Petrobras' Proven Reserves in 2015

Rio de Janeiro, January 29, 2016 – Petróleo Brasileiro S.A. - Petrobras announces its proven reserves of petroleum (oil, condensate and natural gas), assessed at the end of 2015 according to ANP/SPE (National Petroleum, Natural Gas and Biofuels Agency / Society of Petroleum Engineers) and SEC (US Securities and Exchange Commission) criteria.

Proven Reserves according to ANP/SPE Criteria:

According to ANP/SPE criteria, on December 31, 2015, Petrobras´ proven oil, condensate and natural gas reserves reached 13.279 billion barrels of oil equivalent (boe), as shown in Table 1. In 2014, it was 16.612 billion boe.

Table 1 – Proven Reserves in 2015 (ANP/SPE criteria)

	Item	Proven Reserves
	Oil and Condensate (billion bbl)	10.946
Petrobras Total	Natural Gas (billion m3)	372.450
	Oil Equivalent (billion boe)	13.279

FORWARD-LOOKING STATEMENTS

This release includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that are subject to risks and uncertainties. The forward-looking statements, which address the Company's expected business and financial performance, among other matters, contain words such as "believe," "expect," "estimate," "anticipate," "optimistic," "intend," "plan," "aim," "will," "may," "would," "likely," and similar expressions. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date on which they are made. There is no assurance that the expected events, trends or results will actually occur. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events or for any other reason.

Table 2 presents the evolution of proven reserves in 2015, according to ANP/SPE criteria:

Table 2 – Evolution of Proven Reserves in 2015 (ANP/SPE criteria)

	Petrobras Total
Composition of proven reserves	
	(billion boe)
a) Proven Reserves December/2014	16.612
b) New discoveries and new accumulations in 2015	0.016
c) Reserves Monetization in 2015 [1]	-0.022
d) Revisions in 2015 [2]	-2.395
e) Balance in 2015 (b+c+d)	-2.401
f) Year Production in 2015	-0,932
g) Annual Variation (e+f)	-3.333
h) Proven Reserves December /2015 (a+g)	13.279

The main factors impacting the reserves were:

- The incorporation of 0.016 billion boe of proven reserves related to the discovery of new accumulations close to existing infrastructure in the Albacora Leste field in the Campos Basin, the Golfinho field in the Espírito Santo Basin and the El Mangrullo field in the Neuquina Basin, in Argentina;
- Additions to proven reserves in the pre-salt production fields in the Santos and Campos Basins, resulting from positive responses to reservoir behavior, recovery mechanisms (e.g. water injection), the operating efficiency of the systems in operation and growing drilling activity and well linkage;

- Appropriations due to the drilling of production development wells in onshore fields in in Argentina and in the Amazonas and Potiguar Basins, in Brazil, and in offshore fields in the Campos Basin;
- The declaration of commerciality of the Jandaia Sul field in Bahia;
- Divestments that provided early monetization of 0.022 billion boe of reserves in Brazil (Campos Basin) and Argentina (Austral Basin);
- Production of 0.932 billion boe in 2015, which represents an increase of 4% from 2014. This
 volume includes the production of shale but does not include the volume extracted from the
 Extended Well Tests (EWT) nor the production in Bolivia. EWTs occur in exploratory areas,
 which has not yet been declared commerciality of the field, so there is no associated reserves
 and, in the case of Bolivia, the country's legislation does not allow that reservations be
 recorded by the concessionaire.
- [1] Divestments, which represent early monetization of reserves.
- [2] Revisions based on technical criteria (eg reservoir characteristics) and economic.

FORWARD-LOOKING STATEMENTS

This release includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that are subject to risks and uncertainties. The forward-looking statements, which address the Company's expected business and financial performance, among other matters, contain words such as "believe,"

"expect," "estimate," "anticipate," "optimistic," "intend," "plan," "aim," "will," "may," "would," "likely," and similar expressions. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date on which they are made. There is no assurance that the expected events, trends or results will actually occur. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events or for any other reason.

Petrobras presented a reduction of 2.401 billion boe in proven reserves because of other factors than the extraction of oil and natural gas, as monetization of reserves and revisions, which equates to approximately 2.58 times the annual production. The ratio between the volume of reserves and production volume is 14.2 years, 14.6 years of which in Brazil. The Development Ratio (DR), which is the ratio between developed proven reserves and total proven reserves, came to 44.5 in 2015.

Proven Reserves according to SEC Criteria:

According to SEC reserves classification and appropriation criteria, on December 31, 2015, Petrobras´ proven oil, condensate and natural gas reserves reached 10.516 billion barrels of oil equivalent (boe), as shown in Table 3. In 2014, these volumes were 13.141 billion boe, including shale reserves.

Table 3 – Volumes of Proven Reserves in 2015 (SEC criteria)

	Item	Proven Reserves
	Oil and Condensate (billion bbl)	8.774
Petrobras	Natural Gas (billion m3)	278.435
	Oil Equivalent (billion boe)	10.516

We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events or for any other reason.

The evolution of the proven reserves, according to SEC criteria, is shown in Table 4.

Table 4 – Evolution of Proven Reserves (SEC criteria) in 2015

	Petrobras Total
Composition of proven reserves	
	(billion boe)
a) Proven Reserves December/2014	13.141
b) New discoveries and new accumulations in 2015	0.020
c) Reserves Monetization in 2015 ^[3]	-0.022
d) Revisions in 2015 ^[4]	-1.690
e) Balance in 2015 (b+c+d)	-1.692
f) Year Production in 2015	-0.932
g) Annual Variation (e+f)	-2.624
h) Proven Reserves December /2015 (a+g)	10.516
Apparent differences in the sum of the numbers are due to rounding off.	

The same highlights previously made for proven reserves according to ANP/SPE criteria, applied to proven reserves, according to SEC criteria.

The main difference between the ANP/SPE and SEC criteria are sale prices considered in the calculation of the economic viability of the reserves.

By SEC criteria, Petrobras presented a reduction of 1.692 billion boe in their proven reserves due to factors other than the extraction of oil and natural gas, as monetization of reserves and revisions, which equates to approximately 1.82 times the annual production. The ratio

Edgar Filing: PETROBRAS - PETROLEO BRASILEIRO SA - Form 6-K

between the volume of the reserves and the volume produced is 11.3 years, 11.5 years of which in Brazil. The Development Ratio (DR), the ratio between developed proven reserves and total proven reserves, of 51.1% in 2015.

It is important mentioning that Petrobras historically certifies about 95% of its proven reserves according to SEC criteria. Currently, D&M (DeGolyer and MacNaughton) is the certifying entity.

[3] Divestments, which represent early monetization of reserves.

[4] Revisions based on technical criteria (eg reservoir characteristics) and economic.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (Exchange Act) that are not based on historical facts and are not assurances of future results. These forward-looking statements are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results o f operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.

All forward-looking statements are expressly qualified in their entirety by this cautionary statement, and you should not place reliance on any forward-looking statement contained in this press release. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events or for any other reason.
