Yes No

P-52 BEGINS PRODUCTION TESTS

(Rio de Janeiro, November 23, 2007). PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA, BCBA: APBR/APBRA], a Brazilian international energy company, announces that Platform P-52 kicked production operating tests off in the Roncador Field, in the Campos Basin, today (11/23). While the initial volume will be 20,000 barrels per day, its total capacity, 180,000 barrels per day, is expected to be reached in mid-2008.

A semi-submersible-type unit, the P-52 is installed 125 km off the coast, at a water depth of 1,800 meters, a Brazilian record. In addition to the excellent-quality light oil (28o API), the platform will also produce 7.5 million cubic meters of natural gas per day.

The platform's hull was built in Singapore, and its operating modules were made in Brazil. When in full operation, the platform will be interconnected to 18 production and 11 water injector wells.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
