FORWARD-LOOKING STATEMENTS

Statements made by us in this report and in other reports and statements released by us that are not historical facts constitute “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”) and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). These forward-looking statements are necessarily estimates reflecting the judgment of our senior management based on our current estimates, expectations, forecasts and projections and include comments that express our current opinions about trends and factors that may impact future operating results. Disclosures that use words such as “believe,” “anticipate,” “estimate,” “intend,” “could,” “plan,” “expect,” “project” or the negative of these, as well as similar expressions, are intended to identify forward-looking statements. These statements are not guarantees of future performance, rely on a number of assumptions concerning future events, many of which are outside of our control, and involve known and unknown risks and uncertainties that could cause our actual results, performance or achievement, or industry results, to differ materially from any future results, performance or achievements, expressed or implied by such forward-looking statements. These risks and uncertainties may include the risks and uncertainties described elsewhere in this report and other filings with the Securities and Exchange Commission (the “SEC”), including the Item 1A. “Risk Factors” section of our annual report on Form 10-K for the year ended December 31, 2012. Any such forward-looking statements, whether made in this report or elsewhere, should be considered in the context of the various disclosures made by us about our businesses including, without limitation, the risk factors discussed in our filings with the SEC. Except as required under the federal securities laws and the rules and regulations of the SEC, we do not have any intention or obligation to update publicly any forward-looking statements, whether as a result of new information, future events, changes in assumptions, or otherwise.

Notes to Consolidated Financial Statements

(Unaudited)

NOTE 1—BASIS OF PRESENTATION

Kennedy-Wilson Holdings, Inc.'s (together with its wholly owned and controlled subsidiaries, "we," "us," "our," "the Company" or "Kennedy Wilson") unaudited interim consolidated financial statements have been prepared pursuant to the rules and regulations of the U.S. Securities and Exchange Commission ("SEC"). Certain information and footnote disclosures normally included in the financial statements prepared in accordance with accounting principles generally accepted in the United States ("GAAP") may have been condensed or omitted pursuant to SEC rules and regulations, although we believe that the disclosures are adequate to make their presentation not misleading. In the opinion of Kennedy Wilson, all adjustments, consisting of only normal and recurring items, necessary for a fair presentation of the results of operations for the three and six months ended June 30, 2013 and 2012 have been included. The results of operations for these periods are not necessarily indicative of results that might be expected for the full year ending December 31, 2013. For further information, your attention is directed to the footnote disclosures found in Kennedy Wilson's Annual Report on Form 10-K for the year ended December 31, 2012.

The consolidated financial statements include the accounts of Kennedy Wilson and its wholly owned or controlled subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation. In addition, Kennedy Wilson evaluates its relationships with other entities to identify whether they are variable interest entities ("VIEs") as defined in the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Subtopic 810-10 and to assess whether it is the primary beneficiary of such entities. If the determination is made that Kennedy Wilson is the primary beneficiary, then that entity is included in the consolidated financial statements in accordance with the ASC Subtopic 810-10. The ownership of the other interest holders in consolidated subsidiaries is reflected as noncontrolling interests.

The preparation of the accompanying consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions about future events. These estimates and the underlying assumptions affect the amounts of assets and liabilities reported, disclosure about contingent assets and liabilities, and reported amounts of revenues and expenses. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates.

NOTE 2—SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ADOPTION OF NEW ACCOUNTING PRONOUNCEMENTS

REVENUE RECOGNITION—Performance fees or carried interests are allocated to the general partner, special limited partner or asset manager of Kennedy Wilson's real estate funds and loan pool participations based on the cumulative performance of the funds and loan pools and are subject to preferred return thresholds of the limited partners and participants. At the end of each reporting period, Kennedy Wilson calculates the performance fee that would be due to the general partner, special limited partner or asset manager's interests for a fund or loan pool, pursuant to the fund agreement or participation agreements, as if the fair value of the underlying investments were realized as of such date, irrespective of whether such amounts have been realized. As the fair value of underlying investments varies between reporting periods, it is necessary to make adjustments to amounts recorded as performance fees to reflect either (a) positive performance resulting in an increase in the performance fee allocated to the general partner or asset manager or (b) negative performance that would cause the amount due to Kennedy Wilson to be less than the amount previously recognized as revenue, resulting in a negative adjustment to performance fees allocated to the general partner or asset manager. Substantially all of the performance fees are recognized in management and leasing fees, and substantially all of the carried interest is recognized in equity in joint venture income in our consolidated statements of operations. Total performance fees recognized through June 30, 2013 that may be reversed in future periods if there is negative fund or loan pool performance totaled \$17.8 million. Performance fees accrued as of June 30, 2013 and December 31, 2012 were \$17.8 million and \$12.8 million, respectively, and are included in accounts receivable—related parties in the accompanying consolidated balance sheet.

INVESTMENTS IN LOAN POOL PARTICIPATIONS AND NOTES RECEIVABLE—Interest income from investments in loan pool participations and notes receivable with declining credit quality are recognized on a level yield basis under the provisions of "Loans and Debt Securities Acquired with Deteriorated Credit Quality," ASC Subtopic 310-30, where a level yield model is utilized to determine a yield rate that, based upon projected future cash flows, accretes interest income over the estimated holding period. In the event that the present value of those future cash flows is less than net book value, a loss would be immediately recorded. When the future cash flows of a note cannot be reasonably estimated, cash payments are applied to the cost basis of the note until it is fully recovered before any interest income is recognized. Interest income from investments in notes receivable acquired at a discount are recognized using the effective interest method and interest income from notes receivable which the Company originates are recognized at the stated interest rate.

DISTRIBUTIONS FROM UNCONSOLIDATED REAL ESTATE JOINT VENTURES—During the quarter ended March 31, 2013, the Company changed its method of accounting for determining the allocation of cash flows received from unconsolidated real estate joint ventures on its consolidated statement of cash flows from the "cumulative earnings" method to the "look-through" method both of which are acceptable methods under GAAP. Under the "look-through" approach, distributions are reported under operating cash flow unless the facts and circumstances of a specific distribution clearly indicate that it is a return of capital (e.g., a liquidating dividend or distribution of the proceeds from the joint venture's sale of assets), in which case it is reported as an investing activity. The newly adopted method is preferable because it enables the Company to look to the nature and source of the distribution received and classify it appropriately between operating and investing activities on the statement of cash flows based upon the source, which allows the Company to present financial statements more consistent with accounting principles of consolidation. The effects of the change upon the six month period ended June 30, 2012 are as follows:

	Cumulative earnings method	Look-through method
Operating Cash Flows:		
Operating distributions from joint ventures	\$ 15,248,000	\$ 24,271,000
Net cash provided from operating activities	9,901,000	18,924,000
Investing Cash Flows:		
Investing distributions from joint ventures	29,622,000	20,599,000
Net cash used in investing activities	(56,295,000) (65,318,000)

ACCOUNTS RECEIVABLE—Accounts receivable are recorded at the contractual amount as determined by the underlying agreements and do not bear interest. An allowance for doubtful accounts is provided when the Company determines there are probable credit losses in the Company's existing accounts receivable based on historical experience. The Company reviews its accounts receivable for probable credit losses on a quarterly basis. As of June 30, 2013, the Company had an immaterial allowance for doubtful accounts and during the six months ended June 30, 2013 and 2012 recorded no provision for doubtful accounts.

FOREIGN CURRENCIES—The financial statements of subsidiaries located outside the United States are measured using the local currency as the functional currency. The assets and liabilities of these subsidiaries are translated at the rates of exchange at the balance sheet date, and income and expenses are translated at the average monthly rate. The foreign currencies include the euro, the British pound sterling, and the Japanese yen. Cumulative translation adjustments, to the extent not included in cumulative net income, are included in the consolidated statement of equity as a component of accumulated other comprehensive income.

DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES—All derivative instruments are recognized as either assets or liabilities in the balance sheet at their respective fair values. For derivatives designated in hedging relationships, changes in fair value of cash flow hedges or net investment hedges are recognized in accumulated other comprehensive income, to the extent the derivative is effective at offsetting the changes in the item being hedged until the hedged item affects earnings. Changes in fair value for fair value hedges are recognized in earnings.

RECENT ACCOUNTING PRONOUNCEMENTS— In February 2013, the FASB issued ASC Update No. 2013-02 "Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income." Update No. 2013-02 is effective prospectively for reporting periods beginning after December 15, 2012. ASC 2013-02 requires an entity to present separately information about the effects on net income of significant amounts reclassified out of each component of accumulated other comprehensive income. An entity can present the information on the face of the comprehensive income statement or as a separate disclosure in the notes to the financial

statements. Kennedy Wilson does not expect any effect from adoption as it has already adopted this policy. The FASB did not issue any other ASCs during the first six months of 2013 that we expect to be applicable and have a material impact on our financial position or results of operations.

On April 29, 2013, the Company acquired a 450-unit apartment building in Salt Lake City, UT for \$61.8 million and financed it with a \$49.7 million mortgage loan and equity.

On March 28, 2013, the Company acquired the interest of some of its existing partners in a 615-unit apartment building in Northern California, increasing its ownership from 15% to 94%. Kennedy Wilson recorded an acquisition related gain in the amount of \$9.5 million in the accompanying consolidated statements of operations for the six months ended June 30, 2013 as the fair value was in excess of the carrying value of its ownership interest. As the transaction was between willing third party market participants, the purchase price was an approximation of fair value.

As a result of acquiring this business, the joint venture was required to consolidate the assets and liabilities at fair value in accordance with the aforementioned guidance. As the fair value of the business was in excess of the basis in the previously held mortgage notes, the joint venture recognized a \$30.1 million acquisition related gain. The Company's portion of the gain was \$15.0 million and was recognized in equity in joint venture income.

Variable Interest Entities

Kennedy Wilson has determined that it has investments in five variable interest entities ("VIEs") as of June 30, 2013 and has concluded that Kennedy Wilson is not the primary beneficiary of any of the investments. As of June 30, 2013, the five VIEs had assets totaling \$227.6 million with Kennedy Wilson's exposure to loss as a result of its interests in these VIEs totaling \$93.0 million related to its equity contributions.

The Company determines the appropriate accounting method with respect to all investments that are not VIEs based on the control-based framework (controlled entities are consolidated) provided by the consolidations guidance in ASC Topic 810. The Company's determination considers specific factors cited under ASC 810-20 "Control of Partnerships and Similar Entities" which presumes that control is held by the general partner (and managing member equivalents in limited liability companies). Limited partners' substantive participation rights may overcome this presumption of control. The Company accounts for joint ventures it is deemed not to control using the equity method of accounting while controlled entities are consolidated.

Capital Commitments

As of June 30, 2013, Kennedy Wilson has unfulfilled capital commitments totaling \$7.2 million to four of its joint ventures. We may be called upon to contribute additional capital to joint ventures in satisfaction of Kennedy Wilson capital commitment obligations.

Guarantees

Kennedy Wilson has certain guarantees associated with loans secured by consolidated assets or assets held directly or in various joint ventures. As of June 30, 2013 the maximum potential amount of future payments (undiscounted) Kennedy Wilson could be required to make under the guarantees was approximately \$55.7 million which is approximately 2.1% of the property level debt of the Company. The guarantees expire through 2015, and Kennedy Wilson's performance under the guarantees would be required to the extent there is a shortfall upon liquidation between the principal amount of the loan and the net sale proceeds from the property. Based upon Kennedy Wilson's evaluation of guarantees under ASC Subtopic 460-10 "Estimated Fair Value of Guarantees," the estimated fair value of guarantees made as of June 30, 2013 and December 31, 2012 is immaterial.

Investments in joint ventures

Kennedy Wilson records its investments in KW Property Fund III, L.P., Kennedy Wilson Real Estate Fund IV, L.P., and SG KW Venture I, LLC (the "Funds") based upon the net assets that would be allocated to its interests in the Funds assuming the Funds were to liquidate their investments at fair value as of the reporting date. Kennedy Wilson's investment balance in the Funds was \$27.0 million and \$25.8 million at June 30, 2013 and December 31, 2012, respectively, which is included in investments in

joint ventures in the accompanying consolidated balance sheets. As of June 30, 2013, Kennedy Wilson had unfunded capital commitments to the Funds in the amount of \$7.1 million.

Kennedy Wilson elected to use the fair value option ("FV Option") for two investments in joint venture entities to more accurately reflect the timing of the value created in the underlying investments and report those results in current operations. Kennedy Wilson's investment balance in the FV Option investments was \$47.0 million and \$42.6 million at June 30, 2013 and December 31, 2012, respectively, which are included in investments in joint ventures in the accompanying balance sheets.

The following table summarizes our investments in joint ventures held at fair value by type:

	June 30, 2013	December 31, 2012
Funds	\$26,986,000	\$25,795,000
FV Option	46,982,000	42,568,000
Total	\$73,968,000	\$68,363,000

The following table presents changes in Level 3 investments for the three and six months ended June 30, 2013 and 2012:

The change in unrealized and realized gains and losses is included in equity in joint venture income in the accompanying statements of operations.

There was no material change in unrealized gains and losses on Level 3 investments during the three and six months ended June 30, 2013 and 2012 for investments still held as of June 30, 2013.

In estimating fair value of real estate held by the Funds and the two FV Option investments, Kennedy Wilson considers significant unobservable inputs such as capitalization and discount rates. The table below describes the range of unobservable inputs for real estate assets:

	Estimated Rates Used for	
	Capitalization rates	Discount Rates
Multifamily	5.75% - 7.00%	7.50% - 9.00%
Commercial	6.25% - 7.50%	7.00% - 9.75%
Retail	8.00%	9.00% - 12.00%
Land and condominium units	n/a	8.00% - 12.00%
Loan	n/a	2.00% - 9.30%

In valuing real estate, related assets and indebtedness, Kennedy Wilson considers significant inputs such as the term of the debt, value of collateral, market loan-to-value ratios, market interest rates and spreads, and credit quality of investment entities. The credit spreads used by Kennedy Wilson for these types of investments range from 2.00% to 9.30%.

The accuracy of estimating fair value for investments utilizing unobservable inputs cannot be determined with precision and cannot be substantiated by comparison to quoted prices in active markets. As such, estimated fair value may not be realized in a current sale or immediate settlement of the asset or liability. Additionally, there are inherent uncertainties in any fair value

measurement technique, and changes in the underlying assumptions used, including cap rates, discount rates, liquidity risks, and estimates of future cash flows, could significantly affect the fair value measurement amounts.

Currency forward contracts

Kennedy Wilson has currency forward contracts to manage its exposure to currency fluctuations between its functional currency (U.S. dollars) and the functional currency (euros) of certain of its wholly owned subsidiaries. To accomplish this objective, Kennedy Wilson hedged these exposures by entering into currency forward contracts to partially hedge Kennedy Wilson's exposure to its net investment in certain foreign operations caused by currency fluctuations. The currency forward contracts are valued based on the difference between the contract rate and the forward rate at maturity of the foreign currency applied to the notional value in that foreign currency discounted at a market rate for similar risks. Although Kennedy Wilson has determined that the majority of the inputs used to value its derivative fall within Level 2 of the fair value hierarchy, the counterparty risk adjustments associated with the derivative utilize Level 3 inputs. However, as of June 30, 2013, Kennedy Wilson assessed the significance of the impact of the counterparty valuation adjustments on the overall valuation of its derivative positions and determined that the counterparty valuation adjustments are not significant to the overall valuation of its derivative. As a result, Kennedy Wilson has determined that its derivative valuation in its entirety be classified in Level 2 of the fair value hierarchy.

Changes in fair value are recorded in other comprehensive income in the accompanying consolidated statements of comprehensive income (loss) as the portion of the currency forward contract used to hedge currency exposure of its certain wholly owned subsidiaries qualifies as a net investment hedge under ASC Topic 815. The fair value of the derivative instruments held as of June 30, 2013 are included in accrued expenses and other liabilities on the balance sheet.

The table below details the currency forward contracts Kennedy Wilson had as of June 30, 2013:

Currency	Trade Date	Settlement Date	Exchange Rate	Fair Value	Change in Unrealized Gains (Losses)	
					Three Months Ended June 30, 2013	Six Months Ended June 30, 2013

			Total	\$(437,000)	\$425,000	\$1,021,000

In order to manage currency fluctuations between the Company's functional currency (U.S. dollar) and the functional currency of KWR's functional currency (Japanese yen), the Company entered into forward foreign currency contracts to hedge a portion of its net investment in KWR. During the three and six months ended June 30, 2013, the Company recognized a gross unrealized gain of \$3.3 million and \$8.7 million, respectively, related to these hedges.

Fair value of financial instruments

The carrying amounts of cash and cash equivalents, accounts receivable including related party receivables, accounts payable, accrued expenses and other liabilities, accrued salaries and benefits, and deferred and accrued income taxes approximate fair value due to their short-term maturities. The carrying value of notes receivable (excluding related party notes receivable as they are presumed not to be an arm's length transaction) approximates fair value as the terms are similar to loans with similar characteristics available in the market.

The Company accounts for its debt liabilities at face value plus net unamortized debt premiums. The fair value as of June 30, 2013 and December 31, 2012 for the senior notes payable, borrowings under lines of credit, mortgage loans payable and junior subordinated debentures were estimated to be approximately \$829.9 million and \$708.2 million,

respectively, based on a comparison of the yield that would be required in a current transaction, taking into consideration the risk of the underlying collateral and our credit risk to the current yield of a similar security, compared to their carrying value of \$798.2 million and \$686.2 million at June 30, 2013 and December 31, 2012, respectively.

The local currencies for our interests in foreign operations include the euro, the British pound sterling, and the Japanese yen. The related amounts on our balance sheets are translated into U.S. dollars at the exchange rates at the respective financial statement date, while amounts on our statements of operations are translated at the average exchange rates during the respective period. The increase in the unrealized losses on foreign currency translation is a result of the strengthening of the U.S. dollar against the euro, the British pound and the Japanese yen during the six months ended June 30, 2013.

Additionally, during the year, KWR settled several Japanese yen-related hedges resulting in cash proceeds of \$23.1 million, of which Kennedy Wilson received \$10.8 million. The cash received as a result of unwinding these hedges will not be realized in our statement of operations until the underlying investment is substantially liquidated. Kennedy Wilson also has a currency forward contract to manage its exposure to currency fluctuations between its functional currency (U.S. dollars) and the functional currency (euros) of certain of its wholly-owned subsidiaries (see Note 7 for more detail). NOTE 16—SEGMENT INFORMATION

Kennedy Wilson's business is defined by two core segments: KW Investments and KW Services. KW Investments invests in multifamily, residential and commercial properties as well as loans secured by real estate. KW Services provides a full array of real estate-related services to investors and lenders, with a strong focus on financial institution-based clients. Kennedy Wilson's segment disclosure with respect to the determination of segment profit or loss and segment assets is based on these services and investments.

KW INVESTMENTS—Kennedy Wilson, on its own and through joint ventures, is an investor in real estate, including multifamily, residential and commercial properties as well as loans secured by real estate.

Substantially all of the revenue—related party was generated via inter-segment activity for the six months ended June 30, 2013 and 2012. Generally, this revenue consists of fees earned on investments in which Kennedy Wilson also has an ownership interest. The amounts representing investments with related parties and non-affiliates are included in the investment segment. No single third-party client accounted for 10% or more of Kennedy Wilson's revenue during any period presented in these financial statements.

There have been no changes in the basis of segmentation or in the basis of measurement of segment profit or loss since the December 31, 2012 financial statements.

KW SERVICES—Kennedy Wilson offers a comprehensive line of real estate services for the full life cycle of real estate ownership and investment to clients that include financial institutions, developers, builders and government agencies. Kennedy Wilson provides auction and conventional sales, property management, investment management, asset management, leasing, construction management, acquisitions, dispositions, research and trust services.

NOTE 17—INCOME TAXES

In determining quarterly provisions for income taxes, Kennedy Wilson uses an effective tax rate based on actual year-to-date income and statutory tax rates. The effective tax rate also reflects Kennedy Wilson's assessment of its potential exposure for uncertain tax positions.

The fluctuations between periods in the Company's effective tax rate are mainly due to varying levels of income and amounts attributable to foreign sourced income and noncontrolling interests. Permanent differences that impact the Company's effective rate as compared to the U.S. federal statutory rate of 34% were not materially different in amount for all periods. The difference between the U.S. federal rate of 34% and the Company's effective rate is attributable to the taxation of foreign sourced income being taxed at rates lower than the U.S. domestic rate and income attributable to noncontrolling interests. The Company's subsidiaries in Ireland and the United Kingdom are subject to corporate tax rates of 12.5% and 23%, respectively.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations contains forward-looking statements within the meaning of the federal securities laws. See the discussion under the heading "Forward-looking Statements" elsewhere in this report. Unless specifically noted otherwise, as used throughout this Management's Discussion and Analysis section, "we," "our," "us," "the Company" or "Kennedy Wilson" refers to Kennedy-Wilson Holdings, Inc. and its subsidiaries.

Overview

Founded in 1977, we are an international real estate investment and services firm. We are a vertically-integrated real estate operating company with approximately 400 professionals in 24 offices throughout the United States, United Kingdom, Ireland, Spain and Japan. Based on management's estimate of fair value as of June 30, 2013, we have approximately \$13.5 billion of real estate and real estate-related assets under our management ("AUM"), totaling approximately 64.4 million square feet of properties throughout the United States, Europe and Japan. This includes ownership in 16,679 multifamily apartment units, of which 2,030 units are owned by our consolidated subsidiaries and 14,649 are held in joint ventures.

AUM generally refers to the properties and other assets with respect to which we provide (or participate in) oversight, investment management services and other advice, and which generally consist of real estate properties or loans, and investments in joint ventures. Our AUM is principally intended to reflect the extent of our presence in the real estate market and is not the basis for determining our management fees. Our material assets under management consist of the total estimated fair value of the real estate properties and other assets either owned by third parties, wholly owned by us or held by joint ventures and other entities in which our sponsored funds or investment vehicles and client accounts have invested. Committed (but unfunded) capital from investors in our sponsored funds is not included in our AUM. The estimated value of development properties is included at estimated completion cost.

Our operations are defined by two core business units: KW Investments and KW Services.

KW Investments invests our capital and our partners' capital in real-estate related assets including multifamily, commercial, and residential properties as well as loans secured by real estate. Occasionally we will engage in development. We are diligent in our operations of these investments and typically look to maximize cash flow on our income-producing properties, value on our non-income-producing properties, and resolutions on our loans secured by real estate. We will utilize leverage on our investments where we feel appropriate. We are mindful of the amount of leverage we elect to use, our exposure to variable interest rates, and the timing of maturities.

KW Services provides a full array of real estate-related services to investors and lenders, with a strong focus on financial institution-based clients.

⁽¹⁾ EBITDA represents net income before interest expense, our share of interest expense included in income from investments in joint ventures and loan pool participations, depreciation and amortization, our share of depreciation and amortization included in income from investments in joint ventures, and income taxes. We do not adjust EBITDA for gains or losses on the extinguishment of mortgage debt, as we are in the business of purchasing discounted notes secured by real estate and, in connection with these note purchases, we may resolve these loans through discounted payoffs with the borrowers. EBITDA is not a recognized term under GAAP and does not purport to be an alternative to net earnings as a measure of operating performance or to cash flows from operating activities as a measure of liquidity. Additionally, EBITDA is not intended to be a measure of free cash flow available for management's discretionary use, as it does not consider certain

cash requirements such as interest payments, tax payments and debt service requirements. Our presentation of EBITDA has limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of our results as reported under GAAP. EBITDA is not calculated under GAAP and should not be considered in isolation or as a substitute for net income, cash flows or other financial data prepared in accordance with GAAP or as a measure of our overall profitability or liquidity. Our management believes EBITDA is useful in evaluating our operating performance compared to that of other companies in our industry because the calculation of EBITDA generally eliminates the effects of financing and income taxes and the accounting effects of capital spending and acquisitions. Such items may vary for different companies for reasons unrelated to overall operating performance. Additionally, we believe EBITDA is useful to investors to assist them in getting a more accurate picture of our results from operations.

(2) Adjusted EBITDA represents EBITDA, as defined above, adjusted to exclude stock based compensation expense. Our management uses Adjusted EBITDA to analyze our business because it adjusts EBITDA for items we believe will not be relevant or comparable to the nature of our business going forward. Such items may vary for different companies for reasons unrelated to overall operating performance. Additionally, we believe Adjusted EBITDA is useful to investors to assist them in getting a more meaningful picture of our results from operations. However, EBITDA and Adjusted EBITDA are not recognized measurements under GAAP, and when analyzing our operating performance, readers should use EBITDA and Adjusted EBITDA in addition to, and not as an alternative for, net income as determined in accordance with GAAP. Because not all companies use identical calculations, our presentation of EBITDA and Adjusted EBITDA may not be comparable to similarly titled measures of other companies. Furthermore, EBITDA and Adjusted EBITDA are not intended to be a measure of free cash flow for our management's discretionary use, as it does not consider certain cash requirements such as tax and debt service payments. The amounts shown for EBITDA and Adjusted EBITDA also differ from the amounts calculated under similarly titled definitions in our debt instruments, which are further adjusted to reflect certain other cash and non-cash charges and are used to determine compliance with financial covenants and our ability to engage in certain activities, such as incurring additional debt and making certain restricted payments. We use certain non-GAAP measures to analyze our business including EBITDA⁽¹⁾ and Adjusted EBITDA,⁽²⁾ which are calculated as follows:

Revenues

Investments Segment Revenues

Rental income was \$10.4 million for the three months ended June 30, 2013 as compared to \$1.5 million for the same period in 2012. The \$8.9 million increase is primarily due to revenue generated on three apartment buildings and one office building acquired during the fourth quarter of 2012, two office buildings consolidated during the fourth quarter of 2012, and two multifamily properties in the Western United States acquired during the second quarter of 2013.

During the three months ended June 30, 2013, we sold 22 condominium units and one retail unit, generating \$6.1 million of proceeds from the sale of real estate.

Services Segment Revenues

Third Party Services - Third party services revenues are management and leasing fees as well as commissions earned from third parties and relate to assets in which we do not have an ownership interest.

Our third-party management and leasing service fees were \$4.8 million for the three months ended June 30, 2013 as compared to approximately \$4.1 million for the same period in 2012. In March 2012, we acquired Meyers Research ("Meyers"), a real estate consultancy firm specializing in capital sourcing and real estate research for the single-family homebuilding and multifamily apartment industries, which generated an additional \$0.9 million in management fees during the three month period ended June 30, 2013. Furthermore, our existing third-party management and leasing revenue decreased by \$0.3 million for the three months ended June 30, 2013 as compared to the same period in 2012 due to additional construction fees.

Our third-party commission revenues were \$0.9 million for the three months ended June 30, 2013 as compared to approximately \$1.4 million for the same period in 2012. During the three months ended June 30, 2013, we had a

decrease in auction sales as compared to the same period in 2012 as this business is typically counter cyclical. This led to lower third-party commission revenue.

Related Party Services - Related party services business are management and leasing fees as well as commissions earned from our equity partners and relate to assets in which we have an ownership interest.

Our related party management and leasing services generated revenues of \$9.4 million for the three months ended June 30, 2013 as compared to approximately \$6.1 million for the same period in 2012. The \$3.3 million or 54% increase primarily relates to an increase of \$1.8 million in asset management fees earned on the UK Loan Pool due to the resolution period being shortened from three years to two due to quicker resolutions than initially anticipated, \$0.8 million in asset management fees relating to a new loan pool in the United Kingdom that was entered into in December 2012, and \$0.7 million in additional fees earned mainly due to the admission of new investors into one of our funds.

Our related party commission fees were \$4.4 million for the three months ended June 30, 2013 as compared to approximately \$1.0 million for the same period in 2012. The increase in third party commissions is due to increased investment activity in the three months ended June 30, 2013 as compared to the same period in 2012.

Operating Expenses

Investments Segment Operating Expenses

Operating expenses for the three months ended June 30, 2013 increased to \$22.8 million compared to \$6.3 million for the same period in 2012. The increase is attributable to the following:

Rental operating expenses increased by \$3.7 million, primarily due to expenses in connection with three apartment buildings and one office building acquired during the fourth quarter of 2012, and two office buildings in the Western United States consolidated during the fourth quarter of 2012 as well as two multifamily properties in the Western United States acquired during the second quarter of 2013.

During the three months ended June 30, 2013, we had \$5.1 million of sale-related costs from the sale of 22 condominium units and one retail unit with no comparable activity during the same period in 2012.

During the three months ended June 30, 2013, depreciation and amortization expense increased by \$3.3 million compared to the same period in 2012 due to the acquisitions discussed above.

Compensation and related expenses increased by \$3.5 million primarily due to the increase in accrued discretionary compensation in connection with the increase in Adjusted EBITDA. General and administrative expenses increased by \$1.2 million compared to the prior period primarily due to the growth of our Company in the United Kingdom and Ireland to source and execute on acquisition opportunities. We have almost doubled our headcount in such locations as compared to June 30, 2012.

Services Segment Operating Expenses

Operating expenses (excluding depreciation and amortization expense) for the three months ended June 30, 2013 were \$9.9 million as compared to \$9.1 million for the same period in 2012. The increase is attributable to the following:

Compensation and related expenses increased by \$0.3 million primarily due to the increase in accrued discretionary compensation in connection with the increase in Adjusted EBITDA. General and administrative expenses increased by \$0.4 million primarily due to the growth of our company specifically in the United Kingdom, Ireland and Meyers.

Commission and marketing expenses were flat compared to the prior period.

Corporate Operating Expenses

Operating expenses (excluding depreciation and amortization expense) for the three months ended June 30, 2013 were approximately \$7.1 million as compared to \$2.9 million for the same period in 2012. Compensation and related expenses increased by \$4.2 million primarily due to the growth of the Company and an increase in accrued discretionary compensation in connection with the increase in Adjusted EBITDA.

Investments Segment Equity in Joint Venture Income

During the three months ended June 30, 2013, equity in joint venture income was \$11.9 million as compared to \$5.1 million for the same period in 2012. Income for the three months ended June 30, 2013 was primarily due to the foreclosure of a class A office building and an adjacent 3.5 acre site in Dublin, Ireland. As a result of the foreclosure, the joint venture was required to consolidate the assets and liabilities at fair value. As the fair value of the assets was in excess of the basis in the previously held mortgage notes, the joint venture recognized a \$30.1 million

acquisition-related gain. The Company's portion of the gain was \$15.0 million and was recognized in equity in joint venture income. Included in equity in joint venture income are one-time acquisition costs which are non-recurring. During the three months ended June 30, 2013, approximately \$2.8 million of acquisition costs were

Table of Contents

included in equity in joint venture income as compared to \$0.8 million for the same period in 2012. The increase is due to increased acquisition activity in 2013.

The income generated during the three months ended June 30, 2012 was primarily related to the sale of a 213-unit residential tower in San Jose, California and a 440-unit apartment building in Beaverton, Oregon, which generated a total gain of \$15.1 million of which \$5.3 million was a gain to us.

Our share of depreciation and amortization generated at the joint venture level was \$10.2 million and \$4.0 million for the three months ended June 30, 2013 and 2012, respectively. We look at equity in joint venture income plus our share of the joint ventures' depreciation and amortization to get a better sense of cash generated by our joint venture investments. The aggregate of these amounts were \$22.1 million and \$9.1 million for the three months ended June 30, 2013 and 2012, respectively.

Investments Segment Income from Loan Pool Participations and Notes Receivable

Income from loan pool participations and notes receivable was \$3.3 million for the three months ended June 30, 2013 as compared to \$2.9 million for the same period in 2012.

During the three months ended June 30, 2013, we accreted an additional \$0.3 million of interest income on our UK Loan Pool as compared to the same period in 2012 due to the expected resolution period being shortened to two years from the initial budget of three years. Since the latter half of 2012, we have acquired two additional loan pools in the United Kingdom and one in Ireland, which together provided \$0.4 million of interest income during the three months ended June 30, 2013. Offsetting these increases in the three months ended June 30, 2013 was a \$0.4 million decrease in accreted interest income on our loan pools in the Western United States due to pools being fully resolved or close to being resolved.

Non-operating Items

Interest expense was \$12.5 million for the three months ended June 30, 2013 compared to \$7.1 million for same period in 2012. The increase is primarily attributable to the additional \$100.0 million senior notes issued in December 2012 bearing interest at a rate of 8.75% per annum and the \$55.0 million senior notes issued in November 2012 bearing interest at 7.75% per annum. In addition, we incurred additional interest expense associated with the mortgage loans on the acquisitions of three apartment buildings and one office building in the Western United States during the fourth quarter of 2012 as well as the acquisitions of two multifamily properties in the Western United States during 2013.

Non-operating expense was \$0.5 million for the three months ended June 30, 2013 due to acquisition-related expenses from the purchase of an apartment building in Salt Lake City, UT, an office building in Beverly Hills, CA and a joint venture investment in a marina and multifamily property in Marina del Rey, CA. There was no comparable activity during the same period in 2012.

Benefit from income taxes was \$0.5 million during the three months ended June 30, 2013 as compared to \$1.1 million for the same period in 2012. During the three months ended June 30, 2013, we had domestic taxable losses of \$3.1 million for which we received a tax benefit at the federal tax rate of approximately 34% offset by foreign taxable income of \$1.2 million by our subsidiaries in the United Kingdom and Ireland which are subject to corporate tax rates of 23% and 12.5%, respectively, resulting in a net benefit from income taxes.

We had net loss of \$0.9 million attributable to noncontrolling interest during the three months ended June 30, 2013 compared to net income of \$0.1 million during the three months ended June 30, 2012. The net loss attributable to noncontrolling interest for the three months ended June 30, 2013 is mainly due to a consolidated fund that has investments in commercial properties. The loss is driven by interest expense and depreciation expense on the underlying properties.

Our Consolidated Financial Results: Six Months Ended June 30, 2013 Compared to the Six Months Ended June 30, 2012

Our revenues for the six months ended June 30, 2013 and 2012 were \$58.4 million and \$25.9 million, respectively. Total operating expenses for the same periods were \$67.7 million and \$33.9 million, respectively, and net loss attributable to our common shareholders was \$6.1 million and \$6.5 million, respectively. Adjusted EBITDA was \$69.0 million and \$38.0 million, respectively, for the six months ended June 30, 2013 and 2012. The Company

achieved a 81.6% increase in adjusted EBITDA for the six months ended June 30, 2013 as compared to the same period in 2012.

Revenues

Investments Segment Revenues

Rental income was \$16.8 million for the six months ended June 30, 2013 as compared to \$2.9 million for the same period in 2012. The \$13.9 million increase is primarily due to the revenue generated on three apartment buildings and one office building

Related Party Services - These are management and leasing fees as well as commissions earned from our equity partners and relate to assets in which we have an ownership interest.

Our related party management and leasing services generated revenues of \$17.3 million for the six months ended June 30, 2013 as compared to approximately \$11.7 million for the same period in 2012. The \$5.6 million or 47.8% increase primarily relates to an increase of \$2.8 million in asset management fees earned on our UK Loan Pool due to the resolution period being shortened from three years to two due to quicker resolutions than initially anticipated, \$1.8 million in asset management fees relating to a new loan pool in the United Kingdom that was entered into in December 2012, and \$1.0 million in additional fees earned mainly due to the admission of new investors into one of our funds.

Our related party commission fees were \$4.8 million for the six months ended June 30, 2013 as compared to approximately \$2.0 million for the same period in 2012. The increase in third party commissions is due to increased investment activity in the six months ended June 30, 2013 as compared to the same period in 2012.

Operating Expenses

Investments Segment Operating Expenses

Operating expenses for the six months ended June 30, 2013 increased to \$38.2 million compared to \$11.8 million for the same period in 2012. The increase is primarily attributable to the following:

Rental operating expenses increased by \$5.9 million primarily due to expenses in connection with three apartment buildings and one office building acquired during the fourth quarter of 2012, two office buildings in the Western United States consolidated during the fourth quarter of 2012 as well as two multifamily properties in the Western United States acquired during the second quarter of 2013.

During the six months ended June 30, 2013, we sold 37 condominium units and one retail unit, resulting in \$7.0 million of sale-related costs with no comparable activity during the same period in 2012.

During the six months ended June 30, 2013, depreciation and amortization expense increased by \$5.2 million compared to the same period in 2012 due to the acquisitions discussed above.

Compensation and related expenses increased by \$6.0 million primarily due to an increase in accrued discretionary compensation in connection with the increase in Adjusted EBITDA. General and administrative expenses increased by \$2.3 million primarily due to the growth of our Company in the United Kingdom and Ireland to source and execute on acquisition opportunities. We have almost doubled our headcount there since June 30, 2012.

Services Segment Operating Expenses

Operating expenses (excluding depreciation and amortization expense) for the six months ended June 30, 2013 were \$18.3 million as compared to \$16.7 million for the same period in 2012. The increase is attributable to the following: Compensation and related expenses increased by \$1.3 million primarily due to the increase in accrued discretionary compensation in connection with the increase in Adjusted EBITDA. General and administrative expenses increased by \$0.8 million

Table of Contents

primarily due to the growth of our company specifically in the United Kingdom, Ireland and Meyers. The increase described above was offset by a reduction in commission and marketing expenses of \$0.5 million due to a reduction in auction sales.

Corporate Operating Expenses

Operating expenses (excluding depreciation and amortization expense) for the six months ended June 30, 2013 were approximately \$10.7 million as compared to \$5.1 million for the same period in 2012. Compensation and related expenses increased by \$5.4 million primarily due to the increase in accrued discretionary compensation in connection with the increase in Adjusted EBITDA. General and administrative expenses increased by \$0.2 million primarily due to our growth.

Investments Segment Equity in Joint Venture Income

During the six months ended June 30, 2013, equity in joint venture income was \$11.6 million as compared to \$10.6 million for the same period in 2012. The income for the three months ended June 30, 2013 was primarily due to the foreclosure of a class A office building and an adjacent 3.5 acre site in Dublin, Ireland. As a result of the foreclosure, the joint venture was required to consolidate the assets and liabilities at fair value. As the fair value of the assets was in excess of the basis in the previously held mortgage notes, the joint venture recognized a \$30.1 million acquisition related gain. The Company's portion of the gain was \$15.0 million and was recognized in equity in joint venture income. Included in equity in joint venture income are one-time acquisition costs which are non-recurring. During the six months ended June 30, 2013, approximately \$2.8 million of acquisition costs were included in equity in joint venture income as compared to \$0.8 million for the same period in 2012. The increase is due to increased acquisition activity in 2013.

The income generated during the six months ended June 30, 2012 was primarily related to the sale of a 180-unit apartment building in North Hollywood, California, which generated a total gain of \$16.0 million, of which \$5.2 million was a gain to us and our noncontrolling interest holders. Additionally, we sold a 213-unit residential tower in San Jose, California and a 440-unit apartment building in Beaverton, Oregon, which generated a total gain of \$15.1 million of which \$5.3 million was a gain to us.

Our share of depreciation and amortization generated at the joint venture level was \$19.5 million and \$7.9 million for the six months ended June 30, 2013 and 2012, respectively. We look at equity in joint venture income plus our share of the joint ventures depreciation and amortization to get a better sense of cash generated by our joint venture investments. The aggregate of these amounts were \$31.1 million and \$18.5 million for the six months ended June 30, 2013 and 2012, respectively.

Investments Segment Income from Loan Pool Participations and Notes Receivable

Income from loan pool participations and notes receivable increased \$2.8 million to \$6.2 million for the six months ended June 30, 2013 as compared to \$3.4 million for the same period in 2012.

During the six months ended June 30, 2013, we accreted an additional \$0.5 million of interest income on our UK Loan Pool as compared to the same period in 2012 due to the expected resolution period being shortened to two years from the initial budget of three years. Since the latter half of 2012, we have acquired two additional loan pools in the United Kingdom and one in Ireland, which together provided \$0.6 million of interest income during the six months ended June 30, 2013. Additionally, we had a \$1.4 million increase in accreted income from loan pools in the Western United States due to an increase in resolution periods on one pool in 2012 which led to a decrease in accreted income in the six months ended June 30, 2012. Income from notes receivable increased \$0.3 million during June 30, 2013 due to a higher note receivable balance compared to the same period in 2012.

Non-operating Items

Acquisition-related gains were \$9.5 million for the six months ended June 30, 2013 with no comparable activity during the same period in 2012. On March 28, 2013, the Company acquired the interest of some of its existing partners in a 615-unit apartment building in Northern California, increasing its ownership from 15% to 94%. The original 15% interest had a book value of \$0 due to prior distributions. Cash consideration of \$15.7 million was paid by the Company to increase its ownership in the property to 94%. As a result of obtaining control, the Company was required to consolidate the assets and liabilities at fair value. Kennedy Wilson recorded an acquisition related gain in the amount of \$9.5 million as the fair value was in excess of the carrying value of its ownership interest. As the

transaction was between willing third party market participants, the purchase price was an approximation of fair value.

Non-operating expense was \$0.5 million for the three months ended June 30, 2013 due to the purchase of an apartment building in Salt Lake City, UT, an office building in Beverly Hills, CA and a joint venture investment in a marina and multifamily property in Marina del Rey, CA. There was no comparable activity during the prior period. Interest expense was \$24.0 million for the six months ended June 30, 2013 compared to \$13.2 million for same period in 2012. The increase is primarily attributable to the additional \$100 million senior notes issued in December 2012 bearing interest

Table of Contents

at a rate of 8.75% per annum and the \$55 million senior notes issued in November 2012 bearing interest at 7.75% per annum. In addition, we incurred additional interest expense associated with the mortgage loans on the acquisition of three apartment buildings and one office building in the western United States during the fourth quarter of 2012 as well as the acquisition of two multifamily properties in the western United States during 2013.

Benefit from income taxes was \$2.2 million during the six months ended June 30, 2013 as compared to \$2.6 million for the same period in 2012. During the six months ended June 30, 2013, we had domestic taxable losses of \$9.0 million for which we received a tax benefit at the federal tax rate of approximately 34% offset by foreign taxable income of \$2.6 million by our subsidiaries in the United Kingdom and Ireland, which are subject to corporate tax rates of 23% and 12.5%, respectively, resulting in a net benefit from income taxes.

We had net loss of \$1.9 million attributable to a noncontrolling interest in 2013 compared to net income of \$2.9 million in 2012. The net loss attributable to noncontrolling interest for the six months ended June 30, 2013 is mainly due to a consolidated fund that has investments in commercial properties. The loss was primarily driven by interest expense and depreciation expense on the underlying properties. During the six months ended June 30, 2012, the net income attributable to noncontrolling interest holders was primarily due to a gain from the sale of a multifamily property.

Liquidity and Capital Resources

Our liquidity and capital resources requirements include expenditures for joint venture investments, real estate, and real estate-related acquisitions and working capital needs. Historically, we have not required significant capital resources to support our services business. We finance these operations with internally generated funds, borrowings under our revolving line of credit, sales of real estate, resolutions in loan pools and sales of equity and debt securities.

Our investments in real estate and real estate related assets are typically financed by loans secured primarily by the applicable investment. These loans are generally nonrecourse in that, in the event of default, recourse will be limited to the investment serving as collateral. In some cases, we guarantee a portion of the loan related to a joint venture investment, usually until some condition, such as completion of construction or leasing or certain net operating income criteria, has been met. We do not expect these guarantees to materially affect liquidity or capital resources.

We believe that our existing cash and cash equivalents plus capital generated from our services business, operating distributions from our properties, sales and refinances of our properties, resolutions in our loan pools, as well as our current line of credit, will provide us with sufficient capital requirements for at least the next twelve months.

To the extent that we engage in additional strategic investments, including real estate, loan portfolios, or acquisitions of other real estate-related companies, we may need to obtain third-party financing, which could include bank financing or the public sale or private placement of debt or equity securities.

Under our current joint venture strategy, we generally contribute property expertise and a fully funded initial cash contribution, with commitments to provide additional funding. Capital required for additional improvements and supporting operations during leasing and stabilization periods is generally obtained at the time of acquisition via debt financing or third-party investors. Accordingly, we generally do not have significant capital commitments with unconsolidated entities. However, there may be certain circumstances when we, usually with the other members of the joint venture entity, may be required to contribute additional capital for a limited period of time. As of June 30, 2013 we had \$7.2 million in unfunded capital commitments to our joint venture investments.

Our need, if any, to raise additional funds to meet our capital requirements will depend on many factors, including the success and pace of the implementation of our strategy for growth. We regularly monitor capital-raising alternatives to be able to take advantage of other available avenues to support our working capital and investment needs, including strategic partnerships and other alliances, bank borrowings, and the sale of equity or debt securities. We expect to meet the repayment obligations of our senior notes and borrowing under our line of credit from cash generated by our business activities, including the sale of assets and the refinancing of debt.

Pipeline

As of June 30, 2013, we are under separate contracts to purchase 28 commercial real estate assets at an aggregate purchase price of approximately \$1.2 billion. With respect to eight of such assets with an aggregate purchase price of approximately \$0.4 billion, we have non-refundable deposits of approximately \$20 million held in escrow. These transactions remain subject to customary closing conditions. With respect to the remaining 20 assets with an aggregate purchase price of approximately \$0.8 billion, we have deposited a total of \$5 million in escrow, which is refundable to us in the event that we choose to terminate the agreements for any reason prior to the expiration of the due diligence period or upon the failure or non-satisfaction of customary

closing conditions. In the event that we consummate any of these acquisitions, we anticipate financing such transactions with a combination of property-level debt and third-party equity. Our equity investment in any of these acquisitions has not yet been determined.

European Liquidity and Capital Resources

During the six months ended June 30, 2013, the Company earned \$2.6 million related to operations in the United Kingdom and Ireland. Foreign taxes of \$0.3 million are included in the consolidated tax provision for income taxes related to the portion of income earned directly by our United Kingdom and Ireland subsidiaries for the six months ended June 30, 2013. U.S. domestic taxes have not been provided for in the consolidated tax provision with respect to amounts earned directly by these subsidiaries since the Company's current plan is to indefinitely invest amounts earned by these subsidiaries in the United Kingdom and Ireland operations. If these subsidiaries' cumulative earnings were repatriated to the United States, additional U.S. domestic taxes of \$6.7 million would be incurred. Additionally, approximately \$10.3 million of our consolidated cash and cash equivalents are held by our subsidiaries in the United Kingdom and Ireland.

Cash Flows

Operating

Our cash flows from operating activities are primarily dependent upon the operating distributions from our joint venture investments and loan pool participations, revenues from our services business, and operating expenses and other general and administrative costs. Net cash used in operating activities totaled \$23.9 million for the six months ended June 30, 2013. This was primarily related to payments of accrued expenses and other liabilities and accrued salaries and benefits offset by operating distributions from our joint venture investments and loan pool participations of \$17.9 million. Net cash provided by operating activities totaled \$18.9 million for the six months ended June 30, 2012. This was primarily related to operating distributions from our joint venture investments and loan pool participations of \$46.4 million offset by payments of accrued expenses and other liabilities and accrued salaries and benefits.

Investing

Our cash flows from investing activities are generally comprised of cash used to fund investments in our joint ventures, loan pool participations, property acquisitions, capital expenditures, and loans secured by real estate, as well as return of capital investments from dispositions or refinances on our hard assets and resolutions in our loan participations and loan pools. Net cash used in investing activities totaled \$195.2 million for the six months ended June 30, 2013. This was primarily due to \$173.1 million of equity invested in joint ventures of which \$58.0 million related to the acquisition of a multifamily property in Dublin, \$20.6 million was invested in the acquisition of a portfolio of 29 income-producing commercial properties located in the United Kingdom, \$22.7 million for three commercial properties in the Western U.S., \$18.5 million was contributed to a joint venture for the acquisition of four connections collateralized by five properties and \$9.1 million for two multifamily properties in the Western U.S. We invested \$108.3 million for the purchase and addition to real estate which included \$61.4 million for an apartment building in Salt Lake City, UT, \$29.7 million for an office building in Beverly Hills, CA and \$15.7 million for an apartment building in Northern California. In addition, we invested \$41.7 million to fund our equity in note receivables and investments in loan pool participations and we received \$49.6 million in distributions from our loan pools primarily due to loan resolutions including \$38.9 million from the UK Loan Pool. The cash used in the aforementioned investing activities was offset by receipt of \$25.7 million in distributions from our joint ventures primarily due to refinancing of property level debt of \$14.2 million and \$10.8 million from the settlement of several Japanese yen-related hedges.

Net cash used in investing activities totaled \$65.3 million for the six months ended June 30, 2012. This was primarily due to \$49.5 million of equity invested in joint ventures of which \$37.8 million was invested in the acquisition of five income producing multifamily properties located primarily in the Western U.S. and Ireland. In addition, we invested \$67.5 million to fund our equity in participations in new loan pools. The cash used in the aforementioned investing activities was offset by receipt of \$20.6 million in investing distribution from our joint ventures primarily due to the

sale of four multifamily properties located in the Western U.S. In addition, we sold a portion of our marketable securities which provided \$21.4 million.

Financing

Our net cash related to financing activities is generally impacted by our borrowings and capital-raising activities net of dividends and distributions paid to common and preferred shareholders and noncontrolling interests. Net cash provided by financing activities totaled \$240.6 million for the six months ended June 30, 2013. This was primarily due to net proceeds of \$153.9 million received from the issuance of 10.4 million shares of common stock primarily to institutional investors, \$68.3 million from borrowings under mortgage loans for the acquisition of an apartment building in Salt Lake City, UT and an office building

Table of Contents

in Beverly Hills, CA and net borrowings of \$30.0 million on the Company's line of credit. These were offset by payments of cash dividends of \$9.1 million to our common and preferred shareholders and \$1.4 million for the repurchase of warrants.

Net cash provided by financing activities totaled \$17.6 million for the six months ended June 30, 2012. This is primarily due to net borrowing under our line of credit of \$34.2 million offset by payments of cash dividends of \$8.7 million to our common and preferred shareholders, \$4.9 million distributed to noncontrolling interest holders as a result of the sale of a 180-unit apartment building and \$1.4 million for the repurchase of warrants.

Change in accounting methodology

During the quarter ended March 31, 2013, we changed our method of determining the allocation of cash flows received from unconsolidated real estate joint ventures. Previously, we utilized a "cumulative earnings" methodology which is one of two acceptable methods and which includes distributions received from unconsolidated real estate joint ventures as an operating activity up to the amount of the Company's cumulative equity in earnings of the equity method investment. Many of the Company's investments generate positive cash flow from their operations and their earnings are substantially (or often entirely) reduced by depreciation, which is a non-cash item. In those instances, which are common to our business, the cumulative earnings approach requires the distributions received from the operating cash flows of the unconsolidated real estate joint venture to be presented in the Company's statement of cash flows as an investing activity. A second acceptable method, the "look-through" method, evaluates the source of the underlying cash flows to determine whether the distribution received is a return on investment (operating cash flows) or a return of investment (investing cash flows). The look through method computes operating cash flows more consistently with how the Company determines and presents EBITDA, which is an important performance indicator of the Company and the real estate industry. The nature of the Company's business makes determining the source of such cash flows generally apparent because returns of investment are typically the result of a significant event or transaction. As such, the "look-through" method has been determined to be preferred for such unconsolidated real estate joint ventures and is reflected in our consolidated statement of cash flows.

Cumulative dividend distributions

The Company pays quarterly dividends on its common and preferred stock. The table below presents the cumulative dividends declared on common and preferred stock since being listed in November 2009:

Cumulative preferred shareholders	\$(28,618,000)
Cumulative common shareholders	(27,668,000)
Total cumulative dividends declared	\$(56,286,000)

Indebtedness and Related Covenants

The following describes our corporate indebtedness and related covenants.

Junior Subordinated Debentures

In 2007, Kennedy Wilson issued junior subordinated debentures in the amount of \$40.0 million. The debentures were issued to a trust established by Kennedy Wilson, which contemporaneously issued \$40.0 million of trust preferred securities to Merrill Lynch International. The 2042 Notes will mature on December 1, 2042. The amount of the 2042 Notes included in the accompanying consolidated balance sheets was \$55.0 million at June 30, 2013.

Debt Covenants

The junior subordinated debentures, the unsecured credit facility with U.S. Bank and East West Bank, and the indenture governing the 2019 Notes and 2042 Notes contain numerous restrictive covenants that, among other things, limit Kennedy Wilson's and certain of its subsidiaries' ability to incur additional indebtedness, pay dividends or make distributions to stockholders, repurchase capital stock or debt, make investments, sell assets or subsidiary stock, create or permit liens on assets, engage in transactions with affiliates, enter into sale/leaseback transactions, issue subsidiary equity and enter into consolidations or mergers. The unsecured credit facility and junior subordinated debentures also require Kennedy Wilson to maintain a minimum tangible net worth and a specified amount of cash and cash equivalents.

The junior subordinated debentures require Kennedy-Wilson, Inc. to maintain (i) a fixed charge coverage ratio (as defined in the indenture governing the junior subordinated debentures) of not less than 1.75 to 1.00, measured on a four-quarter rolling basis, and (ii) a ratio of total debt to net worth (as defined in the indenture governing the junior subordinated debentures) of not greater than 3.00 to 1.00 at anytime. As of the most recent quarter end, Kennedy Wilson's fixed charge coverage ratio was 3.39 to 1.00 and its ratio of total debt to net worth was 1.24 to 1.00. As of June 30, 2013, Kennedy Wilson was in compliance with these covenants.

The revolving loan agreement that governs the unsecured credit facility requires Kennedy Wilson to maintain (i) a minimum rent adjusted fixed charge coverage ratio (as defined in the revolving loan agreement) of not less than 1.50 to 1.00, measured on a four-quarter rolling average basis; (ii) maximum balance sheet leverage (as defined in the revolving loan agreement) of not greater than 1.50 to 1.00, measured at the end of each calendar quarter; (iii) a maximum balance sheet leverage (as defined in the revolving loan agreement) of not greater than 1.50 to 1.00; and (iv) unrestricted cash, cash equivalents and publicly traded marketable securities in the aggregate amount of at least \$40.0 million.

As of the most recent quarter end, Kennedy Wilson's adjusted fixed charge coverage ratio was 2.59 to 1.00 and its balance sheet leverage ratio was 0.79 to 1.00. As of June 30, 2013, Kennedy-Wilson, Inc. was in compliance with these covenants.

The indentures governing the 2019 Notes and 2042 Notes limit Kennedy-Wilson, Inc.'s ability to incur additional indebtedness if, on the date of such incurrence and after giving effect to the new indebtedness, Kennedy-Wilson, Inc.'s maximum balance sheet leverage ratio (as defined in the indenture) is greater than 1.50 to 1.00. This ratio is measured at the time of incurrence of additional indebtedness. As of June 30, 2013, the balance sheet leverage ratio was 0.73 to 1.00.

Off-Balance Sheet Arrangements

We have provided guarantees associated with loans secured by consolidated assets or assets held in various joint ventures. At June 30, 2013, the maximum potential amount of future payments (undiscounted) we could be required to make under the guarantees was approximately \$55.7 million which is approximately 2% of property level debt of the Company. The guarantees expire through 2015, and our performance under the guarantees would be required to the extent there is a shortfall upon liquidation between the principal amount of the loan and the net sale proceeds of the applicable properties. If we were to become obligated to perform on these guarantees, it could have an adverse effect on our financial condition.

As of June 30, 2013, we have unfulfilled capital commitments totaling \$7.2 million to our joint ventures. As we identify investment opportunities in the future, we may be called upon to contribute additional capital to joint ventures in satisfaction of our capital commitment obligations.

Please refer to our Annual Report on Form 10-K for the year ended December 31, 2012 for discussion of our non-recourse carve-out guarantees arrangements, as there have been no material changes to that disclosure.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The primary market risk exposure of our Company relates to changes in interest rates in connection with our short-term borrowings, some of which bear interest at variable rates based on the lender's base rate, prime rate, EURIBOR, GBP LIBOR, or LIBOR plus an applicable borrowing margin. These borrowings do not give rise to a significant interest rate risk because they have short maturities. However, the amount of income or loss we recognize for unconsolidated joint ventures may be impacted by changes in interest rates. Historically, the impact from the changes in rates has not been significant. Our exposure to market risk also consists of foreign currency exchange rate fluctuations related to our international operations.

Interest Rate Risk

We have established an interest rate management policy, which attempts to minimize our overall cost of debt while taking into consideration the earnings implications associated with the volatility of short-term interest rates. As part of this policy, we have elected to maintain a combination of variable and fixed rate debt. As of June 30, 2013, 70% of our property level debt is fixed rate, 18% is floating rate with interest caps and 12% is floating rate without interest caps.

The table below represents contractual balances of our financial instruments at the expected maturity dates as well as the fair value as of June 30, 2013. The expected maturity categories take into consideration actual amortization of principal and do not take into consideration reinvestment of cash. The weighted average interest rate for the various assets and liabilities presented are actual as of June 30, 2013. We closely monitor the fluctuation in interest rates, and if rates were to increase significantly, we believe that we would be able to either hedge the change in the interest rate or refinance the loans with fixed interest rate debt. All instruments included in this analysis are non-trading.
