Amcors News Release

For Release: Wednesday, April 27, 2005

AMCOR PROFIT UP 5% FOR NINE MONTHS TO MARCH

Amcors announces today that the profit after tax and before significant items for the nine months to March 31 was up 5% compared to the same period last year.

Mr Chris Roberts, Executive Chairman, said: This was a pleasing result given the substantial increase in raw material and other costs incurred during the period and indications of slowing economic conditions in a number of regions.

For the nine months to the end of March, cost increases for raw materials on an annualised basis were over \$750 million, of which more than \$400 million was incurred in the PET business. These increases have occurred across all materials including resins, fibre products and metals.

It is estimated that around 90% of these cost increases have been passed through to customers. The balance is yet to be recovered, either due to existing contractual arrangements or competitive pressures in the marketplace. However, the reduction in operating costs achieved from the substantial rationalisation and restructuring undertaken in Amcor Flexibles and Amcor PET have largely offset the unrecovered component of input costs thereby ensuring continued profit growth.

Across the group raw material costs appear to be stabilising in the short term and this should result in improving conditions over the medium term.

Amcors PET Packaging continues to perform in line with expectations with all the key drivers unchanged since the half year result. The build-up into the summer period has started well with indications that volumes for the seasonally strong fourth quarter will be in line with expectations in both the US and Europe.

Edgar Filing: AMCOR LTD - Form 6-K

For the quarter, Amcor Australasia experienced slowing growth, with volumes in many business segments lower than expectations. There is evidence of an economic slowdown in some sectors that appears to be continuing into the fourth quarter and will mean that the full year earnings for the Australasian business are likely to be lower than anticipated at the half year result.

Amcor Flexibles had a difficult quarter with another round of raw material cost increases implemented in early January being difficult to fully pass on in the marketplace. These increases follow directly on from similar increases in the second quarter. Although the business is committed to pass on the increases in a timely fashion, there has been a lag impact for this new round of cost increases that has reduced earnings for the quarter.

Amcor Sunclipse also experienced a lag in passing on further cost increases that impacted earnings for the quarter. The remaining three businesses of Amcor Rentsch and Closures and Amcor Asia all traded in line with the expectations set out at the half year result.

Mr Roberts, said: The achievement of 20% profit growth over two years remains a target, however realistically it is becoming a more difficult task as economic conditions have softened generally and there remains uncertainty on the timing of the recovery of the balance of the raw material and other cost increases.

The ACCC and NZCC continue their investigations and the company is unaware of when any proceedings will commence. At this stage the company is unable to make any comment on the matter.

The Amcor Board is in the final stages of the selection of a new Managing Director with an announcement expected by the end of May.
