BRASIL TELECOM S.A. With recognition of the prior fulfillment of the obligations for universalization stated in the General Plan of Universalization Goals (PGMU), forecasted for December 31, 2003, in accordance with the acts published in the Diário Oficial da União (Official Daily Government Newspaper) on January 19, 2004, the restriction of providing other telecommunications services ceased to exist, permitting the Company, its parent companies, its subsidiaries and associated companies to obtain new authorizations. On the same date ANATEL, issued authorizations for the Company to exploit STFC in the following service modalities: (i) local and domestic long distance calls in Regions I and III and Sectors 20, 22 and 25 of Region II of the General Concession Plan (PGO); and (ii) international long distance calls in Regions I, II of III of PGO. As a result of these authorizations, the Company began to exploit the domestic and international long distance services in the new regions, starting on January 22, 2004. In the case of the local service to be provided in regions I and III, as regulated, the Company has a period of 12 months to begin its operations as from the date of the aforementioned authorization.

Information related with the quality and universal service targets of the STFC are available to interested parties on ANATEL's homepage (www.anatel.gov.br).

The Company is a subsidiary of Brasil Telecom Participações S.A. (BrTP), incorporated on May 22, 1998 as a result of the privatization of the Telebrás group (State owned holding company of the telecommunication segment).

The Company is registered at the Brazilian Securities Commission - CVM and at the Securities and Exchange Commission - SEC in the USA. Its shares are traded on the São Paulo Stock Exchange BOVESPA and its American Depositary Receipts - ADRs on the New York Stock Exchange (NYSE). 2. PRESENTATION OF FINANCIAL STATEMENTS

Preparation Criteria

The financial statements have been prepared in accordance with accounting practices adopted in Brazil, in accordance with Brazilian corporation law, rules of the CVM and rules applicable to Switched Fixed Telecommunications Services STFC concessionaires.

As the Company is registered with the SEC, it is subject to its standards, and should annually prepare financial statements and other information by using criteria that comply with that entity s requirements. For complying with these requirements and aiming at meeting the market s information needs, the Company adopts, as a principle, the practice of publishing information in both markets in their respective languages.

The notes to the financial statements are presented in thousands of reais, unless demonstrated otherwise in each note. According to each situation, the notes to the financial statement present information related with the Company and the consolidated financial statements, identified as PARENT COMPANY and CONSOLIDATED , respectively. When the information is common to both situations, it is indicated as PARENT COMPANY AND CONSOLIDATED .

The accounting estimates were based on objective and subjective factors, based on management s judgment to determine the appropriate amount to be recorded in the financial statements. Significant elements subject to these estimates and assumptions include the residual amount of the fixed assets, provision for doubtful accounts, inventories and deferred income tax assets, provision for contingencies, valuation of derivative instruments, and assets and liabilities related to benefits for employees. The settlement of transactions involving these estimates may result in significant different amounts due to the inherent imprecision of the process of determining these amounts. Management reviews its estimates and assumptions at least quarterly.

Consolidated Financial Statements

The consolidation was made in accordance with CVM Instruction 247/96 and includes the companies listed in Note 1.

Some of the main consolidation procedures are:

Consolidated Financial Statements

Edgar Filing: BRASIL TELECOM SA - Form 6-K

- Elimination of intercompany balances, as well as revenue and expenses of transactions among them;
- Elimination of the investor's shareholdings, reserves and accumulated results in the investees; and
- Segregation of the portions of shareholders' equity and income belonging to minority shareholders, indicated in specific items.

The reconciliation between the Parent Company net income and the consolidated figures is as follows:

| | NET INCOME | | SHAREHOLDERS EQUITY | |

In addition, the Company presents, in Note 17, the statement of cash flows, prepared under the indirect method, in accordance with Accounting Rules and Procedures NPC 20 of the Brazilian Institute of Independent Auditors IBRACON.

3. SUMMARY OF SIGNIFICANT ACCOUNTING PRACTICES

The criteria mentioned in this note refer to the practices adopted by the Company and its subsidiaries that are included in the consolidated balance sheet.

a. Cash and cash equivalents: Cash equivalents are short-term, high-liquid investments, with immediate maturity. They are recorded at cost plus income earned to the end of the quarter, not exceeding market value.

b. Trade accounts receivable: Receivables from users of telecommunications services are recorded at the amount of the tariff in effect on the date the service is rendered. Unbilled services provided to customers at the balance sheet date are also included in trade accounts receivable. The criterion adopted for making the provision for doubtful accounts takes into account the calculation of the actual percentage of losses incurred on each range of accounts receivable. The historic percentages are applied to the current ranges of accounts receivable, also including accounts coming due and the portion yet to be billed, thus composing the amount that could become a future loss, which is recorded as a provision.

c. Inventories: Stated at average acquisition cost, not exceeding replacement cost. Inventories are segregated into inventories for plant expansion and those for maintenance. The inventories to be used in expansion are classified in property, plant and equipment (construction in progress), and inventories to be used in maintenance are classified as current and non-current assets. Obsolete items are provided for through an allowance for losses.

d. Investments: Investments in subsidiaries are valued using the equity method. Goodwill is calculated based on the expectation of future results and its amortization is based on the expected realization/timing over a forecasted period of not more than ten years. Other investments are recorded at cost less allowance for losses, when applicable. The investments resulting from income tax incentives are recognized at the date of investment, and result in shares of companies with tax incentives or investment fund quotas. In the period between the investment date and receipt of shares or quotas, they remain recognized in non-current assets. The Company adopts the criterion of using the maximum percentage of tax allocation. These investments are periodically valued at cost or market prices, when the latter is lower, and allowances for losses are recorded if required.

e. Property, plant and equipment: Stated at cost of acquisition and/or construction, less accumulated depreciation. Financial charges for financing assets and construction in progress are capitalized.

The costs incurred, when they represent improvements (increase in installed capacity or useful life) are capitalized. Maintenance and repair are charged to the profit and losses accounts, on an accrual basis.

Depreciation is calculated under the straight-line method. Depreciation rates used are based on expected useful lives of the assets and in accordance with the standards of the Public Telecommunications Service. The main rates used are set forth in Note 24.

f. Deferred charges: Segregated between deferred charges on amortization and formation. Their breakdown is shown in Note 25. Amortization is calculated under the straight-line method in accordance with the legislation in force. When benefits are not expected from an asset, it is written off against non-operating income.

3. SUMMARY OF SIGNIFICANT ACCOUNTING PRACTICES

g. Income and Social Contribution Taxes: Income and social contribution taxes are accounted for on an accrual basis. These taxes levied on temporary differences, tax losses, and the negative social contribution base are recorded under assets or liabilities, as applicable, according to the assumption of realization or future demand, within the parameters established in the CVM Instruction nr 371/02.

h. Loans and Financing: Updated to the balance sheet date for monetary or exchange variations and interest incurred. Equal restatement is applied to the guarantee contracts to hedge the debt.

i. Provision for Contingencies: Recognized based on management's risk assessment and measured based on economic grounds and legal counselors' opinions on the lawsuits and other contingency factors known as of the balance sheet date. The basis and nature of the provisions are described in Note 7.

j. Revenue recognition: Revenues from services rendered are accounted for on an accrual basis. Local and long distance calls are charged based on time measurement according to the legislation in force. Revenues from sales of payphone cards are recorded upon sale.

k. Recognition of Expenses: Expenses are recognized on an accrual basis, considering their relation with revenue realization. Expenses related to other periods are deferred.

l. Financial Income (Expense), Net: Financial income comprises interest earned on overdue accounts receivable from services, gains on financial investments, exchange variation and hedges. Financial expenses comprise interest incurred and other charges on loans, financing and other financial transactions.

Interest on Shareholders' Equity is included in the financial expenses balance for financial statement presentation purposes, the amounts are reversed to profit and loss accounts and reclassified as a deduction of retained earnings, in the shareholders' equity.

m. Research and Development: Costs for research and development are recorded as expenses when incurred, except for expenses with projects linked to the generation of future revenue, which are recorded under deferred assets and amortized over a five-year period from the beginning of the operations.

n. Benefits to Employees: Private pension plans and other retirement benefits sponsored by the Company and its subsidiaries for their employees are managed by SISTEL and BrTPREV. Contributions are determined on an actuarial basis, when applicable, and accounted for on an accrual basis. As of December 31, 2001, to comply with CVM Deliberation 371/00, the Company recorded its actuarial deficit on the balance sheet date against shareholders' equity, net of its tax effects. As from 2002, as new actuarial revaluations show the necessity for adjustments to the provision, they are recognized in the profit and loss accounts, in accordance with the CVM deliberation above. Complementary information on private pension plans is described in Note 6.

o. Profit Sharing: The provisions for employee and directors' profit sharing are recognized on an accrual basis. The calculation of the amount, which is paid in the subsequent year after the provision is recognised, is based on the target program established with the labor union, in accordance with Law 10,101/00 and the Company's bylaws.

p. Earnings per thousand shares: Calculated based on the number of shares outstanding at the balance sheet date, which comprises the total number of shares issued net of treasury stock.

5. MARKET VALUE OF FINANCIAL ASSETS AND LIABILITIES (FINANCIAL INSTRUMENTS) AND RISK ANALYSIS

The Company and its subsidiary assessed the book value of its assets and liabilities as compared to market or realizable values (fair value), based on information available and valuation methodologies applicable to each case. The interpretation of market data regarding the choice of methodologies requires considerable judgment and determination of estimates to achieve an amount considered adequate for each case. Accordingly, the estimates presented may not necessarily indicate the amounts, which can be obtained in the current market. The use of different assumptions for calculation of market value or fair value may have material effect on the obtained amounts. The selection of assets and liabilities presented in this note has been made based on their materiality. Instruments whose values approximates their fair values, and risk assessment is not significant are not mentioned.

Edgar Filing: BRASIL TELECOM SA - Form 6-K

In accordance with their natures, the financial instruments may involve known or unknown risks the potential of such risks is important for the best judgment. Thus, there may be risks with or without guarantees, depending on circumstantial or legal aspects. Among the principal market risk factors which can affect the Company's and subsidiaries' business are the following:

a. Credit Risk

The majority of the services provided by Brasil Telecom S.A. are related to the Concession Agreement, and a significant portion of these services is subject to the determination of tariffs by the regulatory agency. The credit policy, in case of telecommunications public services, is subject to legal standards established by the concession authority. The risk exists since the Company may incur losses arising from the difficulty in receiving amounts billed to its customers. In the quarter, the Company's default was 2.97% of the gross revenue (2.46% for the same period last year). By means of internal controls, the level of accounts receivable is constantly monitored, thus limiting the risk of past due accounts by cutting the access to the service (out phone traffic) if the bill is overdue for over 30 days. Exceptions are made for telephone services, which should be maintained for national security or defense.

b. Exchange Rate Risk

Assets

The Company has asset loans in foreign currency subject to exchange rate fluctuations. The assets exposed to exchange rate risk are as follows:

| | PARENT COMPANY | |
|---------------------------|-----------------------|----------------|
| | BOOK AND MARKET VALUE | |
| | 09/30/04 | 06/30/04 |
| Assets | | |

| Current | 148,091 | 159,773 |

Loans denominated in US dollar granted to BrT SCS Bermuda on April 2, 2004, bearing interest rate of 3% p.a.

Liabilities

The Company has loans and financing contracted in foreign currency. The risk related to these liabilities arises from possible exchange rate fluctuations, which may increase these liabilities balances. Loans subject to this risk represent approximately 26% of the total liabilities (29% on June 30, 2004). To minimize this type of risk, the subsidiary enters into swap agreements with financial institutions to hedge foreign exchange exposures. 45% of the debt portion in foreign currency is covered by hedge agreements (25% on June 30, 2004). Unrealized positive or negative effects of these operations are recorded in the profit and loss as gain or loss. Consolidated net gain amounted to R\$44,105 until the third quarter (losses of R\$76,695 for the same period of last year).

Net exposure as per book and market values, at the exchange rate prevailing on the balance sheet date, is as follows:

| | PARENT COMPANY | | | |
|---------------------|------------------|------------------|------------------|------------------|
| | 09/30/04 | | 06/30/04 | |

| Non-current | 1,360,158 | 1,448,690 | 1,447,269 | 1,426,429 |

The method used for calculation of market value (fair value) of loans and financing in foreign currency and hedge instruments was the discounted cash flow at the market rates prevailing at the balance sheet date.

c. Interest Rate Risk

Assets

The Company has loans with a telephone directory company, with interest indexed to the IGP-DI (a national index price) and loans resulting from the sale of fixed assets to other telephone service companies, bearing interest rate indexed to the Column 27 of the FGV (a national index price). The consolidated financial statements also present a loan agreement with Freelance S.A., which is indexed to IGP-M.

At the balance sheet date, these assets are represented as follows:

| | PARENT COMPANY | | CONSOLIDATED | |
|--|-----------------------|--------------|-----------------------|---------------|
| | Book and Market Value | | Book and Market Value | |
| | 09/30/04 | 06/30/04 | 09/30/04 | 06/30/04 |

| Non-current assets | 8,116 | 7,929 | 8,677 | 7,929 |

Liabilities

Brasil Telecom S.A. has loans and financing contracted in local currency subject to interest rates linked to indexing units TJLP, UMBNDES, CDI (Rate DI - CETIP) and IGP-M. The inherent risk in these liabilities arises from possible variations in these rates. The Company has contracted derivative contracts to hedge 52% (78% in June 30, 2004) of the liabilities subject to the UMBNDES rate, using exchange rate swap contracts, considering the influence of the dollar on the interest rate (basket of currencies) of these liabilities. However, the other market rates are continually monitored to evaluate the need to contract derivatives to protect against the risk of volatility of these rates.

In addition to the loans and financing, the Company issued non-convertible private and public debentures. These liabilities were contracted at interest rates linked to the CDI, and the risk associated with this liability results of the possible increase of the rate.

The abovementioned liabilities at the balance sheet date are as follows:

| | PARENT COMPANY AND CONSOLIDATED | | | |
|--------------------------|---------------------------------|------------------|------------------|------------------|
| | 09/30/04 | | 06/30/04 | |

Book value is equivalent to market values where the current contractual conditions for these types of financial instruments are similar to those in which they were originated.

d. Risk of Not Linking Monetary Restatement Indexes to Accounts Receivable

Loan and financing rates contracted by the Company are not linked to amounts of accounts receivable. Telephony tariff adjustments do not necessarily follow increases in local interest rates, which affect the company's debts. Consequently, a risk arises from this potential lapse of correlation.

e. Contingency Risks

Contingency risks are assessed according to loss hypotheses, as probable, possible or remote. Contingencies considered as probable risks are recorded as liabilities. Details of these risks are presented in Note 7.

f. Risks Related to Investments

The Company has investments, which are valued using the equity method and stated at acquisition cost. The investments valued by the equity method are presented in Note 23, for which no market value exists, as they are represented by non-listed corporations or private limited companies. Provisions are recorded for losses when the future cash flows expected from an investment lead to expectations of losses.

In this quarter, a provision was recorded with respect to the negative equity of VANT, which amounted to R\$15,048 (R\$17,033 in June 30, 2004).

The investments valued at cost are immaterial in relation to total assets. Their associated risks would not cause significant impacts to the Company.

g. Temporary Cash Investment Risks

The company has temporary cash investments in exclusive financial investment funds (FIFs), whose assets comprise federal securities based on floating, fixed and foreign exchange rates, from which some are directly indexed to the CDI, and others indirectly through forward contracts traded at the Futures and Commodities Exchange - BM&F. No significant credit risk is associated with these transactions. The Company maintains cash investments in the amount of R\$1,683,463 (R\$1,030,484 as of June 30, 2004). Income accrued to the balance sheet date is recorded in financial income and amounts to R\$128,440 (R\$103,373 in 2003). Amounts recognized in the consolidated financial statements are R\$2,370,933 (R\$1,898,343 as of June 30, 2004), related to investments, and R\$134,203 (R\$109,236 in 2003), related to income accrued.

6. BENEFITS TO EMPLOYEES

The benefits described in this note are offered to the employees of the Company and its wholly-owned subsidiary. These companies are better described together, and can be referred to as Brasil Telecom (group) and for the purpose of the pension scheme cited in this note, are also denominated Sponsor.

(a) Private Pension Plan

The Company sponsors private pension schemes related with retirement for its employees and assisted members, and in the case of the latter, medical assistance in some cases. These plans are managed by two foundations, which are Fundação de Seguridade Social (SISTEL), originated from certain companies of the former Telebrás System and Fundação BrTPREV (FBrTPREV) former Fundação dos Empregados da Companhia Riograndense de Telecomunicações (FCRT), which manages the benefit plans of CRT, a company merged on December 28, 2000.

The Company bylaws stipulate approval of the supplementary pension policy, and the joint liability attributed to the defined benefit plans is linked to the acts signed with the foundations, with the agreement of the Supplementary Pensions Department - SPC, where applicable to the specific plans.

The plans sponsored are valued by independent actuaries on the balance sheet date and, in the case of the defined benefit plans described in this explanatory note, immediate recognition of the actuarial gains and losses is adopted. Liabilities are provided for plans which show deficits. This measure has been applied since the 2001 financial year, when the regulations of CVM Ruling 371/00 were adopted. In cases that show positive actuarial situations, no assets are recorded due to the legal impossibility of reimbursing the surpluses.

Edgar Filing: BRASIL TELECOM SA - Form 6-K

The characteristics of the supplementary pension plans sponsored by the Company are described below.

FUNDAÇÃO SISTEL DE SEGURIDADE SOCIAL (SISTEL)

Plans

TCSPREV (Defined Contribution, Settled Benefit, Defined Benefit)

This defined contribution and settled benefit plan was introduced on February 28, 2000, with the adherence of around 80% of the employees at that time. On December 31, 2001, all the pension plans sponsored by the Company with SISTEL were merged, being exceptionally and provisionally approved by the Supplementary Pensions Department - SPC, due to the need for adjustments to the regulations. They were subsequently transformed into defined contribution groups with settled and defined benefits. The plans that were merged into the TCSPREV were the PBS-TCS, PBT-BrT, Convênio de Administração BrT, and the Termo de Relação Contratual Atípica, the conditions established in the original plans being maintained. In March 2003, this plan was suspended to the employees who want to be included in the supplementary pension plans sponsored by the Company. TCSPREV currently attends to around 58.0% of the staff.

PBS-A (Defined Benefit)

Maintained jointly with other sponsors linked to the provision of telecommunications services and destined for participants that had the status of beneficiaries on January 31, 2000.

PAMA - Health Care Plan for Retired Employees (Defined Contribution)

TCSPREV

Contributions to this plan were maintained on the same basis as the original plans incorporated in 2001 for each group of participants, and were established based on actuarial studies prepared by independent actuaries according to regulations in force in Brazil, using the capitalization system to determine the costs. Currently contributions are made by the participants and the sponsor only for the internal groups PBS-TCS (defined benefit) and TCSPREV. In the TCSPREV group, the contributions are credited in individual accounts of each participant, equally by the employee and the Company, and the basic contribution percentages vary between 3% and 8% of the participant's salary, according to age. (b) Stock option plan for management and employees

The Extraordinary Shareholders' Meeting held on April 28, 2000, approved the general plan to grant stock purchase options to officers and employees of the Company and its subsidiaries. The plan authorizes a maximum limit of 10% of the shares of each kind of Company stock. Shares derived from exercising options guarantee the beneficiaries the same rights granted to other Company shareholders. The administration of this plan was entrusted to a management committee appointed by the Board of Directors, which decided only to grant preferred stock options. The plan is divided into two separate programs:

Program A

This program is granted as an extension of the performance objectives of the Company established by the Board of Directors for a five-year period. Up to June 30, 2004, no stock had been granted.

Program B

The price of exercising is established by the management committee based on the market price of 1000 shares at the date of the grant of option and will be monetarily restated by the IGP-M between the date of signing the contracts and the payment date.

Edgar Filing: BRASIL TELECOM SA - Form 6-K

The right to exercise the option is given in the following way and within the following periods:

| | First Grant | | Second Grant | |
|-----|-------------|---------------|--------------|---------------|
| | From | End of period | From | End of period |
| 33% | 01/01/04 | 12/31/08 | 12/19/05 | 12/31/10 |
| 33% | 01/01/05 | 12/31/08 | 12/19/06 | 12/31/10 |
| 34% | 01/01/06 | 12/31/08 | 12/19/07 | 12/31/10 |

The acquisition periods can be anticipated as a result of the occurrence of events or special conditions established in the option contract.

The information related with the general plan to grant stock options is summarized below:

| | Preferred stock options (thousand) | Average exercise price R\$ |
|----------------------------------|---------------------------------------|----------------------------|
| Balance as of June 30, 2004 | 907,469 | 11,73 |
| Balance as of September 30, 2004 | 907,469 | 11,73 |

There has been no grant of options for purchase of stocks exercised until the end of this quarter and the representativeness of the options balance in relation to the total of outstanding preferred shares is 0.31% (0.31% in June 30, 2004).

Considering the hypothesis that the options will be exercised integrally, the opportunity cost of the respective premiums, calculated based on the Black & Scholes method, would be R\$933 (R\$611 in 2003).

(c) Other Benefits to Employees

Other benefits are granted to employees, such as: health care/dental care, meal allowance, group life insurance, occupational accident allowance, sickness allowance, transportation allowance, and others.

The recoverable amount foreseen after the year 2013 is a result of a provision to cover an actuarial insufficiency of the pension plan that is being settled according to the maximum period established by the Supplementary Pensions Department (SPC), which is 17 years and 9 months. In 2003, the Company paid PIS and COFINS taxes in installments, previously settled through offsetting tax credits, the ratification of which was refused by the Federal Revenue department, at the administrative level. The payment in installments was included in the Program for Tax Recovery (REFIS) and Special Payment in Installments (PAES). The amount divided into installments through REFIS totaled R\$5,660 (R\$8,332 in June 30, 2004) with the period for amortization established at 9 monthly payments, and the Company still needs to pay R\$42,916 (R\$43,182 in June 30, 2004) for the remaining 108 months. The balances payable for both programs are charged interest at the long-term interest rate (TJLP).

With respect to the tax credits that were refused, the Company has lodged appeals at the judicial level for restitution or future compensation.

The long-term portion refers to ICMS (State VAT) on the 69/98 Agreement, which is being challenged in court, and is being deposited in escrow. It also includes the ICMS deferral, based on incentives by the government of the State of Paraná.

They correspond to the credits of financial participation, paid by engaged subscribers, for acquisition of the right of use of switched fixed phone service, still under the elapsed self-financing modality. It happened that, as the shareholders of the Company had fully subscribed the capital increase made to repay in shares the credits for financial participation, no shares remained to be delivered to the engaged subscribers. Part of these engaged subscribers, who did not accept the Public Offer by the Company for devolution of the referred credits in money, as established in article 171, paragraph 2, of Law nr 6.404/76 are awaiting resolution of the ongoing lawsuit, filed by the Public Prosecution Service and Others, aiming at reimbursement in shares.

36. FUNDS FOR CAPITALIZATION

The expansion plans (self-financing) were the means by which the telecommunications companies financed network investments. With the issue of Administrative Rule nr 261/97 by the Ministry of Communications, this mechanism for raising funds was eliminated, and the existing consolidated amount of R\$7,974 (R\$7,974 in December 31, 2003) is derived from plans sold prior to the issue of the Administrative Rule, the corresponding assets to which are already incorporated in the Company's fixed assets through the Community Telephone Plant - PCT. For reimbursement in shares, it is necessary to await the judicial ruling on the suits brought by the interested parties.

38. COMMITMENTS

Services Rendered due to Acquisition of Assets

BrT SCS Bermuda acquired fixed assets from an already existing company. Together with the assets of underwater cables acquired, it assumed the obligation of providing data traffic services, initially contracted with the company that sold the assets, which was a beneficiary of the financial resources of the respective advances. The time remaining for the providing of such assumed services is around twenty years.

Financing

On July 19, 2004, the BNDES approved a financing amounting to R\$1.26 billion, which will be used for investments in the fixed telephony plan and operational improvements to comply with the targets set in the General Plan of Universalization Targets - PGMU and in the General Plan of Quality Targets - PGMQ. The financing will be directly provided by the BNDES for a total period of six and a half years, with a grace period of one and a half years. The cost of the financing will be the long-term interest rate (TJLP) plus 5.5% p.a. for 80% of the total financing and a basket of currencies plus 5.5% p.a. for the remaining 20%. The funds will be released from 2004 to 2006.

39. SUBSEQUENT EVENT

The company received on October 26, 2004 the second tranche of the BNDES financing described in note 38. This tranche amounted to R\$342,405, being R\$282,664 bearing interest of the long-term interest rate (TJLP) plus 5.5% p.a., and R\$59,741 bearing interest linked to a basket of currencies plus 5.5% p.a. Considering this release of funds, the total financing obtained with the BNDES until September 30, 2004 amounted to R\$742,405.

Lines Installed In the 3Q04, Brasil Telecom installed 13.8 thousand lines, ending the quarter with 10.7 million terminals. In relation to 3Q03, the plant registered an increase of 47.8 thousand lines.

Lines in Service The plant in service totaled 9.6 million lines in the 3Q04. Brasil Telecom continued the non-paying-lines-detection process, disconnecting lines with no prospects of returning to the active base in the medium term and transferring some of the clients who negotiated their obligations to the hybrid plan (LigMix). As a result, the utilization rate has reached to 89.5%.

Edgar Filing: BRASIL TELECOM SA - Form 6-K

Additionally, the increase of 67.6% in hybrid terminals was the Company's initiative to incentive the migration of delinquent and economic plan clients. This strategy has caused a growth in the ARPU (net revenues/monthly LMES) of the fixed telephone service.

ADSL **Brasil Telecom practically doubled its ADSL accesses in service in just a year (905% of increase), reaching 456.1 thousand accesses at the end of 3Q04.**

Additionally, Brasil Telecom activated 403 thousand lines in the 3Q04, compared to 418 thousand lines in the previous quarter.

Basic subscription revenues reached R\$800.6 million in the quarter, an increase of 9.3% compared to the 2Q04, due to the rate adjustments of 7.4% and 4.4%, effective from July 02, 2004 and September 01, 2004, respectively.
