f) Other Service provider Companies

The Company acquired at the end of 2004 the companies Santa Bárbara dos Pampas S.A., Santa Bárbara dos Pinhais S.A., Santa Bárbara do Cerrado S.A. and Santa Bárbara do Pantanal S.A. These companies, which were not operating on the balance sheet date, aim at rendering services in general comprising, among others, the management activities of real states or assets.

2. PRESENTATION OF FINANCIAL STATEMENTS

Preparation Criteria

The financial statements have been prepared in accordance with accounting practices adopted in Brazil, in compliance with the Brazilian corporate law, rules of the CVM and rules applicable to telephony service concessionaires.

As the Company is registered with the SEC, it is subject to SEC's standards, and it should annually prepare financial statements and other information by using criteria that comply with that agency's requirements. To comply with these requirements and aiming at meeting the market's information needs, the Company adopts, as a principle, the practice of publishing information in both markets in their respective languages.

The notes to the financial statements are presented in thousands of reais, unless otherwise demonstrated. According to each situation, they present information related with the Company and the consolidated statements, identified as PARENT COMPANY and CONSOLIDATED, respectively. When the information is common to both situations, it is indicated as PARENT COMPANY AND CONSOLIDATED.

The accounting estimates were based on objective and subjective factors, based on management's judgment to determine the appropriate amount to be recorded in the financial statements. Significant elements subject to these estimates and assumptions include the residual amount of the fixed assets, provision for doubtful accounts, inventories and deferred income tax assets, provision for contingencies, valuation of derivative instruments, and assets and liabilities related to benefits to employees. The settlement of transactions involving these estimates may result in significant different amounts due to inherent imprecision to the process of determining these amounts. Management reviews its estimates and assumptions at least quarterly.

Consolidated Financial Statements

The consolidation was made in accordance with CVM Instruction 247/96 and includes the Company and the companies listed in Note 1.

Some of the main consolidation procedures are:

- Elimination of balances of the asset and liability accounts among the consolidated companies, as well as revenue and expenses of transactions among them;
- Elimination of the balances of the investment accounts and corresponding investor's shareholdings, reserves and accumulated results in the consolidated companies; and
- Segregation of the portions of shareholders' equity and income belonging to minority shareholders, indicated in specific items.

Statements of Cash Flows

The Company presents as supplementary information, jointly with Note 17, the statement of cash flows, prepared in accordance with Accounting Rules and Procedures - NPC 20 of the Brazilian Institute of Independent Auditors - IBRACON.

Report per Segment

The company presents, supplementary to note 41, the report per business segment. A segment is an identifiable component of the company, destined for service rendering (business segment), or provision of products and services which are subject to different risks and compensations different from those other segments.

3. SUMMARY OF SIGNIFICANT ACCOUNTING PRACTICES

The criteria mentioned in this note refer to the practices adopted by the Company and its subsidiaries that are included in the consolidated balance sheet.

a. Cash and Cash Equivalents: Cash equivalents are temporary high-liquid investments, with immediate maturity. They are recorded at cost, plus income registered up to the end of the quarter, and do not exceed market value. The investment fund quotas are valued by the quota value on 06/30/05

b. Trade Accounts Receivable: Receivables from users of telecommunications services are recorded at the amount of the tariff or the service on the date the service is rendered. Accounts receivable from services include credits for services rendered and not billed up to the end of the quarter. Receivables resulting from sales of cell phones and accessories are recorded by the amount of sales made, at the moment in which the goods are delivered and accepted by the customer. The criterion adopted for making the provision for doubtful accounts takes into account the calculation of the actual percentage of losses incurred on each range of accounts receivable. The historic percentages are applied to the current ranges of accounts receivable, also including accounts coming due and the portion yet to be billed, thus composing the amount that could become a future loss, which is recorded as a provision.

c. Inventories: Stated at average acquisition cost, not exceeding replacement cost. Inventories are segregated into inventories for plant expansion and those for maintenance and also, in relation to consolidated statements, goods inventories for resale, mainly composed by cell phones, accessories and electronic cards - chips. The inventories to be used in expansion are classified in property, plant and equipment (construction in progress), and inventories to be used in maintenance are classified as current and long-term assets, in accordance with the period in which they will be used, and the resale inventories are classified as current assets. Obsolete inventories are recorded as allowance for losses. About cell phones and accessories, the subsidiary BrT Celular records the adjustments for the trading prices held as of the balance sheet date, in the cases in which the acquisitions presented higher values.

The Inventory composition is shown in Note 19.

d. Investments: Investments in subsidiaries are valued using the equity method. Goodwill is calculated based on the expectation of future results and its amortization is based on the expected realization/timing over an estimated period of not more than ten years. Other investments are recorded at cost less allowance for losses, when applicable. The investments resulting from income tax incentives are recognized at the date of investment, and result in shares of companies with tax incentives or investment fund quotas. In the period between the investment date and receipt of shares or quotas of funds, they remain recognized in long-term assets. The Company adopts the criterion of using the maximum percentage of tax allocation. These investments are periodically valued and the result of the comparison between its original and market costs, when the latter is lower, results in the constitution of allowances for probable losses.

e. Property, Plant and Equipment: Stated at cost of acquisition and/or construction, less accumulated depreciation. Financial charges for financing assets and construction in progress are capitalized.

The costs incurred, when they represent improvements (increase in installed capacity or useful life) are capitalized. Maintenance and repair are charged to the profit and losses accounts, on an accrual basis.

Depreciation is calculated under the straight-line method. Depreciation rates used are based on expected useful lives of the assets and in accordance with the standards of the Public Telecommunications Service. The main rates used are set forth in Note 26.

f. Deferred Charges: Segregated between deferred charges on amortization and formation. Their breakdown is shown in Note 27. Amortization is calculated under the straight-line method, for a five-year period, in accordance with the legislation in force. When benefits are not expected from an asset, it is written off against non-operating income.

g. Income and Social Contribution Taxes: Income and social contribution taxes are accounted for on an accrual basis. These taxes levied on temporary differences, tax losses and the negative social contribution base are recorded under assets or liabilities, as applicable, according to the assumption of realization or future demand.

h. Loans and Financing: Updated to the balance sheet date for monetary and/or exchange variations and interest incurred as of the balance sheet date. Equal restatement is applied to the guarantee contracts to hedge the debt.

i. Provision for Contingencies: The contingency provisions are made based on a survey of the respective risks and they are quantified according to economic grounds and legal opinions on the contingency proceedings and facts known on the quarter end date. The basis and nature of the provisions are described in Note 7.

j. Revenue Recognition: Revenues from services rendered are recognized when provided. Local and long distance calls are charged based on time measurement according to the legislation in force. Revenues from sales of payphone cards (Public Use Telephony - TUP), cell phones and accessories are recorded when delivered and accepted by the client. For prepaid services linked to mobile telephony, the revenue is recognized in accordance with the utilization of services. A non-recognized revenue is recognized if there is a significant uncertainty in its realization.

k. Recognition of Expenses: Expenses are recognized on an accrual basis, considering their relation with revenue realization. Expenses related to other periods are deferred.

l. Financial Income (Expense), Net: Financial income comprises interest earned on overdue accounts settled after the term, gains on financial investments and hedges. Financial expenses comprise interest incurred and other charges on loans, financing and other financial transactions.

Interest on Shareholders' Equity is included in the financial expenses balance, and for financial statement presentation purposes, the amounts are reversed to profit and loss accounts and reclassified as a deduction of retained earnings, in the shareholders' equity.

m. Research and Development: Costs for research and development are recorded as expenses when incurred, except for expenses with projects linked to the generation of future revenue, which are recorded under deferred assets and amortized over a five-year period from the beginning of the operations.

n. Benefits to Employees: Private pension plans and other retirement benefits sponsored by the Company and its subsidiaries for their employees are managed under three foundations. Contributions are determined on an actuarial basis, when applicable, and accounted for on an accrual basis.

As of December 31, 2001, the Company recorded its actuarial deficit on the balance sheet date against shareholders' equity, net of its tax effects. As from 2002, as new actuarial revaluations show the necessity for adjustments to the provision, they are recognized in the profit and loss accounts.

Complementary information on private pension plans is described in Note 6.

o. Profit Sharing: The provisions for employees' profit sharing are recognized on an accrual basis. The calculation of the amount, which is paid in the subsequent year after the provision is recognized, is based on the target program established with the labor union, by means of collective labor agreement, in accordance with Law 10,101/00 and the Company's bylaws.

p. Earnings per thousand shares: Calculated based on the number of shares outstanding at the balance sheet date, which comprises the total number of shares issued, minus shares held in treasury.

4. RELATED-PARTY TRANSACTIONS

Related party transactions refer to operations with Brasil Telecom Participações S.A., the Company's parent company, and with the subsidiaries mentioned in Note 1.

5. MARKET VALUE OF FINANCIAL ASSETS AND LIABILITIES (FINANCIAL INSTRUMENTS) AND RISK ANALYSIS

The Company and its subsidiaries assessed the book value of its assets and liabilities as compared to market or realizable values (fair value), based on information available and valuation methodologies applicable to each case. The interpretation of market data regarding the choice of methodologies requires considerable judgment and determination of estimates to achieve an amount considered adequate for each case. Accordingly, the estimates presented may not necessarily indicate the amounts, which can be obtained in the current market. The use of different assumptions for calculation of market value or fair value may have material effect on the obtained amounts. The selection of assets and liabilities presented in this note took place based on their materiality. Instruments whose values approximate their fair values, and whose risk assessment is not significant, are not mentioned.

In accordance with their natures, the financial instruments may involve known or unknown risks, and the potential of such risks is important for the best judgment. Thus, there may be risks with or without guarantees, depending on circumstantial or legal aspects. Among the principal market risk factors which can affect the Company's business are the following:

a. Credit Risk

The majority of the services provided by Brasil Telecom S.A. are related to the Concession Agreement, and a significant portion of these services is subject to the determination of tariffs by the regulatory agency. The credit policy, in its turn, in case of telecommunications public services, is subject to legal standards established by the concession authority. The risk exists since the Company may incur losses arising from the difficulty in receiving amounts billed to its customers. In the quarter, the Company's default was 2.52% of the gross revenue (3.07% in 2004). By means of internal controls, the level of accounts receivable is constantly monitored, thus limiting the risk of past due accounts by cutting the access to the service (out phone traffic) if the bill is overdue for over 30 days. Exceptions are made for telephone services, which should be maintained for national security or defense.

Concerning mobile telephony, credit risk in cell phones sales and in service rendering in the postpaid category is minimized with the adoption of a credit pre-analysis of eligible customers. Still in relation to postpaid service, whose client base at the end of the quarter was 26.5% (32.1% in March 31, 2005), the receivable accounts are also monitored in order to limit default and to cut the access to the service (out of phone traffic) if the bill is overdue for over fifteen days.

b. Exchange Rate Risk

Liabilities

The Company has loans and financing contracted in foreign currency. The risk related to these liabilities arises from possible exchange rate fluctuations, which may increase these liabilities balances. Loans subject to this risk represent approximately 23.6% (25.6% on March 31, 2005) of the total liabilities of borrowings and consolidated financing, minus the contracted hedge balances. In order to minimize this kind of risk, the Company enters into exchange hedge agreements with financial institutions. 64.9% of the debt portion in foreign currency is covered by hedge agreements (66.2% on March 31, 2005). Unrealized positive or negative effects of these operations are recorded in the profit and loss as gain or loss. Up to the balance sheet date, the negative adjustments of these operations amounted to R\$

173,719 (net gains of R\$ 28,142 in 2004).

Net exposure as per book and market values, at the exchange rate prevailing on the balance sheet date, is as follows:

The method used for calculation of market value (fair value) of loans and financing in foreign currency and hedge instruments was future cash flows associated to each contracted instruments, minus the market rates in force on the balance sheet date.

c. Interest Rate Risk

Assets

The Company has loans with a telephone directory company, with interest indexed to the IGP-DI (a national index price) and loans resulting from the sale of fixed assets to other telephone service companies, bearing interest rate indexed to the Column 27 of the FGV (a national index price). The consolidated financial statements also present a loan agreement with Freelance S.A., whose balance is R\$ 1,543 (R\$ 1,511 in March 31, 2005), indexed to IGP-M. The Company also has Certificate of Deposits (CDBs) with Banco de Brasília S.A. related to the guaranty to tax incentive granted by the Distrito Federal Government under a program called Programa de *Promoção do Desenvolvimento Econômico e Sustentável do Distrito Federal* PRO-DF, (Program to Promote the Economic and Sustainable Development of Distrito Federal), and the remuneration of these securities are equivalent to 95% of the SELIC rate.

At the balance sheet date, these assets are represented as follows:

Liabilities

Brasil Telecom S.A. has loans and financing contracted in local currency subject to interest rates linked to indexing units TJLP, UMBNDES, CDI IGP-M and IGP/DI. The inherent risk in these liabilities arises from possible variations in these rates. The Company has contracted derivative contracts to hedge 35.3% (39.9% on March 31, 2005) of the liabilities subject to the UMBNDES rate, using exchange rate swap contracts. However, the other market rates are continually monitored to evaluate the need to contract derivatives to protect against the risk of volatility of these rates.

In addition to the loans and financing, the Company issued non-convertible private and public debentures, non-convertible or tradable for shares. These liabilities were contracted at interest rates linked to the CDI, and the risk associated with this liability results from the possible increase of the rate.

The above mentioned liabilities at the balance sheet date are as follows:

	PARENT COMPANY

Book value is equivalent to market values where the current contractual conditions for these types of financial instruments are similar to those in which they were originated or they did not present parameters for quotation or contraction.

d. Risk of Not Linking Monetary Restatement Indexes to Accounts Receivable

Loan and financing rates contracted by the Company are not linked to amounts of accounts receivable. Telephony tariff adjustments do not necessarily follow increases in local interest rates, which affect the company's debts. Consequently, a risk arises from this potential lapse of correlation.

e. Contingency Risks

Contingency risks are assessed according to loss hypotheses, as probable, possible or remote. Contingencies considered as probable risks are recorded as liabilities. Details of these risks are presented in Note 7.

f. Risks Related to Investments

The Company has investments, which are valued using the equity method and stated at acquisition cost. The investments valued by the equity method are presented in Note 25, for which no market value exists, as they are represented by non-listed companies or private limited companies. Provisions are recorded for losses when the future cash flows expected from an investment lead to expectations of losses.

In this quarter, a provision for losses was recorded with respect to the unsecured liability of VANT, which amounted to R\$ 21,427 (R\$ 20,441 on March 31, 2005).

The investments valued at cost are immaterial in relation to total assets. Their associated risks would not cause significant impacts to the Company in case of loss of part of these investments.

g. Temporary Cash Investment Risks

The company has temporary cash investments in exclusive financial investment funds (FIFs), whose assets comprise federal securities based on floating, fixed and foreign exchange rates, all subject to CDI, by means of the own backing of these securities or through futures contracts traded at the Futures and Commodities Exchange - BM&F, federal

public securities (NBC-E) referred to commercial dollar variation plus exchange coupon, foreign currency and own portfolio investment funds, backed in American treasury bonds and overnight operations, own portfolio of CDB issued by national financial institutions, and own portfolio of CD issued by financial institutions abroad. The investments in treasury bonds, exchange fund and deposit certificates are subject to exchange rate fluctuation risks, and the CDB investments are subject to the issuer institution credit risk. The Company maintains cash investments in the amount of R\$ 1,454,350 (R\$ 1,537,602 on March 31, 2005). Income accrued to the balance sheet date is recorded in financial income and amounts to R\$ 119,028 (R\$ 102,185 in 2004). Amounts recognized in the consolidated financial statements are R\$ 1,714,555 (R\$ 1,782,559 on March 31, 2005), related to investments, and R\$ 133,037 (R\$ 105,722 in 2004), related to income accrued.

h. Risk Related to Rules

New Concession Contracts

On June 20, 2003, ANATEL ratified Resolution 341, which provides for new types of concession agreements, in force as from January 1, 2006 up to 2025. The new kind of concession agreement provides for changes in how tariffs are adjusted, such as the General Price Index – Internal Supply (IGP-DI), that would no more be used to set the tariff adjustments based on the annual inflation rate. Consequently, the Company's operations and competitive position can be affected by these changes.

Overlapping of Licenses

Since the receipt of the certification for compliance with ANATEL 2003 goals, the Company provides national and international fixed and mobile telephone services, and the mobile services through the subsidiary 14 Brasil Telecom Celular S.A. If Telecom Itália International N.V. (TII) acquired an indirect controlling interest in the Company, the Company and TIM Brasil Serviços e Participações S.A. (TIM) could be considered affiliates under the new Brazilian telecommunications legislation, and the capacity of providing national and international fixed and mobile telephone services throughout the same regions of TIM's, would be subject to risk of being closed by ANATEL. On January 16, 2004, ANATEL issued an Act establishing a 18-month period for TII to reacquire an indirect controlling interest in the Company, as long as TII do not participate or vote on issues related to the overlapping of services offered by the Company and TIM, such as national and international long-distance and mobile services. If, after that 18-month period, which will commence as from TII return to the controlling block of Brasil Telecom Participações S.A., the Company and Telecom Itália do not reach an agreement to resolve the overlapping, ANATEL reserves the right to impose sanctions on any and all involved parties.

Depending on ANATEL's final decision, these sanctions could have significant adverse effects to the Company's business and operations.

On April 28, 2005, TII and TIM, and the Company and BrT Celular executed a Merger Agreement and a related Protocol. Among others, this operation allows to resolve the overlapping of the licenses and regulatory authorizations with TIM, avoiding sanctions and penalties that could be imposed by ANATEL. The operation is subject to several preliminary injunctions. Regardless of the merger above, any or all assets or the mobile services (note 41) may lose value in consequence of the overlapping of the operations or sanctions by ANATEL. To date it is not possible to know the result of these preliminary injunctions.

6. BENEFITS TO EMPLOYEES

The benefits described in this note are offered to the employees of the Company and its direct or indirect subsidiaries. These companies are better described together, and can be referred to as Brasil Telecom (group) and for the purpose of the supplementary pension plan mentioned in this note, are also denominated Sponsor.

a. Supplementary Pension Plan

The Company sponsors supplementary pension plans related with retirement for its employees and assisted members, and, in the case of the latter, medical assistance in some cases. These plans are managed by the following foundations: (i) Fundação 14 de Previdência Privada (Fundação 14); (ii) Fundação BrTPREV (FBrTPREV) former CRT, a company merged by the Company on 12/28/00; and (iii) Fundação de Seguridade Social (SISTEL), originated from certain companies of the former Telebrás System.

The Company's bylaws stipulate approval of the supplementary pension plan policy, and the joint liability attributed to the defined benefit plans is linked to the acts signed with the foundations, with the agreement of the National Supplementary Pension Department - SPC, where applicable to the specific plans.

The plans sponsored are annually valued by independent actuaries on the balance sheet date. In the case of the defined benefit plans described in this explanatory note, immediate recognition of the actuarial gains and losses is adopted. Liabilities are provided for plans which show deficits. This measure has been applied since the 2001 financial year, when the regulations of CVM Deliberation 371/00 were adopted. In cases that show positive actuarial situations, no assets are recorded due to the legal impossibility of reimbursing these surpluses.

The characteristics of the supplementary pension plans sponsored by the Company are described below.

FUNDAÇÃO 14

Since the split of the only pension plan managed by SISTEL, PBS, in January 2000, the evolution tendency for a new stage was already forecasted. Such stage would result in an own and independent management model for TCSPREV pension plan, by means of a specific entity to manage and to operate them, and this fact has become more and more evident throughout the years. This tendency also occurred in the main SISTEL pension plan sponsoring companies, which created their respective supplementary pension plan foundations. In this scenario, Fundação 14 de Previdência Privada was created in 2004, with the purpose of taking over the management and operation of the TCSPREV pension plan, which started as from March 10, 2005, whose process was backed by the segment's specific legislation and properly approved by the National Supplementary Pension Plan Superintendence - PREVIC.

In accordance with the Transfer Agreement entered into between Fundação Sistel de Seguridade Social and Fundação 14 de Previdência Privada, SISTEL, by means of the Management Agreement, it will provide management and operation services of TCSPREV and PAMEC-BrT plans to Fundação 14, after the transferring of these plans, which took place on March 10, 2005, for a period of up to 18 months, while Fundação 14 organizes itself to take over the management and operation services of its plans.

Plans

TCSPREV (Defined Contribution, Settled Benefit and Defined Benefit)

This defined contribution and settled benefit plan was introduced on 2/28/00. On 31/12/01, all the pension plans sponsored by the Company with SISTEL were merged, being exceptionally and provisionally approved by the Supplementary Pension Department - SPC, due to the need for adjustments to the regulations. Thus, TCSPREV is constituted of defined contribution groups with settled and defined benefits. The plans that were merged into the TCSPREV were the PBS-TCS, PBT-BrT, BrT Management Agreement, and the Unusual Contractual Relation Instrument, and the conditions established in the original plans were maintained. In March 2003 this plan was suspended to new employees contracted by the sponsor, but it was reopened in February 2005. TCSPREV currently assists to around 55.7% of the staff.

PAMEC-BrT Health Care Plan for Supplementary Pension Beneficiaries (Defined Benefit)

Destined for health care of retirees and pensioners subject to Grupo PBT-BrT, which was merged to TCSPREV on 12/31/01.

Contributions Established for the Plans

TCSPREV

Contributions to this plan, by group of participants, are established based on actuarial studies prepared by independent actuaries according to regulations in force in Brazil, using the capitalization system to determine the costs. Currently contributions are made by the participants and the sponsor only for the internal groups PBS-TCS (defined benefit) and TCSPREV (defined contribution). In the TCSPREV group, the contributions are credited in individual accounts of each participant, equally by the employee and the Company, and the basic contribution percentages vary between 3% and 8% of the participant's salary, according to age. Participants have the option to contribute voluntarily or sporadically to the plan above the basic contribution, but without equal payments from the Company. In the case of the PBS-TCS group, the sponsor's contribution in the quarter was 12% of the payroll of the participants; while the employees' contribution varies according to the age, service time and salary. An entry fee may also be payable depending on the age of entering the plan. The sponsors are responsible for the cost of all administrative expenses and risk benefits. In the quarter, contributions by the sponsor to the TCSPREV group represented, on average, 6.51% of the payroll of the plan participants. For employees, the average was 5.89%.

FUNDAÇÃO SISTEL DE SEGURIDADE SOCIAL (SISTEL)

The supplementary pension plan which remains under SISTEL's management comes from the period before the Telebrás Spin-off and assists participants who had the status of beneficiaries in January 2000 (PBS-A). SISTEL also manages the PAMA/PAMA-PCE pension plan, formed by participants assisted by the PBS-A Plan, the PBS's plans segregated by sponsor in January 2000 and PBS-TCS Internal Group, merged to the TCSPREV plan in December 2001.

Plans

PBS-A (Defined Benefit)

According to a legal/actuarial appraisal, the Company's responsibility is exclusively limited to future contributions. Contributions by retirees and pensioners who migrated to PCE are also carried out.

b. Stock option plan for management and employees

The Extraordinary Shareholders Meeting held on April 28, 2000, approved the general plan to grant stock purchase options to officers and employees of the Company and its subsidiaries. The plan authorizes a maximum limit of 10% of the shares of each kind of Company stock. Shares derived from exercising options guarantee the beneficiaries the same rights granted to other Company shareholders. The administration of this plan was entrusted to a management committee appointed by the Board of Directors, which decided only to grant preferred stock options. The plan is divided into two separate programs:

Program A

This program is granted as an extension of the performance objectives of the Company established by the Board of Directors for a five-year period. Up to June 30, 2005, no stock had been granted.

Program B

The price of exercising is established by the management committee based on the market price of 1000 shares at the date of the grant of option and will be monetarily restated by the IGP-M between the date of signing the contracts and the payment date.

The right to exercise the option is given in the following way and within the following periods:

	First Grant		Second Grant		Third Grant	
	From	End of Period	From	End of Period	From	End of Period
33%	1/1/04	12/31/08	12/19/05	12/31/10	12/21/05	12/31/11
33%	1/1/05	12/31/08	12/19/06	12/31/10	12/21/06	12/31/11
34%	1/1/06	12/31/08	12/19/07	12/31/10	12/21/07	12/31/11

The acquisition periods can be anticipated as a result of the occurrence of events or special conditions established in the option contract.

The information related with the general plan to grant stock options is summarized below:

	June 30, 2005	
	Preferred stock options (thousand)	Average exercise price R\$
Balance as of 03/31/05	1,415,119	13.00
Balance as of 06/30/05	1,415,119	13.00

There has been no grant of options for purchase of stocks exercised until the end of this quarter and the representativeness of the options balance in relation to the total of outstanding shares is 0.26% (0.26% in March 31, 2005).

Considering the hypothesis that the options will be exercised integrally, the opportunity cost of the respective premiums, calculated based on the Black & Scholes method, would be R\$780 (R\$622 in 2004).

c. Other Benefits to Employees

Other benefits are granted to employees, such as: health/dental care, meal allowance, group life insurance, occupational accident allowance, sickness allowance, transportation allowance, and others.

These lawsuits are in progress in various courts, including administrative, lower, and higher courts.

38. FUNDS FOR CAPITALIZATION

The expansion plans (self-financing) were the means by which the telecommunications companies financed network investments. With the issue of Administrative Rule 261/97 by the Ministry of Communications, this mechanism for raising funds was eliminated, and the existing consolidated amount of R\$ 7,974 (R\$ 7,974 on 03/31/05) is derived from plans sold prior to the issue of the Administrative Rule, the corresponding assets to which are already incorporated in the Company's fixed assets through the Community Telephone Plant - PCT. For reimbursement in shares, it is necessary to await the judicial ruling on the suits brought by the interested parties.

Services Rendered due to Acquisition of Assets

sold the assets, which was a beneficiary of the financial resources of the respective advances. The time remaining for the providing of such assumed services is around nineteen years.

Financing

On July 19, 2004, the BNDES approved a financing amounting to R\$1,267,593 for the Company, which will be used for investments in the fixed telephony plan and operational improvements to comply with the targets set in the General Plan of Universalization Targets - PGMU and in the General Plan of Quality Targets - PGMQ. The financing will be directly provided by the BNDES for a total period of six and a half years, with a grace period of one and a half year. The cost of the financing will be the long-term interest rate (TJLP) plus 5.5% p.a. for 80% of the total financing and a Basket of Currencies plus 5.5% p.a. for the remaining 20%. Out of the amount approved up to the balance sheet date the funding of R\$ 741,640 has already been made, complemented on 07/15/05 with R\$ 252,016. VI Material Fact of July 26, 2005 (only of Brasil Telecom Participações S.A.):

In compliance with Article 157 of Law 6.404/76 and CVM Instruction 358/2002, Brasil Telecom Participações S.A. (Company), informs its shareholders and the general market that, on July 26, 2005, a sole document called Notice to the Shareholders and Notice of Cancellation of Special Shareholders Meeting was delivered to the Brazilian Securities and Exchange Commission (CVM), the São Paulo Stock Exchange, the US Securities and Exchange Commission, with the following content:

NOTICE TO THE SHAREHOLDERS

NOTICE OF CANCELATION OF SPECIAL SHAREHOLDERS MEETING

Be the shareholders of Brasil Telecom Participações S.A. (Company) informed that the Special Shareholders Meeting set for July 27, 2005, at 9 am, is cancelled.

The decision to cancel that Special Shareholders Meeting is due to:

(i) notification of Telecom Italia International N.V. received by the Company on July 26, 2005, where that company, shareholder of Solpart Participações S.A. (Solpart), in its turn parent company of Company, in sum:

(a) informs that the voting instruction resulting from the previous meeting with the shareholders of Invitel S.A. (Invitel), held on July 22, 2005, based on the Invitel Shareholders Agreement, amended and consolidated on May 4, 1999, being such instruction ratified by a decision made at a previous shareholders meeting held on July 25, 2005, at 3:00 pm, violates rights ensured to it under the Solpart Shareholders Agreement, amended and consolidated on August 27, 2002;

(b) warns that the Board Chair, in the capacity of Meeting s Chair (article 16 of the Company Bylaws), may not accept any vote that violates the provisions of the shareholders agreement, under the terms of Article 118, paragraph 8 of Law 6.404/76, and that such vote will be null and void;

(c) emphasizes that Caixa de Previdência dos Funcionários do Banco do Brasil Previ and Banc@lo Brazil S.A itself, its sponsor, directly or indirectly hold controlling interest in Brasil Telecom S.A. (BrT) and Telemar Norte Leste S.A., according to a charge presented by Solpart to Anatel. The situation supposedly became more complicated with the execution of a Shareholders Agreement dated March 9, 2005, by and among Citigroup Venture Capital International Brasil L.P., Investidores Institucionais Fundo de Investimento em Ações, Previ and other pension funds, which significantly bars the participation of its signatories, including Previ, in the management of BrT;

(d) warns that the fact in item (c) above violates Law 9.427/97 (General Telecommunications Act) and other legal and pertinent provisions, and may subject BrT to several sanctions, including the loss of the concession;

(ii) The Invitel Shareholders Agreement and the Solpart Shareholders Agreement are filed at the Company s headquarters, and their managers must comply with them, as set by Article 118 of Law 6.404/76;

(iii) the existence of conflicting voting rights concerning Solpart generates many doubts as for the conduct that must be adopted by Solpart and the Meeting's Chair;

(iv) the manager's obligations in view of this concrete situation forces him/her to act carefully, and it is necessary to preserve, in so far as possible, the legal security of material acts involving the Company;

(v) despite such discrepancies, the holding of the General Meeting would create a situation extremely instable for the Company, and the deliberations inevitably would be questioned by the party feeling aggrieved; and

(vi) this instability would injure the Company, its shareholders and the market as a whole, pointing out that 81% of the Company's capital is spread in the market, so that the minority shareholders will be possibly the mostly aggrieved by the fight for the Company's control.

The Company published on July 27, 2005 a Material Fact on the cancellation of Meeting and the respective reasons.

Chair of the Board of Directors

VII Material Fact of July 27, 2005 (only of Brasil Telecom Participações S.A.):

Brasil Telecom Participações S.A. (Brasil Telecom Participações or Company) (BOVESPA: BRTP3/BRTP4; NYSE: BRP), in compliance with Article 157 of Law 6.404/76 and CVM Instruction 358/2002, informs its shareholders and the general market that the Special Shareholders Meeting set for July 27, 2005 was not held in view of a decision by the 2nd Federal Court of Florianópolis, Court Division of Santa Catarina, in the records of Class Action #. 2005.72.00.00.7938 -1 (Decision by the 2nd Federal Court of Florianópolis/SC) which, among other orders, expressly cancelled the holding of that Meeting.

As previously informed to the Company's shareholders and the general public through the Notice to the Shareholders and Notice of Cancellation of Special Shareholders Meeting, published in the Brazilian Federal Official Gazette and the newspapers *Valor Econômico* and *Correio Braziliense*, on July 27, 2005, the Special Shareholders Meeting was cancelled due to the reasons stated in the Notice to the Shareholders and Notice of Cancellation of Special Shareholders Meeting, forwarded to the Brazilian Securities and Exchange Commission (CVM), the São Paulo Stock Exchange (BOVESPA) and the US Securities and Exchange Commission on July 26, 2005.

However, despite the cancellation of the Special Shareholders Meeting and the determinations of the Decision by the 2nd Federal Court of Florianópolis/SC, the shareholders Fundação Petrobrás de Seguridade Social - Petros, Caixa de Previdência dos Funcionários do Banco do Brasil - PREVI, Citigroup Venture Capital International Brazil, L.P., Invitel S.A. and Fabio de Oliveira Moser, holders of approximately 8.1% of the voting capital, and the entities Investidores Institucionais FIA, and Zain Participações S.A., with no participation of Brasil Telecom Participações S.A. or any other shareholder, prepared and filed at the Company's headquarter a document called minutes of special shareholders meeting through which those shareholders, in violation of Article 16 of BTP's Bylaws, and Article 125 of Law 6404/76, deliberated on the issues included in the agenda of that Special Shareholders Meeting suspended and cancelled.

VIII Material Fact of July 28, 2005 (only of Brasil Telecom Participações S.A.):

Brasil Telecom Participações S.A. (Brasil Telecom Participações or Company) (BOVESPA: BRTP3/BRTP4; NYSE: BRP), in compliance with Article 157 of Law 6.404/76 and CVM Instruction 358/2002, informs its shareholders and the general market that the Order issued on July 28, 2005 by the Vice President Minister Sálvio de Figueiredo Teixeira, holding the function of President of the Federal Appeals Court, confirmed the illegality of the Special Shareholders Meeting (AGE) of July 27, 2005 (AGE), held in violation of the preliminary injunction in force issued by the 2nd Federal Appeals Court of the Court Division of the City of Florianópolis, State of Santa Catarina, under Case # 2005.72.00.00.7938 -1. Consequently, any court actions on this matter are suspended until the judgment of the grounds of the Jurisdiction Conflict related with the 4th Federal Appeals Court of Distrito Federal.

That Order is clear when it states that the decision rendered by the 2nd Federal Appeals Court of Florianópolis, SC was not cancelled, but only had its future effects suspended until the final judgment, for which reason the AGE in question is null and void.

Below is the transcription of the Order rendered by the Vice President Minister, Sálvio de Figueiredo Teixeira:

... The suit filed with the Federal Appeals Court of Florianópolis may reflect in the substitution of the shareholding and management control of BrT.

Thus, to enforce the preliminary injunction issued by this Court President, whose purpose was to avoid conflicting decisions, it is imperative that the ongoing actions be suspended until the final judgment of the divergence.

However, it is unfeasible to accept the request for canceling the decision, since this measure, if applicable, must be requested and decided by the Court chosen as the competent one to resolve this case...
