REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Petróleo Brasileiro S.A. - PETROBRAS

We have reviewed the condensed consolidated balance sheet of Petróleo Brasileiro S.A. PETROBRAS and subsidiaries as of June 30, 2005 and the related condensed consolidated statements of income, cash flows and changes in shareholders' equity for the six-month periods ended June 30, 2005 and 2004. These interim financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated interim financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Petróleo Brasileiro S.A. PETROBRAS and subsidiaries as of December 31, 2004, and the related consolidated statements of income, changes in shareholders' equity and cash flows for the year then ended not presented herein, and in our report dated May 13, 2005, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2004, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

NOTES TO THE CONSOLIDATED FINANCIAL INFORMATION

Expressed in Millions of United States Dollars
(except when specifically indicated) (Unaudited)

1. Basis of Financial Statements Preparation

The accompanying unaudited condensed consolidated financial statements of Petróleo Brasileiro S.A. - PETROBRAS (the Company) have been prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) and the rules and regulations of the Securities and Exchange Commission (SEC) for interim financial statements. Accordingly they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. These unaudited consolidated financial statements and the accompanying notes should be read in conjunction with the consolidated financial statements for the year ended December 31, 2004 and the notes thereto.

The balance sheet at December 31, 2004 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

The consolidated financial statements as of June 30, 2005 and for the six-month periods ended June 30, 2005 and 2004, included in this report, are unaudited. However, in management's opinion, such consolidated financial statements reflect all normal recurring adjustments that are necessary for a fair presentation. The results for the interim periods are not necessarily indicative of trends or of results expected for the full year ending December 31, 2005.

The preparation of these financial statements requires the use of estimates and assumptions that reflect the assets, liabilities, revenues and expenses reported in the financial statements, as well as amounts included in the notes thereto.

Certain prior period amounts have been reclassified to conform to the current period's presentation. These reclassifications had no impact on the Company's net income or shareholders' equity.

Pursuant to Rule 436 (c) under the Securities Act of 1933 (the Act), this is not a report and should not be considered a part of any registration statement prepared or certified within the meanings of Sections 7 and 11 of the Act and therefore, the independent accountant's liability under Section 11 does not extend to the information included herein.

2. Derivative Instruments, Hedging and Risk Management Activities

The Company is exposed to a number of market risks arising from the normal course of its business. Such market risks principally involve the possibility that changes in interest rates, currency exchange rates or commodity prices will adversely affect the value of the Company's financial assets and liabilities or future cash flows and earnings. The Company maintains an overall risk management policy that is developed under the direction of the Company's executive officers.

The Company may use derivative and non-derivative instruments to implement its overall risk management strategy. However, by using derivative instruments, the Company exposes itself to credit and market risk. Credit risk is the failure of a counterparty to perform under the terms of the derivative contract. Market risk is the adverse effect on the value of a financial instrument that results from a favorable change in interest rates, currency exchange rates, or commodity prices. The Company addresses credit risk by restricting the counterparties to such derivative financial instruments to major financial institutions. Market risk is managed by the Company's executive officers. The Company does not hold or issue financial instruments for trading purposes.

a) Foreign currency risk management

The Company's foreign currency risk management strategy may involve the use of derivative instruments to protect against foreign exchange rate volatility, which may impair the value of certain of the Company's obligations. The Company currently uses zero-cost foreign exchange collars to implement this strategy.

During 2000, the Company entered into three zero cost foreign exchange collars to reduce its exposure to variations between the U.S. Dollar and the Japanese Yen, and between the U.S. Dollar and Euro relative to long-term debt denominated in foreign currencies with a notional amount of approximately US\$ 470. The Company does not use hedge accounting for these derivative instruments. These collars establish a ceiling and a floor for the associated exchange rates. If the exchange rate falls below the defined floor, the counterparties will pay to the Company the difference between the actual rate and the floor rate on the notional amount. Conversely, if the exchange rate rises above the defined ceiling, the Company will pay to the counterparties the difference between the actual rate and the ceiling rate on the notional amount. The contracts expire upon the maturity date of each note.

2. Derivative Instruments, Hedging and Risk Management Activities (Continued)

a) Foreign currency risk management (Continued)

One of the Euro zero cost collars was settled on December 31, 2004, with cash of US\$ 18 being received.

The call and put portion of the Company's zero cost foreign exchange collars at June 30, 2005 have a fair value of US\$ 17 and US\$ 1, respectively (US\$ 18 and US\$ 3 at December 31, 2004, respectively).

b) Crude oil price risk management

The Company is exposed to crude oil price risks as a result of the fluctuation of crude oil and oil product prices. The Company's crude oil price risk management activities primarily consist of futures contracts traded on stock exchanges and options and swaps entered into with major financial institutions. The futures contracts provide economic hedges to anticipated crude oil purchases and sales, generally forecast to occur within a 30 to 360 day period, and reduce the Company's exposure to volatile commodity prices.

The Company's exposure on these contracts is limited to the difference between contract value and market value on the volumes hedged. Crude future contracts are marked to market and related gains and losses are recognized currently under earnings, irrespective of when physical crude sales occur. During the six-month periods ended June 30, 2005 and 2004, the Company carried out economic hedging activities on 13.8% and 44.5%, respectively, of its total traded volume (imports and exports). The open positions on the futures market, compared to spot market value, resulted in a loss of US\$ 1 and a loss of US\$ 16 during the six-month periods ended June 30, 2005 and 2004, respectively.

2. Derivative Instruments, Hedging and Risk Management Activities (Continued)

c) Natural gas derivative contract

In connection with the long-term contract to buy gas (The Gas Supply Agreement or "GSA") to supply thermoelectric plants and for other uses in Brazil, the Company entered into a contract, with a gas producer that constituted a derivative financial instrument under SFAS 133. This contract, the Natural Gas Price Volatility Reduction Contract (the "PVRC"), was executed with the purpose to reduce the volatility of price under the GSA.

The terms of the PVRC include for the period from 2005 to 2019, a collar with PETROBRAS receiving cash payments when the calculated price is over the established ceiling and PETROBRAS making cash payments when the price is below the established floor, with no cash payments being made when the price is between the ceiling and the floor.

As of June 30, 2005 and December 31, 2004, the Company recorded a liability of US\$ 148 and US\$ 153, respectively, which is deemed a deferred purchase incentive, and which is being amortized into cost of sales on the basis of the volumes anticipated under the PVRC. At June 30, 2005, the Company recorded a gain in the amount of US\$ 3, net of deferred tax effect of US\$ 2, related to the amortization of this deferred purchase incentive.

As of June 30, 2005 and December 31, 2004, the Company recorded a derivative asset based on the fair value calculation in the amount of US\$ 497 and US\$ 635, respectively. At June 30, 2005 the Company recorded a mark-to-market (or MTM) loss in the amount of US\$ 68, net of deferred tax effect of US\$ 35. The derivative losses are recorded as a component of financial expenses. The decrease in the fair value calculation for the PVRC contract was principally attributable to a change in Bolivia Hydrocarbon Tax Law, whose concepts are included in calculation of the ceiling and floor price.

2. Derivative Instruments, Hedging and Risk Management Activities (Continued)

d) Interest Rate Risk Management

The Company's interest rate risk is a function of the Company's long-term debt and, to a lesser extent, short-term debt. The Company's foreign currency floating rate debt is principally subject to fluctuations in LIBOR and the Company's floating rate debt denominated in Reals is principally subject to fluctuations in the Brazilian long-term interest rate (TJLP), as fixed by the Brazilian Central Bank. The Company currently does not utilize derivative financial instruments to manage its exposure to fluctuations in interest rates. However, the Company has been studying various forms of derivatives to reduce its exposure to interest rate fluctuations and may use these financial instruments in the future.

e) Risk management activity at PEPSA

PEPSA also uses derivative instruments such as options, swaps and others, mainly to mitigate the impact of changes in crude oil prices, interest rates and future exchange rates. Such derivative instruments are designed to mitigate specific exposures, and are assessed periodically to assure high correlation of the derivative instrument to the risk exposure identified and to assure the derivative is highly effective in offsetting changes in cash flows inherent in the covered risk. PEPSA qualifies for hedge accounting treatment for its crude oil derivative instruments and its interest rate swap derivative instruments.

3. Income Taxes

Substantially all of the Company's taxable income is generated in Brazil and is therefore subject to the Brazilian statutory tax rate. The following table reconciles the tax calculated based upon statutory tax rates to the income taxes expense recorded in these consolidated financial statements.

b) Certification by the Federal Government

The ANP/STN Integrated Audit Committee submitted, on June 23, 2004, its final report certifying and approving the balance of the Petroleum and alcohol account. The conclusion of this audit process for the Petroleum and alcohol account establishes the basis for concluding the settlement process between the Federal Government and PETROBRAS.

c) National Treasury Bonds Series H (NTN-H)

The Company and the Federal Government reached an agreement whereby the Federal Government issued National Treasury Bonds - H (NTN-H) into a federal depository on behalf of the Company to support the balance of the Petroleum and alcohol account.

As of June 30, 2004, there were 138,791 National Treasury Notes series H (NTN-H), in the amount of US\$ 56, at which time the balance of the Petroleum and alcohol account was US\$ 241. Upon maturity of the NTN-H, the Federal Government made US\$ 3 available to PETROBRAS and the remaining US\$ 53 was deposited in an account in the Company's name, however, such amount is restricted from use by order of STN. The legal, valid, and binding nature of the account is not affected by any difference between the balance of the account and the value of the outstanding bonds.

5. Receivable from Federal Government (Continued)

d) Settlement of the Petroleum and alcohol account with the Federal Government

The remaining balance of the Petroleum and alcohol account may be paid as follows:

- National Treasury Bonds issued at the same amount as the final balance of the Petroleum and alcohol account as determined by the audit;
- Offset of the balance of the Petroleum and alcohol account, with any other amount owed by PETROBRAS to the Federal Government, including taxes; or
- by a combination of the above options.

6. Financings

a) Short-term debt

The Company's short-term borrowings are principally sourced from commercial banks and include import and export financing denominated in United States dollars, as follows:

	June 30, 2005	December 31, 2004
Imports - oil and equipment	482	456
Working capital	605	91

8. Project Financings

Since 1997, the Company has utilized project financing to provide capital for the continued development of the Company's exploration and production and related projects. Project financing special purpose entities are consolidated on a line by line basis and the project financings obligation represents the debt of the consolidated SPE with the third-party lender. The Company's responsibility under these contracts is to complete the development of the oil and gas fields, operate the fields, pay for all operating expenses related to the projects and remit a portion of the net proceeds generated from the fields to fund the special purpose companies' debt and return on equity payments. At the conclusion of the term of each financing project, the Company will have the option to purchase the leased or transferred assets from the consolidated special purpose company.

The following summarizes the liabilities related to the projects that were in progress at June 30, 2005 and December 31, 2004:

10. Thermoelectric Liabilities

The balance of thermoelectric obligations was US\$ 825 and US\$ 1,095 at June 30, 2005 and December 31, 2004, respectively.

On August 13, 2004, the Board of Directors of PETROBRAS approved the financial conditions for the acquisition of 100% interest of Eletrobolt Thermoelectric plant. The documentation for acquisition of Sociedade Fluminense de Energia (SFE), the owner of Eletrobolt, was signed April 29, 2005, thus concluding the process for acquisition of that company. The agreed-upon price of its shares is US\$ 65. The Company's previous investment on Eletrobolt was being accounted for in accordance to FIN 46 and the acquisition was accounted for as a business combination but had no material impact on PETROBRAS consolidated accounting records. Due to the immateriality, proforma information has not been presented.

10. Thermoelectric Liabilities (Continued)

In February, 2005, in order to facilitate the financial restructuring process of Termorio, PETROBRAS acquired the remaining 50% interest of Termorio's voting capital from NRG for US\$ 83 bringing its ownership to 100% of total and voting capital. The Company's previous investment on Termorio was being accounted for in accordance to FIN 46 and the acquisition was accounted for as a business combination but had no material impact on PETROBRAS consolidated accounting records. Due to the immateriality, proforma information has not been presented.

On June 24, 2005, PETROBRAS acquired Termoceará Ltda. This is a plant with net generation capacity of 220 MW/h, of the *Merchant* type, for which PETROBRAS executed between 2001 and 2002 a contract with a clause for contingent payments related to taxes, charges and tariffs, operational costs, maintenance and investments (*capacity*), in case the plant did not generate revenues sufficient to cover these costs. The acquisition price was equal to US\$ 137, of which US\$ 81 related to the purchase of tangible assets of the thermoelectric plant and US\$ 56 was designated to settle of payables to the lenders of the project (BNDES and Eximbank). The excess of amounts paid over fair value of assets acquired is attributable to intangible assets and goodwill. The Company's previous investment on Termoceará was being accounted for in accordance to FIN 46 and the acquisition was accounted for as a business combination but had no material impact on PETROBRAS consolidated accounting records. Due to the immateriality, proforma information has not been presented.

11. Employees Postretirement Benefits and Other Benefits

The Company sponsors a contributory defined benefit pension plan covering substantially all of its employees and provides certain health care benefits for a number of active and retired employees. In 2004, the Company made contributions of US\$ 221 to pension and health care plans.

Net periodic benefit cost includes the following components:

12. Shareholders Equity

The Company's subscribed and fully paid-in capital at June 30, 2005 and December 31, 2004 consisted of 634,168,418 common shares and 462,369,507 preferred shares.

The dividends for the year ended 2004, as approved at the General Shareholder's Meeting held March 31, 2005, amounted to US\$ 1,900, corresponding to R\$ 4.60 per share (US\$ 1.73 per share calculated by year-end exchange rate), include the portion of interest on shareholders' equity approved by the Board of Directors on September 17, 2004 and paid to the shareholders on February 15, 2005, amounting to US\$ 1,239, corresponding to R\$ 3.00 per share (US\$ 1.13 per share calculated by year-end exchange rate). The balance of dividends (US\$ 248) and the portion of the interest on shareholders' equity (US\$ 413) were made available to stockholders on May 17, 2005, the deadline stipulated pursuant to Articles 132, item II, and 205, paragraph 3, of the Brazilian Corporation Law (No. 6.404/76).

12. Shareholders Equity (Continued)

On June 17, 2005, the Board of Directors of the Company approved the distribution of interest on shareholders' equity to shareholders in the amount of US\$ 933, as provided for in article 9 of Law No. 9,249/95 and Decrees No. 2,673/98 and No. 3,381/00.

This amount will be made available to shareholders up to January 31, 2006, based on their shareholdings at June 30, 2005, corresponding to US\$ 0.85 per common and preferred share, and will be discounted from the dividends that come to be determined based on adjusted net income for 2005, and monetarily adjusted by reference to the Selic variation if paid before December 31, 2006, from the date of actual payment through to the end of said year. If paid in 2005, the amount to be distributed will be monetarily adjusted based on the Selic variation as from December 31, 2005 to the date of beginning of payment.

Basic and diluted earnings per share amounts have been calculated as follows:

	Six-month period ended June 30,

13. Commitments and Contingencies

PETROBRAS is subject to a number of commitments and contingencies arising in the normal course of its business. Additionally, the operations and earnings of the Company have been, and may be in the future, affected from time to time in varying degrees by political developments and laws and regulations, such as the Federal Government's continuing role as the controlling shareholder of the Company, the status of the Brazilian economy, forced divestiture of assets, tax increases and retroactive tax claims, and environmental regulations. The likelihood of such occurrences and their overall effect upon the Company are not readily determinable.

a) Litigation

The Company is a defendant in numerous legal actions involving civil, tax, labor, corporate and environment issues arising in the normal course of its business. Based on the advice of its internal legal counsel and management's best judgment, the Company has recorded accruals in amounts sufficient to provide for losses that are considered probable and reasonably estimable. The following presents these accruals by nature of claim:

	June 30, 2005	December 31, 2004
Labor claims	32	26
Tax claims	91	73
Civil claims	141	123
Commercials claims and other contingencies	36	35
	300	257
Contingencies for joint liability	79	107
Total	379	364
Current contingencies	91	131
Long-term contingencies	288	233

As of June 30, 2005 and December 31, 2004, in accordance with Brazilian law, the Company had paid US\$ 866 and US\$ 699, respectively, into federal depositories to provide collateral for these and other claims until they are settled. These amounts are reflected in the balance sheet as restricted deposits for legal proceedings and guarantees.

13. Commitments and Contingencies (Continued)

b) Environmental matters

The Company is subject to various environmental laws and regulations. These laws regulate the activities involving discharge of oil, gas or other materials into the environment and may require the Company to remove or mitigate the environmental effects of the disposal or release of such materials at various sites.

- (1) In 2005 revenues from commercialization of oil to third parties are being classified in accordance with the points of sale, which could be Exploration & Production or Supply segments. Until 2004, revenues from commercialization of oil were completely allocated to Exploration & Production. This classification generated no significant impact on the results reported for these segments and segments information has not been restated as it is impractical to gather and collect data for prior periods as to point of sale.
