interest-bearing liabilities, as well as, the corresponding interest rates earned and paid, all on a tax equivalent basis.

The loans and deposits associated with the DeSoto branch of Great American are included for 2008.

(in thousands)	Three months ended March 31,

Total interest-bearing liabilities	2,759	(6,393)	(3,634)
Net interest income	\$ 1,842	\$ (984)	\$ 858

- (1) Change in volume multiplied by yield/rate of prior period.
- (2) Change in yield/rate multiplied by volume of prior period.
- (3) Nontaxable income is presented on a fully tax-equivalent basis using the combined statutory federal and state income tax rate in effect for each year.

NOTE: The change in interest due to both rate and volume has been allocated to rate and volume changes in proportion to the relationship of the absolute dollar amounts of the change in each.

**Provision for Loan Losses and Nonperforming Assets**

The provision for loan losses in the first quarter of 2009 was \$15.1 million compared to \$2.3 million in the same quarter of 2008. The increase in the provision for loan losses from the prior year first quarter was due to higher nonperforming loan levels, declining real estate values on certain impaired credits, and adverse risk rating changes on performing loans. The Company actively monitors its loan portfolio to identify problem loans and assign appropriate risk ratings. The allowance for loan losses as a percentage of total loans was 2.02% at March 31, 2009 compared to 1.58% at December 31, 2008 and 1.29% at March 31, 2008. Management believes that the allowance for loan losses is adequate.

For the first quarter of 2009, the Company recorded net charge-offs of \$6.8 million, or 1.39%, of average portfolio loans on an annualized basis, compared to \$8.5 million, or 1.73%, for the fourth quarter of 2008 and \$1.7 million, or 0.40%, for the first quarter of 2008. The charge-offs in the first quarter of 2009 were largely comprised of further deterioration in the fair value of existing commercial real estate impaired loans and a \$1.9 million loss on a commercial and industrial business that failed. We are charging off larger dollar amounts on a relatively small number of credits. All first quarter charge-offs were identified at December 31, 2008 as impaired loans.

At March 31, 2009, nonperforming loans were \$50.5 million, or 2.57%, of total loans. This compares to \$29.7 million, or 1.50%, at December 31, 2008 and \$9.3 million, or 0.54%, at March 31, 2008. Of the \$21.0 million increase in the quarter, \$13.0 million relates to commercial ground where development activity has slowed. The \$50.5 million balance is comprised of 38 relationships with the largest being a \$7.0 million loan secured by a medical office building. Approximately two-thirds of the nonperforming loans are located in the Kansas City market. Because Kansas is a judicial foreclosure state, all foreclosures must be processed through the Kansas state courts. Until the court confirms that the nonperforming loan is in default, we can take no action against the borrower or foreclose on the property. Due to this process, it takes approximately one year for us to foreclose on Kansas-based nonperforming loans.

20

Nonperforming loans by industry segment were:

	March 31, 2009	December 31, 2008
Commercial Real Estate	\$ 29.2	\$ 16.1
Residential Construction/Land Acquisition and Development	16.9	11.8
Commercial and Industrial	4.4	1.7
Other	-	0.1
	\$ 50.5	\$ 29.7

Other real estate was \$13.3 million at March 31, 2009 compared to \$13.9 million at December 31, 2008 and \$7.7 million at March 31, 2008. The decline of \$600,000 from December 31 consists of: sales of \$1.1 million of Other real estate at a net gain of \$59,000, new foreclosures of \$1.0 million on one Kansas City residential builder and fair value declines in six residential properties. The decline in fair value on these properties was recorded to Other expenses in the consolidated statement of operations. Residential lots and completed homes represented 89% of the Other real estate at March 31, 2009. All Other real estate properties are located in the St. Louis and Kansas City markets.

As noted over the past several quarters, we expect nonperforming asset levels to remain elevated. Our nonperforming credits continue to be concentrated in residential and commercial real estate segments and those areas remain stressed with persistent downward pressure on valuations. We continue to monitor our loan portfolio for signs of credit weakness in segments other than real estate. Thus far, our commercial and industrial portfolio has held up in this recession. We have no significant nonperforming assets or past dues in this sector. We are encouraged by early signs of increased residential sales activity, as the extraordinarily low interest rates are starting to attract buyers back into the market.

The following table summarizes changes in the allowance for loan losses arising from loans charged off and recoveries on loans previously charged off, by loan category, and additions to the allowance charged to expense.

<i>(in thousands)</i>	Three months ended March 31,	
	2009	2008
Allowance at beginning of period	\$ 31,309	\$ 21,593
Loans charged off:

Allowance for loan losses to loans	2.02	1.29

Edgar Filing: ENTERPRISE FINANCIAL SERVICES CORP - Form 10-Q

The following table presents the categories of nonperforming assets and other ratios as of the dates indicated.

<i>(in thousands)</i>	March 31 2009	December 31 2008
Non-accrual loans	\$ 50,458	\$ 29,662
Loans past due 90 days or more and still accruing interest	-	-
Restructured loans	-	-
Total nonperforming loans	50,458	29,662
Foreclosed property	13,251	13,868
Total nonperforming assets	\$ 63,709	\$ 43,530
Total assets	\$ 2,230,703	\$ 2,270,174
Total loans	1,963,975	1,977,175
Total loans plus foreclosed property	1,977,226	1,991,043
Nonperforming loans to total loans	2.57 %	1.50 %
Nonperforming assets to total loans plus foreclosed property	3.22	2.19
Nonperforming assets to total assets	2.86	1.92
Allowance for loan losses to nonperforming loans	79.00 %	106.00 %

### Noninterest Income

Noninterest income decreased \$642,000 or 12.0%, from the first quarter of 2008 compared to the first quarter of 2009. The first quarter of 2008 included a \$579,000 pre-tax gain on the sale of the Liberty branch. Excluding this non-recurring gain, noninterest income declined only \$63,000, or 1.2% from the first quarter of 2008.

Wealth Management revenue increased \$688,000, or 27%, from the first quarter of 2008. The increase consisted of:

- Millennium revenue increases of \$972,000, or 89%, from the first quarter of 2008 due to successful closings of several large insurance cases; and
- Trust division revenues decreased \$284,000, or 19%, primarily due to declining market value of assets under management.

Increases on Service charges on deposit accounts were primarily due to the declining earnings crediting rate on commercial accounts, which increased service charges earned.

Through March 31, 2009 we sold \$1.1 million of Other real estate for a net gain of \$59,000.

For the first quarter of 2009, we recorded a \$46,000 loss on state tax credit activity compared to a \$1.0 million gain in the first quarter of 2008. Gains of \$570,000 from the sale of state tax credits to clients were more than offset by a \$533,000 negative fair value adjustment on the tax credit assets and an \$84,000 negative fair value adjustment on the interest rate caps used to economically hedge the tax credits.

Given the anticipated acceleration in prepayments on mortgage-backed securities and resultant loss in fair value, the Company elected to sell certain securities and generated a pre-tax gain of \$316,000 in the first quarter 2009.

The decrease in miscellaneous income included a \$530,000 loss on two interest rate swaps that were terminated in first quarter 2009.

### Noninterest Expense

Noninterest expenses were \$59.5 million in the first quarter of 2009, an increase of \$45.6 million from first quarter 2008. This increase is mainly due to a \$45.4 million goodwill impairment charge related to the banking

segment. Excluding the goodwill impairment charge, noninterest expenses were \$14.1 million in the first quarter of 2009, an increase of \$298,000, or 2.0%, from the same quarter in 2008. Excluding the goodwill impairment charge, the efficiency ratio was 65.0% in first quarter of 2009 compared to 63.8% in first quarter of 2008. Including the goodwill impairment charge, the efficiency ratio in the first quarter of 2009 was 273.6%.

23

---

Salaries and benefits decreased \$1.3 million, or 15%, from the first quarter of 2008 due to staff reductions and reduced incentive compensation.

Increases in Occupancy were primarily due to expenses related to our Maryland Walk location which was occupied in the fourth quarter of 2008.

Meals and entertainment decreased due to less travel and controlled customer-related entertainment expenses.

Amortization of intangibles decreased \$108,000 due to a lower carrying value on the customer related intangible that resulted from an impairment charge of \$500,000 in fourth quarter 2008.

The increase in Other noninterest expense includes \$375,000 for FDIC insurance premiums resulting from the FDIC's newly implemented rate structure, a \$785,000 increase in expenses related to nonperforming loans and Other real estate and \$318,000 for a legal settlement.

#### **Income Taxes**

For the three months ended March 31, 2009, the provision for income taxes was a \$2.2 million tax benefit compared to \$2.0 million tax expense for the same period in 2008. The combined federal and state effective income tax rates were 4.2% in the first quarter of 2009 versus 35.4% a year ago. Our income tax provision in the first quarter of 2009 reflects the impact of the \$45.4 million goodwill impairment charge, which is not tax deductible.

The provision for income taxes is determined by applying an estimated annual effective income tax rate to income before income taxes. The rate is based on the most recent annualized forecast of pretax income, permanent book versus tax differences and tax credits. Excluding the goodwill impairment charge, we estimate that our effective tax rate would have been 30.0% in the first quarter of 2009 compared to 35.4% in the corresponding period a year ago. This year-over-year decrease is primarily due to the impact of additional federal tax credits. We re-evaluate the combined federal and state income tax rates each quarter. Therefore, the current projected effective tax rate for the entire year may change.

#### **Liquidity and Capital Resources**

##### ***Liquidity management***

The objective of liquidity management is to ensure the Company has the ability to generate sufficient cash or cash equivalents in a timely and cost-effective manner to meet its commitments as they become due. Funds are available from a number of sources, such as from the core deposit base and from loans and securities repayments and maturities. Additionally, liquidity is provided from sales of the securities portfolio, lines of credit with major banks, the Federal Reserve and the FHLB, the ability to acquire brokered deposits and the ability to sell loan participations to other banks.

The Company's liquidity management framework includes measurement of several key elements, such as the loan to deposit ratio, volatile liabilities as a percentage of long-term earning assets, and liquid assets plus availability on secured lines as a percentage of certain liabilities. The Company's liquidity framework also incorporates contingency planning to assess the nature and volatility of funding sources and to determine alternatives to these sources. Strong capital ratios, credit quality and core earnings are essential to retaining cost-effective access to the wholesale funding markets. Deterioration in any of these factors could have an impact on the Company's ability to access these funding sources and, as a result, these factors are monitored on an ongoing basis as part of the liquidity management process.

While core deposits and loan and investment repayments are principal sources of liquidity, funding diversification is another key element of liquidity management. Diversity is achieved by strategically varying depositor types, terms, funding markets, and instruments.

*Parent Company liquidity*

The parent Company's liquidity is managed to provide the funds necessary to pay dividends to shareholders, service debt, invest in subsidiaries as necessary, and satisfy other operating requirements. The parent Company's primary funding sources to meet its liquidity requirements are dividends and other payments from subsidiaries and proceeds from the issuance of equity (i.e. stock option exercises).

In December 2008, the Company was approved by the U.S. Treasury for a \$62.0 million Capital Purchase Program investment. At the same time, the Company had the opportunity to privately place a Convertible Trust Preferred Security offering. As a result, the Company decided to take advantage of both the private and public capital sources.

24

---

On December 12, 2008, we completed a private placement of \$25.0 million in Convertible Trust Preferred Securities that qualify as Tier II regulatory capital until they would convert to EFSC common stock. On December 19, 2008, we received \$35.0 million from the U.S. Treasury under the Capital Purchase Program.

As of December 31, 2008, \$20.0 million of the capital funds were used to pay off the Company's line of credit and term loan. Our line of credit with a major bank was closed during the first quarter of 2009. In December 2008, we also injected \$18.0 million into Enterprise to support continued loan growth and bolster its capital ratios. Subject to other demands for cash, we expect to use the remaining capital funds to support continuing loan growth and strengthening our capital position as appropriate.

As of March 31, 2009, the Company had \$85.1 million of outstanding subordinated debentures as part of nine Trust Preferred Securities Pools. These securities are classified as debt but are included in regulatory capital and the related interest expense is tax-deductible, which makes them a very attractive source of funding. Management believes our current level of cash at the holding company of \$21.6 million will be sufficient to meet all projected cash needs in 2009.

*Enterprise liquidity*

Enterprise is subject to regulations and, among other things, may be limited in its ability to pay dividends or transfer funds to the parent Company. Accordingly, consolidated cash flows as presented in the consolidated statements of cash flows may not represent cash immediately available for the payment of cash dividends to the Company's shareholders or for other cash needs.

Enterprise has a variety of funding sources available to increase financial flexibility. In addition to amounts currently borrowed, at March 31, 2009, Enterprise could borrow an additional \$150.0 million from the FHLB of Des Moines under blanket loan pledges and an additional \$279.3 million from the Federal Reserve Bank under pledged loan agreements. Enterprise has unsecured federal funds lines with five correspondent banks totaling \$70.0 million.

Investment securities are an important tool to the Company's liquidity objective. As of March 31, 2009, of the \$111.7 million of the securities available for sale, \$51.1 million was pledged as collateral for public deposits, treasury, tax and loan notes, and other requirements. The remaining \$60.6 million could be pledged or sold to enhance liquidity, if necessary.

In July 2008, Enterprise joined the Certificate of Deposit Account Registry Service, or CDARS, which allows us to provide our customers with access to additional levels of FDIC insurance coverage. The Company considers the reciprocal deposits placed through the CDARS program as core funding and does not report the balances as brokered sources in its internal or external financial reports. As of March 31, 2009, the Bank had \$98.0 million of reciprocal CDARS deposits outstanding. In addition to the reciprocal deposits available through CDARS, we also have access to the "one-way buy" program, which allows us to bid on the excess deposits of other CDARS member banks. The Company will report any outstanding "one-way buy" funds as brokered funds in its internal and external financial reports. At March 31, 2009, we had no outstanding "one-way buy" deposits.

Finally, because the bank is "well-capitalized", it has the ability to sell certificates of deposit through various national or regional brokerage firms, if needed. At March 31, 2009, we had \$257.0 million of brokered certificates of deposit outstanding compared to \$336.0 million outstanding at December 31, 2008, a decrease of \$79.0 million.

Over the normal course of business, the Company enters into certain forms of off-balance sheet transactions, including unfunded loan commitments and letters of credit. These transactions are managed through the Company's various risk management processes. Management considers both on-balance sheet and off-balance sheet transactions in its evaluation of the Company's liquidity. The Company has \$516.5 million in unused loan commitments as of March 31, 2009. While this commitment level would be difficult to fund given the Company's current liquidity resources, the nature of these commitments is such that the likelihood of funding them is very low.

### **Regulatory capital**

The Company and its bank affiliate are subject to various regulatory capital requirements administered by the Federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possible additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and its bank affiliate must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The banking affiliate's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

25

Quantitative measures established by regulation to ensure capital adequacy require the Company and its banking affiliate to maintain minimum amounts and ratios (set forth in the following table) of total and Tier 1 capital to risk-weighted assets, and of Tier 1 capital to average assets. To be categorized as "well capitalized", banks must maintain minimum total risk-based (10%), Tier 1 risk-based (6%) and Tier 1 leverage ratios (5%). Management believes, as of March 31, 2009 and December 31, 2008, that the Company and its banking affiliates meet all capital adequacy requirements to which they are subject.

The following table summarizes the Company's risk-based capital and leverage ratios at the dates indicated:

<i>(Dollars in thousands)</i>	At March 31 2009	At December 31 2008
Tier I capital to risk weighted assets	8.22%	8.89%
Total capital to risk weighted assets	12.75%	12.81%
Leverage ratio (Tier I capital to average assets)	7.60%	8.58%
Tangible common equity to tangible assets	5.64%	5.90%
Tier I capital	\$ 172,781	\$ 190,253
Total risk-based capital	\$ 268,170	\$ 273,978

### **Critical Accounting Policies**

The impact and any associated risks related to the Company's critical accounting policies on business operations are discussed throughout "Management's Discussion and Analysis of Financial Condition and Results of Operations," where such policies affect our reported and expected financial results. For a detailed discussion on the application of these and other accounting policies, see the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

The Company's consolidated financial position reflects material amounts of assets and liabilities that are measured at fair value. Securities available for sale and state tax credits held for sale are carried at fair value. The fair value of securities available for sale is based upon measurements from an independent pricing service, including dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data and other information. Fair value of state tax credits held for sale is determined using an internal valuation model with observable market data inputs. Considerable judgment may be required in determining the assumptions used in certain pricing models, including interest rate, credit risk and liquidity risk assumptions. Changes in these assumptions may have a significant effect on values.

See Note 1 "Summary of Significant Accounting Policies" for more information on recent accounting pronouncements and their impact, if any, on our consolidated financial statements. Management believes there have been no material changes to our critical accounting policies.

**ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

The disclosures set forth in this item are qualified by the section captioned "Safe Harbor Statement Under the Private Securities Litigation Reform Act of 1995" included in Item 2 "Management's Discussion and Analysis of Financial Condition and Results of Operations of this report and other cautionary statements set forth elsewhere in this report.

Market risk arises from exposure to changes in interest rates and other relevant market rate or price risk. The Company faces market risk in the form of interest rate risk through transactions other than trading activities. Market risk from these activities, in the form of interest rate risk, is measured and managed through a number of methods. The Company uses financial modeling techniques to measure interest rate risk. These techniques measure the sensitivity of future earnings due to changing interest rate environments. Guidelines established by the Asset/Liability Management Committees and approved by the Company's Board of Directors are used to monitor exposure of earnings at risk. General interest rate movements are used to develop sensitivity as the Company feels it has no primary exposure to a specific point on the yield curve. These limits are based on the Company's exposure to a 100 basis points and 200 basis points immediate and sustained parallel rate move, either upward or downward.

Interest rate simulations for March 31, 2009 demonstrate that the Company's balance sheet remains relatively neutral to interest rate changes.

26

The following table represents the Company's estimated interest rate sensitivity and periodic and cumulative gap positions calculated as of March 31, 2009.

<i>(in thousands)</i>	Year 1	Year 2	Year 3	Year 4	Year 5
<b>Interest-Earning Assets</b>					
Securities available for sale	\$ 20,801	\$ 23,236	\$ 20,730	\$ 11,118	\$ 5,358
Other investments	-	-	-	-	-
Interest-bearing deposits	5,852	-	-	-	-
Federal funds sold	3,310	-	-	-	-
Loans (1)	1,302,954	185,892	148,673	116,903	142,595
Loans held for sale	2,659	-	-	-	-
Total interest-earning assets	\$ 1,335,576	\$ 209,128	\$ 169,403	\$ 128,021	\$ 147,953
<b>Interest-Bearing Liabilities</b>					
Savings, NOW and Money market deposits	\$ 760,133	\$ -	\$ -	\$ -	\$ -
Certificates of deposit	475,632	239,319	28,787	1,499	1,187
Subordinated debentures	32,064	10,310	14,433	-	28,274
Other borrowings	187,314	20,896	396	7,093	63
Total interest-bearing liabilities	\$ 1,455,143	\$ 270,525	\$ 43,616	\$ 8,592	\$ 29,524
<b>Interest-sensitivity GAP</b>					
GAP by period	\$ (119,567)	\$ (61,397)	\$ 125,787	\$ 119,429	\$ 118,429
Cumulative GAP	\$ (119,567)	\$ (180,964)	\$ (55,177)	\$ 64,252	\$ 182,681
Ratio of interest-earning assets to interest-bearing liabilities					
Periodic	0.92	0.77	3.88	14.90	5.01
Cumulative GAP as of March 31, 2009	0.92	0.90	0.97	1.04	1.10

(1) Adjusted for the impact of the interest rate swaps.

27

#### ITEM 4: CONTROLS AND PROCEDURES

As of March 31, 2009, under the supervision and with the participation of the Company's Chief Executive Officer (CEO) and the Chief Financial Officer (CFO), management has evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-15. Based on that evaluation, the CEO and CFO concluded that the Company's disclosure controls and procedures were effective as of March 31, 2009, to ensure that information required to be disclosed in the Company's periodic SEC filings is processed, recorded, summarized and reported when required. There were no changes during the period covered by this Quarterly Report on Form 10-Q in the Company's internal controls that have materially affected, or are reasonably likely to materially affect, those controls.

#### PART II - OTHER INFORMATION

##### ITEM 6: EXHIBITS

<u>Exhibit Number</u>	<u>Description</u>
	Registrant hereby agrees to furnish to the Commission, upon request, the instruments defining the rights of holders of each issue of long-term debt of Registrant and its consolidated subsidiaries.
*31.1	Chief Executive Officer's Certification required by Rule 13(a)-14(a).
*31.2	Chief Financial Officer's Certification required by Rule 13(a)-14(a).
**32.1	Chief Executive Officer Certification pursuant to 18 U.S.C. § 1350, as adopted pursuant to section § 906 of the Sarbanes-Oxley Act of 2002.
**32.2	Chief Financial Officer Certification pursuant to 18 U.S.C. § 1350, as adopted pursuant to section § 906 of the Sarbanes-Oxley Act of 2002.

\* Filed herewith

\*\* Furnished herewith. Notwithstanding any incorporation of this Quarterly Statement on Form 10-Q in any other filing by the Registrant, Exhibits furnished herewith and designated with two (\*\*) shall not be deemed incorporated by reference to any other filing unless specifically otherwise set forth herein.

28

#### SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, as amended, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of Clayton, State of Missouri on the day of May 11, 2009.
