The conversion of Renminbi into U.S. dollars for the first quarter of 2007 in this release, made solely for the convenience of the reader, is based on the noon buying rate in The City of New York for cable transfers of Renminbi as certified for customs purposes by the Federal Reserve Bank of New York as of March 30, 2007, which was RMB 7.7232 to US\$ 1.0000. No representation is intended to imply that the Renminbi amounts could have been, or could be, converted, realized or settled into U.S. dollars at that rate on March 30, 2007, or at any other date. The percentages stated in this press release are calculated based on Renminbi.

Samuel Yang, JA Solar's Chief Executive Officer, said, "The first quarter was another strong one for JA Solar. We continue to benefit from strong demand worldwide for high-quality cells. We continue to meet the global demand from existing customers, while at the same time focusing our sales efforts to further diversify our solid customer base in emerging solar markets. With reliable supply sources contracted throughout 2007 from incumbent silicon suppliers, an order book that covers most of our sales for the year, and our increased capacity of an additional 100MW to be completed by the end of the third quarter of 2007, we are confident in our ability to deliver on the healthy global demand for our products."

Herman Zhao, JA Solar's Chief Financial Officer, said, "We have continued to stress profitability and operational efficiency. Our ability to negotiate favorable pricing for materials and in sales contracts has paid off, and our cost strategies are always geared for the best possible benefit to JA Solar for the long-term. We expect our gross margin for year 2007 to be 19.5% due to stabilizing ASPs, existing raw material contract

prices and management of our Hebei expansion plan and related costs.

Company Reiterates 2007 Outlook

Based on current market conditions and customer forecasts, the Company is reiterating its production outlook for 2007 to be approximately 100MW.
