(1) Summary of Significant Accounting Policies

Hawthorn Bancshares, Inc. (the Company) through its subsidiary, Hawthorn Bank (the Bank), provides a broad range of banking services to individual and corporate customers located within the communities in and surrounding Jefferson City, Clinton, Warsaw, Springfield, Branson, and Lee s Summit, Missouri. The Company is subject to competition from other financial and nonfinancial institutions providing financial products. Additionally, the Company and its subsidiaries are subject to the regulations of certain regulatory agencies and undergo periodic examinations by those regulatory agencies.

The accompanying unaudited consolidated financial statements of the Company have been prepared in conformity with U.S. generally accepted accounting principles (U.S. GAAP) for interim financial information and with the instructions to Form 10-Q, and Rule 10-01 of Regulation S-X. Accordingly, the unaudited consolidated financial statements do not include all of the information and disclosures required by U.S. GAAP for complete financial statements and should be read in conjunction with the consolidated financial statements and related notes included in the Company s Annual Report on Form 10-K for the year ended December 31, 2013.

The preparation of the consolidated financial statements includes all adjustments that, in the opinion of management, are necessary in order to make those statements not misleading. Management is required to make estimates and assumptions, including the determination of the allowance for loan losses, real estate acquired in connection with foreclosure or in satisfaction of loans, and fair values of investment securities available-for-sale that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The Company s management has evaluated and did not identify any subsequent events or transactions requiring recognition or disclosure in the consolidated financial statements.

Stock Dividend On July 1, 2013, the Company paid a special stock dividend of four percent to shareholders of record at the close of business on June 15, 2013. For all periods presented, share information, including basic and diluted earnings per share, has been adjusted retroactively to reflect this change.

Preferred Stock On December 19, 2008, the Company announced its participation in the U.S. Treasury Department s Capital Purchase Program (CPP), a voluntary program that provides capital to financially healthy banks. Participation in this program included the Company s issuance of 30,255 shares of senior preferred stock (with a par value of $1,000 per share) and a ten year warrant to purchase approximately 287,133 shares of common stock. On May 9, 2012, the Company redeemed 12,000 of the 30,255 shares of preferred stock issued under the U.S. Treasury s CPP program, and on May 15, 2013, the remaining 18,255 shares were redeemed.

On June 11, 2013, the common stock warrant issued under the U.S. Treasury Department s CPP program was repurchased by the Company pursuant to a letter agreement between the Treasury and the Company for a total repurchase price of $540,000, or $1.88 per warrant share. The repurchase price was based on the fair market value of the warrant as agreed upon by the Company and the Treasury. The repurchase of the warrant ends the Company s participation in the U.S. Treasury Department s CPP.

(2) Loans and Allowance for Loan Losses

Loans

A summary of loans, by major class within the Company s loan portfolio, at March 31, 2014 and December 31, 2013 is as follows:

(in thousands)	**March 31, 2014**	**December 31, 2013**
Commercial, financial, and agricultural	$ 132,346	$ 133,717
Real estate construction - residential	22,060	21,008

Real estate mortgage - commercial	384,130	382,550
Installment and other consumer	19,121	21,655
Total loans	$ 845,307	$ 839,547

The Bank grants real estate, commercial, installment, and other consumer loans to customers located within the communities surrounding Jefferson City, Clinton, Warsaw, Springfield, Branson and Lee s Summit, Missouri. As such, the Bank is susceptible to changes in the economic environment in these communities. The Bank does not have a concentration of credit in any one economic sector. Installment and other consumer loans consist primarily of the financing of automotive vehicles. At March 31, 2014, loans with a carrying value of $376.9 million were pledged to the Federal Home Loan Bank as collateral for borrowings and letters of credit.

Loans, or portions of loans, are charged off to the extent deemed uncollectible or a loss is confirmed. Loan charge-offs reduce the allowance for loan losses, and recoveries of loans previously charged off are added back to the allowance. If management determines that it is probable that all amounts due on a loan will not be collected under the original terms of the loan agreement, the loan is considered to be impaired. These loans are evaluated individually for impairment, and in conjunction

with current economic conditions and loss experience, specific reserves are estimated as further discussed below. Loans not individually evaluated are aggregated by risk characteristics and reserves are recorded using a consistent methodology that considers historical loan loss experience by loan type, delinquencies, current economic conditions, loan risk ratings and industry concentration.

The following table provides the balance in the allowance for loan losses at March 31, 2014 and December 31, 2013, and the related loan balance by impairment methodology.

Impaired Loans

Loans evaluated under the Financial Accounting Standards Board s (FASB) Accounting Standards Update (ASU) 310-10-35 include loans which are individually evaluated for impairment. All other loans are collectively evaluated for impairment under ASC 450-20. Impaired loans totaled $36.0 million and $35.1 million at March 31, 2014 and December 31, 2013, respectively, and are comprised of loans on non-accrual status and loans which have been classified as troubled debt restructurings. Total impaired loans of $36.0 million at March 31, 2014 were individually evaluated for impairment compared to $34.8 million of impaired loans individually evaluated for impairment and $259,000 of non-accrual consumer loans that were collectively evaluated for impairment at December 31, 2013. Beginning in 2014, consumer non-accrual loans were included the individually evaluated impairment calculations.

The net carrying value of impaired loans is generally based on the fair values of collateral obtained through independent appraisals or internal evaluations, or by discounting the total expected future cash flows. At March 31, 2014 and December 31, 2013, $32.7 million and $21.8 million, respectively, of impaired loans were evaluated based on the fair value of the loan s

collateral. Once the impairment amount is calculated, a specific reserve allocation is recorded. At March 31, 2014, $4.8 million of the Company s allowance for loan losses was allocated to impaired loans totaling $36.0 million compared to $4.8 million of the Company s allowance for loan losses allocated to impaired loans totaling approximately $35.1 million at December 31, 2013. Management determined that $21.3 million, or 59%, of total impaired loans required no reserve allocation at March 31, 2014 compared to $18.8 million, or 54%, at December 31, 2013 primarily due to adequate collateral values, acceptable payment history and adequate cash flow ability.

The categories of impaired loans at March 31, 2014 and December 31, 2013 are as follows:

The recorded investment varies from the unpaid principal balance primarily due to partial charge-offs taken resulting from current appraisals received. The amount recognized as interest income on impaired loans continuing to accrue interest, primarily related to troubled debt restructurings, was $141,000 and $108,000, for the three months ended March 31, 2014 and 2013, respectively. The average recorded investment in impaired loans is calculated on a monthly basis during the periods reported. Contractual interest lost on loans in non-accrual status was $289,000 and $350,000 for the three months ended March 31, 2014 and 2013, respectively.

Delinquent and Non-Accrual Loans

The delinquency status of loans is determined based on the contractual terms of the notes. Borrowers are generally classified as delinquent once payments become 30 days or more past due.

The following table provides aging information for the Company s past due and non-accrual loans at March 31, 2014 and December 31, 2013.

Credit Quality

The Company categorizes loans into risk categories based upon an internal rating system reflecting management s risk assessment. Loans are placed on *watch* status when (1) one or more weaknesses that could jeopardize timely liquidation exits; or (2) the margin or liquidity of an asset is sufficiently tenuous that adverse trends could result in a collection problem. Loans classified as *substandard* are inadequately protected by the current sound worth and paying capacity of the obligor or by the collateral pledged, if any. Loans so classified may have a well defined weakness or weaknesses that jeopardize the repayment of the debt. Such loans are characterized by the distinct possibility that the Company may sustain some loss if the deficiencies are not corrected. It is the Company s policy to discontinue the accrual of interest income on loans when management believes that the collection of interest or principal is doubtful. Loans are placed on *non-accrual* status when (1) deterioration in the financial condition of the borrower exists for which payment of full principal and interest is not expected, or (2) payment of principal or interest has been in default for a period of 90 days or more and the asset is not both well secured and in the process of collection. Subsequent interest payments received on such loans are applied to principal if any doubt exists as to the collectability of such principal; otherwise, such receipts are recorded as interest income on a cash basis.

Troubled Debt Restructurings

At March 31, 2014, loans classified as troubled debt restructurings (TDRs) totaled $22.2 million, of which $11.0 million were on non-accrual status and $11.2 million were on accrual status. At December 31, 2013, TDRs totaled $21.5 million, of which $10.1 million were on non-accrual status and $11.4 million were on accrual status. When an individual loan is determined to be a TDR, the amount of impairment is based upon the present value of expected future cash flows discounted at the loan s effective interest rate or the fair value of the underlying collateral less applicable selling costs. Accordingly, specific reserves of $2.4 million and $2.2 million related to TDRs were allocated to the allowance for loan losses at March 31, 2014 and December 31, 2013, respectively.

The following table summarizes loans that were modified as TDRs during the periods indicated.

Notes to the Consolidated Financial Statements

(Unaudited)

The Company s portfolio of loans classified as TDRs include concessions such as interest rates below the current market rate, deferring principal payments, and extending maturity dates. Once a loan becomes a TDR, it will continue to be reported as a TDR until it is ultimately repaid in full, charged-off, or the collateral for the loan is foreclosed and sold. The Company considers a loan in TDR status in default when the borrower s payment according to the modified terms is at least 90 days past due or has defaulted due to expiration of the loan s maturity date. During the three months ended March 31, 2014, three loans meeting the TDR criteria were modified compared to one loan during the three months ended March 31, 2013. There were no loans modified as a TDR that defaulted during the three months ended March 31, 2014 and 2013, respectively, and within twelve months of their modification date.

All of the Company s investment securities are classified as available for sale. Agency bonds and notes, agency mortgage-backed securities and agency collateralized mortgage obligations (CMO) include securities issued by the Government National Mortgage Association (GNMA), a U.S. government agency, and the Federal National Mortgage Association (FNMA), the Federal Home Loan Mortgage Corporation (FHLMC) and the Federal Home Loan Bank (FHLB), which are U.S. government-sponsored enterprises.

Investment securities that are classified as restricted equity securities primarily consist of Federal Home Loan Bank stock and the Company s interest in statutory trusts. These securities are reported at cost in the amount of $4.0 million as of both March 31, 2014 and December 31, 2013, respectively.

Debt securities with carrying values aggregating approximately $186.2 million and $145.8 million at March 31, 2014 and December 31, 2013, respectively, were pledged to secure public funds, securities sold under agreements to repurchase, and for other purposes as required or permitted by law.

The total available for sale portfolio consisted of approximately 294 securities at March 31, 2014. The portfolio included 97 securities having an aggregate fair value of $130.3 million that were in a loss position at March 31, 2014. Securities identified as temporarily impaired which had been in a loss position for 12 months or longer totaled $12.4 million at fair value. The $3.2 million aggregate unrealized loss included in accumulated other comprehensive income at March 31, 2014 was caused by interest rate fluctuations.

The total available for sale portfolio consisted of approximately 348 securities at December 31, 2013. The portfolio included 96 securities having an aggregate fair value of $115.1 million that were in a loss position at December 31, 2013. Securities identified as temporarily impaired which had been in a loss position for 12 months or longer totaled $6.4 million at fair value.

Notes to the Consolidated Financial Statements

(Unaudited)

The $4.2 million aggregate unrealized loss included in accumulated other comprehensive income at December 31, 2013 was caused by interest rate fluctuations.

Because the decline in fair value is attributable to changes in interest rates and not credit quality these investments were not considered other-than-temporarily impaired at March 31, 2014 and December 31, 2013, respectively.

In addition, the Company does not have the intent to sell these investments over the period of recovery, and it is not more likely than not that it will be required to sell such investment securities.

The table below presents the components of investment securities gains and losses which have been recognized in earnings.

Other changes in fair value (2)		(152)		(210)
Balance at end of period	$	3,040	$	2,689

(1) The change in fair value resulting from changes in valuation inputs or assumptions used in the valuation model reflects the change in discount rates and prepayment speed assumptions primarily due to changes in interest rates.

(2) Other changes in fair value reflect changes due to customer payments and passage of time.

The following key data and assumptions were used in estimating the fair value of the Company s MSRs as of the three months ended March 31, 2014 and 2013:

	Three Months Ended March 31, 2014	2013
Weighted average constant prepayment rate	9.07%	17.63%
Weighted average note rate	4.01%	4.12%
Weighted average discount rate	9.08%	8.03%
Weighted average expected life (in years)	6.20	4.10

(6) Income Taxes

Income taxes as a percentage of earnings (loss) before income taxes as reported in the consolidated financial statements were 34.5% for the three months ended March 31, 2014 compared to 31.3% for the three months ended March 31, 2013.

The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based upon the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes it is more likely than not the Company will realize the benefits of these temporary differences at March 31, 2014 and, therefore, did not establish a valuation reserve.

(8) Employee Benefit Plans

Employee Benefits

Employee benefits charged to operating expenses are summarized in the table below for the periods indicated.

(in thousands)	Threee Months Ended March 31, 2014	2013
Payroll taxes	$ 293	$ 304
Medical plans	518	491
401k match and profit sharing	153	75
Pension plan	236	286
Other	11	47
Total employee benefits	$ 1,211	$ 1,203

The Company s profit-sharing plan includes a matching 401k portion, in which the Company matches the first 3% of eligible employee contributions. The Company made annual contributions in an amount up to 6% of income before income taxes and before contributions to the profit-sharing and pension plans for all participants, limited to the maximum amount deductible for federal income tax purposes, for each of the periods shown. In addition, employees were able to make additional tax-deferred contributions.

Pension

The Company provides a noncontributory defined benefit pension plan for all full-time employees. An employer is required to recognize the funded status of a defined benefit postretirement plan as an asset or liability in its balance sheet and to recognize changes in that funded status in the year in which the changes occur through comprehensive income. Under the Company s funding policy for the defined benefit pension plan, contributions are made to a trust as necessary to provide for current service and for any unfunded accrued actuarial liabilities over a reasonable period. To the extent that these requirements are fully covered by assets in the trust, a contribution might not be made in a particular year. The Company has not made any contributions to the defined benefit plan for the current plan year. The minimum required contribution for the 2014 plan year is estimated to be $1.3 million. The Company has not determined whether it will make any contributions other than the minimum required funding contribution for 2014.

Components of Net Pension Cost and Other Amounts Recognized in Accumulated Other Comprehensive Income

The following items are components of net pension cost for the periods indicated:

(9) Stock Compensation

The Company s stock option plan provides for the grant of options to purchase up to 547,492 shares of the Company s common stock to officers and other key employees of the Company and its subsidiaries. All options have been granted at exercise prices equal to fair value and vest over periods ranging from four to five years, except options issued in 2008 to acquire 11,578 shares that vested immediately.

The following table summarizes the Company s stock option activity:

	Number of Shares		Weighted average Exercise Price	Weighted Average Contractual Term (in years)		Aggregate Intrinsic Value ($000)
Outstanding, beginning of period	121,405	$	24.14			
Granted	0		0.00			
Exercised	0		0.00			
Forfeited	0		0.00			
Expired	(18,255)		28.97			
Outstanding, March 31, 2014	103,150	$	23.28	2.70	$	0.00
Exercisable, March 31, 2014	88,633	$	23.49	2.50	$	0.00

Options have been adjusted to reflect a 4% stock dividend paid on July 1, 2013.

Total stock-based compensation expense for the three months ended March 31, 2014 and 2013 was $6,000 and $2,000, respectively. As of March 31, 2014, the total unrecognized compensation expense related to non-vested stock awards was $44,000 and the related weighted average period over which it is expected to be recognized is approximately 1.6 years.

(10) Earnings (Loss) per Share

Basic earnings (loss) per share is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding during the year. Diluted earnings (loss) per share gives effect to all dilutive potential common shares that were outstanding during the year. The calculations of basic and diluted earnings (loss) per share are as follows for the periods indicated:

	Three Months Ended March 31,			
(dollars in thousands, except per share data)		**2014**		**2013**
Basic earnings (loss) per common share:				
Net income (loss)	$	1,987	$	(136)
Less:				
Preferred stock dividends and accretion of discount		0		295
Net income (loss) available to common shareholders	$	1,987	$	(431)
Basic earnings (loss) per share	$	0.39	$	(0.09)
Diluted earnings (loss) per common share:				
Net income (loss)	$	1,987	$	(136)
Less:				
Preferred stock dividends and accretion of discount		0		295
Net income (loss) available to common shareholders	$	1,987	$	(431)
Average shares outstanding		5,032,679		5,032,679
Effect of dilutive stock options		0		0
Average shares outstanding including dilutive stock options		5,032,679		5,032,679
Diluted earnings (loss) per share	$	0.39	$	(0.09)

Under the treasury stock method, outstanding stock options are dilutive when the average market price of the Company s common stock, when combined with the effect of any unamortized compensation expense, exceeds the option price during the period, except when the Company has a loss from continuing operations available to common shareholders. In addition, proceeds from the assumed exercise of dilutive options along with the related tax benefit are assumed to be used to repurchase common shares at the average market price of such stock during the period.

The following options to purchase shares during the dates indicated were not included in the respective computations of diluted earnings per share because the exercise price of the option, when combined with the effect of the unamortized compensation expense, was greater than the average market price of the common shares and were considered anti-dilutive.

	Three Months Ended March 31, 2014	2013
Anti-dilutive shares - option shares	103,150	188,491
Anti-dilutive shares - warrant shares		298,618
Total anti-dilutive shares	103,150	487,109

(11) Fair Value Measurements

The Company uses fair value measurements to record fair value adjustments to certain financial and nonfinancial assets and liabilities. The FASB ASC Topic 820, *Fair Value Measurements and Disclosures,* defines fair value, establishes a framework for the measurement of fair value, and enhances disclosures about fair value measurements. The standard applies whenever other standards require (permit) assets or liabilities to be measured at fair value but does not expand the use of fair value in any new circumstances. In this standard, FASB clarified the principle that fair value should be based on the assumptions market participants would use when pricing the asset or liability. In support of this principle, the standard establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. As of March 31, 2014 and December 31, 2013, respectively, there were no transfers into or out of Levels 1-3.

The fair value hierarchy is as follows:

Level 1 Inputs are unadjusted quoted prices for identical assets or liabilities in active markets.

Level 2 Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets and liabilities in active markets, such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3   Inputs are unobservable inputs for the asset or liability and significant to the fair value. These may be internally developed using the Company s best information and assumptions that a market participant would consider.

ASC Topic 820 also provides guidance on determining fair value when the volume and level of activity for the asset or liability have significantly decreased and on identifying circumstances when a transaction may not be considered orderly.

The Company is required to disclose assets and liabilities measured at fair value on a recurring basis separate from those measured at fair value on a nonrecurring basis. Nonfinancial assets measured at fair value on a nonrecurring basis would include foreclosed real estate, long-lived assets, and core deposit intangible assets, which are reviewed when circumstances or other events indicate that impairment may have occurred.

Available-for-Sale Securities

The fair value measurements of the Company s investment securities are determined by a third party pricing service which considers observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond s terms and conditions, among other things. The fair value measurements are subject to independent verification to another pricing source by management each quarter for reasonableness. Securities classified as available-for-sale are reported at fair value utilizing Level 2 inputs.

Mortgage Servicing Rights

The fair value of mortgage servicing rights is based on the discounted value of estimated future cash flows utilizing contractual cash flows, servicing rate, constant prepayment rate, servicing cost, and discount rate factors. Accordingly, the fair value is estimated based on a valuation model that calculates the present value of estimated future net servicing income. The model incorporates assumptions that market participants use in estimating future net servicing income, including estimates of prepayment speeds, market discount rates, cost to service, float earnings rates, and other ancillary income, including late fees. The valuation models estimate the present value of estimated future net servicing income. The Company classifies its servicing rights as Level 3.

Valuation methods for instruments measured at fair value on a nonrecurring basis

Following is a description of the Company s valuation methodologies used for assets and liabilities recorded at fair value on a nonrecurring basis:

Impaired Loans

The Company does not record loans at fair value on a recurring basis other than loans that are considered impaired. The net carrying value of impaired loans is generally based on fair values of the underlying collateral obtained through independent appraisals or internal evaluations, or by discounting the total expected future cash flows. Once the fair value of the collateral has been determined and any impairment amount calculated, a specific reserve allocation is made. Because many of these inputs are not observable, the measurements are classified as Level 3. As of March 31, 2014, the Company identified $14.7 million in impaired loans that had specific allowances for losses aggregating $4.8 million. Related to these loans, there was $1.1 million in charge-offs recorded during the three months ended March 31, 2014. As of March 31, 2013, the Company identified $25.7 million in impaired loans that had specific allowances for losses aggregating $4.1 million. Related to these loans, there was $1.4 million in charge-offs recorded during the three months ended March 31, 2013.

Other Real Estate Owned and Repossessed Assets

Other real estate owned and repossessed assets consisted of loan collateral that has been repossessed through foreclosure. This collateral is comprised of commercial and residential real estate and other non-real estate property, including autos, manufactured homes, and construction equipment. Other real estate owned assets are recorded as held for sale initially at the lower of the loan balance or fair value of the collateral less estimated selling costs. The Company relies on external appraisals and assessment of property values by internal staff. In the case of non-real estate collateral, reliance is placed on a variety of sources, including external estimates of value and judgment based on experience and expertise of internal specialists. Subsequent to foreclosure, valuations are updated periodically, and the assets may be written down to reflect a new cost basis. Because many of these inputs are not observable, the measurements are classified as Level 3.

(12) Fair Value of Financial Instruments

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate such value:

Loans

The fair values of loans are estimated by discounting the expected future cash flows using the current rates at which similar loans could be made to borrowers with similar credit ratings and for the same remaining maturities. The net carrying amount of impaired loans is generally based on the fair values of collateral obtained through independent appraisals or internal evaluations, or by discounting the total expected future cash flows. This method of estimating fair value does not incorporate the exit-price concept of fair value prescribed by ASC Topic 820.

Investment Securities

A detailed description of the fair value measurement of the debt instruments in the available-for-sale sections of the investment security portfolio is provided in the *Fair Value Measurement* section above. A schedule of investment securities by category and maturity is provided in the notes on *Investment Securities*.

Federal Home Loan Bank (FHLB) Stock

Ownership of equity securities of FHLB is restricted and there is no established market for their resale. The carrying amount is a reasonable estimate of fair value.

Federal Funds Sold, Cash, and Due from Banks

The carrying amounts of short-term federal funds sold and securities purchased under agreements to resell, interest earning deposits with banks, and cash and due from banks approximate fair value. Federal funds sold and securities purchased under agreements to resell classified as short-term generally mature in 90 days or less.

Mortgage Servicing Rights

The fair value of mortgage servicing rights is based on the discounted value of estimated future cash flows utilizing contractual cash flows, servicing rate, constant prepayment rate, servicing cost, and discount rate factors. Accordingly, the fair value is estimated based on a valuation model that calculates the present value of estimated future net servicing income. The model incorporates assumptions that market participants use in estimating future net servicing income, including estimates of prepayment speeds, market discount rates, cost to service, float earnings rates, and other ancillary income, including late fees.

Cash Surrender Value - Life Insurance

The fair value of Bank owned life insurance (BOLI) approximates the carrying amount. Upon liquidation of these investments, the Company would receive the cash surrender value which equals the carrying amount.

Accrued Interest Receivable and Payable

For accrued interest receivable and payable, the carrying amount is a reasonable estimate of fair value because of the short maturity for these financial instruments.

Deposits

The fair value of deposits with no stated maturity, such as noninterest-bearing demand, NOW accounts, savings, and money market, is equal to the amount payable on demand. The fair value of time deposits is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities.

(Unaudited)

Securities Sold under Agreements to Repurchase and Interest-bearing Demand Notes to U.S. Treasury

For securities sold under agreements to repurchase and interest-bearing demand notes to U.S. Treasury, the carrying amount is a reasonable estimate of fair value, as such instruments reprice in a short time period.

Subordinated Notes and Other Borrowings

The fair value of subordinated notes and other borrowings is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for other borrowed money of similar remaining maturities.
