P-34 starts producing in the Jubarte Field

Rio de Janeiro, December 18, 2006 - PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA, BCBA: APBR/APBRA], a Brazilian international energy company, announces that the P-34 platform has started operations, beginning the Phase 1 of production at the Jubarte field.

The Jubarte-4 horizontal well will produce approximately 15 thousand barrels per day (bpd) of heavy oil, with API gravity of 17 degrees. Three other wells will constitute a contribution to P-34 to achieve its nominal capacity of 60 thousand bpd in the coming months. The second producer well, ESS-110, is estimated to start producing by the end of 2006. When the P-34 production reaches its peak, the Espírito Santo Business Unit (UN-ES) is expected to attain a production of 135 thousand bpd, contributing more significantly to the increase of the national oil production.

The start of production of the P-34 platform represents another important step towards the achievement of Petrobras petroleum production goals set forth in its Strategic Plan.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
