**TOP SHIPS REPORTS THIRD QUARTER AND NINE MONTHS ENDED SEPTEMBER 30, 2009
FINANCIAL RESULTS**

ATHENS, GREECE - (November 9, 2009) - TOP Ships Inc. (NasdaqGS:TOPS) today announced its operating results for the third quarter and nine months ended September 30, 2009.

For the third quarter of 2009, the Company reported net income of \$329,000 or \$0.01 per share, compared with net income of \$41,640,000 or \$1.44 per share, for the third quarter of 2008. Third quarter operating income was \$6,672,000 for 2009, compared with operating income of \$49,127,000 for the corresponding period in 2008. Revenues for the third quarter of 2009, were \$25,153,000 compared to \$71,094,000 recorded in the third quarter of 2008.

For the nine months ended September 30, 2009, the Company reported net loss of \$14,251,000 or \$0.52 per share, compared with net income of \$17,210,000 or \$0.69 per share, for the nine months ended September 30, 2008. For the nine months ended September 30, 2009, operating loss was \$2,473,000 compared with operating income of \$53,771,000 for the nine months ended September 30, 2008. Revenues for the nine months ended September 30, 2009, were \$83,582,000 compared to \$220,418,000 recorded in the nine months ended September 30, 2008.

Evangelos J. Pistiolis, President and Chief Executive Officer of TOP Ships Inc., commented:

We are happy to report a profitable quarter despite the current dire market conditions. Our financial results for the third quarter of 2009 include non-recurring charges of \$1,386,000 relating to the termination of leases and one-off cash and accelerated stock-based compensation of retiring board members. Excluding these expenses, net income for the third quarter of 2009 would have been \$1,715,000 or \$0.06 per share.

Edgar Filing: TOP SHIPS INC. - Form 6-K

During the third quarter of 2009 we achieved average TCE rates of \$26,777 for the vessels that we operated under time charters and approximately \$22,700 for the vessels that we operated under bareboat charters. Given our fixed contracts we expect similar rates to be achieved during the fourth quarter of 2009.

As of September 30, 2009, we were in breach of our loan covenants and we are currently in discussions with all our banks to receive waivers for these breaches and extend existing waivers that were scheduled to expire in 2010, to 2011.

The following indicators serve to highlight the operational performance of the Company's current fleet during the three and nine month periods ended September 30, 2009, and 2008:

CURRENT FLEET DATA

	Three Months Ended		Nine Months Ended	
	2008	September 30, 2009	September 30, 2008	September 30, 2009
Total number of vessels at the end of the period	7	13	7	13
Total calendar days for fleet (1)	644	1,163	1,762	2,930
Total available days for fleet (2)	638	1,161	1,708	2,864
Total operating days for fleet (3)	627	1,160	1,692	2,834
Fleet utilization (4)	98.28%	99.91%	99.06%	98.95%

(1) We define calendar days as the total days the vessels were in our possession for the relevant period. Calendar days are an indicator of the size of our fleet over the relevant period and affect both the amount of revenues and expenses that we record during that period.

(2) We define available days as the number of calendar days less the aggregate number of days that our vessels are off-hire due to scheduled repairs or scheduled guarantee inspections in the case of newbuildings, vessel upgrades or special surveys and the aggregate amount of time that we spend positioning our vessels. Companies in the shipping industry generally use available days to measure the number of days in a period during which vessels should be capable of generating revenues. We determined to use available days as a performance metric for the first time, in the second quarter and first half of 2009. We have decided to adjust the calculation method of utilization to include available days in order to be comparable with shipping companies that calculate utilization using operating days divided by available days.

(3) We define operating days as the number of available days in a period less the aggregate number of days that our vessels are off-hire due to unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period during which the vessels actually generate revenues.

(4) We calculate fleet utilization by dividing the number of operating days during a period by the number of available days during that period. The shipping industry uses fleet utilization to measure a company's efficiency in finding suitable employment for its vessels and minimizing the number of days that its vessels are off-hire for reasons other

than scheduled repairs or scheduled guarantee inspections in the case of newbuildings, vessel upgrades, special or intermediate surveys and vessel positioning. We used a new calculation method for fleet utilization for the first time, in the second quarter and first half of 2009. In all prior filings and reports, utilization was calculated by dividing operating days by calendar days. We have decided to change the calculation method in order to be comparable with most shipping companies, which calculate utilization using operating days divided by available days.

The following table presents the Company's current fleet and employment profile:

	<u>Dwt</u>	<u>Year Built</u>	<u>Charter Type</u>	<u>Expiry</u>	<u>Daily Base Rate</u>	<u>Profit Sharing Above Base Rate (2009)</u>

Outstanding Indebtedness

As of September 30, 2009, we had total indebtedness under senior secured and unsecured credit facilities with our lenders of \$407.3 million with maturity dates from 2010 through 2019.

Loan Covenants and Discussions with Banks

As of the date of this release, we have received waivers and signed amendments to our loan agreements with all five of our lending banks in relation to certain loan covenant breaches that have taken place since December 31, 2008. However, as of September 30, 2009, we were in breach of additional covenants with all of our banks, which have not been previously waived. These breaches relate to EBITDA, our overall cash position (minimum liquidity covenants), adjusted net worth and the asset value cover of our product tankers with certain banks. We expect that our lenders will not demand payment of our loans before their maturity, provided that we pay loan installments and accumulated or accrued interest as they fall due under the existing credit facilities.

If we are unable to obtain covenant waivers or modifications for current covenant breaches or for covenant breaches that may occur in future reporting periods, our lenders may require that we post additional collateral, enhance our equity and liquidity, increase our interest payments or pay down our indebtedness to a level where we are in compliance with our loan covenants, sell vessels, or they may accelerate our indebtedness, which would impair our ability to continue to conduct our business. In order to further enhance our liquidity, we may find it necessary to sell vessels at a time when vessel prices are low, in which case we will recognize losses and a reduction in earnings, which could affect our ability to raise additional capital necessary to comply with our loan covenants and/or the additional lender requirements described above.

About TOP Ships Inc.

TOP Ships Inc., formerly known as TOP Tankers Inc., is an international provider of worldwide seaborne crude oil and petroleum products and drybulk transportation services. The Company operates a combined tanker and drybulk fleet as follows:

n

A fleet of eight double-hull Handymax tankers and an average age of 2.6 years with a total carrying capacity of approximately 0.4 million dwt, of which 76% are sister ships. Two of the Company's Handymaxes are on time charter contracts with an average term of 9 months with both of the time charters including profit sharing agreements above their base rates. Six of the Company's Handymax tankers are fixed on a bareboat charter basis with an average term of 8.4 years.

n

A fleet of five drybulk vessels with a total carrying capacity of approximately 0.3 million dwt and an average age of 8.5 years, of which 47% are sister ships. All of the Company's drybulk vessels have fixed rate employment contracts for an average period of 23 months.

Forward-Looking Statements

Matters discussed in this press release may constitute forward-looking statements. The Private Securities Litigation Reform Act of 1995 provides safe harbor protections for forward-looking statements in order to encourage companies to provide prospective information about their business. Forward-looking statements include statements concerning plans, objectives, goals, strategies, future events or performance, and underlying assumptions and other statements, which are other than statements of historical facts.

The Company desires to take advantage of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and is including this cautionary statement in connection with this safe harbor legislation. The words "believe," "anticipate," "intends," "estimate," "forecast," "project," "plan," "potential," "may," "should," "expect" "pending" and similar expressions identify forward-looking statements. The forward-looking statements in this press release are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, our management's examination of historical operating trends, data contained in our records and other data available from third parties. Although we believe that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond our control, we cannot assure you that we will achieve or accomplish these expectations, beliefs or projections.

In addition to these important factors, other important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include the strength of world economies and currencies, general market conditions, including fluctuations in charter rates and vessel values, failure of a seller to deliver one or more vessels or of a buyer to accept delivery of one or more vessels, inability to procure acquisition financing, default by one or more charterers of our ships, changes in the demand for crude oil and petroleum products, changes in demand for dry bulk shipping capacity, changes in our operating expenses, including bunker prices, drydocking and insurance costs, the market for our vessels, availability of financing and refinancing, changes in governmental rules and regulations or actions taken by regulatory authorities, potential liability from pending or future litigation, general domestic and international political conditions, potential disruption of shipping routes due to accidents or political events, vessels breakdowns and instances of off-hires and other factors. Please see our filings with the Securities and Exchange Commission for a more complete discussion of these and other risks and uncertainties.
