Washington, D.C. 20549

FORM 10-Q

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934**

For the quarterly period ended December 31, 2018

or

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT
OF 1934**

For the transition period from ___ to ___

Commission File No: 0-11740

MESA LABORATORIES, INC.

(Exact name of registrant as specified in its charter)

Edgar Filing: MESA LABORATORIES INC /CO - Form 10-Q

Colorado **84-0872291**
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification number)

12100 West Sixth Avenue
Lakewood, Colorado **80228**
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: **(303) 987-8000**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934, during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding of each of the Issuer's classes of common stock, as of the latest practicable date:

There were 3,868,491 shares of the Issuer's common stock, no par value, outstanding as of January 25, 2019.

(unaudited)

(dollar amounts in thousands, unless otherwise specified)

Note 1. Description of Business and Summary of Significant Accounting Policies

Description of Business

In this quarterly report on Form 10-Q, Mesa Laboratories, Inc., a Colorado corporation, together with its subsidiaries is collectively referred to as “we,” “us,” “our,” the “Company” or “Mesa.”

We pursue a strategy of focusing primarily on quality control products and services which are sold into niche markets that are driven by regulatory requirements. We prefer markets in which we can establish a strong presence and achieve high gross margins. We are organized into four divisions across nine physical locations. Our Sterilization and Disinfection Control Division manufactures and sells biological, cleaning, and chemical indicators. Biological, cleaning, and chemical indicators are used to assess the effectiveness of sterilization and disinfection processes in the hospital, dental, medical device, and pharmaceutical industries. The division also provides testing and laboratory services, mainly to the dental industry. Our Instruments Division designs, manufactures, and markets quality control instruments and disposable products utilized in the healthcare, pharmaceutical, food and beverage, medical device, industrial hygiene, and environmental air sampling industries. Our Cold Chain Monitoring Division designs, develops, and markets systems which are used to monitor various environmental parameters such as temperature, humidity, and differential pressure to ensure that critical storage and processing conditions are maintained in hospitals, pharmaceutical and medical device manufacturers, blood banks, pharmacies, and laboratory environments. Our Cold Chain Packaging Division provides packaging development consulting services and thermal packaging products such as coolers, boxes, insulation materials, and phase-change products to control temperature during the customer’s transport of their own products.

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (“U.S. GAAP”) for interim financial information and pursuant to the rules and regulations of the Securities and Exchange Commission. In the opinion of management, such unaudited information includes all adjustments, consisting of normal recurring adjustments necessary for a fair presentation of our financial position and results of operations. The results of operations for the interim periods are not necessarily indicative of results that may be achieved for the entire year. The financial statements and related notes do not include all information and footnotes required by U.S. GAAP for annual reports. This quarterly report should be read in conjunction with the consolidated financial statements included in our annual report on Form 10-K for the year ended March 31, 2018.

Fair Value Measurements

As of December 31, 2018 and March 31, 2018, our financial instruments were categorized as Level 1 (inputs are quoted prices in active markets) and include cash, accounts receivable, accounts payable, accrued liabilities and short-term and long-term debt. With the exception of long-term debt, the carrying value of these financial instruments is considered to be representative of their fair value due to the short maturity of these instruments. Our debt has a variable interest rate, so the carrying amount approximates fair value because interest rates on these instruments approximate the interest rate on debt with similar terms available to us.

Acquisitions

During the three months ended December 31, 2018, we completed the purchase of Point Six Wireless, LLC. We made an initial allocation of the purchase price at the date of acquisition based on our understanding of the fair value of acquired assets and assumed liabilities. We obtained the information to make the allocation during due diligence and through the use of other information available to us. In the months after closing, we will obtain additional information about the assets and liabilities acquired, including asset appraisals, and we will refine the estimates of the fair value to more accurately allocate the purchase price.

Table of Contents

Recently Issued Accounting Pronouncements

In February 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2016-02, *Leases (Topic 842)*. The pronouncement requires lessees to recognize a liability for lease obligations, which represents the discounted obligation to make future minimum lease payments, and a corresponding right-of-use asset on the balance sheet for all leases with terms greater than 12 months. The guidance also requires qualitative and quantitative disclosures designed to present financial statement users with the ability to assess the amount, timing, and uncertainty of cash flows arising from leases. We have initiated our plan for the adoption and implementation of this new accounting standard, including assessing our lease arrangements, evaluating practical expedients, and making necessary changes to our accounting policies, processes, and internal controls over financial reporting. We expect to adopt the standard using the optional transition method, which will allow us to apply the standard as of the effective date, therefore we will not apply changes to comparative periods presented in our financial statements. We are still assessing the expected impact of the standard on our consolidated balance sheets, but it will not significantly impact our consolidated statements of operations and cash flows.

Recently Adopted Accounting Pronouncements

In August 2018, the Securities and Exchange Commission issued Release No. 33-10532 that amends and clarifies certain financial reporting requirements. The principal change to our financial reporting is the inclusion of the annual disclosure requirement of changes in stockholders’ equity in Rule 3-04 of Regulation S-X to interim periods. We adopted this new rule beginning the quarter ended December 31, 2018 and have included our Consolidated Statements of Stockholders’ Equity with this quarterly filing on Form 10-Q.

During the nine months ended December 31, 2018, we elected to early-adopt ASU 2018-15 *Intangibles – Goodwill and Other Internal-Use Software: Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract* (“ASU 2018-15”) on a prospective basis. ASU 2018-15 aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs of other internal-use software arrangements. Accordingly, we capitalized \$206 of costs incurred during the nine months ended December 31, 2018 to implement a hosted enterprise resource planning system to our European subsidiaries. The related asset is held in prepaid expenses and other on the condensed consolidated balance sheets, and we began amortizing the expense to general and administrative costs on our condensed consolidated statements of operations on a straight-line basis over the contractual term of the arrangement.

Effective April 1, 2018, we adopted ASU 2014-09 *Revenue from Contracts with Customers (Topic 606)* and all related amendments (referred to collectively hereinafter as “ASU 606”) to all contracts on a modified retrospective basis. ASU 606 requires an entity to recognize revenue for the transfer of goods or services equal to the amount it expects to be entitled to receive for the goods and services. The adoption did not have a material impact on our condensed

consolidated balance sheets, statements of operations, or cash flows. The primary impact of adoption was the enhancement of disclosures to provide additional clarity regarding how revenue is earned and recognized, and to show revenues at a more disaggregated level, included in Note 2. "Revenue Recognition."

In March 2018, the FASB issued ASU 2018-05, Amendments to SEC Paragraphs Pursuant to SEC Staff Accounting Bulletin No. 118. We adopted the ASU immediately upon release. The amendments in the update provide guidance on when to record and disclose provisional amounts for certain income tax effects of the Tax Cuts and Jobs Act ("TCJA"). The amendments also require any provisional amounts or subsequent adjustments to be included in net income from continuing operations. Additionally, this ASU discusses required disclosures that an entity must make with regard to the TCJA. As of the three months ended December 31, 2018, we have completed our analysis of the TCJA's income tax effects. the Refer to Note 8. "Income Taxes" for additional information on the TCJA.

The TCJA created a new requirement that global intangible low taxed income earned by controlled foreign corporations ("CFCs") must be included currently in the gross income of the CFC's U.S. shareholder. Under U.S. GAAP, we are allowed to make an accounting policy choice of how GILTI taxes are treated. We have elected to treat taxes due on future U.S. inclusions in taxable income related to GILTI as current period expenses when incurred ("the period cost method").

Note 2. Revenue Recognition

We design, manufacture, market, sell, and maintain quality control instruments and software, consumables, and services driven primarily by the regulatory requirements of niche markets. Our consumables, such as biological indicator test strips and packaging materials, are typically used on a standalone basis; however, some, such as calibration solutions, are also critical to the ongoing use of our instruments. Hardware and software sales, such as medical meters, wireless sensor systems, and data loggers are generally driven by our acquisition of new customers, growth of existing customers, or customer replacement of existing equipment. Hardware sales may be offered with perpetual or annual software licenses, which in some cases are required for the hardware to function. We generally generate service revenues from three categories: 1) discrete installation of our hardware and software, 2) discrete but recurring calibration and maintenance of our hardware or 3) contracted and recurring testing and maintenance services and software license subscriptions. We evaluate our revenues internally both by product line as well as by timing of revenue generation and nature of goods and services provided. Typically, discrete revenue is recognized at the shipping point or upon completion of the service, while contracted revenue is recognized over a period of time reflective of the performance obligation period in the applicable contract.

Table of Contents

Substantially all of our revenues and related receivables are generated from contracts with customers that are 12 months or less in duration. For both discrete and contracted revenue, evidence of an arrangement is typically in the form of a formal contract and/or purchase order. Prices are fixed at the time of the order and no price protections or variables are offered. Collectability is reasonably assured through our customer credit and review process, and payment is typically due within 60 days or less. Revenue is recognized when performance obligations under the terms of the contracts with our customers are satisfied. We elected to adopt the practical expedient that allows us to expense commission costs as incurred.

Our performance obligations related to the sale of instruments and consumables generally consist of the promise to sell tangible goods to distributors or end users. Ownership of these goods is typically transferred at time of shipment, at which point we have satisfied our performance obligation and we recognize revenue.

Our performance obligations related to services may include testing, installation, and/or maintenance of our products, either on-site at our customers' facilities or in our own calibration laboratories. Performance obligations arise from service contracts when discrete services are contracted in advance and performed at a future time, often at the time of the customer's choosing. In this case, the performance obligation is satisfied, and revenue is recognized, upon the customer's acceptance of the completion of the specified work. Alternatively, service revenue may be recognized for contracted services or maintenance provided continually over a period of time, and our performance obligations are satisfied by completing any service that is contractually required, if applicable, or simply by the passage of time if no services are required or requested. For contracted services, revenue is recognized on a straight-line basis over the life of the service contract, which is a faithful depiction of these annual service contracts, which may or may not be invoked.

The following tables present disaggregated revenues for the three and nine months ended December 31, 2018 and December 31, 2017, respectively:

Contract Balances

Our contracts have varying payment terms and conditions. Some customers prepay for services, resulting in unearned revenues or customer deposits, called contract liabilities, which are included within other accrued expenses and unearned revenues in the accompanying condensed consolidated balance sheets. Contract assets would exist when sales are recorded (i.e. the control of the goods or services has been transferred to the customer), but customer payment is contingent on a future event besides the passage of time (such as satisfaction of additional performance obligations). We do not have any contract assets. Unbilled receivables, which are not classified as contract assets, represent arrangements in which sales have been recorded prior to billing and right to payment is unconditional.

A summary of contract liabilities is as follows:

Contract liabilities balance as of March 31, 2018	\$4,147
Prior year liabilities recognized in revenues during the nine months ended December 31, 2018	(3,504)
Contract liabilities added during the nine months ended December 31, 2018, net of revenues recognized	3,631
Contract liabilities balance as of December 31, 2018	\$4,274

Note 3. Impairment Loss on Goodwill and Long-Lived Assets

During the nine months ended December 31, 2018, we performed an impairment analysis on our Cold Chain Packaging reporting segment as the segment's financial results continued to fall short of expectations. Specifically, rising commodity costs used in the segment's principal product have increased over the past nine months, eroding the gross profit margin of the segment. We determined that the long-lived assets and goodwill associated with our Cold Chain Packaging reporting segment were impaired and we recognized non-cash impairment charge of \$1,028 on goodwill and \$2,641 on long-lived assets, in impairment loss on goodwill and long-lived assets on the accompanying condensed consolidated statements of operations. The remaining goodwill and intangible assets associated with this segment are \$300 and \$809, respectively as of December 31, 2018. The fair value of the impaired assets was determined using Level 3 inputs (unobservable inputs) based on a discounted cash flow method.

Table of Contents**Note 4. Inventories**

Inventories consist of the following:

	December 31,	March 31,
	2018	2018
Raw materials	\$ 7,485	\$9,059
Work-in-process	379	380
Finished goods	3,154	3,152
Less: reserve	(3,412)	(3,363)
Inventories, net	\$ 7,606	\$9,228

Note 5. Facility Relocation

In August 2016, we announced that we planned to shut down both our Omaha and Traverse City manufacturing facilities and relocate those operations to the new Bozeman building. The move of those two facilities, along with the current Bozeman operations, began in March 2017 and was completed as of June 30, 2018. The total cost of the relocation was \$1,584 (which is comprised primarily of facility moving expenses, retention bonuses for existing personnel and payroll costs for duplicative personnel during the transition period) and these costs pertain to the Sterilization and Disinfection Control Division.

Facility relocation amounts accrued and paid for the nine months ended December 30, 2018 are as follows:

Balance at March 31, 2018	408
Facility Relocation Expense	17
Cash payments	(425)
Balance at December 31, 2018	-

We completed the sale of our old Bozeman facility during the nine months ended December 31, 2018, for \$2,222 (net of commissions) resulting in a gain of \$288, which is recorded in other (income) expense, net on our condensed consolidated statements of operations.

Note 6. Long-Term Debt

Long-term debt consists of the following:

	December 31,	March 31,
	2018	2018
Line of credit (3.813%, as of December 31, 2018)	\$ 12,000	\$28,000
Term loan (3.875% as of December 31, 2018)	17,500	18,625
Less: discount	(287)	(365)
Less: current portion	(2,000)	(1,625)
Long-term portion	\$ 27,213	\$44,635

On March 1, 2017, we entered into a five-year agreement (the “Credit Facility”) for an \$80,000 revolving line of credit (“Line of Credit”), a \$20,000 term loan (“Term Loan”) and up to \$2,500 of letters of credit with a banking syndicate of four banks. In addition, the Credit Facility provides a post-closing accordion feature which allows for the Company to request to increase the Line of Credit or Term Loan up to an additional \$100,000.

Line of Credit and Term Loan indebtedness bears interest at either: (1) LIBOR, as defined in the agreement, plus an applicable margin ranging from 1.50% to 2.50%; or (2) the alternate base rate (“ABR”), which is the greater of JPMorgan’s prime rate or the federal funds effective rate or the overnight bank funding rate plus 0.5%. We elect the interest rate with each borrowing under the line of credit. In addition, there is an unused line fee of 0.15% to 0.35%. Letter of credit fees are based on the applicable LIBOR rate.

Table of Contents

The Credit Facility is secured by all of our assets and requires us to maintain a ratio of funded debt to our trailing four quarters of EBITDA (the “Leverage Ratio”), as defined in the agreement, of less than 3.0 to 1.0, provided that, we may once during the term of the Credit Facility, in connection with a Permitted Acquisition for which the aggregate consideration paid or to be paid in respect thereof equals or exceeds \$20,000, elect to increase the maximum Leverage Ratio permitted hereunder to (i) 3.50 to 1.00 for a period of four consecutive fiscal quarters commencing with the fiscal quarter in which such Permitted Acquisition occurs (the “Initial Holiday Period”) and (ii) 3.25 to 1.00 for the period of four consecutive fiscal quarters immediately following the Initial Holiday Period. The Credit Facility also requires us to maintain a minimum fixed charge coverage ratio of less than 1.25 to 1.0. We were in compliance with all debt covenants as of December 31, 2018.

As of December 31, 2018, future contractual maturities of debt are as follows:

For the year ending March 31,

2019	\$ 500
2020	2,125
2021	2,625
2022	24,250
Total	\$29,500

Subsequent to December 2018, we made a \$3,000 payment under our line of credit.

Note 7. Stock-Based Compensation

During the nine months ended December 31, 2018, we granted restricted stock units (“RSUs”) on 17,458 shares of our common stock to eligible employees. The weighted average grant date fair value of the RSUs was \$154.91 per share. The RSUs generally vest in equal installments on the anniversary of the grant date over a period of five years. During the nine months ended December 31, 2018, 2,000 RSUs vested, and 1,445 RSUs were forfeited or cancelled.

During the nine months ended December 31, 2018, we awarded 11,385 performance share units (“PSUs”) that are subject to both service and performance conditions to eligible employees. The PSUs had a grant date fair value of \$192.99 per share and vest both based on our achievement of specific performance criteria for the three-year period from April 1, 2018 through March 31, 2021, as well as continued service through June 15, 2021. The quantity of shares that will be issued upon vesting will range from 0 percent to 400 percent of the targeted number of shares; if the defined minimum targets are not met, then no shares will vest. During the nine months ended December 31, 2018, 1,050 PSUs were forfeited.

During the nine months ended December 31, 2018, we granted non-qualified stock options (“NQSOs”) on 25,544 shares of common stock to eligible employees. The weighted-average grant date fair value of the NQSOs was \$53.93 per share with a weighted average exercise price of \$144.65 per share based on the closing price of the common stock on the date of grant. The NQSOs generally vest in equal installments on the anniversary of the grant date over a period of five years.

Amounts recognized in the condensed consolidated financial statements related to stock-based compensation are as follows:

	Three Months Ended December 31, 2018		Nine Months Ended December 31, 2017	
	2018	2017	2018	2017
Stock-based compensation expense	\$695	\$438	\$2,424	\$1,423
Amount of income tax (benefit) expense recognized in earnings	(160)	99	(1,018)	(893)
Stock-based compensation, net of tax	\$535	\$537	\$1,406	\$530
Benefit to earnings per share				
Basic	\$0.14	\$0.14	\$0.37	\$0.14
Diluted	0.13	0.14	0.35	0.14

Stock-based compensation expense is included in cost of revenues, selling, general and administrative, and research and development expense in the accompanying condensed consolidated statements of operations.

Table of Contents

The following is a summary of stock option and non-vested stock award activity for the nine months ended December 31, 2018 (shares in thousands):

	Stock Options		Non-Vested Stock Awards	
	Weighted-		Weighted-	
	Number	Average	Number	Average
	of	Exercise	of	Grant
	Shares	Price per	Shares	Date Fair
		Share		Value
Outstanding at March 31, 2018	458	\$ 86.38	9	\$ 125.68
Awards granted	26	144.65	29	169.94
Awards forfeited or expired	(36)	98.91	(3)	171.51
Awards exercised or vested	(58)	69.75	(2)	163.47
Outstanding as of December 31, 2018	390	\$ 91.58	33	\$ 128.04
Exercisable at December 31, 2018	151			

We issue shares in connection with stock-based compensation pursuant to the Mesa Laboratories, Inc. 2014 Equity Plan (the "2014 Equity Plan"). For the purposes of counting the shares remaining as available under the 2014 Incentive Plan, each share issuable pursuant to outstanding full value awards, such as RSUs and PSUs, counts as five shares issued, whereas each share underlying a stock option counts as one share issued. Under the 2014 Equity Plan, 1,100,000 shares of common stock have been authorized and reserved for eligible participants, of which 611,504 shares were available for future grants as of December 31, 2018.

Note 8. Income Taxes

For interim income tax reporting, we estimate our annual effective tax rate and apply this effective tax rate to our year-to-date pre-tax income. Each quarter, our estimate of the annual effective tax rate is updated, and if the estimated effective tax rate changes, a cumulative adjustment is made. Additionally, the tax effects of significant unusual or infrequently occurring items are recognized as discrete items in the interim period in which the events occur. The impact of changes in tax laws or rates on deferred tax amounts, impairments of non-deductible goodwill, excess benefits from stock-based compensation, and changes in tax reserves resulting from the finalization of tax audits or reviews are examples of significant unusual or infrequently occurring items that are recognized as discrete items in the interim period in which the event occurs. There is a potential for volatility of the effective tax rate due to several factors, including changes in the mix of the pre-tax income and the jurisdictions to which it relates, changes in tax

laws and foreign tax holidays, settlement with taxing authorities, and foreign currency fluctuations.

On December 22, 2017, the Tax Cuts and Jobs Act ("TCJA") was enacted in the U.S., making significant changes to U.S. tax law. The TCJA reduces the U.S. federal corporate income tax rate from 34 percent to 21 percent, requires companies to pay a one-time transition tax on certain un-remitted earnings of foreign subsidiaries that were previously tax deferred, generally eliminates U.S. federal income tax on dividends from foreign subsidiaries, creates new taxes on certain foreign-sourced earnings, repeals the Section 199 deduction, and imposes limitations on executive compensation under Section 162(m).

We have completed our analysis of the TCJA's income tax effects. In total, the TCJA resulted in a net tax expense of \$43. The final effect of the TCJA's one-time transition tax was a tax liability of \$322. During the nine months ended December 31, 2018, we re-measured the applicable deferred tax assets and liabilities based on the rates at which they are expected to reverse. The amount recorded related to the re-measurement of our deferred tax balance was a benefit of \$279.

Our effective income tax rate was 9.5 percent and (5.3) percent for the three months ended December 31, 2018 and December 31, 2017, respectively; and 8.6 percent and (18.0) percent for the nine months ended December 31, 2018 and December 31, 2017, respectively. The effective tax rate for the three and nine months ended December 31, 2018 differed from the statutory federal rate of 21 percent primarily due to the impact of the state income taxes, share-based payment awards for employees, and the foreign rate differential.

Since we are subject to audit by various taxing authorities, it is reasonably possible that the amount of unrecognized tax benefits will change during the next 12 months. However, we do not expect the change, if any, to have a material effect on our financial condition or results of operations within the next 12 months.

Table of Contents**Note 9. Earnings Per Share**

Basic earnings per share is computed by dividing net income by the weighted-average number of common shares outstanding during the reporting period. Diluted earnings per share (“diluted EPS”) is computed similarly to basic earnings per share, except that it includes the potential dilution that could occur if dilutive securities were exercised. Potentially dilutive securities include common shares related to stock options and non-vested stock awards (collectively “stock awards”). Stock awards are excluded from the calculation of diluted EPS in the event that they are subject to performance conditions or are antidilutive.

The following table presents a reconciliation of the denominators used in the computation of basic and diluted earnings per share (shares in thousands):

	Three Months Ended December 31,		Nine Months Ended December 31,	
	2018	2017	2018	2017
Net income (loss) available for shareholders	\$858	\$(11,086)	\$6,082	\$(7,216)
Weighted average outstanding shares of common stock	3,855	3,781	3,840	3,765
Dilutive effect of stock options	180	--	182	--
Dilutive effect of non-vested shares	10	--	15	--
Fully diluted shares	4,045	3,781	4,037	3,765
Basic	\$0.22	\$(2.93)	\$1.58	\$(1.92)
Diluted	\$0.21	\$(2.93)	\$1.51	\$(1.92)

The following stock awards were excluded from the calculation of diluted EPS:

	Three Months Ended December 31,		Nine Months Ended December 31,	
	2018	2017	2018	2017
Stock awards that were anti-dilutive	1	501	23	501
Stock awards subject to performance conditions	10	-	9	-
Total stock awards excluded from diluted EPS	11	501	32	501

Note 10. Commitments and Contingencies

In February 2018, Dr. James L. Orrington II filed a purported civil class action in the United States District Court for the Northern District of Illinois, Eastern Division, alleging that we sent unsolicited advertisements to telephone facsimile machines. The complaint includes counts alleging violations of the Telephone Consumer Protection Act (“TCPA”), the Illinois Consumer Fraud Act, Conversion, Nuisance, and Trespass to Chattels. The plaintiff seeks monetary damages, injunctive relief, and attorneys’ fees. Additionally, in June 2018, Rowan Family Dentistry, Inc. filed a purported class action complaint in the United States District Court for the District of Colorado making substantially the same claims as Dr. James L. Orrington II and seeking substantially the same relief. During the nine months ended December 31, 2018, we recorded an expense of \$3,300 as an estimate of our potential loss associated with the matter. The expense is recorded as estimated legal settlement on our condensed consolidated statements of operations and a corresponding liability is included as estimated legal liability on our condensed consolidated balance sheets. In January 2019, we received preliminary court approval of a class action settlement with Dr. James L. Orrington II in the amount of \$3,300. We will continue to vigorously defend the aforementioned cases and while we believe that the liability recorded as of December 31, 2018 approximates the amount that we will ultimately pay, it is possible that we will be subject to liabilities greater or less than the current amount accrued.

Table of Contents**Note 11. Segment Information**

We have four reporting segments: Sterilization and Disinfection Control, Instruments, Cold Chain Monitoring, and Cold Chain Packaging. The following tables set forth our segment information:

Three Months Ended December 31, 2018
Sterilization

	and Disinfection Control	Instruments	Cold Chain Monitoring	Cold Chain Packaging	Total
Revenues ⁽¹⁾	\$11,545	\$ 9,341	\$ 3,744	\$ 2,052	\$26,682
Gross profit	\$7,876	\$ 5,922	\$ 1,575	\$ 261	\$15,634
Reconciling items ⁽²⁾					(14,686)
Earnings before income taxes					\$948

Three Months Ended December 31, 2017
Sterilization

	and Disinfection Control	Instruments	Cold Chain Monitoring	Cold Chain Packaging	Total
Revenues ⁽¹⁾	\$10,630	\$ 8,182	\$ 3,267	\$ 1,592	\$23,671
Gross profit	\$7,134	\$ 5,150	\$ (43) \$ 440	\$12,681

Table of Contents**Nine Months Ended December 31, 2017
Sterilization**

	and Instruments Disinfection Control	Cold Chain Monitoring	Cold Chain Packaging	Total
Revenues ⁽¹⁾	\$30,798 \$ 24,768	\$ 9,335	\$ 4,397	\$69,298
Gross profit	\$20,676 \$ 15,021	\$ 2,044	\$ 844	\$38,585
Reconciling items ⁽²⁾				(44,702)
Earnings before income taxes				\$(6,117)

⁽¹⁾Intersegment revenues are not significant and are eliminated to arrive at consolidated totals.

⁽²⁾Reconciling items include selling, general and administrative, research and development, impairment loss on goodwill and long-lived assets, estimated legal settlement, and other expenses

	December 31, 2018	March 31, 2018
Total assets		
Sterilization and Disinfection Control	\$ 76,983	\$83,452
Instruments	29,332	33,479
Cold Chain Monitoring	34,749	30,796
Cold Chain Packaging	2,722	7,091
Corporate and administrative	14,374	9,283
Total	\$ 158,160	\$164,101

As of December 31, 2018, all long-lived assets are located in the United States except for \$5,952, \$2,471 and \$15,130 which are associated with our French, Canadian, and German subsidiaries, respectively.

Revenues from external customers are attributed to individual countries based upon locations to which the product is shipped or exported, as follows:

	Three Months Ended December 31, 2018		Nine Months Ended December 31, 2017	
	2018	2017	2018	2017
United States	\$17,003	\$14,221	\$49,167	\$41,664
Foreign	9,679	9,450	27,522	27,634
Total	\$26,682	\$23,671	\$76,689	\$69,298

No foreign country exceeds 10 percent of total revenues.

Note 12. Subsequent Event

In January 2018, we announced that our Board of Directors declared a quarterly cash dividend of \$0.16 per share of common stock, payable on March 15, 2019, to shareholders of record at the close of business on February 28, 2019.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

This report contains information that may constitute "forward-looking statements." Generally, the words "will," "estimate," "believe," "expect," "anticipate," "intend," "project," and similar expressions identify forward-looking statements, which generally are not historical in nature. However, the absence of these words or similar expressions does not mean that a statement is not forward-looking. All statements that address operating performance, events, or developments that we expect or anticipate will occur in the future — including statements relating to revenues growth and statements expressing general views about future operating results — are forward-looking statements. Management believes that these forward-looking statements are reasonable as and when made. However, caution should be taken not to place undue reliance on any such forward-looking statements because such statements speak only as of the date when made. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise, except as required by law. In addition, forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from our historical experience and our present expectations or projections. These risks and uncertainties include, but are not limited to those described in Part II, "Item 1A. Risk Factors" and elsewhere in this report and in our Annual Report on Form 10-K for the year ended March 31, 2018, and those described from time to time in our subsequent reports filed with the Securities and Exchange Commission.

General Discussion

We pursue a strategy of focusing primarily on quality control products and services, which are sold into niche markets that are driven by regulatory requirements. We prefer markets in which we can establish a strong presence and achieve high gross margins. We are organized into four divisions across nine physical locations. Our Sterilization and Disinfection Control Division ("SDC" Division) manufactures and sells biological, cleaning, and chemical indicators. Biological, cleaning, and chemical indicators are used to assess the effectiveness of sterilization and disinfection processes in the hospital, dental, medical device, and pharmaceutical industries. The division also provides testing and laboratory services, mainly to the dental industry. Our Instruments Division designs, manufactures, and markets quality control instruments and disposable products utilized in the healthcare, pharmaceutical, food and beverage, medical device, industrial hygiene, and environmental air sampling industries. Our Cold Chain Monitoring Division designs, develops, and markets systems which are used to monitor various environmental parameters such as temperature, humidity, and differential pressure to ensure that critical storage and processing conditions are maintained in hospitals, pharmaceutical and medical device manufacturers, blood banks, pharmacies, and laboratory environments. Our Cold Chain Packaging Division provides packaging development consulting services and thermal packaging products such as coolers, boxes, insulation materials, and phase-change products to control temperature during the customer's transport of their own products.

Our revenues come from three main sources – hardware and software, consumables, and services. Product sales (hardware, software, and consumables) are dependent on several factors, including general economic conditions, both domestic and international, customer capital spending trends, competition, introduction of new products and acquisitions. Sterilization and disinfection control products and most products in our Cold Chain Packaging Division are disposable and are used on a routine basis, thus product sales are less sensitive to general economic conditions. Instrument products and cold chain monitoring products and systems have a longer life, and their purchase by our customers is somewhat discretionary, so sales are more sensitive to general economic conditions. Cold chain monitoring and instruments products may be sold in conjunction with a perpetual or subscription-based software license, which may be required for the related hardware to function. Service demand is driven by our customers' quality control and regulatory environments, which require periodic repair and recalibration or certification of our instrument products and cold chain monitoring systems. We typically evaluate costs and pricing annually. Our policy is to price our products competitively and, where possible, we pass along cost increases in order to maintain our margins.

Gross profit is affected by our product mix, manufacturing efficiencies, and price competition. Historically, as we have integrated our acquisitions and taken advantage of manufacturing efficiencies, our gross margin percentages for some products have improved. There are, however, differences in gross margin percentages between product lines, and ultimately the mix of sales will continue to impact our overall gross margin.

During the nine months ended December 31, 2018, we completed a business combination (the “Point Six Wireless Acquisition”) whereby we acquired substantially all of the assets (other than current assets) and certain liabilities of Point Six Wireless, LLC’s continuous monitoring business.

Table of Contents**General Trends**

Our strategic objectives include growth both organically and through further acquisitions. During the nine months ended December 31, 2018, we continued to build our infrastructure to prepare for future growth, including completing the relocation and sale of the old Bozeman manufacturing facility, moving those operations into the new Bozeman building, the addition of key personnel to our operations, sales and marketing, and research and development teams, and the continued rollout of phase three of our ERP implementation project (European operations), which was completed as of December 31, 2018.

The markets for sterilization and disinfection control products remain strong, as the disposable nature of these products makes them less sensitive to general economic conditions. The worldwide market for sterilization and disinfection control products is growing as more countries focus on verifying the effectiveness of sterilization and disinfection processes.

Demand for our instruments products and cold chain services and monitoring systems remains solid and we strive to continue to grow revenues going forward. In general, our instruments products and cold chain monitoring systems are more impacted by general economic conditions than our sterilization and disinfection control and cold chain packaging products. As a result, uncertainty about global economic conditions may cause businesses to postpone spending in response to tighter credit, unemployment, negative financial news and/or declines in income or asset values. Worldwide and regional economic conditions could also reduce the demand for our products and services, as our customers reduce or delay capital equipment and other types of purchases.

We are working on several research and development projects that, if completed, may result in enhanced or new products for both existing customers and new markets. We are hopeful that we will have enhanced or new products and services available for sale in the coming year.

Overall revenues increased 13 percent and 11 percent for the three and nine months ended December 31, 2018. Organic revenues growth by reporting segment was as follows:

	Three Months Ended December 31, 2018	%	Nine Months Ended December 31, 2018	%
Sterilization and Disinfection Control	6	%	1	%
Instruments	14	%	8	%

Cold Chain Monitoring	14	%	6	%
Cold Chain Packaging	29	%	26	%
Total Company	11	%	6	%

During the three months ended December 31, 2018, we performed a financial analysis of the Cold Chain Packaging Division, which revealed that gross profits for the segment continue to decline, primarily due to rising commodity costs. As a result, we performed an impairment test on the reporting segment, and recognized non-cash impairment charges of \$1,028 on goodwill and \$2,641 on long-lived assets, in impairment loss on goodwill and long-lived assets on the accompanying condensed consolidated statements of operations.

Table of Contents**Results of Operations**

(Dollars in thousands)

The following table sets forth, for the periods indicated, condensed consolidated statements of operations data. The table and the discussion below should be read in conjunction with the accompanying condensed consolidated financial statements and the notes thereto appearing elsewhere in this report:

	Three Months Ended			Percent	
	December 31,			Change	
	2018	2017	Change	Change	
Revenues	\$26,682	\$23,671	\$3,011	13	%
Cost of revenues	11,048	10,990	58	1	%
Gross profit	\$15,634	\$12,681	\$2,953	23	%
Gross profit margin	59	% 54	% 5		%
Operating expenses:					
Selling	\$2,054	\$1,942	\$112	6	%

Table of Contents**Revenues**

The following tables summarize our revenues by source:

	Three Months Ended December 31,			Percent	
	2018	2017	Change	Change	
Sterilization and Disinfection Control	\$11,545	\$10,630	\$915	9	%
Instruments	9,341	8,182	1,159	14	%
Cold Chain Monitoring	3,744	3,267	477	15	%
Cold Chain Packaging	2,052	1,592	460	29	%
Total	\$26,682	\$23,671	\$3,011	13	%

	Nine Months Ended December 31,			Percent	
	2018	2017	Change	Change	
Sterilization and Disinfection Control	\$34,475	\$30,798	\$3,677	12	%
Instruments	26,776	24,768	2,008	8	%
Cold Chain Monitoring	9,917	9,335	582	6	%
Cold Chain Packaging	5,521	4,397	1,124	26	%
Total	\$76,689	\$69,298	\$7,391	11	%

Three and nine months ended December 31, 2018 versus December 31, 2017

Sterilization and Disinfection Control revenues for the three months ended December 31, 2018 increased nine percent, primarily as a result of six percent organic revenues growth, and to a lesser extent, the acquisition of BAG Health Care GmbH Hygiene Monitoring (“BAG”) during fiscal year 2018. Sterilization and Disinfection Control revenues increased 12 percent for the nine months ended December 31, 2018, primarily as a result of the acquisitions of BAG, SIMICON GmbH, and Hucker & Hucker GmbH during fiscal year 2018.

Instruments revenues for the three and nine months ended December 31, 2018 increased 14 percent and eight percent, respectively, primarily due to the timing of orders and modest price increases. Instrument revenues for the three months ended December 31, 2017 were impacted by a slower than expected adoption of an updated medical product and the discontinuation of its predecessor product. However, the adoption rate of the product has increased over the

past calendar year.

Cold Chain Monitoring revenues increased 15 percent and six percent for the three and nine months ended December 31, 2018, respectively, primarily as a result of organic revenues growth. Revenues in this division fluctuate quarter over quarter due to the timing of performance obligations and the nature and timing of orders and installations within any given quarter.

Cold Chain Packaging revenues increased 29 percent and 26 percent for the three and nine months ended December 31, 2018, respectively, as a result of the normalization in the order rate of the division's largest customer.

Page 20

Table of Contents**Gross Profit**

The following summarizes our gross profit by segment:

	Three Months Ended December 31,						Percent	
	2018		2017		Change		Change	
Sterilization and Disinfection Control	\$7,876		\$7,134		\$ 742		10	%
Gross profit margin	68	%	67	%	1	%		
Instruments	5,922		5,150		772		15	%
Gross profit margin	63	%	63	%	--	%		
Cold Chain Monitoring	1,575		(43)		1,618		3,763	%
Gross profit margin	42	%	(1 %)		43	%		
Cold Chain Packaging	261		440		(179)		(41	%)
Gross profit margin	13	%	28	%	(15 %)			
Total gross profit	\$15,634		\$12,681		\$ 2,953		23	%
Gross profit margin	59	%	54	%	5	%		

	Nine Months Ended December 31,						Percent	
	2018		2017		Change		Change	
Sterilization and Disinfection Control	\$23,660		\$20,676		\$ 2,984		14	%
Gross profit margin	69	%	67	%	2	%		
Instruments	16,909		15,021		1,888		13	%
Gross profit margin	63	%	61	%	2	%		
Cold Chain Monitoring	4,203		2,044		2,159		106	%
Gross profit margin	42	%	22	%	20	%		
Cold Chain Packaging	530		844		(314)		(37	%)
Gross profit margin	10	%	19	%	(9 %)			
Total gross profit	\$45,302		\$38,585		\$ 6,717		17	%
Gross profit margin	59	%	56	%	3	%		

Three and nine months ended December 31, 2018 versus December 31, 2017

Sterilization and Disinfection Control gross profit margin percentage increased for both the three and nine months ended December 31, 2018 primarily as a result of \$150 and \$503 of moving expenses related to the Bozeman facility that were incurred during the three and nine months ended December 31, 2017, respectively. Excluding the impact of the moving expenses, gross margin percentage for both periods was essentially flat as compared to the prior year.

Instruments gross margin percentage was flat during the three months ended December 31, 2018, primarily due to product and service mix, offset by volume-based efficiencies associated with an increase in revenues. Instruments gross margin percentage increased during the nine months ended December 31, 2018 due primarily to favorable product and service mix, as well as a \$163 increase in inventory reserve recorded in the nine months ended December 31, 2017 as a result of the decision to discontinue the sale of certain instruments products.

Table of Contents

Cold Chain Monitoring gross profit margin percentage increased during the three months ended December 31, 2018 primarily due to \$1,700 of inventory reserve expense recorded in the three months ended December 31, 2017; excluding the impact of the reserve in the comparable period, gross margin percentage decreased as a result of timing of orders and unfavorable product mix variations. Cold Chain Monitoring gross profit margin percentage increased during the nine months ended December 31, 2018, primarily due to \$1,916 of inventory reserve expense recorded in the nine months ended December 31, 2017. Excluding the impact of the inventory reserve charge in the comparable period, gross profit margin percentage was flat as compared to the nine months ended December 31, 2017.

Cold Chain Packaging gross profit margin decreased during the three and nine months ended December 31, 2018 primarily as a result of significantly higher commodities costs than in previous periods, and to a lesser extent, sales volumes related to a large customer contract containing lower-than-standard contractual pricing. We are currently implementing a commercial initiative to pass some of our increasing commodities costs on to our customers. Even if we are successful with this initiative, we expect that our Cold Chain Packaging gross profit margin percentage will continue to be substantially lower than the historical results of our other segments due to the nature of these products. See *General Trends* for additional discussion.

Operating Expenses

Operating expenses for the three and nine months ended December 31, 2018 decreased in total as compared to the prior year as follows:

Selling

Three and nine months ended December 31, 2018 versus December 31, 2017

Selling expense is driven primarily by labor costs, including salaries and commissions; accordingly, it may vary with sales levels. Selling expense increased six percent for the three months ended December 31, 2018 and decreased 17 percent for the nine months ended December 31, 2018, primarily due to timing of the reduction and replacement of selling personnel. As a percentage of revenues, selling expense was eight percent and seven percent for the three and nine months ended December 31, 2018, respectively, as compared to eight percent and ten percent for the three and nine months ended December 31, 2017, respectively. We plan to continue to strategically reinvest in sales and marketing resources in an effort to further increase organic revenues growth.

General and Administrative

Three and nine months ended December 31, 2018 versus December 31, 2017

Labor costs, including non-cash stock-based compensation, and amortization of intangible assets drive the substantial majority of general and administrative expense. General and administrative expenses increased \$1,475 during the three months ended December 31, 2018, due primarily to increased incentive-based compensation as a result of the Company's financial performance and higher salary expense. General and administrative costs increased \$3,299 during the nine months ended December 31, 2018, due primarily to increased incentive-based compensation as a result of the Company's financial performance and increases in non-cash stock-based compensation expense. We expect to incrementally increase our headcount in the future as we continue to invest in future organic revenues growth.

Research and Development

Three and nine months ended December 31, 2018 versus December 31, 2017

Research and development expense is predominantly comprised of labor costs and third-party consultants. Research and development expenses for the three months ended December 31, 2018 increased 14 percent and for the nine months ended December 31, 2018, decreased nine percent, due to streamlining the necessary engineers, materials, and supplies required to support existing businesses in the prior year. During the three months ended December 31, 2018, we began to make incremental investments in research and development to enhance existing products.

Impairment Loss on Goodwill and Long-Lived Assets

Three and nine months ended December 31, 2018 versus December 31, 2017

During the three and nine months ended December 31, 2018, we recorded impairment expense of \$3,669 related to goodwill and long-lived assets associated with our Cold Chain Packaging Division. During the three and nine months ended December 31, 2017, we recorded impairment expense of \$13,819 related to goodwill associated with our Cold Chain Packaging Division. See *General Trends* above for additional discussion.

Table of Contents

Estimated Legal Settlement

Three and nine months ended December 31, 2018 versus December 31, 2017

During the nine months ended December 31, 2018, we recorded a \$3,300 estimated legal settlement expense; see Note 10. “Commitments and Contingencies” within Item 1. *Financial Statements*.

Other Expense

Other expense for the three months ended December 31, 2018 is composed primarily of interest expense associated with our Credit Facility. During the nine months ended December 31, 2018, other expense is composed of interest expense associated with our credit facility, offset by a \$288 gain recorded on the sale of our Bozeman facility; see Note 5. “Facility Relocation” within Item 1. *Financial Statements* for more information.

Net Income

Our income tax rate varies based upon many factors but in general, we anticipate that on a go-forward basis, our effective tax rate will be approximately 26 percent, plus or minus the impact of excess tax benefits and deficiencies associated with share-based payment awards to employees; see Note 8. “Income Taxes” within Item 1. *Financial Statements* for additional discussion. The excess tax benefits and deficiencies associated with share-based payment awards to our employees have caused and, in the future, may cause large fluctuations in our realized effective tax rate based on timing, volume, and nature of stock options exercised under our share-based payment program. Net income for the nine months ended December 31, 2018 varied with the changes in revenues, gross profit, and operating expenses (which includes \$5,418 and \$2,424 of non-cash amortization of intangible assets and stock-based compensation, respectively). Net income for the nine months ended December 31, 2018 was also significantly impacted by a \$3,669 impairment loss on goodwill and long-lived assets (see Note 3. “Impairment Loss on Goodwill and Long-Lived Assets” within Item 1. *Financial Statements*).

Liquidity and Capital Resources

Our sources of liquidity include cash generated from operations, working capital, capacity under our Credit Facility, and potential equity and debt offerings. We believe that cash generated from these sources will be sufficient to meet

our short-term and long-term needs. Our more significant uses of resources have historically included long-term capital equipment expenditures, payment of debt obligations, quarterly dividends to shareholders, and acquisitions. Working capital is the amount by which current assets exceed current liabilities. We had working capital of \$11,778 and \$14,698 at December 31, 2018 and March 31, 2018, respectively.

Given our cash flow projections and unused capacity on our line of credit that is available until March 1, 2022, our liquidity is strong and is expected to meet our ongoing cash and debt service requirements for our general business needs. Interest-bearing debt of \$29,500 and \$46,625 was outstanding at December 31, 2018 and March 31, 2018, respectively. The Term Loan requires 20 quarterly principal payments, which began on March 31, 2017, in the amount of \$250,000 (increasing by \$125,000 each year up to \$750,000 in the fifth year). The remaining balance of principal and accrued interest are due on March 1, 2022. We were in compliance with all loan agreements at December 31, 2018 and for all prior years presented and have met all debt payment obligations.

Subsequent to December 2018, we made a \$3,000 payment under our line of credit.

As of June 30, 2018, our previously-announced move of our Omaha, Traverse City, and old Bozeman manufacturing facilities to our new facility in Bozeman, Montana was complete. We also completed the sale of our old Bozeman facility during the nine months ended December 31, 2018, which resulted in a gain of \$288.

We have recorded an estimated litigation accrual of \$3,300, which we expect to pay over the next twelve months; see Note 10. "Commitments and Contingencies" within Item 1. *Financial Statements*.

We routinely evaluate opportunities for strategic acquisitions. Future material acquisitions may require that we obtain additional capital, assume third party debt or incur other long-term obligations. We believe that we have the option to utilize both equity and debt instruments as vehicles for the long-term financing of our investment activities and acquisitions. At December 31, 2018, we had \$68,000 on unused capacity under our line of credit, subject to covenant restrictions. In addition, in June 2018, the SEC declared effective our Universal Shelf Registration Statement which allows us to sell, in one or more public offerings, common stock or warrants, or any combination of such securities for proceeds in an aggregate amount of up to \$300,000. The terms of any offering, including the type of securities involved, would be established at the time of sale.

Table of Contents***Dividends***

We have paid regular quarterly dividends since 2003. We declared and paid dividends of \$0.16 per share for the three months ended June 30, 2018, September 30, 2018, and December 31, 2018 as well as each quarter for the year ending March 31, 2018.

In January 2019, we announced that our Board of Directors declared a quarterly cash dividend of \$0.16 per share of common stock, payable on March 15, 2019, to shareholders of record at the close of business on February 28, 2019.

Cash Flows

Our cash flows from operating, investing, and financing activities were as follows (in thousands):

	Nine Months Ended December 31,	
	2018	2017
Net cash provided by operating activities	\$20,292	\$16,078
Net cash used in investing activities	(3,825)	(16,840)
Net cash (used in) provided by financing activities	(16,057)	884

At December 31, 2018, we had contractual obligations for open purchase orders of approximately \$3,823 for routine purchases of supplies and inventory, which are payable in less than one year.

Critical Accounting Estimates

Critical accounting estimates are those that we believe are both significant and require us to make difficult, subjective, or complex judgments, often because we need to estimate the effect of inherently uncertain matters. These estimates are based on historical experience and various other factors that we believe to be appropriate under the circumstance. Actual amounts and results could differ from these estimates made by management. Certain accounting policies that require significant management estimates and are deemed critical to our results of operations or financial position are discussed in our Annual Report on Form 10-K for the year ended March 31, 2018 in the Critical Accounting Policies and Estimates section of “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of

Operations.”

Item 3. *Quantitative and Qualitative Disclosures about Market Risk*

We have no derivative instruments and minimal exposure to commodity market risks. A portion of our operations consist of activities outside of the U.S. and we have currency risk on the transactions in other currencies and translation adjustments resulting from the conversion of our international financial results into the U.S. dollar. However, a substantial majority of our operations and investment activities are transacted in U.S. dollars and therefore our foreign currency risk is not material at this date.

Item 4. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the “Exchange Act”) that are designed to ensure that information required to be disclosed in Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms, and that such information is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Our management evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our internal control over financial reporting as of December 31, 2018 based on the framework in “Internal Control – Integrated Framework” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in 2013. Based on that evaluation, our management concluded that our internal control over financial reporting was effective at December 31, 2018.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the three months ended December 31, 2018 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

Table of Contents

Part II. Other Information

Item 1. *Legal Proceedings*

See Note 10. “Commitments and Contingencies” within Item 1. “*Financial Statements.*” for information regarding any legal proceedings in which we may be involved.

Item 1A. *Risk factors*

We are affected by risks specific to us as well as factors that affect all businesses operating in a global market. The significant factors known to us that could materially adversely affect our business, financial condition, or operating results are described in our Annual Report on Form 10-K for the year ended March 31, 2018, under the heading “Part I – Item 1A. Risk Factors.” There have been no material changes to those risk factors.

Item 2. *Unregistered Sales of Equity Securities and Use of Proceeds*

On November 7, 2005, our Board of Directors adopted a share repurchase plan which allows for the repurchase of up to 300,000 of our common shares, of which 162,486 have been purchased to date. This plan will continue until the maximum is reached or the plan is terminated by further action of the Board of Directors. We have made no repurchases of our common stock in the current or any of the last three fiscal years.
